PERSONAL NOTES

Mr. H. Gordon Strathy has returned from the old country.

Mr. J. W. Langmuir, of the Toronto General Trusts Corporation, has arrived back from a trip to England.

Mr. R. E. Harris, K.C., president of the Nova Scotia Steel and Coal Company, has left on a trip to England.

Mr. F. J. James, of Messrs. Nay and James, Regina, was a recent visitor to the head office of *The Monetary Times*.

Mr. G. R. Geary, K.C., mayor of Toronto, will resign that position and become the corporation counsel of that city.

Mr. E. Denhold Young, chairman of the Dominion Agency, Limited, London, England, was in Toronto this week.

Mr. J. J. Durance, of the General Accident Assurance Company of Canada, is taking a business trip in Western Canada.

Lord Joicey has purchased 24,800 acres of farm land near Fort George, B.C., for which he paid approximately \$450,000.

Mr. G. W. Ross, president of the Asbestos Corporation of Canada, has been elected a director of the Prudential Trust Company.

Mr. C. Hamilton Wickes, British Trade Commissioner in Canada called on Premier Borden and the Crown Ministers last week at Ottawa.

Mr. D. A. Y. Merrick, who has been accountant on the branch of the Bank of Nova Scotia at Vancouver, has been appointed assistant manager of the branch.

Mr. F. B. Bennett, who has been associated with the Royal Bank in Winnipeg, will shortly assume the management of the main office of the Sterling Bank in Toronto.

Mr. W. G. H. Browne, who for some time has been connected with the firm of Messrs. Dymont, Cassels and Company, Toronto, has now been admitted into partnership.

Mr. F. D. Williams, managing director of the London Mutual Fire Assurance Company, leaves this week on a business trip to the western provinces and the Pacific coast.

Mr. H. H. Weber, of the *Illustrated Zeitung*, Leipzig, was a visitor to *The Monetary Times* head office this week. Next spring he will issue a German and English edition of his paper respecting Canada.

Mr. N. H. Bastedo has been appointed manager of the Canada Life Assurance Company for the city of Toronto following the resignation of Mr. H. C. Cox to become president of the Imperial Life Assurance Company.

Mr. Charles Wurtele, formerly of the firm of Messrs. Cawthra Mulock and Company, has been admitted into partnership in the firm of Messrs. A. E. Osler and Company, members of the Toronto Stock Exchange.

Mr. Edson L. Pease, general manager and vice-president of the Royal Bank of Canada, and Mr. A. J. Brown, K.C., Montreal, one of the directors of the bank, are visiting Vancouver, Vancouver Island and Prince Rupert.

Mr. George C. Howie has been appointed chief clerk of the London and Lancashire Accident and Guarantee Company in succession to Mr. F. J. J. Stark, who became manager of the Dominion Gresham's casualty departments.

Superintendent U. E. Gillen, of the middle division of the Grand Trunk, has been transferred to the position of superintendent of the eastern division, with headquarters in Montreal. To fill the vacancy made by Mr. Gillen's trans-

ference, Superintendent H. E. Whittenburger, of the eastern division, has been moved to Toronto.

Mr. P. Dubee, secretary-treasurer of the Montreal Tramway Company, has been elected president of the Canadian Street Railway Association. At the previous annual meeting Mr. Dubee was elected vice-president, and held that office during the past year.

Sir Edmund B. Osler has been elected as vice-president of the Confederation Life Association, to fill the vacancy caused by the recent death of Mr. Frederick Wyld, and Col. A. E. Gooderham has been elected as a director to succeed the late Mr. S. Nordheimer.

Mr. Patrick Welch, of the firm of Messrs. Foley, Welch & Stewart, has resigned from the vice-presidency of the Pacific and Great Eastern Railway Company, and has secured the contract to build the line throughout its length from North Vancouver to the Grand Trunk Pacific main line.

Mr. B. G. Winans, vice-president of the Dominion Bond Company, has returned from a six weeks' trip abroad, and is convinced that British capital will continue to interest itself in safe and sound Canadian industrial and other securities.

Mr. Stanley Mann, manager of the Toronto office of the Dominion Bond Company, Limited, has been appointed general manager of the company. Mr. Hayden Williams has been promoted from assistant manager to manager of the Toronto office. The other offices of the company are in Montreal, Vancouver and London, Eng.

Mr. James G. Begg, aged 75 years, who died at his home, 378 Brunswick Avenue, Toronto, was interred on Monday last. Mr. Begg had lived in Toronto for about twenty years, and was connected with the Manufacturers' Life Insurance Company. He was born in Edinburgh, Scotland, and came to Canada when young, settling in London, Ont.

Mr. I. Bonner, president of the Bonner-Worth Company, manufacturers of yarns, with plant at Peterborough, has taken the position of general manager of Penman's Limited, made vacant by the resignation of Mr. Thompson. Mr. Bonner was formerly connected with Penman's and will continue his connection as president of the Bonner-Worth Company.

Mr. E. Tichenor has been appointed superintendent of agencies of the Western Life Assurance Company, head office, Winnipeg, coming from the Prudential Life of Newark, where he had several years' life insurance experience. The Western Life Assurance Company are opening a branch office in Calgary, Alberta, which will be in charge of Mr. T. J. Schumm, cashier.

Mr. J. A. Bucknell has been appointed manager of the Canada Life for Michigan, with headquarters at Detroit. He is returning the scene of his earlier labors, for in 1891 he was appointed a district agent at Saginaw in that state. Mr. Bucknell has been manager of the Canada Life for Western Quebec since 1908. His headquarters have been Montreal, and in the four years of his stay he has become closely identified with its people and institutions. He is a member of the St. James and Canada Clubs, and also belongs to the Montreal Amateur Athletic Association, the Montreal Curling Club, and the Westmount Lawn Bowling Club.

CREDIT MEN'S ACTIVITIES

The Canadian Credit Men's Association, Limited, recently resumed their monthly meetings at Winnipeg. The president, Mr. W. S. Fallis, of the Sherwin-Williams Company, was in the chair.

Mr. J. Bruce Walker, Commissioner of Immigration, delivered an address entitled, "Empire Building." It was announced that Mr. J. S. Dennis, assistant to the president of the Canadian Pacific Railway, would be the speaker at the next meeting.

Mr. Henry Detchon will attend a meeting of the British Columbia Credit Men's Association in Vancouver this month to make final arrangements, if possible, for taking over that association, and this will link up the whole Dominion.

The legislation committee has not been idle. It is practically assured that the Bulk Sales Act will be passed by the legislature in Alberta, and Minister of Justice Doherty, at Ottawa, has promised his attention to the amendment of the criminal code governing false statements.

The capital stock of Western Canada Securities Company, Limited, has been increased from \$100,000 to \$700,000 by the issue of 120,000 shares of new stock of \$5 each.

The following copies of *The Monetary Times* of Volume 49, 1912, are required:—No. 4, July 27; No. 8, August 24; No. 10, September 7; No. 12, September 21. Any subscriber sending in one of these copies will have his subscription extended one month free.

LIFE INSURANCE AGENTS

They Are the Point of Contact Between the Companies and the People—Inauguration of Income Policies

Declaring that the life insurance agents form the point of contact between the companies and the people, general counsel Robert Lynn Cox, of the Association of Life Insurance Presidents, urged the agents at the meeting of the National Association of Life Underwriters to exert their influence in keeping the business up to the times. "It is from you that executive officers must get most of their knowledge of what public opinion is demanding," said Mr. Cox. The title of his address was "Keeping up with the Times." Among other things, Mr. Cox suggested the advisability of life insurance companies co-operating in the matter of information on real estate mortgage loans so as to provide for wider geographical distribution of investments. Mr. Cox said in part:

Life insurance seems peculiarly adapted for keeping abreast of the times. It is elastic, ever adjustable to the demands of our rapidly developing social and economic life. For instance, we see it still further protecting the helpless by providing income policies under which the beneficiaries receive stated sums periodically instead of a lump sum that might be filched from them by unscrupulous persons. Another illustration of the way our institution is keeping pace with the times is the new form of protection offered by so-called partnership and corporation insurance. In this we indemnify business concerns against the risk involved in the death of their guiding hands.

Not Merely Insurance Salesman.

Keeping up to the times is exemplified further in practice by the changing attitude of the agent toward the prospect. We find him now, as has often been remarked of late, taking the part of counsellor to the insured rather than acting merely as a salesman of insurance. This re-adjustment of the activities of the agent places him on a higher plane, thereby helping to classify his work as that of a profession. Incidentally this changed view also enables the agent to be received everywhere on a better basis. The agents are doing much to keep the business of insurance in harmony with progressive thought and action. Help put this great institution still further in touch with the times.

For many years life insurance companies have been teaching the public that men cannot afford to stand alone in carrying the risk of untimely death. They have been offering to the public a plan, that if followed generally, would obviate much of the penury and want that have afflicted widows and orphans since the world began. They have even devised ways in which men acting in co-operation can provide for themselves against times of misfortune and need. These plans were all based on co-operative principles and they all involve mutual trust and collective helpfulness. They struck a hard blow at our much vaunted individual independence and showed how dependent man is upon his fellowmen.

Public and Life Insurance.

The success these companies have attained in teaching this lesson on what can be accomplished by co-operation is shown in the extent to which the public has taken out life insurance. Incidentally the plan has brought together large aggregations of capital, representing in effect the savings of a people against a time of need.

When it comes to influencing home office officials there is no group of men so powerful as the agents. You are the point of contact between the companies and the people. It is from you that executive officers must get most of their knowledge of what public opinion is demanding. Furthermore, you are not only important in this indirect influence you may have on the management of your company, but you are the medium through which the public is given impressions of the companies you represent. Hence it is that what you can do will be expressive of the interest the companies you represent have in the public welfare. I am not unmindful of the fact that you have a living to earn and that your first and principal duty must be to write business. But I fancy bread and butter needs backed up occasionally by letters from the superintendent of agencies will prevent you from forgetting the practical side of the business.

The first experiment with an oil-driven vessel in the Government service is to be made shortly by the Department of Marine and Fisheries. A new boat, the C. G. S. Dollard, is under construction for the department by the Kingston Shipbuilding Company at Kingston. The Dollard is to be used in the St. Lawrence lighthouse service under the direction of the Montreal agency. It was originally intended to have her fitted with the ordinary fuel accommodation, but the department has now decided to have her completed with provision for oil fuel.

SUB-STANDARD LIFE RISKS

Should There Be Such a Class is the Question Raised by a Prominent Underwriter

The sub-normal risk constitutes one of the interesting factors in life insurance. There may, in the near future, become operative in Canada, a new company which will devote its energy entirely to that class of business. At the Chicago meeting of the American Life Convention President Baldwin, of the Pittsburgh Life & Trust Company discussed the sub-standard class. That company, through the reinsurance of the risks of the Security Trust & Life, which were wholly of this character, had an opportunity to study the subject thoroughly. The most notable feature of Mr. Baldwin's paper was the question which he raised as to the propriety of having a sub-standard group at all. He believes that life insurance can be more satisfactorily conducted if all who are fitted for insurance were combined under a single table. The company that has an experience up to 95 per cent. of the mortality table and insures 75 per cent. of the risks now classified as not preferred, would better meet the requirements of the business according to his views.

Broader Range of Selections.

This, in the opinion of the Insurance Monitor, is certainly a radical view to take of this important subject. The question is how is a company to do justice to its policyholders if, with the knowledge that a large body of its members is subject to an exceptionally heavy mortality, it at the same time classified them with others that it is equally sure will be subject only to a light mortality? However, the real issue which he seems to raise is as to whether the whole system of the business should not be modified and broadened as to the range in which selections are to be made. The difficulty is that life insurance is permeated with the principle of individual selfishness. It is not eleemosynary in its nature. The company that had such a heavy mortality experience would find it difficult to compete with those with carefully selected lives.

Insurable at Present Tabular Risks.

He would, as we understand his paper, eliminate from insurance, by an ordinarily conducted company seeking good risks, all who fall below a certain standard, but would so broaden that standard as to include all who are fairly insurable at the present tabular risks. The experience of the Security Company leads him to believe that it would be dangerous to insure sub-standard business under a non-participating contract. He does not believe in the lien plan and holds that the proper method of dealing with such contracts is under the system of deferred dividends. He thinks that the extra premium plan is the only proper one. He holds that the risks rejected by other companies with a knowledge of their rejection and the opportunity which this offers for selection against the company are subject to a much higher rate of mortality than those that apply believing they are first-class, and that the mortality on the latter would be about equal to that of the tabular now in use.

HEALTH CONSERVATION AND LIFE INSURANCE

Prof. Irving Fisher of Yale University, in addressing the Fourth National Conservation Congress at Indianapolis, said that the three great agencies for the preservation of human life in the future are the insurance companies, the public press and the Government. Although the convention was devoted to conservation in its general sense, the conservation of human life came in for a great deal of discussion by many eminent speakers. E. E. Rittenhouse, conservation commissioner of the Equitable Life of New York, estimated our annual death toll from preventable causes at 625,000, and characterized this fact as "our real race suicide problem." Dr. Harvey W. Wiley lamented the fact that our average life-time is but forty-four years approximately. In connection with these remarks the patent medicine industry and the practice of adulterating foods were strongly criticized. The consensus of this branch of the Congress seemed to be in favor of the compilation and publication of more complete vital statistics relating to the United States and the permanent establishment of a Federal Health Bureau. This is also proposed for Canada and will undoubtedly have the support of the Canadian life insurance companies.

The Canadian Guaranty Trust Company has established at Regina an insurance and rental department, in charge of Mr. R. T. Agar, who has conducted a successful fire insurance business at Ingersoll, Ont. Mr. Agar has also had considerable experience as an inspector and adjuster, and under his care this branch is expected to do a large amount of business.

All Insurance Men will use the Little Red Book

Because (1) It is convenient to carry in the pocket (size 6 in. x 4½ in.) (2) It gives all the information about life offices in Canada necessary in competition. (3) Because it gives details only obtainable from three other books. (4) Because although cheap it is good; it is only \$1.00 per copy. (5) Because the other books giving the same information cost \$7.00 and consequently

It Saves You Six Dollars Every Time

This little book which is now ready, has been compiled by Stone & Cox, who are the leading publishers in the United Kingdom of all insurance papers and books, besides publications on other trades. Their little books on insurance have great circulations in the United Kingdom, Australia, South Africa, India and the East because they are sound, reliable and practical and just what is required. Stone & Cox have just started a Canadian Branch and this little red book on Canadian Life Insurance (which will be issued every year) has already obtained a large circulation before issue and the first edition is rapidly being sold out. Many repeat orders are being received.

THERE IS NO BOOK LIKE IT IN CANADA

There is no book but this which an agent can carry every day without inconvenience. Most books are too bulky, and all of them fail to put the details so simply that they are clear to both skilled and unskilled users.

Simplicity is a feature of this book.

LOOK AT ITS CONTENTS.

1. Premium Rates (with or without profits)
2. Surrender Values.
3. Dividends paid by all offices.
4. Details of Annual Statements.
5. Expense Ratios.
6. Details of Valuation Statements.

INDUSTRIAL SUPPLEMENT

There is also an industrial supplement to the book, which gives the following information about all industrial offices working in Canada. (1) Premium rates and benefits in all plans; (2) Surrender values; (3) Dividends, if any; (4) Annual statement and expense ratios; (5) Valuation statement and new business; also, *Will Form, Article on Beneficiaries, Article on Disposition of Estates, Showing where Probate and Letters of Administration can be secured* (this by Toronto Lawyer). This supplement is invaluable to industrial men. Price 50 cents per copy. It is the only book issued in Canada on Industrial Insurance.

ORDER FORM

To Messrs. Stone and Cox,
C/o Miln Bingham Printing Company,
6 Johnson Lane, Toronto.

Dear Sirs,

Please send me specimen copy of Stone and Cox Insurance Tables* for which I enclose REMITTANCE for\$ cts.

Signed.....

Address

* Ordinary Insurance \$1.
Industrial Insurance 50 cents.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Fairfax, Man.—Mr. T. W. Jones' barn. Loss \$4,000. Cause unknown.

Paisley, Ont.—October 13—Paisley Pump Works. Loss unknown. Cause, lightning.

Book-keeper to Accountant

A LITTLE JOURNEY BY

'The Shaw Road'

'The Sure Road'

'The Short Road'

It's as natural for a book-keeper to wish to be an accountant as it is for a boy to wish to be a man.

It's natural for the book-keeper to wish for the short hours—handsome income—and position of weight and influence in the business world which the accountant enjoys.

BUT THIS IS A MERE WISH.

For over eight years we have been pointing the way from book-keeper to accountant.

For over eight years hundreds of Canada's book-keepers have availed themselves of the opportunity we present. They chose the Shaw Road—they realized their wish—to-day they are successful accountants; many enjoying the distinction of having earned a C.A. degree.

IT'S ONLY A LITTLE JOURNEY BY THE SHAW ROAD.

IT'S THE ONLY SURE ROAD.

IT'S THE ONLY SHORT ROAD

ARE YOU A WISHER OR A WINNER?

Read the convincing testimony of a few who have travelled the SHAW ROAD.

This is the School that is Known by Its Fruits.

We can back up our every claim by voluntary statements from scores of successful students and graduates.

"Please accept my thanks for your congratulatory letter of the 17th inst. While naturally feeling gratified in being successful in passing the Intermediate Examination, I think it only fair to give credit where it belongs, and I have no hesitation whatever in saying that I have been greatly assisted in preparing for the examinations by your course."
A. A. CRAWLEY, Ottawa, Ont.

"As you may be aware, I was one of the successful candidates on the Intermediate Examination held in this province recently. I wish to express my sincere recognition of the immense help that the Course in Chartered Accountancy, which I am taking from your school, has been to me in my efforts to pass this examination."
A. E. PARKER, Prince Albert, Sask.

"I am pleased to inform you that I was successful in passing the Final Examination for a Chartered Accountant for Alberta. Although I have in the past expressed my gratitude to you for your kind consideration in my work and the help which you have given me, I wish again to say that I am deeply grateful to you for the interest you took in my case and for the valuable assistance which you gave me from time to time."
W. W. GOULD, Edmonton, Alta.

"I have much pleasure in expressing my appreciation of your course of tuition, by means of which I have been enabled to pass the Intermediate Examination of the Institute of Chartered Accountants of British Columbia."
W. G. ROWE, Vancouver, B.C.

Better Than Ever

Our courses have been revised this year and have been passed upon by an advisory board of fifteen, comprising leading chartered accountants, barristers and teachers.

Fill in, detach and mail coupon to-day, and get free literature. *Send the coupon now* while you think of it.

LEGAL NOTICE

CANADIAN COUNTRYMAN PUBLISHING COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of September, 1912, incorporating James Steller Lovell, accountant; Robert Gowan, Joseph Ellis and John Joseph Dashwood, solicitors' clerks; William Bain, bookkeeper; Henry Alfred Tilcock, Kathleen Patricia Warren, Maud Berry and Juno Beatrice Shier, stenographers; Beatrice Estelle Brent, clerk; and John Francis Lash, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on business as proprietors, editors and publishers, and to print, publish and sell magazines, books, journals, newspapers, periodicals, pamphlets, advertisements, maps and other publications, whether literary or otherwise, and to act as agents for the printing, publishing and sale of the same to others; (b) To carry on all or any of the business of printers, map makers, lithographers, type-founders, stereotypers, electrotypers, photographic printers, photolithographers, chromo-lithographers, engravers, die sinkers, bookbinders, paper box manufacturers, designers, draughtsmen, paper and ink manufacturers, booksellers, publishers, advertising agents, engineers and dealers in or manufacturers of any other articles or things of a character similar or analogous to the foregoing or any of them or connected therewith; (c) To acquire by purchase or otherwise and dispose of the copyright of any book, article, story, engraving or other publication which may be copyrighted; (d) To prepare or acquire by purchase or otherwise and dispose of any literary, scientific or artistic works, translations or compositions and syndicate articles for simultaneous publication or otherwise, and special or syndicate manuscript or telegraphic correspondence; (e) To act as special agents for syndicates, publishers, printers, and to supply general news articles by telegraph or otherwise to newspapers; (f) To manufacture, buy, sell or otherwise dispose of ready prints, patent plates, bases, type printing machinery or any other machinery for use in printing establishments; (g) To establish competitions in respect of contributions or information suitable for insertion in any publication of the company or otherwise, or for any other purpose of the company, and to offer and grant prizes, rewards and premiums of such character and on such terms as may seem expedient; (h) To acquire by purchase, lease or otherwise, and to own and hold lands or interests therein which may be necessary or convenient for the purposes of the company, together with any buildings or structures that may be on such lands or any of them; and to sell, lease or dispose of the same in whole or in part in such manner as the company may deem fit; (i) To purchase and otherwise acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (j) To purchase or otherwise acquire and undertake all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person or company carrying on in whole or in part business similar to the business which this company is authorized to carry on or possessed of property suitable for the purposes thereof; (k) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in, or about to carry on or engage in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company; (l) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise any corporation in the capital stock of which the company holds shares, or of any corporation or person or persons with which it may have business relations, and to act as employee, agent or manager of any such corporation, person or persons, and to guarantee the performance of contracts and obligations by any such corporation, or by any person or persons with whom the company may have business relations; (m) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Countryman Publishing Company, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 13th day of September, 1912.

THOMAS MULVEY,

Under-Secretary of State.

11-2

Dated at Toronto this 12th day of October, 1912.

BLAKE, LASH, ANGLIN & CASSELS,

Solicitors for

CANADIAN COUNTRYMAN PUBLISHING COMPANY, LIMITED.

ROLLING STOCK CONTRACTS

The Canadian Car and Foundry Company have been awarded the following contracts:

500 additional steel-framed box cars; price, \$1,210 each.
100 Hart convertible cars of 40 tons capacity.

100 steel underframed platform cars of 80,000 pounds capacity each; price, \$1,070.

Fifty Otis all-spring dump cars; 20 refrigerator cars; price, \$2,058.50 each.

One 8,000-gallon tank car; price, \$2,695.

In addition, the Preston Car and Coach Company, of Preston, Ont., has been awarded the contract for three baggage cars for the Intercolonial Railway at \$7,500 each.

Messrs. Goldman and Company, Toronto, are issuing a fortnightly list of current quotations on principal bonds for the benefit of their clients, and will send same on request.

LONE CANADIAN LOAN IN LONDON

Sounds Conditions in the Overseas Market—Underwriters Took Seventy-seven Per Cent. of Canadian Northern Issue

The underwriters of the new Canadian Northern Railway £2,057,612 5% income charge convertible stock loan, issued at 106, will have to take 77 per cent. of the issue. The result of the loan is what was expected under present conditions prevailing in London. The Canadian Northern Railway has made one previous issue in London this year, viz., £1,438,356 4 per cent. perpetual consolidated debenture stock at 95. Sixty-four per cent. of that issue, which was made in June, was left with the underwriters. The Canadian Northern loan last week is the first Canadian issue overseas since August.

The war atmosphere is upsetting the plans of public borrowers in London, says a cable message to the Montreal Star. 78 per cent. of the Sao Paulo Electric 5 per cent. bond issue was left with the underwriters.

Queensland, New South Wales and New Zealand are all anxious to make public issues, though three months ago the public took only ten per cent. of Queensland's ten million dollar 3½ per cent. loan.

Applications have been made to list the following on the London Stock Exchange: Brazilian Traction, 1,045,000 shares; Canadian Cottons, £339,000 fives; City of Regina £97,300 four and halves; Western Canada Power, £205,400 fives.

A fairly large block of bonds of the P. Lyall and Sons' Construction Company has been sold privately in London by Messrs. Greenshields and Company. The company's total bond issue is \$1,250,000 20-year first mortgage 6 per cents.

TORONTO HYDRO-ELECTRIC'S FINANCES

The report of civic auditor Sterling on the conduct of the city's hydro-electric business finds that it is not conducted on proper lines, that the system of bookkeeping employed is cumbersome and smothered in detail, the business over-staffed and the electric current purchased on a wrong basis.

Mayor Geary in reply defends the system of bookkeeping as one of the best known, and points out that not one man more than is necessary is employed in the business. As for the purchase system, it is the "peak-load" employed by the Hydro-Electric Power Commission of Ontario. The auditor's suggestion implied the use of the argument used freely by the opponents of the Hydro by-laws during the fight to pass them.

The city auditor summarizes what he deems to be the financial position of the Toronto Hydro-Electric Commission to June 30 last, as follows:—

Deficit to 31st December, 1911, carried to capital expenditure	\$ 117,803.35
Deficit to 30th June, 1912	85,642.31
Accrued sinking fund at 30th June, unprovided for	50,888.07
Proportion of interest charged to capital	36,305.92

Net shortage to June 30th, 1912	\$ 290,639.65
---------------------------------------	---------------

Outstanding Liabilities:

Unadjusted items in City Treasurer's account ...	16,795.62
Shortage stores account	113,477.40
Provincial Hydro Commission	248,245.81

\$ 378,518.83

Mayor Geary refers to the unadjusted balance of \$16,795.62 at the close of 1911 being carried forward, and points out that this matter is in dispute. He says it is a difference between revenue over-estimated by the council and actual revenue, and in the opinion of the Commission should not be charged to the Hydro-Electric at all. The Mayor says that the sum of \$378,518.83 given as the outstanding liabilities on December 31, 1911, includes items which are not liabilities, and says the sum of \$248,245.81 represents the amount due the Provincial Hydro-Electric Commission, plus interest to July 1, 1912, and not December 31, 1911.

The Mayor says that the auditor did not do justice to the Commission in selecting the first six months to show the deficit, as the business has rapidly improved since then, the initial loss being made good at the rate of \$100,000 per annum.

The Liverpool-Manitoba Assurance Company has received a license to transact the business of fire insurance in British Columbia. Mr. L. U. Conyers, Victoria, is attorney for the company.

ALBERTA'S CITIES ARE ALERT

Edmonton's Interurban Railway—Natural Gas at Pelican Portage—Dry Farming Congress Assists Development

(Special correspondence.)

Mr. M. Kimpe, managing director of the Edmonton Interurban Railway Company, which was incorporated in 1910, and reorganized on September 16 last, states the company will build 300 miles of electric lines to connect Edmonton with numerous towns in central Alberta. Mr. J. W. McLeod, contractor, has 150 men on the grade for the first unit of six miles, from the northwestern city limits to St. Albert, where a power-house, with sufficient capacity to operate 26 miles of line, will be erected. Steel will be laid the coming winter and it is planned to have the line in operation early next June.

The company, which is headed by Mr. George Barbey, of Paris and Vancouver, is working under a charter granted by the provincial government of Alberta, and is financed by French and Canadian investors. Mr. Barbey is president of the Franco-Canadian Corporation, also head of a French syndicate, which already has more than \$10,000,000 invested in Edmonton, Winnipeg, Vancouver, Montreal and other centres in western Canada, and is a director of the Franco-Canadian Trust Company.

Mr. J. H. Pickard, of Edmonton, who is identified with several financial institutions, is vice-president, and among the directors are Mr. Bureau, formerly of Edmonton, now a resident of Paris, where he is president of the Franco-Canadian Mortgage Corporation, and Mr. J. H. Gariepy, a financier and property-owner in Edmonton.

Edmonton Investigates Flow of Natural Gas.

A party of business men and journalists, accompanied by the city's gas expert, have just returned from a trip to Pelican Portage, on the Athabasca River, 170 miles north of this city, where they went for the purpose of inspecting the flow of natural gas recently struck by a company boring there for oil, and which offered to enter into negotiations with the city with a view to piping the gas down to be delivered into the city mains at the city limits. This new well is immediately beside the old well bored under the instructions of the Dominion Government in 1897, and which has been blowing off under heavy pressure ever since. The new well has gone considerably deeper than the old government well, and is of larger diameter. The city gas engineer has not yet made his report; but it is understood that the new well shows a pressure of at least 700 pounds, and apparently unlimited volume. An alternative source of supply for the city is the flow recently struck at Tofield, forty miles east.

A mining engineer has recently returned from an inspection of a property belonging to San Francisco capitalists consisting of some 28,000 acres of coal lands on the Smoky River. He will recommend his principals to undertake the building of a branch line of railway to the property with a view to early development of the coal deposits.

Will Exploit Canadian Wheat Fields.

The governors of the states in the United States of America have been requested to send delegates to the Dry-Farming Congress at Lethbridge, and they are responding actively. Governor Deneen, of Illinois, has appointed thirty-seven representative farmers and bankers to go to Alberta as delegates to this congress. Exploiting the possibilities of Canadian wheat lands to these thirty-seven representative farmers and bankers from Illinois is, of course, only incidental, but when the thirty-seven get back home they will exploit Canadian wheat fields to other good farmers and bankers, and it is reasonable to expect an exodus of "representative farmers" from Illinois to buy and settle, or urge their neighbors to raise wheat in Alberta.

The Dry-Farming Congress teaches farmers how to conserve moisture by intelligent cultivation, educates them in soil culture and seed selection and guides the inexperienced settler in the adoption of farming methods that will bring the highest attainable profits for their labor.

Farming and Mining.

The total crop within 60 miles of Lethbridge will exceed 16,000,000 bushels of wheat, 10,000,000 bushels of oats, 1,000,000 bushels of barley and half a million bushels of flax. Southern Alberta wheat has been pouring into Winnipeg and Fort William, and eight out of every ten cars for which grades have been received, have graded No. 1.

The coal mines are getting busier than they have been for the past two years. At Lethbridge about 1,500 miners are working full time, and through the Crow's Nest Pass, west of Lethbridge, another 5,000 men are working full time with the exception of an occasional shut down due to scarcity of cars.

DELAWARE CONTINUES AS UNDERWRITERS' AGENCY

The Delaware Insurance Company, of Philadelphia, which recently amalgamated its business with the Westchester Fire Insurance Company of New York, continues its business throughout the continent as an underwriters' agency, under the name of The Delaware Underwriters, and managed by Mr. J. Parsons Smith, Jr., with headquarters in the Delaware Building, Philadelphia. The Delaware, as heretofore will confine its operations in the Dominion largely to the West, the provinces of Alberta and Saskatchewan, reporting to the general agency of Messrs. Hornibrook, Whittemore and Allan, Calgary.

The policies of The Delaware Underwriters will have a net surplus in excess of one and a half millions of dollars, in view of the amalgamation of interests.

FRANCO-CANADIAN TRUST COMPANY ORGANIZED

The Franco-Canadian Trust Company, Limited, has been organized with a British Columbia charter, and head office in Vancouver. The organizer of the company is Mr. Georges Barbey, of Paris, France, who is the president of the Franco-Canadian Corporation, Limited, a company with a subscribed capital of \$3,750,000, and a paid up capital of \$2,250,000, which has made extensive real estate investments in Montreal, Winnipeg and Vancouver.

The capital of the trust company was subscribed in May and June. The authorized capital is \$2,000,000, \$1,600,000 having been subscribed, of which 50% has been called and paid up.

The directorate is as follows:—Hon. F. Carter Cotton, Vancouver, president; Georges Barbey, Paris; Vicomte de Douville Maillefeu, Paris; G. Ivor Gwynn, Vancouver; André Istel, Vancouver; James A. Mitchell, Victoria; L. Noyer, Victoria; and Maurice de Schlumberger, Paris.

Messrs. Georges Barbey and M. de Schlumberger have been appointed managing directors of the trust company. There has been constituted an executive committee for Canada composed as follows:—The Hon. F. Carter Cotton, G. Ivor Gwynn, and André Istel.

The company has been formed to engage in a general mortgage, loaning and finance business. At present they have loaned money on first mortgages and agreements of sale in Vancouver only, but as the business increases they intend to extend their field of operation to Alberta, Manitoba, and later to Eastern Canada.

FIRE LOSS OF UNITED STATES AND CANADA

The fire loss of the United States and Canada for the month of September, 1912, as compiled from the records of the New York Journal of Commerce, aggregates \$13,779,300, as compared with \$11,333,250 for the same month last year, and \$11,700,000 for September, 1910. The losses by fire since the first of January this year total \$177,529,950, about a million and a half less than for the first nine months of last year, when the figures reached \$178,988,800, and over eighteen millions more than for the same time in 1910, \$159,347,300.

The following table gives a comparison of the losses by months thus far this year with the figures for the same months in 1910 and 1911, together with the losses for the balance of those years:

	1910.	1911.	1912.
January	\$ 15,175,400	\$ 21,022,450	\$ 35,053,450
February	15,489,350	16,415,000	28,001,650
March	18,465,500	31,569,800	16,650,850
April	18,001,800	17,670,550	16,340,400
May	18,823,200	21,422,000	21,013,950
June	13,183,600	20,601,050	16,103,450
July	26,847,000	25,301,150	15,210,100
August	21,570,550	12,662,650	14,158,800
September	11,700,000	11,333,250	13,779,300
Total, 9 months..	\$159,347,300	\$178,988,800	\$177,529,950

Canada's September fire losses, as compiled by The Monetary Times, amounted to \$883,949.

Application will be made at the next session of the Dominion parliament for an act to incorporate the Canada Hail and Fire Company, with power to carry on the business of a hail insurance company in all its branches. Messrs. Campbell, Pitblado, Haig, Montague and Murray, Winnipeg, are solicitors for the applicants.

DEBENTURES FOR SALE

CITY OF WETASKIWIN

DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned will be received up to 5 p.m., October 30th, 1912, for the purchase of the following debentures:—

Waterworks and sewers, 50 years at 5 per cent.....	\$16,000.00
Electric light, 20 years at 5 per cent.....	23,000.00
Local improvement-concrete walks, 20 years at 5 per cent.	6,445.06

The following are the provisional directors:—Messrs. J. J. Walsh, real estate; J. F. Brown, manufacturer; N. Allan, physician; E. J. Hearn, barrister, and J. L. Coffee, broker, all of Toronto.

TOWN OF MELVILLE, SASK.

TENDERS WANTED FOR DEBENTURES

Sealed tenders, marked "Tenders for Debentures," will be received up to six p.m., November 11th, 1912, for the purchase of all or any of the following issues. Tender price to include accrued interest, cost of printing debentures and bank charges:—

\$55,000, Town Hall Issue.—These are 40 years, payable at end of term, with interest payable yearly at 5 per cent., and are in issues of \$1,000.

\$6,000, Mill Loan Issue.—This issue bears interest at the rate of 5 per cent., and is repayable in six equal annual instalments of principal and interest.

Curing certificates of both the above issues have been procured from the Government of Saskatchewan guaranteeing the legality, and the debentures are available for delivery on demand.

\$43,300, Debentures.—These bear interest at the rate of 5 per cent., and are repayable in thirty equal annual instalments of principal and interest.

Payments in all cases at The Merchants Bank, Melville, Sask.; Toronto, Ont., or Montreal, Que. The highest or any tender not necessarily accepted. Further particulars may be obtained from

FRED. H. CLARKSON,
Secretary-treasurer,
Melville, Sask.

October 1st, 1912.

The following information may be of interest to those wishing to tender:—

The total assessment for the year 1912 is \$3,180,000.00, exclusive of exemptions to the amount of \$85,000.00. Five years ago there was no population; to-day there is a population of about 3,000, which is increasing to such an extent that it is impossible to supply the demand for housing accommodation.

Melville is situated in the centre of a magnificent farming district, and in addition has the advantage of being a divisional point of the Grand Trunk Pacific Railway, whose repair shops and other works employ a large number of men.

The total debenture debt, inclusive of the present issue and local improvement debentures, amounts to \$259,628.01.

Less sinking fund	\$ 4,045 40
Waterworks	63,300 00
Electric light	22,000 00
Local improvement debentures	58,250 82
	\$147,596 22
Net debenture debt	112,031 79
Assets, December 31st, 1911	\$181,480 72
Current expenditure, 1911	37,325 04
Current revenue, 1911	40,849 81

The rate of taxation for the current year is: For general purposes, 10 mills; sinking fund, 1 mill; debenture rate, 3 mills, and school, 4 mills, a total of 18 mills.

Information recently to hand makes the announcement that Melville has been created a judicial centre of the Province of Saskatchewan.

TOWN OF NORTH BATTLEFORD

Sealed tenders will be received by the undersigned up to 8 p.m., Mountain time, on the 21st October next for one hundred thousand dollars (\$100,000) sinking fund five and a quarter (5¼) per cent. thirty-year debentures, issued for the purpose of erecting a High School and Collegiate. Opinion of J. B. Clarke, Esq., K.C., Toronto, as to legality of issue will be furnished.

Further particulars may be had on application to
H. W. DIXON,
Secretary-Treasurer.

Town of North Battleford, Sask.

The Montreal board of control has been advised by Mr. Charles Gaudet, K.C., that he has taken steps to bring before the Legislature again the question of levying a tax on insurance agents from the United States who do business in the city, but who have no offices here. He will contend that it is unfair to tax local insurance companies when outside companies escape taxation. It is understood that the board of control will support Mr. Gaudet's contention.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

MEXICAN TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of one and three-quarters per cent. ($1\frac{3}{4}\%$), (being at the rate of 7% per annum), has been declared on the capital stock of the MEXICO TRAMWAYS COMPANY for the quarter ending September 30th, 1912, payable on the 1st day of November, 1912, to shareholders of record at the close of business on the 12th day of October, 1912;

THAT the transfer books of the Company be closed from the 14th day of October to the 31st day of October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, Mexico City, Mexico, London, England, and its branches.

The holders of bearer share warrants on detaching from their share warrants coupon No. 14 and lodging such coupon or coupons at The Canadian Bank of Commerce in Toronto, Montreal, New York City, or London, England, on and after the 1st day of November, 1912, will receive in exchange for each coupon the sum of \$1.75 representing the amount of the dividend.

By Order of the Board,

W. E. DAVIDSON,

Secretary.

Toronto, Canada, 30th September, 1912.

THE CONSUMERS' GAS COMPANY OF TORONTO

The annual general meeting of the Stockholders of the Consumers' Gas Company of Toronto, to receive the report of the directors, and for the election of directors for the ensuing year, will be held in the Company's Board Room, No. 17 Toronto Street, on Tuesday, the 29th of October, 1912, at 12 o'clock noon.

ARTHUR HEWITT,

General Manager.

DOMINION GRESHAM REINSURES STERLING ACCIDENT

The business of the Sterling Accident and Guarantee Company, of Canada, controlled by Messrs. W. Thomson and Company, of St. John, N.B., has been reinsured by the Dominion Gresham Guarantee and Casualty Company, of Montreal, of which Mr. F. J. J. Stark is manager of the casualty departments. This arrangement will give the Dominion Gresham, which only recently entered the Canadian casualty spheres, an annual income of about \$50,000. It has a paid-up capital of \$200,000, the directorate being composed as follows:—Messrs. F. W. Evans, president; B. Tooke, vice-president; H. B. Ames, M.P., William Hanson, George G. Foster, K.C., J. M. Fortier and F. W. Fairman.

The Sterling Accident and Guarantee was incorporated in 1900, under the name of the Accident and Guarantee Company of Canada, its name being changed in 1907. Its directorate on December 31, 1911, included Messrs. Robert Thomson (president), Percy W. Thomson, Roy P. Church (St. John, N.B.), Albert Starkey (Montreal), R. T. Leavitt, Alfred Porter, and J. Royden Thomson (St. John, N.B.). Mr. P. W. Thomson was its secretary-treasurer. In 1912, the chief office of the company had been changed to Montreal, and Mr. Albert Starkey has been chief agent. On December 31, 1911, the company had a subscribed capital of \$249,300, there being paid-up \$49,540. In 1911, the Sterling Accident received net cash for premiums, \$50,112, and interest on investments brought the total income up to \$51,767. The total net amount paid for all claims was \$20,625, the total expenditure being \$48,703. The assets as at December 31 last, totalled \$59,145, and liabilities, excluding capital stock, \$28,034.

The Dominion Gresham Guarantee & Casualty Company is owned and controlled by the Gresham Life Assurance Society, of London, England, whose assets amount to over \$50,000,000. It will, therefore, be seen that the position of the policyholders of the Sterling Company is made most secure, and at the same time, the agents of that company are given the opportunity of transferring their connection to a strong company. This company will write fidelity, guarantee, all classes of liability, and automobile insurance, in addition to personal, accident and sickness risks.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend has been declared of three and one-half per cent. ($3\frac{1}{2}\%$), (being at the rate of 7% per annum) on the preference shares of the capital stock of THE MEXICAN LIGHT AND POWER COMPANY, LIMITED, for the six months ending October 31st, 1912, payable on the 1st day of November, 1912, to shareholders of record at the close of business on the 12th day of October, 1912;

THAT the transfer books of the Company for the preference shares will be closed from the 14th day of October, to the 31st day of October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, London, England, Mexico City, Mexico, and its branches.

By Order of the Board,

W. E. DAVIDSON,

Secretary.

Toronto, Canada, 30th September, 1912.

THE ROYAL BANK OF CANADA

Dividend No. 101.

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of December next, to shareholders of record of 15th November.

By order of the Board.

E. L. PEASE,

General Manager.

Montreal, P.Q., October 11th, 1912.

A branch of the Canadian Bank of Commerce has been opened at Laird, Saskatchewan, under the temporary management of Mr. R. Roberts.

During the next six months the British Columbia Telephone Company will erect at least two and perhaps three new exchange buildings in Greater Vancouver; will build an addition to the present exchange in Victoria and will institute other improvements in their service throughout the province that will involve an expenditure of approximately one million dollars.

Owing to lack of financial support the Danish scheme for the development of the harbor and dock accommodation at St. Thomas (Danish West Indies), in view of the forthcoming opening of the Panama Canal, has been abandoned. Only five million kroner had been subscribed, wherein the amount required was twenty millions. The concessionaires will confine themselves to the deepening of the existing harbor.

The Canadian department of trade and commerce has withdrawn the trade commissioner stationed for years in Mexico city. Mr. A. W. Donly, the commissioner, was in Ottawa lately, and reported a general trade slump as a result of the continued political disturbances in Mexico. The subsidized steamship service between Vancouver and Mexico has been discontinued. The British agent will look after Canada's interest until satisfactory conditions are restored.

Notice of Partnership

We beg to announce that we have taken into partnership

Mr. Charles Wurtele

WILL MAKE STEEL PLATE WORK

The Thor Iron Works, Limited, has been incorporated with an Ontario Charter with the object of manufacturing steel plate work of all descriptions, structural steel for buildings and bridges, to execute marine repairs, and to conduct a general iron and steel manufacturing business. The company has bought the plant and equipment, excepting the land, which is leasehold and the property of the Grand Trunk Railway, of the Toronto Shipyards Company, successors to the Canadian Shipbuilding Company. The experience of these companies and of others lead the directors of the new company to the conclusion that a shipbuilding proposition can hardly be made to earn satisfactory dividends in Toronto. It is not the intention of this company to engage in shipbuilding, but to alter slightly the present plant and to use it for manufacturing tanks, etc., for which the demand is constant and the market good.

Although designed and used as a shipbuilding plant, it is peculiarly well adapted to the fabrication of steel plate work for tanks, water towers, standpipes, etc. No additional machinery or equipment will be required except perhaps for erection purposes away from the plant in the field. In order to handle structural steel work of all kinds little additional plant will be required and at first the present equipment need not be added to. For marine repair work the plant is peculiarly well adapted and it is possible to do anything that can conceivably be required in this line without altering or adding to the plant in any way.

The company's authorized capital stock is \$100,000. The officers and directors are Messrs. J. H. Malone, J. E. Russell, W. Snaith, C. H. Cunningham and W. L. Carr, Toronto. The directors have gone to allotment on the subscriptions of the original incorporators for 232 shares of the par value of \$23,200, and further allotments will be made from time to time as further subscriptions are received.

AGENTS WANTED

One of the strongest and most reliable Loan Companies in Canada desires to appoint reliable agents in towns and cities throughout Ontario for the sale of its Short Term Debentures. Liberal commission will be paid. Address Box 81, The Monetary Times, Toronto.

DUMPING AND THE TINPLATE INDUSTRIES

In a paper on "Dumping as it affects the Steel and Tinplate Industries of South Wales" Mr. J. H. Jones at the annual meeting of the association of British Chambers of Commerce, said that steel bars used in tinplate manufacture had been dumped in Wales from Germany, Belgium, and America at irregular intervals during the present century. The effects of such imports were many. In the first place, although the dumped bars were neither so cheap nor so plentiful as was commonly believed, they were sufficiently cheap and plentiful to disorganize the Welsh steel market. Local steel manufacturers, having lost the monopoly which they had long enjoyed, were compelled to pay greater attention to the needs of their customers. This constituted the main advantage to tinplate manufacturers, for, thanks to the success with which the market has "beamed" the tinplate market, they benefited but little from the fall in the price of steel.

MONTREAL TO BORROW AT HIGHER RATE

Charter May be Amended for That Purpose—Victoria's Financing—Criticism of Our Municipal Loans

The legislation committee of the Montreal city council have decided to include in the charter amendments a request that the corporation of Montreal be empowered to borrow money at a higher rate of interest than four per cent. The chairman, Alderman L. A. Lapointe, explained that it was evident the present rate was not sufficient, and that at all events the city should have the authority of paying a little more than four per cent, when it was deemed advisable. He suggested that the exact rate be not specified but as the highest rate was five per cent. allowed by law, if the amendment were accepted by the Legislature, the city would be empowered to borrow at any rate between four and five per cent.

Victoria's overdraft at the Bank of British North America was \$2,337,739 according to the financial statement submitted by the city comptroller Raymur to the city council. Under the general revenue account the city owed the bank \$900,964; up to the end of September the overdraft on local improvement account was \$2,691,723 and sundry overdrafts amounted to \$9,673, a total of \$3,602,361. Credit balances, including sinking funds, etc., amounted to \$1,264,622. Since that date the city has disposed of £170,000 worth of treasury notes, the proceeds of which will be devoted towards wiping out a considerable part of the overdraft on local improvement construction account.

Mr. Ben. H. Morgan, one of the best-known financial and economic writers in England, and who recently made an extensive tour in Canada, writes a long and interesting article in the Financial News respecting Canadian municipal

loans. After discussing many phases of this particular form of financing, Mr. Morgan concludes:—"There is at present a strong speculative element throughout Canada, and it has invaded even municipal and provincial treasuries. We have known more than one case in which a municipality has deposited its stock or debentures at the bank, and thus secured an overdraft, with which the public business has been conducted, until the bank acted as it would with a private customer, and stopped any further advance. Then some of the stock or debentures had to be disposed of by forced sales. This was the inevitable result of the Micawber-like policy of securing an overdraft when the British market was dull, in the hope that something might sooner or later turn up. This unsatisfactory state of affairs is partly due, no doubt, to the frequent changes that are usual in Canada in provincial administrations and also in municipal councils—a state of affairs that inevitably acts injuriously on the continuity of municipal financial policy. But it is also largely due to the fact that scarcely one mayor in all Canada has ever turned for guidance to any expert financial adviser.

"Finance, by which we here understand the art of raising capital on the security available to the best advantage of the borrower, is an art and science in one. What the rulers of provincial and municipal Canada sorely want, and must obtain, is expert financial advice; but this cannot be obtained in Canada herself, or, at any rate, is not available on the prairies. As London is the world's treasury, there are to be found the financial experts who could advise Canadian provincial or municipal borrowers as to the exact condition of the market at any time, and also as to the best terms which might be secured at any given moment. The consolidation of Canadian municipal loans could be readily effected by competent financiers, and would represent a gain to Canada of millions of dollars."

IN THE LONDON MARKET

The state of the London market continues to perturb those who contemplate making flotations there. The congestion during the past few months has continued into the fall, and authorities are not hopeful of much improvement during the winter. The reception of the Canadian Northern Railway loan of £2,057,612 5 per cent. income charge convertible debenture stock early this month, was a sign that conditions are not becoming much better. Seventy-seven per cent. of that issue was left with the underwriters. Excluding that loan, the following table shows the results of nine Canadian offerings in London at various times this year:—

Company.	Amount of offering.	Per cent. left with underwriters.	Amount left with underwriters.
Robert Simpson, Ltd..	£ 920,000	90	£ 828,000
Algoma Steel Corporation	1,130,000	93	1,050,900

Of the £7,142,000 involved in those nine offerings, £5,439,000 was left with the underwriters. Information as to the result of other loans is not available, but many of them were equally as poor as some of those noted above. These examples do not mean losses to the companies or the underwriters interested. For instance, a 5 per cent. loan may be issued at 95. The underwriting commission is $1\frac{1}{2}$ per cent., and only 50 per cent. of the issue is taken up. That would mean that the underwriters would have to take up 50 per cent. of their engagements, but they would also take $1\frac{1}{2}$ per cent. commission on the whole 100 per cent., which may be counted as equal to 3 per cent. on the actual 50 per cent. Hence the underwriters can afford to sell their stock at 3 per cent. discount—that is to say, at 92 in the case given—without incurring any loss. Any stock sold above 92 is sold at a profit. It happens sometimes that a new issue which has had a poor reception rises to a premium a few months later, because investors have come to appreciate its attractions. In such event the underwriters make a profit of their transaction. The recent Chinese loan was issued at 95. Underwriters received $1\frac{1}{2}$ per cent. commission, and they had to take up 60 per cent. of the issue. The loan is now selling at $\frac{1}{4}$ discount, and the underwriters are consequently making a fair profit out of a loan which was wrongly described in some quarters as a failure.

While that is so, the fact remains that there is still a large amount of undigested securities, including many of Canada's, to be absorbed by the investor. Many would-be borrowers have been deterred from making public issues in London by the difficulty in getting loans underwritten at a reasonable price.

Competition among issuing houses for good-class securities remains as keen as before, but the condition

of the market makes it necessary for them to be more cautious in their bids. The price of capital has been rising all around. The few who save are surrounded by a clamorous throng of needy borrowers.

London and Paris, the London Economist reminds us in citing borrowing figures to date, alone have any big surplus to dispose. They are more than ever in command of the world's finance. The year started with a much lower total of issues in the first three months than in the same period of 1912, the second quarter showed a gain of some £6,000,000, but the third quarter, though proving no exception to the rule that the holiday quarter's total is always the lowest of any, has produced an amount of new issues much in excess of the average. The nine months' total to the end of September is £151,000,000, as compared with £132,400,000 up to the same date in 1911, and £216,750,000 in 1910. No doubt many issues were held off the market in the early part of the year on account of the coal strike and the general unsatisfactory appearance of the capital market in the hope of better conditions later.

A FIRE PREVENTION DAY

The fire losses in Canada for the first nine months of the current year total \$18,530,579, an average of \$2,058,953 per month. This is equal to a daily loss of \$68,631. In other words, \$2,893 worth of property has been burned every hour since the new year dawned, or nearly \$48 every minute. This is largely an extravagant waste of capital. The losses as compiled by *The Monetary Times* during 1909, 1910 and 1911 are as follow:—

	1909.	1910.	1911.
January	\$1,500,000	\$1,275,246	\$2,250,550
February	1,263,005	750,625	941,045
March	851,690	1,076,253	852,380
April	720,650	1,717,237	1,317,900
May	3,358,276	2,735,536	2,564,500
June	1,300,275	1,500,000	1,151,150
July	1,075,600	6,386,674	5,384,300
August	2,582,915	1,667,270	920,000
September	1,615,405	894,125	1,123,550
October	2,208,718	2,195,781	580,750
November	935,191	1,943,708	1,506,500
December	1,433,813	1,444,860	2,866,950

Total \$18,905,538 \$23,593,315 \$21,459,575

Adding to these figures the total loss for the first nine months of 1912, we have a fire loss in forty-five months of \$82,489,007, an average monthly loss of \$1,833,089. In addition, there has to be recorded a disastrous list of fire fatalities. During September in Canada six people met their deaths in fires. During the first nine months of the year 132 people were sacrificed in the same manner. In the forty-five months since January, 1909, no less than 924 persons lost their lives in fires, a monthly average of almost 21 persons. The following table gives the details:—

	1909.	1910.	1911.	1912.
January	16	27	27	27
February	8	15	12	11
March	16	20	18	24
April	18	37	20	15
May	21	15	28	18
June	16	52	13	6
July	4	15	110	9
August	17	11	22	16
September	10	10	13	6
October	26	16	17	..
November	34	19	20	..
December	33	19	17	..
Total	219	256	317	132

In September three deaths were caused by lamps being upset, and one each by clothes catching fire, can of kerosene exploding and gasoline being set alight.

Of the presumed causes for fires during September 30 were attributed to lightning, 10 matches, 8 incendiary, 5 each gasoline, gas, electrical causes, defective flues, 4 each hot ashes, lamp explosions, 3 carelessness with lights, 2 each overheated stoves, spontaneous combustion, sparks, oil stoves, 1 each chemical action, heat from brakes, burning rags, resin pot, upset lantern, smoking in bed, oven set alight, while many fires are of unknown origin, which probably is in many cases lack of precaution and proper care.

The structures damaged and destroyed during September were 49 residences, 40 barns, 14 stores, 8 stables, 7 hotels, 6 factories, 5 workshops, 4 wood-working factories, 3 each business blocks, warehouses, garages, 2 each railway sheds, restaurants, foundries, 1 each bank, elevator, pavilion, post-office, flour mill, apple evaporator, shoddy mill, school, icehouse, excelsior mill, newspaper office, brick yard, and rescue home.

There were 30,000 feet hardwood flooring destroyed, 1,100 tons hay, 2,150 bushels wheat, 500 bushels wheat, 50 bushels timothy seed, 12 horses, 2 each freight cars, automobiles, taxi cabs, motor launches, 3 mowers, 2 each binders, wagons, seeders, steamers, barges, 1 each tug, threshing machine.

Last week, Fire Prevention Day was observed in most of the states of the neighboring republic, the day being the forty-first anniversary of the Chicago fire. Practically every State in the West participated, while it was generally celebrated in the South and Central States, the East, with the exception of the New England States, where November 9th, the anniversary of the Boston fire, has been set aside. Proclamations were issued by the Governors of the various States, urging the citizens to clean up the rubbish and otherwise co-operate in the fight to decrease the great fire waste. Schools in these States took a deep interest, and special programmes were carried out to impress upon the minds of the children the necessity of fire prevention. The methods of observing the day in the different States varied, but in the majority special features were arranged, such as speeches, special drills of the fire department, and town-wide clean-up parties were organized. The proclamation issued by Governor Dix, of New York, is a fair sample of those of the other Governors, and is as follows:—

"For the reasons herein set forth in order to rouse our people to a vivid sense of fire dangers and induce them to take a more active interest in the subject, I hereby proclaim Wednesday, October 9th, 1912, as State Fire Prevention Day, and I earnestly recommend that our people observe it by a general cleaning up and removal of all rubbish, trash and waste, and a setting of their heating apparatus and chimneys in proper condition for winter use.

"Let all public and private institutions, hotels, asylums, factories and theatres be looked over on that day, and, when necessary, add anything that will further protect the safety of the occupants.

"Let local authorities give attention to the matter of better building regulations, fire protection and prevention, as well as adequate provisions for apparatus for fire-fighting.

"Lastly, let fire drills be held on that day in institutions, factories, private, public and parochial schools, and let teachers instruct pupils through short talks and appropriate programme on the dangers of fire and means of prevention."

The alarming statistics respecting Canada's fire waste may be used as an excellent reason for the celebration of a Fire Prevention Day in Canada. On such a day everything possible should be done to remind the individual of his responsibility in the matter of fire waste, and the subject is one which must be dinned into the public ear every day. We might allot one day a year on which to make a din that would be remembered for many months. Burning property at the rate of \$48 every minute this year is a record of which no Canadian citizen can feel proud.

VALUE OF LAW AND ORDER

The conduct of Magistrate McMicken of Winnipeg, again reminds us that sufficient respect is not observed in Canada for the dignity, purity and performance of the law. The scene in court, as described by the Winnipeg press, was fit more for a wild town beyond civilization and steeped in lawlessness than for a city and country which boast of progress. Lack of respect for judges, magistrates, police, lack of a high sense of honor and duty on the part of some judges, magistrates and police officers, will, if allowed to grow unchecked, create alarming conditions.

The right of individual freedom, life and property must be upheld by every individual and by the law. That is of supreme importance. The rulings of our courts should not be questioned, for justice should make them unquestionable. Those who administer the laws should not be questioned. They are, because the existing standard is too low. Where law and order do not prevail, where wire-pulling is allowed in judiciary and police circles, where corruption is rampant and justice diluted, where no regard exists for law and order, where respect for life and property is scant—there will be chaos. Incidentally, it will repel the inflow of British and foreign capital. The investor invariably places funds where he knows life and property are safe.

Magistrate McMicken disgraced himself, his city, his country's laws, his country's justice and his country's name. The curse of politics where politics have no right, has again been allowed to interfere with proper court procedure. Bigger salaries, better men and the rejection of political influence are needed.

MONTREAL HARBOR COMMISSION

The announcement of the resignation of Major George Washington Stephens from the position of chairman of the Board of Harbor Commissioners of the port of Montreal brings to its end a Commission which has appeared to shipping and commercial circles of Montreal almost ideal. The resignation of Major G. W. Stephens came shortly after those of his two fellow-commissioners, and to some extent was no doubt occasioned thereby. Mr. Stephens makes that fairly clear in his letter of resignation, in which he refers to the manner in which the three Commissioners always worked in harmony, and expresses the view that harmony of that character is essential to the effectiveness of a commission. He considers, therefore, that it is best to retire and give the government an opportunity of electing an entirely new commission.

It is believed in Montreal that the true story of the resignation of the Commissioners has not yet been told, and that political discussion, if not actual interference, has had a part. Shortly after the change of government, a year ago, the Harbor Commission began to be a fruitful source of discussion, many of the Conservative party supporters being desirous of removing the three Commissioners and installing others in their places. These suggestions were unwelcome to the commercial and shipping bodies of the city, who have so greatly benefited from the manner in which Messrs. Stephens, Ballantyne and Geoffrion have carried on the work of improvement. In fact, the commission was generally pointed to as an example of what could be accomplished by a small executive of men of standing and reputation as compared with the larger number of equally good men who composed the previous commission.

It is commonly said of the present commission that it is free from political influence or bias in its conduct of the affairs of the harbor and in the selection of its employees. Whether or not this was true of the sub-

ordinate officials, it probably was with respect to the commissioners themselves. Doubts are even expressed if all three were supporters of the Liberal party at the last elections, and in any event the port will be fortunate if politics are ruled out as much in the future as they have been during the regime of the retiring commissioners.

Part of the success of the commissioners and the cleanliness of their administration was no doubt due in large part to the fact that none of them were in financial need of the appointment. The chairman is a millionaire, and the financial remuneration attached to his position was of little consequence to him, and would be largely exceeded by the cost of maintaining the position. Messrs. Ballantyne and Geoffrion are wealthy men, and would also make more money attending to their own businesses. Commercial circles are awaiting the action of government in the selection of the new commission with unusual interest. Men of the highest type are wanted.

SMALL CHANGE

Now the shoe combine knows where the leather pinches.

* * * *

The Ottawa cabinet pudding has been overspiced also on previous occasions.

* * * *

The business men of Wainwright, Alberta, will dine on fifty-year-old buffalo. Isn't that tough?

* * * *

Roosevelt was shot, Wilson was kissed. The premium rates on Taft's presidential accident insurance are high.

* * * *

The dry farming congress at Lethbridge is a welcome change from the moist agricultural summer of the West.

* * * *

One can hear the patter of innumerable feet turned towards those vacant Montreal Harbor Commissioner-ships.

* * * *

If the rumor-makers persist, our railroads will shortly own all the steel on this continent and all the vessels that touch its shores.

* * * *

Bell Telephone shareholders, puzzled at the rapid advance of the stock, cannot get the switchboard to answer to their call.

* * * *

A Canadian breweries flotation was made this week in London—the second issue only since August to relieve the monotony of congestion

* * * *

Mr. Hocken should prove a good mayor for Toronto, altogether aside from the fact that anyone is better than Thomas L. Church.

* * * *

Early this month an issue of \$150,000 5 per cent. 30-year water and sewer debentures of the town of Bassano, Alta., was sold to Mr. H. C. Ulen, of Chicago. The complete contract for material and construction of the water and sewer system of the town of Bassano, Alta., later was awarded to Mr. H. C. Ulen, of Chicago, the contract price being \$105,490. In which is another striking example of the business enterprise in Canada of men of the neighboring republic. At the same time, it is an exemplification of the principle that the man who lends the money gets the job.

VALUE OF INSURANCE INSTITUTES

High Standard of Underwriting Profession Makes Technical Education of the Coming Insurance Man of Vital Importance

Now that life, fire, accident and other forms of insurance have become necessities of life, now that underwriting generally is at a high standard, and now that it is recognized as one of the foremost professions, it is of prime importance that men be properly trained for the business. For that reason alone, the work of the insurance institutes at home and abroad is of great value. The Insurance Institute of Toronto may be cited as a fair example. Its outstanding feature is educational, as exhibited in the courses of study prescribed. There are three branches of insurance covered by the educational courses, namely, the fire, the life and the accident branches. Three examinations are held in each branch. The course is designed to meet the practical, rather than the theoretical requirements of the different branches of the business, so that there is no conflict between the courses prescribed by the Institute and those prescribed by the actuarial societies of Great Britain and America. The first examination in the three departments consists of a thorough knowledge of a number of the subjects which are covered by the matriculation examination of the province of Ontario. The second examination in each branch takes up more particularly elementary work, a knowledge of which is required in the general routine work of companies engaged in the three different branches of insurance. The third, or final examination, takes up a more advanced knowledge, and fits the candidate for executive positions in the different offices. The importance of this feature of the Institute has been kept in the foreground through all the years since the Institute has been organized. Mr. J. B. Laidlaw, who was one of the prime movers in its organization, when addressing the Institute in November, 1889, pointed out that the demand is for specialists in each profession, and that the most important ideal held by the Institute is that through it "our members may be aided towards more expert knowledge in whatever branch of the profession they may be."

The object of the Institute, as set forth in its constitution, is as follows: "The object of the Institute shall be the promotion and cultivation of a thorough knowledge of insurance business by means of its educational courses; by the formation and maintenance of a reference library and reading-room, the circulation of insurance literature, the collection and application of statistics, the reading, discussion and publication of suitable papers, the occasional inspection of special fire risks, and the collection of articles illustrative of insurance business."

Mr. J. K. Pickett, the present president, drew attention last week to the success which has followed certain members of the Institute who have taken the examinations. It has been said by some that those who have succeeded in passing the Institute examinations have not been rewarded, either by increased remuneration or advancement to more important positions. While there cannot be any guarantee on the part of the Institute that such rewards will follow, it is a fact that some who have graduated are now enjoying splendid positions in the business in various parts of the country. One gentleman has a position as manager of a new but strong fire company, recently formed in the West. Two other gentlemen have formed a partnership in general insurance brokers' business in Toronto, and are doing well. Another gentleman, who, although not associated with insurance, is now assistant secretary to a large light and power company, and has no doubt been helped to this position by his study of the Institute's course. Another is acting as cashier in the Toronto agency of one of our most prominent life companies. Another is supervisor of

the investment department of one of our large life companies. Another is connected with the actuarial department of one of our large United States companies. Another is connected with a large fire insurance office, and has been at one time secretary of the Insurance Institute. Another has been promoted from an office position in one of the companies in Toronto to the important position of secretary of one of its foreign branch offices. Another gentleman is enjoying a good position in the head office of one of our life companies, and acts as a general inspector, travelling in the western provinces.

The mere writing on an examination is, in itself, of no value, but the knowledge which has been acquired in the preparing for these examinations must certainly be of value, not only to the man himself, but to the office which has the benefit of his services. In the business world to-day, requiring as it does specialists in every department, a man educated along his special line will eventually receive due compensation.

The examinations of the Institute are arranged with the idea of providing a course of study which could be taken up by a young man anxious to succeed. The syllabus of the Institute is so arranged that young men who want to progress in the fire, or life, or accident insurance business should by all means take up the course of study which has been mapped out for them. Those who can successfully pass the examinations are brought immediately to the attention, not only of the managers of their office, but to the managers of other insurance companies. There will be no lack of positions open to those who have properly qualified themselves. The syllabus has been approved by the Chartered Insurance Institute, so that the certificates granted by the Institute on the completion of the several courses will have the recognition of that body.

In drawing attention to the importance of the educational feature, Colonel McDonald in his address at the opening meeting in October, 1910, said: "Many of those who to-day occupy the chief executive positions in our companies will within a short time have rested from their labors, and the direction of affairs must necessarily pass into other hands. Who are going to take their places? It is to you, young men, heirs of the future, to whom this heritage naturally belongs. Equip yourselves for the responsibility, and for the avenues of usefulness which are thus opening up before you."

Apply yourselves to the development of your mental abilities. Study closely the particulars of the business in which you are engaged, combined with which a good knowledge of general affairs must be secured."

There can be no doubt that it is possible for an office man to acquire all the knowledge which is necessary for these examinations without preparing himself for such, but it is improbable that in cases where he is employed in an office of any size, he would have as complete a knowledge as the man who has made a special study of the subjects needed for the examinations.

Mr. Pickett has emphasized the desirability of the officers of the different companies encouraging the younger members of their staffs to undertake the courses of study prescribed by the Institute. He pointed out at the opening meeting of the Institute last week that in so doing, the general efficiency of the staffs would be increased, and this would reflect to the credit of the company in the general conduct of its business. The president also stated that there was under contemplation the awarding of certain prizes to those who would suc-

(Continued on Page 647.)

CANADIAN BANK INSPECTION

Suggested Inspection of Head Office by Auditors Appointed by Shareholders—Position of Directors

II.

BY W. W. SWANSON,

Department of Political and Economic Science, Queen's University, Kingston, Ont.

Inspection of the head office by a board of auditors appointed by the shareholders is a plan which has met with a good deal of approval of late; and among others, has been advocated by Mr. D. R. Wilkie of the Imperial Bank. The Traders Bank has for some time had its accounts verified by auditors appointed by the directors. It is natural that bankers should prefer a shareholders' audit to government inspection. They have confidence in the strength of their bank, and prefer a policy of independence to one of paternalism.

A thorough inspection by a board of auditors appointed by the shareholders would quite likely insure the solvency of the institution. But publicists at the present time are demanding something more than solvency alone. It is pointed out that a bank might be quite strong financially, and yet be conducting its business in a lawless fashion. For example, there have been of late not a few assertions that banks have been charging more than the legal rate of interest. It is further asserted that large accumulations of profits are concealed in ways not contemplated by the Bank Act; and that much more real estate is held by some banks than the law permits. Bank inspection, therefore, if it is to meet the demands of the public, must take cognizance of all these matters, as well as of the question of solvency.

Solvency Must Remain Vital Question.

However that may be, the question of solvency must ever remain the vital one in bank inspection. In the United States the bank inspectors have been able for the most part to see that all the legal requirements are met with—that the legal reserves are held; that the ten per cent. limitation on loans is complied with; and that other specific legal demands are satisfactorily met. And yet the inspections have been superficial; banks have failed, and large amounts of capital have been lost. A bank may meet with every requirement of the letter of the law and yet by resting upon a rotten foundation. It is true that insistence should be laid on the banks' complying with the law; and yet solvency is the great desideratum.

External examinations by auditors can be urged upon more valid grounds; namely, as a measure which will require the directors and chief executive officials to do their duty. It would be difficult to find an instance in banking history where a defalcation would not have been prevented, or where bad banking would not have been checked, if the examiners, executive officers, and directors, had discharged their functions conscientiously. But this is not the case. Bank officers have not been as watchful of one another as the necessity of the case demands; and to a certain extent this has been natural. Mutual confidence and esteem have been the rule; and it would be unfortunate if this confidence and this esteem were violated, and each man in a bank were to become an Ishmael with "his hand against every man and every man's hand against him." But no man who is in a position of trust has a right to resent examination of his work; and no doubt most officials would welcome the opportunity to show that they have been faithful and efficient in the performance of their duties.

Signature of General Manager.

This form of external examination of the head office by expert accountants, is simply an attempt to do for the bank what has been done for years for the large mercantile houses and manufacturers. A thorough examination of the general ledger at the head office would cover the special reports and statements from the inspected branches. It would also test the facts and figures in the monthly statement which is given to the Government, and the half-year statement submitted to the shareholders. The president of the defunct Ontario Bank certified the statements presented to the Government and shareholders were true; and the other presidents of Canadian banks do the same thing. But no one believes that the president, of his own knowledge, is in a position to state that the figures are even approximately correct. The signature of the general manager must still be appended to these statements; he ought to know, and is paid for knowing, whether these statements are correct. But the added signature of expert chartered accountants would make assurance doubly sure. If together with the certificate of the auditors the directors would submit a statement that they, or a committee appointed by them, had examined the loans and discounts and considered them good, much would be done to restore confidence in Canadian banks.

When it is recalled that many bank failures in Canada have been "head office" failures, it is quite evident that some form of independent, external examination is required. A review of bank failures in this country will disclose the fact that the directors who dominated the banks had knowledge of, or were directly concerned in, the unsound operations of these banks, and often were the direct cause of their failure. While an external, independent audit of the head offices and the principal branches can never take the place of the present system of internal inspection, it would be a very effective supplement to it. But these expert accountants should do more than merely certify to the mechanical accuracy of the accounts; they must put interlocking switches at the points where the grooves in the banking business cross one another; and adopt such special devices that fraud will be automatically prevented in each department.

This form of examination is not something new and untried. In many respects the Scotch banks are similar in their operations and management to Canadian banking institutions. They are strong banks, carrying on their business by means of branches throughout the country. The branches are managed by resident agents, accountants, tellers and clerks, according to the extent and nature of the business of the bank. The agent is the responsible officer; and, as a general rule, is alone entitled to bind the bank by signing documents on its behalf. Each branch is visited by an inspector from the head office who makes a very careful scrutiny of all the advances and a balance of the cash, and reports to the directors thereon. Neither the issue nor the banking department is at any time examined by the Government. The commissioners of stamps and taxes have the power to inspect bankers' books for the purpose of ascertaining the accuracy of returns of note issues, but that power has never been exercised.

Some Form of External Inspection.

Apart from the effective internal examinations conducted by the Scotch banks themselves, the statements of accounts which banking companies are obliged to produce are identical with those exacted from other corporations by the Joint Stock Companies Act; that is to say, once a year the accounts of every banking company must be examined by an auditor, or auditors. The auditors are elected by the shareholders in annual meeting. They have access to the books and accounts of the company at all reasonable times. In the case of a banking company, an investigation of its condition may be ordered by the board of trade at any time, on the application of not less than one-third of its shareholders. The same provisions apply to English Joint Stock Banks.

In nearly all the leading banking systems of Europe there is some form of external inspection and auditing of accounts. Quarterly reports are required of the Bank of France; and in addition it voluntarily publishes weekly statements in some detail. While there is no regular examination, the minister of finance may call for any information he desires; and no resolution of the general council of the bank can be executed unless under the hand of the governor representing the State. From the Imperial Bank of Germany detailed weekly statements are required; and the curatorium, consisting of government officials, meets every three months to supervise the conduct of the bank. The accounts are audited by the Board of Accounts of the German Empire. The Bank of Sweden is obliged to publish weekly, monthly and annual statements. It is inspected by a select committee appointed by every regular parliament. An audit committee is also appointed by parliament for the head office and each branch. In the case of the Bank of Italy a statement is required every ten days, in addition to an annual report, on a model furnished by the Government. A central bureau of inspection at the ministry of the treasury examines the assets; and a permanent commission of supervision also passes judgment on mooted questions. The Bank of Switzerland publishes an annual report and a weekly statement of assets and liabilities. There is a special board of inspectors whose officials are elected by the Federal Council; and the treasuries, books, and securities are periodically verified. The Bank of Belgium furnishes a statement of the condition of the bank and its agencies each week to the minister of finance. A government commissioner watches over the operations of the bank and also examines the books and securities. The best banking opinion of the world, therefore, judges that some form of external examination is a wise policy.

Duty Rests Upon Government.

To return, however, to the plan which has been outlined for the auditing of the business of Canadian banks. It is undoubtedly superior to any form of government inspection. It has worked exceedingly well in Scotland and England; but there the country is small, the population compact, and the stock held within the nation itself. In Canada, on the contrary, the owners of bank stock are scattered over a vast territory from the Atlantic to the Pacific. Some of the stock is held in the United Kingdom, in France, in Holland and in

Germany. It is quite impossible to bring the stockholders together in annual meeting; and even if it were possible very few of them have the qualifications necessary to permit them to take a direct part in managing the affairs of the bank. The result is, the actual control of the bank rests in the hands of the directors and the large shareholders. It would be in their power to appoint the auditors, and to protect their own interest and the credit of the institution the large stockholders would quite likely work with the directors to cover up the results of bad banking. But banks are conducting a business which concerns not only the shareholders but depositors and note-holders as well. As long as the banks hold millions of dollars in trust for the people a duty rests upon the Government to see that that trust is not violated. The shareholders, or at least the largest holders of stock, may be expected to safeguard their own interests, by means of internal examination and otherwise. But there must be outside control in behalf of the interests of the public at large; and it is becoming apparent that that control could be most safely and effectively vested in the Canadian Bankers' Association.

(To be Concluded.)

WESTERN CROP REPORTS

According to a recent Canadian Pacific Railway crop report, headway has been made with the threshing throughout the prairie provinces. In Manitoba conditions are favorable and in the southern portion of the province from 65 to 70 per cent. of the grain has been threshed. The percentage is even higher in the Brandon district, while in the north from 55 to 60 per cent. has been completed.

Conditions in Saskatchewan are similar to those of Manitoba with the exception that there was a little rain and snow two days, which delayed the harvest slightly. From 55 to 60 per cent. of the grain is threshed in the northern part of Saskatchewan and from 65 to 70 per cent. in the southern part of the province. Around Swift Current about 75 per cent. of the threshing is finished.

Threshing operations were delayed in Alberta owing to heavy rain and snow, and the result is that only 45 per cent. of the threshing is completed. At one or two points where the weather remained clear considerable headway has been made. At Lethbridge about 90 per cent. is finished and approximately 75 per cent. of the threshing is completed in the Medicine Hat district.

FRUIT GROWING IN CANADA

A year ago the Department of Agriculture at Ottawa, through the branch of the Dairy and Cold Storage Commissioner, undertook an investigation of the fruit growing conditions throughout Canada. The enquiry was entrusted to Mr. Wm. H. Bunting, an extensive fruit grower at St. Catharines, Ont., who secured as much information as possible on the following points:—

1. The possibilities of an extension of the fruit-growing industry of Canada in the different localities visited.
2. The tendencies in the matters of the planting and growing of different kinds of fruit, and with regard to apples, the varieties which are being most extensively planted in the different districts.
3. The difficulties which are likely to be encountered in the further development of the fruit growing industry.
4. Methods of production and orchard management which have been most successful in the different districts, and the probabilities of over-production.
5. The conditions under which British Columbia, Ontario and Maritime Province fruit is marketed in the prairie provinces as well as the character and the effect of American competition.

The enquiry was concluded in due time and the report has been printed for general distribution. It contains a large amount of detailed information gathered in every province making it an invaluable guide to persons who desire to take up fruit growing as an industry.

In his general conclusions Mr. Bunting points out that while the growing of fruit offers ample reward to the man of energy, patience and perseverance, there is perhaps no phase of agricultural endeavor which requires to be more closely studied, and in which a wider range of information is more desirable and necessary. The future of the industry, he states, was never brighter than it is to-day, the prospects never more attractive nor the field of extensive effort in all fruit growing provinces more inviting.

The report which contains eighty-four printed pages and many illustrations, is available to all who apply for it to the Publications Branch of the Department of Agriculture, Ottawa, Ont.

MARITIME PROVINCE BANKS WILL MERGE

Bank of New Brunswick Will be Absorbed by Bank of Nova Scotia—Share for Share and Ten

Dollar Bonus

The directors of the Bank of Nova Scotia and the Bank of New Brunswick have agreed upon terms of amalgamation. A statement will be mailed to the shareholders at an early date. It is proposed that the Bank of New Brunswick stockholders shall receive share for share and a bonus of \$10 a share. The authority of the shareholders of both banks to negotiate the deal, will be requested in the near future. The capital of the Bank of New Brunswick is \$1,000,000, of which is subscribed and paid. The capital of the Bank of Nova Scotia is \$5,000,000, of which \$4,586,900 is subscribed and \$4,410,530 is paid. The reserve funds are \$8,074,742 and \$1,790,000 respectively. These two banks are paying bigger dividends than any of the others the former paying 13 per cent. and the latter 14 per cent. The Standard Bank also pays 13 per cent. The following is a comparison of the accounts of the two banks as on September 30th:—

Account.	Bank of Nova Scotia.	Bank of New Brunswick.
Notes in Circulation	\$ 4,058,954	\$ 947,209
Balance due to Dominion Government after deducting credits, etc.	380,219	60,104
Balance due to Provincial Governments	241,174	91,703
Deposits payable on demand	30,257,969	1,626,723
Deposits payable after notice...	5,564,465	6,797,524
Deposits elsewhere than in Canada	12,501,144	
Deposits made by and balances due to other banks in Canada	455,787	2,837
Balances due to bank agencies, etc., in United Kingdom	56,078	
Balances due to bank agencies and elsewhere than in United Kingdom	157,035	4,173
Liabilities not included in the foregoing	144,956	229,808
Total Liabilities	53,817,784	9,760,085
Greatest amount of Notes in Circulation during month	4,058,954	983,904
Specie	3,352,738	329,448
Dominion Notes	4,957,387	650,048
Deposits with Dominion Government	189,101	50,000
Notes and Cheques on other banks	3,792,797	322,436
Deposits made with and balances due from other banks in Canada	501,208	153,395
Balances due from agencies and other banks in United Kingdom	668,132	123,176
Balances due from agencies and other banks elsewhere than in United Kingdom	956,192	330,290
Dominion and Provincial Government securities	584,247	129,000

Railway and other bonds, etc.	3,494,564	234,540
Call and short loans in Canada ...	5,155,392	1,121,821
Call and short loans elsewhere...	4,461,844	300,000
Current loans in Canada	30,930,246	8,314,005
Current loans elsewhere than in Canada	5,377,157	
Loans to Provincial Governments..		91,537
Overdue debts	151,738	118,454
Real estate other than bank premises		3,200
Bank premises	1,370,360	195,096
Other assets	24,825	126,161
Total assets	66,682,002	12,676,121
Loans to directors and firms	424,517	35,170
Amount of specie held during September	3,716,045	329,011
Amount of Dominion notes held during September	4,430,372	181,183

Branches of the Two Banks.

The following table gives the location of the branches of the Banks of New Brunswick and Nova Scotia, as on December 31st, 1911:—

	Bank of Nova Scotia.	Bank of New Brunswick.
Ontario	22	1
Quebec	5	1
Nova Scotia	27	5

	Bank of Nova Scotia.	Bank of New Brunswick.
New Brunswick	15	4
Prince Edward Island	2	15
British Columbia	3	..
Manitoba	1	..
Saskatchewan	2	..
Alberta	2	..
United States of America	3	..
Newfoundland	7	..
West Indies	11	..
Total	101	29

The Bank of New Brunswick is without branches abroad, but as will be seen above, the Bank of Nova Scotia has 21 branches in the United States, Newfoundland and the West Indies.

Stock Allotments to Shareholders.

The following new stock issues to shareholders have been made during recent years by the Bank of New Brunswick:—

Date.	Amount.	Price per share.
February, 1906	\$250,000	265
December, 1909	250,000	275
February, 1911	226,700	260

The following allotments of capital stock have been made by the Bank of Nova Scotia since 1898:—

Date.	Amount.	Price per share.
December, 1898	\$255,100	210
December, 1899	104,900	220
February, 1901	140,000	230
January, 1905	340,800	260
December, 1905	159,200	265
February, 1906	500,000	268
December, 1910	1,000,000	268

Excellent Earning Powers.

Both banks have shown excellent earning powers, the net earnings in each case, since 1902, being at the following rates per cent.:—

Year.	Bank of New Brunswick.	Bank of Nova Scotia.
	%	%
1902	18.48	21.51
1903	18.27	20.58
1904	18.47	20.08
1905	18.96	21.60
1906	19.41	23.90
1907	18.80	22.72
1908	18.23	18.65
1909	18.17	20.14
1910	18.42	22.07
1911	16.90	23.01

Decreased Head Offices, Increased Branches.

This amalgamation will reduce the number of chartered banks in Canada to 25, which is two less than the number existing as far back as in 1869, as the following table will show:—

December.	Number of Chartered Banks in Canada.
1869	27
1874	40
1879	40
1884	40
1889	41
1894	38
1899	38
1904	34
1909	30

The number has been reduced of recent years by failures and amalgamations. At the same time, the number of branches has increased at a remarkably rapid pace, until today our chartered banks in Canada have 2,739 branches.

Mr. W. J. Allison, a director of the Bank of Nova Scotia, thinks that the latest amalgamation is the beginning of a new era or progress in the Maritime Provinces. "I am confident," he says, "that the merger will have a favorable affect upon the stocks of both banks and will be favorably reflected in general market conditions."

CUSTOMS REVENUE OF ONE HUNDRED AND SIXTY MILLIONS

Will These Record-breaking Collections be Maintained During the Second Half of the Year?

BY H. M. P. ECKARDT.

The Dominion Government recently forwarded to the Bank of Montreal in London the funds required to meet the 4 per cent. loan of £1,234,000 which matured on October 1st. No borrowing and no operations in high finance were required other than the purchase of sterling exchange to the extent of \$6,000,000 or thereabouts, for remittance to London. This little item of news from Ottawa passed round in the financial circles of London, Paris, Berlin, would certainly do no harm to the Dominion's credit. Usually, in a comparatively new country, great prosperity arising from rapid increase of population and from heavy investment of outside capital is accompanied by continued heavy borrowing by the national government. If a maturing loan is paid off or retired, the funds are provided in most cases out of proceeds of loans recently placed. But in this case it is the buoyant revenues of the country which have strengthened the government's hands in the financial sense, and enables it to take care of the maturing of the \$6,000,000 loan without any trouble.

In every one of the last three months the customs revenue has been within \$100,000 of the round \$10,000,000. The figures are: July, \$9,950,575; August, \$9,901,913; September, \$9,903,658. In 1911 the same three months yielded in customs collections as follows: July, \$6,880,973; August, \$7,947,420; September, \$7,803,026. Thus the increases this year have been: in July, 44 per cent.; in August, 24 per cent.; and in September, 27 per cent. And if the comparison be carried back to 1910 it is seen that the customs revenue alone, in the three months referred to, is practically equal to the whole revenue on account of consolidated fund in the same three months of 1910—customs, excise, post office, public works, railways, and miscellaneous. Taking the customs revenue for the first half of the current year—for the six months ending September 30th—the total is \$56,455,146, as against \$42,284,535 in the first half of the fiscal year ended last March. The increase is therefore roundly 33 per cent.

Double That of Three Years Ago.

Comparing this year's customs collections with the records of 1909 it is seen that the customs revenue is now running about double the revenue of three years ago. That certainly is remarkable progress. It is to be noted too that the items of the revenue other than customs have shown satisfactory development. Thus the excise duties in the past half year show an average per month of \$1,700,000 as against a monthly average \$1,466,000 in the corresponding period of 1911. In 1910 the average was a little over \$1,200,000; and in 1909 a little under that figure. On account of the post office department the government has taken into its revenue \$800,000 per month in 1912, as against \$700,000 per month in 1911. Revenue from public works, including railways, in 1912, has been running at the rate of \$1,120,000 per month, as against \$980,000 in 1911. And the monthly average of miscellaneous revenue this year is \$533,000, as against \$494,000 a year ago.

Taking the total revenue of all kinds, the monthly average is now \$13,560,000, and this figure compares with an average of \$10,677,000 in the first half of last year. Usually in the second half of the fiscal year the revenue tends to fall. Imports subject to duty generally come forward in heavier volume during the season in which freight may be carried by water to Montreal, Toronto and other inland ports. Making generous allowance for that natural falling off, it seems quite reasonable to expect that the revenue for the current fiscal year would amount to between \$150,000,000 and \$160,000,000, if conditions throughout the world remained favorable.

Outlook Rather Complicated.

But unfortunately it is not possible to declare with confidence that world conditions will continue to favor our import trade, which is the principal source of the increased revenue. The outlook has latterly been growing rather complicated. In some respects the Balkan war may have a tendency to increase the prosperity of Canadian farmers. It may enable them to get higher prices for their wheat and other produce. The exports of Canadian products to Europe may therefore have a greater purchasing power and the importation of certain articles of foreign merchandise may be stimulated.

But on the other hand it is necessary to take account of some unfavorable circumstances. In the first place if the export demand serves to drive wheat prices unduly high, it means that Canadians other than the producers will have to pay more for bread, etc. The cost of living would be further

The following fire insurance companies have received licenses to do business in Saskatchewan:—Anglo-American Fire Insurance Company, of Toronto; Insurance Company of North America, Philadelphia; Union Fire Insurance Company, Limited, of Paris; and Western Assurance Company, of Toronto.

advanced. Again, the principal factor operating to increase Canada's imports, and therefore to swell the customs revenue, has been the borrowing in London. At present London is not in condition to take new securities. All eyes are watching the war cloud. It is hoped that the struggle will be localized; but the diplomats are not sure that it will be.

Free and Open Market Essential.

A free and open market for Canada's securities in London is essential for a continuance of heavy imports. It is well known that a considerable portion of the Canadian imports represent proceeds of loans negotiated abroad.

If European conditions take a decidedly unfavorable turn it may be the case that the exchange Canada forwards to London, representing her valuable exports of wheat, etc., will be applied to some extent to redeem or take up Canadian securities sold by Europe. Then it is understood that the Canadian money markets are likely to be quite hard during the coming fall and winter. While stringency may not be in evidence, it is reasonably certain that money will be stiffly held. This circumstance also may have a tendency to check imports; as the importers may not be able to get the credits necessary for extraordinary importations.

However, with reference to the import trade, it is well known that engagements already entered into will ensure heavy imports for several months in advance. And the European situation may brighten earlier than is generally expected. At present close upon \$600,000 per day is passing into the government's account at the Bank of Montreal. Montreal and Toronto, of course, supply the bulk of the customs revenue; but the collections at Winnipeg, Vancouver, and other western centres are increasing rapidly. Most of the chartered banks assist in the collection of the revenue; but the greater part of the actual cash finds its way into the Bank of Montreal at Montreal and at Toronto. Other banks which receive deposits from the collectors of customs, inland revenue, etc., transfer the credits, in the form of book entries to Ottawa. The various government departments draw upon these banks when its balances exceed a certain figure, and transfer the money to the government accounts in the Bank of Montreal, Ottawa. Thus the other banks are debtor to the Bank of Montreal in the Ottawa clearing house. In the last analysis the settlements at the secondary clearing houses are effected by transfers of legals usually in Montreal.

FOR INSURANCE MEN

In selling life insurance it is well for the agent to know what competitive offices are offering as well as the specialties of his company, therefore the compilation of information relative to Canadian offices made by Messrs. Stone and Cox, should prove of much practical value to all Canadian insurance agents and officers. It is in handy form and comprehensive. Some of its contents are: Premium rates, Surrender values, Dividends paid by all offices, Expense ratios, etc. There is also issued an industrial supplement. Insurance tables, \$1; Industrial supplement, 50 cents. Messrs. Stone and Cox, c/o Miln, Bingham Printing Company.

The Canada Western Trust and Mortgage Company will apply for a Dominion charter, with power to carry on business of a trust, loan and mortgage company in all its branches. The head office will be at Edmonton. Messrs. Parker and Clark, Toronto, are solicitors for the applicants.

Hon. Robert Rogers has discussed with Mr. R. J. Dale, representative of Montreal insurance interests, the question of rates in the event of the season of lake navigation being prolonged. An announcement will be made later. There are many difficulties in the way, especially those of maintaining aids to navigation once the ice takes.

Parr's Bank have this week invited subscriptions to \$2,750,000 6 per cent. 20-year first mortgage gold bonds at 95, \$825,000 common at 15, of British Columbia Breweries, Limited. This combination includes Vancouver Breweries, Limited; Canadian Brewing & Malting Company; Union Brewing Company. The directors include Messrs. Richard and C. M. Narpole.

An insurance fund for Calgary's civic employees is proposed in a by-law which Alderman C. H. Minchin will introduce at the next meeting of the council. The measure provides that 1 per cent. per month of the pay rolls of all city departments shall go into a special fund to provide insurance against sickness, accidents, and death of city employees. Alderman Minchin estimates that the revenue so provided from the pay roll would establish a fund of \$16,000 to \$17,000 annually. The proposed by-law will provide that when the fund reaches a sufficient total to cover all insurance risks, the surplus may be loaned out on first mortgages at six per cent. interest.

FRENCH INTERESTS CONTINUE INVESTIGATION

Of Banque Internationale Affairs, and of Other Companies—Quebec and Saguenay Railway

Monetary Times Office,
Montreal, October 23rd.

The situation in connection with the Forget group of stocks continues to be discussed. For days past, the hearing of allegations has been going on from time to time in private before Judge Leet here, and many rumors concerning the nature of the charges have been heard.

It would seem that the charges concern alleged wrongful acts in connection with the funds obtained from France. One of the questions asked at the meeting of the Quebec Railway, Light, Heat and Power Company indicated the nature of part of the complaint. This concerned the disposition of the money sent from Paris to be spent in construction work on the Quebec and Saguenay Railway, a subsidiary of the Quebec Railway, Light, Heat and Power Company. No reply was given to the question, the reason offered for this being that the information would be taken advantage of by the company's enemies. It is understood that the representative of the Paris interests desires to ascertain what was done with this money, and that this may be one of the topics under debate in the hearing referred to.

Questions are also being asked concerning the Banque Internationale, and the alleged wrongful statements, supposed to have been made to the government, though, so far as is known, the Paris people have not yet supplied details of this matter. The general feeling is that any efforts made along these lines will not be very productive, as the general manager of the bank is trained in banking practice and exceedingly careful, and the same may be said of the inspector of the bank.

Bank Has Careful Officers.

Meantime, application has been made for the appointment of a sequestrator to take charge of the Quebec and Saguenay Railway. This step is largely for the purpose of preventing other creditors obtaining undue priority through judgments. The application is made under the section of the Quebec Railway Act which provides that when a railway which is subsidized by the province has become insolvent, or is not complying with the terms of its charter as regards the commencement or completion of its works within the time specified, or does not continue the undertaking or the running or operation of any part of the road for a period of ten days, the Lieutenant-Governor-in-Council may, at any time, upon recommendation of the public utilities commission, authorize the minister of public works to sell the road. It follows therefore that a wait must ensue while the proper procedure is complied with.

The next point of issue is as to how the Quebec Railway, Light, Heat and Power will be affected by its connection with the sequestered road. It is understood that the former company is the owner of the entire bond issue of \$2,500,000 of the latter and that it had issued its own bonds against this security.

Trading Prices are Affected.

The contracting firm, however, may succeed in obtaining a prior lien on the assets of the Quebec and Saguenay, they having supplied all the material entering into the road and performed the work. This, presumably, will compel the Quebec Railway, Light and Power Company to come to the rescue in order to protect its own bonds.

Nothing further has been heard relative to the East Canada Power and Pulp Company. The claim was made some time ago that the bond interest, which had been passed, would be met. Subsequently, it was stated that the company had completed certain dams in the upper reaches of the river, which dams should be sufficient to supply the company with an even flow of water sufficient to keep the mills near Murray Bay operating all the year round. It has not been announced up to the present that the bond interest has been met, nor have there been any further announcements concerning the situation at the mills.

Meantime, the price of the securities of the Quebec Railway, Light, Heat and Power Company, and of the East Canada Power and Pulp Company, have declined on the exchange and trading in them is neglected. East Canada Power and Pulp stock has sold at \$5 per share. As for the bonds, they have disappeared from the quotations altogether.

Quebec and Saguenay Railway Company has no securities on the market, but Quebec Railway, Light, Heat and Power stock has been selling between \$11 and \$12 per share and the bonds at 57% of par.

Permits have been issued at Edmonton since beginning of the year for the erection of 1,778 residences.

BALKAN WAR AND INVESTMENTS

Serious Blow to Six Hundred Million Dollars Worth of Government Securities—Interesting Analysis of the Position

War with the Balkans is a severe blow to the market in 120 millions sterling of Government securities. That is the total amount at present on the market of the loans of the five Balkan Powers, to say nothing of the Powers less directly concerned in the struggle. The outbreak of hostilities is the most serious event for the holders of these securities since the Græco-Turkish War, although during the past 15 years this group of securities has been by no means free from alarming crises. Despite these disturbing influences, however, the market has preserved a degree of steadiness that compares favorably with that of securities ranking very much higher in the investment scale. This has been largely due to the close control exercised by the Great Powers over the administration of most of the loans issued by the Balkan States. The Times analyses the position in an interesting article.

Turkey's securities, it is pointed out, passed through many vicissitudes until the formation of the Council of Administration of the Ottoman Public Debt was formed in 1881, as the result of negotiations at Constantinople with representatives of the English, Dutch, French, Austrian, German, and Italian bondholders. All the outstanding external loans, with the exception of the Guaranteed Loan of 1885 and the Egyptian Tribute Loans of 1854, 1871, and 1877, were converted into new bonds, and the international Council of Administration was charged with the administration of the revenues assigned for the service of these new bonds, and also the five per cent. priority bonds issued in settlement of the Galata bankers' claims. The revenues comprised the salt and tobacco monopolies, the stamp and tobacco contributions, the duties on wines and spirits, certain fish taxes and silk tithes, the tribute from Bulgaria, the surplus revenues of Cyprus, the annuity payable by Eastern Rumelia, the tax on Persian tobacco, and certain surpluses arising from modifications in the Customs tariffs.

Some alterations have been made in these provisions since the terms of the debt settlement were promulgated as the Decree of Moharrem in December, 1891, but in the main these revenues are still controlled by the Debt Council. One alteration has been the substitution of tobacco tithe and additional Customs receipts for the Bulgarian Tribute and the Cyprus surplus revenues, which have never been paid to the Council.

Turkey's 35-Million Loan.

Of the Turkish loans secured on the revenues administered by the Debt Council, the most important is the four per cent. unified converted debt issued in 1903 in place of the bulk of the debt included in the 1881 settlement. The total authorized amount of this loan was over 38 millions sterling and there is still more than 35 millions outstanding. The highest price reached by this loan during its ten years' existence was the 97-3/16 touched in 1906; the lowest was the 74½ to which it sank in 1904. But since that year it has never been below 82, and it now stands at 86.

Another loan secured on the internationally-controlled revenues is the comparatively recent 4 per cent. loan of 1908 known as the Ottoman Bank loan. This was issued partly to repay money advanced to the Turkish Government at 7 per cent. by an Anglo-Franco-German group and partly for current financial needs. Of the total amount of £4,282,840, a million sterling was remitted to the Imperial Ottoman Bank as cover for the Government's statutory overdraft, while of the remainder a third was issued in London in June, 1909, at 80½ per cent., equal amounts being simultaneously placed in Paris and Germany respectively.

Most Recent Loan.

The most recent loan—the four per cent. loan of 1909—is in no way under the supervision of the Debt Council. This loan was for a total of £6,363,640, and was issued mainly to cover a budget deficit. It is specifically secured by arrangement with the Russian Government on certain revenues assigned as security for the Russian war indemnity. The London issue consisted of £1,818,182 at 89, the remainder being placed in Paris at 90. The market price of this loan dropped last year to 73½, but it has now recovered to 77.

Of the older loans not included in the 1881 settlement, the least known, but not the least interesting is the four per cent. guaranteed loan of 1855. This is guaranteed, as to interest only, by the British and French Governments, and was issued by Rothschilds at 102½ per cent. All the bonds have been drawn for repayment, but the bonds drawn since May, 1875, have not been redeemed, so that £3,815,200 of the five millions issued is still outstanding. The loan is officially quoted among "the funds," and now stands at 102. In the following table a complete list of the loans quoted in London

is given, and comparison of the two columns gives an indication of the effect of the crisis on prices. The table includes the loans secured on the Egyptian Tribute, although the service of these loans is in fact charged on the revenues of Egypt and not on the revenues of the Debt Council.

Turkish Securities.

Name of Loan.	Amount outstanding.	Cur'tnt quota-	Hi'h'st this year.
Guaranteed Loan, 1855 (4%)	£3,815,000	102	104½
4%, 1891 (Egyptian Tribute)	5,498,920	99	99½
3½% Egyptian Tribute, 1894	7,300,080	88	91½
4% Loan of 1902	7,400,880	90½	91
4% Unified	35,395,260	86	91½
4% Loan, 1908	4,282,840	76	81½
4% Loan, 1909	6,246,760	77	81½
	£69,939,040	...	...

Montenegro's Small Debt.

Montenegro has only one loan on the market and that was issued less than three years ago. Its amount was only a quarter of a million sterling, and it was placed in London in December, 1909—before the country assumed the rank of a kingdom. The proceeds were to be employed in repaying all existing loans and short-dated bills, in forming a State mortgage bank, and in constructing roads and other public works. The loan is specifically secured by a first charge on the revenues and taxes of the Customs and on the salt monopoly. It was issued at 97. In 1910 it rose to 100, but last year it fell back to 92. During the recent crisis it has been further depressed, and yesterday after the outbreak of hostilities it dropped to 87½.

Until recent years the greater part of Bulgaria's loans were on a 6 per cent. basis, but her credit had so far improved by 1907 that in April of that year the six per cent. loans of 1888 and 1889 were called for repayment and the holders were given the option of taking the bulk of their principal in new four-and-a-half per cent. bonds valued at 90 per cent. Five and three-quarter millions sterling of these were taken up, and in 1910 the price of the bonds reached 99. Their highest price this year, however, was 96½, and the current quotation is 91.

As to Bulgarian Securities.

The six per cent. loan of 1892, of which there is £2,805,960 on the market, still remains unconverted, and there is also a five per cent. loan of 1902.

In February, 1909, another four-and-a-half per cent. loan was issued in London, Austria, Germany, Holland, Switzerland, and Belgium. The amount was £3,960,000 and the price of issue 91 per cent. Particulars and prices of all four loans are given in the following table:—

Bulgarian Securities.

Name of Loan.	Amount outstanding.	Cur'tnt quota-	Hi'h'st this year.
6% State Mortgage Bonds (1892)	£2,805,960	98	105½
5% Gold Loan, 1902	3,963,712	98	101½
4½% Gold Bonds, 1907	5,670,000	91	96½
4½% Gold Bonds, 1909	3,915,648	85	91½
	£16,355,320		

Servia has only four per cent. bonds on the market, but this comparatively low rate of interest does not indicate that her credit stands higher than that of the other Balkan States. The last issue in London of these bonds, amounting to a million sterling, was offered through Parr's Bank at the low price of 68, and even now, despite the fact that the bonds are redeemable by annual drawings at par, the quotation is no higher than 83. The total amount of the loan is over 300 million francs and the bulk of it was issued about 16 years ago for the compulsory conversion of various five per cent. loans. The loan as a whole is known as the four per cent. consolidation gold loan of 1895, but the bonds issued in London, of which £47,200 has been repaid by drawings, are officially described as Servian four per cent. unified bonds. These alone are marketable on the London Stock Exchange.

Greek Loans With Varying Interest.

Greece, like Turkey, has an International Financial Commission to control the bulk of its loans. This was formed in February, 1898, as the result of the intervention of the Great Powers after the war with Turkey. Its revenues comprise the six monopolies—salt, petroleum, matches, playing cards, cigarette paper, and Naxos emery—the stamp and tobacco dues and the Piræus Customs duties. The interest on the loans included in the settlement depends on the amount of the revenues collected by the Commission, so that these loans have been aptly described as shares in the Greek Government. The rate of interest varies from year to year. The amount paid last year ranged from 1.92 per cent. on the four

per cent. rentes of 1889 to 2.40 per cent. on the five per cent. loan of 1893.

As part of the arrangement under which the International Commission was constituted, a two-and-a-half per cent. loan of £6,023,700 was issued in 1898. This loan is guaranteed jointly and severally by the British, French, and Russian Governments, and the purposes of the loan were the payment of the indemnity to Turkey, the uncovered deficit in the accounts of 1897, and the conversion of the floating debt. The first issue of £4,980,000 was made in May, 1898, in London, Paris, and St. Petersburg at 100½; a further £961,500 was subsequently sold at 104 for the settlement of internal debts; and a further £82,200 was devoted to the expenses of the loan. Part of the loan has been redeemed by means of the cumulative sinking fund, and the amount now outstanding is £5,189,000. The present quotation is 79, which is the lowest ever touched. The loan, it will be seen, stands 5 points above Consols, but that, of course, is because of the redemption terms.

Besides this and the other six loans comprised in the 1898 settlement, there are three newer Greek loans on the London market. There is the four per cent. railways loan of 1902, which, like the older loans, is under the direct control of the International Financial Commission. Its interest, however, is fixed at 4 per cent. The first issue of £880,000 was offered at 83½ in 1902; a second issue of £870,000 was placed in June, 1904, at 84 per cent.; £230,000 was placed privately in 1904; and the balance of £270,000 was issued, also privately, in 1906. This loan, which touched its highest price of 94½ in 1909, is now quoted at 84.

Then there is the smaller five per cent. Greek national loan of 1907. The total amount issued was £800,000, of which £787,400 is still on the market. The loan was quoted at one time last year at 101½, but has now fallen to 98.

Latest Loan of Greece.

The most recently issued Greek security is the four per cent. loan of 1911. The total amount is £4,367,000, of which £794,000 was issued in June last year in London at 86½ per cent., the balance being placed on the Continent. The following is the full list of Greek securities:—

Greek Securities.

Name of Loan.	Amount outstanding.	Cur't quota.	Hi'h'st this year.
Guaranteed Gold Loan of 1898 (2½%)	£5,189,000	79	84
5%, 1881	3,710,740	53	61½
5%, 1884	3,239,340	53	60½
Monopoly 4%, 1887	4,881,240	50	56½
4% Rentes, 1889	5,551,480	43	49
5%, 1890 (Piræus-Larissa Rly.)	2,142,000	53	60½
5% Funding Loan, 1893	348,420	53	59
4% Railways Loan, 1902	2,231,380	84	88½
5% National Loan, 1907	787,400	98	101½
4% Bonds	4,353,026	79	83
	£32,434,026		

As the prices indicate, it is only the first one and the last three on the list that bear fixed rates of interest.

MORTGAGE LOANS IN ALBERTA.

The amount of money invested by five classes of companies in mortgage loans in Alberta at the beginning of this year was \$32,518,667 as compared with \$24,711,594 in 1911. The following summary shows the increase made by each class of institution:

Alberta Operations.	Investments, 1910.	Investments, 1911.
Life insurance companies	\$7,917,576	\$10,324,141
Fire insurance companies	464,816	546,231
Accident, guarantee insurance companies, etc.		159,881
Loan companies	8,629,202	12,238,414
Trust companies	7,700,000	10,250,000
	\$24,711,594	\$33,518,667

At present the funds so invested exceed \$40,000,000.

"If Cape Breton were properly advertised in Canada and the United States, every vacant farm on the island would be taken up in five years."—Mr. John A. McNeill.

A booklet, "Bonds for Investment," containing much reliable information concerning corporation, industrial, and municipal bonds has been issued by Messrs. Murray, Mather and Company, Toronto.

CONDITIONS IN WESTERN CANADA

Good Threshing Weather Prevails—Wheat Movement is Rapid—Monetary Times' Reports from Brandon, Regina, and Moose Jaw

(Staff correspondence.)

Brandon, October 18.

The Monetary Times has had an opportunity this week to discuss conditions with those who know, at several points in the West. In the vicinity of Brandon splendid weather was being experienced for threshing and farmers were straining every nerve to make headway with threshing operations. Crops are turning out well and have been damaged but little by the backward fall. Farmers report insufficient help and this is heard at almost all points in the West. Should the present good weather continue threshing will be completed by the end of October; in many localities in the Brandon district it is completed now, and the main question is getting the wheat marketed. The Brandon farmers invariably have good crops, and this year they are even better than expected. Business men report money somewhat tight and it will likely continue so until the crop is marketed.

Brandon Improvements Noted.

Brandon is improved in appearance by the paving of all the main streets, on which street car tracks have also been laid, and it will not be long before the city is operating its own street cars.

Brandon is to be congratulated on having the splendid new Canadian Northern Railway hotel now open, which places the wheat city in the front rank of Canadian cities for hotel accommodation.

An overall factory, which will employ 150 hands, has procured a site in Brandon and will build a factory there.

The Midland Fire and Accident Insurance Company, with head office at Brandon, has opened for business. The new company is a local concern, nearly all the stock being held in Brandon and vicinity. This makes the third company with Brandon for headquarters. The new company intends doing a general insurance business, both cash and mutual, and expects to be able to make its business attractive for the insuring public. A feature of the business, to which particular attention will be given is farm insurance, a line which is capable of being developed largely in a well settled and wealthy community such as the Brandon district. The directors are all local business men, who are in close touch with Manitoba business, and who feel assured that the new company will have a successful career. The Midland Company is working under a Manitoba charter and began business on October 12th.

Active Regina is Advancing.

Regina, October 21.—Threshing in the region about the capital city of Saskatchewan is well advanced. Wheat is being rushed to market faster than usual, and is passing inspection at Winnipeg at the rate of from 1,200 to 1,500 cars a day. So far there is no cry of congestion, but wheat is piling up so rapidly at country points that congestion will soon be felt.

In Regina itself conditions are good, and any bad effects of the terrible cyclone which struck the city in June are hardly noticeable.

The Board of Trade are a most active body in Regina, and report several new industries which will build factories or warehouses. The city has a warehouse area and a system of spur tracks where it will sell sites to new industries at cost price.

All lines of business are brisk, but building operations have been retarded considerably by strikes, etc.

Collections are reported to be somewhat slow, but should improve in the next few weeks.

Moose Jaw Makes Rapid Strides.

Moose Jaw, October 23.—Threshing operations are well advanced in this district, and a few more weeks of good weather will see the plains fairly well cleared. Many farmers in this section of the country are buying ready-made granaries or are building them of lumber for the storage of their wheat. If more of them would do this it would help a great deal to relieve congestion later on. The crop in this section is a good one, and the railways are putting forth every effort here, as elsewhere, to cope with it. The yield is so much greater each year that farmers will of necessity have to provide their own storage facilities and also go in more for mixed farming.

Money is reported to be tight at all points just now, and collections in this district are slow. No uneasiness is felt, however, as when the returns are in the situation will be a great deal easier and money should not be so tight in a month from now.

The city of Moose Jaw has been making rapid strides this year both in building and along industrial lines. Building permits are greatly in excess of a year ago, and a strong foundation has been laid for a prosperous year in 1913.

BUSINESS IN BRITISH COLUMBIA

Trade in the Interior Must be Developed—False Creek Agreement—Value of Minerals in Northern Part of Province

(Staff Correspondence).

Vancouver, October 21.

Business men of Vancouver will visit the apple show at Vernon this week, and will extend their trip to adjacent parts of the Okanagan district. This is a movement that might have been inaugurated long ago. A suggestion along this line was made in The Monetary Times some years ago, following the visit to the Similkameen of one or two prominent business men of this city. They returned and told The Monetary Times that while they had lived long in British Columbia and thought they knew something about the country they were immensely surprised by what they saw and learned. Business men of the coast cities should make these trips as a regular part of their business. They would thus become acquainted with conditions, and be in a much better position to cope with situations as they arise. Not only would these trips be educative, but should result in more business, for personal acquaintance would be made with interior merchants and consumers. Such trips would be beneficial in every way, and worth while on the part of the merchants of New Westminster, Vancouver and Victoria, who are after interior trade.

Expansion of Interior Trade.

This trade will expand rapidly in the future with the construction of railways, and a start should be made from the first to bring it to the coast.

An instance of the necessity of such a trip to Fort George is shown in the statement that trade from Fort George and vicinity will go to Edmonton instead of to Vancouver. The two big coast cities have always commanded the trade up through the Cariboo, and it is a considerable item. Now the Grand Trunk Pacific is building in from Edmonton and eastward from Prince Rupert, but supplies are being brought in via the western Alberta city. It may be that when the railway is completed through, Prince Rupert will get this trade, but by that time connections will have been formed, and it will be difficult to break in. Many of the merchants and dealers now in the northern interior are from the coast, and it would not be difficult to secure a portion of this trade. If no effort is made, or interest in the country evinced by Vancouver business men, they will find that Edmonton wholesalers are ready to take the business over.

The agreement as drafted between the Canadian Northern and the city has been the subject of much discussion during the past week, and a special meeting of the board of trade on Tuesday night rejected the report of a committee, which urged an extra payment of two million dollars by the railway, and supported the agreement.

False Creek Agreement May Be Approved.

Since the Canadian Northern has shown a desire to come into Vancouver, many of the ratepayers are of the opinion that if the city stood pat and held for payment of the False Creek flats the railway company would have to pay. Some even go so far as to declare that Vancouver does not need False Creek improved, and that there are harbor facilities without the outlay required to put False Creek into shape. This is one of the biggest things that has come before the city for some time. As the area now stands it would be many a year before the city could undertake any work of improvement, and it is only by acting in conjunction with a large corporation such as a railway company that advantage may be taken of this expanse of tide flats in the centre of the city. Although the city may be giving something away, it is getting something in return, and in five years the head of the creek will be vastly different from what it is now. Instead of a dreary waste, it will be transformed into one of the busiest parts of the city, with improvements that will mean a great deal. Meetings of ratepayers held in various wards are taking a stand in favor of the agreement, and the probability is that it will be approved when the vote is taken in a few weeks.

What interior mines are capable of, is indicated by the reported refusal of a million dollars for the Standard property at New Hazelton. This offer was made by an accredited agent of the Federal Mining Company, and is perhaps the first large amount offered for a mine in the new district in the north. With properties such as this lying immediately east of Prince Rupert, the new northern terminus should be prosperous.

The British-Canadian Fire Insurance Company, of Vancouver, has been organized.

RUSSELL MOTOR REPORT

In view of the increasing business of the Russell Motor Company, it was decided during the past year to increase its capital. At a general meeting of the shareholders, on February 19th, 1912, authority was given to issue an additional \$400,000 of 7 per cent. cumulative convertible preference stock. This was offered to the shareholders at par and was fully subscribed. All expense in connection with the issue of this has been written off as an expense of the past year. This is shown in the company's annual report just published. The statement of assets and liabilities has been made up after provision for all proper contingencies in connection with the business. The accounts and bills receivable are shown after making full deduction for all bad and doubtful accounts.

Before arriving at profits for the year, it is the practice to charge all such items as repairs to buildings, machinery, etc., also charges to cover reserve and depreciation on plant, to expense, and the profit for the year is arrived at on this basis. The total charges made in this way, during the year, for depreciation, reserve and plant repairs, amounted to \$91,210.

After making the deductions as above, the profit for the year was \$180,127. This profit, which is slightly in excess of last year, does not show the same increase in percentage as the volume of business. This has resulted largely from a decision to devote a special amount of effort during the year to the improvement and refinement of the 1913 cars.

The automobile department, which is now much the largest branch of the business, again showed an increase in volume during the year. This increase in sales was general throughout the whole of Canada and also in Australia. During the year the company entered into an arrangement with the other licensees of the Knight motor in the United States, England and Europe, for the maintenance of a common engineering force, under the direction of Mr. Knight, to work on improvements of the motor and chassis.

The bicycle business showed an increase in the sale of complete bicycles, and also parts and equipment for them. This increase in business will probably continue from year to year, because the bicycle appears to be coming into more general use again as a convenience for many classes of people.

The company has considered it desirable to further improve the plant and equipment at the works in West Toronto. During the year a three story building was erected for use as offices and warehouse, and a large amount of new up-to-date machinery secured for the various departments. Under construction is a four story reinforced concrete building, which will give up-to-date premises for the automobile machine shop. These additions will enable the company to produce an increased output for next year.

In view of the probable future requirements of the business, the directors thought it wise to acquire an additional piece of land near their factory, and in April last, concluded the purchase of 17½ acres just across the railway tracks from the present plant and fronting on the Canadian Pacific Railway main line through Weston to the north.

INDUSTRIAL ACCIDENTS

According to the record of industrial accidents maintained by the Department of Labor, that for the month of September shows there to have been 89 workmen killed and 419 injured, a total of 508. Compared with the record for August, this is an increase of one fatal and 114 non-fatal. The trades and industries in which the greatest number of accidents occurred were: Steam railway service, in which there were 28 fatal and 123 non-fatal; metal trades, with 3 killed and 72 injured; mining, with 10 killed and 42 injured; and the building trades, with 10 killed and 33 injured.

DUTCH BANKER LIKES CANADA

Mr. W. Westerman, president and general manager of the Rotterdam Bank, has returned to Winnipeg after a trip to the prairie provinces. The institution, one of the largest in Holland, of which he is the head, guarantees the bonds of the Netherlands Trans-Atlantic Mortgage Company, which has a branch in Saskatoon. Mr. Westerman is paying his first visit to Canada and has been accompanied West by Mr. L. D. Fortuyn, managing director of the mortgage company which has its Canadian headquarters at Winnipeg. The company has more than \$2,500,000 invested in Canada. The bank president's visit to the Dominion should benefit the future relations between the mortgage company and Canada so far as the matter of loaning is concerned.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Bank of Commerce.—The directors have declared a bonus of 1 per cent. payable with the regular quarterly dividend of 2½ % for the final quarter on December 1st.

Twin City Rapid Transit Company.—For the second week of October the earnings of the Twin City Rapid Transit Company were \$15,868, an increase over the corresponding period last year of \$7,340, or 4.94 per cent.

Bell Telephone.—"I know of no reason whatever to explain the recent advance in Bell Telephone stock," said Mr. Sise, president of the company, this week. "We are making no extensions to our system, nor are we making a new stock issue, nor in the language of the street, are we to cut a melon."

Ames Holden McCready, Limited.—In the first five months of its current year Ames Holden McCready, Limited, shows an increase of \$650,000 in its sales over the same period a year ago, namely, May 1st to October 1st. The company has increased its daily output to 9,000 pairs of boots and shoes.

Dominion Sawmills and Lumber Company.—Justice Neville has approved of a scheme of reconstruction of the Dominion Sawmills and Lumber Company. This provides for the voluntary liquidation of the company and the formation of a new one, which shortly will issue £1,600,000 debenture and 500,000 one dollar shares. All meetings will be held in England.

Quebec Railway, Light, Heat and Power Company.—The French Association of Foreign Bondholders is forming a committee of defence for the bondholders of Quebec Railway, Light, Heat and Power Company, states a cable to the Montreal Star. A meeting has been summoned to consider the liabilities of French promoters for alleged mis-statements upon which the debentures were described.

Monarch Knitting Company.—As estimated when the shares of the Monarch Knitting Company, Limited, were offered for subscription in May, the common stock is to bear dividends at the rate of six per cent. per annum. The first payment of 1½ per cent. has been declared for the quarter commencing August 1st last. The regular quarterly dividend of 1½ per cent. on the preferred for the same period, has also been declared. Both dividends are payable November 1 to shareholders of record of October 21.

West Kootenay Power and Light Company.—The annual meeting of the West Kootenay Power and Light Company was recently held at Rossland, B.C., when the following officers were elected: Mr. W. M. Doull, president; Mr. Frank Paul, vice-president; directors, Messrs. Walter R. Baker, Charles R. Hosmer, George F. Benson, Edwin Hanson, Montreal, and J. S. C. Fraser, Rossland, B.C.; general manager, Mr. L. A. Campbell; secretary-treasurer, Mr. M. Roach. Satisfactory reports were submitted for the year and the president announced that the outlook for the coming year was very satisfactory.

Mexico Tramway's Company.—The Mexico Tramways Company's statement of earnings and expenses from traffic only, as advised by cable, for the month of September, 1912, is as follows:—

	1911.	1912.	Increase.
Total gross earnings	\$ 522,734	\$ 587,734	\$ 65,000
Operating expenses	255,820	271,551	15,731
Net earnings	\$ 266,914	\$ 316,183	\$ 49,269
Gross earnin's from Jan. 1	4,546,169	5,008,432	462,263
Oper. expenses from Jan. 1	2,200,379	2,379,316	178,937
Net earnings from Jan. 1.	\$2,345,790	\$2,629,116	\$283,326

Western Canada Flour Mills Company.—For the fiscal year ended August 31, 1912, the earnings of the Western Canada Flour Mills Company amounted to \$264,539, as compared with \$186,933 the previous year, an increase of \$77,606. After deducting charges and dividends there remained \$47,926 to be carried to profit and loss, making total surplus \$415,719.

Total assets of the company amount to \$4,348,457. Current assets are \$1,645,572 and current liabilities only \$680,450, leaving a working capital of nearly a million dollars.

The Western Canada Flour Mills Company has three mills in operation, one each at Brandon and St. Boniface, Man., and one at Goderich, Ontario. The capacity of the

three mills is 6,700 barrels a day. The mills are all working at full capacity.

Alexo Mine.—A total of seven cars of nickel ore were sent out by the Alexo Mine at Kelso during September. The ore was sent to the Monde Nickel Company's smelter at Victoria Mines, the total weight of the shipments being 589,200 pounds. The details of the shipping were as follows:

September 2	60,000
September 6	74,800
September 9	66,200
September 13	88,300
September 19	125,200
September 24	114,700
September 28	60,000

Total 589,200

Sao Paulo Electric Company.—The Economist made the following comment on the offering of £1,880,000 five per cent. 50-year first mortgage bonds recently made in London, England, by the Sao Paulo Electric Company:—

"The company is the 'unknown quantity' in the amalgamation of the Sao Paulo Tramway, Light and Power, Rio de Janeiro Tramway, Light and Power, and the Sao Paulo Electric, under the title of Brazilian Traction, Light and Power. The bonds constitute a first specific charge on the undertaking and immovable property, etc., of the Sao Paulo Company. The revenues of the Brazilian company, which undertakes to set aside enough to pay the interest on these bonds, are estimated to be at least £1,400,000 in the coming year, while interest on the bonds absorbs £94,000. The income of that company is derived from the dividends of the three companies, of which two at least have considerable bond issues. There is nothing to prevent the Brazilian company from issuing bonds of its own which would reduce the security for this issue. The bonds cannot be recommended.

Canadian Northern Express Company.—The Canadian Northern Express Company reports to the United States interstate commerce commission for August and two months, compared as follows:

	1912.	1911.	Changes.
August:			
Total rcts from op.	\$ 58,706	\$42,278	Inc. \$16,428
Express priv., debit	22,810	16,292	Inc. 6,518
Total oper. rev.	35,895	25,986	Inc. 9,909
Total oper. exp.	19,741	15,530	Inc. 4,211
Net oper. rev.	16,154	10,455	Inc. 5,698
Taxes	403	128	Inc. 275
Oper. income	15,750	10,327	Inc. 5,423
July 1 to Aug. 31:			
Total rcts. from op.	\$118,360	\$89,089	Inc. \$29,271
Express priv., debit	45,950	34,499	Inc. 11,451
Total oper. rev.	72,410	54,590	Inc. 17,819
Total oper. exp.	39,391	31,450	Inc. 7,941
Net oper. rev.	33,018	23,140	Inc. 9,878
Taxes	807	256	Inc. 550
Oper. income	32,211	22,883	Inc. 9,328
Mileage steam rds.	4,343	3,369	Inc. 973
Mileage other lines	22	22	

The rate of discount of the Imperial Bank of Germany was raised from 4½ to 5 per cent. on Thursday.

The issue is pending of £700,000 first mortgage four per cent. debentures at 94½ of the Edmonton, Dunvegan, and British Columbia Railway guaranteed by Alberta, states a cable to the Montreal Star. Application has been made to list Canadian Steel Foundries £20,000 sixes.

The annual meeting of the Canada Iron Corporation, Limited, was held on Thursday in Montreal. The president, Mr. Thomas J. Drummond, pointed out that the reports were for the year ending May 31 last, and that during that period the mines and furnace department were seriously affected by the depression in the United States. Since then conditions have improved, the mines in Nova Scotia have been reopened, and both furnaces in Midland, Ontario, are now in full blast on remunerative orders. The foundry department showed an increase of 23 per cent. over last year. The profits for the year were \$375,140. The reports were considered satisfactory, the opening months of 1912-1913 showing a gratifying increase in business and profits over the same months last year.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Fairlight, Sask.—The village will borrow \$1,500 for permanent improvements. A. Camerson, secretary-treasurer.

Pangman, Sask.—The council will borrow \$1,000 for permanent improvements. F. C. Gould, secretary-treasurer.

Swan River, Man.—Until November 1st for \$4,000 6 per cent. 20-year debentures. B. E. Rothwell, secretary.

Burnaby, B.C.—The Burnaby council repealed \$300,000 by-laws invalidated by technicality and will vote on them again next month.

Colgate, Sask.—The village council has been authorized to borrow \$2,500 for permanent improvements. L. M. Moore, secretary-treasurer.

Tisdale, Sask.—The village council has been empowered to borrow \$1,500 for permanent improvements. W. E. Moore, secretary-treasurer.

Birch Hills, Sask.—The village has been empowered to borrow \$2,000 for permanent improvements. G. W. Giles, secretary-treasurer.

Buchan, Sask.—The village has been empowered to borrow \$5,000 for permanent improvements. H. P. A. Hermanson, secretary-treasurer.

Cut Knife, Sask.—The village has been authorized to borrow \$1,000 for permanent improvements. W. W. Johnston, secretary-treasurer.

Montreal, Que.—The controllers sent a report to the city council reaffirming their recommendation to vote \$180,000 to build the Park Avenue subway.

Sutton Rural Municipality, No. 103, Sask.—The council board will borrow \$10,000 for permanent improvements. R. J. Neal, Mazenod.

Penetanguishene, Ont.—Until November 5th for \$15,000 5 per cent. 20-year debentures, guaranteed by the County of Simcoe. W. H. Hewson, town clerk.

Marquis Rural Municipality, No. 191, Sask.—The municipality will borrow \$5,000 for permanent improvements. F. E. Hurd, Marquis, secretary-treasurer.

Vernecczanka, S.D. No. 264, Sask.—Until November 1st for \$1,200 10-year 8 per cent. debentures. T. Thomson, secretary-treasurer, Stornoway Station.

Rural Municipality of Arm River, No. 252, Sask.—The municipality will borrow \$5,500 for permanent improvements. A. J. Robertson, secretary-treasurer, Davidson.

Rural Municipality of Cap, No. 34, Sask.—The municipality has been empowered to borrow \$10,000 for permanent improvements. F. Shupe, secretary-treasurer, Ceylon.

Fairbank S.S. No. 15, Ont.—To finance the new school the trustees have decided to issue debentures for \$36,000, which will be placed on the market in the near future.

Owen Sound, Ont.—The council advances \$60,000 on a four-year loan, and pays four thousand dollars toward a site for buildings and plant of the Canadian Malleable Iron Company.

Yorkton, Sask.—Until November 12th for \$207,000 5 per cent. 10, 20 and 30-year debentures. T. F. Acheson, secretary-treasurer. (Official advertisement appears on another page).

Snipe Lake Rural Municipality, No. 259, Sask.—Authority has been granted the municipality to borrow \$5,000 for permanent improvements. Mr. Barkwell, secretary-treasurer, Richlea.

North Toronto.—For \$55,000 4½ per cent. 30-year school, and \$85,000 4½ per cent. 30-year sewer debentures. H. E. Stevenson, treasurer. (Official advertisement appears on another page).

Strathmore, Alta.—Until November 1st for \$5,000 15-year 6 per cent. cement sidewalk, and \$15,000 6 per cent. 10-year plank sidewalk debentures. M. E. Sly, secretary-treasurer.

Watrous, Sask.—Until November 1st for \$83,000 5½ per cent. 40-year waterworks and sewer construction debentures. Joseph Gaye, secretary-treasurer. (Official advertisement appears on another page.)

Halleybury, Ont.—The by-law authorizing the erection of the filtration plant was given three readings by the council and passed. The by-law is for an expenditure of \$20,000 covering the plant and building.

Galt, Ont.—On November 21st the ratepayers of Galt will be called upon to vote on a by-law for the raising by debenture of \$75,000 to be used in the construction of permanent roadways in all parts of the town.

West Vancouver, B.C.—Until October 29th for \$100,000 5 per cent. 20-year ferry, and \$75,000 5 per cent. 50-year road debentures. G. H. Peake, C.M.C., Hollyburn P.O., West Vancouver. (Official advertisement appears on another page).

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C.

Melville, Sask.—Until November 11th for \$55,000 5 per cent. 40-year town hall; \$6,000 5 per cent. 6-year mill loan; and \$43,300 5 per cent. 30-year debentures. Fred H. Clarkson, secretary-treasurer. (Official advertisement appears on another page.)

North Vancouver, B.C.—Until November 13th for \$169,000 5 per cent. 50-year streets, sidewalks, park and schools debentures; and \$61,823 5 per cent. 20-year local improvement debentures. John G. Harmer, C.M.C. (Official advertisement appears on another page).

Fort William, Ont.—The council has passed by-laws authorizing the construction of the Selkirk and Stanley Avenues sewers at a total cost of \$80,000, and have made provision for the issuing of debentures to the amount of \$50,000 for electric and telephone extensions and improvements.

Wetaskiwin, Alta.—Until October 30th for \$16,000 5 per cent. 50-year waterworks and sewers; \$23,000 5 per cent. 20-year electric light; \$6,445.06 5 per cent. 20-year concrete walks; \$2,069.41 5 per cent. 30-year sewers; and \$819.56 6 per cent. 7-year plank walk debentures. E. Roberts, secretary-treasurer. (Official advertisement appears on another page.)

SHOE MACHINERY COMPANY IS A COMBINE

Although Commissioners Have Good Things to Say of
the Company's Business and Its Methods

A majority report signed by Judge Laurendeau and Mr. Walsh, and a minority report signed by Mr. White, have been handed to the Minister of Labor at Ottawa respecting the investigation of the United Shoe Machinery Company of Canada. The majority report acknowledges that the company does business in a fair, honest and honorable way, that its machines are the best on the market, that the service given by the company to its customers is excellent, and there is no finding that prices have been enhanced and that trade or commerce has been in any way injured, but the majority of the commissioners find that the company is a combine, which unduly prevents or lessens competition in the production, manufacture, sale and supply of shoe machinery. They recommend that, under the circumstances of the case, instead of giving ten days to the company to make any change that it thinks necessary in its way of doing business, it be given six months from the date of the publication of the report in the Canada Gazette.

Filed a Minority Report.

The minority report, signed by Mr. White, finds that, according to the evidence adduced, the price of boots and shoes has not been enhanced by the use of the machinery of the company, that the price of the machinery itself has not increased, that as far as competition is concerned within the last five or six years a number of new shoe manufacturers have established themselves in the country and that the field was open to any new shoe machinery company which might either manufacture or sell machinery in Canada. The minority report goes on to say that as from the evidence adduced nobody, neither consumer nor producer nor the wearer of shoes having been damnified, it cannot be said that competition has been unduly lessened.

Combines Investigation Act.

The proceedings against the company were initiated in November, 1910, under the statute known as the Combines Investigation Act, which permits six British subjects of full age to complain of any persons or company who are of opinion that a combine exists, and that prices have been enhanced or competition restricted by reason of such combine, to the detriment of consumers or producers. After a long legal fight, which went as far as the Privy Council in England, a board was formed under the act, composed of Mr. Joseph C. Walsh, of the Montreal Herald, representing the complainants, and Mr. W. J. White, K.C., representing the company, and Mr. Justice Laurendeau, of the Superior Court, appointed as umpire by the two others.

The board began to sit on December 4th, 1911. It heard many witnesses in Montreal, Quebec, Toronto, and a number from the Maritime Provinces. The public sittings of the board came to an end in May last.

DOMINION CROP ESTIMATE

Weather Causes Some Damage—Spring Wheat Expected to Show Small Decrease—Barley, Oats and Rye Increases

A bulletin issued by the census and statistics office covers the crop conditions in Canada for the month ended September 30. It states that during this month disastrously wet weather continued to prevail over most parts of Canada, especially over the provinces of Quebec, Ontario and Manitoba. At September 30 large areas of grain, both in the east and west, were still either uncut or were exposed to the wet in stook. Much damage has been caused by sprouting and in the Northwest provinces second growth has in numerous instances caused uneven ripening and consequent lowering of grade. Frosts during September in those provinces did some damage; but as a rule only late sown crops, including flax, were seriously affected. In parts of southern Ontario the ground is so wet that many farmers have abandoned the sowing of fall wheat for next year.

The estimate of yield published a month ago could only be regarded as of preliminary value, because, in consequence of the bad weather and late season harvesting operations had made so little progress.

The new estimates of yield obtained from correspondents at the end of September confirm generally the previous estimates for most of the crops, but inasmuch as very little threshing had been possible and large areas of grain were still unharvested, it is feared that the final estimates, after completion of the threshing, may turn out lower than the figures now given.

Five Per Cent. Decrease in Wheat Production.

For spring wheat the estimated production is 188,816,600 bushels as compared with 189,904,500 bushels last year. For fall wheat the estimate is 16,868,700 bushels compared with 26,014,000 bushels last year, the total estimated wheat production being therefore 205,685,300 bushels as compared with 215,918,500 bushels in 1911, a decrease of 5 per cent. The yield per acre is 21.08 bushels for all wheat as against 20.77 bushels last year. Oats show a total production of 381,502,000 bushels compared with 348,585,600 bushels last year, the yield per acre being 41.39 bushels compared with 37.75. Barley is estimated to yield a total of 43,895,100 bushels compared with 40,631,000 bushels last year, the yield per acre being 31.00 bushels against 28.94. The total production of rye is 3,086,000 bushels against 2,668,800 bushels in 1911, the yield per acre being respectively 20.75 and 17.41 bushels. Of oats, barley and rye increases in total production as compared with last year represent percentages of 9, 8 and 15. The estimated production of peas is 4,202,400 bushels, of beans 1,106,800 bushels, of buckwheat 10,924,100 bushels, of flaxseed 21,143,400 bushels, of mixed grains 17,940,900 bushels, and of corn for husking 14,218,400 bushels.

How Average Quality is Measured.

The average quality of these crops at harvest time, measured upon a per cent. basis of 100 as representing grain well headed, well filled, well saved, and unaffected to any appreciable extent by frost, rust, smut, etc., is as follows:—Spring wheat, 83.70; oats, 86.01; barley, 84.48; rye, 80.82; peas, 66.41; beans, 68.81; buckwheat, 80.87; mixed grains, 90.59; flax seed, 83.86; and corn for husking, 71.92 per cent. Of these crops wheat, oats, barley, and flax seed are above, while peas, beans, and corn for husking are below the average quality for either of the two previous years. Rye is slightly below the average. Flax is well above the quality of both 1911 (75 per cent.) and 1910 (73 per cent.).

Root crops continue to show excellent figures as representing average condition during growth. The highest are potatoes, 90.12 per cent., and the lowest corn for fodder, 80.63 per cent.; the last named crop has improved by over 4 points during the month.

Since the foregoing was issued conditions have materially improved and with fine weather prevailing threshing is proceeding satisfactorily.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station for the week ended October 18th:—Cobalt Lake, 47,000; Hudson Bay, 61,707; Crown Reserve, 39,105; Penn. Can., 62,509; Campbell and Deyell, 35,600; Buffalo, 60,600; Cobalt Townsite, 72,000; McKinley-Darragh, 205,870; O'Brien, 128,200; La Rose, 135,400; total, 847,991 pounds, or 423 tons. The total shipments since January 1st are now 34,690,770 pounds, or 17,345 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

CANADIAN PRODUCTS ARE WANTED

Markets for Barley, Hay, etc.—Brazilian Trade—St. Petersburg Automobile Exhibition

The dealers in Canadian hay in Manchester and other parts of Lancashire are making demands for shipments of clover and clover mixed, is the report of Mr. W. J. Egan, Canadian trade commissioner at Manchester. They are also anxious to have the Canadian dealers realize that Lancashire's demand for this commodity is not temporary, but that this district has now become a regular customer, and that Canadian hay is always sure of a good market even if the crops here are above the average.

Clover and clover mixed grades of Canadian hay will always make higher prices in Lancashire than any other district, and under all conditions a permanent market will remain there. One dealer alone, who has within the past few weeks sent a representative to Canada, will guarantee to dispose of from 200 to 300 tons per week.

Should Get in Touch With Importers.

Although there is an increase of 7,000 acres under crop in Ireland this season, the outlook is poor for a good yield, and the crops throughout Great Britain being very poor indeed, Canadian exporters of barley should again get in touch with Irish importers, advises Mr. F. A. C. Bickerdike, Canadian trade commissioner at Belfast, the most prominent importers in Belfast being enumerated below:—Messrs. W. and R. Barnett, 58 Waring Street; Gregg & Roche, 45 Waring Street; Alfred M. Munster & Company, 1 Victoria Street; Warden & Stewart, Limited, 67 May Street; Cullen, Allen & Company, 48 Corporation Street; R. and H. Hall, Limited, Anne Street; and Munster, Simms & Company, Limited, Albert Street.

In Far Distant Countries.

The Canadian trade commissioner's office in Rio de Janeiro, Brazil, has been closed. Communications relating to Brazilian trade may be addressed to Mr. H. R. Poussette, 278 Calle Balcarce, Buenos Ayres, Argentine Republic.

An automobile exhibition will be opened in St. Petersburg in April or May of next year, states the Board of Trade Journal. Application for space should be made not later than November 28th, 1912, to Mr. W. G. Williams, Maxwell House, Arundel Street, London, W.C., or in Russia to the Imperial Automobile Club of Russia, 10 Palace Quay, St. Petersburg. Exhibits will be divided into twelve classes, and will comprise motor vehicles of all kinds, together with parts and accessories, motor boats, internal combustion engines for motor cars and for commercial or agricultural purposes, motorists' outfits, etc.

A steamer of the Canadian-Australian Royal Mail Line leaves Vancouver for Suva Fiji every four weeks. Canada's share of the total trade of this colony amounted to \$275,510, or 2.5 per cent. of the whole.

CRITICIZES CANADIAN BOOK-KEEPING

A Winnipeg correspondent writes to an accountancy journal in London calling attention to the alleged laxity among a large section of business men in that city with regard to the keeping of their accounts. The letter says that the demand for clerical positions far exceeds the supply; that salaries paid for this class of work are notoriously low, taking into account the cost of living. This being so, the men who are capable of doing anything else leave this kind of work as soon as they can see their way to anything better. Firms of accountants, of whom there are very few in Winnipeg, cannot, or will not, pay a decent salary. Their offices are filled with juniors and temporary seniors, all at inadequate salaries.

Business men, as a whole, do not appreciate the value of an audit—firms, and even companies, muddle along for months without any books to speak of. Then when chaos becomes too obvious, a book-keeper is called in and finds things in a mess. He gets bewildered, and as a prompt statement is impossible a professional's services are requisitioned, and he also has a bad time of it. His statement is subjected to hostile criticism, the writing up of values becomes a bitter question, and he probably finds in the end that his balance-sheet is the last, as well as the first, that he is called upon to prepare for the firm.

It is further said that, as a result of the rapid rise of so many businesses in the West of Canada, the heads of the majority of firms are rough-and-ready sort of men, who in their early days had little acquaintance with business methods, and, as is always the case in such circumstances, have a contempt for clerical work, regarding expenditure on the keeping of exact accounts as largely a waste of money.

LONDON MARINE UNDERWRITERS NOT WORRIED

About Proposed Canadian Marine Insurance Organization—Content to Leave Canada to Experiment With Reduced Premiums

The invitation issued by Hon. J. D. Hazen, Minister of Marine, to Canadian shippers to prepare a plan of marine insurance, together with the assurance that the Dominion government would give a workable scheme substantial financial aid, is still the theme of considerable discussion in London. The reply of Lloyds to this suggestion is that the steady increase in rates is due to the fact that underwriters cannot make the business pay; in other words, that their rates of premium are based on actual experience, and that even at the admittedly high level of premiums now ruling losses are very frequent and the business extremely hazardous.

This, adds the London Financial Times, is not a mere matter of opinion, but is one of actual fact, as can be proved by inspection of the books of the underwriters. In such circumstances it may well be asked where the difficulty really lies, and to this we may answer at once that at the bottom of all the trouble is the fact that no amount of expenditure on the St. Lawrence has so far done anything to remove the fogs which settle down on that river for days at a time and constitute a serious danger to shipping.

Risks are Extreme.

Mr. Hazen remarks rather quaintly that "in September and October tramp steamers could not come to the St. Lawrence for the grain, which had largely to be sent to America for export." This is perfectly correct, but Mr. Hazen is aware of the fact that the risks of St. Lawrence navigation during the months mentioned are extreme. The current is very rapid, the traffic is enormous and the weather usually far from clear, if not absolutely thick. It will be observed that so far we have confined our comments to a plain statement of the position as viewed by the parties to the dispute.

We now come, however, to more debatable ground, namely, the proposed formation of an underwriting institution in Canada to deal mainly or entirely with Dominion shipping. Mr. Hazen invites Canadian shippers to prepare plans for the organization of such an enterprise, and promises government support. Naturally, if the authorities in the Dominion lend financial aid to such a venture its members will be able to quote lower rates for insurance than are at present obtainable in London. If, however, the business be conducted entirely as a business proposition, London underwriters are content to leave Canadians to experiment on the basis of reduced premiums, and they are confident that if this can be done severe losses will be incurred if the practice of reduced rates be continued long enough.

Severe Loss Will be Incurred.

As regards this attitude on the part of Lloyds underwriters, it may be added that if their views were wholly fallacious marine insurance rates to the St. Lawrence would have been cut down long ago by Continental competitors, who are nothing if not enterprising in such matters. It is a fact, however, that whereas the cost of insurance against marine risks has been reduced on almost every other route in the world, as the result of Continental competition for the business, few attempts have been made to divert St. Lawrence risks from the London market, the experience of those underwriters who have endeavored to cater for such business at "cut-prices" being too well known to tempt others to follow their example.

PRICES STILL GOING DOWNWARD

The Department of Labor's index number of wholesale prices continued to decline during September, standing at 132.5 as compared with 133.4 in August and 128 in September of last year. These numbers show a comparison of prices prevailing at the present time with the average prices during the ten years, 1890-1899, some 255 articles being considered in the estimate. The downward movement during September was due chiefly to declines in the price of fresh vegetables, especially potatoes; while there were slight increases in several commodities, notably dairy products, fish, iron, hides, boots and shoes, anthracite coal and miscellaneous building materials. In regard to retail prices, the chief feature of the month was a rise in price of anthracite coal in many cities of Eastern Canada.

More sockeye salmon reached the spawning grounds of the Fraser River watershed in British Columbia this season than in any off year during the past ten years. The run four years ago was also better than usual and it was prophesied at that time that better conditions would obtain this year.

VANCOUVER'S SEPTEMBER FIRE LOSS

The total loss by fire in Vancouver during the month of September was \$10,908; the insurance paid was \$5,790, leaving the loss above insurance \$5,118. The value of property involved was \$153,450. The department answered 39 alarms in all divided as follows:—False alarms, 9; alarms outside city, 2; exhibition run, 1; smoke scares, 2; fires inside city limits where damage occurred, 12; rubbish piles and small fires where no damage resulted, 13. The damage resulting from fires occurring outside the city is not included in this report. The total amount of hose laid was 8,800 feet, while 1,450 gallons of chemical was used in extinguishing fires. A complete list of fires where damage occurred follows:

September 11.—Telephone alarm at 10.17 p.m. Small fire at the British Columbia Box Factory, 285 Front Street W., caused by an overheated stove. Building owned by Patterson, Chambers and Johnston, who operate the British Columbia box factory and reliance sash and door factory. Damage \$3.

September 14.—Verbal alarm at 11.10 p.m. Fire in two-story frame store at 1776 Charles Street, used for storage purposes. The blaze started in the rear of the building and did considerable damage before it was extinguished. Cause of fire unknown. Owners of building, Beaton and McNeill. Damage \$600, covered by insurance.

September 15.—Alarm from Box 526 at 5.37 p.m. Fire in a two-story frame building at 749 Keefer Street, owned by John Mason and occupied by G. Brunt and used as a brass foundry. The fire had a good start on arrival of the fire apparatus and gutted the main building before it was got under control. Cause of fire unknown. Damage \$5,500, partly covered by insurance.

September 16.—Telephone alarm at 5.40 p.m. Small fire in dining room at 3449 Third Avenue West, caused by defective fire place. Building owned and occupied by W. H. Pratt. Damage \$125, covered by insurance.

September 20.—Alarm from Box 34 at 11.12 p.m. Fire in three-story brick building at the south-west corner of Pender and Main Street, occupied by the Vancouver Harness Company and furnished rooms above. The blaze started in the harness company's workroom and ran up the wall and ate through the floor above before it was extinguished. The fire was presumably caused by defective wiring. Building owned by Robert Alexander. Damage \$1,540, covered by insurance.

September 21.—Alarm from Box 517 at 1.53 p.m. Small fire in clothes cupboard in bedroom at 1471 William Street, caused by spontaneous combustion. Fire confined to clothes cupboard. Building owned by J. Sandall and occupied by Mrs. Moffatt and used as a residence. Damage \$45, partly covered by insurance. Telephone alarm at 10 p.m. Fire in vacant house at 8 Dufferin Street West, owned by Robert Oaks. The blaze, which started from some cause unknown, was in the attic and burnt off the roof of the building. Damage \$1,000, covered by insurance.

September 23.—Alarm from Box 521 at 1.27 p.m. Fire in shed used as a pattern shop at 1162 Venables Street, caused by a firepot falling over. Building owned by Leo Malfet and occupied by R. Kirkwood. Damage \$205, covered by insurance.

September 27.—Telephone alarm at 3.50 a.m. Fire in clothes closet at the Felix Apartments, 610 Jervis Street, in suite occupied by A. Stewart. Cause of fire unknown. Damage \$210, partly covered by insurance.

September 29.—Telephone alarm at 12.35 p.m. Fire in plant of the Columbia Bitulithic Paving Company at the city yards, Bridge Street. Cause unknown. Damage \$1,500.

September 30.—Telephone alarm at 7.05 p.m. Fire in attic at 1648 Alberni Street, caused by a coal oil lamp exploding and setting the bed clothes on fire. Building owned by James Palmer and occupied by J. Brodeur and used as a cafe and rooming house. Damage \$150, partly covered by insurance. Alarm from Box 37 at 11.09 p.m. Fire in mattresses in second-hand store at 629 Main Street; cause unknown. Building owned by T. Goodman and occupied by Mrs. Black. The upstairs was used as furnished rooms. Damage \$30.

Total number alarms, 39; false alarms, 9; property involved, \$153,450; loss, \$10,908; insurance paid, \$5,790; loss above insurance, \$5,118; hose laid at fires, 8,800 feet; chemical used, 1,045 gallons.

The Canadian Bank of Commerce has opened a branch at Smith's Falls, Ont., under the management of Mr. R. M. Watson.

The following gentlemen have been appointed managers of branches of the Bank of British North America at the points named:—Mr. O. H. Sharpe, Ottawa; Mr. C. A. K. Kirk, Fredericton, Mr. A. G. Donaldson, Brandon; Mr. F. J. W. Coutts, Davidson; Mr. H. S. Langford, Rossland; Mr. A. MacCallum, Agassiz.

ELEVEN NEW COMPANIES EVERY DAY

That Was the Average Receiving Charters This Week
—Brewery Company Has Five Million
Dollars Capital

Seventy-seven companies with a total capitalization of \$16,567,000, have this week received charters, thus adding another large contribution to the total for the year. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capital.
New Brunswick	3	42,000
Nova Scotia	1	300,000
Quebec	11	5,590,000
Ontario	25	7,005,000
Manitoba	4	465,000
Saskatchewan	19	1,975,000
British Columbia	14	1,190,000
	77	16,567,000

The largest companies this week are as follows:—

British Columbia Breweries, Montreal	\$5,000,000
Empire Cotton Mills, Welland	3,000,000
Fraser Bay Iron Company, Sault Ste Marie	1,000,000
General Mines, Toronto	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Carnduff, Sask.—Carnduff Land Company, \$50,000.

Kamloops, B.C.—Kamloops Hotel Company, \$200,000.

Wilkie, Sask.—Wilkie Wine and Spirit Company, \$50,000.

Kelowna, B.C.—Kelowna Garage and Machine Works Company, \$50,000.

Yorkton, Sask.—Kentucky Canadian Investment Company, \$100,000.

Battleford, Sask.—Laurentia Milk Company of Saskatchewan, \$400,000.

Weston, Ont.—Bishop Sweatman School, J. F. Sweeny, W. H. Cross, A. W. Macnab, Toronto.

North Bay, Ont.—Anderson and Company, \$40,000. W. Anderson, W. G. Armstrong, J. R. Moffat.

Hagersville, Ont.—Walpole Fruit Growers' Association. W. H. Cherry, J. A. Fallis, S. W. Winger.

Fort William, Ont.—Superior Brick Company, \$500,000. K. R. Ayer, J. R. Hutchison, G. R. Duncan.

Lancaster, N.B.—Cement Blocks, \$10,000. J. B. M. Baxter, J. McDonald, G. E. Logan, St. John.

Hamilton, Ont.—Oakley Heights Realty Company, \$40,000. H. G. Ogg, H. McReynolds, T. M. Pilgrim.

Welland, Ont.—Empire Cotton Mills, \$3,000,000. J. R. Marshall, A. B. Turner, G. A. Young, Hamilton.

Victoria, B.C.—Runions Brokers, \$10,000. Gordon River Power Company, \$10,000. Negotiators, \$10,000.

Quebec, Que.—La Compagnie des Marchands de Bois de Quebec, \$20,000. A. Lortie, E. Paquet, A. Desjardins.

Kenogami, Que.—Saguenay Coal and Lumber Company, \$40,000. O. A. Porritt, R. S. Hall, J. Porritt, Jonquieres.

Regina, Sask.—Realty Investments, \$20,000. Lake Manitou Rheumatis Sanitarium Company, \$200,000.

Prince Albert, Sask.—Marquis Holet Company, \$300,000. Great West Iron, Wood and Chemical Works, \$500,000.

Portage la Prairie, Man.—Portage Development Company, \$60,000. F. W. Louthood, M. Anderson, J. B. Crepeau, Winnipeg.

Bowmanville, Ont.—Bowmanville Building Company, \$40,000. G. C. Bonnycastle, H. Cann, J. B. Mitchell, C. Rehder.

Fort William, Ont.—Begin Boyce, \$40,000. J. A. Begin, Windsor Mills; C. R. Clapp, Toronto; E. H. Begin, Fort William.

Amherst, N.S.—Christie Brothers and Company, \$300,000. T. S. Rogers, W. A. Henry, H. C. Winterbourne Powell, Halifax.

Ottawa, Ont.—Eddy Advertising Service, \$50,000. E. B. Eddy, H. B. G. Muir, W. F. C. Devlin. Merchants Mercantile Agency, \$200,000. A. E. Bannerman, F. M. Lower, W. R. Bannerman.

Hebertville Station, Que.—Compagnie Manufacturiere d'Herbertville Station, \$20,000. P. Dechene, A. Courture, A. Guay.

St. John, N. B.—Algonquin Land Company, \$24,000. C. F. Inches, J. S. Tait, C. Cook, St. John. Tug Lillie Company, \$8,000. F. P. Elkin, D. J. Purdy, F. C. Beateay.

Moose Jaw, Sask.—Moose Jaw Athletic Association, \$50,000. Ralph Manley Agency, \$50,000. Canadian Standard Automobile and Tractor Company, \$250,000. Bouseman Lumber Company, \$75,000. Acme Lumber Company, \$50,000.

Saskatoon, Sask.—Commercial Cigar Company, \$50,000. Saskatoon Auto Club, \$10,000. Saskatoon Trussed Wall and Building Company, \$100,000. Aldrich-Smith Company, \$20,000. J. O. Hettle and Company, \$200,000. Securities Corporation, \$500,000.

Sault Ste. Marie, Ont.—Algoma Eastern Terminals, \$100,000. T. Gibson, A. Taylor, E. P. Seon, Toronto. Algoma Central Terminals, \$100,000. T. Gibson, A. Taylor, E. P. Seon, Toronto. Fraser-Bay Iron Company \$1,000,000. A. McLean, T. H. Sagle, H. A. Mitchell, Steelton.

Winnipeg, Man.—Freehold Investment Company, \$300,000. D. H. Ross, T. M. Ryan, C. D. H. MacAlpine. Bonded Mercantile Agency, \$5,000. S. H. Whyte, N. Montgomery, C. L. Richardson. Western Canada Mortgage Company, \$100,000. C. H. Dixon, H. N. Streight J. F. Davidson.

Vancouver, B.C.—Canadian Automatic Fender Company, \$200,000. Utopia Club, \$10,000. Hale and Company, \$100,000. Hill, Wall and Company, \$50,000. International Home-Purchasing Contract Company, \$100,000. Canadian Light and Power Company, \$100,000. Rorke Realty & Investment Company, \$200,000. H. Williamson Company, \$50,000. North West Canada Construction Company, \$100,000.

Montreal.—Town Site Realities, \$40,000. M. S. Kahn, M. Tannenbaum, J. Crankshaw. Spencer and Aspinall, \$25,000. J. S. Aspinall, E. E. Howard, H. U. P. Aylmer. Montreal Publishing Company, \$50,000. V. E. Mitchell, E. M. McDougall, G. S. Stairs. British Columbia Breweries, \$5,000,000. G. W. MacDougall, L. Macfarlane, C. A. Pope. Southern Counties Realty Company, \$100,000. A. Laberge, I. Laberge, Beloeil Station; O. Berthiaume, St. Bruno. Starland Theatres Incorporated, \$75,000. C. M. Cotton, H. Lubin, Westmount; E. W. Westover, Montreal. Montreal Real Estate Exchange, \$20,000. A. Duclos, A. O. R. Duclos, F. A. Sylvestre. Grenville Lumber Company, \$200,000. C. Laurin, Montreal; C. Wilson, J. Cooper, Westmount.

Toronto.—Cabinet Directory Company, \$25,000. W. A. Merrill, A. H. Duff, R. Burnett, Montreal. Oxford Realty Company, \$40,000. G. R. Kappele, C. M. Johnston, L. V. Wright. Jack Canuck Publishing Company, \$60,000. J. I. Sutcliffe, H. A. Munro, F. C. Martin. General Mines, \$1,000,000. J. H. McDonald, J. M. Langstaff, H. T. Hunter. Jefferson Glass Company, \$200,000. W. Bovey, W. R. Hastings, J. L. Reay. Elk Lake Holding Company, \$40,000. C. H. C. Legott, C. M. Miller, Miss P. Stokes. McHardys, \$60,000. S. Cuddy, J. Y. Murdoch, W. H. Clipsham. Republic Motor Car Company of Canada, \$40,000. B. I. Card, H. G. Beemer, J. W. Payne. Auto Top and Body Company, \$200,000. J. E. Day, J. M. Ferguson, E. V. O'Sullivan. Durham Duplex Razor Company, \$40,000. W. E. Albus, G. P. McHugh, W. H. Furlong. York Mills Sand Company, \$50,000. J. F. H. Ussher, North Toronto; S. G. Beckett, S. L. Thorne. Northcliffe Land Development Company, \$200,000. T. Crosthwaite, E. W. Goulding, E. M. Dillon.

The Canadian Bank of Commerce has secured premises at Fredericton and Moncton, N.B., and will shortly open branches at those points.

S. L. T. HARRISON,
General Agent,
Moncton, N.B.

Moncton, N.B.,
October 19th, 1912.

The Monetary Times,
Toronto, Ont.

Dear Sirs,

I enclose herewith Money Order in payment of my subscription to *The Monetary Times* to July, 1913. It is one of the papers I cannot do without.

Yours very truly,

S. L. T. HARRISON.

SEPTEMBER BANK STATEMENT

Figures Show a Maintenance of the Strong Position Existing in August—Deposits Continue Above a Billion Dollars.

	Sept., 1911.	Aug., 1912.	Sept., 1912.	Year's Inc.	Month's Inc. or dec.
Deposits on demand	\$313,584,893	\$360,575,425	\$374,368,917	+ 19.3	+ 1.0
Deposits after notice	577,591,045	643,663,596	640,536,652	+ 10.9	— 0.4
Current loans in Canada	749,007,607	852,045,624	859,341,193	+ 14.7	+ 0.8
Current loans elsewhere	35,587,127	37,846,222	39,440,472	+ 10.8	+ 4.2
Call loans in Canada	67,717,991	75,194,735	75,205,261	+ 11.0	+ 0.01
Call loans elsewhere	93,517,076	114,847,864	112,767,036	+ 20.5	— 1.7
Circulation	97,197,176	101,501,270	104,334,287	+ 7.3	+ 2.7

The above are the principal changes in the statement of the chartered banks as at the end of September. Generally speaking, it shows little change as compared with that for August. The largest percentage gain is in current loans abroad, viz., 4.2 per cent., but in actual money only a little over \$1,000,000. Circulation increased by about \$3,000,000, or 2.7 per cent., and demand deposits by approximately \$14,000,000, or 1 per cent. The only two important declines were in after notice deposits which dropped \$3,000,000, or 0.4 per cent., and call loans elsewhere than in Canada which decreased \$2,000,000, of 1.7 per cent. The following table shows the course of current and call loans in Canada for the past thirteen months:

Loans.	Current in Canada.	Call in Canada.
1911—September	\$749,007,607	\$67,717,991
October	768,492,008	69,088,467
November	770,356,419	72,033,493
December	774,909,172	72,640,526
1912—January	775,972,243	71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261

Only once since September, 1911, have current loans in Canada declined and then by the small sum of \$200,000. Last month credit was extended in this account to the extent of \$7,000,000. This item is \$110,000,000, or 14.7 greater than in September, 1911. Call loans have fluctuated considerably but within comparatively narrow confines. At the end of September they were about \$3,000,000 less than in August, but approximately \$8,000,000, or 11 per cent. larger than in September, 1911. The tightening of this account invariably affects the activity of our stock exchanges. The growth of current and call loans in Canada and elsewhere during the past few years is clearly seen in the following table:—

Sept.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1908	\$516,960,003	\$26,994,946	\$41,084,145	\$ 59,834,979
1909	560,206,621	32,981,183	56,124,620	131,634,384
1910	668,976,522	40,190,240	62,428,576	103,534,884
1911	749,007,607	35,587,127	67,717,991	93,517,076
1912	859,341,193	39,440,472	72,205,261	112,767,036

Domestic current loans have grown from \$517,000,000 to \$859,000,000, a gain of \$342,000,000, or 66.1 per cent. Call loans in Canada have expanded from \$41,000,000 to \$72,000,000, a plus change of \$32,000,000, or 78 per cent. Call loans abroad have almost doubled. In 1908 they were over \$59,000,000 and last month \$112,000,000, that is an increase of \$53,000,000, or 89.8 per cent. Current loans abroad since the

same year have increased from \$27,000,000 to \$39,000,000, a gain of \$10,000,000, or 37 per cent. The continued appreciation of current losses in Canada is one of the most gratifying features of the above table, showing, as it does, the extension of bank credit to legitimate enterprises of many kinds in the Dominion.

The appended table traces the on demand and after notice deposits accounts for the past thirteen months:

	On demand.	After notice.
1911—September	\$313,584,893	\$577,591,045
October	331,953,562	586,451,045
November	341,712,265	588,942,142
December	335,020,693	591,068,932
1912—January	316,936,962	596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596
September	374,368,917	640,536,652

Demand deposits have varied, but reached last month the highest point during the past year with the exception of May, when they were \$377,000,000. Demand deposits are \$61,000,000, or 19.3 greater than in September, 1911. During September last they appreciated by \$14,000,000, or 1 per cent. Deposits after notice have also made good gains, although last September for the first time in a long period they exhibited a slight decrease. At the end of September they were still \$66,000,000, or 10.9 larger than a year ago. The investment of savings in goods, stocks and bonds may help to account in a small measure for the decline in this account last month, when financial houses were reporting a good investment rather than speculative demand.

The figures below reveal the remarkable growth of bank deposits in Canada during the past four years:—

Sept.	On demand.	After notice.	Total.
1908	\$183,207,740	\$410,332,819	\$593,540,559
1909	239,967,052	474,103,799	714,070,851
1910	273,529,461	545,630,667	819,160,128
1911	313,584,893	577,591,045	891,175,938
1912	374,368,917	640,536,652	1,014,905,569

From \$183,000,000 to \$374,000,000 demand deposits have grown since September, 1908. That is a gain of \$191,000,000, or 104.3 per cent. Deposits after notice have steadily increased from \$410,000,000 to \$640,000,000, and total deposits from \$593,000,000 to \$1,014,000,000. These are gains of \$230,000,000 and \$421,000,000, or 56.1 per cent. and 70.9 per cent. respectively. For several months now the total deposits have remained above the billion dollar mark and apparently that record is to remain.

The September bank statement, generally speaking, maintains the strong position as shown in the August figures.

Galt and Cornwall have refused all tenders for their respective bond issues.

The Bank of Nova Scotia has opened a branch at West Side, Saskatoon, Sask.

Warton, Ontario, town council gave the first reading to three important by-laws. One was an application from David C. Kerr, of Cleveland, to establish a knitting and woolen factory, to employ 40 hands at the beginning. Another was an application from W. Nelson, of Cleveland, to establish a rubber factory in the old Warton beet sugar factory, to employ 200 hands, while the third is to grant exemptions to Messrs. C. Reckin and Sons, flour manufacturers, for another period of ten years.

Messrs. Butler, Byers Brothers and Codere, Limited, Saskatoon, Sask., have been appointed as general agents of the St. Paul Fire and Marine Insurance Company for Alberta and Saskatchewan. In addition to the contract covering the fire,

automobile, and marine lines it is interesting to note that they will handle the hail business of the company in Saskatchewan next year. Mr. Roy B. Neinhauer, for some years with the home office of the St. Paul, has been appointed special agent with headquarters at Saskatoon.

For the better protection of the fire insurance business in Prince Rupert, the Prince Rupert committee of the British Columbia Mainland Insurance Association was formed recently. Only representatives of board or tariff companies are eligible to membership in the organization, which will be run on the same plan as the underwriters' association, of which it is a committee. The following local firms comprise the board committee; Messrs. G. R. Naden and Company, Peck, Moore and Company, McCaffery and Gibbons, Mack Realty, M. M. Stephens and Company, Continental Trust Company, C. B. Schreiber and Company, C. D. Rand, Westenhaver Brothers, Law, Butler and Company. Mr. M. H. Hobin of the Continental Trust Company is secretary.

T. C. BOVILLE,

Deputy Minister of Finance

COASTWISE SHIPPING AND PANAMA TOLLS

Shipowner of United States States His Views—British Ships Will Still Hold Lumber Business

On account of the intense feeling that has been aroused in this country, and the absence of the proverbial British reputation for fair play, a decision having been arrived at before hearing both sides of the question, many pages have been printed, but in none have I seen the American side given. I need not give the British side, as it has been printed many times, and the public are familiar with it. The object for writing this is not for controversy, but first to give a plain statement of facts, and second to endeavor to promote peace and good will between the two nations. I believe that our diplomats will settle the question, but if they fail I would be in favor of submitting it to The Hague. It is not, however, a matter for that tribunal to decide, as it is purely a domestic matter in which Great Britain is not interested. So writes Mr. Robert Dollar, a former Ottawa resident, now a shipowner in the United States, in the London Times.

Not Discriminate Against British Ships.

The vessels which will be permitted to go through the canal free of tolls will only be those engaged in the coastwise trade, and as only American owned vessels are permitted to engage in this trade, then it follows that foreign nations cannot be interested, as they are prohibited from engaging in this trade by a law which ante-dates the Hay-Panama Treaty by many years. The spirit of the treaty was that we shall not discriminate against British ships. How can there be discrimination when it is impossible for British ships to engage in this trade? The discrimination is in prohibiting British ships from engaging in coastwise trade, not in allowing American ships to go through free. American ships engaged in the foreign trade as the law stands at present must pay the same tolls as British ships, and according to the treaty this is right; but strange as it may appear the American shipowners are not directly interested in free tolls coastwise, it is the American public, as any tolls put on will just increase the rate of freight to that extent, and far more important than all this is that the transcontinental railway will also increase their tariff to the amount of the tolls, so that it is far-reaching, and explains more fully the American contention that it is a local internal affair, and not an international one, hence the reason Mr. Taft has stated that it is not a case over which The Hague has jurisdiction.

Must Meet World's Competition.

The railroads maintained a strong lobby in Washington all last session, headed by two of their ablest men, to endeavor to get as high tolls as possible put on coastwise ships. They were naturally not interested in rates charged on ships engaged in the foreign trade. The contention has been made that by passing the coastwise ships through free it would increase the tolls on foreign ships. There is no expectation in America that the canal will be an interest-paying investment for many years to come. Congress anticipated this, and they direct that "we shall try to get tolls sufficient to pay the working expenses only." This canal is like any other commercial enterprise that must meet the world's competition. The Suez Canal is rapidly coming down in its rates in anticipation of this competition. Then there are still open the waterways that we are using now, so that the United States will be compelled to make tolls low enough, otherwise they will find themselves with a canal on their hands, and few ships going through it; and seeing that they are determined to make it a success, the only way this can be done is by meeting any and all competitions by making the rate reasonable and low enough to get the traffic.

Then there is talk here of boycotting America, and a member of the congress said the only way to arbitrate this question was by the sword.

British Columbia's Lumber Trade.

The exclusion of railroad-owned ships from passing through the canal is of local interest only, and is necessary to prevent the railroads from getting complete control of the coastwise traffic that would go through the canal, thereby raising the rates overland. The question has often been asked to define what is coastwise. It is trading between ports from which all vessels are excluded except American bottoms. The Philippine Islands trade to the United States is open to the world.

Another correspondent recently tried to show that the lumber trade of British Columbia would be ruined by free tolls. He omitted, or did not know of, an important factor in this connection; that is, that there is a duty of 5s. per thousand superficial feet against Canadian lumber coming into the United States. Some figures follow which will show that British vessels will continue to do business at the old stand, and, inasmuch as I own British and American vessels and am engaged in the timber trade, I am able to give you

the data correctly; and as this is a criterion for all other trades and commodities, it should convince British shipowners that they have nothing to fear from American ships, either coastwise or foreign.

Cost of Building and Operating.

Timber ordinarily can be bought in British Columbia as cheap as on Puget Sound, so we have only the transportation tolls and duty to consider.

The cost of building a 9,000 ton draught weight capacity tramp steamer in Great Britain at the present high price is	£ 70,000
Five American vessels are being built on the Delaware of the same size for, each	142,000
A difference of	£ 72,000
The difference in the cost of operating a 9,000 ton American versus a British ship is per annum ..	3,650
Then, as the first cost is £72,000 more, provision must be made on this amount for 5 per cent. interest, 6 per cent. insurance, and 5 per cent. for depreciation, 16 per cent. in all, which amounts per annum to	11,520
	£ 15,170

Still Twenty Per Cent. Ahead.

And, as the trip from British Columbia to, say, New York and Philadelphia, will consume about a quarter of a year, that amount is chargeable against the American ship for the voyage (round sum)	£ 3,792
The vessel would carry 4,000,000 superficial feet at 30s. This rate, I assume, would be a fair one for a British ship	6,000
Total cost to the charterer if carried on an American steamer	£ 9,792
Then allowing the British steamer the same rate as the American steamer, 30s. for 4,000,000 superficial feet	£ 6,000
Canal tolls, say \$1 per net register ton	800
Import duty into the United States, 5s. per 1,000 superficial feet	1,000
	£ 7,800
Being a difference in favor of carrying the cargo in a British ship, which is about 20 per cent.	1,992
	£ 9,792

All other commodities carried in British versus American ships will be affected in the same proportion. So I trust those who claim that British Columbia will be ruined, instead of dealing in generalities will get down to hard facts and cold figures. After the canal is open any lumber we sell on the eastern seaboard of the United States will be bought in British Columbia and carried in British steamers.

Unless Calgary secures another loan of one million dollars on unpledged by-laws, as recommended by the fiscal committee of the city council, all the public works will probably be abandoned for the season. A similar loan of \$1,500,000 was made by the city recently from the Bank of Montreal.

Campbellford, Ont., in an interesting pamphlet shows the various advantages it offers to manufacturers locating there, and several illustrations are given, especially showing its great resources for the development of power. Publicity Commissioner Gaudrie will send same to any one contemplating establishing a factory or branch works, etc.

Vancouver sawmill owners propose to utilize lumber refuse now being consumed in huge burners at the mills to make electrical power and steam heat, and to offer the same for sale. Application is made to the civic authorities for the necessary permission to lay wires and pipes for transmission purposes. The movers in the scheme say they can offer electricity to the city at $\frac{3}{4}$ of a cent or one cent per kilowatt.

The Canadian Pacific Railway Company is acquiring several independent lines in Ontario, Quebec and Alberta, which now act as Canadian Pacific Railway feeders. Notice is given of the application to the railway commission next month, for a recommendation to the governor in council to sanction the lease by the Canadian Pacific Railway of the following lines: The Alberta Central Railway, the Campbellford, Lake Ontario and Western Railway, the St. Mary's and Western Ontario Railway, the Kingston and Pembroke Railway, and the Cap de la Madeline Railway.

VALUE OF INSURANCE INSTITUTES

(Continued from Page 630.)

cessfully complete the educational course in each branch. The members of the Institute are to be congratulated upon having associated with it men who are exceedingly busy in the conduct of their company's affairs, and who, at the same time, are giving their time and their interest to the development and growth of the Institute. The younger members should greatly appreciate this effort on the part of these busy men, and avail themselves of the opportunity to develop sufficiently to take over the responsible positions which are sure to come in the future.

DECREASE IN CEDAR TIES USED LAST YEAR

In 1910 eastern cedar composed 40 per cent. of the total number of cross-ties purchased in the Dominion; in 1911 it fell to 5.4 per cent., and to fifth place in importance of species used. Its place has been taken by jack pine, of which wood 40 per cent. of the ties used in 1911 were made. Tamarack, with 19 per cent., Douglas fir with 14 per cent., and hemlock with 12 per cent. are the next three in order.

The Forestry Branch of the Department of the Interior, which is authority for the above, states in its bulletin on the subject, that 13,683,770 ties, or 4,469,808 more than in 1910, were purchased in 1911. Railway development in the West is largely responsible for the increase.

The average price per tie was 39 cents. The United States furnished the most expensive kinds—Southern pine at \$1.10 and white oak at 81 cents apiece. These latter were used largely in switches.

In 1911 the sawn tie stood ahead of the hewn tie both in quantity used and price, 70 per cent. of the total being from the mill. The cost was 41 cents apiece, or 4 cents more than the hewn tie.

An interesting estimate of the amount of timber which could be saved by preservative treatment is given. Creosoting makes the initial expense per tie about 93 cents as compared with 58 cents for the untreated tie. However, as the length of life is extended by 10 years, the economy is two cents per tie per year. This would mean \$1,400,000 per annum, to say nothing of the vast quantity (estimated to be 350,000,000 feet board measure annually), which is being taken from the fast diminishing timber supplies.

NEWS AND NOTES

The Waterloo County Trust and Loan Company, with capital of \$3,000,000, and headquarters at Waterloo, Ontario, may be launched shortly.

The National Union Fire Insurance Company of Pittsburgh, has received a Dominion license for the transaction of tornado insurance, in addition to the business of fire insurance for which it is already licensed.

The Dominion-Gresham Guarantee and Casualty Company has been licensed to transact in Canada the business of guarantee, accident, sickness and automobile insurance. Mr. C. W. Hagar, Montreal, is the chief agent.

The Montreal Harbor Commission will give thirty days' free storage, the same as offered by the Grand Trunk elevator. They are ready to handle grain ex-cars into the new No. 2 elevator and also to make deliveries from the same to boats at any of the four berths of the Jacques Cartier pier.

Application will be made to the Dominion parliament at the next session for the incorporation of a life insurance company to carry on the business of life insurance in all its branches, under the name of the Northern Empire Life Assurance Company. Messrs. Caldwell, Dunn and Fraser, Moose Jaw, are solicitors for the applicants.

Construction will be commenced at once on the buildings and plant of the Canadian Malleable Iron Company, at Owen Sound, Ont., which has secured the site of the Carney Lumber Company's Mills, destroyed by fire last spring. The property covers about 30 acres, and has railway sidings and pier for shipping by water.

The London-Washington-Ottawa Insurance Company will apply at the forthcoming session of parliament for a Dominion charter empowering the company to carry on the business of fire insurance. Messrs. MacCraken, Henderson, Greene, and Herridge, Ottawa, are solicitors for the applicants.

A new firm will shortly be formed to engage in the security business in Montreal. The new business will be conducted by Mr. R. J. Younge, formerly general sales manager of the Canadian Consolidated Rubber Company, and previous to that secretary of the Canadian Manufacturers' Association, and Mr. F. G. O'Grady, of Drummond, McCall and Company, and secretary-treasurer of the Canada Iron Corporation.

At Saskatoon, Electrical Inspector Wheaton started the inspection of old buildings this week, and all that he finds are not in the proper condition will be given fifteen days' notice to have them fixed up with the aid of a competent electrician and if at the end of that time no start has been made on the work, orders will be made to have the power cut off altogether. This is being done to ensure a continuance of the low insurance rate which exists at present.

The report of the Calgary municipal street railway for the month of September, which has been presented to the commissioners show that the nett profits have increased \$5,961.38 over the same month last year the figures being: 1912, \$13,056.62; 1911, \$70,095.24. During the month the cars carried a total of 1,433,067 passengers and received a gross revenue of \$59,956.25 as against 818,969 passengers and a revenue of \$34,204.35 for September, 1911.

Development is proceeding rapidly, and we are borrowing immense sums, mainly from Great Britain, which is right and necessary; but we must not forget that we owe this money and have to pay interest on it, therefore our people should avoid extravagance in living expenditure, and devote themselves to the economical exploitation of our natural resources, and so afford ample means of living to our increasing population, so that the stream of desirable immigration may be kept up.—Mr. W. Molson Macpherson, at Montreal.

With the expiry last year of the bounties on iron and steel, Canada paid comparatively little during the past fiscal year for the special encouragement of industries under the bounty system. Thus the total amount paid on bounty account during the year ending on March 31st last, was \$538,529 only, as compared with \$1,591,663 paid during the preceding year. The distributions were as follows: Wire rods, \$160,750; crude petroleum, \$141,935; lead, \$179,288; Manila fibre, used in the manufacture of binder twine, \$50,536.

At Moncton, N.B., the Humphrey Unshrinkable Underwear, Limited, has been organized to carry on the manufacture of pure wool underwear. The new company will use natural gas to generate its power. Moncton is admirably located for shipping purposes. Messrs. F. W. Sumner, W. F. Ferguson, M. Lodge, A. E. Trites, and W. F. Humphrey and other business men of Moncton are interested in the new company, which expects to have its mills in operation early in December. The company is capitalized at \$500,000.

Representatives of English banking houses have asked to be given an opportunity to bid against Sir Max Aitkin in providing a street railway for Medicine Hat, Alta. An exclusive franchise is not desired, and they agree to sell the street railway they might build, at its option, any time after five years. They have other extensive plans of investment development, amounting to upwards of \$600,000, exclusive of the street railway under consideration, for which they must absolutely have street railway service, and in the event of the Aitkins Company getting a franchise, the British capitalists ask that it be not made exclusive, but that they also be given a franchise to build another street railway for which they will agree to interchange free transfers with all other street or interurban railways entering the city at any time.

You have often heard how timid British capital is. Whenever a private monopoly wants to keep public ownership off the grass it sets up a howl about the benumbing effect on British capital. Don't you believe it! British capital is brave—brave even to rashness. It goes wherever it has a fighting chance. English money is particularly fond of British Columbia—the word British may have something to do with it. What does English money look like? Well, if it is young, it is slender and noney and leggy, and wears a peaked cap and a raglan, and its trousers are turned up. If it is middle-aged, it is portly and has a loud voice and mutton-chop whiskers and wears spats. Old or young, English money looks good to British Columbia. With a little practice it is easy to tell it from German money, or rubber money, or stage money, or any other kind of money that may be used in new countries. Easterners who drop into public meetings in almost any town or village in British Columbia are surprised at the intelligence, culture, and debating talent displayed. It is the influence of the well-born, well-educated Englishman that does it. His presence gives a tone to British Columbia society which is not found on the prairies. This is the desirable Englishman, the best citizen of the world that any nation is turning out these days. It is the wasters and idlers that give their race a bad name, the blowsy demi-virgins who advertise for "congenial employment" (meaning nothing to do) as "companion to a lady," and the shirkers who drink beer and talk Socialism.—H. F. Gadsby, Toronto Star.

CANADIAN UNDERWRITER IS HIGHLY HONORED

**Mr. N. D. Sills, Sun Life Manager for Michigan, Elected President of the National Association of Life Underwriters—New President of Toronto Institute—Actuaries' Gathering—
Mr. Norman Bastedo's Promotion**

ONTARIO MAN IS PRESIDENT

**Of the United States Association of Life Underwriters
—Relations of Home Office and Field
Discussed at Meeting**

The president of the National Life Underwriters' Association of the United States for the coming year was elected last week at the association's annual convention in the per-

NEIL D. SILLS.

**Elected President of the National Association
of Life Underwriters.**

son of Mr. Neil D. Sills, a Canadian and a Canadian life insurance man. This election is not only a personal tribute to Mr. Sills, but is also a graceful compliment to the life insurance men of Canada. Mr. Sills was born at Sydenham, Ontario, in 1871, and was educated in the public schools and collegiate institute of Kingston. After teaching school for two years, he entered the service of the Sun Life Assurance Company, in the state of Michigan, in 1897, being promoted to district manager at Kalamazoo, Mich., in 1898, and in 1900 to manager for the state of Virginia. He has met with success, and is admitted to be one of the most prominent business men in Richmond. He is also a popular man in the life underwriters' association movement.

Two Notable Presidents.

It is an interesting coincidence that, after being associated with Mr. J. A. Tory in the life insurance business for many years and being an intimate friend for the past fifteen years, he should become president of the National Association in the same year that Mr. Tory became president of the Dominion Life Underwriters' Association, and that both gentlemen represent the same company.

At the convention which was held at Memphis, Dr. Dowling, president of the Louisiana State Board of Health, drew attention to the expansion and development of life insurance during the past 25 years which, he thought, is without a parallel in human achievements, whether in the domain of finance, commerce or philanthropy. And this, too, in spite of the drastic remedial legislation which followed the investigations in New York, and, we may add, Canada. The magnitude of the growth is due, in part, to the intrinsic merits of the enterprise and the scientific basis upon which it is founded; and in part, to the material advancement of the country during the same period.

In the opinion of Mr. I. M. Hamilton, who also addressed the convention, in the relations between the home office and the field force are embraced practically all of the problems of the life insurance business. Many of these are more

than half solved when mutual confidence and respect obtains between these two great departments. Friction sometimes arises between the home office and the field worker, but is usually unnecessary and occasionally absolutely inexcusable. Close association between these departments, a willingness to investigate, to give and take, nearly always solves these troubles promptly, properly and permanently.

Representatives of the Canadian Life Underwriters' Association to the National Association are Messrs J. A. Tory, Toronto; W. McBride, Winnipeg; and G. E. Williams, Montreal.

NEW PRESIDENT OF TORONTO INSURANCE INSTITUTE

**Mr. J. K. Pickett, Managing Director of the Imperial Life, Will Guide Its Destinies During
the Present Session**

The president of the Insurance Institute of Toronto for the session 1912-1913, Mr. J. K. Pickett, has been associated with the Institute since its organization in 1889, first as one of its charter members and as representative of the Institute in the office of the Imperial Life Assurance Company of Canada. In May, 1902, he was elected to the position of secretary of the Institute and continued to hold the position for two years, until the end of May, 1904. During this period the membership of the Institute increased from 256 to 394, due, it has been said, almost entirely to Mr. Pickett's efforts and deep interest in the progress of the Institute.

Secretary for Second Term.

He is the only secretary who has held this important office for a second term. During the session 1904-5 he held the position of curator and was also a member of the executive committee. Although his name does not appear as an officer of the Institute during the years 1906-10, he nevertheless was deeply interested and exercised always a favorable influence for the Institute. In 1911 he was elected to the

J. K. PICKETT,

**President of the Insurance Institute
of Toronto.**

position of vice-president, and in May, 1912, was made president.

Mr. Pickett's insurance career is indissolubly bound up in, and is part and parcel of, the Imperial Life Assurance Company of Canada, he having entered its service on September 1st, 1897, and has thus had no small share in the building up and development of the company.

Mr. Pickett was appointed assistant secretary of the company on March 6th, 1901, which position he filled until January 9th, 1907, when he was appointed to the more important position of secretary of the company. On May 8th, 1911, when Mr. Thomas Bradshaw, F.I.A., resigned the position of managing director of the Imperial Life, Mr. Pickett's ability and experience were recognized by the directors and he was immediately promoted to the position of general manager of the company. The appointment was an excellent one for the company, not solely because he is eminently fitted to discharge the responsibilities which devolve upon him, but also because he is popular with the agency force of the company, a feature of no mean importance in the successful management of a life company.

ACTUARIES OF AMERICA GATHERED IN TORONTO

Read Papers, Discussed Problems, and Reported Progress of Specialized Mortality Investigation

Actuaries of many lands gathered in Toronto last week to discuss the problems of the science of life insurance. The

COLONEL W. C. MACDONALD.

President of the Actuarial Society of America which met in Toronto last week.

occasion was the annual meeting of the Actuarial Society of America. Colonel W. C. Macdonald, of the Confederation Life Assurance Association, acted as chairman. The papers read, while generally technical in character, were in most instances of great practical importance, and included the following: "The basis for Employers' Contribution toward Service Pensions," by A. H. Mowbray; "A Theory of Sub-standard Lives," by Albert W. Whitney; "The Mortality Experience of the Mutual Benefit Life Insurance Company on Paid-up Policies issued in lieu of Surrendered Policies," by E. E. Rhodes; "A Suggestion for the Use of Statistics Based upon European Experience with Workman's Compensation in Arriving at Premium Rates for Insurance covering this risk in the United States," by A. H. Mowbray; "Select Tables as affected by a Variation in the Rate of Mortality," by P. C. H. Papps; "Modern Surrender Values," J. F. Little; "Expected Gain from Mortality," by E. W. Marshall; and "The Annuity Experience of the Mutual Life Assurance Company of New York," by J. S. Thompson.

Mortality in Hazardous Occupations.

The Society is engaged, along with the Medical Directors' Association, in one of the most important investigations ever undertaken in life insurance work. A study is being made of the mortality in various hazardous occupations, also an examination of the effect of build, or the relation of height to weight on mortality, and the mortality experienced in various classes subject to certain medical impairments. This

work is a continuation and enlargement of the specialized mortality investigation conducted by the Society ten years ago. While, in many respects, it is probable that the results will be more or less of a negative value, and in other cases that they will confirm the previous experience now possessed by the companies, it is possible that the results on the whole will be of a far-reaching character, and may lead to a more elaborate classification of risks than has heretofore obtained.

Risks of Fire and Life Companies.

It will be interesting to see whether the life insurance business will bear any analogy in its methods of doing business to the present more or less minute differentiations in risks followed by fire insurance companies. Mr. Hunter, the secretary of the Medico Actuarial Committee, reported informally on the work that had been completed to date, and announced that the reports would be completed with all possible expedition. It is expected that the second volume will soon be forthcoming.

In addition to the reading of papers, the business sessions were taken up in a discussion of the papers read at the previous meeting. In this connection it is noteworthy, as was pointed out by the president, Colonel W. C. Macdonald, that special interest was taken both in the discussions and in the reading of the papers by the younger members of the Society.

Both from a business and social viewpoint the meeting was generally considered to be one of the most successful ever held.

NEW TORONTO MANAGER OF CANADA LIFE

Mr. Norman H. Bastedo, who has been appointed manager for Toronto by the Canada Life Assurance Company, as a result of the changes incident to the transfer of Mr. H. C. Cox to the presidency of the Imperial Life, is a young man under thirty-five, who joined the Canada Life in 1899 as cashier in the Toronto agency. At that time, his chief training had been along office lines, with some valuable financial experience gained through some years' experience with the Birkbeck Loan Company. Soon after Mr. Bastedo became connected with the Canada Life, he found that he had some aptitude for field work, and whereas in the beginning he had not contemplated any active soliciting he soon found that his chief occupation was the writing of insurance, rather than attention to his office duties.

His inattention to office details, contrary to what might have been expected, and contrary to what probably would have happened in any other business, resulted in his promotion to the position of special agent, when his annual production of new business rapidly approached the totals of the best agents in the employ of the company. Upon the retire-

NORMAN H. BASTEDO.

Appointed Manager of the Toronto Agency of the Canada Life Assurance Company.

ment of Mr. E. H. Bisset, to accept the position of manager for the Canada Life at Detroit, Mr. Bastedo was appointed city manager, with some restrictions, and under the direction of his former manager, Mr. H. C. Cox. The present change gives Mr. Bastedo an unrestricted field of opportunity, and he has been appointed manager for greater Toronto and the County of York, which is perhaps the most important district in the company's agencies.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Alix, Alta.—October 17.—Mr. T. Sommerville's store. Cause and loss unknown.

Cobalt, Ont.—October 21.—Cobalt Townsite Mine's blacksmith shop. Loss and cause unknown.

Ottawa, Ont.—October 20.—Parliament Buildings, vault on third floor. Loss and cause unknown.

Lucknow, Ont.—October 21.—Mr. J. Joynt's evaporator. Loss \$3,000, no insurance. Cause unknown.

St. Thomas, Ont.—October 21.—Michigan Central Railway shops. Loss \$2,000. Cause unknown.

Collingwood, Ont.—October 13.—Collingwood Packing Company's plant. Loss and cause unknown.

Hyland Park, Man.—October 21.—Mr. J. Hyland's barn. Loss \$500. Origin, children playing with matches.

Lethbridge, Alta.—October 18.—Mayor Hatch's automobile. Loss slight. Origin, gas lighting apparatus.

Millbrook, Ont.—October 18.—Mr. B. Raper's barns. Loss unknown. Cause, probably cinders or sparks.

Edmonton, Alta.—October 15.—516 First Avenue, N.E. Loss unknown. Cause, children playing with matches.

Chatham, Ont.—October 16.—Mr. W. Drader's Planing Mill. Loss \$7,000. Insurance \$5,000. Cause unknown.

Souris, Man.—October 16.—Messrs. Sanderson Brothers' farm. Loss unknown. Cause, said to be threshing outfit.

Kingston, Ont.—October 14.—Six barrels of asphalt owned by city. Loss \$34. Cause, overheating of melting kettle.

Colborne Township, Ont.—October 15.—Mr. G. Ashton's barns. Loss \$3,000. Insurance \$900. Cause, said to be children.

Winnipeg, Man.—October 12.—Mr. E. A. Moore's steamer Mountcastle. Loss \$20,000, partly insured. Cause, supposed incendiary.

Montreal, Que.—October 19.—Stable, corner of Wolfe and Dorchester Streets. Loss includes 11 horses, valued at \$2,500. Cause of fire unknown.

Lindsay, Ont.—October 20.—Baker Lumber Company. Loss \$20,000. Insurance \$9,000. Cause unknown.

October 21.—The town hall. Loss and cause unknown.

Victoria, B.C.—October 16.—Messrs. Moore and Pauline's Garage, 1012 Yates Street. Loss, automobiles, etc., \$10,000; building, \$1,000. Insurance, stock \$7,000. Origin unknown.

Portage la Prairie, Man.—October 16.—Mr. B. N. Thomas's residence. Loss \$800. Insurance \$425. Farmers' Mutual Fire Insurance Company. Cause, defective stove pipe.

Fort William, Ont.—October 17.—Mr. R. S. Piper's automobile, 329 S. Syndicate Avenue. Loss \$400, insured with Columbia Company. Cause, gasoline.

October 18.—Canada Foundry Company's bridge construction car and other appliances. Loss, car, \$450. Cause unknown.

Earls court, Ont.—Three dwellings. Mr. Mopley. Loss, building, \$1,000; contents, \$500. Insurance, Liverpool, London and Globe, \$700. Mr. Burgess. Loss, building \$1,000; contents \$400. Mr. T. Hawking. Loss, building \$1,350; contents, \$700. Insurance, Liverpool, London and Globe \$1,000. Mr. Hawking's loss adjusted by Messrs. Ross and Wright, Toronto.

Toronto, Ont.—October 19.—16 Admiral Road. Loss \$130. Cause, gas jet set curtains alight. 608 Wellington Avenue. Loss \$50. Cause unknown.

October 17.—Shed at rear of 832 Yonge Street. Loss to George A. Evans, druggist, \$100 on stock; to Mr. V. B. Beaton, owner of shed, \$100. Adjusted by Messrs. Ross and Wright.

October 20.—18 Lakeview Avenue. Loss \$20. Cause children playing with matches. Insured with Quebec Company.

October 21.—Store, 1914 Dundas Street. Loss \$60. Cause candle set boxes alight. No insurance.

October 24.—National Casket Company, Niagara and Tecumseh Street. Loss \$35,000. Origin, possibly spark from locomotive.

Saskatoon, Sask.—October 4.—809 14th Street East, Nutana. Loss \$28. Insured with Law Union. Cause unknown.

October 7th.—722 12th Street, Nutana. Loss \$90. Insured with London and Lancashire Insurance Company. Cause, defective fire place.

October 8.—Mr. T. McMillan's repair shop, Avenue B and 19th Street West. Cause, overheated stove.

October 10.—488 5th Avenue West. Loss \$110. Insured with North British Mercantile. Cause unknown.

October 11.—Mrs. Reeve's stable, 418 22nd Street. Loss \$100, no insurance. Cause unknown.

Truro, N.S.—October 21.—McKay Block. The principal losses are:—The McKay block, almost a total loss, \$14,000, insurance about \$9,000; Madam Lunn, millinery shop, loss \$5,000, insurance \$2,000; Mr. E. G. Moxon, druggist, loss \$4,000, insurance \$1,500; Mr. Rogers barber shop, loss \$1,500, insurance \$400; Messrs. Pithavitch & Company, loss about \$2,500, no insurance; Mr. G. H. Vernon, barrister, library and fittings almost total loss, no insurance; the Truro Band, instruments and music, probable loss \$500; Mr. D. A. Tattre, tailor, loss about \$1,000, insurance \$500; Mr. R. A. Tremaine, barrister, loss probably \$500; photograph gallery, about \$2,500. Cause unknown.

Hanley, Sask.—October 20.—Business section. Loss \$50,000. Two of the principal general stores, those of the Consumers' Supply Company and Messrs. T. O. Hamre & Sons, with all their contents, the office building occupied by Mr. J. Oscar Baldwin, solicitor, and the post office, were destroyed. Insurance, Consumers Supply Company, building, valued at about \$5,000, total loss, insurance \$2,000, owned by Mr. O. Presboldt; stock valued at \$17,000, total loss, insured for \$10,000 as follows: Quebec Fire, \$4,000; Rimouski Fire, \$3,000; Hudson Bay Insurance Company, \$3,000. Office occupied by Saskatchewan and British Columbia Land Company, owned by the Dominion Bank, valued at about \$800, total loss, insurance of \$500. Contents with the exception of the safe were saved, insured with the Hudson Bay Insurance Company for \$500, damage estimated at \$300. Office building occupied by Messrs. J. L. Gesset & Son and Wehall, owned by the Dominion Bank, damage probably \$50, fully insured. There was no insurance on the building occupied by Mr. J. O. Baldwin. Total loss, owned by Mr. S. Jackson, valued at about \$400. General building, valued at \$5,000, occupied and owned by Messrs. T. O. Hamre & Sons, general merchants, and Mr. G. Gregg, postmaster, total loss; contents of general store valued at \$18,000, total loss; the contents of post office valued at about \$600 were saved, insured in two companies, amounting to \$3,500, on general merchandise \$12,000, as follows: North America Fire, \$5,000; Phoenix of Hartford, \$3,000; Norwich Union, \$3,000; National, \$2,000. The contents of the post office were insured for \$500, said to be in the Wawanesa Mutual. Cause unknown.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Sparta, Ont.—September 28.—Mr. Wilson H. Mills' evaporator. Loss, stock \$1,000, buildings \$1,400. Insurance \$12,000, with York Company.

St. Catharines, Ont.—October 16.—Mr. S. Stephenpiper's residence. Loss \$555. Insurance, furniture, etc., Hamilton Fire Insurance Company. Building with Commercial Union. Origin, supposed mice nibbling matches.

Coburg, Ont.—Provincial Steel Company's power house. Loss, machinery \$800, buildings \$2,200. Insured with London and Lancashire Insurance Company. Cause, presumably overheated flue, or gas producer.

Montreal, Que.—September 20.—Messrs. J. and W. Duncan, Limited's planing mill. Loss, stock \$250, machinery \$1,200, buildings \$750. Insured with Lumberman's Mutual of Boston, and Lumberman's Mutual of Ohio. Cause, chemical action of water on bag of lime.

High River, Alta.—Implement warehouse owned by Messrs. Shaw & Cooper, occupied by Mr. John Brackley. Loss about \$16,000. Insurance on building \$1,000 in Montreal, Canada, on contents, Royal, \$5,000; Sun, \$5,000; Commercial Union, \$3,000, and Canada National, \$3,000.

Winnipeg, Man.—St. Charles Country Club. Loss \$100,000. Insurance, building \$60,000 with following companies: North British and Mercantile, \$15,000; London and Lancashire, \$15,000; Caledonian, \$5,000; Norwich Union, \$5,000; Yorkshire, \$5,000; Royal Exchange, \$5,000; Connecticut, \$5,000; Phenix of London, \$2,500 Phenix of Hartford, \$2,500; contents, \$12,500. Origin unknown.

St. Boniface, Man.—Insurance on plant of Patterson Manufacturing Company, damaged by fire in September is as follows: Factories, \$20,000; Factories Und., \$9,500; Hudson Bay, \$2,500; Dominion, \$2,000; Mount Royal, \$3,000; London and Lancashire, \$1,000; Vermont Mutual, \$1,500; Economical, \$1,500; Western Union, \$1,500, and \$1,000 each in Norwich, Northern and Provincial.

Mr. B. G. Winans, vice-president of the Dominion Bond Company, has been made a member of the Tooke Brothers board of directors, succeeding Mr. Ernest P. Grant.

LIFE BUSINESS OF NEW ZEALAND GOVERNMENT INSURANCE DEPARTMENT

The report of the New Zealand Government Life Insurance Department for 1911 shows that the completed new business last year was 3,520 policies assuring £871,954, an advance in new business of £50,000 on the business of the previous year. The following tabulation shows the growth in new business and insurance in force during the past eight years:—

	Policies in Force.	Sums assured in Force (excluding Bonuses).
1904	£694,556	£10,259,562
1905	716,021	10,468,316
1906	729,105	10,667,591
1907	752,065	10,855,153
1908	780,597	10,955,749
1909	795,339	11,151,094
1910	820,179	11,360,796
1911	871,954	11,514,657

The total income in 1911 was £575,849 (an increase of £14,699 over the previous year) and was made up as follows: New premiums (including single premiums), £26,803; renewal premiums, £316,174; purchase money for annuities, £17,339; interest, £215,530; fees, £3. The average rate of interest earned on the mean funds was £4 13s. per cent.

The death claims were 399 for £126,813, and the matured endowments were 432 for £106,762. The expenses of management were £40,247 2s. 11d., and the commissions amounted to £19,923 9s. 5d., while taxation took £14,042 15s. 9d. The surrenders totalled £62,438 14s. 10d. The total funds increased from £4,554,729 17s. 2d. to £4,699,969 11s. 9d. The valuation basis has been brought to Hm. 3¼ per cent.

COMMISSIONER ADVISES FIRE INSURANCE COMPANIES

Mr. Lazor Mazer, of 422 Fabre Street, recently appeared before the fire commissioner's court, Montreal, to give his testimony concerning a fire that broke out in his house on September 20th. From the testimony he and others gave, it appeared that they were celebrating the Jewish New Year, and that they had holy candles burning on the table. These they left in that way when they went out in the latter part of the afternoon. It was surmised that the candles burned badly and fell. Commissioner Latulippe told the man that he considered it gross negligence to leave candles burning on a table without their being in a proper utensil, and considered it his duty as Fire Commissioner to advise the fire insurance companies to refuse, in the interest of the community, the issue of any more policies in favor of this man.

ANNUAL REPORT OF THE MOLSONS BANK

Another indication of the enviable position attained by The Molsons Bank is seen in the fact that it held its 57th annual general meeting this week at Montreal and again presented a gratifying report. The net profits for the year ended September 30th, after providing for operating expenses and bad and doubtful debts, amount to \$684,779. After payment of 11 per cent. in quarterly dividends, writing off \$66,515 to bank premises, and subscription to Pension Fund, &c., \$100,000 has been transferred to the reserve fund, raising it to \$4,700,000. The balance, \$42,522, has been added to profit and loss account, making it \$161,828 at credit.

During the year branches were opened at Belleville, Ont., and in Montreal at Bernard Avenue and at Ville St. Pierre (Blue Bonnets). Besides alterations and extensions in the main building, now completed, the directors found it necessary and advisable to provide premises at various branches, namely Calgary, Drummondville, London and Vancouver, involving heavy expenditure. To meet this, \$400,000 was added to bank premises account, making it \$1,100,000. The market value of the properties much exceeds this.

The president, Mr. William Molson Macpherson, dealt briefly with the development of the country during the past year. He emphasized the necessity of Western farmers entering into mixed farming. The continued cropping of wheat, he said, though it pays best for a time, will ultimately lessen the productiveness of the land, and it does seem absurd to see vegetables, butter and cheese, sent from the East to Western people, who are so well able to produce them. Besides, it would tend to afford employment all the year round, to an agricultural population, and so lessen the necessity of the migration of laborers from the East, during the wheat harvest months. The establishing of manufactures at places having favorable conditions, will also tend to lessen the evil.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Alberta

Suffield, No. 2757, \$4,000. A. E. Ellis, Suffield.
Clover Hill, No. 2584, \$1,000. J. Swick, Irvine.
Donalds, No. 2587, \$5,000. H. Wallace, Donalds.

ROBB

AS CONVENIENT AND
RELIABLE AS STEAM ITSELF

COMPOUND ENGINES

are built for continuous service without attention and
for all kinds of factories, mills and electric plants.

That's why they are enclosed, positively lubricated,
and have positive valve gear.

That's why they are single-cylinder or compound,
horizontal or vertical, condensing or non-condensing.

You surely can find in our complete line one that will
be convenient—it will be reliable because it's a Robb.

LEGAL NOTICE

CANADIAN COUNTRYMAN PUBLISHING COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of September, 1912, incorporating James Steller Lovell, accountant; Robert Gowan, Joseph Ellis and John Joseph Dashwood, solicitors' clerks; William Bain, bookkeeper; Henry Alfred Tilcock, Kathleen Patricia Warren, Maud Berry and Juno Beatrice Shier, stenographers; Beatrice Estelle Brent, clerk; and John Francis Lash, barrister-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on business as proprietors, editors and publishers, and to print, publish and sell magazines, books, journals, newspapers, periodicals, pamphlets, advertisements, maps and other publications, whether literary or otherwise, and to act as agents for the printing, publishing and sale of the same to others; (b) To carry on all or any of the business of printers, map makers, lithographers, type-founders, stereotypers, electrotypers, photographic printers, photolithographers, chromo-lithographers, engravers, die sinkers, bookbinders, paper box manufacturers, designers, draughtsmen, paper and ink manufacturers, booksellers, publishers, advertising agents, engineers and dealers in or manufacturers of any other articles or things of a character similar or analogous to the foregoing or any of them or connected therewith; (c) To acquire by purchase or otherwise and dispose of the copyright of any book, article, story, engraving or other publication which may be copyrighted; (d) To prepare or acquire by purchase or otherwise and dispose of any literary, scientific or artistic works, translations or compositions and syndicate articles for simultaneous publication or otherwise, and special or syndicate manuscript or telegraphic correspondence; (e) To act as special agents for syndicates, publishers, printers, and to supply general news articles by telegraph or otherwise to newspapers; (f) To manufacture, buy, sell or otherwise dispose of ready prints, patent plates, bases, type printing machinery or any other machinery for use in printing establishments; (g) To establish competitions in respect of contributions or information suitable for insertion in any publication of the company or otherwise, or for any other purpose of the company, and to offer and grant prizes, rewards and premiums of such character and on such terms as may seem expedient; (h) To acquire by purchase, lease or otherwise, and to own and hold lands or interests therein which may be necessary or convenient for the purposes of the company, together with any buildings or structures that may be on such lands or any of them; and to sell, lease or dispose of the same in whole or in part in such manner as the company may deem fit; (i) To purchase and otherwise acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (j) To purchase or otherwise acquire and undertake all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person or company carrying on in whole or in part business similar to the business which this company is authorized to carry on or possessed of property suitable for the purposes thereof; (k) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in, or about to carry on or engage in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly

to benefit this company; (l) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise any corporation in the capital stock of which the company holds shares, or of any corporation or person or persons with which it may have business relations, and to act as employee, agent or manager of any such corporation, person or persons, and to guarantee the performance of contracts and obligations by any such corporation, or by any person or persons with whom the company may have business relations; (m) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Countryman Publishing Company, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 13th day of September, 1912.

THOMAS MULVEY,
Under-Secretary of State.

11-2.

Dated at Toronto this 12th day of October, 1912.

BLAKE, LASH, ANGLIN & CASSELS,

CANADIAN COUNTRYMAN PUBLISHING COMPANY, LIMITED.

EDMONTON'S MUNICIPAL INSURANCE

"I have been going very fully into the matter of Edmonton's insurance, and am of the opinion that it is in need of revision, and would request that the whole insurable risk be brought on two schedules, one and three years respectively," suggests City Clerk Cox in a letter to Edmonton's commissioners. "This would be advantageous, inasmuch as the schedule would be uniform, and not, as now, variable with each company; the amount taken by any one company being a percentage of one common unit, the adjustment of a loss would be simplified and a prompt settlement facilitated. The companies would welcome this, as it would mean an equal distribution of risk.

"The present insurance is inadequate to the value of the properties, and as the older values are based on a cost; at which they could not now be replaced, the city architect should make a revaluation of such buildings as may be necessary in this connection. In order that the whole insurance plan may be reorganized on a sound basis, the appointment of a broker who would secure the services of an expert to bring in a complete schedule revised to date, should be made. In connection with this reorganization it would be desirable to consider the advisability of the city taking a portion of the insurance, which, in fact, it is supposed to do under the 80 per cent. or 90 per cent. co-insurance clauses, and a scheme for this purpose will be submitted later."

DEBENTURES FOR SALE

DISTRICT OF NORTH VANCOUVER.

Further particulars may be obtained from,

E. ROBERTS,
Secretary-Treasurer.

TOWN OF MELVILLE, SASK.

TENDERS WANTED FOR DEBENTURES

Sealed tenders, marked "Tenders for Debentures," will be received up to six p.m., November 11th, 1912, for the purchase of all or any of the following issues. Tender price to include accrued interest, cost of printing debentures and bank charges:—

\$55,000, Town Hall Issue.—These are 40 years, payable at end of term, with interest payable yearly at 5 per cent., and are in issues of \$1,000.

\$8,000, Mill Loan Issue.—This issue bears interest at the rate of 5 per cent., and is repayable in six equal annual instalments of principal and interest.

Curing certificates of both the above issues have been procured from the Government of Saskatchewan guaranteeing the legality, and the debentures are available for delivery on demand.

\$43,300, Debentures.—These bear interest at the rate of 5 per cent., and are repayable in thirty equal annual instalments of principal and interest.

Payments in all cases at The Merchants Bank, Melville, Sask.; Toronto, Ont., or Montreal, Que.

The highest or any tender not necessarily accepted.

Further particulars may be obtained from

FRED. H. CLARKSON,
Secretary-treasurer,
Melville, Sask.

October 1st, 1912.

The following information may be of interest to those wishing to tender:—

The total assessment for the year 1912 is \$3,180,000.00, exclusive of exemptions to the amount of \$85,000.00. Five years ago there was no population; to-day there is a population of about 3,000, which is increasing to such an extent that it is impossible to supply the demand for housing accommodation.

Melville is situated in the centre of a magnificent farming district, and in addition has the advantage of being a divisional point of the Grand Trunk Pacific Railway, whose repair shops and other works employ a large number of men.

The total debenture debt, inclusive of the present issue and local improvement debentures, amounts to \$259,628.01.

Less sinking fund	\$ 4,045 40
Waterworks	63,300 00
Electric light	22,000 00
Local improvement debentures	58,250 82
Net debenture debt	\$147,596 22
Assets, December 31st, 1911	112,031 70
Current expenditure, 1911	\$181,480 72
Current revenue, 1911	37,325 04
	40,849 81

The rate of taxation for the current year is: For general purposes, 10 mills; sinking fund, 1 mill; debenture rate, 3 mills, and school, 4 mills, a total of 18 mills.

Information recently to hand makes the announcement that Melville has been created a judicial centre of the Province of Saskatchewan.

DEBENTURES FOR SALE

TOWN OF YORKTON, SASK.

Debentures for Sale.

Sealed tenders addressed to the undersigned will be received up to 5 o'clock p.m., November the 12th, 1912, for the purchase of the following debentures of the Town of Yorkton, Sask.:

Local Improvement, Sewer—

The above debentures are all repayable in equal consecutive annual instalments of principal and interest at the Bank of British North America in the Town of Yorkton. Tenders to be marked "Tenders for Debentures." The highest or any tender not necessarily accepted.

For further particulars apply to

T. F. ACHESON,
Secretary-treasurer,
Town of Yorkton.

Dated at Yorkton, Sask., this 19th day of October, 1912.

The Canadian Western Lumber Company, one of the Mackenzie-Mann interests, is making additions to its plant. It is about to erect a cedar mill adjoining its present works on the Fraser River at a cost of about \$350,000. At Comox, a mill is well on toward completion, in which will be cut the smaller logs from its limits in that vicinity. These logs often get waterlogged and sink while on the long tow to the Fraser River.

The two insurance brokerage firms of Messrs. H. B. Sedgwick and Company and Messrs. Frank L. H. Collins and Sons, of London, are completing details of a combination of their respective interests. Messrs. H. B. Sedgwick and Company are among the two or three largest Lloyds brokerage houses in London, and Messrs. Frank L. H. Collins and Sons have been recognized as one of the leading firms of fire insurance brokers in Great Britain. The combination, it is said, will make the largest insurance brokerage house in the United Kingdom.

The lumber outlook is bright, the demand from the prairie centres showing no signs of abating, recently stated Mr. W. A. Anstie, secretary of the British Columbia Mountain Mills Manufacturers' Association. Farmers are realizing on their crops and have ample means for making purchases. Stocks held in the Kootenays are lower than during the same period last year. This means that a large number of men will be employed in the woods this winter. Owing to the improvement of conditions in the United States the export of American lumber to the Canadian prairie provinces is falling off to a considerable extent.

The back copies of The Monetary Times asked for in last week's paper have all been sent in. Readers will kindly note that no more of them are required.

PERSONAL NOTES

Major G. W. Stephens, chairman of the Montreal harbor commission, has resigned.

Mr. J. A. Fyshe, a member of the banking firm of Messrs. Fyshe and Horton, of Birmingham, England, has been making a tour of the Dominion.

Colonel James Mason, president of the Home Bank of Canada, recently visited Vancouver after inspecting the bank's branches in the prairie provinces.

Mr. C. J. Leyland, of Haggerston Castle, Beal, England, was on the Pacific Coast last week on a business trip. He is a director of the Parsons Marine Steam Turbine Company Limited.

Mr. W. N. Warburton, of Hamilton, has been appointed as general manager of the London and Lake Erie Transportation Company in the place of Mr. S. W. Mower, who has resigned.

Mr. W. Walker, who has acted as inspector of the Hudson Bay Insurance Company for Ontario since they entered the field, has now been appointed branch manager, with offices in the Lumsden building, Toronto, in succession to Mr. Fleming.

Mr. J. W. Beatty, A.R.C.A., president of the Arts and Letters Club, one of the leading Canadian artists, who has fulfilled several commissions for prominent financiers, has moved his studio to the Imperial Chambers, Adelaide Street East, Toronto.

Mr. Shirley Ogilvie, who has been in London in connection with the organization of the Abitibi Pulp & Paper Company, sailed for home on Thursday. Private advices state that considerable English capital will be placed in the new company, which owns large areas in Northern Ontario.

EXCHANGE RATES

Mr. John Seath, jr., exchange broker, Toronto, quotes rates as follows:—

	Between Banks.		
	Buyers.	Sellers.	Counter.

The annual meeting of the Campbell Flour Mills Company, Limited, took place on Monday. After paying quarterly dividend of seven per cent. on the preferred, the company carried forward the substantial sum of \$64,000. The company are enlarging their mill at West Toronto to take care of the increasing demand for their products.

Emigration from the United States to Canada is not a harvest festival, but an admonition to our Government at Washington that the cost of living in the United States is touching a point of administrative danger.—Wall Street Journal.

DIVIDENDS AND NOTICES

THE CONSUMERS' GAS COMPANY OF TORONTO

The annual general meeting of the Stockholders of the Consumers' Gas Company of Toronto, to receive the report of the directors, and for the election of directors for the ensuing year, will be held in the Company's Board Room, No. 17 Toronto Street, on Tuesday, the 29th of October, 1912, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend has been declared of three and one-half per cent. (3½%), (being at the rate of 7% per annum) on the preference shares of the capital stock of THE MEXICAN LIGHT AND POWER COMPANY, LIMITED, for the six months ending October 31st, 1912, payable on the 1st day of November, 1912, to shareholders of record at the close of business on the 12th day of October, 1912;

THAT the transfer books of the Company for the preference shares will be closed from the 14th day of October, to the 31st day of October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, London, England, Mexico City, Mexico, and its branches.

By Order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 30th September, 1912.

CARRIAGE FACTORIES LIMITED.

Preferred Stockholders' Dividend No. 9.

Notice is hereby given that a dividend of 1¼ per cent. for the quarter ended 15th October, 1912, being at the rate of 7 per cent. per annum, on the paid-up Preferred Stock of this Company, has been declared, and that the same will be paid on the 31st day of October to the Preferred Shareholders of record on the said 15th day of October, 1912.

By order of the Directors.

W. F. HENEY,
Secretary.

INSURANCE DEPARTMENT,

Ottawa, 2nd October, 1912.

Notice is hereby given that a license, No. 328, has this day been issued to the National Union Fire Insurance Company of Pittsburg, Pa., for the transaction of the business of Tornado Insurance in addition to the business for Fire Insurance for which it is already licensed. The chief agency of the company is established at the City of Toronto, and Henry J. Richmond is the Chief Agent.

W. FITZGERALD,
Superintendent of Insurance.

14-4

SMART BAG COMPANY IN A MERGER

Industrial amalgamations have been comparatively few this year, but the proposed combination of the Smart Bag, Limited, of Montreal, and Woods, Limited, of Hull, Quebec, adds one or more to about a dozen consummated this year. The new organization, Smart Woods, Limited, will purchase the two companies concerned which have between them factories and agencies at Montreal, Hull, Toronto, Winnipeg, Calgary and Vancouver. The capital of the new company will be as follows:—

Cumulative preferred stock, 7 per cent. ..	\$2,500,000
Common stock	2,500,000

There will be no bond issue. On preferred \$1,000,000 will be paid-up and on common, \$1,500,000. The authorized capital of the Smart Bag, Limited, was \$2,500,000, of which \$1,050,000 had been paid, \$600,000 of it being preferred. The object of the amalgamation is to reduce operating and selling costs.

MEXICAN TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of one and three-quarters per cent. (1¾%), (being at the rate of 7% per annum), has been declared on the capital stock of the MEXICO TRAMWAYS COMPANY for the quarter ending September 30th, 1912, payable on the 1st day of November, 1912, to shareholders of record at the close of business on the 12th day of October, 1912;

THAT the transfer books of the Company be closed from the 14th day of October to the 31st day of October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, Mexico City, Mexico, London, England, and its branches.

The holders of bearer share warrants on detaching from their share warrants coupon No. 14 and lodging such coupon or coupons at The Canadian Bank of Commerce in Toronto, Montreal, New York City, or London, England, on and after the 1st day of November, 1912, will receive in exchange for each coupon the sum of \$1.75 representing the amount of the dividend.

By Order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 30th September, 1912.

THE ROYAL BANK OF CANADA

Dividend No. 101.

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of December next to shareholders of record of 15th November.

By order of the Board.

E. L. PEASE,
General Manager.
Montreal, P.Q., October 11th, 1912.

MURRAY-KAY, LIMITED.

Notice is hereby given that the regular quarterly dividend of one and three-quarters per cent. (being at the rate of seven per cent. per annum), has this day been declared on the preferred shares of the Company, for the quarter ending October 31st, 1912; said dividend to be paid on the 1st day of November next, to the shareholders of record, at the close of business on the 21st October, and that the transfer books of the Company will be closed from the 22nd to the 31st day of October, 1912, both days inclusive.

By order of the Board.

J. E. FEATHERSTONHAUGH,
Secretary.
Toronto, October 19th, 1912.

BOND SELLING

"Certain strong Canadian (bond) houses command such respect in their country that they have been able to direct the legislation of the western provinces to the end that the western loans may be more acceptable to the investors in the eastern provinces and in England," is the statement of Mr. Lawrence Chamberlin, of Messrs. Kountze Brothers, bankers New York, in his recent interesting and practical volume "The Work of the Bond House," which is stated to be the first book ever published describing the bond business from the inside. The book does not belie its caption in any particular, but its comprehensive chapters deal satisfactorily with the functions of the bond house, the buying, selling of bonds, the advisory function, advertising, the investor's viewpoint, etc. This book is clearly written, and authoritative, and should be of interest to banker, broker and bond buyer alike.

"The Work of the Bond House," price \$1.35, by Lawrence Chamberlin; published by Moody's Magazine Book Department, New York.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

MUST PAY HIGHER RATES

In London—Mr. H. V. Meredith Has Gratifying Reports—Port Arthur's Bond Sale

The recent pronounced feeling abroad that Canada is making history too rapidly, borrowing too largely and that an early check would occur to its prosperity, is fading. Such is the opinion of Mr. H. V. Meredith, general manager of the Bank of Montreal, who has just returned from a trip to Europe. "Every one with whom I discussed Canadian affairs seemed to appreciate the fact that this country will in all probability, owing to her great legitimate development, be a frequent borrower in the world's money markets and that such borrowings will meet with a sympathetic reception," he says. "The fact, must not be overlooked that there are other countries besides Canada seeking loans owing also to their great resources and marked development and to the world-wide commercial activity, consequently such being the case, until the swing of the pendulum in the other direction, which appears a remote possibility at present, higher rates will have to be paid if business is to be made attractive."

Must Pay Higher Rates.

Mr. Meredith thought that all classes of Canadian securities had, owing to keen competition for these particular loans, been sold on favorable terms. British lenders, require at present a better return on their investments and a better yield can be secured elsewhere than in the Dominion should we decline to pay these higher rates. In this connection the developments in Russia are attracting considerable English money, these particular securities being in about the same class as our own are offered at tempting rates.

As briefly noted last week, Port Arthur has disposed of securities in London. The amount was \$704,614, in the form of treasury notes and the rate paid for the loan was 6 per cent. This is another reminder of market conditions overseas.

Edmonton's Financing.

Edmonton has lost about \$10,000 on its sales of debentures this year, without counting interest charges. One hundred thousand dollars is the difference between par and the price for which the city debentures were sold, and is accounted for by market conditions. In each of the three preceding years Edmonton bonds sold at a premium.

The following issues have been listed on the London Stock Exchange. Dominion Steel, £70,000 sixes, Steel Company of Canada, \$6,496,300 sevens, British Columbia Fruit Lands, £150,000 sixes.

The statement of Hamilton's city treasurer shows that the board of works has used \$100,187 during nine months

of its appropriation of \$145,200. During the same nine months a year ago the amount expended by the works department was \$85,651.

The city may soon have to go to the legislature for power to issue more debentures. Debentures provided for \$128,000 for waterworks construction; already \$181,025 have been spent. In the waterworks improvements, the debentures provide \$650,000, and of this amount only \$185,545 has been used to date.

The assessment of Ottawa on taxable property made this year for 1913, is \$96,215,657, an increase of \$20,046,438, and the population is 95,570, an increase of 5,050. In the assessment there is not included the exempted properties which last year totalled \$26,363,046. Allowing ten per cent. increase on exempted properties, the total assessment of Ottawa would be \$125,215,657. The increase on taxable property is an advance of over 26 per cent. on last year's.

No bids were received for the \$110,000 5 per cent. 25 and 30-year debentures of Estevan, Sask.

DEBENTURES AWARDED

Prairie Dale R.M., Sask.—\$7,000, to Messrs. Nay and James, Regina.

Blairville S.D., Sask.—\$1,800, to Messrs. Nay and James, Regina.

Berlin, Ont.—\$21,500 5 per cent., 20 and 30 instalments, to Dominion Securities Corporation, Toronto.

The capital stock of the Collingwood Packing Company, Limited, has been decreased from \$200,000 to \$150,000.

The People's Trustee and Security Company will apply for a Dominion charter. Messrs. Code and Buritt, Ottawa, are solicitors for the applicants.

The Dominion government has awarded the contract to build the breakwater at Victoria, B.C., to the firm of Sir John Jackson, Limited. The cost will be \$1,800,000.

A branch of the Canadian Bank of Commerce has been opened at Niagara Falls, Ontario, under the temporary management of Mr. W. W. Ore.

The Western Union Fire Insurance Company, which already hold a British Columbia charter, will apply at the next session of parliament for a Dominion charter. The company's head office will be at Vancouver.

Application will be made at the next session of parliament by the Western Canada Mortgage Corporation for a Dominion charter. The company will carry on a mortgage and loan business. Messrs. Ellis and Brown, Vancouver, are solicitors for the applicants.

POWER OF THE LONG SAULT RAPIDS

Readers of *The Monetary Times* will remember that two years ago discussion arose over the proposed power development at the Long Sault Rapids on the St. Lawrence River. The company who are promoting this development have so far failed to secure a charter on account of the vigorous protests of different Canadian bodies, among them the Commission of Conservation. They have also failed to secure sanction of their project by the Federal authorities of the United States. The St. Lawrence Power Company, Limited, owns the power development at the foot of Sheek Island, near Mill Roches, Ontario. It takes water from the Cornwall Canal, on the north side of Sheek Island, and furnished electric power and light for the Cornwall Canal. The fall in the St. Lawrence River adjacent to the plant of the St. Lawrence Power Company, Limited, would furnish a substantial amount of power. Investigation has shown that without the co-operation of the riparian owners on the opposite American shore, the company can develop this power only to a very slight extent.

The Long Sault Development Company, a New York State corporation, is empowered by its charter to construct dams, power-houses, locks, and other works in the St. Lawrence River, so far as these works will be in American territory. By co-operation and developing the work of the Long Sault rapids, these two companies expect to realize the full potentiality of the river.

Although the project has received two years of strong opposition, still the company continues its campaign to acquire a charter from the Canadian and the United States governments. It is rather expected that

the United States charter will be granted this coming session.

The company claims, among other things, that the construction of the works will afford abundant reliable and cheap power to all districts within the radius of transmission of electricity from the power-house; that the furnishing of cheap power will create many new industries, and will be of great advantage to those already established; that the construction of the proposed dams and power-houses will require the expenditure of many millions of dollars, which will be distributed among the transportation companies, manufacturers, tradesmen and workmen, and that the power from the entire development will be used almost exclusively for manufacturing purposes, which will mean increased revenue to the transportation companies, who will distribute these products by boat and rail. It is also stated that navigation will be very much improved; that the South Sault lock will duplicate the means now afforded by the Cornwall Canal for navigation past the Long Sault Rapids, and thus prevent delay due to failure or accident; that the construction of these works will enable boats passing the Long Sault to make a round trip in approximately four and a half hours less time than at present. It might be added that the charter would also allow them to develop a half million horse-power at a very low rate per horse-power.

The above claims of benefits accruing to the country as the result of this proposed development are very interesting, and on their face value, very fine. It must be remembered, however, that at the point where this development is suggested on the Canadian side there are very few industries at the time who would use electric power. How easy it would be for the company, after

obtaining their charters, to locate the power-houses on the United States side of the river. In fact, the location of the dams, canals and power-houses leads one to believe that practically all of the development will be on the United States side of the line; therefore, the expenditure of many millions of dollars on the development will not mean a great deal to Canadian manufacturers. Under present conditions the development of this vast amount of power would not find a ready market for many years in Canada. The outcome of the matter would be this: from power-houses erected on the American side of the line, and developing 500,000 horse-power, the largest available market must be secured. In all probability a great portion of this power would be transmitted to New York city, which is, roughly, 400 miles. This is quite within reason with the present status of electric power transmission.

So far as we can see at the present time there are many reasons why the proposal of this company should be viewed with suspicion from the Canadian standpoint. There are two many chances against an equal division of the results of the development. It is understood that the Commission of Conservation are preparing a report containing a large amount of data dealing with the whole proposition. No doubt no action will be taken by the Dominion government until the whole matter has been carefully investigated. Certainly no such charter should be granted until the government are absolutely sure that Canadian interests are adequately safeguarded.

HELP FOR THE IRON AND STEEL INDUSTRY

The request of the iron and steel men for a permanent policy of adequate protection in preference to a temporary renewal of bounties, is the first murmur before the budget speech, which the Minister of Finance will draft in due course. If the Senate last year had not, in their wisdom, decided to block the proposed legislation creating a tariff commission, that commission would probably have been appointed by now and instructed to gather the necessary data upon which the ministers, parliament and the people can decide what is an adequate protection for this large industry.

If one admits the principle of protection, it should be just to the producer, to the labor employed in the production and to the consumer. Undoubtedly, the iron and steel industry is one of the most, if not the most important in this country. It is a large employer of labor and numerous branch industries may spring from it.

According to the census of manufactures taken last year, for the calendar year 1910, 89 establishments were engaged in the making of iron and steel products. The capital employed was \$34,201,946, and the value of the products, \$34,613,710. Broadly speaking, therefore, for every dollar of capital employed a dollar's worth of goods were manufactured. A small army was engaged in the foundries and factories, 11,286 operatives being paid in wages \$7,147,253, an average of \$633 per annum per employee—from the small boy to the general manager.

Superficially, it would seem that the employment of \$34,000,000 worth of capital should produce more than a similar value in iron and steel products. That is an interesting point which could best be solved by an analysis of facts and figures submitted by those interested in the industry and gathered by a tariff commission, which, by the way, could have been appointed with advantage to all many years ago.

The bounties on iron and steel products have expired and the period for their renewal in our national life has passed. The case of the iron and steel industry can best be dealt with by proper tariff regulation. Such readjustment should not be made until a complete

analysis of the situation has also been made. *The Monetary Times* thinks that the basework of the analysis should be built by a tariff commission composed of representatives both of Eastern and Western Canada. The iron and steel industry of the Dominion has a strong claim for fair tariff treatment, and that claim should be discussed on its merits and minus politics.

BONUSING NEW INDUSTRIES

There is to be a convention of civic officials and industrial commissioners held in Regina during the second week of November. The most important question to be dealt with is that of bonusing industries, meaning thereby the granting of cash or land, exemption from taxation, guaranteeing of bonds, etc., as inducements to locate in any particular municipality. It is proposed to urge the provincial governments, if they have the power, to legislate against this, or, failing the legislatures, to apply to the Dominion. As things are in the West, with high-priced industrial commissioners seeking industries, promoters of industrial establishments are simply dickering one place against another and each against the others, to the detriment of all. Opinion on the question at issue is not a unit. Those places where by reason of the presence of natural gas, power costs very little, are able to offer an incoming manufacturer power for his plant at a nominal price or free.

For the time being, they have the advantage and are loath to part with it. Therefore, they do not look with favor on prohibitive legislation, and, as natural gas is being tapped quite frequently in Alberta, it appears unlikely that that province will support a resolution making any very serious demands on the governments. On the other hand, the general principle of bonusing industries is harmful.

THE PRICE OF HUSTLE

This week a railroad collision in Ontario accounted for several deaths and a large number of injuries. A prominent citizen in an automobile on his way to the station to meet the hospital train, was sufficiently hurt in a street car collision to prevent him from proceeding on his errand of mercy. These two incidents are passing from memory with the usual few days' wonder, indignation and sympathy. Within a week or so the stories will be buried in official records and newspaper files. Leaving them out of consideration, for the moment, they are still a grim reminder of the toll this country is paying for its craze for speed, its disrespect for human life. Every day brings its tragedies which might have been averted were the desire for haste reduced and the respect for the individual life increased. Is the price we pay for our much-vaunted hustle worth the hustle and the dregs we get? Here is the account in part for the three latest years:—

Three years, 1909-1911.	Killed.	Injured.
Fires	792	
Industrial	2,729	5,873
Steam railroad	1,467	4,751
Electric railroad	265	7,347
	5,253	17,971

No official record has been kept of persons injured in fires, but the number is large. The above figures, compiled from official sources, show that fires, industrial and railroad accidents have killed five persons and injured sixteen persons every day during the past three years. That is the total, in cold facts, of the quickly forgotten daily incidents. In addition to lives lost in fires, the annual fire waste in Canada amounts to an average of \$20,000,000. These losses of life and property are shown, by careful analyses, to be caused

largely by carelessness, caused in turn by an insane desire for speed. Adequate fire resistance is sacrificed for the sake of speculative building, which has become almost synonymous with the erection of poor quality in the quickest time for the most money. Our building by-laws are generally lax. Loose matches are an everyday danger. On every hand, one sees carelessness with fire risks.

Sometime ago, the subject of industrial accidents was discussed in parliament. Mr. H. H. Miller submitted a resolution, stating it to be the duty of the government to make a thorough investigation as to the facts and conditions as a result of which some means might be devised for the better protection of employees and of preventing so great a loss of life and so great and frequent accidental injury. The Minister of Labor at that time made the following statement: "We can say with certainty at this moment that a year hence another 2,000 lives will be swept off the list of workers in Canada, and in another two years there will be 20,000, whose industrial efficiency will be permanently impaired as a consequence of the callings in which they are engaged." The debate was formally adjourned and further action has not been taken.

Our railroad accidents constitute the worst feature of the price we pay for hustle. Since 1888 to the end of 1911 7,728 persons have been killed on Canadian railroads and 27,574 persons injured, an annual average of 322 killed and 1,149 injured. Here, again, we can find the same basic cause, viz., the delusive craze for speed. Delayed trains are forced to make up time with disastrous results. Hazardous risks are taken by those responsible for operation with the lives of hundreds at stake. Taking chances is the curse of American railroading. Carelessness, which usually is the direct result of speed ambition, in some shape or form, accounts for a large number of accidents. Last year, for instance, 36 persons were killed and 108 injured by trains at high-way crossings. An improvement was seen in the number of protective crossings, which increased by 166 over the preceding year. There is probably in that fact a direct connection with the reduced number of accidents at highway intersections during 1911. These crossings are usually protected by gates, overhead bridges, subways, bells and watchmen. The last two have been proved by experience to be of little value. Gates, which usually consist of cross bars under which pedestrians can climb and certain vehicles even can pass, are practically useless in that form. The present style should be abolished and one substituted which, when shut, should be non-negotiable by any kind of traffic. Overhead bridges and subways are by far the best form of protection.

A tendency was shown during the recent parliamentary discussion respecting industrial accidents, for the Minister of Labor to place the responsibility upon the industries concerned. That is a right view only after parliament has enacted stringent laws, and, more important still, has seen that they are enforced. The standard of public safety to which we are supposed to adhere is too low. It must be raised by our legislators and we must act up to it. After that, workmen's compensation is largely a matter for the railroad or other industry involved in lengthening the list of killed and injured.

These figures do not make good advertising for Canada, but idle boasting of our progress without self-examination of our weaknesses ultimately will only work to our own disadvantage. The public are demanding speed. They are being given it. The price paid is shattered nerves, human life and limb. In the meantime, legislators remain idle in face of duty. The chase for the almighty dollar has led largely to the speed craze. The wild hunt should be curbed until at least it has ceased to kill and wound.

Good roads will help bridge the wide price gap between producer and consumer.

SMALL CHANGE

The only touch of femininity in finance is the tight lacing of the money market.

* * * *

Winnipeg had snow this week, the advance guard of the finest health-giving winter extant.

* * * *

Shoe leather in Canada has advanced again, and to about the point where the consumer may put his foot down.

* * * *

The United Shoe Machinery Company of Canada may consider itself severely slapped with a legislative feather.

* * * *

In discussing La Rose finances, a contemporary refers to "Cask in bank," an asset which arouse a multitude of conjectures.

* * * *

Now that Toronto's city council has stopped Sunday toboggan sliding, they might turn attention to weekday stock exchange ditto.

* * * *

The Consumers' Gas Company, Toronto, is one of those comparatively few private corporations which has managed to please the consumer.

* * * *

Politics having jabbed Major Stephens in the Montreal Harbor Commission, Major Stephens may now thrust politics in the Hochelaga election.

* * * *

A small failure this week in London hurt the market, but not as much as the failure of the market to absorb certain loans has hurt Canada.

* * * *

A patriotic Greek of Moose Jaw has gone to the war with \$500 of a friend's money and debts behind him—a case of leaving by the back to get to the front.

* * * *

Burglars got five hundred dollars from a big life insurance company of New York. Did faith in their fellow-underwriters give them a burglary policy?

* * * *

The war dispatch telling of the fall of Kirk Kilisseh probably led Mr. Dooley to conclude hastily that it was the Canadian merger bond he bought with a bonus of common.

* * * *

Seventy-five steamship sailings to British and foreign ports were made from Canada in one month, a fact which makes the maritime chest of John Canuck swell with pride.

* * * *

An Australian letter states "Glen" Campbell, of Winnipeg, has inherited \$8,000,000 from a sheep ranching uncle. Mr. Campbell is skeptical, evidently suspecting watered stock as well as sheep.

* * * *

Charles Meyer, of New York, says he will travel around the world without smiling. If he wins, *The Monetary Times* may hire him to analyze certain oil, mining, land and wireless prospectuses. That should break the ice.

* * * *

With Magistrate Denison as chairman and Mayor Hocken as the new member of Toronto's police commission, there is an excellent chance for the swinging of the axe when the axe is due instead of as heretofore, excessive politeness to certain erring police officers and men.

* * * *

The little band of villagers led by Alderman McBride have again blocked Toronto's Humber Boulevard scheme, which is almost unanimously favored by the local press and citizens. Both forces are likely to register their indignation at this petty obstruction at the forthcoming municipal elections.

PRODUCTS AND THEIR TRANSPORTATION

British Columbia's Crop Reports and Mining Returns Show Need of Railway Facilities

(Staff correspondence.)

Vancouver, October 28th.

The Vancouver business men's trip to the Okanagan and other interior districts, which have been boomed before the investor, is again attracting attention to its fruit raising possibilities and also transportation difficulties. There is no doubt that the Okanagan is one of the best districts on the Pacific coast, north or south of the line, in which to grow fine fruit. Many people have gone in there and the whole district is fairly well settled, so much so that the Canadian Northern Railway Company sees an advantage in acquiring a power company's charter and building lines of electric railway. The trouble is that the production is beyond the capacity of the transportation facilities. This year a large amount of fruit and tomatoes were dumped into the lake since it could not be got to market. This is lamentable, for on the coast fruit is never cheap at any time, despite the large quantities that are brought in from the United States.

Big Fruit Crops.

Crops of apples and peaches this year were larger than for some time; apples retail from \$1.25 to \$1.50 per box of forty pounds. The Okanagan wants better transportation facilities and more canneries. The former will partly be provided, when the Canadian Northern Railway and the Kettle Valley lines are completed, but that will be one or two seasons more, and it will be after that when the proposed electric lines will be in operation. Only the finest apples are packed, and the faintest spot or blemish results in discard. This fruit is not spoiled or damaged; but in competition with other fruit would be put to one side. With more canneries, this surplus product could be taken care of, or if freight rates were reasonable it could be marketed at the coast, where apples retail by the dozen or at three pounds for twenty-five cents. Vancouver business men, now in the interior, will see things at first hand. They have been able to view the great display at Vernon's first apple show and the possibilities of the district. They may be able to make some suggestions in order that growers in the district may realize better on their production.

Nearly One Million Dollars.

That this is a good year for mining in British Columbia, where large companies are developing copper properties, is further shown by the fact that five mining and smelting companies in the southeastern part of the province have paid dividends aggregating \$932,000 for the year to date. The Consolidated Mining and Smelting Company, with works at Trail, a Canadian Pacific Railway concern, has paid \$220,000; British Columbia Copper Company, Greenwood, \$177,000; Standard mine at Silverton, controlled by Spokane capital, \$325,000 since April last; Nickel Plate, Hedley, also held by American capital, \$180,000; and Le Roi No. 2, Rossland, \$30,000. Returns like these show the activity prevailing in the metalliferous districts.

A purchase of interest to mining men who have holdings in the Similkameen district is that of the Lost Horse property by the Laird Brothers, of Birkenhead, England, the well-known shipbuilders. This property adjoins the Voight claims, which were bonded several months ago by the British Columbia Copper Company. Many of the old-timers in the interior have been holding on to excellent properties in the hope of future development, and the steady acquisition of promising locations by people with capital to exploit them is very encouraging.

Expansion on Vancouver Island is indicated by the British Columbia Electric Railway Company's expansions. It has just completed its agreement with Victoria, and has 12,000 horse-power developed from the Jordan River water-power at a cost of \$1,500,000, but finds it necessary to develop an additional 12,000 horse-power at an additional cost of a million and half dollars. Consumption of power in Victoria has increased three hundred per cent. with the last year and continues increasing.

Financiers Investigate Investments.

Mr. W. Westerman, president of the Bank of Rotterdam, was one of the prominent visitors to Vancouver this week. He has come to Canada to inspect the character of the Netherlands Transatlantic Bank, a corporation organized to invest in Canadian mortgages, bonds of which institution his bank has underwritten. He will also look into the question of extending the field of operations. The mortgage investment of his bank amounts to \$2,500,000 in Canada, and he is quite satisfied with the security. He stated that there was an enormous amount of Dutch money available for invest-

ment in Canada, the possibilities of which country are yearly becoming better known to his countrymen.

Hon. R. H. Brand, C.M.G., of London, who was here along with Mr. F. Perry, former secretary to Lord Milner, explained that the slight drop in Canadian securities on the British market was merely indicative of fluctuation in a general way and did not mean depreciation in value. He declared that Canada was able to obtain money in Britain at lower rates than any other portion of the Empire.

CONSUMERS' GAS COMPANY'S REPORT

The gross receipts of the Consumers' Gas Company, Toronto, for the year ended October 1st, 1912, were as follows:—

Gas sales	\$2,058,140 63
Coke sales	253,709 97
Tar sales	32,415 12
Ammoniacal liquor	41,007 60
Consumers' Supplies and maintenance.	78,370 18
Office rents	724 96
	\$2,464,368 46

The net earnings were \$718,134 as contrasted with net earnings for 1911 of \$697,006.

Income from other sources brought the total to \$821,096.05. After paying dividends of \$438,309, the sum of \$382,786 has been transferred to plant and buildings renewal fund, the total amount at the credit of that account being \$978,759, against \$851,477 a year ago.

The output of gas for the year ended September 3rd has amounted to 3,119,748,000 cubic feet, an increase over the output of the previous year of 276,707,000 cubic feet. Gas rental for the year was \$2,058,140, compared with \$1,857,071 the previous year, an increase of \$201,069.

President Austin, in his report, states that this is the first complete year during which gas has been sold at the present reduced price, and the reduction of five cents per 1,000 cubic feet has amounted on the output of gas for the year to about \$151,000.

The following is the statement for the past, as compared with the preceding year:—

	Meters.	Gas Rental.
1912	82,022	\$2,058,140.63
1911	72,544	1,857,071.01
Showing an increase of	9,478	\$ 201,069.62

The current expenses total \$2,464,368 and the total liabilities are shown as \$8,756,749.

The company's assets are as follows:—

Works, plant and general outlay	\$8,070,327.48
Main pipes, specials and lead	61,376.88
Service pipes, fittings, etc	14,729.28
Consumers' supplies	57,646.12
Coal	118,396.09
Gas oil	6,880.61
Coke	19,589.85
Tar	5,961.12
Oxide of Iron	10,656.00
Cement	183.04
Fireclay, etc.	4,130.37
Cash	334.07
Debentures	216,233.28
Gas accounts receivable	116,559.13
Sundry accounts receivable	53,746.19
	\$8,756,749.51

At the annual meeting of the company on Tuesday, the president, Mr. A. W. Austin, presented the sixty-fourth annual report, together with the financial statements, as outlined above, which were adopted.

The following gentlemen were re-elected directors for the ensuing year:—Messrs. A. W. Austin, A. H. Campbell, Wellington Francis, K.C., F. LeM. Grasett, M.D., John Hoskin, K.C., LL.D., D.C.L., Herbert Langlois, and Thomas Long, Sir Edmund Osler, M.P., and Sir Wm. Mortimer Clark, K.C., LL.D. At a meeting of the board held subsequently, Mr. A. W. Austin and Mr. Wellington Francis, K.C., were re-elected president and vice-president respectively.

The Janes building on the northeast corner of King and Yonge Streets, Toronto, has been sold by the Dominion Bank to the firm of Messrs. J. and M. L. Wood, financial agents, and members of the Montreal Stock Exchange, with offices both in Montreal and Toronto. The price paid for the property was in the neighborhood of \$1,200,000.

NEW WESTMINSTER'S HARBOR

Facts and Figures Regarding its Usefulness and Proposed Developments

Seeing that a bill will shortly come before parliament to make New Westminster a national port; that most extensive plans for the development of this port have been drawn up and the first work is being carried out; and that the development of the Pacific Coast ports is of importance to the whole of Canada, the following authoritative facts concerning New Westminster and the Fraser River, which can be relied on, are of much interest:

New Westminster is situated on the Fraser River, 18 miles from the sea.

The harbor extends from the head of Douglas Island (about 28 miles from Sandheads Lightship) down the north arm to salt water, south to the international boundary and up the south arm to Douglas Island. The length of the main deep-water channel (or south arm) is 28 miles, and 14 miles is the length of north arm for log towing and small vessels. The depth is 14 feet at low-water, and 26 feet O.S. high-water at Sandheads. When the Dominion government's work at the Sandheads is finished these depths will be 25 feet at low water and 37 feet at high-water. Along 1.7 miles of municipal waterfront there is an average depth of 40 feet.

There is 12 feet of tide at the Sandheads and 5 feet at New Westminster. Marine growth dies and falls off in the river water in ten days or so. The water is good for boilers.

Harbor Dues and Various Fees.

Pilotage fees are \$1.00 per foot of vessels' draught and 1 cent per registered ton each way, half charges if no pilot is employed.

Harbor dues are chargeable as follows on vessels of

50 tons and under	\$.50
over 50 tons and not over 100.....	1.00
" 100 " " 200.....	1.50
" 200 " " 300.....	2.00
" 300 " " 400.....	2.50
" 400 " " 500.....	3.00
" 500 " " 700.....	4.00
700	5.00

Dock dues are not charged; wharfage amounts to 50 cents a ton. The railway makes no charges on freight delivered from or to their own trains. One dollar a day berthage is charged where any charge at all is made.

The principal wharves are those of the Canadian Pacific Railway, 340 feet long; Canadian Pacific Navigation, 700 feet long; British Columbia Transport, 600 feet long; British Columbia Electric Railway; Great Northern Railway, and that of the Canadian Northern Railway at Port Mann, 1,000 feet long, and many other privately leased wharves. The railways, the Canadian Pacific Railway, Great Northern Railway and British Columbia Electric Railway, parallel the waterfront and run on to the wharves. The land and waterfront lend themselves to unlimited development along these lines.

Improvements are Being Made.

Towage is unnecessary except for sailing vessels, when charge is a matter of bargain. Large vessels coal at Vancouver Island points, as they do when calling at any British Columbia port. Small supplies of coal are to be had locally. Locks are unnecessary on the river.

There are good machine shops and boiler works in New Westminster, capable of carrying out any repairs. The Dominion Government dredge "Fruhling" is at work at Sandheads, King Edward, on north arm. The municipal dredge will soon be at work improving the city waterfront by filling Front Street and carrying the harbor line further out to an unbroken quay over a mile in length.

The Dominion government's contract for the first 6,900 feet of three-mile jetty will be completed by April 1st, 1913, and forms part of LeBaron scheme, which will give 25 feet at low-water from the Pitt River to the Gulf of Georgia.

Differences in the law of the provinces concerning commercial and insolvency matters formed the subject of a complaint to the Dominion Trade Commission in London, Eng., by Mr. J. G. Colmer, chairman of the Canadian section of the Chamber of Commerce, who suggested that one law should cover the whole Dominion. Another disadvantage to British trade was in the shipping charges. Certain goods from Southampton to Canada, costing £10 freightage, could be sent from Hamburg for £3.10 shillings.

LA BANQUE INTERNATIONALE

Paris Shareholders' Negotiations—Option to Montreal Interests—Changes May be Made

Monetary Times Office,

Montreal, October 30th.

The latest reasonably authentic report concerning the situation in connection with the trouble between the officials of the Banque Internationale and the dissenting Paris shareholders, indicates that the troubles may shortly be over. It would seem that after a deal of negotiating, the Paris shareholders have granted a Montreal group a ten-days' option on their shares at a price which is understood to be well up towards par. This inference is reached, apparently, from the statement that 80 per cent. of par had previously been offered by the Montreal group and that this had been refused by Paris. There is little doubt that for some weeks past negotiations have been going on and that the Montreal group has been gradually advancing its offer being desirous of wiping out the dissenting element. The latter, for their part, appeared almost as much interested in making the situation difficult for Sir Rodolphe Forget, as in effecting the sale of their stock. The group apparently has lost money in the various concerns in which stock has been sold them, and the opposition assumed somewhat the aspect of bitterness of a personal character. For a period it was claimed that they insisted on Sir Rodolphe resigning from the board, and would not be satisfied with any other arrangement.

Adopted Court Proceedings.

Meantime, they carried on their attack through the courts against both Sir Rodolphe, as president, and against Godfrey Bird, as general manager, of the bank, with no little inconvenience and worry to those officials. This perhaps resulted in the better terms offered by the Montreal group for buying out the Parisians.

The street is wondering what effect a settlement of the nature referred to would have upon the action which the Parisians have been carrying on through the courts here lately. Although the proceedings have been carried on behind closed doors, considerable is known concerning the charges made. It is stated that the settlement would mean that the proceedings would be dropped, so far as the Parisians are concerned. The question which is being asked is whether or not this would mean that nothing further would be done by the courts in the matter of the charges.

It was expected that Judge Leet would give his decision early this week. Later it was stated that additional evidence was being taken and that the decision would not be given till early next week.

Bank will be Strengthened.

Then came the announcement that the option had been given on the stock and that proceedings would cease, it being assumed that the Montreal group would not have taken the option unless prepared to carry it out and fulfil the undertaking. The interesting point now is, what would become of the judgment, in case the deal is carried out and the Montreal group buys the Paris stock?

It is assumed that the arrangement referred to between the Parisians and the Montrealers will mean that any negotiations which formerly went on between the Banque Internationale and any other banks will be terminated and that the Banque Internationale will be made stronger. There will be changes in the directorate, it is understood, but that these will be any part of the agreement, seems unlikely.

The order for annexation, made this week by the Ontario Railway Board, induced the North Toronto finance committee to leave unopened tenders for \$85,000 of sewerage debentures. Better offers are expected as a result of the order of the board.

Mr. D. H. Ross, Canadian trade agent in Australia, advises the Trade and Commerce department that, though a special effort was made to interest Canadian rolling mills in regard to the supply of 146,000 tons of steel rails and fish plates for the new Transcontinental Railway in the Commonwealth, no tender was received. The strong domestic demand precluded Canadians from submitting offers. Mr. W. A. Beddoe, Commissioner in New Zealand, reports, apropos of the Canada New Zealand service, that in winter the cargoes are all Canadian. In summer over 30 per cent. of the cargo carried is American, shipped by way of Montreal. As years go by, Mr. Beddoe believes New Zealand will call upon Canada for increasing supplies of lumber. From September to May next reservations have been made to forward 124,985 boxes of new butter to Canada.

COMBINE DECISIONS PUBLISHED

Minority Report in Case of United Shoe Machinery Company of Canada Does Not Agree With Conclusions Drawn From Facts

The complete report has been published of the inquiry in connection with the business of the United Shoe Machinery Company of Canada under the Combines Investigation Act. In 1893 the company was organized under the laws of the State of New Jersey under the name of the Good-year Machinery Company of Canada, and continued in this country the operations of the Goodyear Shoe Machinery Company, which was an American company. In 1899 the name was changed to the United Shoe Machinery Company of Canada, under which name the business has since been carried on. The capital of the company is \$225,000, divided into 9,000 shares of a par value of \$25 each; the share capital is all owned by the United Shoe Machinery Company, also of New Jersey, except such shares as are required to qualify directors, all of whom form part of the board of directors of the United Shoe Machinery Company. The officers of both companies are the same, and there is but one office for both companies, being at Boston, in the State of Massachusetts, where the books, registers, leases, patents, and other documents are kept. This company is subsidiary to the American company, and is absolutely under its control. The company has no Canadian charter, but does business under license from the provinces of Quebec and Ontario.

Help of Parent Company.

It is shown that the company can and does avail itself of the inventions and improvements which are made by the American company, and is enabled to make, in Canada, all expenditures necessary to the carrying on and development of its business.

In 1899 there were several sources from which the manufacturer of boots and shoes could obtain his machinery, amongst these being, in addition to the Goodyear Company, the McKay Metallic Fastening Association of Boston, the Champion Nailing Machine Company, the Simplex Company, the Shoe Wire Grip Company of Canada, the McKay-Bigelow Heeling Machine Association, the Consolidated Lasting Machine Company of Boston, the Davey Pegging Machine Company, the Eppler Company, being all American concerns, and Kieffer Brothers of Montreal. Since that time these American companies have either been absorbed by the United Shoe Machinery Company, in the United States, referred to in the evidence as the parent company, or in any event it appears that the United Shoe Machinery Company of Canada to-day controls the supply in Canada of all the machinery which was previously owned by these various companies.

Only One Manufacturer.

At the present time there appears to be only one other manufacturer of shoe machinery in Canada, namely, the Canadian General and Shoe Machinery Manufacturing Company, of Levis, Quebec, of which Mr. Ernest Caron, one of the applicants, is the general manager. Another company, known as the Duplessis Shoe Machinery Company, was organized in Canada and operated for a few years about 1900. This company subsequently removed its factory to the United States at Haverhill, Mass. It would also appear from the evidence that there are independent manufacturers of shoe machinery abroad, as catalogues were produced from various manufacturers of shoe machinery in England, Germany and elsewhere, indicating that they were manufacturing a fairly full line of shoe machinery, and that the Canadian General and Shoe Machinery Company is agent for some of them.

The position is to-day that the United Shoe Machinery Company of Canada has as its customers 138 of the boot and shoe manufacturers of Canada out of a total of 145. It may be noted that in addition to the manufacture of shoe machinery, this company deals in various supplies and materials, some of which are sold to others than manufacturers of boots and shoes.

Company is a Combine.

The majority report of the investigators deals in detail with the company's leasing system, and quotes extensively various clauses as they appear in the leases. It then reviews what is the effect of the situation established by the company upon competition in the manufacture and supply of shoe machinery, upon the position of the manufacturers of boots and shoes, and upon the consumers of boots and shoes. The conclusion of the report is as follows: "The United Shoe Machinery Company of Canada is a combine, and by the operation of the clauses of the leases, quoted in the foregoing, which restrict the use of the leased machines in the way therein set forth, competition in the manufacture, production, purchase, sale and supply of shoe machinery in Canada has been and is unduly restricted and prevented."

In view of the circumstances in the case it is recommended that the period of ten days as prescribed in the Combines Investigation Act for compliance with the law, should be extended to six months.

Objects to Conclusions.

Mr. W. J. White, who was the company's representative on the investigation board, differs with the conclusions drawn from the facts by the other members of the board. Neither can he concur with the statement of the majority that "with the conditions thus found to be in existence competition in the manufacture and supply of shoe machinery in Canada is practically impossible."

Of 138 manufacturers, he says, whose factories are equipped with the machinery of the company, a large number have started business since the company began its operations in Canada, and during that period all new factories at least had the choice of being equipped by the company or by other manufacturers, and to that extent competition exists to-day. There is also the further competition referred to in the majority report.

"Since the company obtained control of almost the entire business in Canada," continues Mr. White, "no attempt has been made to increase the royalties or otherwise act oppressively, but on the contrary every effort has been made to constantly improve the machinery, to assist new manufacturers in starting business and to satisfy its customers generally."

Not Against Public Policy.

"How far the restrictive clauses have been a factor in securing the business to the company, I am unable to say, but, considering the company's methods as a whole, I cannot find that they are against public policy. As has been pointed out, the company has been of manifest advantage to the manufacturer of boots and shoes, to the labor operating the machines, and to the consumer."

"The leases of the company were declared legal by the Privy Council in the case of the Company vs. Brunet et al., and this same system of doing business might have been adopted by any other manufacturers of shoe machinery. However, those others preferred to sell their machines, and there is evidence that in doing so no adequate guarantee was offered to the purchasers that necessary parts for repairs could be promptly obtained, or that a proper repair service would be furnished. That under these conditions the United Shoe Machinery Company of Canada has secured the business is not to my mind sufficient evidence that the tying clauses unduly restrict competition. On the contrary, I am of opinion that the leases of the company are not contrary to the provisions of the Act."

COBALT ORE SHIPMENTS

The following are the ore shipments, in pounds, from Cobalt Station for the week ended October 25th:—Chambers-Ferland, 65,600; La Rose, 65,200; Cobalt Townsite, 234,305; McKinley-Darragh, 176,441; Kerr Lake, 120,800; total, 662,346 pounds or 330 tons. The total shipments since January 1st, are now 35,353,116 pounds or 17,676 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

CANADA'S IRON TRADE AND COMPETITION

The reports presented at the annual meeting of the Canada Iron Corporation, Limited, covered the fiscal year ending May 31st last. During the period, as the president, Mr. T. J. Drummond pointed out the adverse conditions prevailing in the United States were severely felt in Canada. Since that date there has been a great revival in the iron trade, but the effect upon the corporation will not appear until next year's reports.

The mines at Torbrooke, N.S., have been re-opened, and shipments of ore from Port Wade will soon be resumed. Then the second new furnace at Midland, Ont., has been blown in, and both furnaces for the first time are now in full blast.

Judging by the conditions in the United States, this activity seems likely to continue and even to increase. Under the circumstances, the reports were considered satisfactory.

The financial statement shows profits for the year ending May 31st of \$375,140. After the payment of interest on bonds and special loan, \$265,426, applied in reduction of bond discount and expense, \$6,800; merger expense, \$9,505; and provision for sinking fund on original bond issue, \$46,841, there was added to profit and loss account \$46,566. With the \$399,807 at credit from the previous year, the total is \$406,955.

The total assets of the company are placed at \$15,229,955. The mining properties and developments are valued at \$5,345,563; real estate, machinery, etc., \$3,851,690; and good-will, \$1,041,000.

ACTUARIAL SCIENCE AND FRATERNAL INSURANCE

Examination of the Position of the Independent Order of Foresters Shows Need of Actuary's Report

By Wm. H. Orr.

Now that the actuary's report in the case of the Ancient Order of United Workmen has appeared in print, does it not furnish a basis on which to frame some sort of judgment as to the condition of other assessment societies? Unquestionably it does. What does it show? Here are two balance sheets made by Mr. F. Sanderson, M.A., F.F.A., the consulting actuary, of Toronto. The first one supposes that no change is to be made in the present rates, under which the total \$56,988,000 of Ancient Order of United Workmen insurance is being carried on. It reads as follows:—

Balance Sheet No. 1—Present Rates.

Dr.

Present value of the \$56,988,000 certificates..... \$27,505,000

Cr.

Present value of future assessments 12,162,000
Present reserve fund. (It was) 1,500,000
Deficiency 13,843,000

\$27,505,000

The second valuation table relates only to the certificates that were issued prior to 1905, and which are still in force. These amount to \$50,642,900. It supposes that hereafter the holders of these certificates will each pay rates based upon not their present attained ages, but upon their attained ages in 1905, some seven years ago.

Balance Sheet No. 2.

(Old insurance re-rated as at attained ages in 1905).

Dr.

Present value of outstanding certificates \$25,983,000

Cr.

Present value of future assessments (re-rated).. 19,016,000
Reserve fund apportioned hereto 1,325,000
Deficiency 5,642,000

\$25,983,000

Only \$1,325,000 is used as a fund on hand available for the old members in this valuation, instead of \$1,500,000. The difference of \$175,000 is the estimated fund belonging to the \$6,345,100 of new certificates issued since May, 1905.

Very Lenient Basis.

The actuary proceeds to say that he has made these valuations upon a very lenient basis, and that the deficiency of nearly \$14,000,000 would be materially larger if valued upon any of the usual old line standards.

Now if the United Workmen with their \$56,988,000 of insurance in force should have a present well-invested reserve fund of \$15,500,000, as per the first table above, about how much does that indicate as to the sum the Independent Order of Foresters should have on hand as against the \$242,093,787 of certificates in force on the books of that society?

Stating the problem by proportion, it reads like this. If \$56,988,000 calls for a present fund in hand of \$15,500,000, then \$242,093,787 calls for a present well-invested fund of \$65,807,000. But on December 31st last the entire assets of the Independent Order of Foresters only amounted to \$18,842,767, thus leaving it in the hole on the above basis to the extent of about \$47,000,000!

There is A Loud Call.

Therefore, if there was need, as now clearly appears, for actuarial talent applied to determining the real condition of the Ancient Order of United Workmen, surely there is a loud call upon the Foresters, whether of the Independent, or the Canadian, or of the Catholic stripe, to have their condition tested without further delay. If they are not collecting sufficient rates, the officers owe it to themselves to take steps at once to discover that fact. Only by doing so can they discharge the heavy responsibility now resting upon their shoulders from day to day.

There are a good many other assessment societies carrying on the business of fraternal life insurance in Canada, but we will confine our attention, for the present, to the three Foresters' associations, and the United Workmen. The following figures show the financial standing of those four societies on December 31st, last:—

Name.	In force.	Assets.	Assets per \$1,000.
A.O.U.W.	\$56,770,500	\$1,597,023	\$28.14
Canadian Foresters	82,797,000	3,919,449	47.34
Catholic Foresters	153,591,250	2,784,156	18.18
Independent Foresters	242,093,787	17,623,872	72.80

Since it has been demonstrated by an expert mathematician that one of the above societies, though having \$28.14 on hand per \$1,000, is in an insolvent condition, from which it may not be able to recover, what about the one with only \$18.18? What about the one that has \$47.34? What about the Independent Order of Foresters with its \$72.80?

This \$72.80 is only about two and a half times the \$28.14. Let us see, therefore, how little it would help the Workmen towards solvency if they had two and a half times the rapidly-diminishing reserve fund shown by the October issue of its monthly statement. Instead of the above \$1,597,023, its reserve fund is now only \$1,304,673. Two and a half times that sum is \$3,261,682. Compare this trifling sum with the \$15,343,000 which the "Balance Sheet No. 1" shows would be needed if the rates collected the past seven years were continued. The shortage is the sum of over twelve millions of dollars. Even if tested by the "Balance Sheet No. 2," it would still be not half enough, even if it had as large a fund, per \$1,000, as the Independent Order of Foresters had on December 31st last.

In other words, a test of the solvency of the Independent Order of Foresters, even on the lenient basis of Mr. Sanderson's No. 2 balance sheet, places its \$17,623,872 somewhere in the neighborhood of \$20,000,000 short of what it ought to have had on hand, in order to be safe and solvent.

Time to Wake Up.

Therefore, is it not time that the officers of the society should wake up and employ a staff of actuaries without delay, in order to find out how near its funds will be, on December 31st, 1912, to what they ought to be? Just now they are pushing a campaign to increase the membership, which has been seriously diminishing of late. Five years ago they had 257,267 members against only 241,571 at the close of 1911, the certificates being then for \$264,960,142, and now only \$224,093,787. The decrease is 15,696 for \$22,866,355. This in the face of the fact that 131,795 new members entered the forestic fold for certificates totaling \$105,181,269, during the same five years. These and the decrease make 147,491 members, and \$128,047,624 of a disappearance during the five short years.

Reserve Fund in Danger.

What about the reserve fund? Has it been rapidly increasing as the membership grows older, as it should do? It was \$18,842,767 on December 31st, as per Blue-book report. On October 1st, 1912, it was \$19,342,831. This shows an increase in nine months, of \$500,064. At the same rate of increase for another three months, it will be about \$19,509,519, on December 31st, showing a growth during 1912, of only \$666,752. As the assets are supposed to be invested, and therefore producing interest, how would five per cent. interest upon the blue-book assets compare with this \$666,752? Multiply by 5 and it is found that the increase from interest alone, during 1912, should be \$942,138. This shows a shortage, when the \$666,752 is deducted, of \$275,386. In other words, not only are the members contributing nothing, at present, towards a solvent reserve fund, but are already commencing to use it up by over a quarter of a million dollars a year, when measured by a 5 per cent. interest standard of yearly increase. Why is this thus?

Growing Death Losses.

A glance at the growing death losses, and old age and disability benefits now so rapidly increasing, furnishes a further reason for anxiety as to what the officers will do, in the discharge of the responsibility now resting upon them with compelling weight. The following table shows that the amount at risk seven years ago (at the top of the table) and the amount on December 31st, last, were of about equal volume. Note the difference in the claims that had to be met in 1904 and in 1911.

Year Ending	Insurance In Force.	Death Claims.
1904	\$242,896,000	\$1,848,484
1905	248,801,000	1,882,290
1906	258,095,000	2,163,718
1907	264,960,142	2,368,774
1908	246,027,884	2,290,466
1909	239,241,845	2,199,863
1910	240,170,989	2,339,636
1911	242,093,787	2,680,657*

Increase of death losses over 1904.... 841,173

*See Blue-book, page 59.

On the other hand, it may be said that the reserve fund has been growing. It has grown in the past from \$8,265,201 in 1904 to \$17,623,872 in 1911. That is a growth in seven years of \$9,358,671. Would that sum, if safely invested at 4 per cent. interest, provide for an increased death call of \$841,167? Certainly not. It would only yield \$374,346. The nearly \$500,000 of yearly difference, would have to be drawn from the principal. That is just what is occurring to-day, month by month, in the operation of the Order. The reserve fund is not increasing by even so much as would be produced by the interest on the money, at say 5 or 6 per cent. Let us see how this looks by a table of monthly increases of this important fund, compared with one-twelfth of the interest, at 6 per cent. upon the blue-book total assets of December 31st, 1911, viz.:—\$18,842,767, which would be \$1,130,566. That is to say; the eighteen millions, with a little monthly addition, should now be producing \$1,200,000 per annum in interest increase, or \$100,000 per month.

Table of Monthly Growth.

Is the reserve fund growing each month, this year the rate of \$100,000, or anything like it? Let us see what is shown by the monthly statement sent to the members in *The Forester*, on its first page, each month, for the past nine months:—

Month.	Accumulated Funds.	(An Increase of)
January	\$18,842,767	
February	18,940,318	\$ 97,551
March	18,974,889	34,571
April	18,995,342	20,453
May	19,013,136	17,794
June	19,039,107	25,971
July	19,097,072	57,965
August	19,208,298	111,226
September	19,282,727	74,429
October	19,342,831	60,104
Totals in 9 months	\$500,064	\$500,064
\$100,000 per month comes to		\$900,000

This illustration clearly shows that in nine months of this year the Independent Order of Foresters has been coming short by four hundred thousand dollars of laying aside so much as 6 per cent. interest upon its reserve fund would come to, during the same time. As compared with earning 6 per cent. on the fund during 1912, this will show a shortage for the whole year of about six hundred thousand dollars.

As to a Dangerous Feature.

There is a feature of the Independent Order of Foresters' operations which adds greatly to the liability, or danger of running ashore, as compared with societies undertaking to pay losses only at death. That is: the contract to pay old age and permanent disability benefits. Every member arriving at age 70 is permitted a choice of taking \$700 in cash, and dropping out, or taking \$100 per year for the following ten years, and the balance at death upon each \$1,000 of insurance he carries. These provisions amounted to almost nothing a few years ago, but (like the Workmen's similar provision of paying back one-third of a member's total assessments in cash at age 70) they are now becoming a serious matter. They are growing in bulk, as will be seen by the following statement, compiled from the Independent Order of Foresters' sworn reports made annually to the Superintendent of Insurance at Ottawa.

Cash Paid for Old Age Benefits.

Year paid.	Amount paid.	3-year periods.
1906	\$ 39,800	
1907	205,882	
1908	247,466	
		\$493,148
1909	\$313,741	
1910	298,255	
1911	374,480	
		\$986,476

While the above shows the drain on the Order from this feature of the work, to be increasing in a threatening manner, pointing sharply to an early and heavy inroad upon the reserve fund, the payments for the ten months of this year, as set forth in *The Forester*, are still more serious. They call for prompt action on the part of those in charge of the destinies of this Canadian institution, having, as it has, no less than forty-seven High Courts, in as many different sections of the Dominion, of the United States, of Great Britain, of India and of Norway. Great Britain sends in over twelve thousand dollars a month, California twenty-five thousand, and New York State over thirty thousand. The following statement is from this year's monthly

reports of payments to living members, showing how very rapidly they are now increasing over previous years:—

Month.	Old age.	Disability, etc.	Total.
January	\$25,363	\$11,790	\$37,153
February	23,284	7,924	31,208
March	36,963	9,146	46,109
April	44,400	7,130	51,530
May	48,984	8,666	57,650
June	42,257	7,315	49,572
July	34,914	8,640	43,554
August	36,019	11,749	47,768
September	51,850	5,095	56,945
October	56,394	11,379	67,773

Total in ten months	\$489,262
If next two months equal Sept. and Oct., add.	124,718

The total for 1912 looks like \$613,980

Or nearly doubled up, when compared with the other recent years, and will be continually growing, month by month. A good many of the members, as they reach age 70, are now following the good example set by Lieutenant Governor Sir J. M. Gibson, in the matter of accepting the \$700 per \$1,000 in cash, and dropping out.

Surely we are taking the right course in thus warning the officers in charge of the society, that they are doing a risky thing in calling upon present members each to bring another into this institution, until they first find out, by a proper actuarial report, whether it is or is not running straight for the same jagged rocks on which their sister society, (the Ancient Order of United Workmen); is now actually floundering.

LIFE INSURANCE RESULTS IN UNITED STATES

The following interesting summary compiled by Bests, showing the financial condition and business transacted last year by all the legal reserve companies in the United States incorporated under the law of some state, and also by one foreign company writing re-insurance only. The figures do not include those of the four Canadian companies writing business in the United States:—

Total admitted assets	\$4,164,867,366
Capital paid in	48,285,880
Surplus and (or) special funds	273,557,239
First year premiums	65,079,420
Renewal premiums	513,977,931
Dividends and surrender values applied to pay premiums	44,609,185
Considerations for annuities	7,440,144
Interest, dividends and rents	172,673,199
Total income	844,409,460
Death claims paid	192,973,896
Matured endowments and annuities	56,267,334
Lapsed, surrender and purchased policies	72,107,865
Dividends to policyholders	83,525,826
Dividends and interest to stockholders	2,088,943
Commissions on new premiums	31,052,551
Commissions on renewal premiums	25,308,334
Salaries and other charges of officers and employees and medical fees	28,187,638
Total disbursements	589,088,870

New business written in 1911:—

Annual dividend	\$1,155,218,096
Deferred dividend	62,676,210
Non-participating	655,334,611
Industrial	673,152,444
Total	2,876,729,851

Insurance in force, December 31st, 1911:—

Annual dividend	\$6,255,891,708
Deferred dividend	3,690,827,382
Non-participating	2,602,271,658
Industrial	3,414,428,649
Total	18,018,259,267

EUROPEAN BANK RATES

The rate of discount of the Bank of England remains unchanged this week at 5 per cent.

The Bank of France has advanced its minimum discount rate from 3½ to 4 per cent.

The Imperial Bank of St. Petersburg has advanced its rate to 5½ per cent., from a 5 per cent. rate established on September 15th, 1910.

OCTOBER MUNICIPAL BOND SALES

Dull Market Conditions Reflected in Returns—Several Small Issues

The municipal bond sales in Canada for October, as compiled by The Monetary Times, amounted to \$1,060,597, compared with \$1,998,605 for September, and \$1,730,075 for the corresponding period last year.

The September municipal bond sales in Canada included New Westminster's sale of \$2,000,000. These are now being sold in London and the amount has therefore been deducted from the September total which, amended, is \$1,998,605.

The largest issues were made by Montreal Protestant Schools and Bassano. The following are the particulars by provinces:—

Quebec	\$ 666,000
Alberta	150,000
Saskatchewan	127,200
Ontario	76,397
New Brunswick	35,000
Manitoba	6,000
	\$1,060,597

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$ 881,838	\$ 420,337	\$ 2,133,531
February	1,272,977	1,037,287	2,596,378
March	1,169,730	6,271,925	1,726,716
April	6,805,078	3,910,288	927,160
May	5,964,896	3,946,047	1,928,748
June	2,187,588	3,983,670	1,690,344
July	1,536,424	1,594,566	1,067,376
August	1,312,953	1,493,507	1,640,547
September	2,841,486	1,748,778	1,998,605
October	2,211,461	1,730,075	1,060,597
November	2,292,781	2,915,765	
December	566,113	1,243,593	
Total	\$29,043,325	\$30,295,838	\$17,681,002

The following are the details:—

Quebec			
Montreal Protestant Schools	\$500,000	4	1942

HUDSON BAY OF DOUBTFUL VALUE TO WHEAT EXPORTERS

Terminal Port Will Have to be Provided With Large Grain Storage Elevator Facilities

The Hudson Bay Railway will be established in about two years, if the estimates made by engineers are not varied by delays in obtaining construction material as wanted and by unusual weather conditions. Completion of this line will mean the establishment of another more or less practical outlet for western wheat and grain.

The Dominion government has let a contract covering the last section of the railroad consisting of about 165 miles of line from Split Lake to Port Nelson. There seems still to be some uncertainty as to whether Fort Churchill or Port Nelson will be chosen as the terminus. A line to the latter has the advantage of being the shorter of the two and consequently the cheaper from a construction point of view, the territory through which the lines have been tentatively projected, being very much the same, but the former is believed to be a better harbor.

Opinions Differ Considerably

Just what the future of the Hudson Bay line will be as a transportation line, it is difficult to forecast, thinks the Wall Street Journal. A number of investigations have been made, and opinions differ rather widely as to the ultimate practicability of the proposition. The Hudson Bay route and the outlying straits will be open to navigation perhaps five months of the year, or less if the winter season is a protracted one, as is often the case, but the open season occurs at a time when there is no grain to move, thus necessitating the storage of grain for several months at the heads of the Great Lakes or at Port Nelson, the plan which is now in operation with regard to lake shipping, but which was sought to be remedied in greater part by the construction of the line to Hudson Bay.

Erection of Grain Elevators

To make the line under construction practical and profitable, it is the opinion of engineers, large grain elevators will have to be erected at the terminal port and the grain stored for shipment during the following summer, for the vast bulk of grain does not begin to move until the latter part of October, the month in which Hudson Bay begins to freeze over. But the plan of erecting storage elevators will be of some benefit to the farmers who are anxious to secure every possible outlet, though it will not make of the line the valuable outlet it was planned to establish.

It is generally conceded by those who have studied the proposition that the road will not accomplish all that its friends claim for it. The latter point out that vessels to the terminal point from Great Britain will not only have to navigate without the established safeguards to be found over all established water routes, but that the insurance rates will be almost prohibitive. They contrast the prospective situation in those untraveled northern waters with the actual conditions prevailing in the St. Lawrence River where high insurance rates obtain because wrecks are of frequent occurrence there despite the fact that the route is comparatively well lighted and equipped with signalling apparatus and the waterway in recent years has been deepened and straightened.

TORONTO'S RECENT FIRES

The following are the fires reported in Toronto for the week ended October 28th:—October 22.—882 Yonge Street Loss \$50. Cause, upset lamp.

October 23.—16 Henrietta Street. Loss \$50. Cause, excelsior in cellar ignited; 832 Yonge Street. Loss \$150. Cause unknown.

October 24.—131 Roncesvalles Avenue. Loss \$15. Cause, defective grate.

October 25.—18 St. Joseph Street. Loss \$50. Cause, defective grate.

October 25.—112 Brunswick Avenue. Loss \$475. Insurance \$600. Cause unknown.

October 27.—513 Salem Avenue. Loss \$100 Insurance \$2,500; 515 Salem Avenue. Loss \$800; 517 Salem Avenue. Loss \$100. Cause, overheated stove pipes.

October 27.—75 Salem Avenue. Loss \$60. Insurance \$700.

October 28.—311 Indian Road. Loss \$50. Cause, defective gas grate.

Mr. D. H. McDougall, assistant general manager of the Dominion Coal Company, had been promoted to the general managership of that company.

GROWTH AND DISTRIBUTION OF FRUIT

Calgary's Position an Important Factor — Canadian Northern Enters—Alberta's and Saskatchewan's Prizes

(Special Correspondence).

Calgary, October 28th.

Calgary, as the largest distributing point nearest to the source of supply of fruit, has heard much of the British Columbia fruit question this season. Fresh fruit sold for lower prices this year than ever before, and the British Columbia growers have urged that either the tariff be so adjusted as to keep out fruit from the United States or the freight rates reduced to a point where they would be on an equal footing with their southern competitors. Owing to a difference of climate, the United States fruit comes in about three weeks ahead of the British Columbia offerings, a factor which neither tariff nor freight affects much. The industry is alleged by some growers to be in a bad way, notwithstanding that more trees are coming into bearing for the next three or four years, and thus the question is one of vital import.

Government Department Makes Statement

The British Columbia department of agriculture, through Deputy Minister W. E. Scott, makes a statement, which is in part as follows:

"There is no doubt but that fruit growers who have bearing orchards planted with the right varieties, and cared for along up-to-date and scientific lines, will make good returns from their crop this year. Prices, owing to the large crop, not only in our own province, but also in the competitive States of Washington, Oregon and Idaho, are considerably lower this year, but even at the prices obtained there are good returns to be made from fruit growing. The prices for winter apples now being realized in the prairie provinces range from \$1.10 to \$1.20 per box, No. 1 grade, f.o.b. point of shipment. Consignments to Australia realized \$1.35 to \$1.45 per box. Pears, \$2.25 to \$2.50. Strawberries \$2.25 to \$2.75. Sour cherries, \$2.25. Sweet cherries, \$1.80. Peaches have averaged 50c. per box, a price, it is true, which is not satisfactory to the grower, and only allows him a very narrow margin of profit.

Profit to Grower

No growers in the province are planting out peaches, as it is realized by growers that peaches, being a perishable crop, are risky. From figures given last year by the horticultural branch of the department of agriculture, it was shown that the average cost of production of a box of apples in the province was 65 cents. Average price of apples, No. 1 and No. 2 grades, \$1.00. This gives a profit to the grower of 35 cents per box. A full bearing orchard in any of our recognized fruit growing districts averages, one year with another, five boxes per tree. The orchards of the province planted on the filler system will run 100 trees to the acre. This makes 500 boxes of fruit, or \$175 per acre; these figures are conservative."

The difficulties in the way of the Canadian Northern Railway entrance into Calgary are practically removed now the interim injunction secured by the Canadian Pacific Railway to prevent its rival crossing the irrigation ditch on anything but what was contended to be obstructive conditions, has been set aside, and the city commissioners have come to an agreement regarding the closing of streets and property damaged.

Land and What It Produces

Mr. J. S. Dennis, assistant to the president of the Canadian Pacific Railway, and director of the natural resources department of that company, at Calgary, announces that the policy for the coming year will be to place actual settlers—real farmers—on the company's lands and discourage the selling of land to speculators.

Visitors from the Dry Farming Congress at Lethbridge were numerous in Calgary. All agree that the keynote of the addresses was "better farming." Marquis wheat, originated and introduced by the Dominion Experimental Farm, again captured the first prize for the best bushel, a contest open to all comers. Mr. H. Holmes, of Raymond, Alberta, is the successful victor and the prize is a \$2,500 gas tractor. Seager Wheeler, the winner of the prize in New York a year ago, was a competitor, and though he did not achieve as high honors this year, he has the satisfaction of knowing that it was from seed supplied by him the prize winning sample was grown. Alberta took many other winter and spring wheat prizes, Saskatchewan the grand aggregate for display of grains, and British Columbia, fruit and potato prizes. More than 2,000 accredited representatives attended.

SIXTY-EIGHT WESTERN COMPANIES

Smart-Woods Merger Shows Second Largest Capitalization

Sixty-eight companies in Western provinces and fifty in Eastern Canada received charters this week, making a total of 118 companies with a capitalization of \$28,166,420. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capital.
New Brunswick	2	\$1,090,000
Quebec	17	8,077,920
Ontario	31	10,811,000
Manitoba	12	1,912,500
Saskatchewan	1	200,000
Alberta	36	4,325,000
British Columbia	19	1,750,000
	118	\$28,166,420

The largest companies this week are:—

Northey Simmen Signal Company, Toronto	\$5,200,000
Smart-Woods, Montreal	5,000,000
Lorraine-Trout Lake Mines, Toronto	1,800,000
Nova Scotia Development Company, Montreal ...	1,000,000
A. & R. Loggie Company, Loggieville, N.B.	1,000,000
Tegler Building, Edmonton	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Lethbridge, Alta.**—Farm Products, \$100,000.
Wainwright, Alta.—Clark and Taylor, \$10,000.
Irma, Alta.—Irma Co-Operative Company, \$50,000.
Camrose, Alta.—Camrose Grocery Company, \$100,000.
Cranbrook, B.C.—Kootenay Garage Company, \$25,000.
North Vancouver, B.C.—Unit Realty Company, \$250,000.
Lacombe, Alta.—Alberta Provincial Land Agencies, \$60,000.
Invermere, B.C.—Invermere Contracting Company, \$50,000.
Medicine Hat, Alta.—Excelsior Oil and Gas Company, \$250,000.
Redcliffe, Alta.—Redcliffe Rolling Mills and Bolt Company, \$250,000.
Forest, Ont.—Forest Basket Company, \$25,000. W. Flater, F. Flater, L. Flater.
Fort William, Ont.—Nevilles, \$40,000. M. J. Neville, A. Neville, R. J. Neville.
Victoriaville, Que.—Union Realty, \$49,000. P. Tournigny, W. Laliberte, A. Pepin.
Clanwilliam, Man.—Clanwilliam Hall Company, \$2,500. C. Bertram, A. McPherson, A. Averill.
Victoria, B.C.—British Columbia Cafes, \$25,000. Tracksell, Douglas and Company, \$150,000.
Brighton, Ont.—Brighton Fruit Growers' Association. W. H. Walter, C. M. Sanford, H. A. Beech.
Owen Sound, Ont.—W. T. Harris Company, \$200,000. W. T. Harris, A. K. Bishop, J. M. Kilbourn.
Loggieville, N.B.—A. and R. Loggie Company, \$1,000,000. R. Loggie, F. P. Loggie, Mrs. A. Loggie.
Coverdale, N.B.—Coverdale Fox Farm, \$90,000. A. C. Chapman, C. A. Murray, F. C. Robinson, Moncton.
Brandon, Man.—Great West Coal Company, \$20,000. C. H. Lamontagne, S. C. Lamontagne, R. E. Unicume.
Weston, Ont.—Reliable Bedding Company, \$60,000. J. F. Holliss, T. H. Wilson, Toronto; W. Gauvreau, Ottawa.
St. Malachie, Que.—Bois Gilbert Manufacturing Company, \$49,900. J. A. Lacasse, H. H. Henderson, J. Maheux.
Saskatoon, Sask.—Dominion and Western Agencies, \$200,000. R. M. Buchan, T. W. Fair, Saskatoon; J. E. Vogan, Ottawa.
Sault Ste. Marie, Ont.—Pratt Mining Company of Ontario, \$50,000. S. B. Somers, Minneapolis; J. A. McPhail, D. W. Lewis, Sault Ste. Marie.
Walkerville, Ont.—Agnew Electric Welder Company, \$40,000. R. F. Agnew, Detroit, Mich.; C. Fleming, Ingersoll; H. Crouchman, Walkerville.
Steelton, Ont.—Algoma Hardwood Flooring and Lumber Manufacturing Company, \$40,000. W. Wilks, W. Stringer, Steelton; W. K. Miller, Sault Ste. Marie.

Prince Rupert, B.C.—Crippens Herring Fisheries, \$50,000. New Hazelton Bridge and Power Company, \$40,000. Island Live Stock and Development Company, \$25,000.

Notre Dame du Bon Conseil, Que.—La Compagnie Minière de Wendover, \$20,000. M. Forcier, Notre Dame du Bon Conseil; N. Laselle, St. Pie de Guire; D. Martel, St. Bonaventure.

Hamilton, Ont.—Roxborough Gardens of Hamilton, \$50,000. W. W. Currier, H. R. Mason, M. D. Judah. Sunshine Laundry Company, \$40,000. J. M. Duff, F. Regan, W. G. Hanna.

Ottawa, Ont.—Dominion Printing and Loose Leaf Company, \$50,000. W. Price, J. R. Campbell, E. T. Hyde. Bannerman, \$250,000. J. A. McMillan, Alexandria; A. E. Bannerman, F. M. Lower, Ottawa. Canada Lands, \$500,000. Sir H. N. Bate, E. L. Newcombe, Hon. D. Laird.

Quebec, Que.—Oban Land Company of Canada, \$200,000. A. Marcotte, St. Basile; N. G. Kirouac, Montcalm; F. Vanasse, Montreal. La Compagnie Le Parc Belmont, \$50,000. J. E. Massicotte, Chicoutimi; J. P. Oullet, T. L. Tremblay. Battlefield Realty Company, \$49,000. D. H. Pennington, J. F. Simeon Dugal, A. W. Hay.

Calgary, Alta.—Sanitarium Hotel Company, \$30,000. Loquet and King, \$10,000. Consolidated Building and Investment Company, \$500,000. Dominion Building and Investment Company, \$75,000. English and Swiss Jewellery Company, \$10,000. Cameron and Anderson, \$100,000. Alberta Optical Company, \$25,000. Alberta-Saskatchewan Paper and Straw Board Products Company, \$300,000. Mouat, Aitken and Brown, Limited, \$50,000. Parisian Dye Works, \$10,000.

Vancouver, B.C.—British Columbia Novelty Company, \$10,000. Port Nootka Land Syndicate, \$150,000. West Coast Land Company, \$250,000. Cole Auto Company, \$50,000. Utrecht Canada Investment Company, \$10,000. East Coast Logging Company, \$50,000. Morgan, Grant Land Company, \$75,000. Excelsior Lumber Company, \$10,000. Home Manufacturing Company, \$20,000. Sechelt Gravel and Construction Company, \$170,000. Security Land Company, \$250,000.

Edmonton, Alta.—Woodland Dairy, \$100,000. Gold Seal Liquor Company, \$10,000. Northern Alberta Mortgage Company, \$500,000. G. W. Chambers, \$100,000. Fortin Company, \$10,000. Pleasant Hill, \$30,000. Dunvegan Investors, \$30,000. Walker and Barnes, \$50,000. Pocahontes Trading Company, \$50,000. Canadian Hospital Association, \$50,000. Tegler Building, \$1,000,000. Central Alberta Investment, \$25,000. Park Lumber and Planing Mills, \$75,000. North West Land Company, \$200,000. Standard Express and Cartage Company, \$15,000. Royal Curling Company, \$30,000. Dominion Cigar Stores, \$100,000. Crown Plumbing and Heating Company, \$10,000. Edmonton Orchestral Society, \$10,000.

Winnipeg, Man.—Associated Builders' Finance Company, \$100,000. W. P. Alsip, H. H. Pigott, R. J. Kennedy. Rossmere, \$100,000. R. A. Duff, R. M. Neely, A. Parker. Osborne Company, \$60,000. M. J. Williamson, E. Bourke, W. Bourke. Canadian Railways Bond Corporation, \$10,000. H. G. Reynolds, F. Stiner, W. J. Le Cappelain. Corona Loan and Investors, \$100,000. A. C. Macdonald, D. Fleming, W. M. Gordon. Elite Theatre, \$100,000. J. S. Craig, H. Andrews, J. E. Reynolds. Canadian Motor Company, \$500,000. R. W. Patterson, J. A. Machray, J. C. Hicks. Washow Lumber Company, \$80,000. I. Lesk, J. Cherniack, A. Cherniack. Fisher River Lumber Company, \$100,000. D. Silver, H. Tremert, G. A. Elliott. Royal Construction Company, \$20,000. D. B. Sprague, W. Williams, H. Lewis.

Montreal, Que.—General Manufacturers' Agencies, \$50,000. J. W. Cook, A. A. Magee, E. G. Trevor Penny. Smart-Woods, \$5,000,000. C. A. Smart, Westmount; C. E. Archibald, F. H. Wilson, Montreal; J. W. Woods, Ottawa. Highlands Factory Sites, \$500,000. P. L. Lukis, H. A. Stewart, J. G. Chapman. Franco-Canadian Land and Development Company, \$500,000. L. Meunier, Toronto; E. F. Surveyer, Outremont; P. Surveyer, Montreal. Stanford's, \$500,000. T. S. Ownes, P. S. Conroy, H. MacIntyre. La Mutuelle Foncière, \$40,500. J. M. Marcotte, A. A. Loranger, L. Delorme. Improved Properties, \$50,000. A. Wainwright, M. Alexander, D. B. Smith. Nova Scotia Development Company, \$1,000,000. A. H. Elder, P. F. Brown, S. T. Mains. Lachine Realities, \$10,500. A. H. Elder, I. H. Kerracher, W. R. Ford. Le Club de France, \$10,000. A. Lemieux, E. Lemieux. A. Beauchamp. S. J. Dunning Company, \$20,000. J. P. Dunning, M. F. Willcocks, J. S. Fraser.

Toronto.—Monarch Construction and Realty Company, \$40,000. S. Hill, Birmingham; W. L. Clark, H. R. Turner, Toronto. Abingdon Realty Company, \$100,000. G. R. Kappele, C. M. Johnston, L. V. Wright. Elgin Gardens, \$100,000. C. F. Ritchie, J. H. Oldham, A. E. Knox. Texas Securities Company, \$40,000. J. S. Lovell, C. D. Magee, W. Bain. Canadian Breweries Supply Company, \$40,000. A.

L'E. Malone, E. G. Long, A. Mearns. Summit Golf and Country Club, \$100,000. R. Barnes, T. H. Lennox, J. R. Meredith. Humbervale Cemetery Company, \$100,000. D. Patterson, N. J. Stevenson, J. D. McGill. Stone-Grant Lumber Company, \$500,000. G. H. Sedgewick, A. G. Ross, A. E. Langman. Central Corners, \$260,000. P. S. Cowell, J. V. Macfarlane, G. R. Kappele. Victoria Corners, \$160,000. P. CANADIAN PACIFIC EAST-BOUND RATES AND EMPTY CAR MILEAGE

Large Percentage of Westward Haul of Empties Makes Necessary High East-bound Rates, Says Expert

An official of the Canadian Pacific Railway, in speaking of the freight rate situation, high eastbound rates and general traffic conditions, says: "Nearly 40 per cent. of our freight trains moving westward are made up of empty cars, and it costs nearly as much to haul an empty car as it does to haul a loaded one. This empty movement is one of the largest shown by an important division of any great railroad company, and it practically means that the rates on eastbound tonnage, in order to protect the company, must be high enough to cover the eastbound haul, and also the expense of returning the empty cars to the Pacific coast.

"The bulk of this traffic," he says, "consists of lumber, and for this are used principally the ordinary box cars, which are suitable for the haulage of grain or general merchandise. It is only the long timber that is hauled on flat cars. If the cars which now return empty could be loaded with grain or merchandise, the cost of the westward trip would then fall on the latter and the burden removed from the eastbound traffic.

Empty Car Mileage Forty Per Cent.

"In the United States, roads that show an empty car mileage of about 20 per cent. are considered expensive to operate, and in our traffic we have an empty car mileage of approximately 40 per cent." He also points out that the Canadian Pacific has probably invested more money in roadbed and equipment than any other road moving a high percentage of empty cars. The line from Calgary to the coast has not yet become a profitable investment, but it was necessary to build the line in order to reach the large lumber sections and mineral deposits of British Columbia and to furnish an outlet for Canadian products to the Pacific coast.

On this division there is almost a total absence of local traffic, whereas it is on heavy local traffic that railroads principally depend for profits. The cost of road, he points out, is about \$100,000 per mile, equipment included, through the Rocky Mountain section, and yet the traffic developed up to the present time is considerably less than on most roads costing not more than about \$60,000.

Pacific Coast Extensions.

Pacific coast extensions have proved a somewhat expensive necessity without an adequate return of profit, but it is in keeping with Canadian Pacific policy that this work is undertaken, for this road has always built far in advance of traffic demands. At present, Canadian Pacific is spending about \$2,500,000 for a new station and office building at Vancouver, and also a new pier at Vancouver Island.

A large westbound traffic in wheat, which may be reasonably expected in time, will have the effect of lowering rates on eastbound freight and incidentally enable manufacturers to extend their markets in Alberta, Saskatchewan and other eastern provinces.

A counterfeit Bank of Toronto ten-dollar note has been presented at the head office, Toronto. It is a pen and brush production. The color on face and back water color of a note dated 1st February, 1910, number 320500 series "B," signed "H. O. Bailey" for general manager, "D. Coulson," president. The vignette on left does not show any beaver as on genuine notes. D. Coulson, president, signature is poorly drawn. The numbers are larger and heavier than on good notes. Imprint "American Bank Note" is missing on both sides of note.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Car and Foundry Company.—The Canadian Car and Foundry Company are erecting an addition to their Amherst plant which will cost \$150,000. Work will commence in a few days. The president of the company, Mr. Nathaniel Curry, stated that a record was made by the company's recent output of 101 cars.

Chicoutimi Pulp Company.—The Chicoutimi Pulp Company, which recently closed a record contract with a paper manufacturing company in England, announces that another big contract has been closed also with an English firm. The company has just contracted to supply the Harmsworth paper mill on the Thames with 25,000 tons of mechanical pulp each year for a period of ten years.

Gillette Safety Razor Company.—The net earnings of the Gillette Safety Razor Company for the nine months ended September 30 were \$855,089, compared with \$730,958 in corresponding period a year ago, an increase of \$124,131, or 17 per cent. The company's business has recently shown an improvement in foreign fields, particularly in India and South Africa.

Nipissing Mining Company.—The financial statement of Nipissing Mining Company as of October 1st, 1912, was as follows:

Cash	\$1,082,072
Ore in transit at smelters.....	101,203
Ore at mine ready for shipment.....	339,773
	\$1,523,049

Mexican Light and Power Company.—The Mexican Light and Power Company, Limited's statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, as advised by cable, for the month of September, 1912, is as follows:

	1911.	1912.	Increase.
Gross earnings	\$ 693,559	\$ 728,630	\$ 35,071
Net earnings	527,861	533,177	5,316
Gross earnings from Jan. 1	6,026,453	6,516,421	489,968
Net earnings from Jan. 1	3,940,078	4,677,041	736,963

Granby Consolidated Mining, Smelting and Power Company.—At a recent meeting of the directors of the Granby Consolidated Mining, Smelting and Power Company, it was decided to continue the development and equipment of the plant and property at Hidden Creek out of the earnings of the company. The question of making a convertible bond issue was not considered. Mr. William H. Nichols, president of the company, stated that the new plant would have a capacity of 2,000 tons a day and would be financed out of earnings of the company, so that dividends would be delayed for a while.

Dominion Trust Company, Limited.—A misleading article appeared on the financial page of a Montreal daily paper which tended to indicate that a bonus would probably be paid this year by the Dominion Trust Company, over and above the regular 8 per cent. per annum regularly paid since the inception of the company. The head office of the company, which is in Vancouver, states that such action would be in direct opposition to the desires of the executive, who prefer to have a large reserve built up in addition to the present reserve of \$550,000, before either paying a bonus or increasing the present dividend rate.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail smelter for the week ending October 24th and from July 1st to date, in tons, are as follows:

Company's mines.	Week ending October 24.	July 1 to date
Centre Star	2,748	52,394
Le Roi	1,041	14,059
Sullivan	620	9,685
Richmond-Eureka		450
St. Eugene		478
Molly Gibson		797
No. 1		153
Other mines	1,129	21,607
Total	5,538	99,623

Twin City Rapid Transit Company.—The earnings of the Twin City Rapid Transit Company for the third week of October were \$154,792, an increase over the corresponding period last year of \$7,737, or 5.26 per cent.

The Quebec Central Railway Company.—The Quebec Central Railway Company has issued its report for the year ended June 30th, 1912. The income account compares as follows:

	1912.	1911.
Gross earnings	\$1,354,811	\$1,208,949
Operating expenses	943,976	820,803
Net earnings	410,835	388,146
Other income	11,744	7,911
Total income	422,579	396,057
Charges	282,235	282,235
Surplus	*140,344	113,822
Previous surplus	77,005	46,593
Total surplus	217,349	160,415
Speculative appropriation	28,000	
Dividends	114,370	83,410
Profit and loss surplus	74,979	77,005

* Equal to 4.15% on \$3,381,603 outstanding capital stock.

Duluth-Superior Traction Company.—Gross passenger earnings of the Duluth-Superior Traction Company for the month of September were \$51,306.30, as compared with \$92,774.25 for the same month last year, a decrease of 44 per cent. The decrease was distributed over the last three weeks of the month.

For the first two weeks of October there has also been a decrease, as follows:

	1912.	1911.	Decrease.
First week	\$12,879	\$21,507	\$8,628
Second week	15,425	21,948	6,522
Totals	\$28,304	\$43,455	\$15,150

The rate of decrease in October has been 34 per cent., as compared with 44 per cent. in September. Earnings for the year to date have been \$828,510, as compared with \$872,043 for the same period of last year, a decrease of \$42,532, or 5 per cent.

This decrease in gross earnings is due to a strike which was inaugurated on September 9th, when the motormen and conductors of the company in Duluth refused to return to work unless a number of union men who had been discharged were reinstated.

Bell Telephone Company.—The Bell Telephone Company have been paying dividends continuously for 26 years. The company's record of net earnings for the past five years was as follows:

	Per cent. on paid-up capital.
1907.....	\$1,043,798 or 8.35
1908.....	1,424,275 or 11.39
1909.....	1,468,889 or 11.75
1910.....	1,547,126 or 12.38
1911.....	1,425,836 or 10.53

Net earnings for last year were less than for 1909 and 1910, but the gross for 1911 was nearly \$1,000,000 greater than for 1910 and \$1,500,000 greater than for 1909.

The reason for the decreased net earnings in 1911 is that operation and maintenance expenses were heavier. Last September \$2,500,000 of new stock was offered to the shareholders, which, when all paid up, will bring the paid-up capital up to \$15,000,000.

The new capital was for the purpose of extensions, etc., and the revenue will undoubtedly be augmented this year through its expenditure.

The company has been conservative in the payment of dividends, no increase having been made since 1902. The rate is 8 per cent. per annum (2 per cent. quarterly).

The company has built up strong reserve funds, which add stability to the company's position. In 1909 the several reserve funds amounted to \$5,200,000; in 1910 to \$6,448,000, and to \$7,408,000 in 1911.

The Galt ratepayers voted on a by-law to raise \$15,000 as a loan to the Galt Shoe Company, Limited.

The Bank of Toronto has declared its regular quarterly dividend of 2½ per cent. plus a bonus of 1 per cent, which brings the total distribution for the year to 12 per cent.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Charlottetown, P.E.I.—Abegweit Athletic Club's Grand Stand. Loss \$1,200, no insurance. Cause, incendiary.

Lakeport, Ont.—October 3.—Mr. C. O. Cook's barn. Owned by the Defries' Estate. Mr. Cook's loss \$600, no insurance, building \$2,400. Cause, lantern exploded.

Fredericton, N.B.—September 24.—Messrs. Clements Company, Limited, shed. Loss, stock \$126, buildings \$300. Insured with Hartford Fire Insurance Company and German-American Company. Cause unknown.

Collingwood, Ont.—October 13.—Collingwood Packing Company's iron sheeted frame buildings. Loss, stock \$6,000, buildings \$2,500. Insured with about 20 companies, placed with Messrs. Ormsby, Clapp and Anderson, of Toronto.

Victoria, B.C.—September 1.—Worswick Paving Company, asphalt works. Loss, building \$250, no insurance; contents, \$1,173. Insured with Phoenix of London \$2,000, Springfield \$1,500, Employers' Liability \$1,500. Cause, tank boiled over. Adjusted by J. S. Rankin, Vancouver.

Toronto.—Southeast corner Adelaide and Yonge Street. Loss, Mr. Davidson, building, \$600. Imperial Optical Company, loss \$2,000. Insured in Home, Phoenix of London, Equity. Fully insured. Dr. Thompson, loss \$125. Insured with Scottish Union and National. National Casket Company, planing mill and dry kiln. Loss \$25,000. Insurance \$18,000 on destroyed property, London and Lancashire \$13,500, Norwich Union \$10,000 remained among twenty-four other companies. No interference with business. Insurance adjusted by Ross and Wright, Toronto.

Truro, N.S.—October 21.—Business block. Loss, Estate of J. H. McKay, \$2,754. Insurance, building, Scottish Union \$2,000, London Mutual \$1,000, Fidelity \$2,000, Hudson \$1,800, Sun \$1,000, Etna \$400. Madam Lunn, Milliner. Loss, stock \$3,000. Insurance, \$3,000 New York Underwriters' Agency. Mr. W. Rogers, barber. Loss \$75. Insurance, Dominion \$400. Mr. E. G. Moxon, druggist. Loss \$2,108. Insurance, North British and Mercantile \$1,000, Dominion \$500, Canadian \$1,000. Mr. D. A. Tattie, pressing and cleaning. Loss \$25. Insurance, Sun \$50. Mr. J. E. Sponagle, photographer. Loss \$700. Insurance, Mutual \$400, Royal \$300. Mr. R. A. Tremain, barrister. Loss \$105. Insurance, Nova Scotia \$500. Mr. G. B. Vernon, barrister. Loss \$50. No insurance. Pitwich Brothers, confectioners. Loss \$250. No insurance. Truro Cornet Band. Loss \$15. No insurance. Shamrock Club. Loss \$10. No insurance.

Halifax, N.S.—October 3.—Messrs. Courtney and Company. Loss, stock \$1,068, buildings \$815, fixtures \$127. Insured in following companies:—Stock, Law Union and Rock \$2,000, Acadia \$3,500, Northern \$2,000, Phoenix of Hartford \$1,000, German-American \$2,000, Dominion \$5,000, London Mutual \$2,000, London, Lancashire and Globe \$2,000, Caledonian \$3,000, Springfield \$1,000, Fidelity Phoenix \$2,000, New York Underwriters \$2,000, South American \$2,000, National of Hartford \$3,000, Union \$1,000, British American \$1,000; total, \$35,500. Buildings, Yorkshire \$1,000, Commercial Union \$2,000, Nova Scotia \$10,000, Queen \$5,000, General \$2,000; total, \$20,000. Fixtures and furniture, Phoenix of London \$2,000, Queen \$1,000. Cause, probably defective wiring.

Vancouver, B.C.—September 23.—Vancouver Lumber Company, kilns. Loss, stock \$4,000, buildings \$16,000. Insurance \$18,500. Cause, spark from burner.

Vancouver, B.C.—October 5.—Mrs. Bestland's furniture shop, owned by Mrs. Moore. Loss, building \$450 (\$100 on Mrs. Moore's furniture); stock \$825. Insurance, building, Caledonian \$4,000, household furniture \$1,000; stock, Phoenix of London \$6,000, Royal \$2,000, Northern \$2,000, London and Lancashire \$1,000. Cause, spontaneous combustion in pile of mattresses. In this fire only a small quantity of goods were actually burnt, damage by smoke and water \$2,738. Loss paid 30 per cent. \$821. Adjusted by J. S. Rankin, Vancouver.

Vancouver, B.C.—October 8.—Mr. S. Beaumont's business block. Loss, building \$5,500. Mr. S. Marsden, groceries, \$250; fixtures, \$35. Insurance, building, Hartford \$5,000. Grocery, Ontario, \$1,200; fixtures, \$250. Cause, bake oven in basement. Adjusted by J. S. Rankin, Vancouver.

Vancouver, B.C.—October 15.—Niles J. Sterner's millinery store, owned by Messrs. Powers and Boughton. Loss, contents, \$430; fixtures, \$35. Insurance on contents, Commercial Union, \$1,200; fixtures, \$300. Adjusted by J. S. Rankin, Vancouver.

Starting November 8, grain will be shipped to Minneapolis and St. Paul from Western Canada at the same rate that now prevails to Fort William and Port Arthur. This concession means much to Southern Saskatchewan.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Magrath, Alta.—Until November 20th for \$11,000 5 per cent. 20-year local improvement debentures. M. Godfrey, secretary-treasurer.

Calgary, Alta.—A by-law for constructing an extension to the present water system, involving the expenditure of \$90,000, was carried.

Transcona, Man.—Until November 15th for \$120,000 5 per cent 20-year school debentures. J. W. Gunn, Sr., chairman of School Board.

Peterboro, Ont.—The by-laws to authorize the outlay of \$20,000 to purchase a site for the De Laval Dairy Supply Company were carried.

Brantford, Ont.—The by-laws to issue \$115,000 debentures and authorizing a contract with the Hydro-Electric Commission, were carried.

Penetanguishene, Ont.—Until November 5th for \$15,000 5 per cent. 20-year debentures, guaranteed by the County of Simcoe. W. H. Hewson, town clerk.

Yorkton, Sask.—Until November 12th for \$207,000 5 per cent. 10, 20 and 30-year debentures. T. F. Acheson, secretary-treasurer. (Official advertisement appears on another page.)

Athabasca Landing, Alta.—Until November 25th for \$80,000 5½ per cent. 25-year waterworks debentures. C. E. Nancekivell, secretary-treasurer. (Official advertisement appears on another page.)

South Vancouver, B.C.—The council has decided to submit a by-law to the people in January to raise \$24,000 to pay an account submitted by the B.C.E.R. for switching and replacing their tracks on streets.

Nokomis, Sask.—Until November 30th for \$5,000 sink, and \$5,000 street debentures; interest 6%; maturing in 20 years. N. A. Armour, secretary-treasurer. (Official advertisement appears on another page.)

Battleford, Sask.—The burgesses of Battleford passed a by-law for the purpose of purchasing \$40,000 worth of stock of the Laurentia Milk Company, thus securing a factory, together with the head office of the concern.

North Vancouver, B.C.—Until November 13th for \$169,000 5 per cent. 50-year streets, sidewalks, park and schools debentures; and \$61,823 5 per cent. 20-year local improvement debentures. John G. Harmer, C.M.C.

Biggar, Sask.—Until November 11th for \$12,000 30-year 5½ per cent. grading, and \$12,800 30-year 5½ per cent. waterworks debentures. H. P. Turner, secretary-treasurer. (Official advertisement appears on another page.)

Outlook, Sask.—Up to November 25th for local improvement debentures (cement sidewalks), \$31,000, 5 per cent., 20 years, and \$15,000 electric light debentures, 5 per cent., 30 years. Albert Moore, secretary-treasurer, Outlook.

Rapid City, Man.—The by-law which provided for the issue of \$12,000 debenture stock for the purchase and erection of a complete medium electric plant by the British-Canadian Engineering Supply Company, was carried.

Tilbury, Ont.—The ratepayers endorsed a by-law to grant a loan of \$2,000 to Mr. Samuel Mather to assist in rebuilding the grist and flour mill that was burned last July. The loan is repayable in ten equal annual instalments without interest.

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C.

Melville, Sask.—Until November 11th for \$55,000 5 per cent. 40-year town hall; \$6,000 5 per cent. 6-year mill loan; and \$43,300 5 per cent. 30-year debentures. Fred H. Clarkson, secretary-treasurer. (Official advertisement appears on another page.)

North Vancouver, B.C.—The ratepayers of the city may be asked to vote more than half a million dollars next month. The Second Narrows Bridge Loan by-law for \$150,000 and the ferry by-law for \$294,000 have already been considered by the city council and await only the formal passage of the preliminary readings. At the last council meeting an application was received from the school board for the presentation of a school by-law for \$75,000, making a total of \$519,000.

WESTERN CANADA

MORTALITY IN LIFE INSURANCE

Threshing Progressing Satisfactorily—Medicine Hat's Industrial Growth—Public Utilities

Medical Science and Conservation Methods—Elimination of Restrictive Clauses—Ratios Are Misleading

(Staff Correspondence).

Medicine Hat, October 26th.

Between Moose Jaw and Medicine Hat a good deal of threshing still remains to be done, but with another week or ten days of good weather threshing should be fairly well completed. The crop is better in every way than expected and is grading well. Branch bank managers are well pleased at the outlook and have been sending in very favorable reports to head offices.

Splendid tracts of irrigated land are now to be had in the vicinity of Medicine Hat at reasonable prices and some excellent crops have been grown on irrigated land this year. Reports from the Dry Farming Congress at Lethbridge are most encouraging and favorable to Alberta farmers, the first prize for the best bushel of wheat grown in the world being awarded to a farmer at Raymond, Alta.

A feature noted through many parts of Saskatchewan and Alberta was storage facilities provided by the farmers themselves. If this plan were adopted generally it would relieve the congestion on the railways each fall. The railways have put forth every effort in the past couple of years to cope with the situation, but with the present system congestion is bound to occur and will grow worse each year until some plan of storage such as this is adopted.

Industries are Numerous

Medicine Hat's progress is marked, and a police census just completed shows a population of 11,086, or about 6,000 more than the Dominion census gave the city last year.

This rapid increase is remarkable, but when it is taken into consideration the large number of new industries that are locating at Medicine Hat the figures given for population can be understood. The following industries are in operation already: The Alberta Clay Product Company, employing 200 men; the Alberta Iron Rolling Mills Company, employing 100 men; the Alberta Foundry Company, employing 50 men; the Alberta Linseed and Oil Mills Company, employing 30 men; the Preston Planing Mills, employing 50 men; the Medicine Milling Company, employing 75 men; the Rosary Floral Company, employing 20 men; the Medicine Hat Coal Company, employing 50 men; A. P. Burns Construction Company, employing 50 men; the International Supply Company, employing 50 men; the Medicine Hat Porcelain Company, employing 65 men; the Alberta Glass Company, employing 50 men; the Ogilville Milling Company, employing 100 men. In the course of construction, the Medicine Hat Steel Company, to employ 100 men. And besides these the Ontario and Manitoba Flour Mills Company are establishing a 3,000-barrel mill and the Maple Leaf Flour Mills are to build a 6,000-barrel mill.

City Makes Concessions

The city makes concessions to industries locating there; sites and natural gas, etc., being provided.

Medicine Hat is the headquarters of the Southern Alberta Land Company, who have an irrigation tract of 400,000 acres of land which they are now offering for sale.

The city of Medicine Hat owns and operates all its own public utilities, and as a result has a very low tax rate.

The real estate situation is not overdone except in the case of a few far out subdivisions. Otherwise, prices are reasonable and the city presents a good field for investment. —G.W.G.

The capital stock of the Collingwood Packing Company, Limited, has been increased from \$100,000 to \$300,000.

The Detroit Life Underwriters' Association recently held its opening meeting of the season. President H. Wibirt Spence in a few brief remarks introduced Professor J. A. Jackson, instructor of agents of the Mutual Life. Mr. Jackson handled the subject "Mortality in Life Insurance" in a concise manner. He explained the mortality tables and mortality savings. He said that it was an erroneous impression that the difference between the actual and expected experience was all mortality savings for the policyholders who are expected to die in any year, but do not and are still with the company and the reserve on their policies must be provided for as they must be paid some time. This must be deducted from the difference between actual and expected losses and the balance is the mortality savings.

While modern medical science and conservation methods have apparently reduced the death rate, yet this is more apparent than real. Most of this saving is among children, where much has been accomplished in the saving of lives, but on the other hand the companies are called upon to pay many claims for which they were formerly not liable.

Restrictive Clauses as to Travel, etc.

The suicide clause, formerly in use, has been eliminated and there are also more suicides than formerly. Then the elimination of restrictive clauses as to residence, travel, etc., has had its effect and many claims are now paid that were heretofore rejected. This condition, however, is not to be deplored for it is the business of life insurance to pay death claims. All things considered, therefore, he saw no indication that a new mortality table would soon be substituted for those now in use nor could he see the need of one. The benefits of medical examinations will have disappeared in five years after policies are issued. The law of New York assumes in the select and ultimate valuation table that the actual mortality during the first year will be 50 per cent., the second year 65, and so on until after the fifth when it equals the expected. The experiences of two leading companies, one writing participating and the other non-participating insurance, which were recently published show a ratio of actual to expected mortality of 96 and 98 per cent.

Might Have Smaller Mortality Savings.

Ratios are misleading and as between companies unfair. They do not measure results accurately. This he illustrated by figures on a blackboard, making some hypothetical cases of four companies of the same age and the same amount of insurance in force, but having most of their business on different plans. One having most of its business on the ordinary life plan with a ratio of 80 would save \$138,687 on mortality, another with its business largely on the ten payment life plan with a ratio of 70 would save \$122,918. A third, with a large proportion of ten year term insurance and a ratio of 82 would show a saving of \$146,160, while the fourth having a large fifteen year endowment business on its books and a ratio of 65, would show a saving of \$129,643. By these figures Mr. Jackson showed that a company with a ratio of actual to expected mortality lower than others might have a smaller mortality savings.

The number of directors of the Canada Refining and Smelting Company, Limited, has been increased from five to eleven.

The Provincial Securities Company, of Regina, is amalgamating with the Sterling Trusts Company of that city.

BORROWING AND BORROWING POWERS OF BURNABY

The accompanying table sent to The Monetary Times by Mr. W. Griffiths, comptroller of the Municipality of Burnaby, B.C., shows the borrowing powers of that corporation together with the amounts actually borrowed during the years 1908 to 1912 inclusive. Taking the entire issues of 1912, a margin of \$2,403,547 for borrowing purposes, so that 58.25 per cent. of the borrowing power is still available. This shows the municipality to be in a strong financial position. The financial policy of Canadian municipalities should be conducted with conservatism.

Year.	Assessment.	Maximum borrowing Powers.	Amount actually borrowed.	Less school loans.	Net debenture debt.	Available margin.
1908	\$1,663,685	\$332,737	\$47,500	\$12,500	\$35,000	\$207,737
1909	4,757,217	951,443	197,500	12,500	185,000	766,443
1910	10,189,610	2,037,920	236,650	29,000	207,650	1,830,270
1911	18,520,414	3,704,083	1,287,150	113,500	1,173,650	2,530,433
1912	20,635,985	4,127,197	1,912,150	188,500	1,723,650	2,403,547

OBTAINING FARMERS FOR NEW BRUNSWICK

Co-operation of Canadian Pacific Railway—Natural Gas Proposals—Construction and Transportation Interests

(Special correspondence.)

St. John, October 29th.

The Canadian Pacific Railway will co-operate with the government of New Brunswick in securing settlers from the old country for vacant farms in the province. During the present year the railway company has established a big demonstration farm in the province, and will send experts both in farming and forestry to look over the lands along its lines with a view to utilizing its splendid organization in the old country to direct farmers with some capital to these lands. The provincial government's ready-made farm scheme is now in operation, and quite a number of applications have been received and several farms have been disposed of on the very favorable terms which the government offers.

The potato crop of New Brunswick is large and the price to the farmer varies from 90c. to \$1 per barrel. Many fields of oats failed to ripen and were cut green. The root crop is fairly good. There will be a smaller percentage of No. 1 hay than usual because of the wet season. Apples are a fairly good crop. As a whole the harvest in the province is not up to early expectations.

Lumber and Construction.

About 110,000,000 feet of logs will be cut on the head waters of the St. John this winter, but a large portion of this will be sawed at Van Buren, Maine. On the Miramichi, the Miramichi Lumber Company have signed contracts for 35,000,000 feet and will buy another 5,000,000 feet. Most of their cut, however, is pulp wood. Because of the very high rate of ocean freights, large quantities of manufactured lumber will be held over on the Miramichi this year; but it is expected a good deal will be shipped by the winter steamships from St. John.

General construction work in the province continues active. The St. John Railway Company will extend its line toward East St. John, and is also erecting an enormous chimney and preparing to put in boilers, engine and generator to enable it to provide more power for manufactures at its reduced schedule of rates. Work is progressing on the foundation of the new Canadian Pacific Railway elevator, and on various large building contracts in the city.

Supplies of Natural Gas.

Arrangements are being made to have natural gas piped to Sackville next spring, and the directors of the Maritime Oilfields, Limited, have had a conference with the St. John city council relative to having this city supplied from their wells, either those in Albert County, 79 miles away, of which only one out of seventeen is now being utilized to supply the city of Moncton, or to get St. John supplied from wells which they hope to locate within 40 miles of the city. The town of Woodstock anticipates a very active growth as a result of the location of railway shops at that point, in connection with the St. John Valley Railway and the St. John and Quebec Railway. Coal is now being shipped from the mine opened by Sir Thomas Tait's company in Queen's County, and is of excellent quality. The branch railway to these mines will not be completed in December as was expected.

Business of Ports.

The winter port business at St. John this winter is expected to be heavier than that of last year. The Canadian Pacific Railway will have 11 more steamship sailings than last winter, and other lines are also expected to do a larger business. Preparations are being made to handle a larger traffic. The passenger business is also expected to show an increase.

During the past summer the Canadian Pacific Railway had two steamers running daily between St. John and Digby. Both the freight and passenger business between St. John and Nova Scotia by way of the bay route have increased during the past year. Mr. W. Burton Stewart, general manager for Norton Griffiths and Company, Limited, said last week on his return to St. John from the west, that the outlook for the establishment of a steel plant at St. John was bright and he expected to be able to make an important announcement in two or three weeks.—M.O.M.

In order to aid the settler, the British Columbia government has announced that in future it will make free grants of stumping powder to the farmers to aid them in clearing their land and is also considering the giving of a direct grant to aid in the work.

REVIEW OF THE MONTH

Flotations in London—Investment Offerings—Dividend Changes

DIVIDEND CHANGES

The first payment of 1½ per cent. quarterly dividend has been declared payable on November 1st on the common stock of the Monarch Knitting Company.

The Bank of Commerce directors have declared a bonus of 1 per cent., payable along with the regular quarterly dividend of 2½ per cent. for the final quarter on December 1.

The first payment of the Hollinger Mines dividend, which amounts to 3 per cent. to be paid every four weeks, is to be made November 2nd to shareholders of record, October 25th.

The Bank of Montreal, in addition to the forthcoming regular quarterly dividend of 2½ per cent., has declared a second bonus of 1 per cent., making the full payment for the twelve per cent. The first bonus was declared payable, with the second quarterly dividend paid on June 1. The present dividend is for the quarter ended October 31st, and is payable on December 2nd to holders of record October 31st.

A dividend at the rate of 6 per cent. was declared on the stock of the Brazilian Traction Company for the quarter ended September 30th.

CANADIAN FLOTATIONS IN LONDON

The following flotations of interest to Canadians were made in London during October:

Canadian Northern Railway Company.—£2,057,612 5 per cent. income charge convertible debenture stock at 106.

Anglo-Canadian Lands, Limited.—£80,000 6 per cent. first mortgage debenture stock at 98.

Edmonton, Dunvegan and British Columbia Railway.—£700,000 4 per cent. debenture stock at 94½.

British Columbia Breweries, Limited.—£565,843 6 per cent. 20-year first mortgage gold bonds at 95, and £16,973 common stock at 15.

The following flotations were made during September:

Moose, Jaw, Sask.—£250,000 treasury bills.

Shawinigan Water and Power Company.—£1,000,000 common stock at 120 per share to shareholders.

NEW LISTINGS

The Montreal Stock Exchange has listed 1,000 additional shares common stock of the Canada Car and Foundry Company.

Seventy-five hundred additional shares of the preferred stock of the Spanish River Pulp and Paper Company have been listed on the Montreal Exchange.

Ninety-five millions of Brazilian Traction, Light and Power securities have been listed on the Toronto Exchange.

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were among those made in Canada during October:—

Canadian Cottons, Limited.—\$1,000,000 5 per cent. first mortgage bonds at 86.

Dominion Roofing Manufacturing Company, Limited.—\$30,000 7 per cent. preferred stock at par with 25 per cent. bonus of common stock.

Standard Development Company, Limited, Bowmanville, Ont.—\$20,000 stock at par, \$100 per share.

Bell Telephone Company of Canada.—Unsold balance of \$1,750,000 5 per cent. bonds at 101.

Metropolitan Moving Pictures, Winnipeg.—Offering of shares at par (\$1).

Riordon Pulp and Paper Company, Limited.—\$500,000 of the unsold balance of \$1,500,000 6 per cent. first mortgage sinking fund bonds at par.

Dominion Sewer Pipe Company, Limited.—6 per cent. first mortgage sinking fund gold bonds at par.

Calgary Power Company.—\$150,000 5 per cent. first mortgage 30-year sinking fund gold bonds at 92½.

Polar Ice Company, Moose Jaw.—Offering of capital stock at par, \$100 per share.

Floor and White, Limited, Winnipeg.—\$43,500 10 per cent. cumulative preference stock at par.

Phillips Place Syndicate.—Offering of \$170,000 stock.

Sanol Manufacturing Company of Canada, Limited.—\$80,000 capital stock. Par value of shares \$100.

Chadwick Brass Company.—\$250,000 6 per cent. first mortgage 25-year sinking fund gold bonds at 97½.

Charles Dalton Fox Ranch, Charlottetown.—Offering of shares at \$100, par value.

OCTOBER FIRE LOSSES

Are Nearly One and a Half Million Dollars—Twenty-one Deaths Reported

The Monetary Times' estimate of Canada's fire loss during October amounted to \$1,416,218, compared with September loss of \$883,949 and \$580,750 for the corresponding period last year. The following is the estimate of September losses:—

Fires exceeding \$10,000	\$1,054,400
Small fires	177,094
Estimates for unreported fires	184,724
	\$1,416,218

The following are the monthly totals of the losses by fire in Canada compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$1,275,246	\$2,250,550	\$3,002,650
February	750,625	941,045	1,640,153
March	1,076,253	852,380	2,261,414
April	1,717,237	1,317,900	1,355,055
May	2,735,536	2,564,500	2,251,815
June	1,500,000	1,151,150	4,229,412
July	6,386,674	5,384,300	1,741,371
August	1,667,270	920,000	1,164,760
September	894,125	1,123,550	883,949
October	2,195,781	580,750	1,416,218
November	1,943,708	1,506,500	
December	1,444,860	2,866,950	
Total	\$23,593,315	\$21,459,575	\$19,946,797

Large Fires.

The fires at which loss was estimated at \$10,000 and over were as follows:—

Longue Point, Que...	C.N.R. round-house	\$ 10,000
High River, Alta. ..	Implement warehouse	19,000
St. John, N.B.	Lumber mill	20,300
Winnipeg, Man.	Clubhouse	100,000
Winnipeg, Man.	Steamer	20,000
Lindsay, Ont.	Lumber mill	20,000
Victoria, B.C.	Garage and automobiles ..	10,000
Truro, N.S.	Business block	10,000
Hanley, Sask.	Business section	50,000
Penetang, Ont.	Planing mill	10,000
New Westminster, B.C.	Lumber mill	75,000
Almonte, Ont.	Shoddy mill	25,000
Galt, Ont.	Robe factory	110,000
Winnipeg, Man.	Steamer, &c.	127,000
Sackville, N.B.	Conflagration	60,000
Halifax, N.S.	Business section	52,500
Moncton, N.B.	Lumber mill	160,000
Vancouver, B.C.	Lumber kiln	20,000
Winnipeg, Man.	Greenhouses	10,000
Gatineau Point, Que.	Business section	53,000
Tilsonburg, Ont.	Packing house	40,000
Princeton, B.C.	Lumber mill	12,000
Grassy Lake, Alta. ..	Stores	15,000
Toronto, Ont.	Planing mill, &c.	25,600

The structures damaged and destroyed were 54 residences, 24 barns, 16 stores, 8 each business sections, hotels, 6 stables, lumber mills, 4 schools, 3 apartment houses, repair shops, 2 warehouses, planing mills, apple evaporators, brewers, garages, packing houses, 1 furniture factory, cheese factory, foundry, shoddy mill, steel works, grandstand, boiler house, pump works, round-house, tool-house, town hall, picture theatre, poolroom.

There were 700,000 feet of lumber destroyed, 12,000 pieces of barrel heading, 5,000 bushels of wheat, 112 tons hay, 40 tons millet, 30 each pigs, sleighs, 16 automobiles, horses, 12 cars binder twine, 5 each gasoline launches, 4 locomotives, 3 each steamers, boats, 2 each cows, barges, 1 each tent, construction car, wagon, buggy, separator, tug boat.

Of the presumed causes, 10 were attributed to sparks, 9 incendiary, 5 each children and matches, defective chimneys and flues, 4 each hot ashes, electrical defects, 30 each matches, gasoline, gas jets, 2 each lightning, defective pipes, smoking in bed, upset lanterns, gas explosions, spontaneous combustion, defective furnaces, ovens, defective stoves, 1 each heat from boiler, rats, range fire, coal tar tank blistering, overheating tar kettle, paper set alight, candle, upset lamp, coal oil stove.

The number of deaths from fire is 21, making 153 for the first ten months of 1912.

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912
January	27	27	27
February	15	12	11
March	20	18	24
April	37	20	15
May	15	28	18
June	52	13	6
July	15	110	9
August	11	22	16
September	10	13	6
October	16	17	21
November	19	20	..
December	19	17	..
Total	256	317	153

The fires at which fatalities occurred were as follows:—

St. Bernard, Que.	Upset lamp	10
Swan Lake, Man. ...	Burning tent	2
Stratford, Ont.	Clothing set alight	1
Newmarket, Ont. ...	Coal oil explosion	1
Woodstock, Ont. ...	Burning building	1
Three Rivers, Que. ..	Burning steamer	1
Haileybury, Ont.	Clothing set alight	1
Fort William, Ont. ...	Burning building	1
Aylmer, Ont.	Clothing set alight	1
Winnipeg, Man.	Clothing set alight	1
Toronto, Ont.	Clothing set alight	1

21

PERSONAL NOTES

Mr. M. J. Butler has resigned his position as general manager of the Dominion Steel Corporation.

Mr. R. M. Aitken, of Messrs. Kitcat, Aitken and Company, the well-known London financial house, is in Canada.

Mr. J. F. Brooks, formerly general agent for the Continental Life, has been appointed provincial manager for the company in Manitoba.

Mr. F. Perry, Canadian representative of Messrs. Lazard Freres, a well-known financial house of Paris, London and New York, is visiting Western Canada.

Colonel James Mason, general manager of the Home Bank of Canada, has returned to Toronto after a business trip in Western Canada and British Columbia.

Mr. T. H. Miller, of the head office staff of the Trusts and Guarantee Company, Limited, has been appointed manager of the company's branch at Brantford, Ont.

Mr. E. Tichener has been appointed superintendent of agencies of the Western Life Assurance Company, Winnipeg. Mr. Tichener was formerly with the Prudential, of Newark.

The Hon. A. O. Crichton has been appointed manager of Messrs. C. Meredith and Company's London office. The Hon. Lionel G. Guest, who was until lately manager, is taking up a partnership in the London Stock Exchange firm of Messrs. Williams, de Broe and Company.

Mr. Henry Mann, secretary of the Commercial Union Insurance Company, of London, England, is investigating Canada's possibilities for the purpose of probably increasing his company's investments in the Dominion. Mr. Mann recently visited Victoria, accompanied by Mr. James McGregor, of Montreal, the general manager of the company's affairs in Canada. The Commercial Union Company, which has an income of \$35,000,000 and assets of \$110,000,000, already has Canadian branches in Montreal, Ottawa, Winnipeg, Regina, Edmonton, Saskatoon, Calgary, Vancouver and Victoria. Mr. Mann joined the company's service in 1876 and was appointed general secretary in 1889. Mr. McGregor has been general manager of the company's business in Canada since 1888.

BURT COMPANY TO ISSUE MORE STOCK

The directors of the F. N. Burt Company will ask the shareholders to authorize an increase of \$500,000 in the preferred capital stock of the company. A meeting of shareholders has been called for November 15th. There is outstanding \$2,140,200 preferred stock, and a balance of \$69,800 is still unissued. This balance will be issued at the same time as the half million new stock. The new preferred stock will be issued to shareholders at par. The total preferred issue of the Burt Company will then be \$2,750,000.

The new stock is to be issued for the purpose of providing for expansions to the plants at Toronto and Buffalo, which are now nearly completed.

CANADIAN BANK INSPECTION

Appointment of Auditors—Suggested Scope of Their Duties—Inspection in the United States

III.

BY W. W. SWANSON,

(Department of Political and Economic Science, Queen's University, Kingston, Ont.)

The Canadian Bankers' Association is an incorporated body with extensive powers and duties prescribed in the Bank Act of 1890. Each chartered bank is represented in the membership and has one vote. As the banks have already been entrusted with wide powers it would seem but logical to impose upon them also the duty of safeguarding the financial interests of the nation as a whole, as far as the additional obligations exacted of them are reasonable and wise. This is seen from a study of the nature of the Association itself.

There is a solidarity, a unity, in the Canadian banking system which places a great responsibility upon the banks as they are at present constituted. This solidarity has come about both as a growth, a natural process of evolution, as well as by the positive enactments of law. As lenders of capital they are competitive institutions and act as independent units. So, too, the branches of each bank exercise a great deal of independence. Each branch manager exerts all his energy to the upbuilding of commercial and industrial enterprise in his locality, for by the growth of the local business is his success measured.

Check Undue Speculation.

Nevertheless, from a national point of view, despite the competition among the banks and their branches, there is good reason for regarding them as a financial unit. This is readily seen when the following facts are considered: (1) Over fifty per cent. of the banking business in Canada is done by six banks, and of this business the Bank of Montreal, the Bank of Commerce and the Royal Bank do the greater share. (2) The Bankers' Association is a medium through which the best banking opinion finds authoritative expression. (3) Bank managers reach their position by a thorough training under experts; hence no manager will venture far upon a policy which is considered dangerous by his competitors. (4) The banks are all interested in the unbroken commercial prosperity of the country, and realize that undue speculation in any part of the country will entail loss upon all. (5) On account of the mutual interdependence of the banks, no bank can hope to achieve success by embarking upon a policy that is frowned upon by the bankers of the nation. The business community as a whole has confidence in the judgment of the leading banks, and to maintain its standing each bank must therefore pursue a conservative policy. (6) The banks insist that a man shall borrow only from one institution. This certainly makes the banks, at least from the borrower's point of view, a single institution. (7) There is a well-informed "bankers' opinion of business conditions and the financial outlook, due to the exact knowledge secured from all parts of the country through the branches, of general conditions. While there is frequently a distinct line of cleavage in the United States between the East and the West in regard to financial policy, there is practical unanimity in Canada. Hence the bankers of Canada can and do face any common peril with united forces.

What the Auditors Should Report.

When these facts are carefully considered it will be evident that the bankers are interested in the success of the system as a whole, and that upon them lies the duty of making it safe. To that end they should appoint, through the Bankers' Association, a board of auditors to supervise the accounts of all the banks of the country. In appointing this board, each general manager must have one vote. It is not the purpose of this paper to enter into details as to how the board should be constituted; its duties need be outlined only in a general way: The board of auditors should consist of sufficient numbers to carry through properly the work to be done. Its members must be men of experience belonging to some recognized institute of chartered accountants. These auditors, in order to verify the annual statement made by the bank to its shareholders and incidentally to the public depositors, should make an examination of the books, accounts, and vouchers at the head office of the bank; and should also examine such important branch offices as might seem to them desirable. The auditors should also report upon:

(a) Whether in their judgment the inspection of the branches is regularly and effectively performed by the bank's regular inspectors.

(b) Whether the general supervision of the loans and investments seem to be thorough.

(c) Whether they have obtained all the information and explanations they have required from the bank's officials.

(d) Whether, in their opinion, the balance sheet laid before the shareholders of the bank in general meeting, gives fair and conservative view of the bank's affairs.

In addition each auditor should be required to pledge himself to secrecy concerning any information he might acquire concerning the affairs of any bank or its clients; and should also bind himself not to reveal any information save in compliance with the provisions of the law.

Mr. D. R. Wilkie has strongly opposed this plan. He says:

"It would be unreasonable to hold the Association as a whole responsible for the reputed solvency and worthiness of its members. Moreover, no bank under present conditions of competition, with the readiness of some to retire from business, and of others to add to their size and importance, with mergers and amalgamations following one on the heels of another, should be called on to place its affairs under the review of officials appointed by rival institutions. One can imagine what might happen to even a sound institution whose business and connections were coveted by a bank more influential than itself in the councils of the Association. The very proxies given to directors to assist in carrying on a bank might be used to destroy its separate existence. Mergers may even throw the control of the Association into comparatively few hands."

Methods in the United States.

Mr. Wilkie's position and experience, as well as his acknowledged ability as a financier, require that his views be given the most careful consideration. But it is evident that his statements here can be easily refuted. In the first place, it is just to hold the Association, at least in part, responsible for the safe conduct of Canadian banking for the good and sufficient reason that it has already been given wide powers over a system which may in many ways as pointed out, be regarded as a unit. In the second place, Mr. Wilkie's fears that the larger banks would exercise undue control appear to be groundless, if each bank is to be given an equal voice in the operation of the plan; just as the little State of Nevada has a vote equal in power to that cast by the great and powerful State of New York in the Upper House of Congress. In the third place, there need be no divulgence of the private business of the bank or its clients, unless the business is of such a nature that it ought to be exposed. This is in accordance with the methods followed by the clearing house examiners in the United States, as will be shown later in this study.

On the other hand, it cannot be too strongly urged that these measures can only be supplementary to the present policy of internal bank inspection. To depend upon external examination alone, whether by the Government or by the Bankers' Association, would tend to reduce the best managed to the level of the worst managed bank, and to remove the premium on skill, honesty and ability. For, apart from fraud and stealing, what is bad banking? Clearly, it is the lending to favored, or inside parties, and the inability to know good from bad paper, and "quick" from tied-up investments. Every conceivable reward should exist to bring pressure on a banker to decline questionable loans. The moment such pressure is removed, the opportunity is enlarged for taking on assets, which, at the first real emergency, will crumble in value, and leave the depositors unsecured even by long and difficult liquidation.

Responsibility of Bankers.

Therefore, to relieve the banker from the logical consequences of his own mistake, of his own weaknesses, is to take away practically the only real safeguard effective on human nature in a business touching the trusts of countless financial interests. To relieve the banks from conducting a system of internal inspection on their own initiative would put a premium on the popular banker, as against the careful and judicious banker. It would spread throughout the country the influence of men who care more for bigness than for safety in their accounts; and build up credit unsupported by legitimate trade. It would induce in the end financial disaster proportional to the extent of the doubtful banking. It is unjust to ask the efficient banks to bear the responsibility of losses by the inefficient which would be the result if the bankers themselves were relieved from the responsibility of supervising their own business by internal examination, and sole dependence were placed upon external examination of any kind.

In conclusion, it is well to draw attention to the fact that in the United States the bankers have voluntarily adopted a system of mutual supervision of banks quite apart from, and outside of, external inspection by the Government. This is important, for it affords a precedent in part at least for the plan outlined above. The banks recognize that this voluntary inspection is a duty which they owe themselves, as well as the general public. The bankers have realized too, that national bank inspections are not what they should be, for reasons already given—that appointments as inspectors are made for political, and not for expert, qualifications; and

that the fees, assignments, and frequency of examinations are not what they should be. The clearing house association in default of proper national inspectors, and also to aid in legitimate banking by state banks, and the trust companies clearing through their associations, have established inspection agencies of their own, which have proved remarkably efficient in preventing bad and speculative banking. The example was set by the clearing house association of Chicago, after the Walsh failure, and has been followed in many other cities.

Instances of Unsound Banking.

The object sought in establishing the office of clearing house examiner was to detect instances of unsound banking in any direction, to note duplications of borrowing by the same client at different banks, and to enable the clearing house to take preventive rather than remedial measures, by applying a remedy earlier than is possible by national or state officials; and by such early action to remove unwholesome conditions from any bank in the association. As no bank can be in an unsound condition without injury to the whole local banking community, the supervision of the clearing house is justifiable; and if such supervision is sufficiently close and all irregularities are promptly checked, it becomes possible to restore the confidence of the public, during any unwarranted run on an individual bank, by the announcement of clearing house support.

Panic is thus averted; and with the examiners' organization now existing it is practicable for the clearing house as a body to exercise such supervision of any weak bank as to amount to a virtual taking over of its management till it is again in a sound position. The examiner receives a fixed salary and his assistants are paid directly by the association, so that there is no handicap in the matter of compensation. He is free to spend as much time in any bank as he desires; the only limitation being that he must examine each bank once during each year. His reports are made in duplicate, one going to the bank examined, and the other being filed by him in the clearing house vault. The copy of his report on file is not accessible to any person or body, except the clearing house committee; and then only in such cases as he deems of sufficient importance to call to the committee's attention.

Success of Experiment.

This experiment has met with remarkable success. It does not attempt to eliminate the regular method of inspection, it merely supplements it. If American bankers through their associations have scored a brilliant success, the examiners showing prejudice toward none and justice to all, there can surely be no doubt that Canadian bankers, having in the main been trained in a wider field and carrying heavier responsibilities, will be equally successful in their efforts to place the banking business of the nation on a safe and sane foundation. The underlying principle in both cases is the same—home rule in banking. It centres about the strongest commercial motive—self-interest. It places the burden on the shoulders of those best able to carry it—the bankers of the nation. It avoids paternalism and any resemblance of corrupt political influence. It removes all hope of the shareholders making their private interests paramount to the public weal. It emphasizes the fact that if much has been given to our financial leaders, much of them must be required.

(Conclusion.)

WINTER NAVIGATION ON ST. LAWRENCE

The Dominion government should encourage winter navigation on the St. Lawrence by giving a subsidy to all steamers that will continue to use this route until January 5th, suggests Mr. E. C. Fry, Lloyds agent at Quebec.

"The United States subsidizes its shipping in order to encourage its promotion in every respect, and why should not Canada emulate the example?" said Mr. Fry.

"If the British Marine underwriters are reluctant to assume risks after November 25th because of their dread of ice floating in the river and gulf, they would soon be convinced that they are wrong, and if the underwriters then did agree to insure ships after November 25th, by charging an increased rate, the Dominion government, which is rich enough, could come to the rescue by making up the difference, thus relieving shipowners of the burden."

"Another thing that the British underwriter does not understand respecting late navigation of the St. Lawrence," said Mr. Fry, "is they fear that should a ship go ashore in the month of December the chances are that she would be a total loss and there would be no means of sending assistance with the river filling with floating ice."

"To disabuse their minds of that score, the Dominion government should make it known that there is ample means of assistance in such a case that could, and would, be rendered by the government ice breakers that would be sent to the rescue."

WORKMEN'S COMPENSATION IN ONTARIO

Thought That Government May Try State Insurance on Assessment Plan—Companies Object

In connection with the Royal Commission appointed by the Ontario Government to consider the question of compensation to injured workmen, the commissioner, Sir William Meredith, is visiting England and the continental countries to investigate on the ground the systems in operation in these countries.

A plan may be proposed by which all workmen sustaining personal injuries by accident, arising out of and in the course of their employment, will receive compensation, irrespective of who was to blame. A Workmen's Compensation Act of such a nature would be only similar to those adopted in the other Provinces throughout the Dominion, as well as in England.

There is a suggestion in the interim report of the Commissioner that the manufacturers of Ontario are favorable to a scheme of State insurance. The details are not disclosed, but the scheme would probably be operated on an assessment plan.

Paternalism of Government.

Commenting on this, Mr. Alex. MacLean, manager and secretary of the London and Lancashire Guarantee and Accident Company of Canada, says: "State insurance is a movement towards paternalism of government, more far-reaching than any economic measure heretofore proposed. The adoption of such a plan commits one to a principle, which, if carried to its logical conclusion, means that any or all commercial industries may properly be conducted by the government to the exclusion of private enterprises."

"It is for the government to decide as to what form of legislation to place on the statute books in respect to compensation to injured workmen. That is one thing, but for the government arbitrarily to fix the rates that the employer must pay for his protection is taking away the inalienable right to purchase insurance, or protection, at the lowest possible cost."

Eliminate Law Costs.

"Any legislation that will eliminate law costs and provide adequate compensation to the injured workmen will be gladly welcomed by the insurance companies. Let the government pass such an act, and if necessary see that the liability companies are subject to the closest government inspection so that no injustice will be done the employer in the fixing of rates. It will be found that there will be a better feeling between the employer and employee than if arbitrary rates are fixed by the government under a system of State insurance and injured employees are compelled to look directly to the government for compensation."

WORKMEN'S COMPENSATION IN CONNECTICUT

A bill for a workman's compensation law has been prepared for presentation to the general assembly. It has the approval of the State Federation of Labor. The bill creates a liability board of three members, not more than two of whom shall belong to the same political party to be appointed by the governor. This board is to classify employments with respect to their degree of hazard and determine the risks of the different classes and fix the rates of premium, also to establish a state insurance fund from premiums paid by employers and employees, the state treasurer to be the custodian.

An employer of five or more workmen who pays into the insurance fund the premiums provided shall not be liable to any damages, with certain exceptions stated in the bill. The employer pays 90 per cent. of the premium and the employee 10 per cent., which the employer is authorized to deduct from his wages. The board is empowered to disburse the fund to such employees in case of injury "not purposely self-inflicted received in the course of duty, or to their dependents in case of death."

An employer of five or more workmen who does not pay this premium shall be liable for damages in case of injury or death, and may not avail himself of the common law defence—fellow servant rule, assumption of risk or contributory negligence.

The bill provides a schedule of disbursements in case of injury or death. The maximum is \$3,400.

In his annual report to the Montreal board of control, Mr. E. O. Champagne, city boiler inspector, claims that while the necessity for legislation looking toward the installation and care of boilers was dealt with in his last annual report no action has as yet been taken by the corporation.

IRON AND STEEL PROTECTION

Deputation Asks Government for Permanent Policy of Adequate Tariff Assistance—The Arguments Advanced

An increase in tariff protection was the request of a deputation to the Dominion Government of the representatives of eight large iron and steel manufacturing establishments in Canada last week. They asked for a permanent policy of adequate tariff protection in preference to a temporary bounty renewal. They maintained that steel and iron interests were entitled to have as much protection as the other manufacturing interests of Canada, which now averages about 26 per cent., whereas the output of the iron and steel mills now has a protection varying from only 7½ to 20 per cent., according to the character of the product. The request was rejected two years ago, and action was deferred last session by the present government. Inasmuch as the product of the iron and steel mills furnishes the raw material for the bulk of Canadian manufactures the granting or the withholding of the request presented to-day is of importance to all manufacturers and consumers in Canada.

Abolition of the Bounties.

The memorial presented noted that the protection afforded the iron and steel industries consequent upon the abolition of the bounties was now quite inadequate to enable them to hold the business they had hitherto had with the assistance of the bounties. Wire rods, for instance, were entirely unprotected, and the industry was thus in an anomalous position as compared with practically all industries in Canada. Imports of iron and steel into Canada amounted to over eighteen million dollars, thus indicating ample field for the growth of the home manufactured product if present tariff discriminations and exemptions were removed.

Over twelve million dollars was paid by Canada under present conditions in wages for foreign workmen for iron and steel imported. Under a policy of adequate protection home manufacture would be encouraged and expanded with a resultant saving of this twelve millions for Canadian workmen. This argument was expanded with the statements in favor of a protective policy encouraging home industries. It was also urged that iron and steel manufacture had now little protection against the dumping of large quantities of iron and steel from the United States in Canada at or below the United States cost of production.

Is the Basic Industry.

The general argument of the deputation was summed up as follows:—"As to the view which the community may take if it is proposed to relieve one special trade from the disadvantages under which it labors while others with a similar claim to consideration are untouched, we would respectfully urge that the establishment on a sound footing of the great basic industries of iron and steel-making is universally regarded as one of the primary needs of the country and has been so considered by parliament for the past twenty-five years.

"We are of the opinion that the lowering of duties on iron and steel, which was made possible, or at any rate rendered less injurious, by reason of the bounties, the continuance of these duties at the lower rate when the bounties are gone, and the consequent inadequacy of protection afforded to these industries need only be made known to secure full support for any reasonable remedy from all who desire to see Canada prosper. We respectfully submit that the position of this industry in respect to the tariff and the competition to which it is exposed from countries laboring under great depression in the iron and steel trades justify us in asking special and immediate consideration from the government. The iron and steel industries of Canada have suffered during the whole of the past year under the inadequate protection above referred to, and unless some form of relief is given they must continue to suffer so that the development of the industry will be seriously retarded."

One of the Most Important Industries.

Interviewed after the deputation had finished its conference, Mr. Plummer said:—"We do not ask for high protection. We simply ask for a levelling of the duties where the government and its experts think they can reasonably stand it. We claim to be one of the most important industries of the Dominion, and yet we enjoy a far lower protection than the average enjoyed by other Canadian manufacturers. For instance, while the output of our mills has a protection varying from 7½ to 20 per cent., a large number of manufactures constructed from our steel are protected as high as 35 per cent. in some cases. We simply want the tariff arranged according to some reasonable principle so that we may be in a position to go on and develop our business and extend our plants."

CANADA'S GREAT NEED IS LABOR

Mr. A. W. Smithers Suggests That Governments Should Devise Scheme for Transference of Men—No Grand Trunk Board in Canada

"Canada requires more capital, but much more does she require additional labor," said Chairman Smithers, presiding at the recent meeting of the Grand Trunk Railway.

"It seems regrettable that the question of emigration has not been taken up by the British Government. I am certain machinery could be devised for the transference of British labor to Canada with excellent results, politically and otherwise.

"There's a passing danger in land speculation but nothing will stop, or permanently affect the progress of Canada as long as she produces from the earth at the existing rate, and sells at present prices.

Increased Emigration would not Depreciate Wages.

"I would urge the Dominion and Provincial Governments' necessity of encouraging emigration. There is an idea among many in the laboring population in Canada that increased emigration would depreciate the wages. This is utterly groundless. There would be towns springing up along lines, where none now exist.

"Emigration has been more prolific in Australia, where at the Labor party's bidding emigration was for a time discouraged, with the idea of keeping up the wages, but now the mistake of this has been seen and Australia is encouraging emigration, whole-heartedly, by competing with Canada for world's labor.

"Every thinking man knows the points between which the employer will pay more for labor or stop paying entirely, are very close, and such attitude among employers spread.

Only Prosper with Abundance of Labor.

"Labor can only prosper as long as Canada as a whole is prosperous. Canada can only prosper with abundance of labor."

Chairman Smithers also paid tribute to President Hays, who perished with the "Titanic," the same week as the last meeting was held.

"During the seventeen years connection with the late Mr. C. M. Hays with the company the value of its property increased over twenty millions sterling, apart from the new capital raised. All the capital of the Grand Trunk Railway has been raised in Britain and Canadians ought to realize the gratitude due to the Old Country on that account," said Mr. Smithers.

The proposal made from the body of the meeting that an advisory board be created in Montreal, was discouraged by Mr. Smithers.

The Grand Trunk Pacific, he said, had a board of prominent Canadians. When both lines were closely allied something in the way of a Canadian board might develop, but it was not advisable yet.

NEW FOREST RESERVE RECOMMENDED IN PRINCE ALBERT DISTRICT, IN SASKATCHEWAN

The Forestry Branch of the Department of the Interior has again, during the past summer, had parties out examining the timber on some of the regions still in the hands of the Dominion Government, with a view to reserving from settlement lands more suitable for forest growth than for farming. Some of these parties have finished the work assigned them and have made their reports.

Mr. C. H. Morse made an examination of a district north-west from Prince Albert lying between the Shellbrook branch of the Canadian Northern Railway (on the west) and the third Dominion meridian (longitude 106 degrees), and recommends that the tract between the meridian on the east and the Sturgeon River on the west should be made a forest reserve. This land is not pure sand, but has some stretches of sand among lands of better quality; none of it, however, can be classed as good agricultural land. At the present time this tract carries, in places, a good stand of spruce, as good a stand as will be found anywhere in the country. The reproduction of the forest is good, and this should make one of the most valuable forest tracts in the west. The rate of growth is good. As it is calculated that the present stand of timber, which is held under license, will be cut out in ten years, it will be seen that the necessity for looking for a future supply is close at hand.

The tract lying between the railway and Sturgeon River was found to be of good agricultural quality, and, as the timber is pretty well cut out, it was not considered necessary to recommend any further reservation beyond the time required for the removal of the present stand.

CO-OPERATION IN LIFE UNDERWRITING

Relations Between Home Offices and Field Workers— Life Underwriters Must Now be Expert

In order to achieve any really substantial success there must be confidence and co-operation between the home office and the field worker as well as decided ability and scrupulous integrity on the part of each. Company character in the life insurance business is just as patent and essential as "individual character." No difference how "high class" the company its experience with incompetent or unscrupulous agents is bound to be disastrous. No difference how "high class" the agent his experience with a company management not fully competent and not scrupulously honest is bound to be disappointing. The relations between the home office and the field worker should be close and cordial. Commendation when deserved should be given freely and promptly, one to the other, but flattery or favoritism should be tabooed. Commendation when deserved is appreciated and stimulates to greater efforts and enlarged results.

Knowledge Obtained of Difficulties.

The home office should be willing to modify or change a rule objectionable to the field worker if a better and equally safe way can be shown which will make the field worker's labors lighter, more efficient and remunerative. The field worker should be willing to modify or change methods objectionable to the home office if a better or equally satisfactory way can be shown which will lighten the home office's labors and safeguard better the interests of policyholders.

The company official who avails himself of opportunities to meet his company's representatives in their respective fields of endeavor acquires at first hand and short range knowledge of the difficulties to be met and overcome by the field worker, hardly possible to be so well obtained in any other way. Such an official, with such experiences, if competent and sympathetic and with plenty of red blood in his veins, understands and appreciates the needs of the field worker and is quick to meet them in every proper way in his power. He knows the field worker; the field worker knows him.

Underwriters Must be Expert.

When correspondence or conferences be necessary either to inaugurate new methods or improve old ones, they open their minds in each other with confidence and candor and promptly reach a satisfactory conclusion.

The time has arrived when the successful life underwriter must be an expert. He must establish himself in the minds of his clients and his competitors and his community as a worthy, qualified and unbiased authority upon life insurance. He must regard his chosen calling as highly as any of the other learned professions; he should endeavor to win similar recognition for it from others by deserving it. He must be willing to commend his worthy competitor and the merits of the policy contracts of competing companies. He must understand that he cannot sell all of the life insurance in his community and that to accept present defeat gracefully in a competitive case frequently means largely increased future business.

Upon Home Office Rests Responsibility.

In every community there are lawyers who stand at the head of the bar, doctors and surgeons admitted to be authorities upon that particular branch of their professions to which they have devoted their special study and research. The life insurance underwriter who does not aspire for a similar conspicuous place of honor in his chosen profession is not making the most of his opportunities.

It should not be forgotten that upon the home office rests the entire responsibility of the success of the company in all departments. This responsibility necessarily and properly carries with it the right to inaugurate and carry out policies of management designed to bring supporters, patronage and prestige to the company.

In all of these policies the field force should willingly and promptly co-operate unless and until changed or modified. The field force should make suggestions for the improvement of the company's plans where practical experience seems to show a better way, but remembering always that there probably was some good reason for the adoption of a policy and that the home office should have the courage to continue it unless a better one can be shown. The field worker should realize that a home office management which has the enterprise and justice to investigate and consider, the courage to decide and the "back bone" to execute, usually is one with which he well can afford to identify himself permanently and to which he safely may entrust his interests and those of his loved ones for whom he labors.

Too little attention is given usually to the new man and the part time man. Without any training or at least without

proper training many new men of promise are allowed to roam about by themselves helplessly, hunting for prospects to whom they do not know how to deliver their helpful message nor whose application they do not know how to secure. This should not be. The company or manager should teach the new man at least the rudiments of the business and show him by actual work in the field how to find a prospect and to secure his application. When, properly chaperoned by an experienced brother, he shall have found a prospect and secured an application he should be given a chance, if willing and confident, to "hoe his own row," but not until then.

Of course there come times when for good and sufficient reasons officials and field workers change companies. In such cases they should seek connections where they will be happy and where full scope will be afforded their abilities. As a matter of good practice in all such cases the agent should select his company—not let the company select him.

DIVIDEND CHANCES

The Monetary Times is compiling a list of dividend changes during 1912. Will those companies and institutions desirous of being included therein, kindly send data to Editorial Department, The Monetary Times, Toronto?

BANQUE INTERNATIONALE

The statement of the chartered banks of Canada for September shows that the Banque Internationale du Canada had total assets of \$5,152,614, compared with total liabilities of \$3,799,840. The statement of assets and liabilities shows notes in circulation by the bank of \$1,150,710; deposits by the public payable on demand in Canada, \$2,083,281; deposits by the public payable after notice in Canada, \$504,493. On the assets are notes of and cheques of other banks amounting to \$1,897,178; Dominion notes, \$463,053; deposits with and balances due from other banks in Canada, \$805,187; balances due from agencies of the bank or from other banks and agents elsewhere than in Canada and the United Kingdom of \$235,322. The bank loan account shows current loans in Canada amounting to \$1,261,493; call loans in Canada \$188,030.

IMPORTANT LOAN AND SAVINGS COMPANY

The Waterloo County Loan and Savings Company, with head office at Waterloo, Ontario, and capital of \$2,000,000, is being organized by gentlemen associated with the Dominion Life Assurance Company of the same town. This company is being formed with a view of furnishing a safe and profitable medium by which the savings of persons in Eastern Canada, especially in and about Waterloo County, can be invested by way of mortgage loans on productive Western property at remunerative rates of interest. Its inception was suggested by the favorable experience of the Dominion Life Assurance Company for the last ten years in connection with western mortgage loans. Last year the average was 7.96% on their investments. Its promoters are chiefly connected with that company and the life company will co-operate with the loan company by permitting its agents in the Western Provinces to act for the loan company also, thus securing for the latter, without expense the advantage of an experienced and reliable agency organization.

The capital of \$2,000,000 will be divided into 20,000 shares of \$100 each. The first issue of these shares is limited to \$500,000 and is offered to the public at 110, that is each original shareholder will be required to pay for his \$100 share \$110, the first call being for \$10 per share and subsequent calls falling due every two months thereafter until the whole is paid.

The permanent board of directors cannot be chosen until the shareholders meet for organization after a charter has been granted, which again cannot be done until at least \$300,000 of stock has been subscribed for and \$30,000 in cash has been paid in to some chartered bank to the credit of the proposed company. The promoters of the company, Messrs. Thomas Hilliard, P. H. Sims, S. B. Bricker, E. F. Seagram, and F. S. Kumpf, have subscribed for a substantial amount of stock. They are all members of the executive committee of the Dominion Life Assurance Company, under whose management over \$2,000,000 of that company's money has been invested chiefly in Western mortgages without loss and yielding approximately eight per cent. interest. The shareholders may decide to retain these gentlemen or most of them upon the directorate of the loan and savings company, and if so, their presence may fairly be claimed as a reasonable guarantee of economical, safe and profitable management.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Arva, Ont.—October 18.—School house. Loss and cause unknown.

Coburg, Ont.—October 19.—Columbian Hotel. Loss and cause unknown.

Moosomin, Sask.—Government Creamery. Loss \$3,000. Insurance \$2,200.

Bruce Mines, Ont.—October 27.—Business section. Loss and cause unknown.

Pictou, N.S.—October 20.—Mr. J. Mills' residence. Loss unknown. Cause, sparks.

Trenton, Ont.—October 23.—Mr. A. H. Scouter's house. Loss and cause unknown.

Peterboro.—November 1.—Mills on McDonald estate. Loss and cause unknown.

Lang, Ont.—October 17.—Mr. J. Solberg's barn. Loss unknown. Cause, matches.

Belleville, Ont.—October 27.—Mayor Vermilyea's barn. Loss \$800. Cause unknown.

Bladworth, Sask.—October 24.—Mr. J. Peterson's barn. Loss \$2,500. Cause unknown.

Kincardine, Ont.—October 19.—Malcolm Furniture Factory. Loss and cause unknown.

London, Ont.—October 29.—Hunt Block, Richmond Street. Loss and cause unknown.

Victoria Harbor, Ont.—October 24.—Mayor Curry's residence. Loss and cause unknown.

Grenfell, Sask.—October 24.—Outbuilding on Anderson Street. Loss and cause unknown.

Victoria, B.C.—October 24.—106 Hollywood Crescent. Loss \$50. Cause, overheated stove pipe.

Marbleton, Que.—October 23.—Dr. M. S. MacDonald's residence. Loss and cause unknown.

Wolseley, Sask.—October 1.—Mr. L. Thompson's residence. Loss \$3,000. Cause unknown.

Penetang, Ont.—October 12.—Mr. A. Tessier's planing mill. Loss \$10,000. Cause unknown.

Tilsonburg, Ont.—October 29.—Tilsonburg Packing Company. Loss \$40,000. Cause unknown.

Hazleton, B.C.—October 23.—Mr. C. McKinnon's shack. Loss \$200. Cause, candle left burning.

Port Maitland, N.S.—October 25.—Dr. R. H. Goudey's house and barns. Loss and cause unknown.

Lloydminster, Sask.—October 26.—Business section. Loss unknown. Cause, explosion of coal oil lamp.

Montreal, Que.—October 25.—700 West Notre Dame Street. Loss unknown. Cause, gas explosion.

Dartmouth, N.S.—October 29.—Mr. J. Stewart's residence, Portland Street. Loss and cause unknown.

North Toronto, Ont.—October 29.—Mr. C. Hancock's residence, Woburn Avenue. Loss \$20. Cause unknown.

Walkerton, Ont.—October 22.—Canadian Spool and Bobbin Company premises. Loss \$5,000. Cause unknown.

Toronto, Ont.—October 29.—Canadian Pacific Railway tool house, Runnymede Road. Loss and cause unknown.

Brandon, Man.—October 25.—Mr. Tinlay's bookstore, Rosser Avenue. Loss slight. Cause, rubbish in basement.

Hamilton, Ont.—October 24.—Mr. F. Simpson's residence, 65 Murray Street. Loss \$25. Origin, gas explosion.

South Vancouver, B.C.—October 21.—Residence corner, Forty-eighth and Fraser Avenues. Loss \$4,000. Cause unknown.

Cananoque, Ont.—October 26.—Barn owned by Messrs. Sack Brothers, of Brockville. Loss and cause unknown. No insurance.

Grassy Lake, Alta.—Messrs. Larson Brothers' hardware store. Mr. J. F. Frank's butcher shop. Loss \$15,000. Cause unknown.

Glace Bay, N.S.—October 28.—Mr. W. M. Petriem's residence, Upper Main Street. Loss unknown. Cause, papers set alight.

Halifax, Nova Scotia.—October 13.—Furness Liner "Durango." Loss unknown. Cause, presumed spontaneous combustion.

Calgary, Alta.—October 23.—Grand Central Hotel. Loss unknown. Cause, ashes dumped on rags, etc.

October 24.—Chinese section. Loss \$4,000. Cause, overheated stove.

Princeton, B.C.—October 22.—Princeton Lumber Company's mill. Loss \$12,000. No insurance. Cause, supposed to be smouldering ashes.

Montreal.—November 1.—Elite Hat and Cap Company. Lyons' Cut Rate Drug Store, etc. Loss \$15,000. Cause unknown.

Listowel, Ont.—October 25.—Donegal Cheese Factory. Loss and cause unknown. Mr. G. Acheson's barn. Loss unknown. Cause, supposed cinders from cheese factory.

Toronto, Ont.—October 26.—Imperial Optical Company's premises. Loss \$1,400. Insured with Equitable Company. Dr. Thompson's loss \$200. Cause, upset benzine stove.

Three Rivers, Que.—October 15.—Gres Fall Company's stable. Loss slight. Cause, sparks.

October 16.—Mr. O. Martin's poolroom. Loss, stock \$319, building \$100. Fully insured. Cause, fire on pile of coal tar.

New Westminster, B.C.—October 19.—Mr. N. H. McQuarrie's residence, 47 Albert Crescent. Loss \$150. Cause, defective fire place.

October 22.—Western Canada Lumber Mills' lumber mills. Loss \$75,000. Cause unknown.

Hamilton, Ont.—October 25.—Mr. A. Hearer's plating shop, 122 Macnab Street North. Loss \$300. Cause, spontaneous combustion; 475 Main Street West. Loss \$400. Cause, explosion of gasoline stoves; Mr. W. J. Louneys, 203 King Street East. Loss unknown. Cause supposed overheated furnace.

Fort William, Ont.—October 26.—Hudson's Bay stores, 337 Simpson Street. Loss, stock \$75, building \$100. Cause, children playing with matches.

October 27.—Imperial Oil Company, McIntyre Street. Storage shed and motor. Loss \$125. Cause, short circuiting of motor.

Winnipeg, Man.—October 23.—Mr. M. Heirsberg's residence. Loss \$200. Cause, lighted match.

October 24.—Elite picture theatre. Loss unknown. Cause, film exploded; rear 318½ Selkirk Avenue. Loss unknown. Cause, overheated pipes; 105 Hallet Street. Loss \$50. Cause unknown.

October 26.—252 James Avenue. Loss unknown. Cause, gasoline stove ignited.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended September 21st:—

	1911.	1912.	Increase or Decrease.
C.P.R.	\$2,218,000	\$2,549,000	+ \$331,000
G.T.R.	1,018,506	1,101,588	+ 83,082
C.N.R.	373,600	390,200	+ 16,600
T. & N.O.R.	44,592	28,146	— 16,446

The following are the railroad earnings for the week ended September 30th:—

	1911.	1912.	Increase or Decrease.
C.P.R.	\$3,061,000	\$3,457,000	+ \$396,000
G.T.R.	1,330,952	1,464,732	+ 133,780
C.N.R.	506,000	526,600	+ 20,600
T. & N.O.R.	58,381	36,650	— 21,731

The following are the railroad earnings for the week ending October 7th:—

	1911.	1912.	Increase or Decrease.
C.P.R.	\$2,396,000	\$2,765,000	+ \$369,000
G.T.R.	985,730	1,058,587	+ 72,857
C.N.R.	460,500	471,700	+ 11,200
T. & N.O.R.	42,582	25,010	— 17,572

The following are the railroad earnings for the week ended October 14th:—

	1911.	1912.	Increase or Decrease.
C.P.R.	\$2,510,000	\$2,957,000	+ \$447,000
G.T.R.	905,600	1,063,161	+ 157,561
C.N.R.	480,000	523,700	+ 43,700
T. & N.O.R.	40,402	23,170	— 17,232

Aggregate traffic receipts of the Grand Trunk Railway Company for July, August and September were £2,052,240, against £2,701,000 in the same three months last year, an increase of £250,265.

SUEZ CANAL TRAFFIC

Net Tonnage Shows Increase—Principal Merchandise Carried Through the Canal—Reduction of Transit Dues

The official report on Suez Canal Traffic in 1911 states that the net tonnage for the past year shows an increase of 1,742,896 tons as compared with that of 1910, and an increase of 2,917,267 tons as compared with that of 1909. The increase in the net tonnage had the effect of increasing the gross receipts, which amounted in 1911 to the highest sum ever reached, viz.: 134,762,199 fr. as against 130,436,547 fr. in 1910, and 120,642,677 fr. in 1909, notwithstanding the reduction in the transit duties from 7.75 to 7.25, which came into force on January 1st, 1911.

The number of vessels which passed through the canal was 4,239 in 1909, 4,533 in 1910, and 4,969 in 1911, of which 2,561 in 1909, 2,778 in 1910, and 3,089 in 1911 carried the British flag. There has been an increase of 1,292,337 tons last year as compared with 1910 in the tonnage of British vessels, which amounted to 9,592,387 tons in 1909, 10,423,610 tons in 1910, and 11,715,947 tons in 1911. During the same period the tonnage of German vessels has increased from 2,381,681 tons in 1909 and 2,563,749 tons in 1910 to 2,790,963 tons in 1911.

Percentage of British Vessels.

The percentage of British vessels and their net tonnage increased in 1911 in comparison with 1910, being 62.2 and 64 respectively, as against 61.3 and 62.9 in 1910 and 60.4 and 62.3 in 1909. The percentage of German vessels and their net tonnage was 13.4 and 15.2 respectively, as compared with 14.0 and 15.5 in 1910 and 14.2 and 15.5 in 1909, while the percentage of net tonnage of the other maritime nations using the canal in 1911 remained practically stationary as compared with the preceding year. Of 3,846 merchant vessels and vessels in ballast of a net tonnage of 13,847,486 tons passing through the canal, 2,872 ships of a net tonnage of 10,610,313 tons were British, being 74.6 per cent. of the number and 76.6 per cent. of the tonnage; 377, or 9.8 per cent., were German vessels, whose tonnage was 10.5 per cent. of the whole; Holland, France, Austria-Hungary, Russia, Sweden, and Norway combined furnishing a total of 15.6 per cent. of the vessels and 12.9 per cent. of the tonnage of the carrying trade to the east through the Suez Canal.

Net Tonnage and Transit Receipts.

In the ten years 1891-1900, the annual net tonnage ranged from 8,698,777 tons to 9,738,152 tons, and the transit receipts from 83,422,101 fr. to 90,623,608 fr. The average of the net tonnage was 8,588,947 tons, and of the transit receipts 80,006,013 fr.; while in 1911 the net tonnage amounted to 18,324,794 tons, and the transit receipts to 134,762,199 fr. The mean net tonnage per vessel, which in 1881 was only 1,517 tons, rose from 2,067 tons in 1891 to 2,926 tons in 1901, and to 3,688 tons in 1911. Forty steamers exceeding 150 metres (492 feet) in length or more than 18 metres (59 feet) in breadth, with a draught of over 8 metres (26 feet 3 inches), passed through the canal in 1911.

Duration of Passage and Draught of Vessels.

The mean duration of passage for all vessels navigating the canal was 17 hours 1 minute in 1911 as compared with 16 hours 54 minutes in 1910, while the percentage of vessels navigating by night as well as by day amounted to 96.4 per cent. in 1911 as compared with 97.8 per cent. in 1910. The passage through the canal of the Royal Yacht on its journey to India was achieved in the remarkably short time of 12 hours 30 minutes, while the return passage only occupied 12 hours. The percentage of vessels drawing less than 26 feet 3 inches (8 metres) was 93 in 1911, as compared with 94 and 95.2 in 1910 and 1909 respectively, whilst that of vessels drawing more than 26 feet 3 inches was 7 in 1911 as compared with 6 in 1910 and 4.8 in 1909. Since January 1st, 1908, the maximum draught allowed for vessels passing through the canal has been raised to 8 metres 53, or 28 feet, and 335 vessels drawing between 27 and 28 feet took advantage of this alteration during the past year. During 1911, 319 vessels passed through the canal for the first time, 27 of which were warships and 99 belonging to shipping companies whose vessels regularly use the canal, and who furnished 75,000 net tons to the traffic of the canal.

The number of troops carried through the canal during last year amounted to 98,555 as against 76,854 in 1910, being an increase of 21,701. There was an increase of 21,563 Turkish, 799 German, 732 French, 379 Italian and 133 Russian, against a decrease of 659 British, 167 Austrian and 95 Dutch troops as compared with 1910. The number of civilian passengers amounted to 144,635 in 1911 as against 128,171 in the preceding year, being an increase of 16,464; while the number of pilgrims, emigrants and convicts was 32,461 in 1911 as compared with 28,953 in 1910, or an increase of 3,508. In the

year 1870, 26,758 civil and military passengers were carried through the canal; in 1880 the number rose to 98,900, in 1890 to 161,352, in 1900 to 282,203, and in 1911 it amounted to 275,694, as against 233,978 in 1910.

Principal Merchandise Carried Through Canal.

The most important item in the merchandise carried through the canal from north to south is coal, with a total of 1,091,223 tons during 1911, 96 per cent. of which originated from the United Kingdom. Railway material provided 817,253 tons, originating from the United Kingdom in the proportion of 44 per cent. Petroleum, 485,153 tons, originated nearly entirely from the United States, while the cargoes of salt amounted to 455,485 tons, 43 per cent. of which was sent from the United Kingdom. In the traffic from south to north, the quantity of wheat transported amounted to 1,644,000 tons, 58 per cent. of which was destined to the United Kingdom. Rice contributed a total of 1,628,000 tons, Germany utilizing 419,000 tons in its distilleries. The traffic in oilseeds amounted to 1,481,000 tons, 26 per cent. of which was destined to the United Kingdom. The sugar traffic amounted to 798,000 tons, 33 per cent. of which was destined to the United Kingdom.

It may be added that the directors of the Suez Canal Company have decided to reduce the transit dues, from January 1st, 1913, by 50 centimes, thus making the tariff 6.25 fr. per ton for loaded vessels and 3.75 fr. per ton for vessels in ballast.

VANCOUVER'S FINANCES.

Vancouver's financial statement for the nine months ended September 30th has just been issued.

Among many detailed matters, it is shown that out of the estimated revenue for the full year of \$4,254,703.36, the amount received for the nine months was \$3,075,400.75. A sum of \$211,942.05 was received for arrears of revenue from the end of last year out of an estimated total for the whole year of \$363,986.03. The total estimated to be spent during the full year is given as \$4,012,152.26, while up to September 30th a sum of \$3,364,330.26 had been disbursed. Debenture accounts and appropriations have already accounted for \$5,305,578.09 out of the year's total of \$8,366,592.42.

VANCOUVER AND HUDSON BAY

Mr. J. D. Turriff, M.P., agrees with the contention of The Monetary Times, that of all the plans projected to relieve the grain congestion in the prairie provinces, shipment via Vancouver and the Panama Canal is the most feasible. Mr. Turriff is not enthusiastic respecting the Hudson Bay route as an outlet for Western wheat. A very small percentage of the total crop, he says, could find the seaboard via that route. The season of navigation after the grain is threshed is too short. However, it will be a good thing to build a railway to Hudson Bay, thinks Mr. Turriff. Even if shipment of grain is not found to be possible, such a railway will open an immense territory to settlement. "There is as much good clay land in that territory as there is under cultivation at the present time in the three wheat-growing provinces. I do not mean to say that it will grow as much wheat as is being grown now in the three provinces, as it may not be as well fitted for wheat-growing, but I am sure it will grow at least half as much. In addition, there is considerable mineral wealth up there, and fisheries, as well as a quantity of timber. Even if the grain route to Liverpool is a failure, the railway should be built to Port Nelson. As a matter of fact, there are few portions of the Dominion where the construction of a railway would not be a paying proposition."

The Parisian shareholders of the International Bank are said to have had an offer of sixty or more cents on the dollar for their holdings, and it seems probable an early settlement will be made.

The Vancouver Association of Life Underwriters will give a series of luncheons this winter at which speeches by prominent citizens will be made. The first was held on Tuesday last when Archbishop McNeil was the speaker.

Messrs. A. E. Ames and Company, of Toronto, have made arrangements to open an office in Montreal. Mr. F. J. Coombs, a member of the firm, has been in Montreal for several days attending to the necessary details.

The London, Ont., board of trade, received a communication from Owen Sound board of trade, asking it to send a protest to the government condemning the further granting by the Dominion Government, especially by order-in-council, of the right to issue stock of transportation or other public utility companies upon any terms that do not provide for the full market value of such stock being placed to the credit of the company.

HOW MERGERS LESSEN BANK TAXES

Savings Effected by Consolidation—Provincial and Municipal Demands—Heavy Cost of Establishing Branches in Larger Cities

BY H. M. P. ECKARDT.

In the case of the latest bank absorption—that by which the Bank of Nova Scotia is to incorporate with the Bank of New Brunswick—it is, of course, quite clear that extensive economies will be effected through closing branches at points where the systems of the two banks overlap. At the end of 1911 the Bank of New Brunswick had 29 offices; and no less than 16 of these offices are located at points where the Bank of Nova Scotia also has branch representation. Those points are: Montreal, Halifax, New Glasgow, Yarmouth, Summerside, Charlottetown, Campbellton, Fredericton, Moncton, St. John, St. Stephen and Sussex. At St. John the Bank of New Brunswick has five offices; and presumably only one or two of the New Brunswick's offices in that city will be closed.

In this case the prospective economies in connection with the operation of the above mentioned branches are quite important; and if all possible economies are put in force immediately one might surmise that considerable hardship would be inflicted upon the staff of the smaller bank—there may not be work for all of them in the service of the consolidated institution.

The Bank of Nova Scotia and the Bank of New Brunswick have been strong competitors in the provinces of New Brunswick, Nova Scotia and Prince Edward Island, especially in the first named province; and no doubt the elimination of this particular competition will have some effect on the profit-making capacity of the merged institutions.

Policy of Other Institutions.

But it is yet to be seen whether other banks will step in to take the places occupied by the New Brunswick. They followed that policy when the Royal-Traders absorption was announced, and also when the Commerce-Eastern Townships deal became known; and it is quite possible that they will do the same on this occasion.

The benefits secured by the stockholders of the two banks will arise through savings effected in expenditures on rents, salaries, stationery, fuel, and in other things. Among the other things the item of taxes assuredly would not be overlooked. It is interesting to compare the position of the two institutions, before and after their union, with respect to the taxes payable by them. The Bank of New Brunswick at present is apparently liable to provincial taxation of \$1,000 yearly for its principal office in New Brunswick, and \$100 for each of its 18 branches, or \$2,800 per year. The Bank of Nova Scotia apparently has to pay into the provincial treasury of New Brunswick \$1,000 for its principal office, and \$1,400 for the other branches. Altogether, the two banks pay in New Brunswick yearly taxes of say \$5,200. Assuming that twelve offices will be closed after the absorption takes effect (including only one office in St. John City) the combination would be liable for \$1,000, principal office, and \$2,100 for the other branches, or \$3,100 in all. The saving in provincial taxes in New Brunswick would therefore be apparently \$2,100 per year. The municipal tax in St. John is 1/12 of 1 per cent. on average volume of business. So if it be assumed that the volume of business done by the consolidation would be equal to the volume of business done by the two banks working independently, there would be no economy in connection with this tax.

Municipal Taxes in Halifax.

In Halifax the municipality requires each bank to pay yearly a fee of \$1,000 and taxes of 1/16 per cent. on the volume of business. The bank may commute for fee and taxes by paying \$3,000 yearly. As the Nova Scotia has a large business in Halifax, probably it would elect to pay the \$3,000. But in case of the New Brunswick if it paid the fee and taxes at the minimum rate the outlay would be \$1,750 a year. So the saving in municipal taxes in Halifax would be at least \$1,750 per annum. In Prince Edward Island the saving to be effected in the provincial taxes and in municipal license is difficult to estimate, but it would probably be \$500 or \$600 and it might be \$1,000 yearly. For its recently established branch in Montreal the Bank of New Brunswick would be under obligation to pay the province of Quebec \$1,000 yearly for tax on capital, \$200 for being the principal office in the province, and the tax of 7½ per cent. on rented value of the bank premises. Also there is the special license fee for the branch. By giving up this office the consolidated bank would save at least \$1,600 in taxes, and the saving might be more.

Here has been indicated about \$6,000 yearly to be saved in taxes; and no account has been taken of the municipal taxes levied on country branches in New Brunswick and Nova Scotia which will now be closed. It is clear

that the item of taxes saved would enter into the calculations of the parties who promoted the merger. In the same way the Royal-Traders and the Commerce-Eastern Townships mergers would enable the banks that united to handle their combined business at less expense as regards taxation. Obviously the important savings would be made in case of the main branches operated in the large cities. The municipal authorities have been piling taxes heavily on the banks and business corporations occupying valuable premises. Also the rentals, or rental values and other expenses incidental to the operation of a central branch in one of the big cities have been increasing very rapidly of late years. And the great increase in these expenses has a certain tendency to accelerate the consolidation movement.

Heavy Expenses Deter Banks.

In this manner the enormous expense of operating a principal or central branch in Montreal, Toronto, Winnipeg, Vancouver, and in certain other large cities has an effect in deterring competing banks from entering them. It takes a considerable amount of courage for any bank to establish its first branch in one of these big cities. The officers know that the expenses will be enormous and that the provincial and municipal authorities will descend upon the newly established branch and exact a heavy toll. On the other hand the branch commences with little or no earning capacity; and it may be years before it is able to earn a net profit.

SIR EDMUND WALKER ON OUR CREDIT ABROAD

Speaking at the opening of the new Winnipeg branch building, Sir Edmund Walker, president of the Canadian Bank of Commerce, said:

"There is ample British capital for legitimate investment in Canada. The fact that there has been that curtailment in the volume of English money does not mean an impaired credit. The credit of Canadian municipalities is excellent. The outstanding truth is that they have been getting their loans at exceptionally low interest rate, and have thrown so large a volume of securities on the British market that the inevitable was bound to happen. I apprehend that Canadian cities and towns will have to pay higher interest rates in the future, but there will be abundant money for legitimate needs."

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Alberta

Orkney, No. 2776, \$2,000. R. S. Near, Sarcee.
Larson, No. 2360, \$7,400. C. J. Knudson, Irma.

A branch of the Canadian Bank of Commerce has been opened at Vulcan, Alberta, under the temporary management of Mr. H. A. Andrews.

"We have the fruit, and the minerals, and the lumber, and the fisheries. The prairie provinces have the grain and farm produce which we cannot grow extensively. Why, then, should not the four provinces interchange? Why should it be necessary for the people of Alberta and Saskatchewan to bring in their fruit and lumber from the United States, and why should we have to ship in our grain and flour from the United States? There is no reason for this."—Mr. W. E. Scott, Deputy Minister of Agriculture for British Columbia, at the Dry Farming Congress, Lethbridge.

The Bank of British North America have appointed Mr. James Anderson to be superintendent of branches in succession to Mr. H. B. Mackenzie, appointed general manager. After eight years' service in the National Bank of Scotland, Mr. Anderson in 1889 entered the service of the Bank of British North America at Hamilton. He was subsequently stationed in Montreal, Victoria, Rossland, Kaslo and Greenwood. In 1899 he was appointed manager at the Atlin, B.C., branch and was successively manager at Greenwood and Rossland. In 1904 he was appointed assistant inspector, and in 1905 was promoted to the office of chief inspector, which position he has held up to the present time. Mr. Anderson will take up his new duties on December 1st.

SIXTY-FOURTH ANNUAL REPORT

OF THE

CONSUMERS' GAS COMPANY

OF TORONTO

Your Directors have pleasure in presenting the sixty-fourth annual report of the Company, together with the financial statements.

The output of gas for the year has amounted to 3,119,748,000 cubic feet, an increase over the output for the preceding year of 276,707,000 cubic feet.

Twenty-eight and one-half miles of new mains and 6,394 services have been laid.

To meet the extraordinary increase in the demand for gas, your Directors have found it necessary to make further extensions at the Works, and contracts have been entered into for the erection of new buildings and plant at Station "B," which when completed will increase the Company's manufacturing capacity by 4,000,000 cubic feet per diem.

It has also been found necessary to provide centrally located buildings for Stables, Garage, Pipe-fitting Shops, etc. Your Directors have been fortunate in securing for this purpose a suitable site on Mutual and Dalhousie Streets, on which the necessary buildings are now being erected.

This is the first complete year during which gas has been sold at the present reduced price, and the reduction of five cents per thousand cubic feet has amounted, upon the output of gas for the year, to about \$150,000.00.

The result of the year's operations are particularly gratifying when it is borne in mind that it has been necessary for the Company, in common with other large employers of labor, to meet the demands for increases in workmen's wages, and the advance in the cost of materials used in connection with the manufacture and distribution of gas.

The Directors have, with much regret, to report the death during the year of two of their colleagues, Mr. John L. Blaikie, the President, and Mr. James Henderson, both prominent and esteemed citizens, who have rendered valuable services to the Company. Mr. Blaikie was elected a Director in 1897, Vice-President in 1905 and President in 1906. Mr. Henderson was elected a Director in 1896.

Mr. A. W. Austin has been elected President, and Mr. Wellington Francis, K.C., Vice-President.

The vacancy in the Directorate caused by the death of Mr. Blaikie has been filled by the election by the Board of Mr. Herbert Langlois.

The Company's Works, which are thoroughly modern, have been maintained in a high state of efficiency, and the Distribution System has been improved and extended on a carefully designed plan.

The Gas Appliance Department has fully justified its creation.

The following statement for the past, as compared with the preceding year, shows:—

	Meters.	Gas Rental.
Year ending 30th September, 1912..	82,022	\$2,058,140 63
Year ending 30th September, 1911 .	72,544	1,857,071 01
Showing an increase of	9,478	\$ 201,069 62

All of which is respectfully submitted.

A. W. AUSTIN,
President.

RAILWAY AND OCEAN TERMINALS FOR HALIFAX

The Dominion government will build new railway and ocean terminals nearly two miles south of the present terminals at Halifax.

The new docks are to extend for one and a half miles from the Lumber Yard to Point Pleasant Park, and will consist of six piers, 1,250 feet long and 300 feet in width, with capacity sufficient to dock at least thirty ships. There will be one bulkhead loading pier, 2,000 feet in length, at which the ocean greyhounds will land. This pier will be equipped with immigration buildings, sheds and a grain elevator.

A new union passenger station will be erected at the end of Hollis Street, just north of the docks mentioned, which will be of ample size and suitable architecture.

The new terminals will be approached by a double-tracked railroad, which will branch off the main line at the Three Mile House and extend southerly through the low

divide between Bedford Basin and the head of the northwest arm. It will then skirt the arm in such location as will do the least damage to property in that vicinity, avoiding all level crossings, and for the most part passing through deep cuttings so as not to mar the beauty of that district, and finally reaching the terminals by passing under the lower end of Young Avenue. The streets in the residential district where the railway is submerged will be carried over the cutting on artistic bridges in keeping with the present surroundings.

STEEL COMPANY'S BOND OFFERING

A block of \$40,000 7 per cent. first mortgage gold bonds of the Belgo Canadian Steel, Limited, is being offered by the Security Trust, Limited, Montreal. There is a bonus of 50 per cent. capital stock. The company's capital is as follows:—

Authorized capital	\$550,000
Capital issued	450,000
In treasury	100,000
7 per cent. bonds, first mortgage.....	60,000

The bonds are secured by a fixed and specific first mortgage on the full assets of the company. The net profits of capital stock will carry more than 10 per cent. dividend if the plant only worked half its capacity, so it is claimed. The company's plant has a capacity of 12 tons a day for manufacturing steel and grey iron castings, ranging from 1-10 of a pound to 30,000 pounds.

The directors are as follows:—A. Baillot, foundry manager, president; L. J. Beique, vice-president, (director Quebec, Montreal and Southern Railway); C. Theriault, director; Hon. F. L. Beique, Senator, (director Hochelaga Bank and Canadian Cottons, Limited); and Chas. Allard, mechanical engineer.

SEPTEMBER RAILWAY EARNINGS

The net earnings of the Canadian Pacific Railway in September, according to the monthly statement, showed an increase of \$332,857 as compared with the same month last year. The increase while smaller than that reported in either July or August of the current year compares with a gain of only \$5,847 in the same month last year over September, 1910. The gain in net for the month was equal to 8½ per cent. and net earnings for the three months show an increase of nearly 15 per cent. The September statement follows:

	September, 1912.	July 1st, to Sept. 30, 1912.
Gross earnings	\$11,579,733.98	\$35,883,848.43
Working expenses	7,329,430.13	22,467,442.02
Net profits	\$ 4,250,303.85	\$13,416,406.41

In September, 1911, the net profits were \$3,917,446.80, and from July 1st to September 30th, 1911, there was a net profit of \$11,696,046.14. The gain in net profits over the same period last year is therefore, for September \$332,857.05; and from July 1st to September 30th, \$1,720,360.27.

Canadian Northern gross earnings for September were \$1,671,500, an increase of \$95,100 over the corresponding month in 1911. The net earnings showed an increase of \$4,100 for the same period, making those for 1912 to date \$193,200 in excess of last year.

The Grand Trunk September statement shows net profit as follows:—Grand Trunk proper, increase, £21,550 sterling; Canada Atlantic net profit, decrease, £3,400; Grand Trunk Western net profit, increase, £4,250; Grand Haven net profit, decrease, £4,000; total net profit, whole system, increase, £17,500; one working day less.

DIVIDEND NOTICE

THE BANK OF TORONTO

Dividend No. 125

NOTICE is hereby given that a dividend of TWO AND THREE-QUARTERS PER CENT. for the current quarter, being at the rate of eleven per cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared; also a Bonus of ONE PER CENT., and that the same will be payable at the Bank and its Branches on and after the 2nd day of December next, to the Shareholders of record at the close of business on the 15th day of November next.

THE TRANSFER BOOKS will be closed from the 16th to the 25th days of November next, both days inclusive.

By order of the Board.

THOMAS F. HOW,
General Manager.

The Bank of Toronto, Toronto, October 30, 1912.

MONTREAL'S FIRE REPORT

Matches, Tramps and Electrical Defects Responsible for Much Loss—Help to Neighboring Municipalities

Children playing with matches caused 112 fires in Montreal last year, according to the annual report of the fire department. Tramps started 133 outbreaks, while defective insulations gave the firemen an additional 129 runs.

Altogether 2,717 calls, an average of eight a day, or one every three hours, were answered. False alarms numbered 411, of which 101 were sent into fire headquarters or the various posts by telephone, while 19 fires required only the attention of the chemical extinguishing apparatus.

Accompanied by Loss of Life.

Reviewing the work of the brigade Chief Tremblay points out that while the number of fires was not in excess of those recorded the previous year, there were 22 for which a second alarm was necessary. On eleven occasions fires were accompanied by loss of life, five men, four women and children being burned to death.

An interesting feature of Chief Tremblay's report is the table showing that on twenty-nine separate occasions detachments of the city fire brigade assisted at conflagrations in neighboring municipalities.

Calls were answered from Outremont on fourteen occasions, while Point aux Trembles had local firemen to help them three times. Westmount, Sault aux Recollets and Tetreaultville had sections of the city fire brigade for two fires each, while Verdun, St. Jerome, Valmet, St. Philippe de Laprairie, Farnham and Lachine each had one call responded to.

Personnel of Department.

Tabulating the personnel of the fire department the report shows that there were one chief, one assistant chief, seven district chiefs, one fire patrol captain, thirty-three captains of posts, thirty-eight lieutenants, nineteen mechanics, four medical officers, four veterinaries, 110 firemen of the first class, ninety-five second class, thirty third class, 107 fourth class, chauffeurs, carpenters, plumbers, electricians, blacksmiths, and clerks; a total of 470 officers and men. In the fire alarm department there was one superintendent, two assistants, two operators, four assistant operators, one foreman, one assistant foreman, one fire alarm inspector, and six linemen, the total strength of the brigade being 488 officers and men. Reference is made to the deaths during the year of four firemen.

The Vancouver Trust Company will apply for a Dominion charter, with power to acquire and carry on the business of the Vancouver Trust Company, Limited, which is operating under a British Columbia charter.

NEW ZEALAND'S BUTTER FOR CANADA

The great demand upon Canada's dairy products, in consequence of increase in population, suggests the thought to Mr. Beddoe, the Canadian Trade Commissioner at Auckland, that probable sources of supply for butter for next season might be interesting to know.

Butter is shipped from New Zealand to Canada by way of Vancouver direct, and via San Francisco and transhipped to Vancouver. The system is to reserve cold storage space on the vessels engaged in this trade, and for the season from September to May by the Vancouver direct boats space has been reserved for 65,985 boxes, and space for 35,300 boxes is now the subject of negotiation. Together, this makes 101,285 boxes of butter to be shipped direct to Vancouver for the period named.

In addition to the above, arrangements have been made to ship 23,700 boxes of butter to Vancouver via San Francisco—a grand total of 124,985 boxes of butter which will leave New Zealand for Vancouver between the months of September, 1912, and May, 1913.

STRINGENT FINANCIAL CONDITIONS IN AUSTRALIA

During August and September, reports Mr. D. H. Ross, Canadian Trade Commissioner at Melbourne, Australian importers have been contending against the stringency in the local money market, which is very seriously retarding the volume of orders being placed overseas. Bankers have, in many directions, withdrawn their support from commercial enterprises that usually depend upon them for facilities in connection with trade, thus forcing importers to either curtail their business or make other financial arrangements of a less convenient character. During this period of the year a certain tightness in the money market is looked for, as shipments of wool practically cease and exports of wheat and flour are much reduced, hence more money is required for the payment of importations from overseas than is being realized upon the limited exports.

This year the position has likely been accentuated by the drought conditions which prevailed a few months ago. Bankers, guided by past experiences, were probably apprehensive of a moderate crisis if they held securities not of a sufficiently liquid character. Whatever the reasons may be (whether those of policy or of cause), it is undoubted that at the present time commercial houses are being deprived of their usual banking facilities. Some heavy renewals of overseas drafts drawn upon Australian importers are reported. Happily, the weather conditions are entirely favorable for a harvest equal to any previous record, which should substantially relieve—if not entirely remove—the monetary tension existing as the mail closes.

LEGAL NOTICE

CANADIAN COUNTRYMAN PUBLISHING COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of September, 1912, incorporating James Steller Lovell, accountant; Robert Gowan, Joseph Ellis and John Joseph Dashwood, solicitors' clerks; William Bain, bookkeeper; Henry Alfred Tilcock, Kathleen Patricia Warren, Maud Berry and Juno Beatrice Shier, stenographers; Beatrice Estelle Brent, clerk; and John Francis Lash, barrister-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on business as proprietors, editors and publishers, and to print, publish and sell magazines, books, journals, newspapers, periodicals, pamphlets, advertisements, maps and other publications, whether literary or otherwise, and to act as agents for the printing, publishing and sale of the same to others; (b) To carry on all or any of the business of printers, map makers, lithographers, type-founders, stereotypers, electrotypers, photographic printers, photolithographers, chromo-lithographers, engravers, die sinkers, bookbinders, paper box manufacturers, designers, draughtsmen, paper and ink manufacturers, booksellers, publishers, advertising agents, engineers and dealers in or manufacturers of any other articles or things of a character similar or analogous to the foregoing or any of them or connected therewith; (c) To acquire by purchase or otherwise and dispose of the copyright of any book, article, story, engraving or other publication which may be copyrighted; (d) To prepare or acquire by purchase or otherwise and dispose of any literary, scientific or artistic works, translations or compositions and syndicate articles for simultaneous publication or otherwise, and special or syndicate manuscript or telegraphic correspondence; (e) To act as special agents for syndicates, publishers, printers, and to supply general news articles by telegraph or otherwise to newspapers; (f) To manufacture, buy, sell or otherwise dispose of ready prints, patent plates, bases, type printing machinery or any other machinery for use in printing establishments; (g) To establish competitions in respect of contributions or information suitable for insertion in any publication of the company or otherwise, or for any other purpose of the company, and to offer and grant prizes, rewards and premiums of such character and on such terms as may seem expedient; (h) To acquire by purchase, lease or otherwise,

and to own and hold lands or interests therein which may be necessary or convenient for the purposes of the company, together with any buildings or structures that may be on such lands or any of them; and to sell, lease or dispose of the same in whole or in part in such manner as the company may deem fit; (i) To purchase and otherwise acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (j) To purchase or otherwise acquire and undertake all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person or company carrying on in whole or in part business similar to the business which this company is authorized to carry on or possessed of property suitable for the purposes thereof; (k) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in, or about to carry on or engage in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company; (l) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise any corporation in the capital stock of which the company holds shares, or of any corporation or person or persons with which it may have business relations, and to act as employee, agent or manager of any such corporation, person or persons, and to guarantee the performance of contracts and obligations by any such corporation, or by any person or persons with whom the company may have business relations; (m) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Countryman Publishing Company, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 13th day of September, 1912.

THOMAS MULVEY,

Under-Secretary of State.

11-2

Dated at Toronto this 12th day of October, 1912.

The above debentures are all repayable in equal consecutive annual instalments of principal and interest at the Bank of British North America in the Town of Yorkton. Tenders to be marked "Tenders for Debentures." The highest or any tender not necessarily accepted.

For further particulars apply to

T. F. ACHESON,
Secretary-treasurer,
Town of Yorkton.

Dated at Yorkton, Sask., this 19th day of October, 1912.

The capital stock of the Keystone Transportation Company of Canada, Limited, has been increased from \$100,000 to \$500,000.

The Bankers Trust Corporation, Limited, operating under a British Columbia charter, will apply for an act to incorporate the Bankers Trust Company, with power to take over the business, assets and liability of the provincial corporation. The head office of the company is at Victoria, B.C.

BIGGAR, SASK.

Tenders will be received up to November 11th, for the following debenture issues:—\$12,000 30 years 5½ per cent., for grading, and \$12,800 30 years 5½ per cent. waterworks.

H. P. TURNER,
Secretary-Treasurer.

October 23rd, 1912.

TOWN OF MELVILLE, SASK.

TENDERS WANTED FOR DEBENTURES

Sealed tenders, marked "Tenders for Debentures," will be received up to six p.m., November 11th, 1912, for the purchase of all or any of the following issues. Tender price to include accrued interest, cost of printing debentures and bank charges:—

\$55,000, Town Hall Issue.—These are 40 years, payable at end of term, with interest payable yearly at 5 per cent., and are in issues of \$1,000.

\$6,000, Mill Loan Issue.—This issue bears interest at the rate of 5 per cent., and is repayable in six equal annual instalments of principal and interest.

Curing certificates of both the above issues have been procured from the Government of Saskatchewan guaranteeing the legality, and the debentures are available for delivery on demand.

\$43,300, Debentures.—These bear interest at the rate of 5 per cent., and are repayable in thirty equal annual instalments of principal and interest.

Payments in all cases at The Merchants Bank, Melville, Sask.; Toronto, Ont., or Montreal, Que.

The highest or any tender not necessarily accepted. Further particulars may be obtained from

FRED. H. CLARKSON,
Secretary-treasurer,
Melville, Sask.

October 1st, 1912.

The following information may be of interest to those wishing to tender:—

The total assessment for the year 1912 is \$3,180,000.00, exclusive of exemptions to the amount of \$85,000.00. Five years ago there was no population; to-day there is a population of about 3,000, which is increasing to such an extent that it is impossible to supply the demand for housing accommodation.

Melville is situated in the centre of a magnificent farming district, and in addition has the advantage of being a divisional point of the Grand Trunk Pacific Railway, whose repair shops and other works employ a large number of men.

The total debenture debt, inclusive of the present issue and local improvement debentures, amounts to \$259,628.01.

Less sinking fund	\$ 4,045 40
Waterworks	63,300 00
Electric light	22,000 00
Local improvement debentures	58,250 82
Net debenture debt	\$147,596 22
Assets, December 31st, 1911	112,031 79
Current expenditure, 1911	\$181,480 72
Current revenue, 1911	37,325 04
	40,849 81

The rate of taxation for the current year is: For general purposes, 10 mills; sinking fund, 1 mill; debenture rate, 3 mills, and school, 4 mills, a total of 18 mills.

Information recently to hand makes the announcement that Melville has been created a judicial centre of the Province of Saskatchewan.

The Liverpool-Manitoba Assurance Company has been registered in Alberta.

The capital stock of the following companies, operating under Ontario charters, has been increased: Wealthy Mines, Limited, from \$1,000,000 to \$3,000,000; Weston Brick Company, Limited, from \$100,000 to \$300,000; Chipman-Holton Knitting Company, Limited, from \$150,000 to \$500,000; Diamond Flint Glass Company, Limited, from \$3,500,000 to \$4,000,000.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

THE ROYAL BANK OF CANADA

Dividend No. 101.

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of December next, to shareholders of record of 15th November.

By order of the Board.

E. L. PEASE,

General Manager.

Montreal, P.Q., October 11th, 1912.

THE BANK OF NEW BRUNSWICK

Special Meeting of the Shareholders.

NOTICE is hereby given that a special general meeting of the shareholders of The Bank of New Brunswick will be held at the office of the said Bank in the City of Saint John, New Brunswick, on Monday, the 9th day of December, 1912, at the hour of eleven o'clock in the forenoon, for the purpose of considering an agreement for the sale by the said The Bank of New Brunswick of the whole of its assets to the Bank of Nova Scotia upon the terms set out in such agreement, a copy of which is mailed to each shareholder with this notice, and, if deemed advisable, of passing a resolution or resolutions approving the said agreement and authorizing the President and General Manager of The Bank of New Brunswick to affix thereto the corporate seal of the Bank and to sign and execute the same for and in the name of and on behalf of the Bank; and also for the purpose of considering and, if deemed advisable, of passing all such other and further resolutions for fully carrying out the said agreement and the terms thereof, as the shareholders shall consider expedient or advisable, and for the purpose of authorizing the Board of Directors to give all such notices and make all such applications and to pass and execute all such other acts, resolutions, deeds, instruments, matters and things as may be deemed necessary for procuring the approval of the Governor-in-Council to the said agreement and for carrying out the same and for winding up the affairs of the Bank and distributing the proceeds of the said sale.

By order of the Board,

C. H. EASSON,

General Manager.

St. John, N.B., October, 19th, 1912.

INDUSTRIAL BOND OFFERINGS

Sale of Grand Trunk Car Trust Notes—Glut of Unsold Municipals

A block of \$1,000,000 of the 5 per cent. first mortgage bonds of Canadian Cottons, Limited, is being offered at 86 and accrued interest by the Royal Securities Corporation, Limited. Of that amount, \$600,000 has already been applied for and will be allotted in full. The bonds are secured by a fixed and specific first mortgage and charge upon all the fixed assets of the company. Total assets, exclusive of water powers and goodwill, amount to over \$8,225,000—of which over \$800,000 are net current assets. The net profits for the year ended March 31st, 1912, after providing allowance for maintenance and depreciation, amounted to \$589,977.38. A cumulative sinking fund of 1 per cent. per annum, commencing July 1st, 1913, provides for the redemption of bonds by purchase in the open market at or under 105 and accrued interest, or by drawings at that rate. The company makes and supplies practically the entire Canadian market with awnings, cottonades, denims, shirtings, galateas, ticking, oxfords, dress gingham, apron gingham, flannelettes, saxonies, domets, cotton dressgoods, cotton blankets, yarns, etc., and owns seven mills, situated at Montreal (1); Cornwall, Ont., (3); Hamilton, Ont., (1); Milltown, N.B., (1); Marysville, N.B., (1), and also a controlling interest in the Cornwall & York Cotton Mills Company at St. John, N.B.

The bonds are listed on the Montreal Stock Exchange. The company's capitalization is as follows:

	Authorized.	Outstanding.
5% First mortgage bonds	\$5,000,000	\$4,500,000
6% Non-cumulative preferred stock	4,500,000	3,575,000
Common stock	3,500,000	2,715,500

Dominion Marble Company

The Dominion Marble Company are issuing \$150,000 six per cent. fifteen-year first mortgage bonds through Messrs. Russell E. Popham & Company, of Montreal. These are part of \$200,000 authorized to provide funds for purchase of additional quarry properties to extend present plant and furnish working capital. The outstanding capital of the company consists of \$200,000 7 per cent. cumulative preferred stock and \$325,000 common. The bonds are being offered at par and interest with a bonus of 25 per cent. common stock.

The Grand Trunk Railway Company has sold \$3,700,000 4½ per cent. Car Trust notes, maturing serially in one to ten years to Blair & Company, of New York. There has re-

cently been considerable inquiry for car and equipment notes from Canadian companies, owing to the ready market which can be secured for them from trust and insurance companies.

The Richelieu and Ontario Navigation Company may shortly retire the bonds of the subsidiary company and those of the Perrin Company by a uniform issue of new bonds.

Municipal Bond Market

The condition of the municipal bond market is well illustrated by the following typical instances:

No bids were received for the \$100,000 issue of 5¼ per cent. high school debentures of North Battleford, Saskatchewan.

The village of Herbert, Sask., has not offered for sale yet its block of \$9,000 6 per cent. 15-year debentures, the money to be applied as follows: Fire hall apparatus, \$7,850; and streets, \$1,150. The village will probably hold these securities until the new year.

No tenders were received for the issue of \$6,000 6 per cent. bonds of Imperial, Sask. The money was required to build a skating and curling rink.

No bids were received for the \$110,000 5 per cent. 25 and 30-year debentures of Estevan, Sask.

Galt and Cornwall have refused all tenders for their respective bond issues.

One Bid and No Offers

An issue of St. Agnes Roman Catholic School District debentures remains unsold.

Only one bid was received for \$6,000 6 per cent. 20-year bonds of Enderby, B.C., the money being required for the construction of main drains.

No offers have been received for the \$20,000 issue 5 per cent. 30-year bonds of Dominion, N.S. The funds required are for the installation of a water system.

The issue of \$5,000 4 per cent. water improvement Fredericton debentures, maturing 1925, were sold through a bank branch in that city at 97½. The party for which the bank was acting did not wish it known who was the actual purchaser.

DEBENTURES AWARDED

Kilney Village.—\$3,500, to Messrs. Nay and James, Regina.

Colgate Village.—\$2,500, to Messrs. Nay and James, Regina.

Melville S.D.—\$18,400, to Messrs. Nay and James, Regina.

Rose Farm S.D.—\$2,000, to Messrs. Nay and James, Regina.

MUNICIPAL ECONOMY

Many Canadian municipalities are experiencing difficulty in selling their securities. Municipal development being an important phase of Canada's life and responsible for the raising of big loans, the situation is worthy of analysis. Since January, 1910, the municipal bond sales in Canada, as compiled by *The Monetary Times*, have been as follows:—

1909	\$31,532,960
1910	29,043,325
1911	30,295,838
1912 (to October)	17,681,002

Total \$108,553,125

In addition to the sales in Canada, a large number of our municipal debentures have been sold publicly in London. According to "Capital Investments in Canada," a volume published by *The Monetary Times*, the municipal flotations overseas since 1905 were as follows:—

1905	£ 78,000
1906	
1907	822,942
1908	3,930,521
1909	2,109,500
1910	3,079,400
1911	5,323,749
1912	4,330,049

Total £19,674,161

In addition to the debentures sold in Canada, and those in England through the medium of public flotations, there have also been numerous private sales in the United States and England, the majority of which are not easily traceable. New Westminster's \$2,000,000 loan, for instance, is in the hands of a London house which has not yet made a public issue of them.

The aggregate municipal borrowing is heavy. A further analysis shows, as one would expect, that the Western provinces have been the greatest borrowers. Of the total municipal flotations in London since 1905, Western Canada was responsible for £14,000,000 and Eastern Canada for £5,550,000. Eastern municipalities have not marketed any issues in London this year, all the public flotations being confined to the Western provinces, although both have made temporary loans. The figures of 1911 show also that 179 Eastern municipalities made issues, as compared with 232 Western municipalities. For every dollar borrowed by the East, the West had \$1.56. The difference of appetite is accounted for by the large amount of municipal improvements being carried on in the West as compared with the smaller amount in older parts of the country. The tendency in Western Canada for civic authorities to own and operate public utilities also increases the output of securities. The comparatively heavier municipal loans of the West, therefore, is not an unnatural condition.

With these figures, we may seek the reasons for the present trouble in selling municipal bonds. There appear to be three leading causes—the congestion of securities of all kinds in the London market, the impression that some of our municipalities have been over-borrowing, and the desire of the investor for higher

returns. The condition of the London market has been discussed previously in these columns. So far as it concerns municipals, the fact that the responsible underwriters were obliged to take 50 per cent. of Saskatoon's issue, 82 per cent. of Edmonton's, 25 per cent. of North Vancouver's, 84 per cent. of Calgary's, and 73 per cent. of Winnipeg's, is significant. Canada is only partially responsible for the London market, and by now seems to have learned the lesson. Few, and only the best, flotations, should be sent to interest the British investor.

Regarding the opinion, heard here and there, that our municipalities are spending too much money, that a grain of truth seems to exist for the opinion. Mr. E. R. Wood, of Toronto, who makes it his particular business to keep well posted on bond issues, stated at the end of 1910 that Canadian municipalities were realizing the importance of placing their finances on a sound business basis, and adopting a conservative policy in regard to all expenditures. "For some years past," he added, "the rapid growth of Western Canada placed the progressive cities and towns under the necessity of making heavy capital expenditures, in order to provide those utilities demanded by modern standards of health and comfort. To the conservative investor these frequent loans were not always acceptable, but to-day the credit of our Western municipalities stands high. There is a growing public sentiment in Western Canada against extravagance in municipal finances. Nothing is more indicative of the high standing of Western municipal securities than the growing favor with which they are being regarded by the British investing public. A few years ago only the obligations of the largest centres in Western Canada could be placed in the London market, while, during the present year, the British investor has taken in quantity the debentures of those smaller cities and towns whose locations and natural advantages give promise of rapid and permanent expansion."

These considerations, as a general rule, apply to-day. Public sentiment throughout the country is opposed to municipal extravagance. Occasionally, however, the desire to have every possible local improvement and to rival neighboring towns and cities in that way has led to some pretty close financing. Several municipalities are heavy debtors to their banks, partly because they cannot dispose of their bonds in view of present market conditions and partly because they have overestimated safe borrowing power. This tendency fortunately is not strongly marked, and the banks especially have kept in bounds to a large extent those municipalities of an erring disposition.

Civic authorities should confine local improvements to absolute necessities and with reasonable regard to future requirements. To proceed with municipal work merely to keep local labor in employment, must in time lead to financial inconvenience or disaster. The shouldering of burdens by comparatively small towns or cities, such as a municipal street railway, should be avoided. It is not fair to Canadian or municipal credit, to bondholders or to the ratepayers, to embark in such an enterprise simply to advertise the town. Proper estimates should be made of traffic and every consideration given to those who loan the funds. Our municipalities should not persist in raising money until brought to a sharp check by their bankers. The desirable method, and the one which will hold the confidence of the investor in our debentures, is that which is dictated by a conservative, sane and businesslike civic body. It is easy in the hey-day of development and prosperity to commence new enterprises without properly counting the cost and allowing for periodical economic depressions. This matter has not become one of serious import, but it is sufficiently in evidence to merit a note of warning. No one who has at heart the best welfare of the Dominion will chide municipal rulers for an observance of sane economy.

The third reason for present conditions, viz., the desire for a higher return, may be partly overcome by

a higher return being given. Canadian municipal securities have been well patronized despite attractions in other directions. The extension of that favor, as a bond expert has put it, depends very largely upon the maintenance of present returns from municipal securities, or even a shading of existing prices. The legislation committee of the Montreal city council has decided to include in the charter amendments a request that the corporation of Montreal be empowered to borrow money at a higher rate of interest than four per cent. It is evident the present rate is not sufficient, and it is thought the city should have the authority of paying a little more than four per cent. when it is deemed advisable. The exact rate may not be specified, but as the highest rate is five per cent. allowed by law, if the amendment is accepted by the Legislature, the city will be empowered to borrow at any rate between four and five per cent. The city of Ottawa may also increase the rate of interest on its debentures. But with all our innovations, above everything should be borne in mind the ever-present necessity of proper municipal economy.

NATIONAL FINANCE

There is satisfaction even from figures which show receipts of \$136,000,000 and expenditures of \$138,000,000. The public accounts of Canada are seldom analyzed, because Canadian prosperity has made the individual account, from laborer's to capitalist's, of importance. Gradually the receipts and expenditures of the Dominion have increased. About ten years ago, 1899, the ordinary income of the country just exceeded \$51,000,000. For the past fiscal year, it had risen to \$136,000,000. But bookkeeping, as exemplified by liberals and conservatives alike at Ottawa, charges certain items to capital account. This ensures a surplus for presentation by the ruling powers every year. A Canadian budget speech without a surplus would remove the most familiar figure from Government finance. The ordinary income is labelled consolidated fund, and the ordinary expenditures have the same tag. Last year, the former amounted to \$136,000,000 and the latter to \$98,000,000. To that sum must be added the following capital account expenditures:—

Government railways and Quebec bridge..	\$24,262,252
Canal works	2,560,938
Public works—special	4,116,385
Railway subsidies	859,400
Bounties to industries	538,530
Grand Trunk Pacific implementing payments	4,994,416
Advance to Montreal Harbor Commission..	3,050,000

These figures, together with those of the consolidated fund, show an excess of expenditure over income of \$2,435,144, but, as previously noted, we can extract satisfaction even from that result. There were various transfers and an appropriation of \$1,156,456 for the sinking fund, the final result being a decrease in the net debt of \$122,591. A decrease in almost any debt is a desirable thing.

Income is derived from sources of different values. Railroad operation brings in a large revenue, but not enough to make the government transportation systems swell with the pride of self-sustenance. The postal service is another revenue producer. Taxation, in the shape of customs and excise duties, is the largest item. Last year, the collections amounted to \$105,847,000, the amount of federal taxes having more than doubled in the past nine years. The revenue from other sources was approximately \$30,000,000.

The expenditure on the Montreal harbor is a doubly good investment. That port is being made one of the finest on this continent, and the commissioners paid to the government during the year \$415,834 as interest at 3 and 3½ per cent. on bonds held at Ottawa. The interest charge last year was \$12,000,000, and with

\$447,456 management cost, was the heaviest expenditure. Provincial subsidies totalled \$10,000,000. While Mr. Borden, Sir Wilfrid Laurier and their colleagues are discussing on whose head rest the national surplus laurels, development and prosperity march forward hand in hand.

GATES WHICH ARE NOT GATES

(Clippings from Toronto papers.)

"The gateman, who is stationed in an elevated tower, a short distance from the scene of the fatality, was entirely in ignorance of its occurrence until apprised by Conductor Hall. He said that the gates had been lowered for every train that passed, but that the woman might have crept under the barrier under the impression that she could get across the tracks ahead of the train."

* * * *

"The second fatality in two days, due to badly protected, badly lit, level crossings, occurred last night. The crossing is one of the most dangerous in the city. There is no gate and the view of the tracks is obscured by two sidings."

BANK INSPECTION

The suggested scheme of bank inspection, as outlined by Mr. W. W. Swanson, of the Department of History and Political and Economic Science, of Queen's University, Kingston, will not, we think, meet with general agreement. His arguments have been printed in detail in previous issues of *The Monetary Times*. He favors inspection by auditors appointed by the Canadian Bankers' Association, but will go further than any of those who have as yet advocated that method.

Sir Edmund Walker, in addressing the Institute of Bankers in London, England, introduced a proposal, the effect of which, if brought into force, would be that the Government would impose upon the Association, within well-defined limits, the duty of bank inspection. The Association would appoint a bank examiner or examiners, with assistants, who would visit periodically the head office of every bank in Canada and test the accuracy of the balance sheet in a manner as complete as any audit.

Mr. Swanson would go much further than that. In addition to inspecting the balance sheet, he would also inspect business methods. Supporting his proposal, he cites the establishment in Chicago and other cities of the United States, of clearing house examinations, a voluntary system of inspection which supplements the work of the National Bank Examiners. An analysis of their functions and recollection of the defects of this system, do not help Mr. Swanson's scheme.

Mr. D. R. Wilkie has already stated that it would be unreasonable to hold the Association as a whole responsible for the reputed solvency and worthiness of its members. "Moreover," he adds, "no bank, under present conditions of competition, with the readiness of some to retire from business, and of others to add to their size and importance, with mergers and amalgamations following one on the heels of another, should be called on to place its affairs under the review of officials appointed by rival institutions. One can imagine what might happen to even a sound institution whose business and connections were coveted by a bank more influential than itself in the councils of the Association. The very proxies given to directors to assist in carrying on a bank might be used to destroy its separate existence. Mergers may even throw the control of the Association into comparatively few hands."

It may be found that a system of inspection in which both the Bankers' Association and the Dominion Government have a share of responsibility will prove a solution of the problem. One thing is certain, Canadian

bankers wish to satisfy every reasonable public demand which has financial safety as its ambition.

SMALL CHANGE

Montreal's financial motto: Lest we forget.

* * * *

What is Canora, Saskatchewan, going to do with that creamery?

* * * *

The fifty years street railway franchise proposed to be granted by North Battleford, is a franchise for half a century.

* * * *

British Columbia wants a bigger provincial subsidy. We hope the Pacific Coast hand will go deep and come out full.

* * * *

Roosevelt is now figuring how much of his result was due to the editorials of Mr. W. F. Maclean, M.P., of the Toronto World.

* * * *

Common stock at 15 was thrown in with a bond issue at 95 of a Vancouver brewery—a case of alcoholic water.

* * * *

Does the Toronto steeplejack, three hundred and sixteen feet up the cathedral spire, prefer the low cost of living, high, or the high cost of living, low?

* * * *

Prospective buyers of Canadian moving picture companies' stock should remember the fate of shareholders in the recent English skating rink stock boom.

* * * *

When the Canadian municipalities which have negotiated temporary loans, begin to sell their accumulated debentures in London, that market may open its eyes with astonishment.

* * * *

One cause of the republican landslide was Taftian sitontheferenceiveness. The United States has also been spared another term of Rooseveltian clubitiveness and welcomes Wilsonian universitiness.

* * * *

If all the stock certificates of the unworthy oil, wireless, mining and other companies were placed in a straight line, they would reach from—but there is always a new generation to purchase the old tricks.

* * * *

When asked if the Toronto story of his resignation, was correct, Mr. John Knight, secretary-treasurer of the Canadian Bankers' Association, said: "Do you ever talk in your sleep?" The reply probably was "Only at Knight."

* * * *

Controller T. L. Church, Toronto, made things hum last week by going to Ottawa, making appointments for the civic board of control without their knowledge, and burning the wires with numerous telegrams to the mayor. As a Balkan war correspondent, Mr. Church would be unparalleled anywhere, and at the same time unmourned in Toronto.

* * * *

The Chinese Wai-Wu-Pu has notified the British Legation of the Crisp loan contract, but the notification was refused on the ground that the conditions of the transaction did not accord with those which the Ministers of the six Powers notified China on July 9th would meet with the approval of the Ministers' respective Governments, and that, consequently, the formalities necessary to regularize Chinese loan transactions have not been observed. It remains to be seen whether or not the Committee of the London Stock Exchange will grant a settlement. The action of the British Government will tend to make the loan unpopular, and will make it difficult to issue the second five millions sterling loan. The way of financial heroes is hard.

LOAN AND TRUST COMPANIES STATISTICS

Latest Official Records Show That Seventy-Seven Companies Have Real Estate Under Mortgage Valued at Three Ninety-One Millions

The many facts and figures contained in blue book records unfortunately are received many months after the expiration of the year to which they relate. The report of the affairs of building societies, loan and trust companies of the Dominion for the year 1911 has just come to hand, and its interest is naturally lessened because in a few weeks we shall be keeping records of the year 1913. The report deals with seventy-seven companies of these three classes, chartered by the Dominion. Here is the list:

Ontario.—Barrie—Dyment Securities Loan and Savings Company. Brantford—Royal Loan and Savings Company. Brockville—Brockville Loan and Savings Company (Limited). Guelph—Guelph and Ontario Investment and Savings Society. Hamilton—Hamilton Provident and Loan Society, Landed Banking and Loan Company. Kingston—Frontenac Loan and Investment Society. Lindsay—Victoria Loan and Savings Company.

London—Canada Trust Company, Dominion Savings and Investment Society, Huron and Erie Loan and Savings Company, London Loan and Savings Company of Canada, London and Western Trusts Company (Limited), Ontario Loan and Debenture Company, People's Loan and Savings Corporation. Niagara Falls—Niagara Falls Building, Savings and Loan Association. Oshawa—Ontario Loan and Savings Company. Ottawa—Home Building and Savings Association. Owen Sound—Owen Sound Loan and Savings Company, Grey and Bruce Loan Company.

Peterboro'—Peterboro' Workingmen's Building and Savings Society, Central Canada Loan and Savings Company, Toronto Savings and Loan Company. Petrolia—Crown Savings and Loan Company. Port Hope—Midland Loan and Savings Company. Sarnia—Industrial Mortgage and Savings Company, Lambton Loan and Investment Company. Stratford—British Mortgage Loan Company of Ontario. St. Catharines—Security Loan and Savings Company. St. Thomas—Southern Loan and Savings Company.

Toronto—British Canadian Loan and Investment Company (Limited), Canada Landed and National Investment Company (Limited), Canadian Birkbeck Investment and Savings Company, Canada Permanent Mortgage Corporation, Colonial Investment and Loan Company, Dominion Permanent Loan Company, Debenture and Securities Corporation of Canada, Imperial Loan and Investment Company of Canada, Imperial Trusts Company of Canada, Land Security Company, London and Canadian Loan and Agency Company (Limited), National Trust Company (Limited), North British Canadian Investment Company (Limited), Provident Investment Company, Real Estate Loan Company of Canada (Limited), Scottish Ontario and Manitoba Land Company (Limited), Standard Loan Company, Sun and Hastings Savings and Loan Company of Ontario, Toronto General Trusts Corporation, Toronto Mortgage Company, Trusts and Guarantee Company (Limited), Union Trust Company, Limited, Title and Trust Company, Canada Investment Corporation.

Walkerville—Walkerville Land and Building Company (Limited). Woodstock—Oxford Permanent Loan and Savings Society.

Quebec.—Montreal—Credit Foncier Franco-Canadien, Montreal Loan and Mortgage Company, Royal Trust Company, Trust and Loan Company of Canada. Quebec—Quebec Permanent Building Society, Société de Prêts et Placements de Québec.

Nova Scotia.—Halifax—Acadia Loan Corporation, Eastern Canada Savings and Loan Company (Limited), Eastern Trust Company, Nova Scotia Savings, Loan and Building Society.

Manitoba.—Winnipeg—Great West Permanent Loan Company, Standard Trusts Company, Western Trust Company, Commercial Loan and Trust Company, Empire Loan Company, Northern Mortgage Company of Canada, North of Scotland Canadian Mortgage Company, Limited.

Saskatchewan.—Regina—Saskatchewan Mortgage Corporation, Sterling Trusts Corporation.

British Columbia.—Vancouver—British Columbia Permanent Loan Company, Dominion Trust Company, Limited.

The name of the Stratford Building and Savings Society was changed to the Canada Investment Corporation, and the head office was changed from Stratford to Toronto. The Netherlands-American Land Company has ceased to do business in Canada, as is generally known. The Agricultural Savings and Loan Company was amalgamated with the Ontario Loan and Debenture Company in November, 1911.

Classifying these companies according to the provinces in which the head offices are situated, the interesting results shown in the accompanying tables are obtained. The seventy-seven building societies, loan and trust companies have subscribed capital of \$99,000,000, of which \$41,000,000 is fully paid, and \$18,000,000 is paid on capital stock not fully paid. Of the subscribed capital stock, Ontario companies represent \$56,000,000; Quebec, \$23,000,000; and Manitoba, \$13,000,000. The aggregate reserve fund of these companies is \$28,000,000. The liabilities to stockholders amounts to \$95,000,000, Ontario being responsible for \$65,000,000. Deposits total \$33,000,000, the old province having \$31,000,000 of that sum. The debenture account may be briefly classified as follows:

Debentures payable in Canada	\$23,618,000
Debentures elsewhere	72,155,000
Debenture stock	3,978,000

Liabilities to the public amount to \$294,000,000 and total liabilities to \$389,000,000. Thus the liabilities of the companies concerned may be divided as follows:—

Liabilities to stockholders	\$ 95,168,491
Liabilities to the public	294,533,497

Total liabilities

How the Assets are Divided.

A similar classification of assets shows that no less than \$222,000,000 worth of the seventy-seven companies' current loans are secured on real estate, Ontario contributing more than half the total. Loans secured on city, village and school securities, and loan companies' debentures are comparatively small, aggregating for the seventy-seven companies less than \$2,000,000. Loans to shareholders on their stock are slightly below \$1,000,000. Those otherwise secured amount to approximately \$23,000,000, the total of current loans being \$248,000,000. The property owned by the companies includes small amounts of Dominion and provincial securities and about \$1,500,000 each of town securities, school securities and loan companies' debentures. County or city securities are held to the extent of \$6,000,000. Cash in banks contributes more than \$10,000,000; office premises, \$5,000,000; and other property, \$111,000,000. The total property owned is \$141,000,000. The assets of the companies can, therefore, be summarized as follows:

Current loans	\$248,164,260
Property owned	141,537,728

Total assets

Loans and Deposits.

The amount loaned by the seventy-seven companies during 1911 was \$53,816,000, while \$52,817,000 was received from borrowers during the year. Deposits aggregating \$66,881,000 were received, Ontario taking \$58,000,000; and \$65,000,000 was repaid to depositors. The amount borrowed for investment purposes aggregated \$81,000,000 and the companies issued \$23,000,000 worth of debentures. At the same time, they repaid debentures approximating \$12,000,000. The seventy-seven companies have debentures amounting to \$13,668,000, which will mature within one year. The estimated value of the real estate they have under mortgage is \$391,000,000.

Striking testimony to the prosperity of the country is seen in certain figures relating to mortgages. While the value of real estate under mortgage was \$391,000,000, the amount of mortgages payable by instalments is \$66,000,000, and the amount invested and secured by mortgage deeds is \$181,000,000; compulsory proceedings were taken during the year on only 367 mortgages, involving \$617,482. The companies declared dividends aggregating \$4,206,103.

Money Placed in the West.

Although the home of the majority of the building societies, loan and trust companies, with Dominion charters, is in Ontario, a very large portion of their funds is invested in the Western provinces.

The amount of money invested by these three life and fire insurance companies in mortgage loans in Alberta, for instance, at the beginning of this year was \$32,518,667

(Continued on Page 723.)

LONDON'S OCTOBER STOCK PANIC

**Vivid Word Picture of Last Month's Excitement—
Canadian Pacifics Were Sacrificed With Other
Stocks—"A Scene of Financial Slaughter"**

By W. R. Lawson.

[Mr. Lawson, one of the most notable, practical, and critical financial writers, is equally well known on both sides of the Atlantic. His sketch of the London stock exchange panic last month will prove unusually interesting to followers of Canadian and other stocks.—Editor, Monetary Times.]

The most important as well as the most unlucky event of the financial year to date in London was the October war scare. Up to the time of its outbreak business had been on the whole unusually good. In fact, it had been too good to be kept up. A score or more of bull campaigns had been running abreast, most of them of a new and rather dubious sort. Small cliques of ambitious operators took hold of certain out-of-the-way stocks or shares and ran them up by sheer force of buying. Stranger still, when they had got them they did not, as bull cliques usually do, attempt to take their profits. Either they locked up the stuff and financed it mysteriously, or they manufactured and issued new securities in its place. Whichever plan was adopted it had the effect of completely mystifying the public and leaving a trail of suspicion behind it.

Some Notorious Examples.

The most notorious cases of this sort were London General Omnibus, Union Castle Mail, and Consolidated Cement. During the year these shares were subjected to a course of ballooning almost without precedent in Capel Court. There was also the still more notorious case of the Marconi boom. It has produced not merely financial but political scandal, so much so that the House of Commons has appointed a Committee of Investigation to sit on it.

Apart from these open and obvious manipulations more than the usual amount of artificial bulling was carried on during the earlier part of the year. When the war crisis broke out the Stock Exchange was consequently in a very mixed and ambiguous position. While most of the regular markets were on a sound and healthy footing, the speculative freaks above referred to were still disturbing the minds of prudent people.

On the whole, the House was not badly prepared for trouble. It never looks far ahead, and did not take the Balkan crisis seriously until the diplomats themselves began to show signs of nervousness. It was not, in fact, until war had been actually declared by Montenegro that the first real alarm broke out.

War and the Stock Market.

This preliminary war scare lasted about a fortnight. After several days of diplomatic tension Montenegro precipitated the crisis by a sudden invasion of Turkish territory. So far nothing serious had happened in the stock markets. Neither the Continental Bourses nor our own Stock Exchanges had shown much alarm. The only securities that had suffered even a moderate relapse were those directly connected with the seat of war. The "making up" prices on the 9th October showed that declines had taken place all round during the preceding fortnight; but, considering the circumstances, few of them were heavy, while the fact of their being so widely distributed was a favorable rather than an unfavorable sign. It indicated that sail was being taken in in all directions and preparation made for squalls. In the foreign market the losses of the fortnight ranged from small fractions up to seven or eight points, the latter being in Bulgarian, Greek and Montenegrin stocks.

Friday Was Pay Day.

Friday, October 11th, was pay day, and already uneasiness had begun to show itself. No important cheques were returned, however. It was Wall Street rather than Capel Court that first lost its head. It began scare-selling in the street on Friday night, and its closing prices frightened dealers here on the Saturday morning. Canadian Pacifics had taken a plunge of ten points, Jersey Centrals had done the same, but they do not matter very much to us. "Soos" were down fully four points, and all along the list there were drops of 2 to 2½.

Was a Complete Demoralization.

To complete the debacle Paris had closed badly the night before, though not to such a sensational extent as Wall Street. Rents had fallen 70 centimes, equivalent to three-quarters per cent. in Consols. Bank stocks were down 23, and in one case 37 francs. Suez Canal shares, owing, doubtless, to their proximity to the seat of war, were particularly weak, and lost 95 francs. Russian industrials, which have been a special craze of the Paris Bourse for more than a year past, became completely demoralized.

Compared with them, Kaffir shares bore the strain well, their losses ranging from four to ten francs.

A more dismal morning than Saturday, October 12th, when the final panic broke loose, can hardly be imagined. The dense fog which prevailed outside was in grim harmony with the gloom which overspread every market in the House. Every weak joint in the whole fabric of speculation seemed to give way at once. While Canadian Pacific, Union Pacific, Steels and Amalgamated Coppers were being sacrificed in the American corner, Rio Tintos were being banged down in the foreign market and De Beers in the Kaffir circus. For two or three hours the House was a scene of financial slaughter. Even the markets like home railways, which had no particularly weak joint, could not resist the universal depression. The passiveness of the scare was very notable. There was very little bear selling;

W. R. Lawson.

on the contrary, the bears had sense enough to seize such a good opportunity of closing and taking the profits. Instead of aggravating the panic, they, in fact, helped to keep it in check.

Lowest Depths of Depression.

The lowest depths of depression were reached about mid-day, when Canadian Pacifics were dealt in as low as 264. They had been made up three days before at 281 and on September 25th they were carried over at 285½. In little more than a fortnight fully twenty-one points had thus been knocked off them, which, by a curious coincidence, was the exact value of the rights on the new issue of stock announced at the recent annual meeting. This was the record slump in the American market, and the only parallels to it in other markets were Rio Tintos and De Beers. The former dropped from 1,883 to 1,770 francs, a fall of 113 francs, or fully 6 per cent., in the course of a few hours. De Beers opened at 488 and closed at 461 francs, a loss of 27 francs in the day. In London these two shares also fared very badly. On September 30th Rio Tintos were "made up" at 84½, and during the mid-October account—the first stage of the scare—they lost 6¾. In Saturday's fog they opened at 73, and very speedily dropped to 71. Subsequently in the street they were said to have been done at 70. Thus the war scare cost them 15 points, or about 17½ per cent. of their value at the end of September.

TORONTO'S CIVIC INSURANCE

Toronto will ask for lower rates of insurance on its buildings. A committee consisting of Controller Maguire and Aldermen May and O'Neill has been appointed to approach the underwriters and attempt to get lower rates.

"Many of our buildings on which the highest rates are charged, are in the congested district, which is served by the high-pressure system," said Controller Maguire. "We should get the benefit of the lower rates for this system just the same as manufacturers do."

A letter from city treasurer Coady was read, in which he said that the amount of insurance proposed was \$3,661,258 on an estimated value of \$7,692,887, the proportion of insurance to value varying on the different buildings according to the nature of the risk. For the past three years the rate has been 2.10 per cent., and it will not be higher than that for the coming three years, with the possibility of a slight reduction.

CANADIAN BANKS IN LONDON

Six of Them Have Branches Overseas—Banking
Accounts of the United Kingdom

Six Canadian banks have offices in London. They are the Bank of Montreal, Canadian Bank of Commerce, Bank of British North America, Dominion Bank, Royal Bank of Canada, and Union Bank of Canada. The growing number of our banking institutions with branches in the world's capital, partly accounts for the compilation, in the latest interesting banking supplement of the London Economist, of the accompanying table, together with the following comments:—

Notes of Banking History.

"The bank deposits of Canada grew from 41 per cent. of total liabilities in 1890 to 52½ per cent. in 1900, and in the next ten years they rose to 72½ per cent., the slow rate of growth in the first ten years being due to the land slump in 1892, the effects of which, together with the world-wide depression, retarded the development of Canada. The effects of the American crisis may be traced in the check to the growth of discounts and advances in 1908 and 1909, and one of the supports of the Wall Street boom of 1909 was the huge amount of "money at call" of the Canadian banks in that year. Canada's activity in the last three years, however, has required all the assistance possible. Money at call has been withdrawn from Wall Street, and has gone into discounts and advances, and to some extent into investments.

Dealing with the balance sheets of the banks of England and Wales for the end of June, 1912, and of the Scotch and Irish banks for the latest complete years, our contemporary notes that the past year no amalgamations have been arranged among English joint stock banks, and there are still 44 of them. Their capital has increased by £25,000, owing to the new issue by the London and South-Western, and a further increase will be apparent when the December balance sheets are summarized, owing to the London and Provincial issue made since the close of the half-year. Reserve funds are down by £725,000, as compared with the figures of the previous year, which show an improvement of £34,000 in comparison with the December totals. Those banks which made up yearly accounts to the end of June all had to face heavy depreciation in their Consols, but those who had already written them down at the end of December were not in that position. Further depreciation will possibly have to be met at the end of this year, but its amount will, it is to be hoped, be small enough to be met by appropriation from profits without encroaching upon reserves.

Banking Capital and Reserves.

The following statement shows the position of the banking capital and reserves of the United Kingdom, excluding the Bank of England, whose capital is £14,553,000 and reserve £3,000,000:—

	1911. £	1912. £	Inc. or dec. £
English joint stock— Capital	47,614,400	47,370,800	— 243,600
English joint stock— Reserves	33,366,500	32,641,500	— 725,000
English private (capital and reserves)	3,533,000	3,558,800	+ 25,800
Scotland—Capital	9,241,100	9,241,100	—
Scotland—Reserves	8,319,300	8,435,100	+ 115,800
Ireland—Capital	7,309,200	7,309,200	—
Ireland—Reserves	4,171,000	3,957,900	— 213,100
	113,554,500	112,514,300	— 1,040,200

Comparison is made with the figures of a year ago, hence the decline in the English reserve funds. The drop of £243,600 in the paid-up capital is due to the purchase of the Stamford, Spalding, and Boston Bank by Barclays. Increases of capital during the year have occurred in the case of the London and South-Western, Lloyds and the Halifax Equitable.

Liabilities to Customers.

Bank deposits usually exhibit a slower rate of growth between January and June than between June and December, and a rational explanation for this is the rise in money rates in the autumn, which encourages the increase of money placed on deposit with the banks during that time. At the end of December last the deposits of the English joint stock banks were £748,600,000, and at the end of June they had risen to £752,400,000, a rise of £4,200,000. As compared with this time last year, however, there is an increase of no less than £18,600,000. The comparisons for the year are shown below:—

Current and Deposit Accounts.

	June 30, 1911 £	% of Liabi- lities	June 30, 1912 £	% of Liabi- lities	Inc. or Dec. £	Inc. or Dec. %
Bank of England	63,042,500	57.2	66,735,400	59.4	+ 3,692,900	+ 5.8
Other English joint stock	734,857,000	85.2	752,402,200	85.3	+ 17,545,200	+ 2.5
Private	20,657,400	84.2	27,139,900	84.5	+ 6,482,500	+ 1.8
Scotland	100,684,600	77.5	112,208,400	77.5	+ 11,523,800	+ 5.2
Ireland	65,418,200	77.0	67,508,100	77.6	+ 2,089,900	+ 3.5
Isle of Man & Channel Islands	1,067,000	80.2	1,094,200	80.8	+ 27,200	+ 2.5
	996,575,700	81.1	1,027,087,400	80.8	+ 30,511,700	+ 3.1

The deposits of the Bank of England at the end of June were extraordinarily large—nearly £67,000,000—owing to the size of the Government balances on account of the undistributed surplus revenue. Only once before have the Bank of England deposits at the end of June been in excess of the above figure, and that was in 1910, when the postponement of the Budget caused the revenue collections to be made at a later date, when the bank reserves at the same time were increasing in preparation for the usual autumn drain. Once again the Irish banks show a high percentage of increase in their deposits, indicating that Ireland is becoming more thrifty.

Tabulation of Assets.

The assets held by the banks against their deposits exhibit movements in the same direction as were shown in our figures last May, and relating to the calendar year 1911. These changes are towards higher cash and short money reserves, in keeping with the heavier liabilities on deposits, and larger discounts and advances owing to the greater requirements of trade, commerce, and finance, with the result that investments have suffered in order to provide funds. The movement of assets is shown in the tables below:—

Cash in Hand at Bank of England and Money at Call and Short Notice.

	June 30, 1911 £	% of Assets	June 30, 1912 £	% of Assets	Inc. or Dec. £	Inc. or Dec. %
Bank of England	40,437,800	37.9	41,083,800	36.1	+ 646,000	+ 1.6
Other English joint-stock banks	206,594,200	23.0	208,469,600	23.6	+ 1,875,400	+ 0.9
Private Banks	6,437,900	20.5	6,750,500	21.0	+ 312,600	+ 4.8
Scotch banks	25,599,000	18.6	30,129,200	20.7	+ 4,530,200	+ 17.7
Irish banks	14,131,500	16.7	13,679,000	15.6	— 452,500	— 3.2
Isle of Man & Channel Islands	173,700	13.1	187,900	13.8	+ 14,200	+ 8.2
	293,374,100	23.9	300,300,000	23.8	+ 6,925,900	+ 2.4

Investments.

	June 30, 1911 £	% of Assets	June 30, 1912 £	% of Assets	Inc. or Dec. £	Inc. or Dec. %
Bank of England	33,421,300	30.4	32,433,700	27.6	— 987,600	— 3.0
Other English joint-stock banks	136,287,000	15.8	133,450,800	14.9	— 2,836,200	— 2.1
Private banks	8,092,600	25.8	7,903,900	24.6	— 188,700	— 2.3
Scotch banks	33,308,000	24.2	33,944,100	23.4	+ 636,100	+ 1.9
Irish banks	23,998,900	28.2	24,556,600	28.1	+ 557,700	+ 2.3
Isle of Man & Channel Islands	463,600	34.8	438,700	32.3	— 24,900	— 5.4
	235,571,400	19.2	232,727,800	18.4	— 2,843,600	— 1.2

Discounts and Advances.

	June 30, 1911 £	% of Assets	June 30, 1912 £	% of Assets	Inc. or Dec. £	Inc. or Dec. %
Bank of England	38,355,700	32.2	40,275,900	35.5	+ 3,920,200	+ 10.8
Other English joint-stock banks	476,334,100	55.0	491,418,700	55.5	+ 15,084,600	+ 3.2
Private banks	15,822,600	50.5	16,296,200	50.7	+ 473,600	+ 3.0
Scotch banks	70,663,500	51.3	71,559,300	49.3	+ 895,800	+ 1.3
Irish banks	45,812,300	54.0	47,633,600	54.6	+ 1,821,300	+ 4.0
Isle of Man & Channel Islands	646,800	48.6	665,400	50.5	+ 18,600	+ 6.0
	645,635,000	52.6	667,899,100	52.8	+ 22,264,100	+ 3.4

The ratio of cash and money at call to deposits is of more importance than its ratio to total liabilities, for changes in the amount of capital and reserves, which are not callable liabilities, may affect the amount of total liabilities, although their amount is not of importance when considering the liquid position of the banks as a whole. The movement of cash and short money in relation to deposits is shown below:—

Ratio of Cash and Short Money to Deposits.

	June 30, 1911. %	June 30, 1912. %	Inc. or dec. in percentage.
Bank of England	64.2	61.6	— 2.6
Other English joint stock	28.2	27.8	— 0.4
Private	24.2	25.0	+ 0.8
Scottish	24.0	26.0	+ 2.0
Irish	21.6	20.3	— 1.3
Isle of Man	16.5	17.2	+ 0.7

The cash item of twenty of the more important English banks is divided into cash actually in hand and with the bank, and cash lent at call or short notice, making the following analysis possible:—

	1911. £	1912. £	Inc. or dec. Amount. £	%
Cash	96,755,300	98,028,100	+ 1,272,800	+ 1.3
Money at call	80,040,200	88,918,500	+ 8,878,300	+ 11.1
Tot'l (20 banks)	186,695,500	186,946,600	+ 251,100	+ 0.1

Thus practically all of the additional liquid reserves of the banks is held in the form of cash in hand or at the Bank of England.

In the same way discounts and advances may be divided as follows:—

	1911. £	1912. £	Inc. or dec. Amount. £	%
Discounts	70,599,900	72,120,800	+ 1,520,900	2.2
Advances	263,504,000	274,373,400	+ 10,869,400	4.1
Tot'l (25 banks)	314,103,900	346,494,200	+ 12,390,300	3.9

Lloyds, London City and Midland, and London County and Westminster together almost account for the big increase in advances.

Our contemporary concludes with a summarized aggregate balance sheet of the banks of the United Kingdom, including the Bank of England:—

Liabilities.				
	1911. £	1912. £	Inc. or dec. £	%
Capital and reserves	131,107,500	130,067,300	— 1,040,200	
Undivided profits ..	4,286,900	4,892,600	+ 605,700	
Deposits	996,575,700	1,027,087,400	+ 30,511,700	
Acceptances	44,160,600	49,824,800	+ 5,664,200	
Notes, bills, etc...	51,263,800	51,335,100	+ 71,300	
Total	1,227,394,500	1,263,207,200	+ 35,812,700	
Assets.				
	1911. £	1912. £	Inc. or dec. £	%
Cash in hand and money at call ..	293,372,100	300,300,000	+ 6,927,900	
Investments	235,571,300	232,727,800	— 2,843,500	
Discounts and advances	645,645,100	667,899,100	+ 22,254,000	
Sundries	52,806,000	62,280,300	+ 9,474,300	
Total	1,227,394,500	1,263,207,200	+ 35,812,700	

CANADIAN BANKS WITH OFFICES IN LONDON

UNIFORMITY IN CANADIAN DAIRY PRODUCTS

A few months ago there was held at Ottawa a conference of dairy experts and officials from all parts of the Dominion. The meeting was called by the Honorable, the Minister of Agriculture, for the purpose of endeavoring to perpetuate the uniformity in quality and character of Canadian cheese and butter that has been responsible for the success of Canadian dairying. As pointed out by the Dairy and Cold Storage Commissioner, who presided over the conference, many things come up in the practice of dairying over which slight difference of opinion may arise so that it seems desirable to bring together from time to time those in charge of dairy schools, and the chief instructors, in the various provinces, to discuss methods and practices, in order to arrive at some agreement as a body of dairy advisors. The conference lasted two days during which time many matters of importance were taken up and freely discussed. Some of these were the pasteurization of whey, factory refuse in relation to tuberculosis in hogs, testing and grading cream at cream gathering creameries, whey butter, methods of paying patrons of cheese factories, and other subjects relating to the production of butter and cheese. For the information of buttermakers and cheese-makers, and others interested in dairying, there has been printed a verbatim report of the proceedings of this conference. Copies may be procured by applying to the Publications Branch of the Department of Agriculture, at Ottawa.

CALGARY WANTS NATURAL GAS AS PUBLIC UTILITY

The possibility of acquiring natural gas as a public utility is exercising the minds of many prominent citizens of Calgary. Since the introduction of the gas on a large scale by the Canadian Western Company, the convenience of its use in residences has been brought closer to more people. There is no complaint that at 35 cents per thousand feet it is too expensive when properly used, but having in mind the many wells scattered throughout Alberta where only a small portion is being used, or none at all, the question is freely asked why the city should not have its own supply? True, there is a well within the city limits piped into many houses and used extensively for lighting the streets east of the Elbow River, but its depth, 3,300 feet, and the difficulties met with when it was drilled, rather discouraged any further attempts just then. There is a pressure of 230 lbs. to the square inch at this well. At Bow Island the pressure is 800 lbs. But large manufacturers, though they may, with this gas at present prices, produce power at a cost of under \$10 per horse-power per annum, would be more readily induced to locate in this city if that rate was reduced, a concession that the present company is not prepared to make. Hence it is advocated that the city ask the ratepayers to sanction an expenditure of \$100,000 on the chance that a sufficient quantity can be tapped at a reasonable depth.

The Northwestern National Insurance Company, of Milwaukee, Wis., has been registered in Ontario to transact fire, tornado and hail insurance. Mr. R. F. Massie, Toronto, is the chief agent for Ontario.

The Bank of Toronto has opened branches at Assiniboia and Lemberg, Sask. The capital stock of the Canadian Sardine Company, Limited, has been increased from \$1,000,000 to \$1,600,000.

SHAWINIGAN COMPANY'S EARNINGS AND SALES

Shareholders May Authorize New Issue of Stock—Fine Installation on St. Maurice River

Monetary Times Office,
Montreal, November 6th.

The shareholders of the Shawinigan Water and Power Company are to be asked to authorize the directors to issue \$500,000 more of the perpetual consolidated debenture stock of the company, bearing interest at the rate of 4½% per annum. This issue, which will probably be authorized at the meeting which is called for December 10th, will bring the total issue of such debenture stock to \$5,500,000. It is not thought that the intention of the directors is to make the issue at the present moment, but that they are simply placing themselves in a position to make the issue when desirable.

It is only a few months since the company made an issue of \$1,000,000 additional common stock, bringing the total issue up to \$11,000,000. By means of making the additional issue of common stock, the company has placed itself in a position to make the issue of debentures spoken of above. There is a provision to the effect that the company may only issue debenture stock to the extent of half the amount of common stock issued. The Shawinigan debentures are a charge on the company's undertaking and are secured by a deposit of the securities of the subsidiary concerns and are secondary only to the first mortgage bonds.

Earnings are Increasing.

The gross earnings of the Shawinigan Water and Power Company last year amounted to \$1,219,857, which, together with the premium of \$129,858 received on the sale of new stock, permitted the payment of the dividend at the increased rate of 5%, and appropriations amounting to somewhat over \$300,000. The amount carried forward, however, as surplus at the end of 1911, was a little less than \$10,000, so that had it not been for the premium received on new stock issue and the balance of more than \$23,000 brought forward at the beginning of the year, the company would no doubt have cut down on its appropriations. During the present year, the earnings have been increasing, and it is likely will be at least \$30,000 to \$35,000 greater than a year ago. It will be seen that the new capital issues proposed are keeping pace with increased earning power of the immediate future.

Principal Customer's Contracts.

The Montreal Light, Heat and Power Company, with which the Shawinigan Company works in close connection, is its largest customer, having now contracts amounting to all to 63,000 horse-power. This is all for the city and island of Montreal. It is unlikely that the Montreal Light, Heat and Power Company is taking this entire quantity as yet, having only closed the contract for the last 40,000 horse-power of this quantity in 1911. The city of Three Rivers gets the bulk of its current from the Shawinigan Company also. Altogether, the company will develop about 175,000 horse-power, divided as follows:—

Sold as hydraulic power	45,000 h.p.
Electrical development—	
Installed in first power house	55,000
Installed in second power house	30,000 85,000 h.p.
Total power now deliverable	130,000 h.p.
Three units to be installed in second power house	45,000 h.p.

Total horse-power at the falls 175,000 h.p.

Syndicate Withdraws From Negotiations.

After succeeding in obtaining a franchise for the supply of water to the Parish of St. Laurent, lying just west of Mount Royal, the Franco-Belgian Investment Company has withdrawn from negotiations with the parish, and has given notification to this effect. The company will now go before the legislature for its powers, it is claimed.

It would seem that the Franco-Belgian Investment Company went to the parish in the first place to obtain exclusive franchises for the supply of water, lighting and street cars. It was granted the franchise for the supply of water upon the payment of a deposit of \$20,000. It is claimed that the parish has made various changes in the terms, and in addition to this the company was not desirous of posting such a large sum of money for the single service.

It is not generally thought that the parish could support a tramways service within the borders of the parish alone, but that the main profits from such an undertaking would be in making connections with the city. This service, however, is now performed by the Montreal Tramways Company.

PARLIAMENT AND TRANSPORTATION INTERESTS

Activities at Ottawa and Quebec—Public Interested in Questions to be Brought Forward

Monetary Times Office,
Montreal, November 6th.

The street is discussing the generally accepted reports that there will be much activity at Ottawa and Quebec during the present sessions of parliament, in connection with transportation questions of much importance to Montreal. The Canadian Pacific Railway, it is said, will be, if anything, more alert than usual owing to the feeling which the country has displayed in connection with its new stock issues. The position, apparently, is that the company may proceed with the issue of the \$60,000,000 stock approved by the shareholders at the last annual meeting at \$175 per share, and that for this purpose it requires no authority not already possessed by it.

Question of Future Issues.

As to future issues, however, there is some doubt. The company recently made application for an increase of \$60,000,000 in addition to the above, and it is thought that the management would like to be assured that this increase would be granted. It seems reasonably certain that the proposal will be opposed when it comes before parliament. The Canadian Pacific Railway is represented at Ottawa, its interests being of such a wide nature that this could not be otherwise, particularly during sessions. This year, it is understood that the representation will be larger and the interests of the company watched with keenness.

The concern which will make Quebec its temporary headquarters is the Montreal Tramways Company, or the Montreal Tramways and Power Company, the latter being the holding company for the former, the Canadian Light and Power Company, and other concerns. The Tramways and the city have been at variance for years past, since the control of the old Montreal street railway changed hands and the Tramways Company took control.

What May Be Desired.

Protestations are often heard on both sides, the Tramways Company declaring that it cannot get the city to take action which will place it in a position to give the service which the citizens are demanding, and the city claiming that the company will not do what it can to give the service. This arguing has been continuous, and it would seem that action in the matter is as far away as ever.

The company, it is supposed, may make an attempt during the present session at Quebec to go over the heads of the city authorities and to deal direct with the legislature. Apparently, the company desires a renewal of its franchise, though what features will be demanded is a mere matter of conjecture. The general idea is that it is desirous of obtaining something in the nature of a blanket franchise to cover the city and island, and perhaps beyond.

The service has not been improving of late, nor can it improve until more lines are granted and more cars are run. It certainly would seem that the company has asked for the streets to run its lines on, and it would be difficult to state just why these streets have never been granted. It now looks as though a battle royal between the company and the city representatives will take place at Quebec during the present session.

Public Accounts of the Past Fiscal Year—Record of Receipts, Expenditure and Debt

Receipts, Consolidated Fund	\$136,108,217
Expenditure, Consolidated Fund	98,161,440
Surplus	\$37,946,776
Charged to capital	30,939,575

The above are the chief figures of the public accounts of Canada for the fiscal year 1911-12, just issued. The income of the country, it will be noticed, reached the large sum of \$136,000,000. The outlays made and charged to capital account, in addition to the consolidated fund expenditure of \$98,000,000, were divided as follows:—

Railways	\$23,108,474
Quebec Bridge	1,153,778
Canals	2,560,938
Public works	4,116,385

Total capital expenditure \$30,939,575

Railway subsidies to the amount of \$859,400 were paid on account of the following:—

Central Ontario Railway Company	\$ 826
St. Mary's and Western Ontario Railway Company ..	365
Quebec, Montreal & Southern Railway Company...	23,835
Canada & Gulf Terminal Railway Company	65,249
Quebec and Lake St. John Railway Company	27,520
Canadian Pacific Railway Company	108,608
Atlantic, Quebec & Western Railway Company ...	91,279
Algoma Central & Hudson Bay Railway Company ...	133,584
Canadian Northern Quebec Railway Company ...	86,468
Thessalon & Northern Railway Company	6,112
Kettle River Valley Railway Company	148,800
Quebec & Saguenay Railway Company	104,992
Vancouver & Lulu Island Railway Company	61,760

Total railway subsidies \$859,400

Payments on Bounties.

The sum of \$538,530 was paid on account of bounties on the following:—

Iron and steel	\$166,750
Lead	179,288
Binder twine	50,556
Crude petroleum	141,935

Total bounties \$538,530

At the close of the fiscal year, the balance at the credit of the depositors in the post office and government savings banks amounted to \$58,219,328, an increase of \$124,997 as compared with the balance held on March 31st, 1911. The withdrawals during the year exceeded the deposits by \$1,556,029, while \$1,681,026 was added for interest accrued, thus making a net increase of \$124,997.

Investments on account of the sinking funds of the various loans were made during the year to the amount of \$1,156,456. Accordingly, the total of the investments at the credit of the sinking funds, which stood at \$11,196,825 on March 31st, 1911, at the conclusion of the fiscal year, 1912, amounted to \$12,353,282.

Record of the Debt.

The net debt of the Dominion at the close of the fiscal year was \$339,919,460, or a decrease of \$122,591 from the net debt as it stood on March 31st, 1911. The decrease is accounted for as follows:—

Capital expenditure on National Transcontinental Railway	\$21,110,352
Capital expenditure on other railways canals and public works	9,829,223
Railway subsidies	859,400
Consolidated Fund Transfers:	
Grand Trunk Pacific Railway implementing payments	\$4,904,416
Other transfers	2,187,248
	\$7,181,665
	\$38,980,641
Surplus of Consolidated Fund receipts over Consolidated Fund Expenditure	\$37,946,776
Sinking Fund	1,156,456
	\$39,103,232
Decrease of net debt	\$ 122,591

The bonds guaranteed by the Dominion involved a principal of \$18,886,519. The list is as follows:—

1. Canadian Northern Railway Company; for the principal of £1,923,287 sterling, and interest thereon at the rate of 3 per cent. per annum for fifty years.

2. Canadian Northern Railway; for the principal of £1,622,586 19s. 9d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from July 20th, 1908, interest payable half yearly.

3. Canadian Northern Ontario Railway Company; for the principal of £7,493,385 12s. 4d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from May 19th, 1911, interest payable half-yearly.

4. The Canadian Northern Alberta Railway Company; for the principal of £647,260 5s. 6d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from May 4th, 1910, interest payable half-yearly.

Grand Trunk Pacific Finances.

5. Grand Trunk Pacific Railway Company; of 3 per cent. bonds of the Railway Company to an amount equal to 75 per cent. of the cost of construction of the Western Division of the National Transcontinental Railway, but not exceeding \$13,000 per mile in respect of the prairie section of the said railway. The amount of bonds issued and guaranteed is £7,200,000, of which £3,200,000 were issued in 1905, £2,000,000 in 1909, and £2,000,000 in 1910. In addition £1,668,000 of these bonds have, upon terms and conditions approved by the Governor-in-Council, been pledged by the company against advances obtained for the purposes of the construction of the company's railway.

Advances were made under statute to the Montreal Harbor Commissioners amounting to \$3,050,000.

The circulation of Dominion notes has advanced to \$113,329,633, or an increase over the circulation at the close of last year, of \$23,335,363, with a corresponding increase in the gold reserve.

RAILROAD EARNINGS.

The following are the railroad earnings for the week ended October 21st:—

	1911.	1912.	Increase or decrease.
C.P.R.	\$2,532,000	\$2,943,000	+ \$411,000
G.T.R.	1,023,892	1,132,152	+ 108,260
C.N.R.	459,000	561,100	+ 102,100
T. & N.O.R.	44,182	27,959	— 16,222

The following are the railroad earnings for the week ended October 31st:—

	1911.	1912.	Increase or decrease.
C.P.R.	\$3,675,000	\$4,295,000	+ \$600,000
G.T.R.	1,463,496	1,648,054	+ 184,558
C.N.R.	794,700	628,500	+ 166,200
T. & N.O.R.	61,285	40,234	— 21,051

The gross earnings of Canadian Pacific Railway last month reached \$12,962,000, the largest in the history of the road. The increase over October of last year was \$1,847,000. The earnings for the first four months of the company's fiscal year were \$48,845,000, which is an increase of \$7,498,000 over the corresponding four months of last year.

The statement of the revenue and expenditure of the Intercolonial Railway for the year ended with March 31st, last, shows:—

Passenger traffic, \$2,842,810; freight traffic, \$6,891,037; mails and express, \$428,985; miscellaneous, \$430,052; total revenue, \$10,593,785. Maintenance of way and structures, \$1,812,419; maintenance of equipment, \$2,681,543; traffic expenses, \$217,943; transportation expenses, \$5,630,139; general expenses, \$248,990; total working expenses, \$10,591,035.

The net earnings on this showing were \$2,750. The capital cost of the road is given as \$84,759,680.

Application will be made at the next session of the Dominion Parliament by the Imperial Underwriters' Corporation, incorporated in British Columbia, for an act to change the name of the company to Imperial Underwriters' Corporation of Canada, with power to take over the business, assets and liabilities of the provincial company, and to carry on throughout Canada the business of fire, plate-glass and accident insurances. The company's head office will be at Vernon. B.C. Messrs. Lewis & Smellie, Ottawa, are solicitors for the applicants.

CANADA'S PACIFIC COAST ACTIVITIES

Industrial, Mining and Transportation—United States
Financiers Interested in British Columbia

(Staff Correspondence.)

Vancouver, November 4th.

Business men in British Columbia are much interested in the story that a tax may be levied on British investments in Canada. There is a large amount of British money invested in this province, and the prospect is that there will be much more unless something interferes. Although United States capital predominates in the large mining industries, capital from Great Britain is largely interested in industrial enterprises and in the lumber industry. It is particularly prominent as backing to the railway enterprises. It may be that Mr. Lloyd George does not intend to tax re-investments in Canada, though his action in seeking certain information bearing on the matter might lead to that belief. If the tax were levied only on products made in Canada, it is very probable that there would be a difference in the amount of capital that might come to this part of Canada, but if the tax applied to wherever British capital might be invested, it would not be a deterrent. All things being equal, capital will seek the best opportunities for returns, and Western Canada with its possibilities offers excellent inducements.

Development of Mineral Resources.

With the calling of tenders for the erection of its smelter at Granby Bay, Observatory Inlet, the Granby company is making a start in the practical initiation of a large mining industry in the northern part of the province. Much preliminary work has been done, and much money spent, and it is now proposed to have the smelter in operation inside of another year. It will be able to handle 2,000 tons of ore daily, and will have three copper furnaces, the expenditure to be over \$1,500,000. After the copper furnaces are in commission a lead stack will be installed so that custom ores from the Hazelton district can be treated. Already 400 men are employed by the company, which means quite a little town.

Industries are steadily being established on the coast, the operation of which mean much to business and supply men. Close to Vancouver there is the Britannia mine; at Texada Island two or three good mining propositions are being exploited; at Powell River a pulp and paper mill is in operation; at Swanson Bay is another pulp mill; at Ocean Falls, another, along with a large sawmill; mining prospects at Hazelton are bright, while on the Portland Canal the Granby company will have a mining town of its own.

Railway Proposals in Vancouver.

Although conditions have been reported quiet in Vancouver, figures of different public departments do not show much diminution. Building returns had new records this week; the new Canadian Pacific Railway depot created a record for the largest permit. Just what the Canadian Pacific Railway has in view on the Pacific coast is indicated by what it proposes to do in the way of hotel accommodation in this city. Some time ago plans were submitted to the city building department for a new Vancouver hotel to be eleven stories in height and to cost \$800,000. These plans have been cancelled, for it is proposed to make the structure sixteen stories high at a cost of at least a million dollars. Besides these two items just mentioned, there is the Canadian Pacific Railway tunnel under the city to its yards on False Creek. The Canadian Northern Railway has agreed with the city to expend several millions in connection with the improvement of the head of False Creek, the expenditure to be made within a specified time. The Great Northern will spend another million or two. Several other schemes involving large expenditures have been suggested.

Surveys have been begun by the British Columbia Electric Railway Company for a line to be constructed between New Westminster and Port Moody. When this line is built it is hardly probable the construction will stop there, for it would be an easy matter to complete the belt line via Vancouver. The utilization of these routes would give the British Columbia Electric complete control on the lower mainland.

United States capital is seizing opportunities in the northern interior in the way of colonization possibilities, and the latest deal is an immense one. Mr. Lauchlin Maclean, of Spokane, and associates have bought 550,000 acres for \$2,720,000. The question might be raised, though, if the acquisition of these large areas by syndicates might not be a cause in discouraging the bona fide settler who wants land as cheap as he can get it, as otherwise he cannot afford to pay two or three profits.

NEARLY TEN MILLIONS OF NEW STOCK

Six Companies Will Increase Their Capital—Common
and Preferred Issues

Cedar Rapids	\$6,000,000
Shawinigan	500,000
F. N. Burt	500,000
Toronto Carpet	500,000
Canadian Sardine	900,000
Ottawa Electric	1,500,000
	\$9,600,000

Six companies propose to add a total of \$9,600,000 to the corporation stock indebtedness of Canada.

The Cedar Rapids Power and Manufacturing Company will make an issue of \$6,000,000 of common stock at 75, bringing the paid-up capital stock to \$14,000,000. The authorized capital will be made \$15,000,000, a balance of \$1,000,000 stock will be left in the treasury. The present capital authorized is \$10,000,000 with \$8,000,000 paid-up.

The Shawinigan Water and Power Company will issue \$500,000 new 4½ per cent. consolidated debenture stock, and a meeting of the shareholders will be called on December 10th to ratify the issue.

New F. N. Burt Issue.

The directors of the F. N. Burt Company will ask the shareholders to authorize an increase of \$500,000 in the preferred capital stock of the company. A meeting of shareholders has been called for November 15th. There is outstanding \$2,140,200 preferred stock, and a balance of \$69,800 is still unissued. This balance will be issued at the same time as the half million new stock. The new preferred stock will be issued to shareholders at par. The total preferred issue of the Burt Company will then be \$2,750,000.

The capital stock of the Toronto Carpet Company is to be doubled, being raised from \$500,000 to \$1,000,000 by the issue of \$200,000 preferred and \$300,000 common. The terms of issue have not yet been made public. The company has had a very successful year.

Ottawa Electric Railway.

The Ottawa Electric Company is applying for power to increase the capital stock from \$1,500,000 to \$3,000,000.

The Canadian Sardine Company, Limited, has received authorization from the Government to increase its capital from \$1,000,000 to \$1,600,000. This is the new company concern which was authorized by Mr. Johnston, of Johnston, McConnell and Allison, and Sir William Van Horne. The entire production of the present plant is said to be sold for the next year, and the new capital is being secured with the view of increasing the output of the plant.

HOLLINGER REPORT

Profits of \$40,000 per week are shown in the provisional statement of the Hollinger Gold Mines, Limited. The surplus is given at over \$800,000, of which \$550,000 represents profits from operations. As a sufficient surplus had been accumulated to meet any emergency, the directors have decided to commence a regular distribution of profits among the shareholders every four weeks.

The statement shows the cash on hand to amount to \$33,496.44, and bullion of \$27,570. The bullion shipped, but not paid for, is given as \$80,498.65. The gold precipitates on hand are \$97,500, and gold in slags and mill solutions \$41,000. The reserve for dividend No. 1 is placed at \$90,000, while the total current assets amount to \$420,464.34. The capital assets, made up of mining properties, developments, and plant, amount to \$3,396,284.33.

The current liabilities, made up of expenses, come to \$57,975.86, while the capital stock is \$3,000,000. The premium on shares sold invested in the plant and development are \$250,000, while the profits re-invested in plant amount to \$82,432.02, reserve for dividend No. 1, \$90,000, while the balance in reserve is given as \$336,338.80. It is estimated that the surplus on November 2nd, will, when the returns come in, be approximately \$8,000,000.

The underground development has been most satisfactory. With 40 stamps in operation, the plant has milled from 450 to 500 tons per day, while on an average it is treating 300 tons daily.

An overdraft of \$171,018.80 is shown by city auditor Cluff in a monthly statement recently submitted to the Ottawa board of control. The main figures are \$54,076 in the waterworks, and \$65,227 in the board of works.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

St. Paul, Minneapolis and Sault Ste. Marie Railway.—"Soo" Railway September gross increase in earnings is reported at \$191,574; net increase, \$32,902. From July 1, gross increase, \$584,476; net increase, \$52,152.

Canadian Car and Foundry Company.—The Canadian Car and Foundry Company have purchased the Pratt and Letchworth Company of Brantford. This company employs five hundred hands in the manufacture of malleable iron castings. The firm now becomes a purely Canadian concern, its general policy having been formerly directed from Buffalo. No change is contemplated in operating, management or name, and extensive enlargements to the plant are proposed.

Canadian Pacific Railway.—Directors of Canadian Pacific will meet on Monday to declare regular quarterly dividends on the common and preferred stocks. At this meeting some statement may be made regarding the forthcoming of \$60,000,000 of new stock.

The \$2,000,000 of unissued stock of the old authorization of \$200,000,000 will, in all likelihood, be offered to a syndicate of London bankers and listed with the \$18,000,000 stock issued and fully paid October 18 last.

London and Canadian Loan and Agency Company.—The London and Canadian Loan and Agency Company will offer to shareholders of record December 15, \$250,000 new stock at par. The paid-up capital of the company will thus be increased from \$1,000,000 to \$1,250,000. The authorized capital is \$2,000,000.

The new shares will be offered at par value of \$50 to shareholders in the proportion of one share of new for every share of old stock now held. Payment will be in five instalments of \$10 each, commencing February 1, 1913, the last payment being due January 2, 1914.

Nova Scotia Steel and Coal Company.—The Nova Scotia Steel and Coal Company's October output of the coal mines amounted to 79,000 tons, as against 67,688 tons in September. The total shipments for the month amounted to 81,000 tons, as against 78,789 in September. The pig iron production totalled 7,800 tons, as against 7,480 tons in September, steel ingots 9,200 tons, as against 6,722 in September. The iron ore production during the month totalled 81,000, as compared with 61,800 in September.

The coal output of 79,000 tons constituted a new high record for monthly output, while the output of the steel department is the best for years.

Mexico Tramways Company.—This company will offer for subscription the balance remaining unissued of the capital stock of the company, namely, \$3,500,000. This will bring the amount of stock issued up to the full amount of \$20,000,000. The issue is being made for the purpose of providing funds for the extensions of the tramway system, for advances to subsidiary companies in connection with the developments of their plants and business, for repaying temporary loans, and for other purposes of the company. The new shares will be offered at par to shareholders of record on November 16, in the proportion of 7-33 of a new share for every old share now held. The new shares will rank for dividend from February 1, 1913.

Porto Rico Railways Company.—Porto Rico Railways Company had another decrease in net earnings in September, although a slight increase was noted in gross. The decrease in net represents 22.19 per cent. of last year's September figures. For nine months a gain in gross and a loss in net are also registered, the decrease in net being 15.27 from the same period last year.

A comparative statement of earnings follows:—

September—	1911.	1912.		
Gross	\$ 62,848	\$ 64,015	Inc.	\$ 1,167
Net	31,625	24,609	Dec.	7,016
Nine months—				
Gross	\$552,400	\$615,546	Inc.	\$63,146
Net	280,460	237,610	Dec.	42,849

Brazilian Traction, Light and Power Company.—Net earnings of nearly one million dollars for the month of September are shown in the first statement of earnings published by the Brazilian Traction, Light and Power Company. On the \$95,000,000 capital stock issued this represents approximately 12 per cent. per annum.

During September last year the Rio Company's net earnings were \$594,783, and Sao Paulo's net earnings \$201,832, the total for the two companies being \$796,615. This does not include the Sao Paulo Electric Company, which is now in the merger.

Following is the statement of earnings and operating expenses of the Brazilian Traction Company for September, 1912:—

Gross earnings for operations	\$1,691,298
Operating expenses	737,397
Net earnings	953,901

Dominion Iron and Steel Company.—The Dominion Iron and Steel Company made new records last month. The output of pig iron, blooms and rods and coke is considerably in excess of that for any previous month. The figures for the wire and nail mill are not yet available, but both have established records.

The shipments, while well up to the average, are some 3,000 tons below the record. The blowing in of the new No. 8 blast furnace is responsible principally for the increased output. Following are the figures:—

Pig iron, tons	31,090
Steel Ingots, tons	29,975
Bloom, tons	27,880
Rails, tons	15,656
Rods, tons	8,868
Coke, tons	50,540

Total shipments, tons

29,360

PERSONAL NOTES

Premier Sifton, of Alberta, is in England.

Messrs. W. R. R. Allan, Winnipeg, and Allan C. Dunlop, Montreal, are applying for membership on the Montreal Stock Exchange.

Mr. M. M. Reynolds, vice-president of the Grand Trunk, was elected a director of the Montreal Warehousing Company in the place of Mr. J. W. Loud.

Mr. Russell Blackburn, Ottawa, was elected a director of the Bank of Ottawa to fill the vacancy caused by the death of the late H. F. McLachlin, of Annprior.

Mr. G. W. Goodall, the Western Canada representative of The Monetary Times, is making his biennial trip through the prairie provinces and British Columbia.

Mr. T. W. Forwood, of Messrs. Thos. W. Forwood and Co., stock brokers, has been elected a director of The Holmes Electric Protection Company, of Toronto.

Mr. Rudolf Kranke, foreign superintendent and attorney of the South German Reinsurance Company, Limited, of Munich, was a recent visitor to the head office of The Monetary Times.

Mr. J. J. Durance, manager for Canada of the General Accident Assurance Company of Canada, has returned to Toronto from a trip to Western Canada, and reports general conditions good, and the outlook in his particular sphere excellent.

Mr. R. C. L. Gault has retired from the stock brokerage firm of Messrs. Gault, Stephens & Company, and formed a partnership with Messrs. Neuville, Belleau, Quebec. The new firm will be known as Messrs. Belleau, Gault & Company. Both partners are members of the Montreal Stock Exchange. The brokerage business of Messrs. Gault, Stephens & Company, from which Mr. R. C. L. Gault retires, will be continued by Mr. F. C. Stephens, under the name of Messrs. F. C. Stephens & Company.

Mr. Henry J. Fuller, of Montreal, president of the Canadian Fairbanks-Morse Company, Limited, has been elected a director of the company.

Application will be made to the Dominion Parliament for an act to incorporate the Canadian-Phoenix Insurance Company, with power to carry on the business of a fire insurance company in all its branches. Messrs. Henderson and Matheson, Brandon, are solicitors for the applicants.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Camrose, Alta.—The Camrose public school board will, in the near future, issue debentures covering a total of \$10,000.

Stoughton, Sask.—Until November 11th for \$4,500 15-year 6 per cent. skating rink debentures. D. S. Lloyd, secretary-treasurer.

Transcona, Man.—Until November 15th for \$120,000 5 per cent. 20-year school debentures. J. W. Gunn, Sr., chairman of School Board.

Guelph, Ont.—The directors of the Guelph general hospital have requested the city council to submit a by-law to raise \$28,000 for required alterations.

London, Ont.—A by-law to set aside \$890,000 for the electrification of the London and Port Stanley Railway will be submitted to the ratepayers in January.

Nokomis, Sask.—Until November 30th for \$5,000 rink, and \$5,000 street debentures; interest 6%; maturing in 20 years. N. A. Armour, secretary-treasurer.

Sarnia, Ont.—Sarnia citizens carried the waterworks by-law. The city will spend nearly one-half million dollars to get pure water from the shore of Lake Huron.

Kildonan, Man.—Kildonan council decided on the submission of two money by-laws in December for two schools costing \$100,000, and a new school costing \$20,000.

Steelton, Ont.—Until December 3rd for \$7,000 school, \$9,000 park, and \$15,500 pavement debentures. J. Robinson, clerk. (Official advertisement appears on another page.)

Yorkton, Sask.—Until November 12th for \$207,000 5 per cent. 10, 20 and 30-year debentures. T. F. Acheson, secretary-treasurer. (Official advertisement appears on another page.)

Magrath, Alta.—Until November 20th for \$11,000 5 per cent. 20-year local improvement debentures. M. Godfrey, secretary-treasurer. (Official advertisement appears on another page.)

Athabasca Landing, Alta.—Until November 25th for \$80,000 5½ per cent. 25-year waterworks debentures. C. E. Nancekivell, secretary-treasurer. (Official advertisement appears on another page.)

Windsor, Ont.—The ratepayers voted favorably on two by-laws, authorizing the expenditure of \$12,000 for a fire engine and granting the usual exemptions to the Leggatt and Platt Spring Bed Company.

North Vancouver, B.C.—Until November 13th for \$169,000 5 per cent. 50-year streets, sidewalks, park and schools debentures; and \$61,823 5 per cent. 20-year local improvement debentures. John G. Harmer, C.M.C.

Biggar, Sask.—Until November 11th for \$12,000 30-year 5½ per cent. grading, and \$12,800 30-year 5½ per cent. waterworks debentures. H. P. Turner, secretary-treasurer. (Official advertisement appears on another page.)

Preston, Ont.—On November 18, the electors of Preston will intimate whether or not they approve of giving assistance in the shape of a loan to the Anchor Bedding Company, Limited, of Toronto, who are desirous of erecting a factory there.

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C.

Melville, Sask.—Until November 11th for \$55,000 5 per cent. 40-year town hall; \$6,000 5 per cent. 6-year mill loan; and \$43,300 5 per cent. 30-year debentures. Fred H. Clarkson, secretary-treasurer. (Official advertisement appears on another page.)

Outlook, Sask.—Up to November 25th for local improvement debentures (cement sidewalks), \$31,000, 5 per cent., 20 years, and \$15,000 electric light debentures, 5 per cent., 30 years. Albert Moore, secretary-treasurer, Outlook. (Official advertisement appears on another page.)

Calgary, Alta.—A by-law providing for a total appropriation of \$900,000, apportioned as follows:—Bridges, \$760,000; for right of way on south side of Bow River, producing Centre Street to the river edge, \$40,000; for engineering and contingencies, \$51,000; for re-erecting the present Ninth Street West bridge at Fourteenth Street West, \$40,000, may be voted on by the electors.

North Vancouver, B.C.—The North Vancouver school board were advised to make a request to the council to submit a by-law for \$62,000.

A by-law will be introduced at the next meeting asking for permission to expend the sum of \$75,000 on a new school site. The North Vancouver City Council will, in the near future, submit to the ratepayers of this city a by-law asking for permission to purchase stock in the Burrard Tunnel and Bridge Company to the extent of \$150,000.

SPASMODICAL LONDON FLOTATIONS

Land and Marble Issues Made Overseas—Dominion
Steel Bonds for Sinking Fund

Another Canadian land issue is being made in London, that of the Southern Ontario Land Company, with a capital of £250,000 in £1 shares. One hundred and fifty thousand shares are offered this week at par. It is proposed to develop 5,200 acres in Essex and Kent counties. The Financial News says the prospectus fails to give a clear idea of the way the new organization will develop. The hope of profit apparently rests on the suggestion that the value of the land will naturally increase. "It seems a case where the necessity of calling in of the British investor has not been proven."

British Canadian Marble Company.

Six per cent. first mortgage bonds of the British Canadian Marble Company, Limited, to the extent of \$100,000 have been offered in London by the Canadian and Colonial Corporation, Limited, at 95. The bonds are to bearer, and constitute a first fixed mortgage on the properties acquired and a floating charge in the whole undertaking and assets of the company. The property, which is in Quebec, consists of about 200 acres, and the waterpower of the Galway River, which is on the property, is more than sufficient to work the plant.

The Quebec Central Railway runs alongside the quarries, which are situated less than fifty miles south of the city of Quebec. The estimated value of marble actually in sight is as follows:—

Red—3,000,000 cubic feet at \$2..... \$6,000,000
Various other colors—6,000,000 cubic feet at \$1.. 6,000,000

\$12,000,000

Properties in Quebec.

The company has obtained a contract from a Toronto firm to supply them with 6,000 square feet of marble per month, at 90 cents per square foot finished, which, though a low price, will yield a profit. This contract represents \$5,400 per month gross profit. The running expenses of the plant, it is estimated, will be less than \$3,000 per month, providing for an output of marble to the value of \$15,000 at least; so that if this were the only contract, the company should have a net profit of \$2,400 per month, and be accumulating reserves of marble to the net value of \$9,600 per month. The company has no existing debt or liability.

The National Trust Company, acting on behalf of the Dominion Iron and Steel Company, will receive up to November 20th proposals to sell 5 per cent. mortgage bonds of the Dominion Iron and Steel Company up to an amount of \$52,699.27 for sinking fund purposes.

MONTREAL FIRE AND WATER

The frequent breakdowns in Montreal's water department were discussed by the fire underwriters this week, an increase of rates being considered. Mr. A. W. Hadrill, secretary of the Canadian Fire Underwriters' Association, stated after the meeting that the discussion was the result of the heavy loss at the fire in St. Patrick Street on Sunday night, as no one denied the lack of water had run up the loss. "When we consider that both buildings were fully equipped with fire sprinklers, we feel the fire should have been confined to the rope-walk and that probably would have been the case had there been enough water. The neglect of the water department to have their 15,000,000 gallon pump ready, which was ordered last year, is an instance of the way things are done. We are inclined to believe that the cause for so many accidents is either bad material or bad engineering, or insufficient supervision."

Mayor Lavallee says: "I will have an investigation into the whole question of the accidents which have been happening to the water system of the city. The investigation as to the pipes and the engines, will be made by experts and also the engineers of the city."

Messrs. D. Lorne McGibbon and F. H. Anson, of Montreal, have completed arrangements for the erection of a new sugar refinery at St. John, N.B., which will, it is said, have an output of 2,000 barrels of sugar per day. Mr. McGibbon arranged a deposit with the chamberlain of St. John as a guarantee that the plant will be complete within two years, and for considerations made by the city. It is understood that a part of the plan is to have an improved steamship service between St. John, N.B., and the West Indies, the advantage of which will be that the raw product will come direct to St. John by steamship.

DOMINION'S LOAN TRANSACTIONS

Financing During the Past Fiscal Year Was Light— Payment to Grand Trunk Pacific Railway

The loan transactions of the Dominion Government for the past fiscal year are detailed in the official returns just issued. On May 1st, 1911, the 4 per cent. loan of 1874, extended to that date, for £1,635,858, or \$7,961,178, was redeemed in cash. This loan was issued in London for £4,000,000 in 1874 to run for thirty years. On May 1st, 1904, £1,500,000 of this loan was redeemed, and £2,500,000 was extended to May 1st, 1907, with the option of converting into 3 per cent. stock at £105 for each £100, 1874 loan. £573,345 was so converted. On May 1st, 1907, the balance of the loan then outstanding, £1,831,398, was further extended till May 1st, 1911, with a similar option of converting into 3 per cent. stock up to April 30th, 1910; £96,532 was so converted.

Loan Issued in London.

In February, 1912, a loan of £5,000,000 3½ per cent. stock, due July 1st, 1950, with option to the Government to redeem at par on or after July 1st, 1930, on giving six months notice, was issued in London at £98 per cent. for the purpose of providing for the redemption on May 1st, 1912, of the 3½ per cent. loan of 1908-12.

On May 1st, 1912, the 3½ per cent. loan of 1908-12 for £4,681,870, or \$22,785,103, was redeemed and dealt with as follows:—

Redeemed in cash	\$17,344,113
Converted into 3½ per cent. loan, 1930-50 (February, 1912, issue)	5,440,990
	\$22,785,103

Canada Reduced Loan.

The above loan was issued in London for £5,000,000, June 24th, 1908, redeemable May 1st, 1912, with the option up to 30th September, 1910, of converting into 3 per cent. inscribed stock 1938 on the basis of £106 for each £100 3½ per cent. loan. On the maturity of the Canada Reduced Loan of 1885, due 1st January, 1910, and of the 1875 portion of the 1875-8 guaranteed loan due 1st October, 1910, stocks of the above loan, to the extent of £130,435, and £66,844, respectively, which were held as a portion of the Sinking Funds of such loans, were cancelled, and the amount of the 3½ per cent. loan then outstanding was reduced by such amounts. Stocks and bonds to the amount of £120,850 were converted into 1938 stock under the terms of the prospectus.

The sum of \$4,994,416 has been paid to the Grand Trunk Pacific Railway Company, out of the Consolidated Revenue Fund of the Dominion, to meet the obligations of the Crown to that company.

KOOTENAY AND BOUNDARY DISTRICT MINES

With production for the third week in October totalling 52,148 tons the ore output for the Kootenay and Boundary districts reached a figure for the year to date of 2,027,482 tons, setting up a new record for the mines of this section of British Columbia.

Over half of this total is contributed by the Granby Company at Grand Forks and the British Columbia Copper Company at Greenwood has smelted over 500,000 tons. The greater part of the balance of about half a million tons came from the mines of the Rossland, Nelson, East Kootenay, Slocan and Ainsworth districts. Over a quarter million tons has been smelted by the Consolidated Company at Trail this year to date.

Bloister copper shipments from the Granby smelter last week were 454,000 pounds, making a total for the year of 18,333,500 pounds. Smelter receipts for the week were 36,540 tons and for the year to date 1,870,950 tons.

Ore production and smelter receipts in detail were:

Nelson district—Week, 1,553 tons; year, 51,292 tons.

East Kootenay production—Week, 1,045 tons; year, 36,609 tons.

Rossland production—Week, 4,620 tons; year, 198,591 tons.

Boundary production—Week, 42,759 tons; year, 1,651,608 tons.

Slocan and Ainsworth production—Week, 2,171 tons; year, 89,392 tons.

Consolidated Company's smelter receipts, Trail—Week, 5,538 tons; year, 262,033 tons.

British Columbia Copper Company's receipts, Greenwood—Week, 14,898 tons; year, 510,020 tons.

Granby smelter receipts, Grand Forks—Week, 26,104 tons; year, 1,038,906 tons.

The name of A. R. Rice and Company, Limited, has been changed to Rice-Hydra, Limited.

NEW GENERAL MANAGER OF BANK OF BRITISH NORTH AMERICA

A keen, capable business man and experienced banker, Mr. H. B. Mackenzie has become general manager of the Bank of British North America, and undoubtedly will uphold the worthy traditions of Canadian banking, and the high standard of business and success maintained for many years by the bank. Mr. Mackenzie has a thorough knowledge of the needs, the problems and the development of the various provinces of the Dominion. His responsibilities will be heavy but his shoulders are broad and will carry them.

Born at Ingersoll, Ont., in 1867, a son of the Venerable Archdeacon Mackenzie, Rector of Grace Church, Brantford, his banking career commenced in the service of the Canadian Bank of Commerce in 1884, but in June, 1887, he joined the Bank of British North America at Brantford. In 1890, he was

Mr. H. B. Mackenzie

transferred to the general manager's office, at Montreal, and three years later was appointed secretary to the general manager. Shortly afterwards he became accountant at London, Ont., and was later connected for some years with the inspection staff, being promoted in 1903 to the office of chief inspector. In August, 1905, he was placed in charge of the Victoria, B.C., branch. In 1907, Mr. Mackenzie was appointed superintendent of Central Branches, with headquarters at Winnipeg, and three years later he was selected to fill the still more important post of superintendent of branches at Montreal, which he now leaves for that of general manager.

Mr. H. Stikeman, who is retiring from the position of general manager of the bank, joined the staff in London, England, in 1869, and has served 43 years, during the last 18 years of which he has occupied the position of general manager. His health, for sometime past, has not been good. Early in the year he asked the directors to be relieved of his duties whenever it could be done without causing inconvenience and this has been done.

REGINA IS MOVING UPWARD

Bank clearings at Regina last month totalled \$12,049,371, as compared with \$6,565,619 for the corresponding month of 1911. This increase of nearly 100 per cent. is worthy of note when it is borne in mind that only four months ago this city passed through a terrible experience the effects of which would ordinarily take some time to be remedied.

During 1911 Regina occupied thirteenth position among the cities in the volume of bank clearings, and it looks as if Regina intends occupying a position several places higher up the list this year.

The Dominion government is to spend \$10,000 on the erection of a wharf in the Saskatchewan at Edmonton. The wharf will be built at the landing place used by the steamers at the present time, the contract has been let to Messrs. Smith Bros., of Jasper Street West.

NEW YORK AND CANADIAN GRAIN

Rules for Trading in Canadian Contracts Are Being Prepared—Better Port Facilities

A special produce exchange committee at New York is now preparing a set of rules, according to which it is proposed to trade in Canadian grain contracts on the New York market, subject to the approval of the regular grain committee and to the final assent of the produce exchange.

The volume of business involved in the admission of contract quotations of Canadian origin to the New York produce exchange may not be less than \$100,000,000 a year. Canada's exports of wheat last year including flour were valued at nearly \$80,000,000, comprising 64,000,000 bushels of wheat and 3,739,000 barrels of flour.

Total Grain Export.

Oats exports and other smaller grains amounted to nearly 10,000,000 bushels. The total grain export aggregated 76,000,000 bushels, a large part of which sought foreign markets by way of the North American ports. These included Portland, Boston, New York, Philadelphia and Baltimore.

Owing to the limited period of navigation by way of the St. Lawrence, Montreal's activity in the grain export trade is confined to a period of about five months. The routing of Canadian grain is determined on the lake portion of the movement. In coming through the upper lake ports in bond, it enters the United States through the lower lake ports from which the trunk lines deliver it to the Atlantic seaboard.

United States Ports Have Advantage.

Owing to the large tonnage of freight space available at the North-Atlantic ports of the United States, the advantage in filling contracts for Canadian grain frequently lies in shipping through these ports on prevailing rates, especially in berth rates and to some extent in cargo business.

The entrance of the New York produce exchange into the Canadian contract business by quotations in New York would presumably bring a large measure of European business direct to that market. The probability now is that the grain authorities will decide to admit Canadian quotations, making Winnipeg and New York the two main points of future contract operations for Canadian grain.

ANNUITY EXPERIENCE.

The paper, read by Mr. John S. Thompson, assistant actuary, at the annual convention of the Actuarial Society of America, held at Toronto, dealt with the annuity experience of the Mutual Life Insurance Company of New York from the date of commencement of the issuance of annuity policies up to their policy anniversaries in 1910. The lives were separated into two classes, Domestic and Foreign, the Domestic being annuitants resident in the United States and Canada, the Foreign all others, principally residents of England and France. Each class was divided into male and female annuitants. The extent of the data may be judged from the following table:—

	Entrants.	Years of Risk.	Deaths.
Domestic, male ..	976	8,025	341
" female ..	1,467	13,024	446
Foreign, male ...	2,993	25,110	1,137
" female ..	1,868	18,408	561

Whilst the data were not of sufficient extent to justify the construction of select tables, a large enough number of lives was involved to give considerable standing to an aggregate table such as might be used for the purpose of the annual valuation of the liabilities of a life insurance company in respect to its annuities. It was found that on the whole the vitality among domestic annuitants was considerably superior to that of the foreign, which latter exhibits a rate of mortality in close agreement with that which is shown by a table, which was derived by Mr. McClintock over fifteen years ago, and which is the standard generally used in life office valuations of annuity liabilities in the United States. By the use of a model office it was indicated that for the average distribution of business between the sexes and among various ages, the use of the proposed tables gives a liability in respect of annuities about 4 per cent. greater than the reserve shown by Mr. McClintock's tables.

The capital stock of the Goodyear Tire and Rubber Company of Canada, Limited, has been increased from \$500,000 to \$3,000,000.

TRADE WITHIN THE EMPIRE

Opportunities and Suggestions for Canadian Exporters—England's Requirements—British West Indies

There is an excellent market at Bristol for Canadian canned meats. Compressed corned beef in tapered six-pound tins, twelve tins to the case, finds a good regular demand, and for this size especially since the shortage from the United States. Most of the supply now comes from Australia, but of necessity, from there the deliveries are somewhat irregular. The price per dozen tins ranges from 26s. to 34s. (\$6.33 to \$8.27) according to quality. Lunch tongues are also called for in one-pound and six-pound tins, is a suggestion from Mr. E. D. Arnaud, Canadian trade commissioner, at Bristol, as is the following. The managing director of the Bristol Fruit Brokers, Ltd., states that the prospects for a profitable market here for Canadian apples this season are favorable, especially for later varieties if of good quality and well packed.

Growing Fruit Trade.

This is confirmed by Mr. J. M. Mussen, commissioner at Leeds, who says:

The first Canadian apples, Leeds, reached this district during the first week in October and from an inspection of these and subsequent arrivals, it may be stated that the fruit is clear, of good average quality and the receivers express themselves satisfied with the packing and appearance.

A large quantity of Ontario-grown peaches has also been sent here this year, and the fruit, especially those of the "Elberta" variety, are of excellent color and good flavor. Arrangements have been made for shipments of pears from Canada and these are expected to arrive in the near future.

Opportunities in British West Indies.

There was a slight falling off in the quantity of flour supplied to Grenada, British West Indies by Canada and a corresponding gain by the United States.

The imports from Canada, which fell off nearly two-thirds in 1909, have in the last two years regained their former figure. No increase, however, is apparent, due, no doubt, to want of direct steamship communication. Canadian goods are routed partly through New York by the steamers of the Trinidad Shipping & Trading Company, and partly through Trinidad and Barbados by transshipment. Occasionally a schooner is chartered from the Maritime provinces direct.

There is an opportunity in this island for Canadian food stuffs and Mr. E. H. S. Flood, trade commissioner at Barbados, will supply addresses and information to those interested.

INTEREST TABLES

Three and a half per cent. being a standard for deposit accounts, etc., is extensively used, therefore anything which saves time and is accurate in reckoning, is of value to the accountant and banker. The second edition of "Three and a Half Per Cent. Interest Tables" fulfils both these requirements in a satisfactory manner and gives amounts from one hundred to ten thousand dollars. A table of days is given.

In this volume the number of days are marked at the top of each page, the four "Dollars" columns representing the principal. In computing interest for amounts under even hundreds, remove the decimal point to the left according as you divide the principal by 10 or 100.

Thus to find the interest on \$940.00 for 320 days at 3½%, remove the point one figure to the left, making the interest \$28 84.3: interest on \$94 00, \$2 88.4, remove the decimal two figures and to find the interest on \$9 40, remove three figures, making it 28.8 (say 29 cents).

As an example the following is taken:—

Required: 219 days' interest on \$85,479 at 3½%.	
\$80,000	\$1,680 00.0
5,400	113 40.0
79	1 65.9

\$1,795 05.9 say \$1,795.06

When necessary always carry out the mills in the calculation, and when there are 50 cents or more, compute the interest as on \$1.00, when less, disregard. "Three and a Half Per Cent. Interest Tables," Ernest Wellings, \$3. Williamson and Company, Toronto.

The Artificial Ice and Distilled Water Company, Limited, has changed its name to Distilled Water Ice Company.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

- Vandura, Sask.**—Mr. B. Lett's hardware store. Loss and cause unknown.
- Burk's Falls, Ont.**—Donney Brook Saw Mill. Loss and cause unknown.

WORKING IN THE INTEREST OF CLEAN LIFE INSURANCE

Officers and Members of the Executive Committee of the
Life Underwriters' Association of Canada

**JOHN A. TORY, PRESIDENT,
TORONTO**

**J. T. WILSON, EASTERN VICE-
PRESIDENT, HALIFAX**

**R. C. MCCUISH, WESTERN VICE-
PRESIDENT, WINNIPEG**

**J. F. WESTON, HON. PRESIDENT,
TORONTO**

**NEIL D. SILLS, VICE-PRESIDENT,
RICHMOND, VA.**

**F. T. STANFORD, SECRETARY-
TREASURER, TORONTO**

THE raising of the profession of life insurance in every branch to the highest plane is, in brief, the object of the Life Underwriters' Association of Canada. Although this organization has been in existence for only five years, the results accomplished by its enthusiastic officers and members have been remarkable. That the business was burdened with certain features undesirable alike to companies and the public, was admitted by the underwriters of Canada, and they set out, of their own will and accord, to clean house.

Rebating, the twisting of policies from one company to another, misrepresentation, and other evils of life underwriting, in consequence, have practically disappeared. The type of man engaged in canvassing business has improved materially, some of the keenest business men of the Dominion now being engaged in this work. The Association movement, as it is popularly known, also has brought the men in the field into close and sympathetic touch with the head office officials, a most desirable factor.

The accompanying photographs are those of the officers and members of the executive committee who will steer the Association's course during the current year. Their annual convention next year will be held at Ottawa, and will likely prove as popular as its six predecessors.

The business of life insurance in Canada has grown to large proportions, making the work of the Association all the more important. At the end of last year there was in force a net amount of \$950,220,771 of life insurance. The amount of policies new and taken up totalled \$176,866,979 and the premiums for the year aggregated \$31,619,626.

RECENT FIRES

(Continued from Page 714).

Cranby, Que.—October 29.—Sanitary Plumbing Supplies Company's factory. Loss and cause unknown.

Compton, Que.—October 29.—Compton Hotel. Loss unknown. Insured in S. and S. Mutual Company. Cause unknown.

Peterboro, Ont.—October 29.—Street Car No. 10. Loss \$700. Cause unknown.

November 5.—Mr. T. Green's residence, 576 Aylmer Street. Loss \$200. Cause unknown; 173 Simcoe Street. Loss unknown. Cause, wood left in stove to dry.

Edmonton, Alta.—October 28.—Messrs. Enders and Payne, new house, corner Stony Plain and 25th Avenue. Loss \$200. Cause, defective fire place; boarding car, Fourth Street East and First Street North. Loss unknown. Cause, cooking stove; Wainwright's stable. Loss and cause unknown.

Truro, N.S.—November 3.—Union Steam Laundry. Losses: Captain Bentley's loss, horses, etc., will probably amount to \$1,000, uninsured. The laundry loss will likely amount to \$2,000 on the building, \$3,000 on the machinery, and \$700 on the office furnishings and supplies. The insurance on the building is \$2,000, and on the machinery \$1,500. Cause, probably gasoline.

Hamilton, Ont.—October 31.—Mr. C. Turner's residence, 216 King William Street. Loss \$100. Cause, explosion of coal oil stove.

November 2.—Messrs. Culley & Breay's store, King Street West. Loss and cause unknown.

November 3.—Mr. W. Jones' residence, 40 Gore Avenue. Loss slight. Cause, dry leaves burning.

Saskatoon, Sask.—October 16.—Mr. J. Brandon's store, 217 2nd Avenue North. Loss slight. Cause, rubbish burning.

October 17.—Early Fruit Company's warehouse. Loss slight. Cause, hot ashes.

October 18.—Mr. J. Galaccian's tent, 22nd Street West. Loss \$50. Cause, upset oil stove.

October 23.—108 2nd Avenue. Loss \$25. Cause, kitchen range.

October 25.—165 2nd Avenue North. Loss slight. Cause, hot ashes.

Toronto, Ont.—October 29.—Berridge Apartments, owned by Mr. J. Berridge, 55-57 Mutual Street. Loss, stock \$20, building \$50. Cause, oil ignited in boiler room; 14 Denison Avenue, Mrs. E. Watson's loss \$20; Mr. F. McLeod's loss \$75. November 2.—Mr. J. C. Bevane's, 1610 Queen Street West. Loss \$25. Cause, gas explosion.

November 4.—Messrs. Holt, Renfrew & Company, automobile. Loss \$25. Cause, spark from motor; Mr. J. Rodgers, 298 Brunswick Avenue. Loss, goods \$50, building \$40. Cause, lamp exploded.

November 6.—Mr. E. Rooney's store, 302 College Street, owned by Apartments Company, Limited. Loss, stock \$2,500, building \$500. Cause unknown. Mr. F. Johnston's haystacks, Bedford Park. Loss unknown. Cause, supposed incendiary.

Winnipeg, Man.—October 28.—Red River Valley Employment Office. Loss \$100. Cause unknown; 249 Main Street. Loss and cause unknown; 330 Notre Dame Avenue. Loss unknown. Cause, supposed incendiary; 146 James Street. Loss unknown. Cause, supposed incendiary.

November 1.—164 McFarlane Street, owned by Mrs. B. Hunt. Loss unknown. Cause, supposed incendiary.

November 2.—Emmanuel Church. Loss \$20,000. Insurance, Canadian Fire Insurance Company, \$10,000; Winnipeg Fire Insurance Company, \$1,500 on the contents of the building. Cause unknown; 164 McFarlane Avenue. Loss and cause unknown; 416 Corydon Avenue. Loss \$100. Cause unknown.

November 4.—Murphy Brothers' touring car. Loss \$1,500. Cause, explosion in carburettor; McGreevy building, Portage Avenue. Loss \$200. Covered by insurance. Cause, defective wire.

Montreal, Que.—November 1.—Mr. A. Jette's two frame cottages at Bout de L'Ile. Loss and cause unknown.

November 3.—Consumers' Cordage Company, Canadian Bag Company, St. Patrick Street, Point St. Charles. Loss \$300,000. Cause unknown. The total amount of insurance carried by the Consumers' Cordage Company was \$350,000, handled by the following companies:—British American, \$10,000; North British, \$10,000; Continental, \$10,000; Commercial Union, \$25,000; Employers' Liability, \$5,000; Guardian, \$15,000; Hartford, \$7,500; Home, \$10,000; Liverpool, London & Globe, \$15,000; North American, \$10,000; New York Underwriters, \$15,000; Northern, \$10,000; Norwich Union, \$25,000; Phoenix of London, \$10,000; St. Paul,

\$5,000; Springfield, \$5,000; Sun, \$5,000; Western, \$10,000; various American companies, \$147,000. Insurance carried on factory No. 2 of the Canadian Bag Company, Limited, is \$300,000, underwritten by the following companies:—Acadia, \$1,500; Aetna, \$2,500; British-American, \$5,000; Caledonian, \$12,500; Continental, \$10,000; Commercial Union, \$15,000; Fidelity Phoenix, \$10,000; German-American, \$10,000; Guardian, \$10,000; Hartford, \$10,000; Home, \$5,000; Law Union & Crown, \$5,000; Liverpool, London & Globe, \$22,500; London & Lancashire, \$10,000; Manitoba, \$10,000; New York Underwriters' agency, \$10,000; North American, \$15,000; North British and Mercantile, \$15,000; Northern, \$5,000; Protector, \$7,000; Pacific Coast, \$7,500; Phoenix of Hartford, \$10,000; Phoenix of London, \$15,000; Quebec, \$7,500; Queen, \$15,000; Royal Exchange, \$5,000; Royal, \$24,000; St. Paul, \$2,500; Springfield, \$7,500; Sun, \$2,500; Western, \$7,500; Fidelity Fire, \$5,000.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Peterboro, Ont.—October 31.—McDonald Estate sash and doof mill. Loss \$1,500. Cause, spark from smoke stack.

Gananoque.—October 9.—Messrs. Sack Brothers, Brockville, barn. Loss, stock \$350, building \$90. Insurance \$50. Cause unknown.

Cavan Township, Ont.—October 15.—Mr. B. Roper's barns and stables. Loss, building \$2,000. Insurance, Western \$900. Cause, threshing machine.

Tilsonburg, Ont.—October 27.—Tilsonburg Packing Company, owned by Messrs J. London and E. Barrett. Loss, stock \$20,000, building \$40,000. Insured with 20 companies.

Township of North Oxford, Ont.—September 29.—Mr. A. Upfold's barn. Loss, grain and hay \$789, building \$1,400. Insurance, building \$1,400, contents \$600. Cause unknown.

Montreal, Que.—October 30.—Lyon's Cut Rate Drug Stores. Loss, drugs, etc., \$5,000. Insured with Royal Insurance Company and London, Liverpool and Globe. Cause unknown.

Township of East Williams, Ont.—October 12.—Mr. W. O'Neill's barn. Loss, stock \$1,200, building \$2,500. Insurance, East Williams Insurance Company, stock \$600, buildings \$1,100. Cause unknown.

Chatham, Ont.—October 16.—Mr. W. Drader's planing mill. Loss, stock \$6,000, machinery \$4,000. Insurance, Perth \$3,000, Manitoba \$2,000, Employers' Liability \$1,000. Cause, supposed sparks from boiler room.

Caspe, Que.—September 28.—Calhoun Lumber Company, Limited's, mill and lumber yard. Loss, stock \$70,000, buildings \$80,000. Insurance, stock, Lloyds \$53,750; buildings, Royal \$6,000, Liverpool, London and Globe \$9,000, North British \$6,000, Northern \$7,000, Phoenix \$10,000. Cause, spark from power house.

Kincardine, Ont.—October 26.—The Andrew Malcolm Furniture Company's boiler house. Loss \$250. Insured with Millers' and Manufacturers' Insurance Company, Gore Insurance Company, Waterloo and Perth Mutuals, Hudson Bay Company, British America Company, and Economical. Cause unknown.

WILL SEEK WESTERN BOND BUSINESS.

A bond and debenture department has been added to the present business of the J. A. Westman Agency, of Regina. Mr. L. E. Curran, late of the firm of Curran Brothers, bond and debenture dealers, of that city, has been placed in charge of this branch. The firm will enter into the new field early next year. The Western bond business is extensive, and the Westman Agency hope to secure a full measure of the business. They will move into their new offices shortly on Rose Street, Regina, one of the finest buildings in the West. The J. A. Westman Agency has a well-deserved reputation for conducting a clean and honest business.

Mr. J. Hayden Horsey, local manager of the Dominion Bank, has been appointed manager of the London, England, branch. The position he vacated will be filled by Mr. M. S. Bogert, superintendent of the eastern branches.

"As soon as we know whether the wheat from the prairies will go through Vancouver in sacks or in bulk we will be in a position to equip ourselves with such facilities as will make rapid handling possible," said Mr. Carl R. Gray, president of the Great Northern Railway Company, who was in Vancouver on Saturday on an inspection trip. "The wheat we are now handling for exportation comes to us in sacks and makes warehouses, not elevators, necessary. It may be that what wheat we receive from the prairies for shipment may come to us in sacks."

SOVEREIGN FIRE OUT OF STATES

Company Will Re-insure its Outstanding United States Risks

The directors of the Sovereign Fire, of Toronto, have decided to retire from the United States. The Monetary Times is informed that an arrangement is being made with the Globe and Rutgers Fire Insurance Company, of New York City, to re-insure the majority of the outstanding risks. The company was licensed to transact business in over sixteen of the States. The actual transfer has been deferred for the present owing to the reluctance of the New York Trust Company to release the fund of \$200,000 which it holds as United States trustee, so as to permit the Globe and Rutgers to take over the business, which amounts to about \$300,000 in premiums annually. The trust company doubts its authority to transfer the money, as the trust deed only provides that it shall be paid to policyholders and creditors. This matter will be adjusted.

Securities in United States.

The authorized capital of the Sovereign Fire Insurance Company of Canada, which was incorporated in 1905, is \$2,000,000. At the end of 1911, \$600,200 was subscribed and \$503,888 paid up. In deposit or with trustees in the United States in respect of its business there, the company had at the same date the following securities:—

In deposit or with trustees, United States:—	Par value.	Mkt. value.
City, New York, corporate stock, 1959, 4 p.c.	\$50,000.00	\$50,000.00
City, St. Thomas, debs., 1917-1921, 4½ p.c.	10,000.00	10,000.00
City, Revelstoke, corporate stock 1927, 5 p.c.	10,000.00	10,000.00
City, Kamloops, B.C., 1931, 5 p.c.	10,000.00	10,000.00
City, Nanaimo, 1950, 4 p.c.	34,000.00	28,220.00
Town of Steelton, 1927, 1934, 4½ p.c.	19,948.21	18,950.80
City of Cleveland, 1926, 4 p.c.	25,000.00	25,250.00
City of Cincinnati, 1956, 3½ p.c.	20,000.00	18,400.00
City of Columbus, 1947, 4 p.c.	20,000.00	20,400.00
City of New York, 1954, 3½ p.c.	40,000.00	35,200.00
City of Seattle, school, 1926, 4 p.c.	100,000.00	97,000.00
City of Los Angeles, 1929 to 1933, 3¾ p.c.	20,000.00	18,600.00
City of New York, consol. stock, 1915 to 1918, 3½ p.c.	18,000.00	17,370.00
City of New York, consol. and corporate stock, 1960, 4¼ p.c.	143,000.00	145,860.00
Total outside of Canada	\$519,948.21	\$505,250.80
Total par and market values	\$577,448.21	\$557,118.30

Notes of Foreign Business.

The New York Trust Company mentioned above appears in the Sovereign Fire's 1911 report to the Dominion Government as holding \$13,852, this coming under the heading, cash in banks; Other United States and English institutions held approximately another \$2,000. The company's total liabilities outside of Canada at the end of last year were \$265,098. The net cash received from premiums in other countries than Canada was \$419,648. The statement of risks and premiums outside of Canada and apparently chiefly in the United States for the year 1911 is as follows:—

	In other countries.	Premiums thereon.
	Amount.	
Gross policies in force at date of last statement	\$39,100,183	\$349,930.62
Taken during the year, new	41,653,197	729,697.98
" " renewed		
Total	\$80,753,380	\$1,079,628.60
Deduct terminated	26,881,831	483,901.20
Gross in force at end of year	\$53,871,549	\$595,727.40
Deduct reinsured	19,109,219	207,559.67
Net in force at Dec. 31, 1911	\$34,762,330	\$388,167.73

A branch of the Canadian Bank of Commerce has been opened at Lewvan, Saskatchewan, under the temporary management of Mr. T. Winsby.

The Railway Passengers Assurance Company, the general-manager of which is Mr. F. H. Russell, will remove their offices next week to the Confederation Life Building, Toronto.

FIRE PREVENTION LEGISLATION

Endeavor to Lessen the Fire Hazard—Risks of Explosives

The National Board of Fire Underwriters and the National Fire Protection Association have adopted several important suggestions as to legislation and municipal ordinances which will tend to lessen the fire hazard. They have issued a draft of a suggested State law for the regulation of the manufacture, storage, sale and use of explosives and another suggested law to regulate the transportation of explosives. Also a draft of an ordinance to regulate the manufacture, storage, sale, use and transportation of explosives in the smaller cities and towns. A draft of a State law to regulate the manufacture, storage, sale and distribution of matches is also issued in conjunction with a suggested ordinance for similar control of the match hazard in cities.

Draft of Suggested Ordinance.

The two organizations also issue a draft of a suggested ordinance providing for the inspection of premises by the fire department of a city or town. The principal section of this ordinance provides:

"It shall be the duty of the chief of the Fire Department to inspect or cause to be inspected by Fire Department officers or members, as often as may be necessary, but not less than twice a year in outlying districts, and four times a year in the closely built portions of the city, all buildings, premises, and public thoroughfares, except the interiors of private dwellings, for the purpose of ascertaining and causing to be corrected any conditions liable to cause fire or any violations of the provisions or intent of any ordinance of the city affecting the fire hazard.

Chiefs of Fire Departments.

"Whenever the chief of the Fire Department or any officer or member thereof shall find any building or other structure which, for want of repairs or by reason of age or dilapidated condition or for any other cause, is especially liable to fire, and which is so situated as to endanger other property, and whenever any officer or member shall find in any building or upon any premises or other place combustible or explosive matter or dangerous accumulations of rubbish or of unnecessary accumulations of waste paper boxes, shavings or any other highly inflammable materials, especially liable to fire, and which is so situated as to endanger property, or shall find obstructions to or on fire escapes, stairs, passages, ways, doors, windows, etc., liable to interfere with the operations of the Fire Department or egress of occupants in case of fire, he or they shall order the same to be removed or remedied, and such order shall forthwith be complied with by the owner or occupant of such premises or buildings, subject to appeal within twenty-four hours to the mayor, who shall within ten days review such order and file his decision thereon, and unless the order is revoked or modified it shall remain in full force and be obeyed by such owner or occupant.

As to Penalties.

"Any owner or occupant failing to comply with such order within ten days after said appeal shall have been determined, or if no appeal is taken, then within ten days after the service of the said order, shall be liable to a penalty as hereinafter stated. The service of any such order shall be made upon the occupant of the premises to whom it is directed by either delivering a true copy of same to such occupant personally or by delivering the same to and leaving it with any person in charge of the premises, or in case no such person is found upon the premises by affixing a copy thereof in a conspicuous place on the door to the entrance of the said premises; whenever it may be necessary to serve such an order upon the owner of premises, such order may be served either by delivering to and leaving with the said person a true copy of the said order or, if such owner is absent from the jurisdiction of the officer making the order, by mailing such copy to the owner's last known post office address."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station for the week ended November 1st:—McKinley-Darragh, 65,650; Chambers-Ferland, 65,400; Cobalt Town-site, 123,950; La Rose, 152,746; Cobalt Lake, 135,270; total, 543,016 pounds, or 271 tons. The total shipments since January 1st are now 35,896,132 pounds, or 17,948 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

GOVERNMENT WORKMEN'S COMPENSATION ACT

Benefits and Operations in the United States Reviewed —Seventeen Thousand Accidents Reported in Three Years

Solicitor Charles Earl, of the Department of Commerce and Labor at Washington, has just submitted to Secretary Nagel, of that Department, a compilation of his opinions dealing with the Government Workmen's Compensation Act, under which compensation is granted for injuries to artisans or laborers employed by the United States. This is the pioneer among compensation acts in this country. Since its enactment, 16 States have passed laws of a similar character, and the number is likely to be increased during the coming sessions of State Legislatures. The general public interest which attaches to such legislation led Secretary Nagel, last July, to direct the publication of the solicitor's opinions under this act, as illustrating the construction and application of a law providing compensation as contrasted with a law giving a right to sue for damages. The opinions are now in course of publication by the Department, which will issue the volume shortly.

The money benefits paid under this act between August 1, 1908, when it became effective, and December 1, 1911, aggregated \$704,814 paid to injured persons on account of non-fatal injuries and \$112,879 paid to surviving dependents on account of fatal injuries. Since December, 1911, additional benefits amounting to nearly \$300,000 have been paid. During the first year after the passage of the act, 1,805 claims were submitted, of which 1,689 were allowed. During the second year, 2,624 claims were submitted and 2,499 allowed. The present statute applies only to artisans or laborers employed in certain specified branches of the public service, or in certain hazardous occupations under the Government.

Receives for One Year.

Any workman covered by the act who is injured in the course of his employment is entitled to receive for one year thereafter, unless sooner able to resume work, the same pay as if he continued to be employed, except where the injury was due to his own negligence or misconduct. If the injury results in death during the year, the compensation allowed is payable to the widow or children or dependent parent. The act is administered by the Secretary of Commerce and Labor, who is authorized to decide all questions of negligence or misconduct, who is made the sole judge as to when a claim is established, and whose decision is final. Payment of compensation under the act is made from the ordinary current appropriations for salaries.

The solicitor emphasizes that feature of the act which permits of the establishment of a simple and direct mode of procedure; whereby technicalities and delays are avoided and the relief provided can be speedily given, and the further feature, whereby the Government is forbidden to exempt itself from liability by any contract, agreement, rule or regulation. In this connection he says:

Prompt Payment of Compensation.

"The prompt payment of compensation at a time when the bread winner is stricken and money is most needed, without forcing the claimant to pursue an elaborate, expensive and dilatory process of proof, is one of the striking benefits of the act. Being in its nature a remedial statute, it is rightly susceptible of a liberal interpretation, as contrasted with a strict interpretation, in order to bring home the benefits intended. Such has been the interpretation regularly applied by the Secretary of Commerce and Labor, without, of course, disregarding any of the limitations of the statute, or extending it beyond its terms."

In speaking further of the nature and benefits of the act, the solicitor states that it marks a distinct step in advance, and substitutes an enlightened modern view for certain obsolete doctrines of the common law, since it not only gives a remedy where none existed before, but it waives the right of the Government to exemption from liability and dispenses with the necessity of appeals to Congress in individual cases. He says in this regard:

Responsibility Fixed Easily.

"The rules of the common law, which were formulated at a time when industrial operations were simple, and conducted in small establishments where responsibility could easily be fixed, permitted recovery only where the workman or his representatives could establish negligence on the part of the employer, and denied relief if his own negligence in any way contributed to the injury, or if the injury was due to the negligence of a fellow servant, or a stranger, and also compelled the worker to assume the risks incident to a dan-

gerous employment. For injuries due to accidents alone, there could be no recovery, since a legal wrong could be imputed to no one. The altered situation, growing out of the immense changes made in industrial conditions, brought a realization of the great injustice worked by established rules of law.

"Irrespective of the negligence of the employer, or a fellow servant, or a stranger, and irrespective of the risks incident to dangerous occupations, it was recognized as grossly unjust that the victim alone should be allowed to bear the entire consequences and all the burden of an industrial accident or injury. It was seen that the employment itself, if not the case of the injury, furnished at least the occasion or the condition without which it could not have occurred. The principle was then formulated and accepted that the financial loss occasioned by injuries received in the course of employment was a proper charge against the industry itself, at least where the injury was not plainly due to negligence or misconduct of the person injured. A means was thus provided whereby the burden in such cases could be shifted in a measure from a single victim and distributed among many persons."

Seventeen Thousand Accidents.

The solicitor notes that over 17,000 accidents were reported under the act during the first three years of its operation, whereas only about 8,000 claims were filed, due to the limited scope of the law, and strongly urges this as an indication of the need of extending the benefits of the act by supplementary legislation. Such legislation has in fact been recommended by the Secretary of Commerce and Labor, and measures designed to enlarge the scope of the act are now pending in Congress.

FIRE PREVENTION DAY

(From the Hamilton Times.)

"As The Monetary Times says, burning property at the rate of \$48 every minute this year is a record of which no Canadian citizen can feel proud, and it advocates the holding of a fire prevention day for all Canada, when fire drills could be held, all public buildings, theatres, etc., could be looked over, attics and cellars cleaned out, and all rubbish burned. The idea should commend itself to the people generally."

ALBERTA, PEACE RIVER AND EASTERN RAILWAY

A new railway from the Pacific to the Hudson Bay is the ambitious project of the Alberta, Peace River and Eastern Railway. The length of the proposed line is 1,600 miles. The management of the new company in Canada is under Mr. H. Muskett King, who will make his headquarters in Ottawa, and Mr. E. G. Rykert, of Montreal. This board will shortly be increased by several. A feature in connection with the new railway is a colonization scheme, whereby it is proposed to introduce into the Dominion a large number of experienced agriculturists with their families, a special recommendation for whom will be that they are British subjects with a certain amount of capital. The English directors, in addition to being connected with the railway project, are also closely identified with several other companies which will work in affiliation with the new railway, among them being a land company, a flour milling company, a colonization, a freight motor and agricultural implement company.

Among those interested in the company are:—The Right Hon. Lord Farrer, Abinger Hall, Dorking, Surrey, president director, Midland Underground Electric, London Electric, Cordova Central, Mexican Southern, Midland Uruguay Entre Rios.

The Right Hon. Lord Vivien, D.S.O., director British Canadian Agricultural Tractors, Limited.

The Right Hon. Guy G. Wilson, D.S.O., M.P., etc., Warter Priory, York, chairman, Wilson shipping lines, Earles Ship Building Company, Limited.

James Millington Syngé, Esq., director Atlantic, Quebec and Western Railway Company, Buffalo and Lake Huron Railway; chairman, Union Cold Storage Company, Limited, etc.

Frank Houlder, Esq., London, chairman, Houlder Brothers and Company, Limited, ship owners.

Frederic W. Thompson, Esq., Limsfield, Surrey, director, Houghton's Limited, Frank Jones Brewery, Limited, Russell's Gravesend Brewery.

Franz David Cochijs, Amsterdam, Holland, director, London and Dominion Trust, Limited, and Edwin G. Rykert, Esq., Montreal.

NEW COMPANIES AND THEIR CAPITALIZATION

Large Milling Reorganization—Western Financial Corporations

Charters have this week been granted to sixty-nine companies whose total capitalization amounts to \$15,154,500. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capital.
Ontario	28	\$5,870,000
British Columbia	19	5,221,000
Quebec	15	1,461,500
Manitoba	6	1,602,000
Saskatchewan	1	1,000,000
	69	\$15,154,500

The largest companies this week are:

Canadian Cereal and Flour Mills, Toronto	\$4,000,000
Albion Trust Company, Victoria	3,000,000

MacGregor.

QUEBEC PROPOSES POOR INSURANCE POLICY

Hon. Mr. Taschereau, minister of public works for Quebec province, drew attention in the provincial legislature to the heavy amounts paid annually for insuring government buildings. He suggested that it would be advisable for the government to insure its own buildings. The total on which premiums are paid is \$2,880,600. Since 1867 to the present year, the sum of \$237,350 has been disbursed under this head of insurance, while the indemnities received on losses amounted to but \$146,938.

The question may be considered, adds his report, whether it would not be advisable and more advantageous for the government to insure its own buildings with a special insurance fund, created for the purpose and to add to the fund yearly, the amount of money now paid out in premiums, to the different insurance companies.

MONETARY TIMES INDEX

There are a number of copies of the Index for volume 48, January to June, 1912, on hand. These will be sent to subscribers on request.

LOAN AND TRUST COMPANIES' STATISTICS.

(Continued from Page 702.)

as compared with \$24,711,594 in 1911. The following summary shows the increase made by each class of institution:

	Investments, 1910.	Investments, 1911.
Alberta Operations.		
Life insurance companies	\$7,917,576	\$10,324,141
Fire insurance companies	404,816	546,231
Accident, guarantee insurance companies, etc.		159,881
Loan companies	8,629,202	12,238,414
Trust Companies	7,700,000	10,250,000
	\$24,711,594	\$33,518,667

At present the funds so invested exceed \$40,000,000. Foreign companies, particularly Dutch, with Canadian branch offices, are also loaning large sums in the West. Dutch loan and mortgage companies have thus invested \$10,000,000.

The street railway company is sharing in Hamilton's prosperity, according to the returns made to City Treasurer Leckie, for the quarter ended September 30th. The total receipts for that quarter were \$150,144.49, as compared with \$130,758.93 for the corresponding quarter of last year, an increase for this year of \$19,385.56. The city's share for this year's quarter amounts to \$12,011.56, as compared with \$10,460.71 for the same quarter last year, an increase of \$1,550.85, being at the rate of 14.82 per cent

DEBENTURES FOR SALE

DEBENTURES FOR SALE

The corporation of the town of Steelton will receive offers up to 8 o'clock p.m., December 3rd, 1912, for the purchase of the following debentures:—

- \$7,000.00 Public School Debentures.

- Full particulars on application to

J. ROBINSON,
Clerk, Steelton.

CONTINENTAL COMPANY is open to purchase control of a Canadian fire insurance company. Apply in first instance, Percy Robertson, 18 Toronto Street, Toronto.

The annual meeting of the Canadian Bankers' Association will be held at Toronto on Thursday.

The Marconi Company have signed a contract with the Canadian Government for the operation and maintenance of nine additional stations on the great lakes of Canada. When the stations are completed the company will receive an additional subsidy from the Government of \$31,500 per annum. The agreement is for nineteen years.

One of the most favorable opportunities that has ever come to our notice in Western Canada, is to be found in the following proposition:—

We have been enabled to make terms with the owner of 160 acres of level, clear land, situated right on the Grand Trunk Pacific Railroad, of which 20 acres are being used for station, grounds, sidings, yards, etc. Arrangements will be made to make it an official Grand Trunk Pacific Townsite.

It is situated in Alberta on the Grand Trunk Pacific line now being built into Calgary.

The price of this property is \$35,000, of which \$15,000 will be cash, the balance running over a period of three years. We estimate, according to our experience in handling Grand Trunk Pacific Townsites, that there will be a profit on this deal by subdividing it and placing it upon the market of over 300%, and the whole of it can be easily sold, when cut into lots, within a year.

The district around it is exceedingly rich and well settled. The crop this year was a bumper one and the position of the land makes it ideal for a market town.

So firmly do we believe in the advantages of this buy that we ourselves are willing to take a large share of it.

As there is not much time to be lost in a proposition of this character, if interested, wire us at once for further particulars.

LEGAL NOTICES

CANADIAN INCUBATOR COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 2nd day of October, 1912, incorporating David Henderson, William Henry McGuire and George Francis Rooney, barristers-at-law, and Alice Maude McGlashan and Constance Percival Adair, stenographers, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture and deal in incubators and brooders, poultry supplies, foods and sundries, mechanical fittings and appliances for the production and care of poultry; (b) To erect, furnish and fit up houses and erections for the use and care of poultry; (c) To raise, produce and deal in poultry and their products; (d) To manufacture, buy, sell, and otherwise deal in and dispose of house and other heating systems, sterilizing plants and apparatus; (e) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or to render profitable any of the company's property or rights; (f) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company; (g) To apply for, purchase or otherwise acquire any patents, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use or any secret or other information as to any invention which may seem capable of being used for any other purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired; (h) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (i) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (j) To enter into any arrangement with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (k) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependants or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe and guarantee money for charitable or benevolent objects or for any exhibition or for any public, general or useful object; (l) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit the company; (m) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (n) To construct, improve, maintain, work, manage, carry out, or control any roads, ways, and branches or sidings and lands owned or controlled by the company, bridges, reservoirs, water courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interest, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (o) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (p) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (q) To sell or dispose of the undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (r) To adopt such means of making known the products of the company as may seem expedient and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (s) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (t) To do all or any of the above things as principals, agents, contractors, trustees or otherwise, and either alone or in conjunction with others; (u) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of the "Canadian Incubator Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 3rd day of October, 1912.

THOMAS MULVEY,

Under-Secretary of State.

CANADIAN INCUBATOR COMPANY, LIMITED.

SOUTHERN ONTARIO LAND COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 30th day of September, 1912, incorporating James Steller Lovell, accountant, Robert Gowans, Joseph Ellis, John Joseph Dashwood, William George Flood and William Bain, solicitors' clerks; Ewen James MacEwen, student-at-law; and Samuel Goodman Crowell, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease, take in exchange or otherwise acquire improved or unimproved lands, or any interest therein, of any kind whatsoever (including agreement for sale or options), together with any buildings or structures that may be on said lands or any of them and to sell, lease, exchange or otherwise dispose of the whole or any portion of the said land and all or any of the buildings or structures that are now or may hereafter be erected thereon and to take such security therefor in payment or part payment for the same as may be deemed advisable; (b) To improve, work, manage and turn to account the said lands, buildings and structures and to develop, cultivate and farm the said lands and to sell and dispose of the produce therefrom and to survey the said lands and to lay the same out into lots and to advertise the sale of the said lands and lots; (c) To erect buildings and deal in building material; (d) To take and hold mortgages for any unpaid balance of the purchase money for any of the lands, buildings or structures so sold, and to sell or otherwise dispose of the said mortgages or any agreements for the sale of the said lands, buildings or structures; (e) To purchase, take on lease or in exchange, hire or otherwise acquire and undertake the whole or any part of the business assets, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or of any person or company owning or possessing property suitable for the purposes of the company and to pay therefor with cash, shares in the capital stock of the company or bonds or debentures of the company or part in cash and part in the said shares or bonds or with such other consideration as the company may deem fit; (f) To acquire by purchase, lease, grant or otherwise whatsoever options, water rights, concessions or rights for the construction of and to work, manage and construct roads, leats, canals, wharves, tunnels, dams, reservoirs and tramways or railway sidings on lands owned or controlled by the company, or works of any kind, and to make, build, purchase or hire engines, rolling stock, wagons, ships, barges and other plant and machinery of every description in connection with or for the use of or convenience of the company's property or the transit of produce, ores, minerals and other things, or the supply of materials and other things required by the company; (g) To take, acquire by purchase, lease, grant, license or exchange any buildings, easements, machinery, plant, stock-in-trade, patents or other rights or privileges and generally any property whatsoever of any kind, whether real or personal, or any estate or interest therein which the board may consider desirable in the interests of the company; (h) To improve, manage, work, develop and turn to account any property, real or personal, acquired by the company or in which the company is interested, and to sell, lease, convert into money, barter or otherwise dispose of the undertaking, property, assets and effects of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, stocks or securities of any other company either fully or partly paid up, and to accept payment for any property so sold by instalments and to distribute any such consideration from time to time amongst the members of the company; (i) To purchase or otherwise acquire shares or stock, bonds, debentures or other securities in any other corporation (notwithstanding the provisions of section 44 of the said Act), and to hold, sell or otherwise dispose of the same; (j) To act as brokers and agents in connection with the effecting of insurance, the selling, purchasing, leasing, valuing and managing of real estate and for the investment and collection of money and in general the management of estates and acting as financial agents or otherwise; (k) To aid and assist by way of bonuses, cash advances or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company and generally to promote the settlement of any lands that may be at any time owned by the company, and to establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company or in the neighborhood of such lands; (l) To enter into any arrangement for sharing of profits, union of interest or co-operation with any other person or company carrying on or about to carry on any business or transaction which may be of benefit to the company; (m) To take, acquire and hold as a consideration for the sale or other disposal of any of the assets or properties of the company or for work done by the company by contract or otherwise, shares, debentures, bonds or other securities of or in any other company; (n) To distribute among the members in specie any property of the company whether by way of dividend or bonus; (o) To invest and deal with any reserve funds of the company and any moneys of the company not for the time being required for the general purposes of the company upon such investment (not being shares of the company) and in such manner as may seem expedient; (p) To pay all expenses of and in connection with the incorporation or in or about the promotion of the company and the obtaining of subscription of the share and debenture capital thereof and all commissions and other remunerations to brokers or others for procuring or guaranteeing subscriptions or for underwriting, placing, selling or otherwise disposing of any of the shares, mortgage debentures, debentures, debenture stock or other securities or property of the company, or of any other company, or assisting so to do or for procuring or obtaining settlement and quotation upon London or foreign colonial or provincial stock exchanges of any of such share capital or securities; (q) To guarantee the payment of the principal of or the dividends or interest on any stock, shares, debentures, securities, loans or undertakings in any case in which the board consider it expedient; (r) To amalgamate the business with that of any other company whether by sale or purchase of the undertaking, subject to the liability of this or any such other company, firm or person, with or without winding up or by sale or purchase of all the shares, stock, debentures or other securities or assets of this or any such other company, firm or person as aforesaid, or by partnership or by an arrangement of the nature of partnership or in any other manner; (s) To be interested in or promote and undertake the formation and establishment of companies of any kind whatsoever and to subscribe for or guarantee the subscription of or to buy, sell, hold and deal in and with shares, stocks, bonds, debentures, securities or obligations issued or guaranteed by any government, sovereign, ruler, commissioners, public body or authority, supreme,

(Continued on Page 728).

At Medicine Hat industrial by-laws to grant concessions to the Wetaskiwin Tent and Mattress Company, and the Maple Leaf Milling Company, are to be voted on by the burgesses on November 12th.

Secretary-treasurer,
Melville, Sask.

October 1st, 1912.

The following information may be of interest to those wishing to tender:—

The total assessment for the year 1912 is \$3,180,000.00, exclusive of exemptions to the amount of \$85,000.00. Five years ago there was no population; to-day there is a population of about 3,000, which is increasing to such an extent that it is impossible to supply the demand for housing accommodation.

Melville is situated in the centre of a magnificent farming district, and in addition has the advantage of being a divisional point of the Grand Trunk Pacific Railway, whose repair shops and other works employ a large number of men.

The total debenture debt, inclusive of the present issue and local improvement debentures, amounts to \$259,628.01.

Less sinking fund	\$ 4,045 40
Waterworks	63,300 00
Electric light	22,000 00
Local improvement debentures	58,250 82
Net debenture debt	\$147,596 22
Assets, December 31st, 1911	112,031 79
Current expenditure, 1911	\$181,480 73
Current revenue, 1911	37,325 04
	40,849 81

The rate of taxation for the current year is: For general purposes, 10 mills; sinking fund, 1 mill; debenture rate, 3 mills, and school, 4 mills, a total of 18 mills.

Information recently to hand makes the announcement that Melville has been created a judicial centre of the Province of Saskatchewan.

The directors of the Superior Brick Company organized recently at Fort William are: Mr. A. A. Ayer, Montreal, president; Mr. G. F. Stephens, Winnipeg, vice-president; Mr. G. R. Duncan, Fort William, secretary, and directors, Messrs. K. R. Ayer, R. D. Sutherland, J. R. Hutchison and T. B. Brown, all of Fort William. The plant may be in operation by May, 1913.

MR. BUCKNELL GOES TO DETROIT

Among the important staff changes following the election of Mr. H. C. Cox to the presidency of the Imperial Life Assurance Company, after being many years Toronto manager of the Canada Life, is the promotion of Mr. J. A. Bucknell to the management for Michigan of the latter company. Mr. Bucknell, who has been manager for Western Quebec for the past four years, has become closely identified with the life and institutions of Montreal, being a member of the St. James and Canada Clubs, the Montreal Curling Club, and the Westmount Lawn Bowling Club.

In going to Detroit, Mr. Bucknell will renew old acquaintances, as he was district agent in the State of Michi-

Mr. J. A. Bucknell

gan more than 20 years ago. He has since represented his company in many important fields, and is a well-known and successful underwriter.

In 1893, Mr. Bucknell, who had been a district agent at Saginaw, was moved to Detroit. On leaving Saginaw he obtained a letter of introduction from Governor Bliss to his friend Gen. Russel A. Alger, also a wealthy lumberman. An interview, when the letter was presented, resulted in an appointment for 11 a.m. on a certain day, but about half an hour before the time a note arrived from General Alger, which intimated that he had decided not to increase his insurance, and that, therefore, it would be unnecessary for Mr. Bucknell to keep his appointment. Mr. Bucknell sent a message back requesting a short interview, and followed this up by presenting himself at his prospect's office. His persistence obtained for him the interview, and as an outcome of it he secured the General's consent to take \$25,000. He did not stop even there, however, for on pointing out that the company would accept \$30,000 on a single life—that being the limit at the time—and that he would appreciate it very much if he were able to say that the General was insured in the Canada Life to the full limit, the application was made out for \$30,000, with an annual premium of \$1,880, and this policy was carried to the time of his death. General Alger was later made Secretary of War for the United States.

THE TORONTO CARPET MANUFACTURING COMPANY, LIMITED

At the annual general meeting of the Toronto Carpet Manufacturing Company, Limited, held on Monday, November 4th, the chair being occupied by the president and general-manager, F. B. Hayes, it was decided to increase the capital stock from \$500,000 to \$1,000,000 by the issue of \$200,000 preferred stock and \$300,000 common stock.

The president's report showed that the result of the year's business was exceedingly good.

The following directors were elected for the ensuing year:—F. B. Hayes, president and general manager; Dr. Chas. S. Murray, Walter T. Sykes, vice-presidents; and George D. Perry, G. H. Muntz, Louis M. Hayes and C. V. Harding.—It. 11/9/11.

EXCHANGE RATES

Glazebrook & Cronyn, exchange and bond brokers, report exchange rates as follows:—

Between Banks.			
	Buyers.	Sellers.	Counter.
N. Y. funds	Par	1-32 pm	$\frac{3}{8}$ to $\frac{1}{4}$
Mont. funds	10c. dis.	Par	$\frac{3}{8}$ to $\frac{1}{4}$
Sterling—			
60 days' sight	8 7-32	8 9-32	8½ to 8¾
do. demand	9¼	9 9-32	9½ to 9¾
Cable trans.	9¾	9 11-32	9¾ to 9¾
Rates in New York:—		Actual.	Posted.

Winnipeg	125,994,854	106,388,574	152,652,206	+21.1
Totals	\$683,425,024	\$708,098,500	\$878,918,224	+28.6

The London-Washington-Ottawa Insurance Corporation will apply for a Dominion charter. Messrs. MacCraken, Henderson, Green & Herridge, Ottawa, are solicitors for the applicants.

Asked why parcels between Great Britain and Canada cannot be insured, Postmaster-General Samuel says the British postal authorities for years have urged the Canadian Administration to adopt insurance of parcels, but the latter has not seen its way to do so. The chief obstacle appeared to be the absence of insurance in Canadian inland service.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

NORTHERN CROWN BANK

Head Office, Winnipeg

Dividend No. 12

Notice is hereby given that a dividend at the rate of six per cent. per annum upon the paid up capital stock of this institution has been declared for the six months ending November 30th, 1912, and that same will be payable at its banking house in this city and at all its branches on or after the second day of December next to shareholders of record of the fifteenth day of November, 1912.

By order of the Board,

ROBERT CAMPBELL,

General Manager.

Winnipeg, October 22nd, 1912.

THE CANADIAN BANK OF COMMERCE

Dividend No. 103

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this institution has been declared for the three months ending the 30th November, 1912, together with a bonus of one per cent., and that the same will be payable at the bank and its branches on and after Monday, 2nd December, 1912. The transfer books will be closed from the 16th to the 30th November, both days inclusive.

By order of the Board,

ALEXANDER LAIRD,

General Manager.

Toronto, 30th October, 1912.

THE BANK OF TORONTO

Dividend No. 125

NOTICE is hereby given that a dividend of TWO AND THREE-QUARTERS PER CENT. for the current quarter, being at the rate of eleven per cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared; also a Bonus of ONE PER CENT., and that the same will be payable at the Bank and its Branches on and after the 2nd day of December next, to the Shareholders of record at the close of business on the 15th day of November next.

THE TRANSFER BOOKS will be closed from the 16th to the 25th days of November next, both days inclusive.

By order of the Board,

THOMAS F. HOW,

General Manager.

The Bank of Toronto, Toronto, October 30, 1912.

LEGAL NOTICE

(Continued from Page 724).

municipal, local or otherwise, or by any company or association of persons; (t) To do all or any of the matters aforesaid either as principals or agents or trustees for others and either in the name of the company or of any person or persons, firm or company as trustee or agent for the company and either alone or in concurrence with any person or persons, firm, company, government, body or authority; (u) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments and to give guarantees or undertakings of any kind; (v) To do all such acts, matters and things as are incidental or necessary to the due attainment of the above objects or any of them; (w) To sell any property of the company, whether real or personal, for such consideration as the company may deem fit, including shares, debentures or securities of any corporation; (x) To raise and assist in raising money for and to aid by way of bonus, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Southern Ontario Land Company, Limited," with a capital stock of two hundred and fifty thousand pounds, divided into 250,000 shares of one pound each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 1st day of October, 1912.

THOMAS MULVEY,

Under-Secretary of State.

BLAKE, LASH, ANGLIN & CASSELS,

Solicitors for the Company.

INSURANCE DEPARTMENT,

Ottawa, 2nd October, 1912.

Notice is hereby given that a license, No. 328, has this day been issued to the National Union Fire Insurance Company of Pittsburg, Pa., for the transaction of the business of Tornado Insurance in addition to the business for Fire Insurance for which it is already licensed. The chief agency of the company is established at the City of Toronto, and Henry J. Richmond is the Chief Agent.

W. FITZGERALD,

Superintendent of Insurance.

14-4

THE ROYAL BANK OF CANADA

Dividend No. 101.

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of December next, to shareholders of record of 15th November.

By order of the Board.

E. L. PEASE,

General Manager.

Montreal, P.Q., October 11th, 1912.

THE BANK OF NEW BRUNSWICK

Special Meeting of the Shareholders.

NOTICE is hereby given that a special general meeting of the shareholders of The Bank of New Brunswick will be held at the office of the said Bank in the City of Saint John, New Brunswick, on Monday, the 9th day of December, 1912, at the hour of eleven o'clock in the forenoon, for the purpose of considering an agreement for the sale by the said The Bank of New Brunswick of the whole of its assets to the Bank of Nova Scotia upon the terms set out in such agreement, a copy of which is mailed to each shareholder with this notice, and, if deemed advisable, of passing a resolution or resolutions approving the said agreement and authorizing the President and General Manager of The Bank of New Brunswick to affix thereto the corporate seal of the Bank and to sign and execute the same for and in the name of and on behalf of the Bank; and also for the purpose of considering and, if deemed advisable, of passing all such other and further resolutions for fully carrying out the said agreement and the terms thereof, as the shareholders shall consider expedient or advisable, and for the purpose of authorizing the Board of Directors to give all such notices and make all such applications and to pass and execute all such other acts, resolutions, deeds, instruments, matters and things as may be deemed necessary for procuring the approval of the Governor-in-Council to the said agreement and for carrying out the same and for winding up the affairs of the Bank and distributing the proceeds of the said sale.

By order of the Board,

C. H. EASSON,

General Manager.

St. John, N.B., October, 19th, 1912.

UNION BANK OF CANADA

Dividend No. 103

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, and that the same will be payable at its Banking House in this City, and also at its branches, on and after Monday, the second day of December next.

The Transfer books will be closed from the 16th to the 30th of November, both days inclusive.

The Annual General Meeting for the election of Directors and other general business will be held at the Banking House in the city of Winnipeg, on Tuesday, the 17th December, 1912. The Chair will be taken at 12 o'clock noon.

By order of the Board.

G. H. BALFOUR,

General Manager.

Winnipeg, October 22nd, 1912.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

EDMONTON TO MARKET BIG BOND ISSUE

Port Arthur Has Raised Temporary Loan by Treasury Notes—Rate of Interest on Ottawa's Debentures

Arrangements are being made to issue in London about \$1,500,000 worth of the bonds of the city of Edmonton. The matter has been placed in the hands of the Canadian Agency, Limited, London, and they will make the flotation at the first favorable opportunity. There will remain for sale another \$1,000,000 of the city's securities, and these will be marketed at a later date. The following are issues made by the city of Edmonton in London since 1905:—

Date.	Amount.	Issue Price.
October, 1907	£139,400	100
April, 1908	187,400	101
July, 1909	187,300	102½
June, 1910	288,000	103
July, 1911	302,000	103
May, 1912	595,000	99½

Port Arthur's Temporary Loan.

Port Arthur has negotiated a loan for six months for £150,000, or \$730,000, in the form of treasury notes, at the rate of 6%.

The return recently submitted to Victoria's council showed that expropriations for street widening purposes and extensions absorb \$982,489, and a sum of not less than half a million is required for the schemes authorized. Although the by-laws are being closed up, there are 266 not yet completed, and the comptroller suggests that no new work should be authorized. He points out that if money by-laws come up for ratification in January the money raised upon them will not be available till late in the year. The city has still in hand fifty-year stock to the extent of \$1,650,000, and the total indebtedness on local improvement works is \$4,044,753, less for by-laws closed up, but not assessed, \$926,589, or a total of \$3,118,164.

Alderman Cuthbert suggested that the city comptroller's figures showed that with the debentures still unsold and those yet to be issued under the by-laws not yet closed the city has borrowed over \$6,000,000, which must be paid back to the bank. He suggested that the city engineer be requested to report on the position of the works under the various by-laws.

Want Higher Interest Rate.

That the city of Ottawa should increase the rate on its debentures in order to sell them at a better figure is the recommendation made to the board of control by city treasurer Ellis. He points out that when the city some time ago sold \$175,000 in twenty year, four per cent. debentures, only 94

was realized, with the result that \$10,500 had to be taken out of the general fund to make up the difference. He is now preparing to issue debentures to cover the local improvements for 1910 and 1911, and pointed out that while the five and ten year debentures may be invested in the city's sinking fund, the twenty year debentures will have to be sold in the open market which does not show prospects of improving. To get face value for the debentures he suggested that the rate of interest be increased to four and a half per cent. The board decided to discuss the matter with the city treasurer.

DEBENTURES AWARDED

Mitchell, Ont.—\$10,000 5 per cent. to Perth Mutual Fire Insurance Company.
Cap R. M., Sask.—\$10,000 6 per cent. 20 years, to Messrs. Curran Bros., Regina.
North Toronto, Ont.—\$140,000 4½ per cent. 30 years, to Messrs. C. H. Burgess & Company, Toronto.

EXPERT'S OPINION OF HOLLINGER REPORT

The following brief opinion of the Hollinger report, just published, has been obtained by The Monetary Times, from one of the leading mining engineers of this continent. He says:

"It is a bona fide report of an engineer, and it tells probably all that the shareholder should know. What more can one ask? The work of the mill, as reported, is excellent and is good news. The news on the 200 foot level is good news. The discovery of veins 37 and 38 show the mine to be travelling in luck which is worth more than all else in mining.

"The news from the 300 level, on the face of it, is disappointing, but there is so little work done there that is of slight significance. The report shows the mine is looking healthy all round. They ought to be able very easily to increase their profits well beyond \$40,000 a month if they have prepared sufficient working forces underground. More exploration work is needed at below the 300 foot level."

New Westminster property owners of the city signified their approval of the Heaps Engineering by-law, which leases to that company, with the option of purchase, 4.0 acres of city property on Lulu Island, for the purpose of removing there the Schaake Machine Works. and to increase the business to such an extent that their force of workmen will have to be augmented, it is expected, until about 250 will be employed.

PRESIDENT WILSON AND TWO TARIFFS

The Democratic victory in the United States has more interest for Canada than is usual in the presidential elections of the Republic. When President Taft entered the White House four years ago, his promise was that the tariff should be revised. He performed that promise, only the revision was upward rather than downward. One of the planks of the Democratic platform for a long time has been the lowering of the tariff. In the past election, that plank was strengthened. President Taft has always sought the best way to balance himself on the presidential tight rope. He thought that upward tariff revision and the proposed reciprocity treaty with Canada would keep him safely balanced, pleasing both the manufacturer and the consumer. Failing to recognize the majority opinion of Canadian onlookers, the balance overturned and the rope entangled him in defeat.

President Woodrow Wilson assumes his new office pledged to tariff revision. He is the type of man who will perform his promise without evasion of any kind. His party is sufficiently strong to overcome most, if not all, obstacles. The people of the United States are in a frame of mind for a reduction of the tariff.

In this connection it is interesting to recall the letters which passed between Mr. Taft and Mr. Roosevelt in 1911. On January 10th, writing to the ex-President, the then President (Taft), said, regarding the proposed reciprocity agreement with Canada:—

"It might at first have a tendency to reduce the cost of food products somewhat; it would certainly make the reservoir much greater and prevent fluctuations. Meantime the amount of Canadian products we would take would produce a current of business between

Western Canada and the United States that would make Canada only an adjunct of the United States. It would transfer all their important business to Chicago and New York, with their bank credits and everything else, and it would increase greatly the demand of Canada for our manufactures. I see this is an argument against reciprocity made in Canada, and I think it is a good one."

It is not necessary here to print the correspondence in full, but merely to add that Mr. Roosevelt wrote to Mr. Taft on January 12th: "It seems to me that what you propose to do with Canada is admirable from every standpoint." Mr. Taft also stated he had always been a low tariff and downward revision man. His actions proved otherwise, and he thought to square them with the Canadian reciprocity treaty. It was asserted by many at that time that if Canada would give sufficient time, the United States by popular and political demand would reduce their tariff on Canadian imports of their own volition. This, we believe, is what will happen with President Wilson at the helm. On the other hand, we do not think that Mr. Wilson will revive the question of reciprocity in the form proposed by ex-President Taft.

The United States is already enjoying more than sixty per cent. of our import trade. The total trade between the two countries during the fiscal year, 1911, was valued at \$413,812,000. Of that, \$294,415,000 represented our imports from the United States and \$119,397,000 our exports to them. The presidential election may mean ultimately a tariff conference between the two governments. With the possession of sufficient data, and a full appreciation of the commercial and agricultural possibilities and increasing value of the home market of Canada, an agreement might be consummated which would prove acceptable to all Canadians.

SEEKING CANADIAN BUSINESS

A special Committee of the New York Produce Exchange is preparing rules for the listing of Canadian wheat quotations on that exchange. The scheme is to accept the grades at Winnipeg as the standard and to decline the conditions under which contracts may be entered into and executed in handling such proportion of the wheat crop as may be exported through brokerage operations under the jurisdiction of the exchange. That, superficially, appears an unimportant innovation, but there appear to be in view far more serious aims. After this month, nearly all our grain will go to the seaboard by rail, and those north Atlantic ports which are available to navigation throughout the year will have an advantage in that respect over Canadian ports.

In the opinion of Mr. A. Montgomery, one of the members of the New York Produce Exchange: "It is a question of providing the best facilities during the closed season, as to whether markets on this side of the line will get any considerable portion of the trade. The fundamental step is the quoting of Canadian wheat. With that will come the financing of exports by the New York and other seaboard banks. Inasmuch as the Erie Canal operates two weeks longer than Canadian waterways, the enlarged bargeway should find a profitable trade in Canadian wheat. This makes the question one of interest to the entire State as well as to the railroads and the financial institutions of New York city."

Here, then, is another argument for wasting no time and stinting no money for the development of Canadian ports. There are certain natural disadvantages with which the Dominion has had to contend, but they have been largely overcome. The Dominion Government cannot afford to neglect the improvement of the ports of Montreal, Quebec, Halifax and St. John. Equally as important is the expenditure of money, energy and time upon the ports of our Pacific Coast. The day is rapidly coming when, even with greatly increased facilities, our Atlantic ports will be unable to handle anything like all the Western grain shipments. In addition, therefore, to the Eastern movement, there must, in comparatively short time, be a considerable grain movement to the Pacific Coast, whose ports are available to navigation throughout the year, and whose claims will be even stronger with the advent of the Panama Canal. These points are apparently recognized by the New York Produce Exchange. Their innocent looking bait for business for the port of New York and other United States outlets, is the provision for listing Canadian grain. It has been suggested that the scheme is merely one for gambling in wheat. It looks more like a plan to gamble with Canadian business that ought to be kept for Canadian ports.

THE FRENCH BANK

Is it not time that Judge Leet gave the press and the public some information respecting changes said to have been made against officials of La Banque Internationale, and said to have been heard in private before the Judge?

A LIMIT TO INVESTMENT BLUE SKY

The scope and intention of the "Blue Sky Law," enacted not long ago in the State of Kansas, to protect the investing public in that State from the depredations of fraudulent stock vendors, have been fully described in previous issues of the *The Monetary Times*. In a United States financial monthly Mr. Arthur B. Chapin, formerly Bank Commissioner of Massachusetts, expresses the opinion that legislation of this character "may, and probably will, spread, in some form or an-

other, to a great many other States besides Kansas." He is by no means convinced, however, that such an innovation would be an unmixed blessing for American investors; indeed, he suggests that it might easily prove the reverse.

The objection to such legislation, Mr. Chapin shows, lies in the fact that "the moment the State puts its seal of positive approval on securities that have passed the investigation of its Banking Commission, a very dangerous situation is brought about. No State department could be created, by any stretch of the imagination, which would be able to build up a system that could investigate securities as thoroughly as they are investigated by responsible banking houses. Under most favorable conditions, and with the best intent in the world, a certain number of questionable securities, that would eventually come into disrepute, would receive the seal of approval of a sovereign State. A large proportion of the investing public would not discriminate in the selection of securities that had received this approval."

A feeble imitation of the Blue Sky Law of Kansas was recently placed upon the statute books of Manitoba. At first it appeared as though every company selling shares in that province would have to enter the small legal portal under the eye of the commissioner in charge. After sundry conferences with bankers and financiers, the law was interpreted as being a silent watchdog, barking occasionally to recall its presence and biting whenever a securities tramp endeavored to peddle his worthless wares.

No matter how high are legislative walls and how peppery legislative guns, the chief safeguard of the investor rests with the investor himself. One cannot legislate common sense into those who lack it in the matter of investment. They can be educated to proper methods and precautions. They can be protected with proper laws. But that will not prevent the loss of funds in unworthy securities, now or in the future. The investor has to do a little sane thinking for himself.

GOING AFTER THE INCOME TAX

The London offices of certain Canadian mortgage companies have received a request from the Imperial Inland Revenue authorities. It is for a list of persons resident in the United Kingdom to whom such mortgage companies pay interest or profits, whether the payments are made in the United Kingdom or in Canada. This is the statement of our London contemporary, the *Financial News*. Large numbers of persons have invested money on mortgages in Canada, and have taken steps to ensure that the interest shall be received in Canada itself and there reinvested. In this way the money never enters the United Kingdom, and consequently inland revenue payments are not obtained.

The new demand indicates a change. There is no question as to the power of the revenue authorities respecting the supply of lists of persons resident in the United Kingdom to whom interest is paid by Canadian mortgage companies, such payment being made in the United Kingdom. That interest is clearly liable under existing acts of parliament. The requirement of names of persons to whom interest is paid in Canada is, however, a different thing. Our contemporary states: "It is the business of any Canadian mortgage company upon whom this demand is made to inquire under what Act of Parliament power has been conferred upon British Revenue authorities to extort income-tax on payments made in Canada. The demand is, in fact, a direct menace to Canada herself. The British Government may theoretically possess a hazy and entirely impracticable right to impose an income-tax upon Canadian citizens. That right it would not dare to exercise, for the simple reason that the whole of the Dominion would instantly be up in arms against it. But the attempt to inquire into the identity of persons to whom Canadian mortgage com-

panies pay dividends in Canada itself is scarcely less insidious. Canada requires every shilling of capital that she can obtain from British investors.

"The finance and mortgage companies of Canada represent an enormous force, which is contributing a practically limitless stimulus to the evolution of the country. They owe it to their myriads of clients on this side to make instant representations to the Government at Ottawa with regard to this insidious attack upon the freedom of the investor in Canadian securities. The Government at Ottawa is quite strong enough to intimate to the mortgage companies that no information is to be given outside the Dominion itself with regard to the amounts paid by way of dividends or interest on Canadian investments. Such an attitude, assumed by the Ottawa Administration, would augment the swelling current of British money which is flowing towards the Dominion."

The British Inland Revenue authorities apparently intend to collect taxes on income, no matter where capital is invested and interest earned. That is a precedent, and one which the British investor, whatever his political color, undoubtedly will fight. What the Dominion Government will do in the matter remains to be seen. It is primarily a subject for our finance and mortgage companies and their clientele.

GROWER AND CONSUMER

The report on the high cost of living, presented this week by a special committee of the Toronto Board of Trade, is of national interest, the high cost not being confined to any particular part of the country. Many of the reasons for that cost are applicable also from coast to coast. After citing various facts and stating that blame is not cast upon any individual or group of individuals, the committee states that the principal causes of the world-wide rise in the price level of all commodities, including foodstuffs, are the great increase in the production of gold during the past twenty years, the large sums expended annually by the great nations for war preparations, and the migration citywards. The last named cause has especially affected the increased cost of food, which is probably the phase of the problem of wider application than any other. The Board of Trade committee state that the tax levied on imports of food from abroad and paid by the Canadian consumer is one of the reasons for the high prices of foodstuffs. This tax, they say, was intended to protect the Canadian farmer in times of Canadian scarcity and to be inoperative in times of Canadian plenty, but the development of the packing and canning industries, coupled with the growth of cold storage facilities, has made it possible to-day for a group of men to entirely control the prices at which our farmers must sell certain products—nearly all the possible buyers being in the group—and also to maintain the prices at which the consumer must buy the same products up to the level of the foreign price plus freight plus duty. "We all know," they say, "how high are the prices of domestic fruit and vegetables, while imported tropical fruits, upon which there is no duty, are said to be as cheap in Toronto as in any other city outside the tropics. It was never intended that a tax imposed to protect the farmers should be used by dealers to corner domestic produce."

It should be remembered, however, that many farmers consider the canners as their greatest help, in view of the difficulties experienced in getting their stuff to the cities.

Men engaged in raising fruit and vegetables for consumption in Toronto report that they have found the conditions there so intolerable as to force them either to seek for other markets, or to go out of the business. Such conditions are duplicated elsewhere in Canada. The outstanding facts appear to be that the grower of fruit and vegetables does not get sufficient for his produce, that the consumer pays too much for that pro-

duce, and that the media between the two are largely, if not entirely, responsible for the unfortunate position.

Mr. T. Delworth, president of the Ontario Vegetable Growers' Association, says that if the consumer did not depend upon his grocer and butcher so much and dealt directly with the producer, the problem would partially be solved. The winter's supply should be purchased at the time the gardener is harvesting. The Hon. James Duff, Minister of Agriculture for Ontario, says that those who are tired of paying high prices for food and vegetables should go out and work the land. "No legislation on earth," he adds, "can control the prices of foodstuffs, and so long as there are men who would rather drive a street car in Toronto than work on a farm, they deserve to suffer from the high cost of living." But Mr. Duff must go further, for even when the man does go back to the land, he cannot always make a reasonable profit on his labor, which labor does not always reduce the consumer's buying price. Tons of fruit and vegetables are rotting on the ground in the country districts of Ontario and other provinces, because "it does not pay the farmer" to pick, pack and ship much of his produce.

The grower and consumer must be brought into closer touch. The Toronto Board of Trade Committee points out that Ireland to-day affords a splendid object lesson in this matter. Ten years ago the small Irish farmer was absolutely at the mercy of the middleman, who kept the prices at which they bought as low as they liked and maintained the prices to the city dealer as high as they dared. To-day these small Irish farmers are learning the trick of combination so as to control the selling end of their own business, with the result that the farmer is getting better prices for his produce and the city dweller is paying less for the same. A still better example of the effects of combination is, perhaps, to be found in Denmark, where the farmer does not lose control of his butter or bacon until it is sold on the London market. The produce may go through several hands, but these hands are all agents or servants of the combination of producers.

SMALL CHANGE

There is no duty on the Christmas spirit.

Good men for the job are worth the price.

* * * *

Montreal cannot afford to play with the fire risk.

* * * *

Western Canada retains the pink flush of prosperity.

* * * *

As former luxuries become modern necessities, the cost rises.

* * * *

Has the second instalment on that summer subdivision been paid yet?

* * * *

The year 1913 has no superstitious significance for a land of prosperity and plenty.

* * * *

No matter how soon navigation closes, the annual number of *The Monetary Times* is well under way.

* * * *

Quebec is to fix a legal standard of weight for "a bag of potatoes." That should help reduce the cost of living.

* * * *

The forms of argument being used in the British House of Commons are almost as strong as those of the Toronto city council.

* * * *

A correspondent agrees that Quebec Railway common stock is water, but thinks it was sold abroad at Bordeaux wine prices. That seems to cork the argument.

FARMERS AND BANKING SERVICE

Agriculturist Has Same Consideration as Manufacturer When Conditions Are Right—Loans on Grain

Agricultural credit was discussed in an interesting interview given to Mr. J. W. Ward by Sir Edmund Walker and published in the Grain Growers Guide. Without admitting that the Canadian banking system was inadequate, Sir Edmund said he had the greatest sympathy with any effort to give the farmer all the financial assistance which it is necessary for him to have. "There is no reason," he added "why a loan to a farmer of \$100 should not have the same consideration as a loan to a manufacturer of \$100,000, if the conditions are right. Now, let us get at the conditions. No new settlement was ever made in a new country accompanied by such banking conditions as we have here. No one else ever got money so readily or at so low a rate of interest.

"In this country, unlike Australia, New Zealand, and Great Britain, commercial banking and land banking are absolutely separate. A commercial bank in Canada is not allowed to lend money on the security of land, and for many good reasons that it is not necessary to go into now. Let us take the land side of it first, a matter with which I personally am not connected. The man who has secured the patent for his homestead in Saskatchewan or Alberta and gets his first small loan from a mortgage company at 8% may think that rate high because some one may be borrowing money elsewhere at 5 or 6 per cent. As a matter of fact the farmer similarly situated anywhere else in North America never got his money at anything like that rate. Very much higher rates were paid in the Western States when they were in the same stage of development. As conditions become more settled rates will go down, as they have done in Manitoba, where, I believe, 6 to 7 per cent. is the rule.

Can Cheaper Money Be Got?

"If any plan can be devised that would provide that money more cheaply, one would like to see it accomplished, but I do not think it can be done unless you are to suppose that the state is to use the credit for that purpose which might otherwise be necessary for public works. If the Provincial or Federal Governments were to pledge their credit for the purpose of obtaining any large sum of money to loan to the farmers at low rates of interest, the inevitable result would be that the rate of interest would go up and all the money they required not only for this purpose but also for the public works which are necessary in this growing country, would cost them more. There are only a certain number of people who are seeking investment securities such as those of the Canadian governments, and the moment you ask for more money than is readily forthcoming your interest rate goes up."

The experience of New Zealand and Australia where the governments have for more than 20 years borrowed money in England at 4 per cent. and loaned it to farmers at 5 per cent., was quoted to Sir Edmund, but he was not prepared to admit that Canada could safely follow the example of those countries.

Distrusts Australian Experience.

"New Zealand," he said, "is almost a perfect country. Nature has done everything possible for those small islands, and it seems possible to make a success of experiments there that would bring disaster anywhere else in the world." As to Australia, he dismissed the experience there by saying that London was complaining that Australia was continually coming for more and more money, and even if their accounts did purport to show that their system of government banks and loans to farmers had been a success, he would distrust the final outcome.

The proposal of those who advocate government loans to farmers, it was pointed out to Sir Edmund, was practically that the government should do the work that the trust and loan companies are doing in bringing money from Great Britain for investment in farm mortgages. Asked as to the methods of these companies, Sir Edmund said:—

"I am not interested in any company that lends money on farm mortgages, but I understand that they pay the English investor 4½ per cent. when they guarantee the investment, and 5 to 5½ per cent. when they do not. They loan the money to the farmer at 7 and 8 per cent., and to the farmer that may seem rather a large margin. But you must remember that every operation connected with such a transaction costs money.

Cost of Banking Operation.

"When we in the bank borrow money from our depositors at 3 per cent. and lend it at 6 per cent., people seem to think we are making a lot of profit. They have no idea what it costs us to carry on business—in salaries, buildings, or rent, stationery and so forth. With a mortgage where the in-

terest is only collected yearly or half-yearly, and the loan runs for five years the expense is not so great as where the money is continually coming in and going out again, as it is in a commercial bank, and mortgage loans might perhaps be handled on a margin of 1½ or 2 per cent. Still you must remember that they, just like the farmers, are trying to make as much money as they can. Nevertheless, I do not believe that the advantage which would inure to the individual farmer in getting his loan at one or two per cent., or even three per cent. less than he is now paying, would compensate the country for the loss that would result from the depreciation of the public credit that would be sure to follow. No," he said, "I do not believe in government interference in matters of this kind. Governments in Canada, at all events, are never as efficient or as economical in their operation as private enterprises."

Would Lend Money on Grain.

Coming to that part of the question of agricultural credit that banks are directly interested in, Sir Edmund was asked how he regarded the proposal which has been much discussed of late, that banks should be given authority to lend money to farmers on the security of grain stored in their own granaries when the lack of transportation facilities or the condition of the market made it impossible or undesirable to market it immediately. To this proposal Sir Edmund was sympathetic.

"It is desirable for many reasons," he said, "that all the grain crop of the country should not be rushed on the market at one time. In the first place, it is not reasonable to expect the railways to have facilities to handle the whole crop within a period of ten or twelve weeks. It would not be economical on their part to do so, because it would mean keeping a lot of rolling stock and motive power that would be idle a great part of the year, and if they were forced to do this, freight rates would remain higher than is necessary, because of the loss of interest on the cost of such idle rolling stock. Then to rush all the grain on to the market at one time would inevitably be to depress the price when the farmer was selling, and to raise it when he had none to dispose of. The farmer, however, must have money in the fall to meet his liabilities. The machine agent, the storekeeper and the thresherman all want their money at that time, and it is desirable that he should be able to pay them. Consequently, if the farmers ask for the privilege of having the right under the Bank Act to put their grain in some safe storage and pledge it to the bank, I should hope the government would grant it and that the banks would do their best to provide the accommodation required. I can see no reason why such a plan should not prove practicable. I have always urged that every bank should extend credit to the farmers whenever it is justified, and such a provision would undoubtedly enable a great deal of credit to be extended that cannot be extended now, because they bank has no way of taking security on the farmer's assets."

And Also on Cattle.

"Would you also be in favor of the banks having power to loan money to farmers for the purpose of enabling them to purchase cattle and go into mixed farming, the cattle themselves being given as security?" Sir Edmund was asked.

"Yes, I would be in favor of that also," Sir Edmund replied. "It is desirable that the farmers of the West should be induced to go into mixed farming, and anything that will help to bring this about is deserving of favorable consideration. The chief objection to it would be that if other creditors, such as the storekeeper and the implement man, did not know that a man's cattle were pledged to the bank they might say that they extended credit to the farmer believing that they had the cattle to fall back upon. However, these creditors would have to take trouble to inform themselves as to the man's position, and govern themselves accordingly. If it is considered desirable for the benefit of the country generally that farmers should have loans on the security of their cattle, I see no reason why parliament should not legislate accordingly."

PRICES GO UPWARD

The Department of Labor's index number of wholesale prices rose slightly during October, standing at 133.1 as compared with 132.5 in September and 128.4 in October, 1911, the declines in wheat, oats, hay, cattle, sheep, mutton, potatoes, linseed oil, hops and malt being offset by advances in milk, eggs, hog products, lemons, tomatoes, jute, iron, lead, tin and their products, coke earthenware, opium and rope. The index number is a percentage of the average price level during the decade 1890-1899. The feature of the month in retail prices was the widespread scarcity of anthracite coal from Nova Scotia to Saskatchewan, with advancing prices. Eggs, butter and milk were upward, while potatoes were lower.

MONTREAL'S WATER DEPARTMENT

Complete Investigation Will be Made as Desired by Fire Underwriters

Monetary Times Office,

Montreal, November 14th.

The charges—which the Canadian Fire Underwriters of Montreal recently made against the city's water department have been the subject of considerable discussion at the city hall. The charges were of a somewhat serious nature, and accompanying them was a request for an investigation of a thorough character to be made into the conduct of the water department generally.

Alderman Lapointe, one of the oldest members of the city council, in referring to the charges made by the underwriters, said:

"It is stated in this resolution that in the management of the water department there has been incompetency; faulty construction of engines; faulty workmanship; acceptance and use of inferior materials, and continued dilatory work and repeated disaster to the city water plant. Such a list of charges are serious, and there is no other course open to the city but to grant the investigation the underwriters desire. The charges are sweeping, and the allegations are direct. Whether or not they are justified we shall know when experts are appointed to look into the matter."

Meets With General Approval.

Alderman Lapointe admitted that there had been many accidents to the water system, but claimed that of recent years the facilities had been improved considerably, and he considered that the best way to proceed on the charges would be to ask the board of control to study the subject and to report the results.

At a later meeting of the council the board of control reported that it could not see any advantage in having the investigation. Controller Godfrey said that some of the accusations were certainly not correct, and that the pump which the underwriters stated had arrived in June, and had been left lying around for months, was now almost ready to be operated. The fact was that the works where the pump was being manufactured had met with an accident and portions of the machinery had not been received until a short time ago. It was this which delayed the setting up of the pump and not any fault of the city or water department. He did not consider that there was any necessity for a commission as the situation was well known to them.

When the council came to consider the matter, however, they decided by a vote of twenty-three or four to have an investigation carried out. This action meets with general approval. The condition of affairs which has existed here during the past three or four weeks has certainly been anything but of a character to inspire confidence in the department, more especially when it is remembered that for years past, something of a more or less dangerous character has been frequently taking place.

Fire Underwriters' Constant Warnings.

The Fire Underwriters are constantly calling attention to the situation and declaring that Montreal must pay for its fire hazards in increased insurance rates. The matter is an old one, and is a fruitful topic of discussion between the underwriters and those who are attempting to get the fire insurance rates reduced.

The Worthington pump, the breakdown of which caused the recent water famine, has been repaired and is in operation. It has a capacity of 12,000,000 gallons daily so that this will go a long way towards putting the reservoirs in a condition once more to supply not only the necessary household consumption, but to provide against any lack of pressure, in case of fire, such as was so serious recently in Montreal. The new pump, to which the underwriters referred, will shortly be ready to operate. It has also a capacity of 12,000,000 gallons per day. The situation should then be much better in Montreal, as if one pump fails, the other will be ready to take up the work. The claim is frequently heard that the trouble arises very largely through provision not being made in advance for the increased requirements of the city. These increases have been great of late years, and the investigation will now show whether foresight has been lacking or whether the department has been alive to the city's requirements.

The purchase of 400,000 acres of land in Northern British Columbia has just been completed by Mr. Lauchlin Maclean, of Spokane, and his associates, for a consideration of \$2,730,000. The transaction constitutes probably the largest land purchase ever made in the Pacific northwest.

MONTREAL'S ELECTRICITY SUPPLY

Is More Than Adequate for All Requirements—National Hydro-Electric Company's Application

Monetary Times Office,

Montreal, November 14th.

Considerable interest has been aroused here in power and financial circles, and among the citizens generally, in the report which has come from Quebec to the effect that the National Hydro-Electric Company, with head offices at Montreal, is making application at the present session of the Quebec Legislature for the necessary powers to enable it to make use of the streets and roads of Montreal and, in fact, of the streets and highways generally in about a score of counties of this province.

The National Hydro-Electric is the company which owns the Carillon Falls power, of which considerable has been heard from time to time during the past few years. The Falls are situated some thirty-five miles up the Ottawa River from the city of Montreal, and they mark the head of navigation so far as the larger steamers are concerned. From Montreal to Carillon and return is the round trip of the line of steamers of which Mr. R. W. Shepherd, who died last week, was the manager.

What Carillon Falls Can Develop.

The statement was made that the falls are capable of producing 160,000 horse-power, and that it would cost \$10,000 to develop them. Manifestly, one or two cyphers must have been dropped off the sum mentioned, inasmuch as \$10,000 would not commence to develop a power of any consequence, and the company would not be applying for powers to issue \$12,000,000 bonds, as it is doing, if it could get along with just \$10,000.

So far as concerns the report that 160,000 horse-power can be developed at the Falls, this would seem to be confirmed by the report of the Conservation Commission, it being therein stated that the Falls have a total possible capacity of 200,000 horse-power, when the Georgian Bay Canal has been completed. By this is no doubt meant that the storage reservoirs planned for the watershed near French River must be also brought into play before the total of 200,000 horse-power will be available. The head of water for the complete development would be about 40 feet.

Under present conditions, the conservation report gives Carillon Falls a possible development of 26,000 horse-power, at a head of 13.5 feet. Whether, by the expenditure of considerable money, any more than this can be developed previous to the actual completion of the canal or not, is not stated.

Mr. Henry Miles, the president of the company, is a well-known man in Montreal, having a few years ago been president of the Montreal Board of Trade. He says:—

"We believe that Montreal wants more power, and we want the privilege of bringing it in. The small plant we already have will shortly be in operation, and it will supply the neighboring municipalities with their requirements, as well as the company with what it requires while carrying out the work on the larger installation. Montreal wants more electric power, and if they give us the opportunity we will supply it."

Current From Companies.

Montreal should certainly be well supplied with electrical power very shortly. Already several companies are sending in current from different hydraulic developments, great and small, within one hundred miles of the city. The Montreal Light, Heat and Power Company is supplying from its developments at Chambly, Lachine Rapids and Soulanges Canal somewhere around 30,000 to 35,000 horse-power, and in addition to this it has auxiliary steam plants within the city. The principal interests in the company, as well as in its side-partner, the Shawinigan Water and Power Company, have lately acquired the Cedar Rapids power. This is situated near the Soulanges development just referred to, and is quite possibly the largest power obtainable anywhere near Montreal. It is claimed that in a very few years the Cedar Rapids Manufacturing and Power Company will be sending in 150,000 horse-power to the city of Montreal, or to the surrounding district. It seems likely, however, that a very considerable portion of this will be taken by certain large special industries which it is claimed will be established here by the time the power is ready. The Montreal Light, Heat and Power Company is also bringing in a large amount of power from Shawinigan Falls, it having contracted to deliver all the power for the Shawinigan Company required on the Island of Montreal. The present contract is for about 63,000 horse-power, though it is said that not all this is being asked.

(Continued on Page 750.)

CHANGING THE RAILROAD MAP

Central Vermont Work Suspended—Canadian Northern's Atlantic Outlet—Ontario Government's Road

Work has been suspended on the Providence extension of the Central Vermont. The work has been stopped, it is said, owing to the unsettled condition of the money market in England. It was the first intention of the company to have the road from Palmer, on the Central Vermont, to Providence, a distance of 57 miles, completed by the end of the year. It is stated that thirty per cent. of the grading has been accomplished.

The Canadian Northern Railway will probably seek legislation this season providing for its maritime outlet for through traffic from the West. The final eastern link of the Canadian Northern system from Sudbury to Quebec now under construction, will be completed within a year or so. There is no provision for further outlet to the seaboard, and the road wants to be in a position to secure the through haul, instead of having to turn its traffic over to the rival roads at Montreal or Quebec when the St. Lawrence navigation season closes. The alternative schemes are running rights over the Intercolonial, or connections with the Boston and Maine.

With Boston and Maine.

The company is applying for legislation authorizing the construction of a line from Montreal to Levis, with a branch running down from St. Hyacinthe to Sherbrooke. At this latter point the road will make connections with the Boston and Maine line, giving a through outlet for export grain and other commodities via Boston. Thus the Canadian Northern Railway would be in a good position to compete with the Canadian Pacific Railway and the Grand Trunk Railway from coast to coast, and would be independent of these roads or their allies for the Atlantic outlet.

Important changes are to take place in the agreement between the Grand Trunk Railway system and the Wabash Railway, in connection with the Air Line branch, over which the Wabash has running rights. President Chamberlin, of the Grand Trunk, and General Manager Deland, of the Wabash, recently made an inspection of the Air Line division, so that there is indication that the Wabash Railway will increase its interests in Canada.

The Wabash Railway has completed arrangements for the purchase of three of the old Michigan Central car ferries for use on the Detroit River. Heretofore, the Wabash has used the Grand Trunk car ferries to handle its trains across the river.

Elk Lake Branch.

Twenty miles of steel of the Temiskaming and Northern Ontario Railway on the new Elk Lake branch have been laid, leaving about ten miles to be completed. While a service may be inaugurated by Christmas, the Montreal River has yet to be crossed. The piers and coffer-dams are all ready, and the steel work is now being assembled at the factory. With fair conditions the work ought to be completed late in December.

The Chatham, Wallaceburg and Lake Erie Railway has been bonded by the Canadian Northern interests. The sum of \$25,000 has been paid to secure the option. The action of the Mackenzie and Mann interests in securing this line is regarded as further evidence that the Canadian Northern Railway means to push through with the work in Western Ontario to Windsor.

HEAVY PER CAPITA FIRE LOSSES

The superintendent of the fire brigade for Wellington, New Zealand, reports that the total loss caused by fire throughout the dominion in the last eight years amounts to £4,450,116, averaging 12s. per capita, against 10s. 2d. in America and little over 1s. 4d. in Europe. "This must be," he says, "very near the world's record" loss per head of population, but no concerted movement is made towards a reduction. The report showed that excessive insurance is much in evidence. No doubt it is one of the principal factors as the cause of the heavy fire loss that prevails, inducing, as it does, in addition to, but entirely outside, the question of criminal and moral hazard, general carelessness in respect to fire that would not obtain otherwise. Before the excessive fire waste that now prevails can be brought within reasonable bounds concerted action is necessary between the public bodies and private companies. The general public must be educated up to a sense of the national loss that is going on.

RELATION OF RAILWAYS TO DEVELOPMENT

Must Keep Abreast of Requirements—Co-operation of Transportation Interests and Shippers

President Finley, of the Southern Railway, in an address before the Transportation Club, of Indianapolis, spoke on "The railway and the shipper." He said in part: "The railway and the shipper are each dependent upon the other. It is recognition of this dependence upon the shipper that has led the railways of the United States to adopt policies having for their purpose the enlargement of the business of shippers on their lines and the multiplication of the number of shippers. These helpful policies are based on sound business principles, for if we look beyond the immediate present, it is apparent that the ultimate prosperity of the railway is dependent upon the lasting prosperity of those upon whom it must rely for its traffic."

"In my opinion it is equally true that the shipper is dependent for his ultimate prosperity upon the lasting prosperity of the railway."

Mr. Finley pointed out that not only wages, but materials and supplies used by railways have advanced in price, and that their taxes, levied by government, have increased \$80,000,000, or 167 per cent., since 1900, and amount for the fiscal year 1912 to about \$130,000,000.

Increase in Carrying Power Needed.

These facts were presented in order that some conception of the railway situation of to-day and of the problems with which railway managers must contend in their efforts to provide facilities for serving the shipper might be formed. Looking to the future development of the country and the growth of agriculture and manufacturing, it is clear that an increase in carrying capacity will be needed. Leaving out of account the new construction that should be undertaken in some localities, generally speaking, the policy of the railways should be that of keeping their existing plants abreast of requirements.

The practical question confronting those responsible for making these improvements is that of providing the necessary capital. The ability of the companies to attract the investment of new capital on reasonable terms will be measured by their net earnings capacity. Railway credit is dependent upon net income, and it is essential to the continued development of the American railway system that units of revenue shall bear a proper economic relation to units of cost.

Helpful in Ultimate Effects.

The shipper who takes this broad view of the railway situation in all of its far-reaching economic bearings will be led to the conclusion that some rate reductions that are asked for are unreasonable and hurtful to the best interests of all concerned, and that some rate advances proposed by the railways would be helpful in their ultimate effects to the railways and the shippers alike.

When the time shall arrive that the shipper shall take the same lively interest in the railway by which he is served—when he shall study its reports and understand its needs and its resources, and when he shall look upon its progress as an indispensable factor in his own prosperity, the solution of the railway problem of the United States will be arrived at and the interests of the railway and the shipper have been promoted.

This is an opportune time for the railways and the shipper to draw closer together in mutually helpful co-operation. We have entered upon a period of general prosperity which is reaching all classes of our people, and it has come to stay.

PREPARING FOR THE PANAMA CANAL

In an interview at Ottawa, Sir Richard McBride, Premier of British Columbia, said:—"I have repeatedly declined to make any representation to the Federal government on behalf of our province in connection with the Panama Canal bill, feeling sure that the good sense and love of fair play of the American people will result in an entirely satisfactory adjustment of the difficulty. In the far west our relations with our American neighbors are most cordial and friendly and they have been firmly so fixed since the rejection of reciprocity which standardized the Canadian people."

"The persistently reiterated statements that the movement of Canadian export wheat via Vancouver and the Panama Canal will not be practicable are unworthy of notice. I can say officially that it is within my knowledge that elevator men of the largest responsibility are planning for the construction of vast grain elevators on the Pacific Coast to take care of the expected grain export trade which the completion of the Panama Canal will bring over our way."

CANADIAN TRADE IN BRAZIL

Republic is Desirous of Increasing Industries—Few Opportunities for Dominion's Traders Available—Government's Assistance

Openings in Brazil for Canadian exports are somewhat limited at the present time, is the opinion of Mr. H. R. Pousette, Canadian trade commissioner at Buenos Ayres. There are several reasons for this, one being the determination of the republic to manufacture, so far as possible, the commodities consumed within her borders, and the consequent part exclusion of foreign competition by high protective duties. Another is, that in the interior the standard of living is not high; in fact, the same may be said of the coast towns apart from the wealthy and cultured class. A third reason proceeds from the customs preference granted to the United States in certain articles, which, in so far as they are concerned, places any Canadian competition at a hopeless disadvantage. It is for these three reasons, either separately or one or more in conjunction, or for causes connected with them, that looked at from a Canadian standpoint and with a fair knowledge of the Dominion's limitations, the possibilities of trade do not just for the moment warrant too much optimism.

Some Points of Interest.

It appears that there has been some irritation on the part of Brazilian importers over the methods of some United States exporters, and the indications are, that were Canadian firms to make an effort to enter the market they would find a favorable reception. A factor that the Canadians should not neglect in connection with the South American trade is the sympathetic tendencies which British firms usually exhibit towards Canada. All being equal, it will generally be found that next to the United Kingdom, British firms would prefer to deal with the Dominion rather than with any other country in the world. That is no small consideration when it will weigh strongly against even long-standing business connections.

It appears highly desirable that Canadian exporters should make an effort to send capable representatives to South America to sell their merchandise in the markets of the continent. The person sent should be of good address, and it must be noted that the energetic methods of the commercial traveller are often unsuited to the easy-going people of South America.

Credits in Brazil are extended, ranging from 30 to 180 days, but the usance of bills probably averages about 90 days. Some importing firms are quite prepared to pay cash—it depends on the commodity—but as a rule they expect 60 days from sight. If customers are carefully chosen, there is no more reason to fear losses in this republic than in any other part of the world. European firms with long experience behind them have no fears in granting credit facilities to sound business houses.

Steel Rails, Paper and Autos.

The imports of steel rails are so large as to merit the attention of Canadian rolling mills. Railway construction in such a huge country as Brazil is bound to play a very important part for many years.

There ought to be a future for the lighter and less expensive class of motor car that is produced in the Dominion. All sorts of sizes and makes are in use in Brazil, and it may be mentioned that there is a large number of taxis.

The importations of printing paper nearly doubled themselves in the six years ending 1909, rising from 8,965 metric tons to 16,406, or about 19,000 short tons. No commodity imported into South America could have more interest, one would think, for Canadian exporters; probably no other in latter years has increased so rapidly in volume. Latin American people are most assiduous readers of newspapers, and when one considers that it is not manufactured anywhere in the continent, it is natural to conclude that these southern republics present a wonderfully attractive field to Canadian paper mills. Amongst those situated on the east coast alone it should not be difficult to sell from one to two thousand tons per month.

Fish Trade of Long Standing.

The trade in codfish between Canada and Brazil is one of long standing, and so far as one can judge, it has been a satisfactory one for both buyer and seller. Canadian cod comes into competition with the Norwegian, and to a small extent, with the Scotch, but has a higher reputation than either of these. It is said to be of finer quality and better cured, and also that its keeping properties are superior. At the same time it is stated that the grade is not so excellent as formerly, less time being given apparently to the curing.

If this should be so, it would be unfortunate, as in the end it cannot result in greater profit, the price being bound by immutable laws to drop, but in the meantime, the reputation of a commodity which has been favorably known in connection with the Dominion for a very long time might be injured. Of scale fish, hake, haddock, and ling from Canada are in some demand in Rio.

Fresh fruit presents excellent opportunities for Canadian apples, but up to the present no advantage has been taken of the market. In conjunction with the Argentine trade, it ought to be possible to sell 100,000 barrels in the season, from October to March. But although every effort has been made to work up the trade with Argentine, it seems that another season will pass without anything being accomplished in this direction.

Other Manufactured Goods.

It can be taken as a certainty that there is a considerable importation of hoes and this class of implements for use in coffee culture. The Dominion should be able to compete in this article in any part of the world.

Under illuminative buoys, Canada is credited with 60,000 milreis in 1909, out of a total of 173,271 milreis. If these figures be correct, it ought to encourage the manufacturers to try for orders in other parts of the continent. If they can compete here, they can do so elsewhere. This is a field that will grow with the commerce of the various republics.

Upon application to the Inquiries Branch, Department of Trade and Commerce, Ottawa, information regarding specific chances to get in touch with the Brazilian trade will be given, and while present conditions do not seem favorable, the advance of the Latin American republics has been so wonderful in recent years, that with tranquility, or a fair measure of it, and a continued flow of foreign capital, it is almost impossible to predict from the present indications what the future developments will be.

BOND VALUES

Those among the banking and investing public who require a volume of bond values should investigate the new edition, the nineteenth, of Montgomery Rollins' "Tables of Bond Values," which has been recently issued. Among other new tables and computations are $4\frac{1}{2}\%$ tables of bond values, $5\frac{1}{2}\%$ tables of bond values, accrued interest on \$1,000 (360 day method). In limp black leather binding, of convenient size and easily accessible, this volume should prove of considerable value to anyone concerned in the buying and selling of bonds, etc.

"Tables of Bond Values," Montgomery Rollins, \$3. Financial Publishing Company, Boston, U.S.A.

UNDERWEAR COMPANY'S STOCK OFFERING

A block of \$180,000 7 per cent. cumulative preferred shares of Humphreys' Unshrinkable Underwear, Limited, at par, with 40 per cent. bonus of common stock, is being offered. The company's authorized capital is \$500,000, half of which is preferred and half common. Of the former \$200,000 is issued and of the latter \$225,000. The company has no bonded indebtedness. The company has been organized for the establishment of a knitting industry in the city of Moncton, to be operated by power generated from the natural gas available there. The city has granted practical exemption from taxation, making a nominal valuation of \$3,000, with free water and sewerage.

The directors are as follows:—F. W. Sumner, president, Moncton, president New Brunswick Petroleum Company, director Moncton Tramway, Electricity and Gas Company. Hon. O. T. Daniels, vice-president, Halifax, Attorney-General of Nova Scotia, president Nova Scotia Trust Company. W. F. Ferguson, treasurer, Moncton, merchant. F. C. Smythe, secretary, Halifax, late general manager N. S. Knitting Mills, Limited. W. F. Humphrey, Moncton, president J. A. Humphrey and Son, Limited. A. E. Trites, Salisbury, contractor and capitalist. J. A. McDonald, Halifax, proprietor J. A. McDonald Piano and Music Company.

At a special meeting of the London Board of Trade Hon. Adam Beck explained his scheme to electrify the city's line, the London and Port Stanley, at a cost of approximately \$900,000. He presented the reports of engineers, showing that as a municipally conducted enterprise the city would make a large profit not only on the past investment, but on the money necessary to be expended. Mr. T. H. Purdom K.C. and others opposed it, saying that it would destroy the traction line running to Port Stanley. A committee was named to report on the project.

CANADIAN SECURITIES ARE SOUND

Bank of Montreal's London Manager, Mr. F. W. Taylor, Says Criticisms Have Been Based on Wrong Premises

"Is Canada Overborrowing?" was the subject of an address delivered on Thursday by Mr. F. Williams Taylor, London manager of the Bank of Montreal, before a large company at the Royal Colonial Institute, states a Canadian Associated Press cable. Lord Strathcona presided. Mr. Taylor said the criticism levelled at Canadian borrowings, though not ill-natured, has been based on hasty conclusions and wrong premises. The popularity of Canadian loans is shown by the fact that secondary towns have borrowed on a four per cent. basis to the envy of towns twenty times their size in the United States.

None viewed more regretfully than do the Canadian bankers certain Canadian borrowings in the London market. Federal and provincial governments, municipalities, and transportation companies must continue to be financed here, therefore the Canadian banks persistently declined to become the medium for speculative issues. In ten years Canada had borrowed in London about 205 millions, with twenty millions additionally invested privately.

Small Municipalities' Loans are not Large.

The fact that Canada is more immune from invasion than any other country, with the exception of the United States, in itself is a safeguard. No other country could have financed on more favored terms or with less straining of credit.

Figures for the provinces contained nothing to justify adverse criticism. It was doubtful if the real merit of provincial securities has ever been fully realized here, but their credit has never been questioned. Public borrowings by small Canadian municipalities had doubtless aroused some unfavorable comment, but an analysis showed that twenty-three out of thirty millions was divided among such high-class borrowers as Montreal, Toronto, Winnipeg, Ottawa, Quebec, Vancouver, Victoria, and Hamilton, leaving just over eight millions among twenty other cities. Public flotations of these latter have been rapid and greatly advertised, the result being a much exaggerated idea of the real amount. In his opinion there was not a doubtful investment among the lot.

Confidence Shown in Railway Securities.

Competition for Canadian business has been keen and consequently Canadian cities reaped the benefit of close scrutiny. Railway securities revealed only a small percentage doubtful. The three great transcontinental lines accounted for nearly ninety per cent. of the aggregate. The ease with which they financed themselves showed the confidence reposed in them.

Regarding miscellaneous securities, Mr. Taylor said there were some unwise Canadian financiers whose lack of knowledge of the London market was monumental. They are, perhaps, desirous of steering a straight course, but are unable to do so through ignorance. Allied to them were many unsound Englishmen.

Bank Act Aids.

Regarding land speculators, many members of the aristocracy had bought land both wisely and unwisely. If Canadians and Canadian-Americans showed a readiness to profit at the expense of those anxious to get rich quick, the result is not to be wondered at. The most serious setback in realty values would not in itself materially disturb the general financial stability of the Dominion, thanks to the far-sighted provisions of the Bank Act precluding Canadian banks from lending money on the security of real estate.

Edmonton's public utilities show the following surpluses: Electric light, \$10,936; telephones, \$457; markets, \$142, while the street railway showed a deficit of \$4,900 and the waterworks one of \$1,000.

The Ralph Manley Agency has been incorporated for business expansion and has moved into larger premises at Moose Jaw. The new corporation will be capitalized at \$50,000, and will be known as the Ralph Manley Agency, Limited. Identified with it, in addition to Mr. Manley, will be Mr. H. F. Pierce and Mr. H. Hollingsworth who will be stockholders and officers of the new company. Mr. Manley, after being associated with the old firm of Loney & Manley, and later Manley Loney, Manley & Company, at that time two of the leading firms in the city, decided to establish a business for himself, and four years ago started independently as the Ralph Manley Agency. Mr. Pierce and Mr. Hollingsworth, who enter the new company, are both well known, and have been connected with the Ralph Manley Agency for the past two years.

TORONTO'S WATERFRONT TO BE TRANSFORMED

Harbor Commission Submits Plans to City Council—Work to Occupy Eight or Ten Years

An expenditure of \$19,000,000 over a period of about eight years is recommended in the report of the Toronto Harbor Commissioners to the civic authorities. The work will be both of a commercial and picturesque nature. The Dominion government will be responsible for \$6,000,000, the Harbor Commission for \$11,000,000 and the city of Toronto for \$2,000,000. New industries are to be encouraged and the waterfront made attractive to citizens and visitors. Upon completion of the plans the city will have the following, among other new possessions:—

A modern harbor with a uniform depth of water capable of accommodating any vessel with a draught of 24 feet.

Docks and Industries.

Modern, permanent docks on the central waterfront served by 24 feet of water and equipped with the best of freight sheds, warehouses and appliances.

A dock and industrial district equipped with freight sheds, warehouses and the first of a series of factory buildings to serve the needs of the east end and a similar area for the west end.

Proper co-ordination of rail and water traffic at all three of the above points in order to properly develop the port.

An industrial area containing 644 acres of available land in the Ashbridge Bay district, which will be known in the future as the Toronto Harbor Industrial District, capable of accommodating factory buildings with a value of \$30,000,000 and producing a ground rent revenue of \$500,000 per year.

Ship Channel and Waterway.

A ship channel 6,800 feet long, 400 feet wide, and 24 feet deep, with turning basin 1,000 feet square at its east end serving the Industrial District and eastern portion of the city generally and equipped with three miles of dockage.

A dock area on the west face of the Industrial District capable of development so as to provide an additional dock frontage of 2½ miles.

A new lake-front park and waterway extending from the Eastern Channel to the foot of Woodbine Avenue and containing 352 acres protected by a breakwater three miles long. Inside the breakwater will be ample accommodation for east-end aquatic clubs.

New Park Lands.

A protected waterway with an average width of 600 feet behind a breakwater from Woodbine Avenue to the east city limits.

And a total area of new park lands of 894 acres.

CRITIC OF QUEBEC RAILWAY

A holder of the bonds of the Quebec Railway, Light, Heat and Power Company writes a lengthy letter analyzing the position of that company and objecting to the reported plan to liquidate, a plan which our correspondent labels as "absolute madness." The letter concludes:

"One does not need to be a great financier to infer from the statements that the capital stock of the Quebec Railway, Light, Heat and Power Company is absolutely pure water; that the four quarterly dividends paid to shareholders were not earned; that they were paid both to help the French bond issues and to sell to French capitalists ordinary water at Bordeaux wine prices, and with success, judging by the fact that the "comité de défense" found 15,000 shares in a fortnight. One of those who went to Paris to attract French capital to Canada, knows that the London market is loaded with Canadian securities. He knows that France invests yearly fifteen billions of francs in matured securities. He knows that Canada can secure a good share of French money if she practices honesty in financial politics. He knows what it would mean for Canada to have a flow of French money. He knows also that with our actual radical-Socialist parliament, if one of our leading orators should take the matter on hand, he would bring documents enough to make the French market very difficult to Canadian securities. and it is for these reasons, I say, that the talk of liquidation is pure madness."

Mr. Norman D. Perry has been elected a member of the Toronto Stock Exchange.

Mr. Watkin Boulton has returned to Vancouver from Winnipeg, and has accepted the position of inspector of agencies for the Monarch Life Insurance Company in association with Mr. C. A. Crysdale, provincial manager.

VANCOUVER'S OUTLOOK

Dominion Bank's Purchase—Proposed Improvements—
City Hall Waterworks, etc.

(Staff Correspondence).

Vancouver, November 11th.

That expansion on the Pacific coast of Canada is indicated by the purchase of a corner on Granville Street by the Dominion Bank. This institution has paid \$300,000 for the southeast corner. This is at the rate of \$6,000 per foot, a new record for Vancouver real estate. There is a frontage of fifty feet on Granville Street and 120 feet depth. When Sir Edmund Osler was in Vancouver two months ago he expressed the opinion that the Dominion Bank should have a large building on a principal corner, and it was then that negotiations were started through Messrs. Waghorn, Gwynn and Company for the purchase.

Negotiations are pending for the sale of the southwest corner Granville and Hastings Streets.

Erection of larger structures on Granville Street shows how steadily the business portion of Vancouver is moving westward.

Province's Offer to City.

Offer has been made by the provincial government of the old court house site on Hastings Street to the city of Vancouver for one million dollars. The request was made that the province give this site to the city for a new city hall. Much as the city would like the site, it is doubtful if the ratepayers would approve its purchase, because the city has a block with frontage on three streets, immediately behind the old court house, and which would be admirably adapted for city hall purposes. The city has all it can do to meet expenditures that are absolutely necessary. Vancouver's expansion will call for large sums, especially since a move is now being made towards beautification, a magnificent scheme for the improvement of upper Coal Harbor having been accepted. This plan was prepared by Mr. Thomas Mawson. The waterworks scheme will cost a couple of millions before completed, and this also has yet to be provided for. These are one or two of the principal matters, but are enough in themselves to keep the city travelling close to its margin of borrowing power.

Copper Resources Attract Attention

With copper bringing good prices, prominent mining men are planning to engage in mining on an extensive scale along the British Columbia coast, and have been inspecting properties as far north as Jervis Inlet. Among those interested are Mr. H. W. Treat, of Seattle, at one time a resident of Vancouver and who was engaged in mining on Texada Island, and still retains ownership of the Cornell property there; Mr. M. K. Rodgers, who recommended the purchase of the Nickel Plate mine by the Daly Company, and who later made considerable money out of the Hidden Creek property purchased by the Granby Company; and Mr. Henry Hewitt, a Tacoma millionaire, who is familiar with mining on the Pacific coast.

MONTREAL'S FIRE CHIEF MAKES STARTLING
STATEMENT

After a thorough investigation held into the fire at Point St. Charles on Sunday night, November 3, which destroyed the Consumers' Cordage Company and the Canada Bag factories, the cause of the fire is still a mystery. Chief Tremblay was an important witness, as was the youth who gave the alarm. A number of other witnesses were heard. Napoleon Lesage, the youth who gave in the alarm, stated that on the night of the fire he saw flames in the centre of the rope factory, and he therefore turned on the alarm.

Chief Tremblay stated that on account of the fact that there was no pressure on the hydrant the engines were placed on the canal bank. As the roads were bad, this was a difficult task, and thus half an hour was wasted between the giving of the alarm and the getting of water from the canal. It was impossible, he said, in answer to a question, to tear down the building and prevent the fire spreading, as the rapidity was such as to imperil the lives of the firemen, and to make them lose 250 yards of their hose. He also stated that it was impossible to get water at the scene of the fire from some of the water mains, having no map to show where these water mains were situated.

In answer to a question as to what, in his opinion, was the cause of the fire, the chief said: "If I have to make any statement I would say, from the testimony heard, that one of the witnesses had probably something to do with it. For the last two or three weeks we have had a number of fires that led to the same impression."

GENERAL MANAGER OF DOMINION BOND
COMPANY

Mr. Stanley Mann, who was recently appointed general manager of the Dominion Bond Company, is one of the younger school of financiers rapidly coming to the front in the conduct of Canadian business and finance. Mr. Mann has been associated with the Dominion Bond Company for several years. His recent promotion is the best possible

MR. STANLEY MANN.
Appointed General Manager, Dominion
Bond Company.

testimony to his work and to the esteem in which he is held by the directors and others interested in the company and its operations. The Dominion Bond Company has rapidly assumed an important position among the leading financing houses of the Dominion. The duties of general manager are, therefore, heavy, but a better selection than Mr. Mann could scarcely have been made to shoulder them.

The Saskatoon Tent and Mattress Company, Limited, has increased its capital from \$50,000 to \$200,000.

At the annual meeting of the Stratford, Ont., board of trade the following officers were elected for the year: President, Mr. D. M. Ferguson; vice-president, Mr. A. C. McLeod; secretary, Mr. F. A. Copus; auditor, Mr. R. H. Arkell. The council of the board is composed of Messrs. Wm. Preston, J. R. Macdonald, J. H. Gordon, J. A. Duggan, H. W. Strudley, W. J. Mooney, George McLagan, John White, W. J. McCully, R. T. Orr, R. H. Arkell and Alderman R. S. Frame.

IMPERIAL DRY DOCK COMPANY SEEKS GUARANTEE

To Establish Steel Plant at Courtenay Bay, St. John
—New Brunswick's Agricultural Colleges

(Special correspondence.)

St. John, N.B., November 11th.

The proposed steel plant and shipbuilding industry at East St. John is practically assured. Messrs. Norton Griffiths and Company have acquired the charter of the Imperial Dry Dock Company, and are negotiating with the city and the provincial and federal governments to guarantee the sinking funds on its bond issues, in establishing an immense plant beside the dry dock. They will also ask the federal government to agree to the enlargement of the dry dock to a length of 1,150 feet, which it is said would make it the largest in the world. It would be necessary to reclaim 200 acres near the dry dock to be the site of the steel plant and ship yards. The fullest confidence is expressed in St. John that this great industry will be established.

Agriculture and Lumbering.

Donald Fraser and Sons, of Fredericton, have purchased the lumber properties of the Scott Lumber Company, and Oromocto Company, in York, Sunbury, and Charlotte Counties, and have secured some concessions from the city of Fredericton which will enable them to operate a mill there to better advantage.

The provincial government will establish two agricultural colleges in the province, one at Sussex and one at Woodstock. The federal government has secured a demonstration farm in Victoria County. Lieutenant-Colonel Campbell, a leading farmer in Kings County, and who was a member of the commission which recently investigated the outlook for sheep farming, says that New Brunswick is especially adapted to sheep ranching, and he is convinced that the business would be profitable. A local company is being organized to go into sheep ranching. The provincial government has appointed Mr. Telfer, a successful sheep raiser, as an expert, and he is now visiting the farming districts.

Export Trade Is Busy.

Grain is arriving from the West at the Canadian Pacific and Intercolonial elevators, and both of them will have a very busy winter. The winter steamship business is beginning, and there will be a largely increased number of sailings, and a much busier season than that of 1911-12, when the exports were valued at \$35,000,000.

Several hundred barrels of New Brunswick potatoes have been shipped to South Africa, and it is expected considerable trade will be developed during the winter. The price of potatoes has advanced a little and is now \$1 or more per barrel, and many farmers are holding in the hope of a further advance.—M.O.M.

PLATE GLASS INSURANCE IN CANADA

A recent meeting of the Plate Glass Underwriters' Association of Canada at Toronto, discussed the competition in British Columbia and Manitoba and the rate situation in Montreal. The Western provinces have been covered by a rate agreement for two years past, but the Eastern provinces, viz., those east of Ontario, have been open rate territory. A board of plate glass underwriters is in process of formation in Montreal and new rates were to become effective as of November 1.

A radical change in underwriting which took place on October 1, in Canada was the discontinuance by the companies of the practice of issuing three-year policies. It has been the custom in Canada for several years to issue three-year-term policies, but the continuous fluctuation in the price of plate glass, particularly in the past year, has made it necessary for the companies to adjust premiums so that they will be commensurate with the increase. Thus it would be possible to adjust rates at more frequent intervals than three years.

It is explained that when a company accepts liability at a market price of 60 per cent. discount from the price list and binds itself for three years on that market price basis, and within three months the cost is increased from a 50 per cent. discount from the price list, a company does not have an opportunity to adjust its rates by an increase for a further period of two years and nine months. Under these circumstances it was considered advisable by the members of the association to stop writing three-year policies, so that a company may be able to adjust its rates, governed by the market price at the end of twelve months. Practically all the companies operating in the Dominion have accepted the innovation except a few of the smaller companies. By reason of the change from three-year policies underwriting conditions in the Dominion should be improved.

NEW WESTMINSTER MOVES FORWARD

Many Improvements Made During Present Year—Railway Proposals—Sapperton's Sewer System

(Special correspondence.)

New Westminster, B.C., November 11th.

Definite announcement has now been made that the Great Northern Railway, or rather the Vancouver, Victoria and Esquimalt Railway, will establish their Canadian freight terminals adjoining the eastern boundary of New Westminster within the municipality of Coquitlam. At the last meetings of the New Westminster and Coquitlam councils the railway company asked for the co-operation of these bodies and also that of Burnaby in building a high level bridge over the proposed freight yards. The acreage purchased by them is apparently large, extending into Burnaby municipality.

Located on Fraser River.

With this development all the railways operating on the lower mainland of British Columbia have located their yards and freight terminals on the Fraser River. These include the Canadian Pacific Railway at Coquitlam, the Canadian Northern Railway at Port Mann, the British Columbia Electric Railway at South Westminster, and now the Great Northern Railway on the Brunette River, practically in New Westminster.

Good Streets Being Made.

The mayor and council have recently been taking stock of the large amount of work accomplished on the city streets during this year. The board of works has had \$500,000 for grading and macadamizing streets, laying wooden sidewalks and other various improvements, while contracts for \$761,000 for paving, cement sidewalks and other permanent improvements have been let. The delay in selling the city bonds, which were finally disposed of at 92½, has prevented all the contracts from being completed this year and held up other work.

Ten and one-half miles, in which are included practically all the through thoroughfares, have been macadamized. Contracts have been let for paving seven miles, of which two miles have been completed. Twenty miles of storm and sanitary sewers have been laid. The bulk of the paving contracts are for bitulithic, while Hassam and wood block, and vitrified brick and stone setts are also being used.

The city is starting on the sewer system for Sapperton at the east end. Contracts for the first section of the work, totalling over \$200,000, have just been let.—K. Myers.

ATHABASCA LANDING FORCES AHEAD

The town of Athabasca Landing, Alberta, has for sale \$80,000 25-year 5½ per cent. waterworks debentures. Previous to this year only one debenture has been issued, for the sum of \$1,000, which was purchased by the Imperial Bank, and is now paid off. The town's revenue for this year is approximately \$30,000, and it is in a good financial position. Its rapid growth has necessitated the installation of a modern waterworks and sewage system. Six months ago, the number of inhabitants was 500, to-day it is 1,200. Builders and contractors cannot supply the demands for homes and business places, despite the fact that the railroad, which has been there for a month, has brought in many train-loads of building material. Even this, combined with the total output of the local sawmills, has not kept pace with the growth, which is steady and warranted by the influx of settlers to the district and the natural advantages of the town. The largest timber limits of the Canadian West, east of the Rockies, are located on the Athabasca River above the town. This in itself guarantees a lumber centre. The Alberta government has guaranteed the bonds of railroads from that point to Lac La Biche, Fort McMurray and Peace River Crossing, which, with one railway now in the town and another in course of construction from Battleford to this point, will make five railways contributing to the upbuilding of the community.

Natural gas having been struck here in quantities, manufacturers will be able to secure it for fuel purposes at a low rate. The large asphalt and oil deposits of the lower Athabasca will also play their part. The Hudson's Bay Company have spent about \$150,000 in the town last summer in the building of permanent departmental stores, transportation offices, and steamships. There is a fleet of five boats plying the Athabasca River. As a wholesale centre, Athabasca Landing should become an important point in Alberta.

Mr. C. E. Nancekivell is the secretary-treasurer of the town.

INVESTMENTS IN ALBERTA

What Loan and Insurance Companies Are Doing in the Province—Some Comparative Figures

The prairie provinces of Canada have become during recent years an immense field for remunerative investments. The loan and insurance companies have been aggressive in that area, and with the conservative policy generally observed, have no regrets at their confidence in the substantial West.

According to figures supplied to The Monetary Times by the Alberta government, 27 loan companies have investments in that province of \$14,012,403. Seventeen are western companies. The following is the list:—

British Columbia Permanent Loan and Savings, Vancouver, \$693,698; British and American Mortgage, Edmonton, \$211,645; Colonial Investment of Winnipeg, Winnipeg, \$11,006; Credit Foncier Franco-Canadian, Edmonton, \$1,922,125; Colonial Investment & Loan, Toronto, \$991,778; Canadian Mortgage Association, Winnipeg, \$675,116; Canadian Birkbeck Investment and Savings, Toronto, nil; Canadian Home Investment, Vancouver, nil; Canada Permanent Mortgage, Edmonton, \$2,214,782; Canada Landed & National Investment, Winnipeg, \$81,027.

Dominion of Canada Investment & Development, Winnipeg, \$202,200; Dominion Permanent Loan, Toronto, \$1,838; Edmonton Mortgage, Edmonton, \$58,146; Empire Loan Company, Winnipeg, \$183,457; Franco-Canadian Mortgage, Edmonton, nil; Guelph & Ontario Investment & Savings, Guelph, \$550,057; Great West Permanent Loan & Savings, Winnipeg, \$976,025.

Home Investment & Savings, Winnipeg, \$366,651; Investors' Guarantee, Calgary, \$5,700; London & Canadian Loan & Agency, Toronto, \$3,700; McDougall & Secord, Edmonton, \$2,526,836; North of Scotland Canadian Mortgage, Winnipeg, \$676,607; Ontario Loan & Development, London, \$265,316; Reliance Loan & Savings, Toronto, \$228,467; Royal Loan & Savings, Brantford, \$733,703; Sun & Hastings Savings & Loan, Toronto, \$61,507; Trust & Loan, London, \$371,016; total, \$14,012,403.

While the fire insurance companies are obtaining a fair income in Alberta, their investments are not large. The following are the figures:—

Premiums	\$1,454,284
Investments	688,030

List of Fire Companies.

A large number of companies are interested in Alberta, as the appended list indicates; the figures given being premiums:—

Aetna Insurance Company, San Francisco, \$15,162; Anglo-American Fire Insurance, Toronto, \$14,393; Atlas Assurance, Winnipeg, \$38,706; Alberta Canadian Insurance, Edmonton, \$8,563; Alliance Assurance, Montreal, \$8,497; Acadia Fire Insurance, Winnipeg, \$9,611; American Central Insurance, St. Louis, \$6,574; British Crown Assurance, London, \$3,838; Brandon Fire Insurance, Brandon, \$11,271; British-America Assurance, Toronto, \$39,037; Calumet Insurance, Chicago, \$6,259; Colonial Assurance, Winnipeg, \$2,452; Connecticut Fire Insurance, Hartford, \$7,676; Continental Insurance, Chicago, \$11,793; Caledonian Insurance, Winnipeg, \$19,168; Continental Fire Insurance, Winnipeg, \$5,650; Canadian Millers Mutual Fire Insurance, Hamilton, \$2,368; Columbia Insurance, New York, \$3,699; Commercial Union Assurance, Winnipeg, \$41,448; Central Canada Insurance, Brandon, \$16,541; Canada National Fire Insurance, Winnipeg, \$7,743; Canadian Fire Insurance, Toronto, \$71,640; Crown Fire Insurance, Toronto, \$3,708.

Delaware Insurance Company of Philadelphia, Toronto, \$8,370; Equity Fire Insurance, Toronto, \$9,013; Fidelity-Phoenix Fire Insurance, New York, \$25,546; German-American Insurance, Chicago, \$29,240; Guardian Assurance, Calgary, \$38,206; Germania Fire Insurance, New York, \$5,868; General Accident, Fire, Life Assurance, Toronto, \$31,636; Hudson Bay Insurance, Vancouver, \$13,594; Home Insurance, New York, \$20,699; Hartford Insurance, Winnipeg, \$52,169; Insurance Company of the State of Pennsylvania, Calgary, \$10,351; Insurance Company of North America, Montreal, \$23,755.

Lumber Insurance Company of New York, New York, \$11,800; London Assurance, Montreal, \$21,000; Law, Union & Rock, Montreal, \$11,658; Liverpool & London & Globe Insurance, Winnipeg, \$83,199; London & Lancashire Fire Insurance, Toronto, \$30,560; Miniota Farmers' Mutual Fire Insurance, Beulah, \$36; Montreal Canada Fire Insurance, Montreal, \$7,702; Manitoba Assurance, Winnipeg, \$26,937; Mercantile Fire Insurance, Toronto, \$15,584; Midwest Fire Insurance, Valley City, \$3,405; North-West Fire Insurance, Winnipeg, \$11,160; Northern Assurance Company Limited, Montreal, \$37,080; Niagara Fire Insurance, San Francisco,

\$7,394; Nova Scotia Fire Insurance, Halifax, \$13,615; National Union Fire Insurance, Pittsburgh, \$11,565; Norwich Union Fire Insurance Society, Toronto, \$49,380; North British & Mercantile, Montreal, \$41,027; National Fire Insurance Company of Hartford, Chicago, \$17,148; North Coast Fire Insurance, Seattle, \$340; North Empire Fire, Winnipeg, \$4,949.

Occidental Fire, Wawanesa, \$23,726; Pacific Coast Fire Insurance, Vancouver, \$11,064; Phoenix Assurance Company of London, Montreal, \$43,281; Providence Washington Insurance, Calgary, \$12,385; Queen Insurance, Montreal, \$40,474; Quebec Fire Insurance, Toronto, \$15,796; Royal Insurance, Montreal, \$77,148; Rimouski Fire Insurance, Rimouski, \$13,985; Scottish Union & National Insurance, Hartford, \$12,889; Sovereign Fire Assurance, Toronto, \$13,773; St. Paul Fire & Marine Insurance, St. Paul, \$26,755; Sun Insurance Office of London, Toronto, \$21,486; Saskatchewan Insurance, Regina, \$4,577; Springfield Fire & Marine Insurance, Edmonton, \$19,592; Union Assurance Society, Limited, Winnipeg, \$28,381; Wawanesa Mutual Insurance, Wawanesa, \$7,793; Winnipeg Fire Assurance, Winnipeg, \$6,004; Western Assurance, Toronto, \$39,525; Western Union Fire Insurance, Vancouver, \$9,872.

Have Hardly Half a Million Invested.

The following are the investments in Alberta of the fire insurance companies:—

Anglo-American	\$2,100
Colonial	1,500
Canadian Millers Mutual	20,117
Canada National	124,900
Law, Union & Rock	67,052
North British & Mercantile	250,000
North Empire	1,628
Occidental	1,000

\$488,030

Premiums, etc., of Life Companies.

The life insurance companies have over \$11,000,000 invested in Alberta, although their premiums in that province are but a little more than \$1,000,000. The following are the details, the figures being in order, investments, premiums:—

Beneficial, Salt Lake City, \$10,500, \$11,076; Canada, Toronto, \$2,534,307, \$100,501; Confederation, Toronto, \$360,915, \$39,858; Continental, Toronto, \$7,175, \$8,192; Crown, Toronto, \$250,115, \$15,824; Dominion, Waterloo, \$26,393, \$19,084; Equitable, New York, nil, \$14,435; Excelsior, Toronto, \$651,066, \$49,594; Edinburgh, Edinburgh, \$140,200, \$2,167.

Federal, Hamilton, \$27,700, \$63,656; Great West, Winnipeg, \$1,771,831, \$212,647; Home, Toronto, \$104,116, \$14,483; Imperial, Toronto, \$1,030,933, \$72,545; London and Lancashire, Montreal, \$58,200, \$31,581; London, London, nil, \$20,615.

Mutual Life of N.Y., Winnipeg, \$778,827, \$54,879; Monarch, Winnipeg, \$49,332, \$19,247; Manufacturers, Toronto, \$1,502,740, \$84,399; Metropolitan, New York, \$9,203, \$68,461; Mutual of Canada, Waterloo, \$778,827, \$120,772; Northern, London, \$96,958, \$18,134; North America, Toronto, \$393,975, nil; New York, Montreal, nil, \$58,367; Prudential, Newark, \$600, \$33,109; Phoenix, Montreal, nil, \$1,642.

Royal, Montreal, nil, \$1,279; Standard, Montreal, \$291,260, \$19,754; Sovereign, Winnipeg, nil, \$4,014; Sun, Montreal, \$227,786, \$63,655; Travelers, Hartford, nil, \$3,694; Universal, Winnipeg, nil, \$885; Western, Winnipeg, nil, \$1,169; total, \$11,122,959, \$1,231,722.

Extent of Other Companies' Interest.

The investments and premiums of the accident and guarantee companies are almost equal, as the following figures show, being in order, investments, premiums:—

American Surety, Toronto, nil, \$420; Canada Accident, Montreal, nil, \$2,932; Canadian Railway, Ottawa, \$5,000, \$74,177; Canadian Casualty & Boiler, Toronto, \$5,000, \$5,676; Dominion of Canada Guarantee & Accident, Toronto, \$74,012, \$26,006; Employers' Liability, Toronto, nil, \$38,761; General Accident, Toronto, \$17,669, \$4,210; Guarantee Company of North America, Montreal, nil, \$100.

Imperial Guarantee Accident Insurance, Toronto, nil, \$3,450; London & Lancashire Guarantee & Accident, \$58,200, \$10,686; London Guarantee & Accident, Toronto, nil, \$29,260; Law, Union & Rock Insurance, Toronto, \$67,092, \$2,529; New York Plate Glass Insurance, New York, nil, \$207.

Ocean Accident & Guarantee Corporation, Limited, Toronto, nil, \$28,050; Railway Passengers Assurance, Toronto, nil, \$10,570; Travelers Insurance Company of Hartford, nil, \$5,658; United States Fidelity & Guarantee, Toronto, nil, \$8,963; Western Hospital & Accident Insurance, Edmonton, nil, \$9,190.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Edmonton, Dunvegan and British Columbia Railway.—Letters of allotment for the issue of £700,000 first mortgage four per cent. debenture stock have been posted on the London stock exchange.

Ottawa Light, Heat and Power Company.—A special general meeting of the Ottawa Light, Heat and Power Company will be held in Ottawa on Wednesday, November 20. A resolution will be proposed to increase the capital stock of the company from \$2,000,000 to \$5,000,000 by the issue of 30,000 new shares of \$100 each.

Halifax Electric Railway.—The Halifax city council, four aldermen voting against, passed a resolution that the city of Halifax seek to purchase the Halifax Electric Tramway at the rate of \$170 per share. Failing this, the resolution asks that the legislature be requested to pass a bill authorizing the expropriation of the property, if a referendum demands this.

Mexico Tramways Company.—Mexico Tramways Company will issue \$3,500,000 of additional common stock at par; this will bring the total amount up to the full amount of the \$20,000,000 authorized. The stock is being offered to shareholders on a basis of 7/33 of a share of new stock for every share of old stock held.

Laval Electric Company.—The Laval Electric Company, one of the subsidiary concerns of the Shawinigan Water and Power Company, has decided to wipe out its outstanding bonded indebtedness of \$110,000 by issuing common stock for that amount at par to the bond-holders in exchange. In addition to this issue of shares, \$50,000 common stock will also be offered to the shareholders at par, bringing the company's capital up to \$310,000.

Canadian Pacific Railway.—At a recent meeting of the directors of the Canadian Pacific Railway Company a dividend of 2½ per cent. on the common stock for the quarter ended September 30 last, being at the rate of 7 per cent. per annum from revenue and 3 per cent. per annum from interest on the proceeds of land sales and from other extraneous assets, was declared, payable January 2 next to shareholders of record at 3 p.m. on December 2 next.

Winnipeg Electric Railway.—It is understood that the Winnipeg Electric Railway has definitely rejected the offer of the Reese syndicate which has been negotiating for some time to bring about an amalgamation of the street railway system and various subsidiary enterprises. Speculation was active last winter with regard to the proposal and it was stated then that the Reese syndicate was backed by large interests in the United States. It is reported the Winnipeg board, at a meeting held this week, definitely rejected the Reese offer. The rejection of the Reese offer will not mean the abandoning of the amalgamation idea. It is understood that Sir William Mackenzie and the other Winnipeg Electric interests are themselves working on a holding company plan regarding which an announcement may be soon made.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company, of Canada, Limited, ore receipts at Trail smelter for the week ending October 31st and from July 1st to date, in tons:

Company's mines.		
Centre Star	3,055	55,449
Le Roi	1,155	15,214
Sullivan	630	10,315
Richmond-Eureka	30	480
St. Eugene		478
Molly Gibson		797
No. 1		153
Other mines	1,745	23,352
Total	6,615	106,238

Brazilian Traction Company.—Directors of the Brazilian Traction Company still hope to get in the remaining outstanding stock of the Rio and Sao Paulo Companies, and have given instructions to the Bank of Commerce that shares of these companies may still be received in exchange for shares of the Brazilian Company. Stock of the old companies has been received at the head office a few shares at a time from shareholders who were away in the summer, and who were unable to send their stock in earlier. While it has been understood that this stock received since October 1st

would be exchanged, no definite announcement of the fact was made until a few days ago.

It has been announced that the shares of new Rio stock, which were exchanged for Brazilian will receive interest at the rate of the new Brazilian dividend for the quarter just ended, which amounts to \$2.40 per share, instead of \$1.90 per share as was expected.

Southern Alberta Land Company.—A circular has been issued to the shareholders of the Southern Alberta Land Company stating that while on a visit to the property the directors made a careful inspection of the intake on the Bow River, and reported that the damage referred to in the circular of July 26 was found to be greater than at first anticipated. The directors are now advised that a new intake should be built. The delay in the opening of the irrigation system will, in the opinion of the directors, retard operations, and, pending receipt of an expert's report on the construction of the new works, they have come to the conclusion that it would not be prudent at the present moment to encroach on the cash resources of the company, which now amount to over £250,000, for the purpose of paying any interim dividend. The directors add that satisfactory progress has been made in the construction of the Canadian Pacific Railway line through the company's property and that all adjoining lands available have been taken up. An interim dividend of 5 per cent. was paid in May, 1911, and a final distribution of the same amount was afterwards made, making 10 per cent. for the year 1911.

Ontario Brick Company.—The directors of the Ontario National Brick Company include Mr. J. N. Greenshields, Esq., K.C.; Mr. Thos. Long, of Toronto, director of the Merchants' Bank and Toronto General Trusts; Mr. J. W. Pyke, Montreal; Mr. Robert Mackay, Mr. John McKergow. The company has already awarded the contracts for the construction of its new big plant at Cooksville, outside of Toronto, to the Peter Lyall & Sons Construction Company, Limited. The buildings will have a capacity of 300,000 bricks per day and the construction company undertakes to have the building erected and ready for operation beginning May 1st, 1913. Mr. L. W. McArthur, general superintendent of the National Brick Company, of Laprairie, who has made an examination of the quality of the shale on the new company's Toronto property, makes the statement that the quality of the shale obtained on the property has been found to be superior even to that from which the famous Laprairie brick is made. C. W. Raymond & Company, of Dayton, Ohio, which is an authority on clay and shale products, stated that the bricks manufactured from the shale are practically the best red face brick that they ever have seen made from Canadian shale or clay.

PERSONAL NOTES

Mr. C. B. Robin has been elected a member of the Montreal Stock Exchange.

Sir Christopher Furness, ship-owner, ship-builder and engine-builder, head of the firm of Furness, Withy and Company, and of the Furness Line of steamers, is dead. He was 60 years of age. Sir Christopher Furness is believed to have been the moving spirit in the pending merger of various lines of inland navigation in Canada.

Mr. James McGregor, manager for Canada of the Commercial Union Assurance Company and of the Palatine Insurance Company, has returned to Montreal from a western trip taken in company with Mr. Henry Mann, of London, England, secretary of the Commercial Union. The two gentlemen visited all the leading centres in the West, including Winnipeg, Regina, Saskatoon, Edmonton, Calgary, Vancouver and Victoria.

Mr. O. R. Rowley has been appointed chief inspector of the Bank of British North America, in succession to Mr. James Anderson, appointed superintendent of branches. Mr. Rowley, who is a Nova Scotian, was for three years in the service of the Merchants Bank of Canada, but in June, 1889, he joined the Bank of British North America at Montreal. He has served in various capacities at all the most important branches in Eastern Canada, as well as in the New York and San Francisco agencies. In 1902 he became inspector of branch returns, which position he gives up for that of chief inspector of the bank.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

St. Boniface, Man.—The Provencher Bridge by-law was carried.

Edmonton, Alta.—A by-law may be submitted for \$100,000 market building.

Rochester Township, Ont.—The council will consider a by-law for \$8,000 for the installing of tile drain.

Humboldt, Sask.—The citizens carried the \$30,000 electric light by-law and the \$3,000 street grading by-law.

Strathroy, Ont.—Until November 20th for \$40,000 30-year collegiate institute debentures. F. W. Atkinson, clerk.

Toronto, Ont.—A by-law to issue \$177,260 debentures for erection of fire halls has been passed by the city council.

North Bay, Ont.—The North Bay ratepayers will vote on the hydro-electric and franchise by-laws on November 18th.

Nokomis, Sask.—Until November 30th for \$5,000 rink, and \$5,000 street debentures; interest 6%; maturing in 20 years. N. A. Armour, secretary-treasurer.

Steeltown, Ont.—Until December 3rd for \$7,000 school, \$9,000 park, and \$15,500 pavement debentures. J. Robinson, clerk. (Official advertisement appears on another page.)

Winnipeg, Man.—The by-law of the school board for \$1,000,000, to be expended in school extension, will be submitted to the electors at the municipal election in December.

Arcola, Sask.—Application will be made to the Saskatchewan legislature for an act authorizing the town to pass a by-law to raise a sum not exceeding \$25,000 for sewers and sidewalks.

Magrath, Alta.—Until November 20th for \$11,000 5 per cent. 20-year local improvement debentures. M. Godfrey, secretary-treasurer. (Official advertisement appears on another page.)

Montreal, Que.—The Catholic School Commissioners of Montreal seek power to borrow funds to the amount of \$500,000 for the erection of new schools and enlarging of present schools, etc.

Athabasca Landing, Alta.—Until November 25th for \$80,000 5½ per cent. 25-year waterworks debentures. C. E. Nancekivell, secretary-treasurer. (Official advertisement appears on another page.)

Collingwood, Ont.—Until December 4th for \$7,000 4½ per cent. 30-year; and \$30,000 20-year 5 per cent. hydro-electric power debentures. A. D. Knight, town treasurer. (Official advertisement appears on another page.)

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C.

Burnaby, B.C.—By-laws authorizing the municipality to borrow \$250,000 for street improvement purposes, and \$50,000 to build additional sidewalks were again carried. This was necessary owing to some technicality regarding the previous polling.

Outlook, Sask.—Up to November 25th for local improvement debentures (cement sidewalks), \$31,000, 5 per cent., 20 years, and \$15,000 electric light debentures, 5 per cent., 30 years. Albert Moore, secretary-treasurer, Outlook. (Official advertisement appears on another page.)

St. Thomas, Ont.—The ratepayers will be asked for \$45,000 20-year debentures on December 4. Of this sum \$34,000 will be invested in a new four-story factory for the E. T. Wright Shoe Company; \$5,000 for a site; \$4,000 to purchase the two stores now in use by the company; and \$2,000 for renovations.

Saskatchewan.—The following villages have been empowered to borrow money for permanent improvements. The particulars are given in order of name of village, amount, and name of secretary-treasurer:—**Hague**, \$1,500 J. M. Uhrich. **Perdue**, \$1,500, H. W. Reeder. **Stoughton**, \$4,500, D. S. Lloyd. **Sovereign**, \$3,000, S. G. Stedman. **Pelly**, \$1,000, E. C. Clark. **Briercrest**, \$2,000, W. C. Thomson. **Ceylon**, \$7,000, J. A. Weicker.

London, Ont.—London ratepayers will be called upon to vote on by-laws calling for the expenditure of over \$1,560,000 on the first of January. The figures are electrification of the London and Port Stanley Railway, \$890,000; for the Federal Square and City Hall, \$250,000; for storm sewer system, \$200,000; for West London breakwater, \$50,000; grants to new industries, \$75,000; grant to Byron Sanitarium, \$15,000; public school debentures, and \$80,000 for new buildings.

Vancouver, B.C.—The civic exhibition committee has recommended to the city council the submission of a \$150,000 by-law for the Vancouver exhibition. The \$150,000 is wanted to carry out the following work: Grading and improving oval, \$25,000; roads, walks, clearing, grading, etc., \$25,000; transportation building, \$30,000; mining and forestry building, \$30,000; poultry building, \$5,000; lavatories, \$15,000; fine arts building, \$10,000; stables and repairs, \$5,000; painting and contingencies, \$5,000. Total, \$150,000.

MR. WILKIE HEAD OF THE BANKERS' ASSOCIATION

The annual meeting of the Canadian Bankers' Association was held at Toronto this week. Mr. D. R. Wilkie, president and general manager of the Imperial Bank was elected to the presidency of the Association, one of the honors of the Canadian banking world. Mr. Wilkie has been in his present profession from early youth. Recognized at home and abroad as one of our leading bankers, he has proved an aggressive, yet conservative financier of Canadian development. A man of untiring energy, Mr. Wilkie has found time

Mr. D. R. Wilkie.

to take a prominent part in movements of public interest. He has been vice-president of the Bankers' Association and president of the Toronto Board of Trade, as well as president and director of a large number of corporate enterprises. He is prominently identified with the advocacy of a branch of the Royal Mint in Canada, and of a Canadian gold coinage.

The other officers of the Canadian Bankers' Association were elected as follows:—Hon. presidents, George Hague, Montreal; Sir Edward Clouston, and Sir Edmund Walker; vice-presidents, George Burn, Ottawa; Alex. Laird, Bank of Commerce; E. L. Pease, Royal Bank; H. B. Meredith, Bank of Montreal. Council, E. H. Hebden, general manager Merchants Bank; T. Bienvenu, Provincial Bank; R. B. Stevenson, Quebec Bank; T. F. How, Bank of Toronto; Jas. Elliott, Molsons Bank; N. Lavoie, La Banque Nationale; G. P. Schofield, Standard Bank; C. A. Bogert, Dominion Bank; G. H. Balfour, Union Bank; W. D. Ross, Metropolitan Bank; H. A. Richardson, Bank of Nova Scotia; H. B. Mackenzie, British North America; Jas. Turnbull, Bank of Hamilton, Col. James Mason, Home Bank. Secretary-treasurer (re-elected), John Knight, Montreal.

WHICH SYDNEY?

A Canadian Associated Press cable says the city of Sydney, N.S., has sold \$500,000 4 per cents. in London this week at 97.

A cable to the New York Journal of Commerce says the city of Sydney, N.S.W., has sold £500,000 4 per cents. in London this week at 97.

A telegram to The Monetary Times from Mr. J. J. Curry, city treasurer, Sydney, N.S., says they have not made an issue in London recently. The New York report, therefore, is apparently correct.

Mr. Donald Malcolm McIntyre, K.C., city solicitor of Kingston for the past fifteen years, has been appointed to the Ontario Railway and Municipal Board, and will succeed Mr. James Leitch, K.C., as chairman.

CANADIAN WHEAT IN NEW YORK

Produce Exchange is Completing Plan to List Quotations—Ports Want More Business

Several well-known Canadian firms are supporting the proposal to list wheat quotations on the New York Produce Exchange. Among these are prominent grain firms not only in New York, but also in Winnipeg, Toronto, St. Louis, Chicago, Kansas City and Minneapolis. They include Messrs. James Carruthers and the British Empire Grain Company, of Winnipeg, and Melady & Company, of Toronto.

Canada's grain crop this year totalled approximately 450,000,000 bushels. The only important speculative centre in which its wheat is now quoted is Winnipeg. Any movement of stocks to the upper lake ports or farther east, under existing conditions, makes it next to impossible to execute hedging contracts in one of the best qualities of North American wheats.

Accept Winnipeg Grades.

Communications received by Mr. Archibald Montgomery, Jr., of Messrs. Maguire & Jenkins, of the New York Produce Exchange, reveal a uniform consensus by the trade in outside markets. A special committee, which is preparing rules for the conduct of this trade, has already received the approval of the Produce Exchange authorities. The plan is to accept the grades of Winnipeg as the standard and to define the conditions under which contracts may be entered into and executed in handling such proportion of the wheat crop as may be exported through brokerage operations under Produce Exchange auspices.

Through United States Outlets.

Canada this year will produce nearly 190,000,000 bushels of wheat. Probably not more than 50,000,000 bushels will be retained for domestic requirements, leaving 140,000,000 bushels for handling through her own ports and in bond through United States outlets. Practically all of the movement is thus far an eastern one. Calgary, which is the centre of the Saskatchewan grain territory, is about 750 miles north-west of the upper lake ports, on which Canada now depends for shipment between harvesting and close of navigation. The season allows only about forty-five days of free lake traffic. The Canadian canal brought down 20,226,000 bushels of wheat in October, and 3,000,000 bushels of other grain.

This matter is discussed in the editorial columns.

PARTICIPATING AND NON-PARTICIPATING POLICIES

The gain and loss exhibit called for in connection with the annual statements of life insurance companies shows the separation of participating and non-participating business, but the latter item is only published by a comparatively small number of state insurance departments. Several companies are prohibited by law from writing non-participating lines, but as the number of companies writing that class of business shows a steady increase the aggregate must necessarily grow larger from year to year.

The following changes in non-participating business are shown:—

Increases—*Etna Life*, \$12,702,305; *Beneficial*, \$954,325; *Capitol*, \$2,009,353; *Central of United States*, \$3,016,972; *Colonial Life*, \$567,755; *Columbian National*, \$3,012,863; *Connecticut General*, \$3,520,853; *Continental Life Insurance and Investment*, \$652,650; *Hartford*, \$2,400,468; *Metropolitan*, \$188,795,903; *Missouri State*, \$1,742,655; *Mutual Benefit*, \$564,720; *Niagara Life*, \$8,165; *Northwestern Mutual*, \$929,983; *Pacific Mutual*, \$3,371,828; *Phoenix Mutual*, \$126,048; *Pittsburg Life and Trust*, \$4,885,096; *Reliance Life*, \$2,319,395; *State Life*, \$753,336; *Travelers*, \$21,662,961; *United States Life*, \$1,391,088.

Decreases—*Connecticut Mutual*, \$947,474; *Germania*, \$216,548; *Home Life*, \$48,104; *Manhattan Life*, \$2,400,468; *Mutual, N.Y.*, \$3,524,408; *National Life*, \$1,106,197; *New York Life*, \$2,444,327; *Penn Mutual*, \$2,971; *Postal Life*, \$13,232,514; *Provident Life and Trust*, \$75,000; *State Mutual*, \$254,701; *Union Central*, \$2,519,108; *Union Mutual*, \$411,246.

The Portage Development Company has been formed at Portage la Prairie, Manitoba, for the purpose of developing manufacturing interests in that city. The company have just placed a proposal before the city council, and the board of trade has forwarded a resolution to the mayor and council advising entering contract with the company. The company is formed of a number of financial men in Portage la Prairie and Winnipeg.

ONTARIO'S LARGE MINERAL OUTPUT

Value of Silver Greater but Quantity Less—Nickel and Copper Lining

Ontario continues to make important mining history. According to the returns for the nine months ended September 30th, 1912, furnished to *The Monetary Times* by the provincial bureau of mines, the production has been as follows:—

Product.	Quantity.	Value.
Gold, ounces	53,488	\$ 1,117,335
Silver, ounces	22,231,451	12,707,826
Copper, tons	8,019	1,142,076
Nickel, tons	15,907	3,368,437
Iron ore, tons	37,265	101,284
Pig iron, tons	452,021	6,051,978
Cobalt in crude material, pounds	711,180	176,786
Cobalt and nickel oxides, pounds	711,180	176,786
White arsenic, pounds...	2,944,104	66,316

The yield of gold for the first nine months of 1912 is more than double in value that of any preceding twelve months. The bulk was from the Hollinger and Dome mines. Other contributors were the McIntyre and Vipond at Porcupine, and the St. Anthony at Sturgeon Lake. The Cordova mines in Hastings county and the Olympia at Lake of the Woods also turned out bullion.

Large Silver Output.

As compared with the corresponding period of 1911, the production of silver was 963,601 ounces less in quantity, but \$1,114,090 more in value, silver being now much higher in price than last year. The productivity of the silver mines of Cobalt is being well maintained. The shipments comprised 15,408 tons ore, 7,859 tons concentrates and \$2,239,124 in bullion. South Lorrain contributed 616,692 ounces to the total and Gowganda, 449,281 ounces.

The mines of the Sudbury district yielded 15,907 tons of nickel as compared with 12,711 tons during the same period last year, and 8,019 tons of copper as against 6,769 tons. Both these metals are estimated in the form of Bessemer matter produced by the blast furnaces, constituting together about 80 per cent. of the matter by weight.

Iron and By-Products.

Considerably less iron ore was shipped during the nine months of 1912 than during the same period of last year, the reduction amounting to 135,603 tons. The Helen mine was the principal producer. On the other hand, the output of pig iron shows a large increase, being 452,021 tons as against 296,856 tons last year.

The refining works in Ontario produces arsenic, cobalt crude materials or residues, and the oxides of nickel and cobalt. Shipments amounted in value to \$300,716 as compared with \$125,907 for the corresponding period of 1911. Both the European and American market for cobalt oxides are now for the most part supplied by the product made from the ores of Cobalt.

LONDON AND CANADIAN LOAN AND AGENCY COMPANY, STOCK ISSUE

In view of the profitable business now offering, the London and Canadian Loan and Agency Company, Toronto, has decided to increase the paid-up capital stock of the company from \$1,000,000 to \$1,250,000 by an issue of 5,000 shares of the unissued capital stock of the company. This will be offered at par (\$50.00 per share, to be fully paid up) to the existing shareholders of the company in proportion to their respective holdings in the present issued capital stock of the company. There will be allotted to each shareholder of record on the books of the company on December 15th, 1912, one share of new stock for every four shares then held by such shareholder.

Shareholders may pay any or all instalments in advance. Interest at the rate of dividend from time to time declared will be allowed on all instalments paid, from the date of payment. No fraction of a share will be allotted, and the company cannot adjust fractions. Shareholders who do not accept the allotment and make the first payment on or before February 1st, 1913, will be deemed to have declined the same, and the directors will thereafter dispose of the same in such manner as they think best.

The Merchants Fire Insurance Company, Toronto, have increased their government deposit to \$100,000, which is the full Ontario government standard, and is in excess of the company's liability to their policyholders.

ALBERTA CHARTERS NUMBER THIRTY-EIGHT

Capital of New Companies This Week Exceeds Twenty Million Dollars

Among the corporations receiving charters this week there are 81 in the Western provinces, and 47 in Eastern Canada, making a total of 128 new companies, with a capitalization of \$20,984,700. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:

Province.	No of Companies.	Capital.
Alberta	38	\$8,046,300
Quebec	18	4,063,900
British Columbia	13	3,035,000
Ontario	28	3,030,000
Saskatchewan	20	2,064,500
Manitoba	10	495,000
New Brunswick	1	250,000
	128	\$20,984,700

The largest companies this week are:—

Franco-Canadian Investment Corporation, Edmonton	\$3,000,000
Alberta Provincial Land Owners, Lacombe.....	2,000,000
London and Glasgow Canadian Trust Company, Edmonton	1,000,000
Canadian Title and Mortgage Guarantee Corporation, Vancouver	1,000,000
Westminster Power Company, Vancouver	1,000,000
Regina Storage and Drying Elevator Company, Regina	1,000,000
Dominion Fire Company, Montreal	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Olds, Alta.—Olds Curling Club, \$2,000.
Wainwright, Alta.—Wainwright Hotel, \$75,000.
Venn, Sask.—Venn Telephone Company, \$600.
Tate, Sask.—Tate Telephone Company, \$900.
Wynyard, Sask.—Stearns Trading Company, \$30,000.
Wilcox, Sask.—McIlraith Lumber Company, \$100,000.
Redcliffe, Alta.—Phoenix Investment Company, \$40,000.
Kelowna, B.C.—Black Mountain Water Company, \$600,000.
Munson, Alta.—Munson Farmers' Elevator Company, \$25,000.
Lacombe, Alta.—Alberta Provincial Land Owners, \$2,000,000.

Mount Royal Amusement Company, \$20,000. R. W. Herring, R. Herring, W. M. Hern.

KENORA'S BOND ISSUE

The town of Kenora is advertising for sale by tender new debenture issues aggregating \$152,000. Included in this amount is \$14,500 of 20-year 5 per cent. bonds to provide funds to meet the instalment of principal and the interest coupons due on July 1st, 1913, on the bonds of the Tourist Hotel Company of that place. Two years ago the town had included in their special act before the Ontario legislature a clause granting power to the municipality to guarantee the principal and interest of a bond issue of \$100,000 made by the Hotel Company, the building then being in an unfinished condition. Later, it was found that the amount was insufficient, and at the session of 1911, authority was granted by the legislature to guarantee an additional \$50,000 of hotel company bonds, making the total liability on that account \$150,000.

A member of a Toronto financial house, which had been instrumental in negotiating the sale of practically all the then outstanding debentures of the municipality, appeared before the Private Bills Committee, at the time the various clauses of the first Act were under consideration, and on behalf of the holders of the outstanding debentures opposed the application. Serious objections were voiced, but from the facility with which the clause was passed, it looked as if the matter had been practically settled before he arrived. One of the prime arguments advanced against the application was that the liability was not of a character which a municipality should properly assume, and that the town might be called upon to make good under the guarantee. The committee was told by the municipal representatives that it was a question of life or death with the town if the hotel was not completed, and that it was sure to be a success from the start and never be a charge on the town. That these prognostications have not been realized, and that the representatives of the financial house referred to was justified in opposing the application, is evident from the fact that the town now appears to face the necessity of providing funds to meet the next maturing instalment of principal and interest on the entire amount of hotel bonds. This appears to be another example of the evils of the bonus system. In this case, it is complicated by the fact that the town is capitalizing the annual payment, thereby adding heavy annual interest charges instead of providing the funds out of the yearly rates. If this is to be the annual procedure as the instalments fall due, it requires only a simple calculation to demonstrate the heavy load the town eventually will be carrying.

The St. Thomas Packing Company, Limited, has increased its capital stock from \$100,000 to \$250,000.

HOW THE MOTOR VEHICLE IS MAKING PROGRESS IN ONTARIO

Since the passing of the first act in Ontario respecting the operation of motor vehicles in the highways the administration of the act has been with the provincial secretary's department. The following is a statement of the permits and renewals issued in 1911:—

	1903.	1904.	1905.	1906.	1907.	1908.	1909. (10 mos.)	1910.	1911.

To motors owned in Ontario..	...	...	...	517	550	589	1,020	1,977	7,338
To others	...	...	...	659	980	1,165	1,432	2,253	4,001

HOME AND INTERNATIONALE BANKS

Toronto Institution Likely to Acquire the Forget Enterprise—Position of French Holders

The Home Bank is acquiring La Banque Internationale. The basis of the agreement has been settled, but matters of detail have yet to be arranged, and will take some time to work out. The matter has not yet come before directors of the Home, and nothing can be done until a closer investigation is made.

Shareholders of the Banque Internationale will accept Home Bank stock in exchange for their own, but the quantity will depend on what the Home Bank fixes as the value of the Internationale Bank's assets.

The ten-days' option given by the shareholders of the Banque Internationale to a syndicate represented by the Royal Securities Corporation, expired last week and was not taken up. The option, it was generally understood, was given on the basis of the syndicate paying sixty per cent. of the par value of the holdings, of \$6 for every \$10 per share paid up.

Deal with French Holders.

The deal whereby the stock of the Paris shareholders of the Banque Internationale would be taken up by a Montreal syndicate is said to have been concluded. An agreement was signed providing for the transfer to the syndicate of 53,000 shares of stock. The price accepted by the Paris shareholders was \$5 a share, on which only the one call of 10 per cent. had been paid. Two months ago, it is understood, a similar offer to take up all the Paris holdings was made, and at that time the price offered was said to have been \$9 per share, which would have represented a loss of one dollar a share on the actual investment. That offer, was declined, and later offers were lower.

This deal apparently makes clear sailing for the amalgamation negotiations.

Branches in Montreal.

The Home Bank has no branch in the Montreal district, and the present move is understood to be with a view to an extension from Ontario into Quebec territory. The bank was paying a six per cent. dividend up to June of the present year, when its dividend rate was increased to 7 per cent. Its directors are:—Messrs. Eugene O'Keefe, president; Thos. Flynn, vice-president; E. G. Gooderham, W. Parkyn Murray, J. Kennedy, John Persee, Thos. A. Crerar, Col. Jas. Mason, Col. Mason is general manager.

The present Home Bank has been a financial institution in Toronto since 1854. From that time until 1872 it was known as the Toronto Savings Bank, and from 1872 to 1902 it was the Home Savings and Loan Company. Two years ago the name was changed to that of the Home Bank of Canada.

Figures of the Two Banks.

The bank statement for September gives the following principal figures as to the position of the two banks:—

	Home Bank.	Banque Internationale.
Authorized capital	\$2,000,000	\$10,000,000
Subscribed capital	1,370,000	10,000,000
Paid up capital	1,290,000	1,359,843
Reserve	450,000	
Note circulation	1,071,535	1,150,170
Deposits:		
Demand, Canada	2,709,074	2,083,281
Notice, Canada	6,076,137	504,493
Elsewhere		
Loans:		
Call, Canada	1,651,747	188,030
Call, elsewhere		
Current, Canada	7,368,691	1,261,493
Current, elsewhere		68,465
Total assets	11,863,553	5,152,614
Total liabilities	10,032,374	3,799,840

This is the fourth Canadian bank amalgamation during the year.

CANADIAN RAILWAY ENTERPRISE WRECKED

Official Receiver's Report on the Hudson's Bay and Pacific Road—Criticism of Expenditures

Under a compulsory winding-up order made last May against the Hudson's Bay and Pacific Railway Development Company, Limited, 56 Moorgate Street, E.C., Mr. H. E. Burgess (Official Receiver) has now issued his report to the creditors and shareholders. The accounts filed under the liquidation show liabilities £68,701, to rank against assets £110,300, representing the company's interest in the charter taken at cost price, the secretary stating that it is impossible to estimate its value. The deficiency to the contributories is returned at £195,036.

Mr. Burgess reports that the company was formed in April, 1909, with a nominal capital of £150,000, increased in November, 1910, to £250,000, its object being to construct and equip a line of railway from Port Churchill, on Hudson's Bay, to Calgary, in the territory of Alberta, Canada, with certain branches. The powers of constructing the railway were conferred by a Special Act of Parliament of the Dominion of Canada, which received the Royal Assent on October 5, 1896.

Nothing Was Done for Years.

This Act incorporated the Hudson's Bay and Pacific Railway Company. It appears that for several years after the passing of the Act nothing was done towards the development of the project. Mr. Joseph Skinner acquired the rights of construction, and he covenanted to subscribe \$2,000,000 stock of the railway company and to pay a cash deposit of 10 per cent. thereon. He also undertook to pay £10,300 cash and \$1,400,000 stock to settle all past liabilities and obligations in connection with the charter. In March, 1908, Mr. Skinner assigned his interest to Messrs. Greville and Spicer for the payment by the assignees of £16,400 cash, to meet the cash obligations of £10,300 above-mentioned, and a further £8,250 cash to enable Mr. Skinner to discharge his further liabilities in connection with the project.

The promoters of the company raised about £7,000 from several persons, in exchange for promises of railway stock and of lucrative appointments for themselves or their relatives on the railway. Part of this money was expended in obtaining from the Canadian Parliament a renewal of the charter, which had lapsed by the expiration of time, and the balance was absorbed by travelling and other expenses. On the registration of the company in April, 1909, Messrs. Greville and Spicer assigned all their interest to Mr. W. V. Williams as nominal vendor to the company. The purchase agreement provided for the acquisition of the charter for £100,000 in fully-paid shares and for the payment by the company of all obligations, costs, charges, and expenses in connection with the charter.

Money for Preliminary Expenses.

The official receiver states that, in return for such loans, aggregating £36,606, the company deposited as security £10,000 Development Company's shares, and \$1,000,000 railway company stock, and gave, in the shape of bonuses, £122,942 Development Company's shares, \$1,911,500 railway company's shares, \$650,000 railway company's bonds, and £1,500 cash. In December, 1911, Messrs. Greville and Spicer put before the board an account of 53,377 of their vendors' shares, which they claimed to have given away for the sole benefit of the company, and an arrangement was made with the directors, the effect of which was to convert £50,000 of the vendors' £100,000 purchase consideration shares into bonds, and to charge the company with an expense of £10,710 shares incurred by the promoters before formation in raising money for preliminary expenses.

From time to time money has been sent to the company's engineers resident in Canada for their fees and expenses of surveying, amounting in all to about £8,000; but they have been hampered by want of funds to carry on their work, and operations to date have amounted to a survey of about 300 miles of the route and the construction of 70 miles of bush road. In the opinion of the official receiver, the resources of the company have been recklessly exhausted, without sufficient regard to the object which it was formed to attain. The principal asset was the right to the share and bond issues of the railway company, and practically all the \$3,980,000 stock and \$900,000 bonds received have been given away as bonuses, commissions, and security for loans of comparatively small sums of money.

Sir W. B. Peat has been appointed by the court as liquidator, to be assisted by a committee of inspection.

The Bank of Toronto has opened a branch at Stratford, Ontario, under the management of Mr. George L. McHattie.

SENATOR MACKAY IS VICE-PRESIDENT OF CITY AND DISTRICT BANK

The Hon. Robert Mackay, who has just been elected vice-president of the Montreal City and District Savings Bank, was born in Caithness, Scotland, in 1840, a son of Angus and Euphemia Mackay. The father was identified with agricultural interests in Scotland. In 1855, Robert Mackay came to Canada and completed his education as a student in the Phillips School, Montreal. He entered business life in connection with his uncles, Joseph and Edward Mackay, proprietors of the extensive wholesale drygoods house conducted under the firm style of Joseph Mackay and Brother. He applied himself with energy to the mastery of the business in principle and detail and in 1867 was admitted to a partnership. About eight years later, in 1875, the uncles withdrew and were succeeded by Hugh Mackay, a member of the legislative council of the province of Quebec, and his two brothers, James and Robert, under the firm style of Mackay Brothers. The death of James Mackay occurred in 1889 and of Hugh Mackay in 1890.

Robert Mackay then remained at the head of the business for three years, when owing to the many calls upon him in public life he retired and the business was wound up. A man of resourceful ability and marked sagacity in determining the value of commercial and industrial enterprise, he has

Senator Mackay.

placed his investments judiciously and is now financially interested in some of the most important enterprises of the Dominion. He is a director of the Bank of Montreal, the Canadian Pacific Railway Company, the Royal Trust Company, the Montreal Light, Heat and Power Company, the Dominion Textile Company, the Dominion Steel Corporation, the Lake of the Woods Milling Company, the Saeiden Forwarding Company, the Dominion Transport Company; vice-president of the Bell Telephone Company, the British Canadian Lumber Corporation, the Montreal City and District Savings Bank and the Paton Manufacturing Company.

Mr Mackay was president of the Harbor Commissioners of the port of Montreal from 1896 until 1907, in which connection his labors were of signal service to the city. He formerly occupied the presidency of the Montreal Board of Trade and of St. Andrews Society, is vice-president of the Mackay Institution for Protestant Deaf Mutes and the Blind, which was founded by the family, and is a life governor of the Montreal General Hospital, the Notre Dame Hospital and the Western Hospital.

In politics Mr. Mackay is a Liberal. At the Dominion elections of 1896 he closely, if not successfully contested Montreal West for the House of Commons, and again in 1909. He was called to the Senate on January 21st, 1901.

In 1871 Mr. Mackay was married to Miss Baptist, of Three Rivers, who died at their country home, St. Andrews-by-the-Sea, N.B., on September 20th, 1912. There are six children living, four sons and two daughters. A Presbyterian in religious faith, his membership is in Crescent Street Presbyterian Church, Montreal. He is Honorary Lieutenant Colonel of the Fifth Royal Highlanders. He has never sought to figure prominently in public life, yet belongs to that class of men who wield a power which is in the main potent for the fact that it is moral rather than political and is exercised for the public weal rather than for personal ends.

ONTARIO'S NUMEROUS COMPANIES

Increases of Capital—New Activities—Many Changes of Names

There were 859 companies incorporated in Ontario during the year ended October 31st, 1911. Companies licensed to do business in the province included 68 Canadian, 42 United States, 13 British and 1 French corporations. The following companies received supplementary licenses:—

D. M. Ferry and Company. To hold mortgage and dispose of real estate in the province, and increasing amount of capital it may use.

British Canadian Power Company, Limited. Change of name from Mines Power, Limited.

American Radiator Company. Increasing its capital from \$50,000 to \$125,000.

H. J. Heinz Company. Increasing its capital which it may use in Ontario from \$6,000 to \$250,000.

Standard Oil Company of Canada, Limited. Increasing the capital which it may use in Ontario from \$300,000 to \$700,000.

J. Y. Griffin and Company, Limited. To Swift Canadian Company, Limited.

E. C. Atkins and Company. Increasing the amount of capital which it may use in Ontario from the sum of \$40,000 to the sum of \$200,000.

Shepard and Morse Lumber Company. Increasing the amount of capital which it may use in Ontario from the sum of \$200,000 to the sum of \$400,000.

J. S. Fry and Sons, Limited. Increasing the amount of capital which it may use in Ontario from \$40,000 to \$100,000.

William Clapperton Company, Limited. Increasing the amount of capital which it may use in Ontario from \$4,500 to \$44,500.

Wolverine Cedar and Lumber Company. Increasing the amount of capital which it may use in Ontario.

Claudius Ash, Sons and Company (1905), Limited. Increase the amount of capital which it may use in Ontario.

Increases and Decreases of Capital.

These companies have reduced their capital as shown in the table below:—

	From	To
Boiler Flue Cleaner and Supply Company, Limited	\$ 100,000	\$ 70,000
Spanish River Pulp and Paper Company, Limited	1,500,000	1,000,000
Merchants Union Company, Limited ..	500,000	200,000
Frost and Wood Company, Limited ...	2,500,000	2,000,000
David Dick and Sons, Limited	150,000	75,000

The companies whose capital was increased are given herewith:—

	From	To
Arcade, Limited	\$ 50,000	\$ 150,000
American Watch Case Company of Toronto, Limited	200,000	500,000
Art Tailoring Company, Limited	40,000	100,000
M. Beatty and Sons, Limited	300,000	500,000
Boyd-Gordon Mining Company, Ltd...	1,000,000	1,500,000
Big Tooth Gold and Silver Mine, Ltd...	40,000	1,500,000
F. N. Burt Company, Limited	1,500,000	2,250,000
Boston Development Company, Limited	100,000	2,000,000
Barnsdale Trading Company of Stratford, Limited	20,000	50,000
W. H. Cox Coal Company, Limited ...	10,000	25,000
Canada Pipe and Steel Company, Ltd.	100,000	300,000
Cobalt Station Grounds Mining Company, Limited	500,000	1,000,000
Conduits Company, Limited	100,000	500,000
Cobalt Silver Stone Mining Company, Limited	500,000	1,000,000
Cowan Company, Limited	250,000	750,000
Crown Gypsum Company, Limited ...	100,000	200,000
Canada Coating Mills, Limited	100,000	200,000
Cobalt Gem Mining Company, Ltd. ...	1,000,000	1,250,000
Capital Real Estate Company, Ltd. ...	100,000	500,000
Colonial Wood Products Company, Ltd.	100,000	200,000
Colonial Whitewear Company, Limited	40,000	100,000
Davis Leather Company, Limited	300,000	750,000
Deloro Porcupine Gold Mining Company, Limited	40,000	1,000,000
Dominion Office and Store-Fitting Company, Limited	40,000	75,000
W. H. Dwyer Company, Limited	50,000	250,000

Names That Were Changed.

Numerous changes in companies' names were made, and the complete list follows, the first being the old and the second being the new name in each paragraph:—

Buffalo Larder Gold Mines, Limited, Buffalo Porcupine Gold Mines, Limited.

A. A. Barthelmes and Company, Limited, Sterling Actions and Keys, Limited.

Clark's Seed Company, Limited, Leamington Seed Company, Limited.

Canada Cycle and Motor Company, Limited, Russell Motor Car Company, Limited.

Cash-With-Order Company, Limited, Baby Hardware Company, Limited.

Canada Cycle and Motor Company, New Zealand, Limited, Canada Cycle and Motor Company, Limited.

Cobalt Silver Stone Mining Company, Limited, Adanac Porcupine Gold Mining Company, Limited.

Cache Bay Lumber Company, Limited, Petewawa Lumber Company, Limited.

Canadian Fairbanks Company, Limited, Canadian Fairbanks-Morse Company, Limited.

Deville Mines Company, Limited, Porcupine Gold Crown Mining Company, Limited.

George H. Doran Company, Limited, Hodder and Stoughton, Limited.

East Dome Syndicate, Limited, Shuniah Mines, Limited, Excelsior Lumber and Construction Company, Limited, International Construction and Fixture Company, Limited.

Eureka Gold Mining Company, Limited, Eureka Gold Mining Company, Limited.

Fallis-Tourtellot Company, Limited, Tourtellot Company, Limited.

J. M. Green and Sons, Limited, Green Lumber Company, Limited.

Hanover Specialty Company, Limited, Knechtel Kitchen Cabinet Company, Limited.

Household Convenience Company, Limited, Wonder Shine, Limited.

John G. Harvey, Limited, Stuart and Foster, Limited.

Jenks Dresser Company, Limited, Sarnia Bridge Company, Limited.

Lakeside Pleasure Company, Limited, Lakeside Fish Company, Limited.

Magee-Walton Company, Limited, Inksetter-Meyers, Limited.

M. and H. Mining and Development Company, Limited, Canada Mica Manufacturing Company, Limited.

Mad Dan Mining Company, Limited, Jajola Cobalt Porcupine Syndicate, Limited.

Ontario Brass Rolling Mills, Limited, Brown's Copper and Brass Rolling Mills, Limited.

Ontario Lorrain Mining Company, Limited, Porcupine Gold Lode, Limited.

Puritan Knitting Mills, Limited, York Knitting Mills, Limited.

Pemco, Limited, Peck Electric, Limited.

W. J. Quesnel Company, Limited, Sudbury Wine and Spirit Company, Limited.

Rochdale Company, Limited, Arcade, Limited.

Rideau Canal Sand Company, Limited, Rideau Canal Supply Company, Limited.

Robertson Paint and Varnish Company, Limited, Lowe Brothers, Limited.

Reciprocity Mines of Porcupine, Limited, Broken Hill Mines of Porcupine, Limited.

Standard Vinegar Company, Limited, Stouffville Cider and Vinegar Company, Limited.

Success Gold Mines, Limited, Porcupine Success Gold Mines, Limited.

Tower Canadian Oiled Clothing Company, Tower Canadian, Limited.

Ungar-Williamson Laundry and Dye Works, Limited, Brantford Laundry, Limited.

Watson Manufacturing Company of St. Catharines, Limited, Watson Manufacturing Company of Paris, Limited.

The capital of the following three companies was redivided:—Arcade, Limited, Hespeler Furniture Company, Limited, and Hudson Bay Mines.

The charters of the following companies were surrendered:—W. Richardson and Sons, Limited, Manitou Oil and Gas Company, United Factories, Limited, Bond and Share Company of Canada, Limited, Ornamental Galvanized Iron Manufacturing Company, Limited, Fairbanks Consolidated Mining Company, Limited, Caledonian Skating and Curling Club of Toronto, Limited, British and French Motor Car Company, Limited, China and Japan Silk Company, Limited, McConnell Silver Mining Company of Cobalt, Limited, Windsor Superior Manufacturing Company, Limited, Toronto Composing Company, Limited, Georgian Bay Oil Company, Limited, Tilbury Canning Company, Limited, Napanee Canning Company, Limited, Mackie Brothers, Limited, Peterborough Hockey Club, Limited, Sudbury Rink Company, Limited, Motor Owners' Federation, Limited, Farmers' Long Distance Telephone Company, Limited, Deseronto Iron Company, Limited, Stonehouse-Munroe-Zavitz Company, Limited, British Type Founders Agency, Limited, Temiskaming Hematite Iron Company, Limited, Cooper-Tilbury Oil and Gas Company, Limited, St. Anthony Lumber Company, Limited, Empress Tilbury Oil and Gas Company, Limited, Demill Ladies' College Company of St. Catharines, Limited, Silver Rock Mining Company, Limited, Peninsular Tool and Specialty Company of Windsor, Ontario, Limited, Oliphant Oil and Gas Company, Limited, Glenavay Company, Limited, Safety Fruit Picker Company of Ontario, Limited, Balmoral Hotel Company, Limited, John Knox Company, Limited.

BANK BRANCHES OPENED AND CLOSED DURING OCTOBER

Thirty-nine branches of Canadian chartered banks were opened during October and six closed. The following table gives details of the branches opened and closed during previous months this year:—

Month.	Opened.	Closed.
January	20	5
February	16	3
March	38	6
April	24	8
May	50	6
June	21	7
July	26	6
August	17	15
September	25	5

Houston's Bank Directory gives the following particulars for October:—

Branches Opened.

Assiniboia, Sask.	Bank of Toronto.
Calgary, Alta., West End	Bank of Nova Scotia.
Campbellton, N.B. ..	Canadian Bank of Commerce.
Cereal, Alta.	Union Bank of Canada.
Colonsay, Sask.	Bank of Toronto.
Contrecoeur, Que. ...	La Banque Nationale.
Edmonton, Alta., Alberta Ave. Branch ..	Merchants Bank of Canada.
Estevan, Sask.	Union Bank of Canada.
Fort William, Ont. ...	Bank of Nova Scotia.
Fredericton, N.B. ...	Canadian Bank of Commerce.
Hanna, Alta.	Union Bank of Canada.
Jarvis, Ont.	Union Bank of Canada.
Laird, Sask.	Canadian Bank of Commerce.
Lemberg, Sask.	Bank of Toronto.
Macrorie, Sask.	Union Bank of Canada.
McCreary, Man.	Union Bank of Canada.
Melfort, Sask.	Union Bank of Canada.
Moncton, N.B.	Canadian Bank of Commerce.
Montebello, Que. ...	La Banque Nationale.
Montreal, Que., Lachine Branch	Bank of Montreal.
Montreal, Que., 211 Van Horne Ave. ...	Royal Bank of Canada.
Moose Jaw, Sask., South Hill Branch ..	Dominion Bank.
Niagara Falls, Ont. ..	Canadian Bank of Commerce.
Oyen, Alta.	Bank of Toronto.
Piapot, Sask.	Union Bank of Canada.
Prince Albert, Sask. .	Union Bank of Canada.
Prussia, Sask.	Standard Bank of Canada.
St. Cyrille de Wendover, Que.	Banque Provinciale du Canada.
St. Jean d'Orleans, Que.	La Banque Nationale.
Sarnia, Ont., Devine St. Branch	Bank of Toronto.
Saskatoon, Sask., West Side Branch	Bank of Nova Scotia.
Smith's Falls, Ont. ...	Canadian Bank of Commerce.
Swift Current, Sask. .	Bank of Montreal.
Toronto, Ont., Terauley and Gerrard Sts. ..	Union Bank of Canada.
Vancouver, B.C., Powell St. Branch	Northern Crown Bank.
Vancouver, B.C.	Standard Bank of Canada.
Verigin, Sask.	Union Bank of Canada.
Windsor, Ont.	Bank of Montreal.
Winnifred, Alta.	Union Bank of Canada.
Branches Closed.	
Bountv, Sask.	Canadian Bank of Commerce.
Drumheller, Alta. ...	Royal Bank of Canada.
Fairville, N.B.	Union Bank of Canada.
Paris, France, 60 Rue de la Victoire	Banque Internationale du Canada.
Porcupine, Ont.	Imperial Bank of Canada.
Red Willow, Alta.	Royal Bank of Canada.

Branches of the Canadian Bank of Commerce have been opened Three Rivers, Quebec, under the management of Mr. E. W. Morgan; at Fraserville, Quebec, under the management of Mr. A. Guay; and at Fredericton, N.B., under the temporary management of Mr. W. M. McKie.

"It is my firm conviction that, if agriculture is to be properly developed in this province, some means must be found of supplying the farmers with cheap money. The province has several million dollars on hand, and I cannot see why it should not be loaned to the farmers at a low rate of interest instead of being loaned to the banks."—Hon. Price Ellison, Minister of Agriculture, British Columbia.

The Grand Trunk and Canadian Pacific Railways have agreed to proceed at once with the construction of a new union station, but they will oppose to the last court, the order of the Dominion Railway Commission for a viaduct on the water front.

IN THE INSURANCE ARENA

General Mortality Gradually Changing—Proposed Extension of Navigation—Insurance Notes

The paper read by Mr. Percy C. H. Papps, actuary of the Mutual Benefit Life Insurance Company, of Newark, N.J., at the meeting of the Actuarial Society of America, held in Toronto recently, discussed the effect on select mortality tables derived from the experience of life insurance companies over a period of years when the general mortality of the entire community from which the lives were drawn is steadily changing. If one could obtain a large body of lives where there was no change in the mortality, due, for example, to improved sanitary conditions or more skilful medical men, and if one made a selection of lives all in first class condition, and traced the mortality of those lives through a period of years, one would be able to ascertain the true effect of selection. The body of lives all select would gradually become different in character as some would shortly fall into poor health. After a considerable term of years the lives would reach a stage where they would be subject to what would be called the ultimate rate of mortality. It will be seen that if instead of being subject to normal conditions, there had been a very considerable improvement in sanitary conditions and medical skill, one would not obtain from the body of lives the true effect of selection, as it would be partly hidden by the improvement referred to.

Banquet to General Manager.

The general manager of the Manufacturer's Life Insurance Company, Mr. G. A. Somerville, Toronto, spent October among the different agencies of the company in the West. At Regina he was tendered a banquet at the King's hotel, by the Saskatchewan Agency. Those present at the banquet were: Mr. Geo. A. Somerville, general manager; Mr. D. E. Spencer, manager for Saskatchewan; district managers W. H. Husband, S. J. Anderson, A. W. Dalglish, B. W. Wallace, A. E. Boshier, A. L. Wallace, J. R. Craig, O. D. Jones, R. S. Machum, R. E. Williams, W. H. Ballam, H. R. Lyne, cashier; H. M. Bing, loans manager, and J. Langridge, loan inspector.

A conference of the superintendents of the Canadian Division of the Prudential of Newark was held recently at the Chateau Laurier at Ottawa. The home office was represented by F. A. C. Baker, assistant secretary; E. J. MacIver, division manager, and J. P. Mackin, assistant division manager. Addresses were made by Mr. MacIver, Mr. Baker and many of the superintendents. The subjects of some of the papers read were: "Proper Means of Developing Assistancy Material"; "Steady Production Every Week from Every Agent," and "Conservation of Debit." The meeting was in session two days.

At the Request of Liability Companies.

The Massachusetts Industrial Accident Board recently held a hearing at the request of the liability companies. They averred that the charges made by hospitals for hospital and medical service furnished to injured workmen of employers, coming under the workmen's compensation act, were preposterous, and the evidence submitted bore out their case. One particular instance showed that a bill for \$6, which was rendered and paid, was returned to the company registered with an amended bill for \$42, stating that an error had been made. At the suggestion of the board a conference will be held between representatives of the hospitals and of the liability companies, to see if an amicable arrangement can be reached.

Representations have been made to the Marine Underwriters of the Great Lakes which may result in extending the season of navigation until December 10. It is pointed out by vessel owners that the unprecedentedly large grain harvest, already several weeks late, has left a great amount of wheat at the head of the lakes for shipment, and that with the expiration of insurance on November 30, as planned, much of this wheat would have to be put into Lake Superior elevators, and thus a congestion would be caused which the railways would find it impossible more than temporarily to relieve.

Motor Fire Apparatus.

"Winnipeg must have fire apparatus that will be useful for 365 days in a year," said Controller Douglas after witnessing an unsuccessful test of the city's motor apparatus. "We can never tell when we are going to have a deep snow winter. Of course as soon as the snow gets packed down a little the motor trucks and engines will travel all right, but a fire is no respecter of weather conditions. We have been spending a great deal of money on the motor apparatus for the fire department."

Probably the matter may be taken up at the next meeting of Winnipeg's fire, water, light and power committee.

The Toronto Association of Underwriters were privileged at their October meeting to hear excellent addresses from Mr. George B. Woods, president and managing director of the Continental Life; Mr. William Triggs, city manager of the North American Company; President John A. Tory, of the Life Underwriters' Association of Canada, and Mr. F. T. Stanford, secretary-treasurer.

"The relationship of the clergy to life insurance," was the subject on which Rev. W. A. McIlroy, pastor of Stewart-on Presbyterian Church, addressed Ottawa Life Underwriters at their recent luncheon. He showed his interest and belief in the subject of life insurance in a most interesting and valuable address.

OCTOBER COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt station for the month of October:—

Mine.	Tons.
Bailey Cobalt	21.5
Buffalo	95.0
Campbell and Deyell	17.8
Chambers-Ferland	65.5
Cobalt Lake	123.7
Cobalt Townsite	285.3
Coniagas	158.3
Crown Reserve	37.1
Hudson Bay	30.8
Kerr Lake	90.9
La Rose	251.1
McKinley-Darragh	206.7
O'Brien	107.3
Penn.-Can.	31.2
Temiskaming	96.5
Trethewey	66.2
Total	1,774.9

Charlton.

Miller Lake-O'Brien	20.0
Millerette	20.0

Iroquois Falls—Nickel Ore.

B. F. Pullen	261.9
--------------------	-------

COMPULSORY FIRE INQUESTS

A plea for the general observance of compulsory fire inquests in England has been advanced by Mr. Henry W. Carter. It is known that the city of London has had compulsory fire inquests since 1888, with the result that there has been a signal diminution in the number of fires. Having pointed out that the total premium receipts of British insurance offices for a recent year amounted to over 25½ millions sterling, the writer proceeds:—If, without pretending accuracy, one assumes the total premium income represents the collections from an average rate of four shillings per cent., one arrives at the prodigious total of £12,754,301,500 as the estimated insurable value of the property dealt with annually by fifty-six British offices. The gross amount of property insured against fire in the administrative County of London alone was, by the latest return, estimated at £1,094,927,206; the total insurance premiums amounting to £2,737,318. One pauses to think how much this total would be increased if, by a moderate reduction of rates, the non-insured and partially insured were included. Mr. Carter emphasizes the advantages which would follow the extension of the principle of compulsion from the city of London to the whole country. Let us (he says) suppose ten years have elapsed since the proposed law came into force. During that period coroners in all parts of the country would have issued records of fires, segregating risks, causes, and best means of prevention. These records would have been compared, definite conclusions arrived at, and, when necessary, enforced by legislation. It would have been proved that certain methods of manufacture in certain industries were more susceptible to sudden conflagration and consequent dangers to life and property than other methods; it would have been agreed that certain old-fashioned precautions must be abandoned; that certain modes of lighting and heating are free from the objection inevitable to others, and that electric circuit and defective arrangements can be provided against. Buildings, materials, and exits would have been improved, prudence would have been aided by experience, and inevitable carelessness and accidents guarded against, as much as possible. I fully anticipate that long before the expiration of the ten years a system of certificates will be in vogue and granted to occupiers of premises well provided with modern precautions and appliances. Insurance companies would readily make a reduction or concession in rates to the possessors of those certificates.

BRITISH COLUMBIA FIRE INSURANCE DEPARTMENT

Five Companies Have Been Refused a License—Many Suspicious Fires Were Investigated

The work of the fire insurance department of the British Columbia Government is discussed in a Victoria paper. The practical labors of the department may be divided into two branches, the first having to do with the admission and regulation of fire insurance companies transacting business in this province, and the second with the investigation of all fires of suspicious character. Under the Act which Colonel Gunther, as superintendent of insurance, administers, every insurance company operating in British Columbia is required to file with him at annual intervals certified copies of a statement showing its exact financial condition at the time of the preparation of its last balance sheet, which statement is duly examined and audited by the department, the company being required to show conclusively that it is in a position to meet its liabilities to policyholders and the public.

Five Companies Were Refused.

Since the department has been organized there have been twenty-eight companies not previously doing business in this province, making a total of 104 now so authorized for the transaction of business here, while five have been rejected or refused license, after investigation of their stability and condition, two or three of these having since gone into liquidation, and a number of others have withdrawn from the provincial field.

With respect to the investigation of fires branch, it may be said that authority to order inquiry into the origin of suspicious fires has during the past years existed under the Fire Inquiries Act. This statute was, however, most infrequently invoked, and up to the establishment of the insurance department had been virtually a dead letter. No provincial officer was under it provided to institute necessary investigations, the Act merely empowering magistrates or justices to order public inquiry in fire matters if deemed desirable in the public interest.

Twenty Suspicious Fires.

Colonel Gunther, since his incumbency as superintendent of insurance, has investigated upwards of a score of suspicious fires, the knowledge by the public that a close watch is kept upon all fires being found an excellent deterrent of incendiarism. These investigations are gradually increasing in number, and the insurance companies and the public derive augmented protection as against unscrupulous and criminal insurers, because of the common knowledge that every suggestion of an arson will be probed to the uttermost.

This year, through the operation of the Insurance Act and department, the province will gain in revenue one per cent. of the amount of all fire insurance premiums collected by the companies.

TRADE CONDITIONS IN CANADA

Wholesale trade in Toronto was fairly active last week, says Dunn's report. The weather was propitious and sorting-up orders in dry goods numerous. Travelers are meeting with encouragement in the placing of good orders for the spring trade. Prices of the leading staple lines are firm, both in woolens and cottons. Raw material shows an advance. Remittances are fair. Money is very firm, with bankers showing a disposition to accommodate proper demands. Trade in hardware and metals is fairly active, with prices firm all around. Building is being restricted by the stringency of the money market. Groceries are in fair demand at generally unchanged prices. Hides have been advanced a cent, with the supply much less than requirements. Manitoba wheat is lower, the decline being over 3 cents within the week. Flours are also lower. Ontario wheat is steady, owing to limited offerings. The cost price here is now greater than that of Manitoba grades. Butter and eggs are higher on limited offerings.

The movement of wheat in Winnipeg exceeds all previous records, and while the grading is very high, returns are hardly up to expectations because of the low prices. Mild weather interferes with trade in seasonable lines, but sales of jewelry are large and a further increase is looked for. There is also a very heavy demand for automobile accessories. Receipts of cattle, hogs and sheep are large, but prices of meats are firmer. Collections could be better. Staple merchandise is moving out freely at Saskatoon and a liberal volume of sorting-up orders is being placed. Regina reports that harvesting is about over and that collections were never better. General business is quite active and merchants are stocking up more freely for winter in groceries and provisions than a year ago.

TWENTIETH CENTURY LIFE INSURANCE IS A NECESSITY

Recent Convention—Ethics of Soliciting—Lapses Are Now Thought Bad Business

The following notes on life insurance were included in the welcome extended to the National Association of Life Underwriters at Memphis, Tenn. Several Canadian representatives attended, and Mr. Neil D. Sills, Sun Life manager for Virginia, was elected president of that Association.

Life insurance is mutual philanthropy. It has become a colossal business, extending its usefulness into every corner of the world. The life insurance solicitor is a missionary. He is a friend of the widow and the orphan. When a life insurance agent sells a policy he confers a benefit upon the buyer and discharges a service to society. He transfers to the individual the power to live after he is dead—to live in deeds.

A man who can secure life insurance and who neglects to do so commits a wrong. If he is not insured and unmarried, and then has no one depending upon him, he is improvident, because he may not know the time when he may be unable to depend upon himself. If he is a young married man working on a salary and uninsured, he neglects providing for his wife. If he has children, then indeed is his responsibility greater.

Providing for Kinsfolk.

His life insurance will provide for these children sustenance and education, and will prevent their becoming a charge upon his kinsfolk. There is nothing more sure than death. There is nothing more sure than that the consciousness of having provided in a measure for those near and dear will enable one to face death with a reinforced courage. Life insurance, until the present generation, was misunderstood by many. The writers of life insurance and the managers of life insurance companies did not appreciate the dignity and responsibility of their work. Time was when the company and the premium payer were often at cross purposes. Time was when the lapsing of a policy was regarded by a company as so much business sold at a clean profit.

What the Companies are Doing.

Life insurance companies no longer seek to profit by lapses. A company hopes to hold every premium payer until the end of the term, or until his death. Life insurance rates are so made as to provide for the payment at some time of the face of a policy. Life insurance is for the poor as well as the rich. Many of the poor have not availed themselves of insurance in standard companies because they thought they could not afford the cost. Ten cents a day, two nickel cigars, a dime's worth of chewing tobacco, will pay a premium for an average age upon almost \$2,000 insurance. The day will come when a man will insure his life just as he insures his house. Your house may never burn, but a man will surely die.

LABOR DISPUTES

The preliminary estimate of the number of labor disputes in October, issued by the Department of Labor, shows that the number of strikes was about twice as great as that recorded during the same month of last year, although there was no material change from conditions during the previous month of the present year. The dispute of coal miners on Vancouver Island continued throughout October, this being the only dispute in which a great number of men were involved. About twenty-one disputes were in existence, ten of which commenced during the month. Upwards of 4,300 employees were involved in these disputes which caused a loss of about 98,000 working days.

INDUSTRIAL ACCIDENTS

According to the record of industrial accidents maintained by the Department of Labor, there were 104 workmen killed and 324 injured during the month of October. Compared with the record for September, this is an increase of fifteen in the number killed and a decrease of ninety-five in the number injured. The greatest number of fatal accidents occurred in steam railway service, there being 28 employees killed. The building trades come next with 18 fatalities. Of the non-fatal accidents, the greatest number occurred in the metal trades, the number recorded being 85, followed second by building trades with 40 injured, and third by steam railway service with 37 injured.

The capital stock of Barries, Limited, has been increased from \$100,000 to \$250,000.

HALIFAX FIRE LOSSES

They Were the Largest for Eight Years—What the Fire Chief Recommends

The annual report of Chief Broderick, of the Halifax Fire Department for the civic year ending April 30th, 1912, shows that during the twelve months there were 64 bell alarms, 24 calls for No. 1 chemical engine, 31 calls for No. 2 chemical, and 17 calls for No. 3 chemical, as well as 26 still alarms—162 alarms in all. Of the bell alarms 56 were first alarms, 5 second, and 3 third, while there were 9 false alarms.

The total fire losses during the year amounted to \$366,753 and the fire insurance losses amounted to \$221,360. The total insurance at risk was \$489,400. The largest fire outside the city at which the department worked was the Woodside refinery, the loss by which has been figured at \$541,196. The largest loss fires in the city were:

Three Large Conflagrations.

December 29th, 1911, King Edward Hotel, North Street. 3 alarms. Insurance, \$38,000; total loss, \$78,000. December 29th—Lockman Street, St. Croix Paper Company premises and several dwellings, 3 alarms. Total loss, \$21,620; insurance loss, \$20,500. January 12th—Barrington, George and Granville Streets. Total loss, \$235,632; insurance loss, \$151,442; loss not insured, \$78,190. The losses by these three fires were \$335,252, and by the other 159 fires \$31,501, a total of \$366,753, the greatest total loss since 1904-5, in which year the losses amounted to \$499,640. The insurance and total losses in the city since 1903-4 were:

	Insurance.	Total.
1903-4	\$127,934	\$135,224
1904-5	484,178	499,640
1905-6	95,578	96,556
1906-7	48,600	60,016
1907-8	52,154	68,600
1908-9	23,860	47,015
1909-10	109,087	121,197
1910-11	71,958	88,301
1911-12	221,360	366,753

Value of Apparatus, etc.

There were 33 more alarms during 1911-12 than in any year for nine years. The chief gives the following inventory of value of apparatus, real estate and personal property of the department:—

Fire stations	\$98,700
Fire engines	32,200
Wagons, sleighs	3,586
Ladders and trucks	10,339
Horses, harness, etc.	11,728
Sundries	4,358
House and stable fittings ..	2,944
Hose	13,933
Fire alarm system	15,500

Total\$193,288

There are 34 horses in the department services, 3 three, 8 two and 7 one-horse hitches and two relief horses.

Accidents at fires during the year were as follows:—July 29, Daniel Bowers, burned by gasoline; August 11, John Thomas, arms burned; April 29, F. Martin and John McCallum, burned by gasoline; November 12th—16 horses burned at stables, Hollis Street.

Members of the department injured in service were:—April 27, Edward Murphy, hand cut; December 29, W. Healy and A. Lynch, injured at King Edward Hotel fire; January 12, A. Brunt, hand cut; J. Brooks and G. Hoganson, overcome by smoke. District Chief D. Healy died May 26th.

Needs and Recommendations.

Chief Broderick calls attention to the need of supply wagons for third alarm fires to carry coal and hose. The department has used at some third alarm fires 10,000 feet of hose, and from eight to ten tons of coal, and recommends the purchase of three supply-wagons as well as 2,000 feet of 2½-inch hose and repeats the following recommendations of former reports not yet followed:—

Water barrels for feeding fresh water to engines working from salt water. Signs at wharves where fire hydrants are placed. Night rings on fire alarm boxes. Provision for fighting fires on the waterfront. That No. 3 engine hitch be a three-horse one. Sleigh runners for chemical engines. That the routes for horses, used by the department for street watering be made much shorter.

GRAND TRUNK IN NEW ENGLAND

Stoppage of Work on the Line to Providence Creates a Stir—President Chamberlin's Statement

Business interests in the State of New England were quite perturbed at the announcement, noted elsewhere in The Monetary Times, that work has been stopped on the company's line to Providence. President E. J. Chamberlin says: "The stoppage of work has nothing whatever to do with the negotiations with the New Haven. Any arrangement that may or may not be made with the New Haven will not work a hardship to the people of New England. The Grand Trunk appreciates the friendship of New England and their interests will not suffer by any arrangement the Grand Trunk may make."

Agreement as to Traffic.

Vice-President Timothy E. Byrnes, of the New Haven road, says there has been no agreement of any description yet arrived at with the Grand Trunk Railway, except as to the joint use of Central Vermont tracks between Windsor and White River junction. He says further, however, that President Mellen has been at various times in communication with President Chamberlin, of the Grand Trunk, and thinks it probable an agreement as to traffic also will be made, but that there has been no understanding, expressed or implied, with regard to the Southern New England extension, and if the Grand Trunk has discontinued this work, as reported, it was because the Grand Trunk believed it advisable from its own standpoint and not from any understanding with the New Haven. He asserts that the New Haven has not paid and will not pay one dollar to the Grand Trunk to stop the construction of the Southern New England road.

Mr. James J. Shelan, of Hornblower & Weeks, says: "I am not surprised to hear that the Grand Trunk is abandoning its New England development plans, as a change in the attitude of the company has been noted since the death of Mr. Charles M. Hays. I believe the thing for New England to do is to back up the Mellen management in its plans for the improvement of the New Haven and the Boston and Maine properties, and to realize that the best interests of this section of the country will be served by supporting the broad, comprehensive and progressive plans of Mr. Mellen."

Watchful at Washington.

Officials of the Department of Justice at Washington declared that if the stopping of work on Southern New England was result of promise of traffic privileges by the New Haven Railroad to the Grand Trunk, with consequent suppression of competition, a thorough investigation would be made, and if facts warranted, a suit for an injunction under the Sherman law would be instituted, with the purpose of restoring competition.

Mr. D. E. Galloway, assistant to President Chamberlin, says: "Washington can investigate as much as they please. There is no agreement between New Haven and the Grand Trunk, and the anti-trust law is not being violated in any way."

SMART BAG PLAN FOR EXCHANGE OF SHARES

The holders of Smart Bag preference shares will receive \$600,000 of preference shares in the new Smart-Woods, Limited, divided share for share according to their respective holdings, while the holders of the \$450,000 Smart Bag common stock will receive \$900,000 of Smart-Woods common stock, at the rate of two shares new to each one share now held. In addition to this, \$210,000 of the 7 per cent. cumulative preference shares of the Smart-Woods, Limited, will be offered at par to the Smart Bag shareholders, at the rate of one new for each five old. Subscribers to this new preference stock will receive a bonus of the preference subscribed to by them. This would mean that a holder of fifteen shares of Smart Bag would have the right to subscribe to three shares of preference stock at par, carrying a bonus of one share of common with it.

Providing the necessary by-law passes, Edmonton is to build a new market building costing \$100,000.

The capital stock of the Martin River Improvement Company, Limited, has been increased from \$7,000 to \$82,000.

Mr. G. T. Clarkson, liquidator of the Farmers Bank of Canada has received word that judgment had been obtained in Baltimore against Messrs. E. and W. Knabe for \$93,131.45 on promissory notes. The claim against the Knabes figured in the evidence of Mr. W. R. Travers at the Farmers Bank inquiry in connection with the flotation and profits of the bank.

MUNICIPAL BONDS

West Vancouver Exchanges Debentures for Ferry Company's Stock—Richmond's Loan

The West Vancouver Council has decided to sell the ferry company which maintains a service between the city of Vancouver and the adjoining municipality \$100,000 worth of municipal debentures and to take in payment for these 1,000 shares of stock in the company at a par value of \$100 per share. In return for the granting of this request by the company the board of directors promised to put two new ferries on the service and to build a new wharf.

Temporary Loan for Richmond.

Richmond Municipality, B.C., have decided to make arrangements for a temporary loan to relieve the stringency occasioned by a clerical error in one of the bond issues. A resolution was passed empowering the reeve and the finance committee to give satisfactory security to the Northern Crown Bank for the repayment of sums advanced the municipality for expenditure on the roads and waterworks by-laws. The debentures remaining unrealized are the school loan of 1912, the 1912 road loan and certain waterworks bonds. Regarding the first named, the council has communicated with the provincial authorities and is waiting an order from the lieutenant-governor-in-council validating the issue, the receipt of which is expected shortly. When this is received the proceeds of the issue, which has already been sold to an eastern banking house, will become available.

Negotiations up to the present have failed to result in the sale of debentures being offered by the town of Watrous, Sask. The amount was \$83,000 5½ per cents., the term 40-years, and the purpose for waterworks and sewer construction.

Prince Albert Has Loan.

Prince Albert has secured a credit of one hundred thousand dollars from the Imperial Bank, a sufficient sum to carry the city along until the end of the year, and also an assurance from Messrs. Wood, Gundy and Company, Toronto, the city's fiscal agents, that they will be able to take care of sufficient of the new bonds to provide all necessary funds for the coming year.

Messrs. N. W. Harris and Company, of Boston, will shortly open an office in Montreal. This company during recent years has become interested in several Canadian issues, both industrial and municipal. It has in contemplation a large Canadian flotation.

Bureau for Legal Papers.

The committee on municipal bonds of the Investment Bankers Association of America, in conference a few days ago, together with invited representatives of dealers in investment bonds, discussed ways and means to organize one or more central bureaux with which to deposit certified copies of the legal papers covering the original issues of municipal bonds with the Investment Bankers Association of America, having indorsed on each bond the fact that the bonds are approved by certain attorneys and that the legal papers are so deposited with the central organization. The purpose of this is to broaden the general market for municipal bonds, so that any bond which has this indorsement will be good delivery with any dealer, without requiring a certified copy of the papers and opinion to accompany the bonds. This is said to be a matter of considerable interest to investors in municipal bonds. It has often developed in the past that bond dealers have gone out of business and papers and records have been lost, making it exceedingly difficult to dispose of such municipal issues.

For the \$15,000, 5 per cent. 20-year debentures of Penetanguishene, Ontario, six bids were received. The offer of Mr. J. B. Jennings, Penetanguishene, was accepted. The other offers were from Toronto bond houses.

Five bids were received for the Snipe Lake Rural Municipality, Sask., \$5,000 5½ per cent. 20-year road debentures. The offer of the Flood Land Company, of Regina, was accepted.

A special commission may be appointed by the Dominion government to investigate the claims of the steel manufacturers for a higher tariff.

The latest street railway system to be operated in Western Canada is that of Lethbridge. It is a municipal undertaking and October is the first complete month of its operation. That month was an exceptional one in Lethbridge the Dry Farming Congress being held then. For the month, a total of 150,140 passengers were carried. The receipts amounted to \$7,034. This is a daily average of 5,122 passengers and \$226.01 receipts. The operation and all overhead charges are estimated at \$73,000 per year or \$200 per day.

SASKATCHEWAN'S TEMPORARY LOAN

Investment Company Makes a Flotation Overseas—London Market Conditions

The province of Saskatchewan is offering in London 5½ per cent. on about \$5,000,000 worth of six-month notes, to replace others maturing this month. A large amount of provincial government and municipal temporary financing is being done in London this year.

Another Canadian Flotation in London.

An issue of 50,000 participating cumulative 6 per cent. preferred shares of the Manchester Canadian Investments, Limited, has been offered in London. The company is formed with a capital of £250,000, divided as to £245,000 in participating cumulative six per cent. preference shares of £1 each and £5,000 in 100,000 ordinary shares of 1s. each. Applicants for the present issue of shares are entitled to the right to subscribe at par for, and receive allotment of, one ordinary 1s. share in respect of every two £1 preference shares. The way the ordinary shares are to participate in the prosperity of the company is as follows: Of any surplus profits beyond what will provide the fixed cumulative preference dividend of 6 per cent. on the preference shares one-half of such surplus profit goes to the preference and the other moiety to the ordinary shares.

Preliminary expenses in connection with the issue are estimated at £2,250. The directors, brokers, and their friends advanced this money, and therefore they, or their nominees, will be allotted 45,000 ordinary shares. This leaves 30,000 ordinary shares of the total creation of 100,000. Two of the directors have arranged to assume the management, and they make it a condition that the remaining 30,000 1s. shares can be taken by them optionally within three years at par. The two managing directors are in London; the other four ordinary directors have Manchester addresses.

Criticism in London.

Discussing the issue in London, the London Economist, after detailing certain facts in the prospectus, says:—"Beyond this the prospectus gives no valuable information, and makes no attempt either to hint at estimate profits or to outline a plan of action. In fact, the enterprise is a blind pool, and cannot be recommended. What inducement is there for investors who intend to put their money into investment corporations to entrust themselves to a company whose only certain proposal is to limit its operations to Canada."

London Market Conditions.

According to the London correspondent of a New York paper, it is believed that the acute stage of the money strain overseas has passed. The extreme dullness in the speculative markets is regarded as a favorable sign for new security issues, as money will be available that otherwise would have been required in the markets. The Queensland Government is issuing £2,000,000 in 4 per cent. stock at 99. Only £500,000 of this amount represents new borrowing, as the new issue meets the maturity of £1,466,000 old 4 per cents. Other colonial issues are being arranged, including the City of Sydney, New South Wales, £500,000 ten-year 4 per cents. at 97.

The Monetary Times, judging by its reports from London this week, regards the situation as having improved very little. It would seem that market conditions, so far at least as proposed Canadian issues are concerned, remain unchanged.

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended November 8th:—Hudson Bay, 60,800; Cobalt Lake, 41,400; O'Brien Mine, 63,600; Nipissing, 63,250; Trethewey, 55,600; La Rose, 132,000; Coniagas, 430,760; McKinley-Darragh, 126,088; Beaver, 128,732; Temiskaming, 71,924; total, 1,174,154 pounds, or 587 tons. The total shipments since January 1st are now 37,070,286 pounds, or 18,535 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

In the Dominion railway belt, under the supervision of the New Westminster agency there were 100 fires during the past season, and in only one case was damage done to standing timber. This number is regarded as a very satisfactory season, due to the efficient patrol maintained, and to the favorable weather in the later months of the year.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

- Chatham, Ont.**—November 9.—Aberdeen Stables. Loss and cause unknown.
- Coaticook, Que.**—November 8.—Penman mill. Loss slight. Cause unknown.
- Galetta, Ont.**—November 8.—Mr. F. Johnson's barn. Loss and cause unknown.
- Westville, Ont.**—November 1.—Old school building. Loss and cause unknown.
- Brockville, Ont.**—November 11.—Ferry Steamer "Bigelow." Loss and cause unknown.
- Danville, Que.**—November 11.—Mr. J. N. Greenshields' shed. Loss and cause unknown.
- Wilkesport, Ont.**—November 4.—Mr. W. Shortt's store. Loss unknown. Cause, defective stove pipe.
- Lindsay, Ont.**—November 8.—Simpson House. Loss unknown. Cause, electrical defects.
- Sydney, N.S.**—November 6.—Shack on New Victoria Road. Loss and cause unknown.
- Duncan, B.C.**—October 31.—Mr. R. Miller's barn. Loss unknown. Cause, gasoline ignited.
- Colborne, Ont.**—November 4.—Mr. F. Philip's residence, Percy Street. Loss and cause unknown.
- Beamsville, Ont.**—November 1.—Mr. W. Fretz's cottage. Loss unknown. Cause, overheated stove.
- Alberton Ancaster Township, Ont.**—November 8.—Mr. H. Arland's barn. Loss and cause unknown.

Steps are being taken by the city council to establish a central city market in Brandon, Man.

Mr. C. W. Durant has been appointed as Nova Scotia manager of the Metropolitan Life Insurance Company in the stead of Mr. Seeley, who has been transferred. Mr. Durant has for the past eighteen months been agent at Fort William, but prior to that time he was a field agent in Nova Scotia, so that he is thoroughly familiar with this territory to which he now returns as general manager.

MONTREAL'S ELECTRICITY SUPPLY

(Continued from Page 739.)

ed for as yet. Altogether, as detailed in last week's Monetary Times, the Shawinigan Company is able to develop about 175,000 horse-power. Of this, 45,000 is sold at the Falls as hydraulic power, while the installation is prepared to deliver 85,000 horse-power, and the development is completed for 45,000 more, although the electrical machinery has not been installed for it. All the power previously mentioned, including 63,000 of the Shawinigan Company, is virtually in the hands of the Montreal Light, Heat and Power Company, and it is generally the ambition of each new power concern to compel the "monopoly" to buy it out.

Another Group's Possibilities.

The Canadian Light and Power Company is the one concern which is in opposition, and is likely to remain in opposition. Just what its development is, is difficult to say. It has been variously estimated from 7,000 horse-power to 25,000 horse-power. The statement is made on excellent authority that the company is actually disposing of and receiving pay for over 13,000 horse-power, so that ought to dispose of the 7,000 estimate. On the same authority it is stated that the company has a connected load of upwards of 20,000 horse-power. This does not include what is being generated in the city and district of Montreal, by the company's own plants or by those of its subsidiary companies. The Saraguay Electric and Water Company, which is a subsidiary of the Canadian Light and Power Company, is applying at the present session of the Quebec Legislature for authority to change its name to the Montreal Public Service Corporation, and to increase its capital to \$5,000,000, and to extend its borrowing powers. All these companies, together with the Montreal Tramways Company, are subsidiaries of or component parts of the Montreal Tramways and Power Company which operates the street railway system of the city and island.

From the above it would seem that the power companies of Montreal are in a position to supply at all times from 100,000 to 125,000 horse-power. Should there be occasion, the Shawinigan Water and Power Company can provide 45,000 more, and it is understood that the Canadian Light and Power Company is making an effort to increase its capacity. The capacity of the Cedar Rapids Manufacturing and Power Company, within thirty miles of the city, may be counted on, and if the National Hydro-Electric, with its Carillon Power be added, it would seem that the requirements of the city of Montreal may double without pressing unduly upon the producing capacities of the companies mentioned.

TORONTO CITY'S FIRE INSURANCE

The city of Toronto has renewed the insurance on all its insurable property with the exception of its Public schools. The total amount of insurance placed is \$3,661,258, and the premiums \$73,286. Sixty different companies provided the insurance for the three years since November 17th, 1909, which have just expired and as many companies are asked for a share of the three and a half millions placed this month.

The total insurance is divided into one hundred equal parts and five parts was the largest share any individual company was awarded last term.

The question of the city's providing its own insurance has on different years been urged upon the council, but no action, and wisely, has ever been taken.

The growth of the insurance in twenty years with the rate per cent. and premium paid has been as follows:—

1890	 \$	542,810	1 3/4 %	\$8,142
1894		636,980	1 3/4 %	9,554
1897		650,267	1 3/4 %	11,379
1900		666,083	2 1/4 %	15,661
1903		1,773,913	2 3/4 %	39,913
1906		2,334,570	2 3/4 %	52,527
1909		3,012,000	2 1-10 %	63,252

Total premium \$201,428

The city has paid for protection from fire loss in the past twenty years a total premium of \$201,428.

The city has received in payments for losses by fire in the same period \$168,197.

LEGAL NOTICE

SOUTHERN ONTARIO LAND COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 30th day of September, 1912, incorporating James Steller Lovell, accountant, Robert Gowans, Joseph Ellis, John Joseph Dashwood, William George Flood and William Bain, solicitors' clerks; Ewen James MacEwen, student-at-law; and Samuel Goodman Crowell, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease, take in exchange or otherwise acquire improved or unimproved lands, or any interest therein, of any kind whatsoever (including agreement for sale or options), together with any buildings or structures that may be on said lands or any of them and to sell, lease, exchange or otherwise dispose of the whole or any portion of the said land and all or any of the buildings or structures that are now or may hereafter be erected thereon and to take such security therefor in payment or part payment for the same as may be deemed advisable; (b) To improve, work, manage and turn to account the said lands, buildings and structures and to develop, cultivate and farm the said lands and to sell and dispose of the produce therefrom and to survey the said lands and to lay the same out into lots and to advertise the sale of the said lands and lots; (c) To erect buildings and deal in building material; (d) To take and hold mortgages for any unpaid balance of the purchase money for any of the lands, buildings or structures so sold, and to sell or otherwise dispose of the said mortgages or any agreements for the sale of the said lands, buildings or structures; (e) To purchase, take on lease or in exchange, hire or otherwise acquire and undertake the whole or any part of the business assets, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or of any person or company owning or possessing property suitable for the purposes of the company and to pay therefor with cash, shares in the capital stock of the company or bonds or debentures of the company or part in cash and part in the said shares or bonds or with such other consideration as the company may deem fit; (f) To acquire by purchase, lease, grant or otherwise whatsoever options, water rights, concessions or rights for the construction of and to work, manage and construct roads, leats, canals, wharves, tunnels, dams, reservoirs and tramways or railway sidings on lands owned or controlled by the company, or works of any kind, and to make, build, purchase or hire engines, rolling stock, wagons, ships, barges and other plant and machinery of every description in connection with or for the use of or convenience of the company's property or the transit of produce, ores, minerals and other things, or the supply of materials and other things required by the company; (g) To take, acquire by purchase, lease, grant, license or exchange any buildings, easements, machinery, plant, stock-in-trade, patents or other rights or privileges and generally any property whatsoever of any kind, whether real or personal, or any estate or interest therein which the board may consider desirable in the interests of the company; (h) To improve, manage, work, develop and turn to account any property, real or personal, acquired by the company or in which the company is interested, and to sell, lease, convert into money, barter or otherwise dispose of the undertaking, property, assets and effects of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, stocks or securities of any other company either fully or partly paid up, and to accept payment for any property so sold by instalments and to distribute any such consideration from time to time amongst the members of the company; (i) To purchase or otherwise acquire shares or stock, bonds, debentures or other securities in any other corporation (notwithstanding the provisions of section 44 of the said Act), and to hold, sell or otherwise dispose of the same; (j) To act as brokers and agents in connection with the effecting of insurance, the selling, purchasing, leasing, valuing and managing of real estate and for the investment and collection of money, and in general the management of estates and acting as financial agents or otherwise; (k) To aid and assist by way of bonuses, cash advances or otherwise, with or without security, settlers and intending settlers

From 1892 till 1902 a total of \$48,274 was collected on the city's policies for fire damage. The largest item was on the burning of the Allan Gardens pavilion in 1902, which was \$20,926.

In 1892, 1896 and 1899 there were fires at the Exhibition grounds. On the last two years \$7,579 and \$11,217 were the amounts made up by the insurance companies.

During the last ten years the largest amount received was for the destruction of the grand stand, Crystal Palace, etc., at the Exhibition on October 18th, 1906; that cost the companies, \$99,730.

The City Hall tower was struck by lightning in 1902 and 1909, and \$800 and \$864 were the amounts the companies paid.

In 1907 the city lost a freight wharf by fire and received \$12,650 as compensation. Other smaller amounts collected for fires at the Cattle Market, Isolation Hospital, jail and police stations, make up the total of \$168,197.

The better class of building the city now erects, induced the insurance companies to make a reduction in the premium rate; from 2.10 per cent. three years ago to about 2 per cent. for the ensuing three years' insurance, has been secured.

The capital stock of the Westminster Investment Company, Limited, has been increased from \$20,000 to \$100,000 by the issue of 800 new shares of the par value of \$100 each.

The twenty-five years' term of the consolidated franchise on the suggested agreement between Vancouver and the British Columbia Electric Railway was the cause of Greater Vancouver transportation committee's report being refused consideration by the Vancouver city council.

upon any lands belonging to or sold by the company and generally to promote the settlement of any lands that may be at any time owned by the company, and to establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company or in the neighborhood of such lands; (l) To enter into any arrangement for sharing of profits, union of interest or co-operation with any other person or company carrying on or about to carry on any business or transaction which may be of benefit to the company; (m) To take, acquire and hold as a consideration for the sale or other disposal of any of the assets or properties of the company or for work done by the company by contract or otherwise, shares, debentures, bonds or other securities of or in any other company; (n) To distribute among the members in specie any property of the company whether by way of dividend or bonus; (o) To invest and deal with any reserve funds of the company and any moneys of the company not for the time being required for the general purposes of the company upon such investment (not being shares of the company) and in such manner as may seem expedient; (p) To pay all expenses of and in connection with the incorporation or in or about the promotion of the company and the obtaining of subscription of the share and debenture capital thereof and all commissions and other remunerations to brokers or others for procuring or guaranteeing subscriptions or for underwriting, placing, selling or otherwise disposing of any of the shares, mortgage debentures, debentures, debenture stock or other securities of property of the company, or of any other company, or assisting so to do or for procuring or obtaining settlement and quotation upon London or foreign colonial or provincial stock exchanges of any of such share capital or securities; (q) To guarantee the payment of the principal of or the dividends or interest on any stock, shares, debentures, securities, loans or undertakings in any case in which the board consider it expedient; (r) To amalgamate the business with that of any other company whether by sale or purchase of the undertaking, subject to the liability of this or any such other company, firm or person, with or without winding up or by sale or purchase of all the shares, stock, debentures or other securities or assets of this or any such other company, firm or person as aforesaid, or by partnership or by an arrangement of the nature of partnership or in any other manner; (s) To be interested in or promote and undertake the formation and establishment of companies of any kind whatsoever and to subscribe for or guarantee the subscription of or to buy, sell, hold and deal in and with shares, stocks, bonds, debentures, securities or obligations issued or guaranteed by any government, sovereign, ruler, commissioners, public body or authority, supreme, municipal, local or otherwise, or by any company or association of persons; (t) To do all or any of the matters aforesaid either as principals or agents or trustees for others and either in the name of the company or of any person or persons, firm or company as trustee or agent for the company and either alone or in concurrence with any person or persons, firm, company, government, body or authority; (u) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments and to give guarantees or undertakings of any kind; (v) To do all such acts, matters and things as are incidental or necessary to the due attainment of the above objects or any of them; (w) To sell any property of the company, whether real or personal, for such consideration as the company may deem fit, including shares, debentures or securities of any corporation; (x) To raise and assist in raising money for and to aid by way of bonus, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Southern Ontario Land Company, Limited," with a capital stock of two hundred and fifty thousand pounds, divided into 250,000 shares of one pound each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 1st day of October, 1912.

THOMAS MULVEY,

Under-Secretary of State.

BLAKE, LASH, ANGLIN & CASSELS,

Solicitors for the Company.

DEBENTURES FOR SALE

ATHABASCA LANDING, ALBERTA

Clerk, Steelton.

CALL FOR TENDERS FOR DEBENTURES

TOWN OF MAGRATH, ALTA.

The town of Magrath hereby calls for tenders for local improvement debentures (cement sidewalks) eleven thousand (\$11,000.00) dollars five (5) per cent. twenty (20) years.

Bids must be in the hands of the undersigned secretary-treasurer not later than six (6) o'clock p.m., Wednesday, November 20th, 1912.

MELVIN GODFREY,
Secretary-Treasurer Town of Magrath, Alta.
October 28th, 1912.

PRESIDENT WILSON'S FIRST MESSAGE

"The results fill me with the hope that the thoughtful progressive forces of the Nation may now at last unite to give the country freedom of enterprise and a Government released from all selfish and private influences, devoted to justice and progress.

"There is absolutely nothing for the honest and enlightened business men of the country to fear. No man whose business is conducted without violation of the rights of free competition and without such private understandings and secret alliances as violate the principle of our law and the policy of all wholesome commerce and enterprise need fear either interference or embarrassment from the administration.

"Our hope and purpose is now to bring all the free forces of the Nation into active and intelligent co-operation and to give to our prosperity a freshness and spirit and a confidence such as it has not had in our time.

"The responsibilities of the task are tremendous, but they are common responsibilities which all leaders of action and opinion must share. And with the confidence of the people behind us everything that is right is possible. My own ambition will be more than satisfied if I may be permitted to be the frank spokesman of the Nation's thoughtful purposes in these great matters."

Messrs. A. E. Ames & Company have opened their new office in Montreal under the management of Mr. G. A. McPherson, who has been associated with the bond department of that firm for a number of years. The office is in the Royal Insurance Building.

An innovation in municipal financing and endowment funds has been announced at Evansville, Ind., when Adolph Meizer, a wealthy retired soap manufacturer, presented to Mayor Charles Heilman and the city council a certificate of deposit which is to be kept in bank and draw compound interest for 250 years, when the deposit will amount to \$10,956,400. The donor believes that many municipalities are held back by their large debts. To offset the fear that a city will become bankrupt by incurring large bonded indebtedness and that future generations will groan under the burdens imposed by the administrations of to-day Mr. Meizer has devised the many towns where such an endowment may serve as a stimulus to large public improvements.

FIRE INSURANCE CONTINGENT COMMISSIONS

At a recent meeting of the Western Canada Fire Underwriters' Association, the following action was taken in regard to contingent commissions:—

It was moved by the Aetna and seconded by the Canada Fire that the constitution be amended as follows: Add after clause 5 of article 10, page 12, of constitution the following:

"It is provided, however, that in towns and cities of 2,500 population or over, with waterworks protection and which towns and cities shall have been approved and the names thereof bulletined by the provincial committee, an agent or chief representative, as an alternative to the above, may be paid a commission of 10 per cent. flat with 15 per cent. on profits annually. In calculating profits, losses and adjustment charges and a minimum of 30 per cent. to cover general expenses must be deducted from the premiums. The premiums shall mean the gross premiums of the agency, less refunds and cancellations. All compensation agreements involving the contingent plan shall be made for a period of not less than one year and upon the completion of any such agreement the company so doing shall immediately notify the secretary of the association to that effect, and the secretary shall similarly notify the other companies, if any, in the agency."

The motion carried by 56 to 8 votes.

The name of the Dominion Safety Explosive Company, Limited, has been changed to that of Dinitrolite Explosives, Limited.

The Montreal and Southern Counties Realty Company, Limited, has changed its name to that of Brompton Park Realty Company.

Suggesting a review of the Vitoria, B.C., fire department for the benefit of the city council and the public, Fire Chief Davis, in his report for October announces the arrival of additional equipment, and gives the fire loss for last month at \$5,812. Loss on buildings totalled \$2,820, and on contents, \$2,092. The total insurance on the premises in which the fires occurred was \$42,000. Alarms numbered nineteen, sixteen telephone and three box alarms. The buildings inspected totalled 100. The department travelled sixty-one miles, 530 yards.

TAKE ADVANTAGE OF THIS OPPORTUNITY NOW

WE offer to all new subscribers who send us \$3.00 NOW to mail the remaining issues of The Monetary Times for 1912 FREE and will date subscription forward to January 1st, 1914.

Further than this, our special book offers may be taken advantage of in connection with the above. To new subscribers we present these under the following options:

No. 1 for \$4.00

Subscription to The Monetary Times to January 1st, 1914.

(Including the 1913 Annual Review)

"Capital Investments in Canada" (SECOND EDITION) Revised to March 31st, 1912

No. 2 for \$4.00

Subscription to The Monetary Times to January 1st, 1914.

(Including the 1913 Annual Review)

"Manual of Canadian Banking"

No. 3 for \$5.50

Subscription to The Monetary Times to January 1st, 1914.

(Including the 1913 Annual Review)

"Capital Investments in Canada" (SECOND EDITION) "Manual of Canadian Banking"

To get the benefit of this offer, please use coupon attached or refer to this advertisement.

PROFIT SHARING OFFER TO PRESENT SUBSCRIBERS

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

INSURANCE DEPARTMENT,

Ottawa, 2nd October, 1912.

Notice is hereby given that a license, No. 328, has this day been issued to the National Union Fire Insurance Company of Pittsburg, Pa., for the transaction of the business of Tornado Insurance in addition to the business for Fire Insurance for which it is already licensed. The chief agency of the company is established at the City of Toronto, and Henry J. Richmond is the Chief Agent.

W. FITZGERALD,

14-4

Superintendent of Insurance.

NORTHERN CROWN BANK

Head Office, Winnipeg

Dividend No. 12

Notice is hereby given that a dividend at the rate of six per cent. per annum upon the paid up capital stock of this institution has been declared for the six months ending November 30th, 1912, and that same will be payable at its banking house in this city and at all its branches on or after the second day of December next to shareholders of record of the fifteenth day of November, 1912.

By order of the Board,

ROBERT CAMPBELL,

General Manager.

Winnipeg, October 22nd, 1912.

THE CANADIAN BANK OF COMMERCE

Dividend No. 103

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this institution has been declared for the three months ending the 30th November, 1912, together with a bonus of one per cent., and that the same will be payable at the bank and its branches on and after Monday, 2nd December, 1912. The transfer books will be closed from the 16th to the 30th November, both days inclusive.

By order of the Board,

ALEXANDER LAIRD,

General Manager.

Toronto, 30th October, 1912.

THE BANK OF TORONTO

Dividend No. 125

NOTICE is hereby given that a dividend of TWO AND THREE-QUARTERS PER CENT. for the current quarter, being at the rate of eleven per cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared; also a Bonus of ONE PER CENT., and that the same will be payable at the Bank and its Branches on and after the 2nd day of December next, to the Shareholders of record at the close of business on the 15th day of November next.

THE TRANSFER BOOKS will be closed from the 16th to the 25th days of November next, both days inclusive.

By order of the Board,

THOMAS F. HOW,

General Manager.

The Bank of Toronto, Toronto, October 30, 1912.

WANTED

Agency for First-class Board
Fire Insurance Company
operating or about to locate in Winnipeg.

DAVIS & MCGREEVY

402 MCGREEVY BLDG., 258½ PORTAGE AVENUE
WINNIPEG, CANADA

THE ROYAL BANK OF CANADA

Dividend No. 101.

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of December next, to shareholders of record of 15th November.

By order of the Board.

E. L. PEASE,

General Manager.

Montreal, P.Q., October 11th, 1912.

THE BANK OF NEW BRUNSWICK

Special Meeting of the Shareholders.

NOTICE is hereby given that a special general meeting of the shareholders of The Bank of New Brunswick will be held at the office of the said Bank in the City of Saint John, New Brunswick, on Monday, the 9th day of December, 1912, at the hour of eleven o'clock in the forenoon, for the purpose of considering an agreement for the sale by the said The Bank of New Brunswick of the whole of its assets to the Bank of Nova Scotia upon the terms set out in such agreement, a copy of which is mailed to each shareholder with this notice, and, if deemed advisable, of passing a resolution or resolutions approving the said agreement and authorizing the President and General Manager of The Bank of New Brunswick to affix thereto the corporate seal of the Bank and to sign and execute the same for and in the name of and on behalf of the Bank; and also for the purpose of considering and, if deemed advisable, of passing all such other and further resolutions for fully carrying out the said agreement and the terms thereof, as the shareholders shall consider expedient or advisable, and for the purpose of authorizing the Board of Directors to give all such notices and make all such applications and to pass and execute all such other acts, resolutions, deeds, instruments, matters and things as may be deemed necessary for procuring the approval of the Governor-in-Council to the said agreement and for carrying out the same and for winding up the affairs of the Bank and distributing the proceeds of the said sale.

By order of the Board,

C. H. EASSON,

General Manager.

St. John, N.B., October, 19th, 1912.

UNION BANK OF CANADA

Dividend No. 103

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, and that the same will be payable at its Banking House in this City, and also at its branches, on and after Monday, the second day of December next.

The Transfer books will be closed from the 16th to the 30th of November, both days inclusive.

The Annual General Meeting for the election of Directors and other general business will be held at the Banking House in the city of Winnipeg, on Tuesday, the 17th December, 1912. The Chair will be taken at 12 o'clock noon.

By order of the Board.

G. H. BALFOUR,

General Manager.

Winnipeg, October 22nd, 1912.

The New Westminster school board has decided, with a few exceptions, to insure the schools on a fifty per cent. basis for a total of approximately \$125,000. It is divided among the schools as follows: F. W. Howay, \$20,000; McBride, \$30,100; Herbert Spencer, \$22,000; Lord Kelvin, \$17,000; John Robson, \$4,200; Manual Training Building, \$1,500; heating and lavatory building of High School, \$3,500. The Queensborough School was insured for 80 per cent., which amounts to \$1,000. The insurance will be distributed among companies who have been registered in British Columbia for a year and whose agents have been located here for the same length of time.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

INDUSTRIAL BONDS

Ontario National Brick Company's Issue—Montreal
Tramways Securities Offered by Chicago House

Another brick company's securities are being offered to the investing public in the form of \$1,250,000 first mortgage forty-year sinking fund six per cent. bonds of the Ontario National Brick Company. The company has been formed by the interests identified with the National Brick Company of Laprairie. A large deposit of shale from which is manufactured a good brick has been secured near Toronto. The company will operate at a capacity of 350,000 bricks per day at less cost than in Montreal, and will serve a larger demand.

The capitalization of the company is as follows:—

	Authorized.	Issued.
Common stock	\$2,000,000	\$2,000,000
Bonds	5,000,000	1,250,000

The bonds are secured by a trust deed in favor of the Quebec Savings and Trust Company, as trustees, constituting a first mortgage on all the properties of the company. The present issue of \$1,250,000 is for the purchase of 104 acres of clay and shale land in the vicinity of Toronto, and the erection of a modern gas burning brick plant of the latest model, and to provide working capital. The remainder of the authorized issue can only be used for the extension of the company's business, or for the acquisition of other property or plants.

The directors are as follows:—Messrs. J. N. Green-shields, K.C., president National Brick Company of Laprairie, Limited, president Wayagamack Pulp and Paper Company, Limited, and president Quebec Savings and Trust Company; T. Long, director Merchants Bank of Canada, director Toronto General Trust Corporation, and director Consumers' Gas Company; J. W. Pyke, president Phoenix Bridge & Iron Works, Limited; Honorable Robert Mackay, director Bank of Montreal, and director Canadian Pacific Railway Company; and John McKergow, director National Brick Company of Laprairie, Limited, and director Sun Life Assurance Company of Canada.

Montreal Tramways Issue.

The Harris Trust and Savings bank, Chicago, is offering investors, to net approximately 4.90 per cent., \$150,000 Montreal Tramways Company first and refunding mortgage 5's. These bonds mature in 1941 and are in denominations of \$500 and \$1,000.

Tenders for the sale of 6 per cent. first mortgage bonds of the Amherst Foundry Company to the sinking fund to exhaust the sum of \$2,034.38, will be received by the Montreal

Trust Company up to November 14th, when tenders will be opened.

Empire Cotton Mills.

The entire issue of the Empire Cotton Mills, Limited, which intend building at Welland, Ont., has been taken by Messrs. Æmilius Jarvis and Company. Bleached and unbleached cottons will be manufactured. Mr. C. T. Grantham, of Boston, is prominently interested in the enterprise.

An issue of Imperial Tobacco Company of Canada bonds, £1,219,925 cumulative sixes, has been listed on the London Stock Exchange.

DEBENTURES AWARDED

Snipe Lake R.M.—\$5,000 5½, 20 instalments, to Flood Land Company, Regina.

Wilkie S.D., Sask.—\$75,000 5%, 30 instalments, to Messrs. Wood, Gundy and Company, Toronto.

Penetanguishene, Ont.—\$15,000 5%, 20 annual instalments, to Mr. J. B. Jennings, Penetanguishene.

IMPORTANT BUILDING PROPOSALS

Included in the report of the special committee appointed to draft a new building by-law for the city of Montreal are these important suggestions:—

Improved fire escapes and smoke-proof towers for factories.

Theatre operation, regarding fire safety, in police hands.

Building and street control not placed in hands of building department.

An enlarged building department, the present being "inadequately small."

Public width of public stairs one-fortieth in feet of persons accommodated at one time.

Smoke-proof towers in schools of 600 pupils and over.

Every sleeping compartment provided with a window opening on street, yard or court.

No sleeping room the ceiling of which is less than 4 feet 6 inches above the adjacent curb.

No elevated tanks without special provision from foundation up.

British Columbia shingle manufacturers will seek imposition of a duty on shingles when tariff revision is considered. From April 1st to September 30th last year, 31,000,000 shingles were imported from the United States, but this year in the same period the number increased to 102,000,000.

REVISION OF THE BANK ACT

There is general expectation that the revision of the Bank Act will be among the early legislation to come before the next session of parliament. Until the bill is introduced no authentic information is forthcoming.

It is thought by some that the bill will contain a provision permitting the chartered banks to increase their note circulation against gold. Additional safeguards may be enforced respecting the organization of banks in their early stages. The new bill may also contain clauses dealing with the question of the responsibility of directors and officers of banks.

Mr. John T. Knight, secretary of the Canadian Bankers' Association, states that efforts in the United States to place private banks under some sort of supervision are likely to succeed, owing to the heavy losses sustained by those who pin their faith to the supposed probity of an individual rather than to the protection offered by the supervision given to the affairs of a legally established bank. Even the excellent clause now contained in the Canadian bank act, by which the use of the word "bank" is denied to any but chartered institutions is likely to be amended at the next revision of the bank act, owing to foreigners using the equivalent for the word "bank," and thereby luring the poor and illiterate among their countrymen to financial ruin and disaster. To immigrants, a bank means a safe place in which to deposit their savings; and, if the use of the word in English is forbidden by the law of the land, the substitution of the word "banco" or "banca" should

not be permitted to any bold and unscrupulous adventurer, either in the United States or Canada. In some States any man can open a bank without a license, and he is subject to no inspection of the way of doing his business. But if he elected to drive a cab for a living, a license fee and conformity with the regulations governing public vehicles would be necessary.

When the Bank Act is taken up in committee Western delegations representing various agricultural organizations intend to ask for certain modifications. The most important of these is the proposal that banks be allowed to grant new loans with grain and cattle as security. At present banks may lend money on natural products in the hands of wholesalers, so that a farmer's crop is security when it reaches the elevator or box-car, but not while it remains in his hands. The claim is made that if the farmer could raise money on grain in his possession he would not be in such a hurry to ship it out, and so the present rush, with its danger of congestion, would be avoided.

The question of external bank audit may be dealt with in the legislation, and will probably cause much discussion, it being one of the most difficult problems. Discussing the matter at the last annual meeting of the bank of which he is president, Mr. William Molson Macpherson did not anticipate any radical change in the bank act. Full inspection by Government, he said, would be very difficult to carry out, but a moderate system of audit and inspection of a bank's position, and securities, would prove of advantage, and tend to prevent a repetition of some failures of the past.

There are likely also to be several changes in the form of the bank statement made to the government.

FUEL OIL ON THE PACIFIC COAST

The use of fuel oil on the British Columbia Coast has many advantages over the use of coal. The quantity required to perform the same service is less both in weight and the space occupied, with a proportionate decrease in fuel bills. On the larger boats, the reduction in firemen and trimmers by its use has been as 67 per cent., with the consequent lowering in pay-roll and the cost of subsistence. Such expenses as renewing of grate-bars, stoke-hold floor plates, slice-bars, rakes, etc., are done away with.

Owing to the uniform temperature of the fires, boiler repairs have disappeared. With the use of fuel oil there is no constant opening of furnace doors for firing up, no cleaning of fires, with the consequent inrush of cold air, and the resulting lowering of temperature, which has a serious effect on joints and rivets because of contraction. The experience on one of the large boats running out of Vancouver in this respect is that one boiler in a battery of six was constantly under repair when coal was in use. Since oil has been in use there have been no repairs necessary.

Because of the absence of smoke, cinders and coal dust, oil-burning ships are not only cleaner, but the supplies required for scrubbing and painting are much less. There are no dirty bilges and no corrosion to the bottom boiler plates as a result of absence of ashes.

In point of efficiency the advantages are quite as marked. The calorific values of oil far exceeds that of coal, after deducting the percentage of moisture and ash from coal, the latter from experience being found to run as high as 20 to 25 per cent. The average run of coal will be found to represent 7,000 to 9,500 B.T.U., whereas oil will give as high as 18,500 B.T.U. Owing to incomplete combustion when firing with coal the stack temperatures are very high; with oil, combustion is practically complete, and stack temperatures of 400 degrees to 450 degrees are obtainable. In the case of one large coast steamer the reduction in stack temperature was 950 degrees; the temperature with coal being 1,400 degrees, with oil 450 degrees.

With fuel oil there is perfect control of the fire. When the engines are stopped fires may be completely extinguished, if desired, in the course of a minute. There is no lost time in filling the coal bunkers. The oil tanks can be filled in several hours, fuel enough being taken on to last in some cases twice as long as when using coal.

The efficiency of the plant, and, to a large extent the economy to be obtained, depends on the system of burners adopted. As is well known, there are three methods of atomizing fuel oil employed, viz., by air, by steam, or by mechanical process. The first entails considerable initial expense for compressors, etc., and the cost of operation. The second, while not so costly to install, uses a large amount of live steam, which is unreclaimed, and a consequent drain on the fresh water supply. In addition, the roaring of the burners is disagreeable and a nuisance. The third, or mechanical system, consists of heating the oil to a high temperature and putting it under pressure, from which, when escaping at the burner, it bursts into a vapor and readily ignites.

A large number of vessels, also a number of stationary plants, have been equipped with the mechanical system. Its adoption as being the cheapest to operate and most efficient, was only after careful consideration of the various systems. It is practically noiseless, and consists of a pump, heater and burner. In practice, two pumps and two heaters are fitted, so that in case of a breakdown or overflow there will always be one pump and one heater in reserve. The burners are very simple as to design, and are arranged for changing or cleaning. A burner can be taken out and changed in five seconds, and has various sized tips, which can be used as required, for increasing or diminishing the consumption.

With regard to the supply of fuel oil on the British Columbia coast, there are no present indications of failure. It was reported about the beginning of the year that there was in storage in California alone a quantity sufficient to take care of the world's consumption for seven months. The California and Texas oil fields are by no means exhausted; new wells are constantly being sunk and from indications in Alaska, Alberta and South America other fields will be developed. Notwithstanding, therefore, the immense increase in consumption, the supply promises to be adequate. Two large companies now have storage tanks in Vancouver, and one of these companies will shortly have a storage tank in Victoria. These companies are each prepared to make term contracts for the supply of oil fuel in large quantities.

FIRE MARSHALS

A large number of states in the neighboring republic have for many years had the services of fire marshals. They have proved efficient in helping to reduce the fire waste, and especially in bringing incendiaries to justice. Incendiary fires in Canada are surprisingly numerous and comparatively few convictions are obtained. It is asserted, with good reason, that the appointment of a fire marshal in each Canadian province would tend to change these undesirable conditions. Manitoba is the only province which has a fire marshal. Agitation for such an appointment in Ontario has been continued for many years without result. *The Monetary Times* understands that the question will now be considered by the province of Quebec.

With the exception of a few amendments and the insertion of some special provisions taken from the Ohio and Michigan laws, the model fire marshal law, drafted by the National Board of Fire Underwriters, was approved last week, at a meeting in Chicago, by the law and regulations committee of the Fire Marshals Association of North America.

One of the provisions inserted makes the term of office six years, in order to prevent the removal of an officer as a result of a change of administration just about the time he became expert in his duties. The cost of maintenance of the fire marshals' department is to be borne by the general fund, instead of special taxation upon insurance premiums, on the ground that the service performed is a public one, of value to insured and uninsured property alike, and that the fire marshals are handicapped in prosecution by the claim of the defendants' attorney that they are supported by the insurance companies.

Sections were added, taken from the Ohio law, giving the fire marshal the right to tear down condemned buildings and providing for the right of appeal from his decision to the proper court. A section was added from the Michigan law requiring the fire insurance companies or agents to report all losses to the fire marshals' department within three days after the completion of the adjustment.

The Michigan measure was also drawn upon for a section providing penalties for public officials who fail to comply with the requirements of the law regarding the reporting and investigation of fires.

FARM AND FACTORY

There is a possibility that Western towns may acquire an exaggerated idea of the value of local industries to a Western community. The insistent demand for agricultural development is neglected for a faint call for industrial activity. Many Western towns, surrounded by a wealth of agricultural opportunities, sit around the meal table content to import butter from the eastern townships, cheese from Ingersoll, potatoes from British Columbia and Nova Scotia, hams and bacon from Chicago, Kansas City and St. Louis. A large

portion of the milk comes in tins from Oxford county or from Nova Scotia, and vegetables are brought from British Columbia or California.

Ignoring the appeal of the rich soil, on which these Western people have built their towns, they grab any suggestion without hesitation, to establish any kind of a manufacturing plant, no matter how adverse the conditions may be for such an industry. Time and energy and money are wasted in endeavors to promote industries for which conditions are not yet ripe. In many cases, industrial enterprises "secured," are purchased at an exorbitant price. Frequently every dollar that actually goes into the enterprise, is subscribed by the citizens, while glib-tongued promoters obtain handsome remuneration from the same source.

Westerners will be able to point without difficulty to many such cases, and Eastern Canada has had a taste of the same thing. An up-to-date creamery, for instance, has been built in a Saskatchewan town, the residents having taken stock in a company for that purpose. Now it is found that there is no great demand for the products in that locality, and that the share salesman's dairying is vastly different from dairying unadorned. Industrial life is good for agricultural reasons, but it should be taken, at first, in small doses, at reasonable prices and not to the neglect of agriculture.

FOXES AS INVESTMENTS

If the present fashion for investment in fox farming continues, the prospectuses of fox ranching companies will shortly become a common affair. Papers were signed recently for the purchase of the Dalton Ranch at Tignish to a syndicate of English and Canadian capitalists. Letters patent are being applied for under the style of the Charles Dalton Black Fox Company. Mr. Dalton will take stock to the value of \$100,000 in the new company, and is to remain as managing director for at least one year. One of the conditions of the sale is the guarantee of a crop of not less than fifty young foxes next spring, and for each one short of that number Mr. Dalton will forfeit the sum of \$5,000. Another syndicate is applying for incorporation as the New Brunswick Tuplin Irving Black Foxes, Limited, with a capital of \$100,000.

A Charlottetown paper reported that within a few days a gentleman from Port Elgin, N.B., bought five pairs of foxes from Tignish and Alberton parties, paying for them fifty thousand dollars; a gentleman from Moncton bought four pairs, also from parties in Tignish and Alberton, at the same price, ten thousand dollars a pair; a gentleman from St. John bought two pairs in the same locality at the same price and wanted two more pairs, but could not get them.

A first-class fox is evidently a good investment, even at \$5,000. An authentic record is reported of a single female black fox which in seven years produced forty-five descendants which lived and were sold. These at the prices ruling to-day would be worth \$225,000, a liberal return in seven years for an investment of \$10,000 for a pair.

Legislation may be introduced in the Quebec Provincial House with the object of protecting those engaged in raising or breeding foxes and other fur-bearing animals kept in captivity. This legislation will be based on a similar Act recently passed by the government of New Brunswick, and will specially apply to the breeding of black or silver foxes.

Parliament is sitting again. Some members are born speechless, some achieve speeches and others have speeches thrust upon them.

The Governor-General says the new dry dock is a monument to the work of the three Montreal harbor commissioners—yes, and unfortunately to the commissioners, too.

* * * *

The town of Cochrane, Northern Ontario, continues to make strides. It rightly expects the Ottawa cabinet minister, whose name it bears, to see that it gets proper railroad treatment.

* * * *

Forty-seven thousand freight cars and seven hundred and twenty locomotives have been ordered by our large railroad companies this year, in which fact is another reason for Canada's borrowings.

* * * *

An authority informs *The Monetary Times* that Canadian municipalities have ready to market \$50,000,000 of municipal debentures. That fact can scarcely be called a tonic for the London market.

* * * *

While rushing up St. Francois Xavier Hill in response to a fire alarm last week the large motor fire truck attached to the Montreal fire department headquarters suddenly stopped and refused to ascend the steep grade. Hurriedly examining the gear the driver discovered that the gasoline had run out. Meanwhile, the ordinary horse-drawn fire apparatus were rushing past the modern motor truck on their way to the fire, which had broken out in the barge Balencia, of the Montreal Transportation Company. By the time the truck had been hauled back to the station and the tank refilled with gasoline the fire had been extinguished. This story is chronicled chiefly because the gasoline gave out and the horses' breath did not.

PANAMA CANAL TOLLS

Steamship Men Figuring on Cost of Passage—Difference of Measurement Systems

Now that President Taft has proclaimed the basis of the Panama Canal toll rates to be paid by foreign shipping and ships under the American flag trading with foreign ports, steamship men in the New York shipping offices are busy figuring out estimates of what total sum an average ship may have to pay.

Owing to the many technical considerations involved it has been impossible for shipowners to make their calculations with any degree of assurance.

The provisions of the proclamation as regards merchant vessels are:

On merchant vessels carrying passengers or cargo, \$1.20 per net vessel ton—each 100 cubic feet of actual earning capacity.

On vessels in ballast without passengers or cargo, 40 per cent. less than the rate of tolls for vessels with passengers or cargo.

Important Points in Doubt.

This still leaves many important points still in doubt, and the proclamation must be taken as merely the preliminary announcement, since the rules for the measurement of vessels have still to be drawn up by the Secretary of War. Until it is known definitely whether the Panama rules of measurement will follow the British, American or Suez Canal systems of measurement for calculating the net vessel tonnage, only rough estimates can be made.

The basic rate is made to correspond closely to the Suez Canal toll, the \$1.20 being practically the equivalent of the 6.75 francs, the rate which is to become effective on the first of the new year, showing a reduction of 50 cents from the present toll. It is probable that the American system of measurement will be followed, and as the American measurements come nearer to the Suez rules than to the British some clue may be obtained from ships which have the American measurement as trading with this port and have actually paid Suez Canal dues.

Mileage and Tonnage Calculations.

A steamship company's agent, in speaking of the subject, said that he was engaged on making mileage and tonnage calculations so that he could form some judgment on what it would cost his boats through the Panama Canal in order to compare the relative expenses of the alternative routes, namely, through the Straits of Magellan or by the Panama Canal. He said: "No positive or definite working criterion can yet be made. Only a rough approximation is possible, but every line knows what the net register means sufficiently to be able to take it as a guide. The American government assesses its tonnage dues on a given measurement capacity known as the American net register, and this, as I understand it, will be the measurement used in the rules to be issued by the government."

"The British net register is less than the American owing to a different basis of calculation. The British measurement does not include every available space that might be used for cargo such as extended bridge compartments, etc., but exempts those spaces when they are not used for cargo. The American measurement charges for those spaces whether used or not. It is an important technical point that should a vessel at any time go through the Suez Canal with merchandise of any kind, or lumber, coal, or stores of any description, the whole of that space is added to the net tonnage and can never more be exempted from measurement."

Coal and Bunker Space.

"The consumption of coal and the use of temporary or permanent bunker space are important items in the calculation, and shipowners using the canal for their boats will probably have to allow for permanent bunkers, as they will wish to make use of every foot of space for the cargo the ship can carry."

Another New York shipowning firm gave as a specific instance the case of a steamer having a measurement capacity of 392,958 cubic feet. Allowing 100 cubic feet as the arbitrary unit for a register ton the amount of the toll to be paid, at the rate of \$1.20 a ton, would be \$4,716.

Professor Emory Johnson, in his evidence, January 30, 1912, before the House Committee on Interstate and Foreign Commerce, printed in Volume II. of the Hearings, gave this rule for determining the net register tonnage of a vessel:

Question of Net Tonnage.

"There is deducted from the entire capacity of the hull the space occupied by the crew, master's cabin, steering and anchor gear below deck, boatswain's stores, chart house, and spaces occupied by propelling power (engines, boilers, shaft, tunnel, fixed coal bunkers). These deductions having been made, the net registered tonnage is ascertained by

dividing the number of cubic feet in the remaining space by 100. In an up-to-date freight steamer, as measured by British, American or German rules, the net register is somewhat less than two-thirds the gross register. In the case of a high speed passenger vessel, so much of the ship is taken up with propelling machinery, fixed coal bunkers, crew space, etc., that the net register tonnage may be less than half, sometimes not more than one-third of the gross register."

To this evidence of Professor Johnson, it may be added, were appended exhibits showing tables of distances via the Panama Canal and alternative routes, number of days saved from various ports, Suez Canal data, comparative data of a ship, the Santa Rosalia, built in 1911, showing net tonnage on all three systems, viz.: British, 3,488; American, 4,392; Suez, 4,452; average price of coal at Panama and detailed statements on the relation of tolls to the volume of Panama Canal traffic.

QUEBEC TO REGULATE TRUST COMPANIES

Hon. Mr. Mackenzie, provincial-treasurer of Quebec, has submitted to the Legislature a bill for the purpose of defining the powers and requiring a Government inspection of the operations of trust companies.

The provincial treasurer stated that the act was an indication of the growth of these companies, which were now organized under special charters and what was proposed in the bill was to adopt a general act governing all such companies, thus introducing a uniform regulation in which probably the most important feature would be a Government inspection.

At present no such inspection report was made unless it was specified in the private charter, and while there had been no complaint about these companies it was realized the time had come to place them under a better form of organization. The powers of these important companies would accordingly be defined and there would be a yearly inspection. The Government bill, which was read a first time, is entitled an act respecting trust companies.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Red Deer, Alta.—Mr. F. Collicut's barn. Loss \$700. Insurance, Northern \$500. Adjusted by E. A. Lilly Adjustment Agency, Calgary.

Mr. C. C. Mill's stable. Loss \$400. Insurance, \$300 North British and Mercantile. These losses were adjusted by E. A. Lilly Adjustment Agency, Calgary.

Hampton, N.B.—October 24.—Mr. W. Golding's store. Loss \$145. Insurance, stock \$400; building, \$800 with Hudson Bay Company. Cause, cigar or cigarette.

November 9.—Messrs. H. E. Bond's building, corner Simcoe and Wellington Street. Loss \$107. Fully insured. Adjusted by Messrs. Ross and Wright, Toronto.

November 12.—Positive Clutch and Pulley Company. Loss \$2,500. Insured with Equity, Canada, Nation, Royal, Provincial, Springfield, West Chester, etc. Building owned by Mrs. S. W. Beara. Loss \$1,200. Loss adjusted by Messrs. Ross and Wright.

CANADA AND TWENTY-SEVEN STATES

Lake Erie and Ohio River Ship Canal May Connect Them—How Canada Would Benefit

Chiefly to develop the coal and iron districts around Pittsburg (Pennsylvania), by 1920 a gigantic internal waterway, 2,700 miles long, is to be completed at a cost of about £33,000,000, or more if necessary. This scheme is technically called the "Lake Erie and Ohio River Ship Canal," and it has had the approval and support of the United States National Waterways Commission, which has, of course, secured from the various States concerned the necessary funds.

The waterway will perhaps benefit Canada more than the United States. That is the opinion of Mr. J. Lawrence Hamilton, M.R.C.S., expressed in the London Financier. He takes this stand because of the larger quantities and superior qualities of Canadian coal and iron, which are also cheaper than these products in the States. Canada, without contributing one half-penny to this scheme, is likely eventually to derive more profit therefrom than the United States, who provide all the funds.

When the Erie Canal across the State of New York is opened in 1916, and the Ohio River is canalized by 1920, there will then be an unbroken navigable waterway connection for ships and barges from New York to New Orleans. From New Orleans, via the Gulf of Mexico, these ships can proceed through the Panama Canal to secure the Pacific trade, and thence to Japan, China, Australia, etc.

Waterways Versus Railways

United States experts jubilantly declare that this great system of uniform internal navigable waterway will open up half of the American Continent (as well as Canada) to steamers and barges of standard dimensions. This navigable waterway will introduce competitive rail and water rates and freights to benefit inter-State and international commerce for the United States, and, simultaneously, make the Panama Canal effective and of practical use to all sections of the country reached by these interlinked and connected waterways.

The competition of waterways against railways will do more to restrict railway rates than all possible laws enacted by Congress and the State Legislatures combined. In the United States the railway charge for 130 miles for ore or coal much exceeds the water charge for 1,000 miles.

In other words, ore is carried by boat from Duluth (on the southwestern end of Lake Superior) to Ashtabula (adjoining Lake Erie)—a distance of about 1,000 miles. At Ashtabula the ore is transferred to cars and railed 130 miles to the furnaces in Pittsburg, which will be, of course, included in the navigable internal waterway now being constructed. To smelt the iron ores, coal as return freight in the opposite direction has been subjected to similar vexatious exorbitant charges.

Self-supporting Undertaking

United States experts consider that the coal and ore trades in the Pittsburg district will more than provide for the working and maintenance of the internal waterway, and at the same time halve the present railway rates for this portion of the service.

It is asserted that the existing tonnage movement in the Pittsburg district is already larger than any similar-sized area in the world. But the day is not far distant when Canada will have several localized, self-contained "Pittsburg districts," far richer and greater even than the Pittsburg region of Canada's southern neighbor.

Much of the increasing immigration of United States subjects into Canada, says Mr. Hamilton, is designed to secure Canadian coal deposits, iron mines, natural gas and oil deposits before these are acquired by British subjects. Hydro-electric energy, or "white coal," is also much cheaper and more abundant in the Dominion than in the United States, whose well-informed natives know the endless varied subsoil wealth of Canada far better than most Canadians and other British subjects.

The capital stock of the Sterling Investment Company, Limited, has been increased from \$50,000 to \$200,000.

In opening the large dry dock at Montreal, the Duke of Connaught said: "I trust that this day may signalize a change in these respects, and that a strong impetus may be given to the industry of carrying Canadian produce from Canadian ports through Canadian waters. That this trade should be carried in Canadian-built ships cannot be expected for the present, but I hope that within our life-time the flag of the Canadian mercantile marine may often be seen flying over ocean-going steamers which have been constructed in Canadian yards."

TRADE A HUNDRED MILLIONS GREATER

Advance Figures for the Past Fiscal Year Show Increased Imports and Exports

	1911.	1912.
Imports	\$472,247,540	\$566,921,643
Exports	297,196,365	307,716,151
Total trade	\$769,443,905	\$874,637,794

An increase of \$105,000,000 in the trade of Canada is shown in the advance figures for the year ended March 31, 1912. In the imports, coin and bullion, that year accounted for \$33,634,980 and last year \$10,206,210. Exclusive of coin and bullion, \$343,370,082 of the imports were dutiable and \$189,916,581 free. Exports of Canadian produce were \$290,223,857, and in addition \$17,492,294 of foreign produce was exported.

Trade With France and Germany.

The total trade with France amounted to almost exactly fourteen millions, as against \$14,537,000 in 1910-11, and \$12,811,000 in 1909-10. The imports from France were \$11,885,706, a slight increase for the year, and the exports were \$2,123,705, as against \$2,782,092 in the previous year. Dutiable imports for consumption were \$9,625,057, and on these the duty was \$3,436,948, or 35.7 per cent.

The trade with Germany was just under fifteen millions, as compared with \$12,750,000 in 1910-11, and \$10,500,000 in the year before. Imports amounted to \$11,146,739, an increase of about 10 per cent., and exports were \$3,814,914, as against \$2,663,617 last year. Dutiable imports for consumption were \$7,984,629, on which the duty was \$2,246,745, or 28.15 per cent.

Trade With Britain and United States.

Canada's trade with Great Britain amounted to \$269,000,000, of this imports accounted for \$117,191,621 and exports for \$151,833,379. The figures for the last four years have been:

Year.	Imports.	Exports.
1909	\$70,555,895	\$133,745,123
1910	95,666,004	149,630,488
1911	110,585,004	136,962,970
1912	117,191,621	151,833,379

Of the imports from Great Britain for consumption \$89,514,201 were dutiable, and \$27,392,011 were free, the duty being \$22,367,040, or 24.9 per cent. on dutiable articles.

The trade with the United States amounted to \$488,679,000, or excluding coin and bullion \$455,175,000. Imports amounted to \$342,219,131, as against \$284,325,321 in 1911; while exports were \$112,956,295, the figure having been stationary for three years. The imports for consumption were \$196,886,150 dutiable and \$133,542,352 free; the duty levied was \$49,177,584, or 24.9 per cent.

AMERICAN BROKERS MAY ORGANIZE

A call is being sent to brokers throughout the United States and Canada to attend the organization meeting of the proposed International Association of Brokers, which will be held either in Chicago or New York on February 20th, 1913. Security dealers doing business on a capitalization of \$5,000, or over, will be admitted to membership in the proposed organization, and the first 400 to send in membership applications will be enrolled as charter members.

The organization will have for its purposes the banding together of the brokers in the United States and Canada for freer discussion of matters of mutual interest and concern, enlarging the field in which its members may seek to do business; aid by its influence and advice in securing the enactment of such legislation as will tend to specifically prohibit the floating of any financial proposition that is not sound, and by doing so at least help in a measure to protect the members and the investing public from questionable or unsound corporate promotions; to discuss and offer for legislative remedy such recommendations as the association may deem advisable; lend the voice of the association to secure either the passage or defeat of measure relating to investments, and work for the establishment of a national bureau of investigation for all corporate promotions, which shall report favorably upon any position before it shall be recommended to the members of the association or the public at large.

Several thousand letters have been sent to the members of the profession and a large number of replies have been received. It is anticipated that 500 men, at least, will be at the opening meeting. Mr. J. N. Sechrest, of Buffalo, is acting chairman of the organization committee.

CURRENT TRADE CONDITIONS

Collections Generally Are Fair—Wholesale and Retail Trades Are Good

Preparations are being made at Montreal for the lifting of the channel gas buoys, and ocean navigation will practically close at the end of next week, though there will probably be some belated departures. Inland navigation will continue until the canals are closed by frost. Owing to the late open weather, retail business in heavy dry goods, clothing and footwear, has been a little slow, says Dun's report, and the change is generally welcomed by city shopkeepers. Wholesale sorting business in the above lines is fair, and dry goods travelers are already sending in a large proportion of spring orders. Manufacturers of underwear continue to be behind on deliveries and the cotton mills are all busy. In groceries there is a very fair distribution, though sugars move somewhat slowly and refinery quotations are easy at \$4.75 for standard granulated, in bags, as against \$5.85 at this date a year ago. The prominent feature in this line is the abnormal scarcity and high price of Valencia raisins, favoring the consumption of California bulk muscatels, which are quoted nearly 2c. below the Spanish fruit. Boot and shoe manufacturers have already a good volume of spring orders booked, but are not buying leather very actively at the moment. Tanners apparently hardly know what to quote for sole, owing to the rapidly advancing market for dry hides, which are again up 2c., and some are asking 27c. to 28c. for manufacturers' No. 2 sole—a record price. Domestic green hides are also up a cent this week, dealers now buying on the basis of 15c. for No. 1, with tanners absorbing supplies freely. The iron market is quite as strong as last noted, and in general and building hardware there is good demand. General collections are very fair.

Tight Money at Toronto.

Wholesale trade at Toronto is fairly active and in nearly all branches the feeling is optimistic. Manufacturers are very busy and labor well employed, while in not a few lines there is difficulty experienced by jobbers in supplying demands. The money market is tight, but bankers are doing their best to meet the requirements of legitimate trade and industry. The movement of grain from the West has been large, with the inspection at Winnipeg greater for October than in the corresponding month of last year. Some complaints are heard of the great scarcity of cars at Georgian Bay points, and this has restricted the movement eastward. Prices of leading staples in dry goods are firm, with woollens in some instances higher. Orders for spring goods are coming in freely and payments generally are fair. The business in hardware and metals continues satisfactory. Prices are firm and the turnover large. Groceries are fairly active, with prices as a rule unchanged. Leather is in active demand and firm at late advances. Some lines are in limited supply. The grain trade continues quiet. Ontario wheat continues firm, owing to light supplies, while Manitobas are weaker. Oats are also weaker, while rye is higher. Flour remains dull. Provisions are quiet and steady; dressed hogs are lower.

Outlook Good at Hamilton.

Wholesale and retail trade at Hamilton continues good and the outlook is favorable. Manufacturers generally are busy, though it is stated they are handicapped to some extent by scarcity of labor and by freight congestion. The open weather has been beneficial to the building trade and the permits for October were \$383,400 as compared with \$335,000 for the corresponding month of a year ago. Collections are reported fair to good.

Quebec business in all wholesale lines continues quite active and building supplies are in fair demand, with prices generally steady. The shoe and leather industry is brisk, with prices firm. A good retail trade is being done in clothing and other wearing apparel. Remittances are fair as a whole, though still slow from some localities.

Christmas Trade in the West.

Grain receipts at Winnipeg, especially of wheat and flax, are in record volume and large export purchases are being made, but cash prices are weak and options are lower than for years. Warm weather has interfered with fall trade, but conditions are now seasonable, and heavy sorting-up orders are anticipated for the balance of the year. Holiday shopping is already beginning and an unusually large Christmas trade is expected. There is a record demand at Saskatoon for lumber, hardware and building supplies and general conditions are good. Grain is moving freely at Regina and the business situation shows steady improvement. Calgary reports a brisk trade in fall and winter merchandise. Money is in demand and collections are fair, while the labor situation is easier.

QUEBEC'S FINANCES IN GOOD SHAPE

Province Shows a Respectable Surplus—Repayment of Large Loan

Total receipts	\$8,070,109
Ordinary expenses	7,022,796
Surplus	\$1,047,313
Extraordinary expenditure	363,883
Net surplus	\$ 683,430

The above shows at a glance the financial position of the province of Quebec. These figures were presented by Hon. P. S. G. Mackenzie, provincial treasurer, in his budget speech this week. Regarding the financial operations for the fiscal year 1913-14, he estimated the ordinary revenue at \$7,403,211, and the expenditure at \$7,046,642, which would leave an estimated surplus of \$356,569.

Mr. Mackenzie stated that there had been a reduction in revenue under the head of licenses owing to the spread of the temperance movement and the consequent refusal of many municipalities to allow licenses to be granted. Reference was made to the reduction of licenses in the city of Quebec and the amount of indemnity to be paid, which was estimated at \$111,000, but the said amount the government would recoup in the space of ten years. An announcement regarding a further increase in salaries for civil employees was made. The estimates under this head for the fiscal year 1913-1914 show the increase is \$40,451. The increased amount voted a year ago was \$39,251.

Municipalities' Good Roads

As has been expected, the Good Roads Act of last year has not worked so well as was desired. Not nearly so much money had been bargained for by the municipalities as had been anticipated. The amount of the loan issued at present was \$112,000 and a further sum of \$101,000 had been authorized. Reference was made to the declaration of the Prime Minister that the law would be amended by which the government would borrow the money direct, reserving the right to collect from the municipalities their share of the interest.

Repayment of Loan

Adverting to the repayment of the loan of 1882, the treasurer remarked that the fact that the province was able to pay off this large loan, bearing interest at 5 per cent., from the accumulated surpluses of the revenue, should be a subject of universal satisfaction. It was certainly the first time in the history of the province, since Confederation, that such a thing had been accomplished, and he believed that the province of Quebec stands unique in this respect as being the only province in the Confederation that had achieved such a creditable performance in its financial administration, and from his personal observation only recently in England, it was most satisfactory to learn that this transaction had been most favorably commented upon in the financial world, and the credit of the province had been greatly enhanced. Then, too, it was most fortunate that it was so able to pay off this loan without the necessity of reborrowing, as it would have been extremely difficult under the unfavorable conditions of the money market to have made a new issue at satisfactory terms at the particular time when it became due.

GRAIN SLIGHTLY LESS BUT BETTER

Official grain inspection figures of inspection at Winnipeg by the Government Inspector for the two months ended October 31st show a slight decline in quantity as compared with the inspection for the corresponding period last year. For the two months mentioned of the present year 34,594,575 bushels of wheat were inspected as compared with 34,624,675 bushels for the corresponding period last year.

The grade, however, shows a far superior quality this year than last. By carloads of 1,000 bushels each the following are the comparative figures:—

	Cars, 1911.	Cars, 1912.
No. 1 hard	4	112
No. 1 Northern	1,834	5,394
No. 2 Northern	8,028	11,491
No. 3 Northern	8,329	5,974
No. 4 Northern	3,907	914

The larger quantity of the superior grade is a feature of the year's inspection. Nearly a million bushels more oats were inspected during the two months this year than last, the figure being 6,805,806 bushels as compared with 5,948,900 bushels.

Of barley 1,670,000 bushels were inspected this year as compared with 408,000 last.

LARGE ORDERS FOR RAILROAD ROLLING STOCK

This Year, the Three Big Roads Have Placed Orders for Over Forty Thousand Cars and Seven Hundred Locomotives—Question of Terminal Facilities

Western wheat and grain crop, bushels	483,000,000
Its estimated value, dollars	208,368,000
Railroad locomotives in commission	3,242
Freight cars in commission	111,544
New locomotives ordered for 1912	727
New freight cars ordered for 1912	43,164

A partial explanation of many Canadian problems is usually found in the fact that Canada is growing at a very rapid rate. That reason seems to apply to the relations of the railroad corporations and the Western crops. The prairie provinces are putting much new acreage under cultivation and are growing larger crops every year. The railroads have loaded every Canadian locomotive and car foundry company with orders for new equipment, orders which will keep them busy well into 1913. In addition, large orders have been placed with companies in the United States in order that the risk of congestion in the crop movement may be minimized. While the following notes deal particularly with facts and figures showing what the railroads are doing to cope with the situation, it is first necessary to glance at the large increases in crop production during the past few years. As was shown in a recent issue of *The Monetary Times*, the increase in Manitoba wheat area in the ten years since 1901 was 968,000 acres or 48 per cent.; in Saskatchewan, 4,235,000 acres, or 903 per cent.; in Alberta, 1,582,000 acres or 4,647 per cent.; and in the total wheat area of the Western provinces 6,784 acres or 269 per cent. The gain in the production in Manitoba since the same date has been 10,000,000 bushels, or 20 per cent.; in Saskatchewan, 86,000,000 bushels, or 781 per cent.; in Alberta, 35,286,000 bushels, or 4,117 per cent., in the total Western production 117,000,000 bushels, or 185 per cent. These are remarkable increases. If the increase in the Western wheat area in the past ten years has been 269 per cent. and the gain in production, 185 per cent., what will be the wheat area and production at the end of the next decade. A recent conservative estimate of *The Monetary Times* gave a wheat crop in 1920 in Western Canada of 513,000,000 bushels grown on 34,321,000 acres. This is after allowing for a greater cultivation of mixed farming and for increased railroad mileage. Wheat is not the only crop to be considered. Flax is becoming an important crop in Saskatchewan, and this and other crops all help to tax railroad facilities.

Growth of Railroad Mileage.

In 1847 there were only 16 miles of railroad in operation in Canada. Ten years later the mileage was 1,414; in 1887 this had increased to 12,184, and last year the mileage increased 7,200 or 34 per cent. Here is a table showing the growth of railway mileage in the three Western provinces during the past five years:—

	1907.	1908.	1909.	1910.	1911.
Manitoba	3,074	3,111	3,205	3,221	3,461
Saskatchewan ...	2,025	2,081	2,631	2,932	3,121
Alberta	1,323	1,323	1,321	1,488	1,494

The increase in Manitoba in the five years' period was 392 miles or 12.4 per cent.; in Saskatchewan, 1,096 miles or 54.1 per cent., and in Alberta, 171 miles or 12.8 per cent. It must be remembered that active railroad construction has been carried this year in Saskatchewan and Alberta which will likely be the case for many years to come. Every mile of railroad in a good agricultural country opens up that country to settlement and consequently increases the agricultural freight.

Crop Movement Well Started.

The crop movement of the current year has had an excellent start, weather conditions having been favorable. Sir William Mackenzie, who returned from a trip in Western Canada last week, stated that there was no sign of freight congestion in the West at present. "More than fifty per cent. of the wheat of the Canadian West," he added, "is now threshed and, although there is still a percentage of it standing in stocks in the fields, as far as the threshing of the harvest is concerned, this problem has apparently been met. I saw no sign of freight congestion, but on the contrary the country elevators seemed to have the grain situation well in hand, and from present indications they will be able to handle it all right."

The *Monetary Times* has obtained figures from the three largest railroads, and those mostly interested in the Western crop movement, showing the equipment ordered during the

current year. Much of it has been and will be delivered in 1912. The figures may be summarized as follows:—

	Canadian Pacific Railway.	Grand Trunk Railway.	Canadian Northern Railway.
Engines or cars ordered, 1912.			
Locomotives	473	140	114
Passenger	415	...	150
Freight	29,442	7,650	6,072
Miscellaneous	194	...	...
Total	30,524	7,790	6,336

Large Orders This year.

The three large railroads, therefore, have placed orders this year for no less than 43,164 freight cars and 727 locomotives. For the benefit of those who have a still more intimate interest in this subject, further details of this new equipment are given below. Here is a statement to mid-October of rolling stock ordered by the Canadian Pacific Railway and delivered. Some orders which were given in 1911 are shown. This has been done because delivery was not made on these cars until 1912. If one takes the number shown as ordered in 1911 from that delivered in 1912, one will arrive at the number delivered on 1912 orders.

	Where Built	Number Ordered 1911	Number Ordered 1912	Number Delivered 1912
Locomotives	Angus Shops Purchased	32 14	140 333	84 117
Passenger Equip.	Angus Purchased	195 10	302 113	216 10
Freight Equip.	Angus Purchased	481 4563	6038 23404	3195 8125
M'tee Of Way	Angus Purchased	15 —	30 78	18 49
Miscel. Cars	Angus Purchased	— 90	44 44	4 134
TOTAL	Angus Purchased	723 4697	6554 23970	3517 8435
GRAND TOTAL		5420	30524	11952

Grand Trunk and Grand Trunk Pacific.

Below are the figures, of the Grand Trunk and the Grand Trunk Pacific Railways, relating to orders given during the current year:—

For Grand Trunk Railway System		For Grand Trunk Pacific Railway	
Cars	Locomotives	Cars	Locomotives
5000 Box	60 Pacific	300 Flat	40 Consolidated
1000 Hopper Coal	15 Switchers	300 Dump	
500 Automobile	25 M'kados		
500 Refrigerator			
50 Tank			

Of the above orders there were in mid-October 3,400 box cars for the Grand Trunk still to be delivered and about 200 automobile and refrigerator cars. The locomotives were to be delivered in September, but the manufacturers were unable to make delivery for several weeks later. For the Grand Trunk Pacific all of the cars have been delivered and are now in service, and 25 of the engines have also been delivered. In addition to the above the Grand Trunk purchased for the Central Vermont Railway 1,000 box cars and 200 hopper coal cars.

Canadian Northern's Equipment.

The equipment orders placed by the Canadian Northern Railway for delivery during 1912, are as follow:—

Passenger equipment:—79 day coaches, 17 sleeping cars, 4 dining cars, 6 cafe-parlor, 33 baggage cars, 11 combination cars, total, 150.

Freight equipment:—4,200 box cars, 1,100 flat cars, 660 hopper cars, 15 ore cars, 10 tank cars, 70 conductor's vans, 7 snow plows, total 6,072.

Locomotive equipment:—113 locomotives, 1 gas-electric, (for suburban service), total 114.

In addition to these, the Dominion Government since July 1st has let contracts for 1,321 box and other cars, including several hundred steel box cars of 60,000 pounds capacity. In addition, the government has ordered 10 engines, of which a number are of the heavy type. This equip-

ment is for the Intercolonial Railway. During the past few years the Canadian Northern has purchased \$40,000,000 worth of new equipment. The outstanding orders of the Canadian Pacific Railway to be delivered before the end of 1912, aggregate \$30,000,000.

Figures received by The Monetary Times from some of the Canadian locomotive and car companies may be summarized as follows:—

Company.	Orders Received.	
	Cars.	Locomotives.
National Steel Car Company, Hamilton ..	1,500	...
Nova Scotia Car Works	2,373	...
	3,873	
Montreal Locomotive Works		425
Canadian Locomotive Company		90
		515

Some large orders were placed with United States companies.

Locomotive Companies are Busy.

The following is a list of locomotives manufactured by the Canadian Locomotive Company, Limited, of Kingston, since its organization in June, 1911:—

No.	Type.	For
20	Consolidations	Canadian Pacific.
4	Switchers	Intercolonial.
5	Pacific's	Intercolonial.
3	Ten-wheelers	Intercolonial.
15	Switchers	Canadian Northern.
5	Ten-wheelers	Algoma Central.
5	Consolidations	Intercolonial.
4	Consolidations	Temiskaming & Northern Ontario.
2	Ten-wheelers	Quebec Central.
4	Switchers	Intercolonial.
25	Consolidations	Canadian Northern.
2	Moguls	Quebec Central.

Orders received during 1912 by the Montreal Locomotive Works, Limited, were as follows:—

No.	Type.	For
108	Ten-wheelers	Canadian Pacific.
60	Consolidations	Canadian Pacific.
30	Mikadoes	Canadian Pacific.
75	Pacific's	Canadian Pacific.
41	Pacific's	Grand Trunk.
25	Consolidations	Grand Trunk Pacific.
4	Pacific's	Canadian Northern.
60	Ten-wheelers	Canadian Northern.
5	Consolidations	Intercolonial.
17	Miscellaneous	Intercolonial.

Nova Scotia Car Works.

The Nova Scotia Car Works, Limited, of Halifax, have received the following orders for cars during the current year:—

No.	Cars.	For.
1,000	Wooden box	Canadian Northern.
200	Steel underframe stone	Canadian Pacific.
500	Steel frame box ..	Canadian Pacific.
623	Steel frame box ..	Intercolonial.
50	Wooden box	Intercolonial.

These will all be manufactured and delivered this year with the exception of the 500 steel frame box cars for the Canadian Pacific Railway. The company have also manufactured for the Intercolonial Railway and delivered the following orders which were received during the year 1911:—

No.	Cars.
2	Postal.
50	Steel underframe platform.
2	Stock.
50	Wooden platform.

The National Steel Car Company, Limited, of Hamilton, received an order from the Canadian Pacific Railway for 1,500 box cars.

Information gathered by The Monetary Times shows that there were about 20,000 more cars available in mid-October this year than at the same time last year and about 400 more locomotives. From the equipment viewpoint, therefore, the railroads appear to be doing everything that is possible.

Mr. James J. Hill has frequently stated that the inadequacy of present terminal facilities is a much more serious problem for railroads of this continent to meet than a shortage in freight car equipment. Mr. Hill holds that the inability of railroads to find room for cars at terminal points and the

congestion that arises from the crowding of the cars into insufficient yard room have much more to do with the question of handling tonnage promptly in times of heavy traffic than the actual number of freight cars that are available.

In discussing the present demands for cars and the suggestions of the Interstate Commerce Commission for better service, Mr. Hill pointed out that the average day's work of a freight car is two hours. The rest of the time, the car is on sidings or awaiting loading or unloading at terminal points. "Suppose," said Mr. Hill, "that factories had the use of their main plant for only two hours of every day. It is not hard to imagine what would happen." He said that under the present working conditions an increase in the speed of freight trains would not have much effect in alleviating the difficulties.

As to Per Diem Rate.

As to per diem rate, Mr. Hill thinks that a charge of 75 cents a day would be more equitable than the rate of 45 cents a day which goes into effect on January 1. He pointed out that some roads were utterly unable on account of their low credit, to raise money for new equipment and that as a consequence they were forced to depend upon the equipment of their stronger neighbors in times of traffic stress.

As an example of the terminal room needed, Mr. Hill said that 40,000 cars in a terminal center would take up about 300 miles of track. This amount of trackage would be required without allowing for the necessary room for moving switching engines about and transferring cars from one part of the yard to another.

Mr. Hill said that at the present on Great Northern, the average time cars were in terminals was 6½ days. In that time a car would be moved 500 miles out into the country, loaded with grain or other commodities and hauled back again to the terminal. This Mr. Hill gave as an illustration of the time now necessarily lost by railroads, when equipment was practically idle and not doing the work for which it was built.

Summing up Mr. Hill said that as a matter of fact the railroads had outgrown their capitalization, which averages for the country \$60,000 per mile. Their plant is insufficient for the amount of business required now and the basis of their capitalization is too low to furnish facilities demanded by the ever expanding trade of the nation.

Men and Material Hard to Get.

Mr. George Bury, western vice-president of the Canadian Pacific Railroad, has said that it is natural for a man who cannot get his grain shipped at once, or who finds his car making slow time in transit, to assume that there is a shortage of cars or locomotives. "As far as the Canadian Pacific is concerned," he added, "we have had at all times during the grain movement of the past season all the cars and locomotives we had trackage to accommodate. Any congestion which has occurred has been due to lack of terminal room and of second tracks.

"It may be asked why the terminal space and the second tracks were not available. Speaking of the Canadian Pacific, I would say that during the past eight years we have had every year more money allotted for improvements than we could expend. The men and the material were not available to complete them, although the work was prosecuted with the utmost vigor. During the last eight years we have enlarged and remodelled every terminal on our line from Fort William to Vancouver."

The Canadian railways will have expended at the close of this season about \$4,000,000 on improvements and enlargements. The Grand Trunk Railway are doing much in this direction in Eastern Canada. The yards at Turcotte, Point St. Charles and St. Lambert, are being very much extended. Extensions are also being made in Toronto and Hamilton as well as other points. These improvements are to a more or less extent still under way so that complaints of delays in terminals are still prominent.

LARGE PROFITS OF BANK OF MONTREAL

The profits of the Bank of Montreal for the year ended October 31st, 1912, after deducting charges of management, and making full provision for all bad and doubtful debts, amounted to \$2,518,408, compared with \$2,276,518 in 1911. The balance of profit and loss carried forward is \$802,814, compared with \$1,855,185 in 1911. The decrease in this total is accounted for by the fact that this year one million dollars was credited to reserve account, and another one million dollars was credited to contingent account, two features considerably strengthening the bank's position. The amount expended on bank premises was \$511,000. A total of \$1,894,101 was paid out in dividends and bonuses. The capital stock is now sixteen million dollars, as is the rest account. The assets total \$236,927,519, as compared with \$229,920,420 in 1911.

PERSONAL NOTES

Mr. Sheldon R. Joyce has been appointed district agent for the Imperial Life at Belleville.

Mr. John F. L. Bain has been appointed manager of the Home Bank of Canada branch at Walkerville, Ont.

Mr. G. T. Somers, president, Toronto board of trade, is expected home from the visit to England on Monday.

Mr. E. A. Cheadle, formerly acting manager at Walkerville, has returned to the head office of the Home Bank at Toronto.

Messrs. Parkes, McVittie and Shaw have been appointed general agents of the Westchester Fire Insurance Company of New York.

Mr. Theodore Mounier, managing director of the British Colonial Fire Insurance Company, has returned from an extensive trip throughout the West.

Mr. Leslie A. Wyse, who for some years has been connected with Messrs. Thornton, Davidson and Company, Montreal, has now been admitted in partnership.

Mr. F. H. Anson will be vice-president and managing director of the new Sugar Refinery Company, which the McGibbon interests have organized at St. John, N.B.

Mr. R. H. Court, manager, Dominion Trust Company, Limited, London, is in Montreal. Mr. A. S. Birchall, Montreal manager of the company, is in Quebec on business.

Mr. A. R. Howell, Canadian manager of the Gresham Life Assurance Society, Limited, is visiting the Western agencies of the society, and will be away until December 1st.

Mr. Owen D. Jones has been appointed fire manager of the North British and Mercantile Insurance Company in Edinburgh, in the place of Mr. James Chatham, who has resigned.

Mr. W. Moore has been appointed district agent at Brantford for the Imperial Life Assurance Company, replacing Mr. C. H. Emerson, who has been appointed as Brantford's industrial commissioner.

Mr. W. E. Stavert, of Montreal, was elected president and general manager of the Alaska Northern Railway, to succeed Mr. O. G. Labert, resigned, at the annual meeting of the company held at Seattle.

Mr. Samuel Rea, the newly elected president of the Pennsylvania Railroad Company, has been for a number of years, director on the board of the Guarantee Company of North America's directorate in Philadelphia.

Mr. Walker, who has been inspector for the Hudson Bay Insurance Company since it entered Ontario, has been appointed branch manager for the province to succeed Mr. Fleming, who has left the company's service.

Mr. W. Wallace, general manager of the Crown Life Insurance Company, has returned from an extended trip to the West. While there he made the following appointments:—Messrs. B. Foncher and J. Bridge were appointed city agents at Winnipeg. Mr. A. L. Vandrick, formerly with the Manufacturers' Life at Edmonton and Vancouver, was appointed provincial manager for Southern Saskatchewan, with headquarters at Regina. Mr. A. N. Jack, of Cumberland, B.C., was appointed city agent at Regina.

BANK CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Bank Clearing Houses for the weeks of November 23rd, 1911; November 14th, and November 21st, 1912, with percentage change:—

	Nov. 23, '11.	Nov. 14, '12.	Nov. 21, '12.	Ch'g %
Montreal ...	\$55,289,286	\$62,078,865	\$59,362,145	+ 7.3
Toronto	45,076,608	44,672,684	46,373,820	+ 2.8
Winnipeg ..	36,372,723	44,718,162	46,652,937	+ 28.2
Vancouver ..	11,845,637	13,448,324	14,264,689	+ 20.5
Ottawa	4,971,116	3,981,204	4,057,846	— 18.3
Calgary	5,253,616	6,533,312	6,203,067	+ 18.0
Quebec	2,925,381	3,631,048	3,455,861	+ 18.1

GLITTERING INSURANCE SCHEME AT COBALT

E. M. Carroll is Reported to Have Offered Citizens a Stock Mutual Company for Forty-five Thousand Dollars

That the citizens of Cobalt buy an insurance company and run their own insurance business, was the startling proposal made this week by Mr. E. M. Carroll, of Toronto, to the Cobalt board of trade. The citizens of that progressive mining town will certainly do well to consider every phase of such a serious and important matter. The dangers and folly of municipalities conducting a fire insurance business have previously been explained in these columns.

According to The Cobalt Nugget, Mr. Carroll told the board of trade that the control of a stock mutual company was in the market. The report continues:—

Had Got Into Difficulties.

"The company in question had got into difficulties and its control had been acquired by one of the larger fire insurance companies which had used the smaller company as a subsidiary finally re-insuring itself all the business of its subsidiary. The absorbing company had carried the stock of the subsidiary in its annual statement as an asset, a course that had been objected to by the government inspector of insurance, who had ordered that the asset be realized. The only method in which this could be done was by calling up the deposit placed with the government by the subsidiary company, in which case the company would lose its franchise to do business.

Rather Part with Control.

"The controlling company would rather part with the control and leave the smaller company in existence, and Mr. Carroll was authorized to treat in the matter and could guarantee the delivery of the stock on the payment of a purchase price of \$45,000. The stock would be placed with trustees and handed over to a syndicate of Cobalt business men on the payment of \$25,000 by the end of this year, and the balance of the payments by March 1st next year."

Even if the citizens are sufficiently unwise to admit the principle of municipal insurance,—and we think they are not,—there are other vital considerations to be borne in mind. The past record and the present condition of the company for sale, should be exhaustively investigated, for it might be cheaper for the citizens to save the \$45,000 and form a new company of their own,—that is if they are willing to assume on behalf of the municipality, the risks involved by such a step.

Carroll Was Fined.

Then it was only right that the citizens of Cobalt should know that against Mr. E. M. Carroll, who makes the proposal noted, to the board of trade, charges were made early this year in connection with the placing of fire insurance business in unlicensed companies. He was fined \$20 on eight counts, a total of \$160, and one, Ring, at the same time was fined \$20 on twelve counts, a total of \$240. Evidence was given that the two men had been negotiating with the Ontario Insurance Department with the object of complying with the regulations.

The capital stock of the Elder Ebano Asphalt Company, Limited, has been increased from \$40,000 to \$500,000.

SASKATCHEWAN'S INVESTMENTS AND INSURANCE PREMIUMS

Large Increase Noted During Recent Years—Loan Companies Have Big Amount Invested

The investments of loan, trust, life and fire insurance companies in Saskatchewan have increased at a remarkable rate during recent years. The following figures, sent to The Monetary Times by the provincial registrar of joint stock companies, gives an idea of the extent of these investments:—

	1906.	1911.
Loan companies	\$ 7,718,041	\$31,890,994
Trust companies	2,220,066	10,160,526
Life insurance companies	2,840,608	17,478,755
Fire insurance companies	64,256	2,113,960
Accident and general insurance companies		62,414
Total	\$12,842,972	\$61,706,652

The total investments of these companies in Saskatchewan six years ago were, therefore, less than \$13,000,000, while last year they had increased to more than \$61,000,000. The gain was \$48,863,680, or 39 per cent.

Insurance Premiums in Saskatchewan.

Taking the same years, it is found that insurance premiums in Saskatchewan in 1906 amounted to \$826,688, and last year to \$3,412,437. The following are the details:—

	1906.	1911.
Life insurance	\$367,117	\$1,178,951
Fire insurance	434,667	2,080,119
Accident and general insurance....	24,904	153,365
Total	\$826,688	\$3,412,437

Fire Premiums and Losses.

The premiums and losses of fire insurance companies in Saskatchewan in 1911 are tabulated by the provincial registrar as follows:—

Company.	Premiums. \$	Settled losses. \$	Un-settled losses. \$	Total losses. \$

Accident and Guarantee Premiums.

The premiums of accident and guarantee insurance in Saskatchewan were as follows in the years noted:—

1906	\$ 24,904
1907	33,024
1908	42,899
1909	54,245
1910	89,955
1911	153,365

Saskatchewan is rapidly becoming an important province from the viewpoints of insurance premiums and company investments.

BANQUE INTERNATIONALE CHARGES

The charges against certain officials of La Banque Internationale were recently heard by Judge Leet in private at Montreal. The Monetary Times understands that the matter is under advisement and it is not possible to say how soon judgment will be rendered.

An act known as Vancouver Harbor Commissioner's Act, drafted by Mr. H. H. Stevens, M.P., is to be presented by him at the next session of parliament. The act provides for the appointment of commissioners to constitute a corporation under the name of the Vancouver Harbor Board. It will consist of three commissioners, one of whom shall be appointed by the city council and the other two by the government. This board will have complete control of the harbor

CANADA'S HEAVY BORROWINGS

Canadians Give British Investors Adequate Reasons for the Dominion's Voracious Money Appetite

The question of Canada's borrowing is being discussed in London, and is doing much good, eliciting the fact that legitimate and necessary Canadian development cannot be carried on without considerable funds.

Mr. W. K. George and Mr. G. T. Somers, two well-known business and financial men of Toronto, have added to the discussion an interesting interview with a journal in London, which city these two Canadians are visiting. It appears to us, said these gentlemen, that the ultra-cautious feeling with regard to Canadian investments which exists at the present time in Great Britain has been brought about mainly by the extensive sales of sub-division town and city property and questionable industrials in England. We are sorry to say that, especially in so far as property offered on this side is concerned, in these respects, it is not Canadians but Englishmen who are for the most part the promoters. In the past two or three years, land many miles beyond the limits of Western cities has been acquired by companies formed in London, and after the property has been sub-divided, the lots have been sold in Great Britain at prices much in advance of their real value, if value of any kind they have. Apart from purely speculative business of this character, however, there are in Canada unlimited opportunities for sound and profitable investment.

Heavy Immigration a Factor.

So long as immigration continues at its present rate (about 1,000 souls per day)—and there is every likelihood of an increase;—so long as legitimate building operations proceed at such a remarkable pace; so long as municipalities have to lay down roads and sanitary systems adequate to the needs of their ever-growing communities, the demands for fresh capital will obviously be frequent and insistent. The English market, we fear, scarcely recognizes the enormous growth that is taking place in all parts of Canada. As an illustration, one has only to draw a comparison with the United States of America, where there is an influx annually of about one million people. There are at present emigrants entering Canada at the rate of approximately 400,000 per annum. The population of the United States is, roughly speaking, 90,000,000, whereas as yet Canada holds less than 8,000,000 people. If the United States were receiving new citizens in the same proportion of her population as Canada is to-day she would have an annual influx of, not 1,000,000, but 4,500,000 people.

Asked whether Canada would be prepared to pay a higher rate of interest in the future than in the past, Messrs. Somers and George replied that the question was one depending upon the law of supply and demand, and it might be assumed that Canada would accommodate herself to the conditions of the money markets of the world. "Perhaps English financiers have been over-generous with Canada in the past," they said, "with the result that some Canadian municipalities have been somewhat spoiled. The liberal treatment they have received at the hands of British financial men has possibly created an exaggerated view of their position in the market, and they have naturally supposed that Canadian securities would continue to be taken up at a comparatively low rate. On the other hand, however, it is quite certain that the legitimate demand for fresh capital will increase, and not decrease, as time goes on, for with the present wonderful progress of every form of industry in Canada, there can be no other alternative.

As to Industrial Development.

"An example of the way in which the country is being opened up to civilization is shown by the fact that on the three railroads in Western Canada—the Canadian Pacific Railway, the Grand Trunk Pacific, and Canadian Northern Railway—there is one new town located every day. Some of these towns will never be anything more than mere freight depots. Others, however, will grow to fair-sized centres of population, while a goodly percentage will eventually become important cities. But each and every town that develops beyond the initial stage will of necessity require capital for the provision of electric light and waterworks, sewerage, drainage, sidewalks, street-car lines, and other public utilities. Is it not far better to lend money for the development of these cities within the boundaries of the British Empire, rather than allow British capital to be used in assisting the development of foreign countries? There are many who think of Canada merely as an agricultural country, and who look upon the manufacturing industries as being in their infancy. It will come as a surprise to these people, perhaps, to learn that last year the total value of the output of Canadian factories amounted to the remarkable sum of \$1,162,000,000. We hear a good deal about the rapid expansion of the West, but it should be remembered that such cities as Montreal and Toronto are growing with even greater speed.

It must not be supposed that this expansion in the building industry is for instance speculative or transitory. On the contrary, the growth is simply the outcome of the normal increase of population which in Toronto alone has for the last 10 years average over 25,000 per annum. Moreover, it is believed that in 15 years' time Toronto will have a population of not less than one million people, while Montreal is looking for that figure in 12 years."

What do these figures suggest to the British investor? They suggest—and it cannot be emphasized too frequently—that the security which Canada offers is as sound as any within the whole British Empire, or, for that matter, anywhere in the wide world. Canada is marching with giant strides towards a splendid destiny. To quote the words of Earl Grey, our late Governor-General, nothing can prevent her becoming the heart and soul and rudder of the Empire. It only remains for the people of the motherland to secure their full share of the good things which are offered with such a lavish hand, before they fall into the hands of the foreign investor.

ROOT AND FODDER CROPS

Hay and Clover in Decreased Quantity—Other Crops Showed Gains

A decrease in both area and yield of the hay and clover crop is responsible for a decline during the current year of \$33,290,000 in the estimated value of the root and fodder crops of Canada. There were 426,000 acres less of hay and clover grown in 1912 than in 1911, giving a decreased yield of 2,000,000 and a lessened value of \$28,380,000. According to the official figures from Ottawa upon total areas for potatoes, turnips, mangolds, etc., hay and clover, alfalfa, fodder corn and sugar beets, amounting to 8,732,000 acres as compared with 9,160,000 acres last year, the total value of the products is \$192,500,000, compared with \$223,790,000, a decrease in value of \$33,290,000.

Other Crops have Increased.

All the other crops show increases, except alfalfa, the area of which in Canada is relatively small. The yield of potatoes is 81,343,000 bushels of the value of \$32,173,000, of turnips and other roots 87,505,000 bushels, value \$20,713,000, of fodder corn 2,858,900 tons, value \$13,529,000, of sugar beets 204,000 tons, value \$1,020,000 and of alfalfa 310,000 tons, value \$3,610,000. In quality all these crops are marked high, the standard percentage being about 87, excepting for turnips, etc., which are 93, and for fodder corn, which is 82. A word of caution is necessary with regard to potatoes, for while yield and quality are generally good at harvesting, there are numerous reports of rotting in the cellars, the produce of the heavier soils having been considerably affected by the constant rains.

Fall Wheat Area Less.

The area estimated to be sown in fall wheat in five provinces of Canada this season aggregates 1,086,000 acres, as compared with 1,156,900 acres, the area sown last year. This represents a net decrease of 70,100 acres, or six per cent. In Ontario the acreage sown is 696,000 acres, compared with 797,200 acres, a decrease of 101,200 acres, or 12.6 per cent.; in Alberta the figures are 312,000 acres as against 300,700, an increase of 11,300 acres, or three and three-quarters per cent.; and in Saskatchewan the area sown is 72,000 acres against 53,000 acres, an increase of 19,000 acres, or 36 per cent. Small areas in Manitoba and British Columbia complete the totals. The decrease in area is due to the persistent rains which have hindered plowing and sowing operations.

The condition of this crop on October 31 was 92.67 per cent. of the standard for the five provinces. It was above 90 in each province, except Manitoba, where the small area of about 4,000 acres had a per cent. condition of 88½.

Fall Plowing was Poor.

The percentage of fall plowing completed upon land intended for next year's crops ranges from 45 in Ontario to 77 in Prince Edward Island for the east and from 24 in Alberta to 38 in British Columbia for the West. It is remarkable that both this year and last year the seasons in the three north-west provinces have been adverse to fall plowing, and less than about 25 per cent. of such plowing has been possible in both years, as compared with a more normal percentage at the same date of from 30 to 75. In the three northwest provinces the area summer fallowed this year is estimated as being from two to five per cent. more than last year.

The associated boards of trade of Southern Alberta meet at Macleod on December 3rd.

The name of the Firstbrook Box Company, Limited, has been changed to Firstbrook Brothers, Limited.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Royal Bank.—The Royal Bank is calling for tenders for 1,399 shares of stock, partly allotments of the issue of last December, which were not taken up, and partly fractional shares to be sold under the provisions of the banking act.

Canadian Consolidated Felt Company.—The Canadian Consolidated Felt Company may make arrangements for the extension of the present plants at Berlin with a view of permitting the company to increase their output, owing to the increased market for the company's various products.

Dominion Power and Transmission Company.—This company's net earnings for the first eight months of the year were \$748,087, as compared with \$594,116 for the same period last year, or over 25 per cent. increase. After allowing for proportionate share of bond interest and preferred stock dividend, this leaves a surplus of \$345,794 against \$198,970 last year.

Canadian Pacific Railway.—The Canadian Pacific will make the issue of \$60,000,000 common stock, authorized at the special general meeting of the shareholders last month, early in the coming year. The new stock to the full amount authorized by the meeting will be offered to shareholders of record at 3 p.m. on Thursday, January 2nd next, the right to subscribe to expire on Thursday, February 13th. The issue is to be made, as forecasted, at \$175 a share.

Tucketts Tobacco, Limited.—The necessary papers in connection with the listing of the issues of Tucketts Tobacco, Limited, have been passed by the Montreal Stock Exchange committee and the preferred and common stocks of the company, which have been dealt in in the unlisted department since the organization of the new company in July. The listing consists of 25,000 shares of common stock and 20,000 shares of preferred stock.

Richellieu and Ontario Navigation Company.—It is stated in London that a scheme will shortly be submitted to the shareholders of the Richellieu and Ontario Navigation Company offering \$125 for common stock now paying 8 per cent. The late Lord Furness purchased 18,000 shares just before his death, giving an option to a well-known shipping group to acquire his shares. The same group have options on one or two small steamboat companies, which will give them a fleet of 175 vessels, constituting one of the largest steamship trusts known.

Mexican Light and Power Company.—The Mexican Light & Power Company, Limited, statement of combined earnings and expenses for the month of October, 1912:

	1911.	1912.	Increase.
Gross earnings	\$ 729,408	\$ 808,175	\$ 78,767
Net earnings	549,786	598,052	48,266
Aggregate gross from January 1st	6,755,861	7,324,596	568,735
Aggregate net earnings from January 1st	4,489,864	5,275,093	785,229

Mexico Tramways Company.—Mexico Tramways Company's statement of earnings and expenses from traffic only as advised by cable, for the month of October, 1912:

	1911.	1912.	Increase.
Total gross earnings	\$ 543,751	\$ 586,273	\$ 42,522
Operating expenses	266,326	270,519	4,193
Net earnings	277,425	315,754	38,329
Aggregate gross from January 1st	5,089,920	5,594,705	504,785
Aggregate operating expenses from January 1st	2,466,705	2,649,835	183,130
Aggregate net earnings from January 1st	2,623,215	2,944,870	321,655

Soyer "Kookera" Bag, Limited.—A directors' meeting of the Soyer "Kookera" Bag, Limited, was recently held, when the report of Mr. E. H. Bradley, the managing director, who has been on tour with Mr. Nicholas Soyer, the inventor of the system of the paper bag cooking, was present. It was decided that the managing director proceed to New York to complete negotiations for the sale of the American rights in the registered trade marks and patents of the company. An agreement made between the company, in which Messrs. S. J. Carter & Company are appointed distributing agents for a certain territory in the province of Quebec and the Eastern Ontario townships, was ratified. It was decided to place \$20,000 value of the treasury stock of the company on the market. This extra capital will provide for further development of the business in Western Canada.

International Engineering Works, Limited.—The International Engineering Works, Limited, the company recently organized by Corporation Agencies to take over the properties of the Robb Engineering Company, which defaulted its bond interest, has completed its preliminary organization and preference shares will be soon sent to the holders of the old bonds who have handed them in for exchange on the basis proposed. The plants of the Robb Company at South Framingham, Mass., and Amherst, N.S., have been purchased and all the bondholders have been given a chance to turn in their bonds on the basis announced at that time. The capitalization of the new company is \$400,000 preference and \$1,100,000 common stock. There is \$1,000,000 of this \$1,500,000 outstanding. The International Engineering Works is operating under a Dominion charter. It also secured provincial licenses to carry on business in Alberta, Manitoba, British Columbia, Nova Scotia, Ontario and the State of Massachusetts. Both plants of the company are working at full capacity and several large contracts have been secured.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

North Bay, Ont.—North Bay electors carried the hydro-electric by-law.

Beaverton, Ont.—The electors voted in favor of asking the Hydro-Electric Commission to supply power to the municipality.

Barton Township, Ont.—Until December 7th for \$32,300 4½ per cent. 20-year bonds. A. G. E. Bryant, clerk, Mount Hamilton P.O.

Nokomis, Sask.—Until November 30th for \$5,000 rink, and \$5,000 street debentures; interest 6%; maturing in 20 years. N. A. Armour, secretary-treasurer.

Kingston, Ont.—A by-law will be submitted to the electors to issue debentures for the purchasing of a combination hose and chemical motor car for fire department.

Steeltown, Ont.—Until December 3rd for \$7,000 school, \$9,000 park, and \$15,500 pavement debentures. J. Robinson, clerk. (Official advertisement appears on another page.)

Athabasca Landing, Alta.—Until November 25th for \$80,000 5½ per cent. 25-year waterworks debentures. C. E. Nancekivell, secretary-treasurer. (Official advertisement appears on another page.)

Bridgeburg, Ont.—Until December 2nd for \$13,582.20 10-year 5 per cent. local improvement sewer, and \$28,010 30-year 5 per cent. sewer debentures. R. A. Land, clerk. (Official advertisement appears on another page.)

Collingwood, Ont.—Until December 4th for \$7,000 4½ per cent. 30-year; and \$30,000 20-year 5 per cent. hydro-electric power debentures. A. D. Knight, town treasurer. (Official advertisement appears on another page.)

Outlook, Sask.—Up to November 25th for local improvement debentures (cement sidewalks), \$31,000, 5 per cent., 20 years, and \$15,000 electric light debentures, 5 per cent., 30 years. Albert Moore, secretary-treasurer, Outlook.

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C.

Edmonton, Alta.—The Edmonton city council has decided to submit a by-law authorizing a grant of \$240,000 to the Misericordia Hospital, to enable that institution to enlarge its accommodation to meet the increasing demands upon it with the city's rapid growth.

Rosthern, Sask.—The council decided that the town solicitor should prepare a bill asking the provincial government to authorize the town of Rosthern to issue debentures for any sum not in excess of \$250,000 for the installing of waterworks, sewage and electric light.

Vancouver, B.C.—The money by-laws which are likely to be proposed to the council next meeting will probably include \$102,000 for the Carrall Street overhead bridge; \$36,000 for the pedestrian ferry subway; and \$95,250 for the East End Viaducts, the latter made up as follows:—Hastings Street, \$20,860; Keefer Street, \$21,570; Harris Street, \$22,420; and Pender Street, \$21,400.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

- Clinton, Ont.**—November 10.—Motor Car Works. Loss and cause unknown.
- Calgary, Alta.**—November 14.—Merchants Bank. Loss \$1,000. Cause unknown.
- Augusta, Ont.**—November 15.—Mr. C. B. Murray's barn. Loss and cause unknown.
- Ancaster, Ont.**—November 17.—Mr. Allan's evaporator. Loss and cause unknown.
- Miberta, Ont.**—November 12.—Mr. Hubbard's residence. Loss and cause unknown.
- Weyburn, Sask.**—November 12.—Dr. Mitchell's residence. Loss and cause unknown.
- Argyle, Alta.**—November 8.—Mr. O. A. Frazier's residence. Loss and cause unknown.
- Goderich, Ont.**—November 17.—Mr. D. Brown's store. Loss \$3,500. Cause, defective stove.
- Markdale, Ont.**—November 9.—Mr. R. Gibson's residence. Loss and cause unknown.
- Harriston, Ont.**—November 19.—Mr. E. Walker's grocery store. Loss slight. Cause, gasoline.
- Aurora, Ont.**—November 13.—Mr. M. Wilton's barn. Loss unknown. Cause, upset lantern.
- Spanish, Ont.**—November 14.—Two stores, hotel stable, etc. Loss \$18,000. Cause unknown.
- Orillia, Ont.**—November 11.—Messrs. Walker Brothers' garage. Loss \$700. Cause unknown.
- Adanao, Sask.**—November 12.—Messrs. Bowman and Neills' store. Loss and cause unknown.
- Windthorst, Sask.**—November 8.—Roman Catholic vestry and contents. Loss and cause unknown.
- Swift Current, Sask.**—November 8.—Western Coal Company's offices. Loss and cause unknown.
- Blenfuit, Sask.**—November 8.—Mr. E. L. Matte's store. Loss \$700. Cause, overheated coal oil stove.
- St. Stephen, N.B.**—November 10.—Messrs. E. S. Martin & Son, Water Street. Loss and cause unknown.
- Cananogue, Ont.**—November 13.—Spring and Axle Company's works. Loss slight. Cause, oil ignited.
- Streetsville, Ont.**—November 2.—Mrs. Harrigan's stable. Loss \$1,000, partially insured. Cause unknown.
- Junetown, Ont.**—November 15.—Messrs. W. H. and J. B. Ferguson's residence. Loss and cause unknown.
- Carleton Place, Ont.**—November 12.—Boyd Caldwell Company's bleaching room. Loss and cause unknown.
- Port Hope, Ont.**—November 14.—Royal Hotel, owned by Mr. C. Perry. Loss \$300. Insured. Cause unknown.
- North Sydney, N.S.**—November 14.—St. Joseph's Convent. Loss unknown. Cause, sparks from chimney.
- Estevan, Sask.**—Cooking car on Mr. H. Nicholson's, 10 miles south-west of town. Loss \$250. Cause unknown.
- Coleman, Alta.**—November 14.—International Coal and Coke Company's machine shop. Loss \$40,000. Cause unknown.
- Quill Lake, Alta.**—November 4.—Mr. F. Gardiner, farmhouse, etc. Loss unknown. Building insured. Cause unknown.
- Quebec, Que.**—November 18.—Messrs. Gale Brothers' shoe factory, St. Valier Street. Loss \$30,000. Cause unknown.
- East Trenton, Ont.**—November 9.—Mr. A. Williams' and C. Weaver's barns. Loss unknown. Cause, supposed incendiary.
- St. John, N.B.**—November 15.—Mrs. Alex. Corbett's residence, corner Barker and Somerset Streets. Loss and cause unknown.
- Portage la Prairie.**—November 14.—Western Radiators Company's building, Tupper Street North. Loss and cause unknown.
- Woodstock, Ont.**—November 19.—Mrs. J. A. Thompson's rooms, Dundas Street. Loss \$50. Cause, probably smoldering charcoal.
- Hawkesbury, Ont.**—November 12.—Riordan Pulp & Paper Company's storehouse. Loss unknown. Cause, spontaneous combustion.
- Oshawa, Ont.**—November 14.—Mr. Ray's residence. Loss unknown. \$105 in bills destroyed. No insurance. Cause, lamp explosion.
- Edmonton, Alta.**—November 11.—Mr. F. Boyle's residence, 1245 Kinistino Avenue. Loss unknown. Cause, lighting fire with coal oil.
- Vancouver, B.C.**—November 14.—Mr. N. Nelson's store, 513 Georgia Street. Loss unknown. Cause, stove supposed to have ignited furniture.
- Lindsay, Ont.**—November 13.—Motor launch "Elma." owned by Mr. H. Hammond. Loss \$150. Cause, lighted match ignited gasoline.
- North Bay, Ont.**—November 14.—North Bay Planing Mills' stables, four horses were suffocated. Loss and horses \$1,000, building \$500. Cause unknown.
- Covan, Sask.**—Bretthamer Farm separator and granary and contents, owned by Messrs. A. W. Lauder, J. Lewis, and L. H. Cumming. Loss and cause unknown.
- Windsor, Ont.**—November 11.—Nakoor's fruit store, Sandwich and Goyeau Streets. Loss slight. Cause, pile of rubbish; 81 Arthur Street. Loss \$50. Cause unknown.
- Halifax, N.S.**—November 12.—15 Louisburg Street. Loss unknown. Cause, children playing with matches; north-west corner Buckingham and Grafton Street. Loss and cause unknown.
- Port Arthur, Ont.**—264 Wolseley Street. Loss slight. Cause, defective chimney.
- November 16.—419, 421, 423, 425 First Avenue. Loss \$3,500. Cause unknown.
- Brandon, Man.**—November 12.—Canadian Pacific Railway roundhouse. Loss slight. Cause unknown.
- November 13.—Laundry, Princess Avenue, near 11th Street. Loss and cause unknown.
- Truro, N.S.**—Barn owned by Captain Bentley. Loss \$900. No insurance. Cause unknown. Mr. A. McCollum's barn. Loss \$10. Insured with Scottish Union; house \$30. Insured with Springfield. Cause unknown.
- Sault Ste. Marie, Ont.**—November 20.—Superior Oil Company's warehouse, Gore Street. Loss, Oil Company \$12,000, Northern Building Material and Iron Company \$800, Algoma Iron Works \$10,000. Cause unknown.
- Peterboro, Ont.**—November 16.—King George Hotel, Simcoe Street. Loss slight. Cause, spark from furnace.
- November 19.—Peterboro Examiner's office. Loss slight. Cause, lighted cigar stub or match.
- Hamilton, Ont.**—November 15.—Oliver Plow Works. Loss slight. Cause, spontaneous combustion.
- November 16.—Grand Trunk Railway shanty, Stuart Street yard. Loss \$100. Cause unknown.
- Ottawa, Ont.**—November 13.—Mr. J. Fluker's store, 825 Bank Street. Loss \$1,500. Cause, hot ashes.
- November 18.—"Le Temps" newspaper office. Loss \$5,000, covered by insurance. Cause, overheated metal.
- Winnipeg, Man.**—November 11.—Bradford Street, St. James. Loss \$100. Cause, overheated stove pipe.
- November 15.—Baptist Church, corner Broadway and Walnut Street. Loss \$100. Cause, overheated furnace.
- Brookville, Ont.**—November 15.—Mr. C. N. Murray's barns and stables, on the townline between Augusta and Elizabethtown. Loss \$3,000. Insurance \$900. Cause, supposed spontaneous combustion.
- Fort William, Ont.**—November 15.—Mr. W. C. Mitchell's residence, 269 Francis Street. Loss, building \$50, contents \$100. Fully insured. Cause, burning rubbish in yard.
- November 16.—Mr. H. Kajola's residence. Loss, building \$150, contents \$50. Cause, kindling wood against stove ignited.
- Montreal, Que.**—November 13.—Consumers' Cordage Company's premises, 285 St. Patrick Street. Loss unknown. Cause, boys playing with matches; 3327 St. Andre Street. Loss unknown. Cause, hall stove close to wall.
- November 19.—Rear 215 St. Lawrence Street, Mr. L. Adlestine's shed. Loss and cause unknown.
- Kingston, Ont.**—November 19.—Montreal Transportation Company's building. Loss \$600. Cause probably sparks.
- November 17.—Mrs. Miller's residence. Loss \$5. Cause sparks.
- November 20.—Mrs. Jerrol's residence. Loss \$50. Insured with Anglo-American. Cause, children playing with matches.
- Toronto, Ont.**—November 12.—Toronto Slipper Company. Loss \$537. Insured with Royal and North British and Mercantile Companies. Insurance adjusted by Messrs. Ross and Wright, Toronto.
- November 13.—National Sporting Company, 343 Yonge Street. Loss \$425. Fully insured. Adjusted by Ross and Wright, Toronto; 1910 Dundas Street. Loss \$20. Cause, overheated furnace.
- November 13.—1910 Dundas Street. Loss slight. Cause, defective furnace.
- November 14.—90 Pearson Avenue. Loss unknown. Cause, gas stove set clothing alight; 357 Queen Street East. Loss \$45. Cause, gas stove; 357 Queen Street East. Loss, building \$20, contents \$25.
- November 17.—Mrs. Lewsfield, 84 Gerrard Street West. Loss \$200. Cause, defective furnace pipes.
- November 18.—Messrs. H. A. Wilson, sporting goods establishment, 207-09 Yonge Street; this firm's fourth fire. Loss \$50,000. Cause unknown.
- November 18.—Central Neighborhood House, Gerrard Street West and La Plante Avenue. Loss unknown. Cause, overheated furnace pipes.
- 301 Clarend Avenue. Loss and cause unknown.

BANKING, RAILROADING AND MINING

Various Activities in Canada's Pacific Coast Province
—Mining Returns

(Staff Correspondence.)

Vancouver, November 18th.

Discussing conditions with The Monetary Times, a business man complained that banking institutions should be more disposed to help worthy enterprises by advancing money for legitimate purposes. He argued that in hardly any country has the ordinary business man sufficient capital of his own, and if he sees his way clear to pay off his borrowings, he should be assisted by the bank. He mentioned two instances which occurred lately in Vancouver. A manager of a steamship company asked a bank for a loan of \$6,000. Security was a good steamer, valued at \$30,000 and an insurance policy in a standard company of \$10,000. Two banks refused this request, and the matter was dropped. The intention was to enlarge the fleet, which was doing good business, an expansion was thereby prevented.

The other instance concerned steamboats also. In this case the amount was a little larger, but the security was more than one unencumbered vessel. Request was made at the bank where the company did business, and the matter was stood over until the following day, so that it could be taken up with the head office in the east. Next morning the loan was refused. The would-be borrower then said he would withdraw his account immediately, and, as this was a fairly large sum, the manager of the bank relented and advanced the money.

In cases such as these, where the money is needed for expansion purposes and where good security is offered, it was contended that banks should give favorable consideration. On the other hand, there are always two sides to a story.

Agreements, Work, etc., of Railways.

It was stated in the city this week that the Grand Trunk Pacific was in the market for canneries, something along the same line as the principals of the Canadian Northern.

Vancouver aldermen are beginning to wonder if Sir William Mackenzie and Sir Donald Mann have failed to confirm the agreement entered into with the city by Colonel A. D. Davidson. Since the Colonel went east some time ago nothing more has been heard of the matter. The agreement was to be submitted to the people in advance of the municipal elections, but there will be no time now.

The Canadian Pacific Railway has big works on its hands. It will erect a large office building in Victoria for its own accommodation. In Vancouver, it is stated that the Canadian Pacific Railway is calling in on its wharfage. Mr. R. V. Winch has about 100 feet of Canadian Pacific Railway wharf frontage, while the Union Steamship Company has another section immediately east of that. Notice has been given Mr. Winch that the Canadian Pacific Railway will want the piece he occupies, and it is thought it is only a matter of time before the Canadian Pacific Railway will want all it holds. The railway company now occupies wharves equal to the frontage of nine city blocks, and this does not take into account a jetty several hundred feet long.

Mining Notes Are Bright.

Good mining news continues to come along regularly. It is announced from Spokane this week that the Standard mine at Silverton, B.C., controlled by Spokane capital, has declared a dividend of \$30,000 for the past month, maintaining its record. On the coast, the Britannia Company, operating on Howe Sound, has acquired several groups of claims adjoining its properties for a figure approximating \$400,000. The Hedley Gold Mining Company, which has made a record for gold mining in the Similkameen with the Nickel Plate, has completed its \$150,000 bond on the Windfall group, in the same locality. Deals such as these show how the big companies are branching out. Their success will in time attract more capital, which is needed to develop the mining propositions in the province.

Capital Is Interested.

Court Councillor Horst Weber, editor of The Zietung, an illustrated weekly of Leipsic, Germany, who was through the West two weeks ago, was so favorably impressed that he will bring a party of one hundred or more business men to Canada next year, that they may see the great resources of the Dominion. While on the coast he made some personal investments.

The Pacific North-West and the Western Union Fire Insurance Companies have amalgamated. The former is controlled by Vancouver and Eastern Canadian people, while the latter had its offices in Seattle.

An important purchase this week was that of the Credit Foncier Company through their local manager, Mr. A. C. Stirrett. They secured a good corner on Hastings Street West, and it is proposed to erect a modern six-story steel and concrete office building.

ONTARIO LIVE STOCK

They Are in Good Condition for the Coming Winter
—Outlook Promising for Fodder Supplies

Summer and fall pastures were never better in Ontario, the frequent rains keeping the grass green and fresh. All classes of live stock are reported to be in good condition for entering the winter; and to add to the cheerfulness of the live stock outlook it may be said that all classes are reported to be remarkably free from disease. Cattle for beef are comparatively scarce, but those offering are of fair quality as a rule. Cows for the dairy are also in brisk demand. Sheep are not so plentiful as they ought to be, but are said to be in fine condition notwithstanding the unusually wet season. Hogs are being continually marketed at good prices, but there were not sufficient to meet the demand, and some are said to be disposed of in a rather unfinished condition. Silos for corn are steadily increasing in number, and are strongly recommended by those who have them.

As to Dairying.

Unusually green pastures have prevailed this season, and the flow of milk this fall has been larger than usual, although not in proportion to the appearance of the fields, as, owing to frequent rains the grass was more watery or soft than ordinarily. With high prices for cheese and butter, particularly the latter, dairymen have had a good year, and as one correspondent phrases it, "Will break the record for fall supply." More cream is being shipped to towns and cities than ever before.

It is several years since the outlook for fodder supplies was so generally promising in Ontario. A good hay crop, such as that realized this season, is the basis of successful winter handling of live stock, and added to this there has been a fair yield of roots. While corn and straw have not been up to the standard in quality, there is enough of these and other roughage to ensure reasonably cheap feeding. While much of this year's grain is inferior in quality it will have a fair feeding value. For these reasons, and on account of more alfalfa being fed, less mill feeds will be purchased, which means much to farmers, with bran costing from \$22 to \$25 a ton, and shorts from \$26 to \$30. The excellent fall pastures have also contributed to lightening the task of winter feeding in the stables. In most localities an increase in market prices would still coax out a fair supply of hay and grain, although most farmers prefer to feed all their supplies.

Poultry and Eggs.

Reports concerning poultry are on the whole favorable. High prices for both eggs and flesh have encouraged many farmers to give more intelligent care to this branch of the farming industry. The very wet season, however, was somewhat trying to all classes of poultry, excepting ducks, turkeys being most affected. A few complaints were also made that hens fell off in their laying sooner than usual this fall. Poultry profits, as estimated by correspondents, range all the way from 150 per cent. to zero.

GOOD TAXPAYERS AT VICTORIA

The following figures show the increase of property in the city of Victoria, and the fact that almost the entire taxes on real property in the city, were paid by October 31st of the current year.

Total Assessment of Land for the past 3 years.

Year.	Land.	Improvements.	Total.
1910	\$26,288,892	\$11,602,130	\$37,990,990
1911	46,516,205	13,491,780	60,007,985
1912	71,670,770	17,071,360	88,742,130

Total taxes due for 1912 are \$1,496,536.97 and this amount includes \$78,363.25 taxes in arrear for 1910-1911. Of this, no less than \$1,361,198.27 was paid before October 31st, leaving only the small balance of \$135,338.70 still to be paid.

The amount of taxes paid in the city of Victoria is about 92 per cent. of the total amount due.

The McBride theatre contract has been let at Victoria and will cost \$250,000. The Royal Bank of Canada has bought an additional site for a branch office on the N.E. corner of Fort and Cook Streets for \$75,000. The Bank of Montreal is extending its present building.

Messrs. H. H. Crosby Company, Limited, have increased their capital stock from \$20,000 to \$100,000, the increase consisting of 800 shares of \$100 each.

LIFE INSURANCE OFFICERS WATCHING LEGISLATION

Association Has Been Busy Following Amendments to Provincial Laws—Election of Officers

Mr. George Wegenast, managing director of the Mutual Life Assurance Company of Canada, was elected president of the Canadian Life Insurance Officers Association at the annual meeting of that organization last week. During the past year the retiring president, Mr. L. Goldman, was active in forwarding the interests of the Association and devoted his untiring energy to the work. He reviewed the work done

L. GOLDMAN,

Retiring President of the Life Insurance Officers' Association.

during the year and pointed out that although it had not been necessary to have many meetings, one of the chief objects of the association, the watching of current legislation affecting the life insurance business, had engaged much attention.

"Early this year" he continued, "we received notice that the legislature of the province of Manitoba has introduced an amendment to the Corporations Insurance Act, whereby it was proposed to impose a tax of twenty cents on every one thousand dollars invested in that province, in addition to the tax of 1 per cent. on the gross premium income collected in that province. A delegation was appointed consisting of Messrs. Somerville, Hilliard and Goldman, to confer with the Manitoba Government and the committee in charge of the bill with a view to the abatement of the tax. While we had hoped to be able to accomplish this, so far as life insurance companies were concerned it became evident to your delegation that the members of the Government were firm in their intention to impose a tax in some form, and we were therefore gratified to have the bill favorably modified. The tax settled on was one-quarter of one per cent. on the gross income on investments of all kinds in Manitoba. In opposing this increased tax valuable assistance was rendered and much time and attention was devoted by the Winnipeg Life Underwriters' Association.

Licensed by the Dominion Government.

"The province of Manitoba made an amendment to section five of the Manitoba Insurance Act referring to the deposit of securities with that Government, and from the wording of the amendment, it appeared to apply to all companies other than those incorporated in the province of Manitoba. As this form of legislation appeared to discriminate unjustly, the matter was referred to the inspector of insurance for the province of Manitoba, and he advised that the section was intended to apply only to those companies doing business in that province not licensed by the Dominion Government.

"In March last, a bill was introduced in the province of Nova Scotia entitled an Act to Supplement the Revenues of the Crown. The new bill provided that every insurance company transacting business in the province should pay a tax of 1 per cent. calculated on the gross premium received in the province. A strong effort was made by the Association through some members of the Nova Scotia Parliament and representatives of the Nova Scotia Life Underwriters' Association to have the tax reduced to one-quarter of 1 per

cent. and for the inclusion of a clause in the act giving the companies relief from municipal and local taxation. The original tax imposed was allowed to stand. The government, however, agreeing to adopt the recommendation of the Association, amending the Municipal Act so that no further tax could be imposed on the companies by cities or towns, leaving still in existence the tax imposed in the cities of Halifax and Sydney.

Foreign Companies in Alberta.

"In the early part of the year information was received to the effect that foreign companies had been soliciting business in the Province of Alberta with the necessary licenses authorizing them to do so. Steps were taken and legislation procured to prevent this form of poaching, and it was enacted that after January 1st, 1913, no foreign company would be allowed to carry on business in that province until such company produced evidence satisfactory to the provincial registrar that it was conducting its business under a subsisting license from the Dominion Government.

"Legislation was also enacted by the Ontario Government in the form of a revision to the Insurance Act. This was introduced as a part of the recommendations of a special judicial committee appointed to revise the statutes of Ontario. While the alterations suggested were for the most part of minor importance, there were one or two sections involving principles it was thought to assert. For instance, special exception was taken to the clause placing in effect policies as soon as delivered. While in drafting the section, the committee had no doubt in mind classes of insurance other than life, no effect was given to the representations of the Association. The position taken by the members of the government was that it could not well interfere with the work of its own commission, however, much they might appreciate the force of our position. Our committee was able, however, to have many changes made with a view to an improvement in wording and making clearer certain doubtful passages. The committee representing the Association was composed of Colonel W. C. Macdonald, W. A. P. Wood, and D. E. Kilgour, honorary secretary.

Municipal Tax Case.

"Reference may be made here to the matter of the town of Virden license fee referred to Mr. J. H. Brock, managing director of the Great West Life Assurance Company. In a letter received about a year ago he stated:—'I have this morning had an interview with the Attorney-General of Manitob,

GEORGE WEGENAST,

Elected President of the Life Insurance Officers' Association.

and he advises me that no change in the law is necessary to protect the companies from attempts of this kind to collect money from them improperly, but he added that if instructions from the Department were necessary in the case of any municipality, he would see that they were advised that they could not legally exact any such tax from any registered life insurance company. This practically settles the question.'

(Continued at foot of next page).

SIXTY COMPANIES CHARTERED

Montreal Firms Have Large Capital—Several Mining Corporations

Sixty new charters have been granted to companies this week. Their total capitalization amounts to \$18,305,000.

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	Number of Companies.	Capital.
Quebec	24	\$11,720,000
Ontario	20	3,840,000
British Columbia	13	1,845,000
New Brunswick	2	600,000
Manitoba	1	300,000
	60	\$18,305,000

The largest companies this week are:—

Montreal Island Land Company, Montreal.....	\$5,000,000
Ontario National Brick Company, Montreal	2,000,000
J. B. Baillargeon Express, Montreal	1,500,000
Master Builders, Vancouver	1,100,000
Packard Electric Car, St. Catharines	1,000,000
Bulldog Tires, Toronto	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Victoria, B.C.—Victoria Sub-division Company, \$35,000.

Walhachin, B.C.—Walhachin Hotel Company, \$25,000.

Hammondville, B.C.—Eureka Jam and Pickle Works, \$10,000.

West Vancouver, B.C.—West Vancouver Lumber Company, \$10,000.

Halleybury, Ont.—Walsh Mines, \$100,000. J. Walsh, W. R. Earle, V. Walsh, Cobalt.

Berlin, Ont.—Berlin Fibre Products, \$40,000. J. Walter, D. Hibner, W. H. Schmalz.

Arnprior, Ont.—Business Boosters, (printers), \$40,000. A. C. Coulson, A. G. Robertson, J. J. Kew.

Dryden, Ont.—Cleveland Gold Mining Company, \$100,000. D. I. Grant, G. Grant, G. A. Urquhart.

Howick Station, Que.—Lefebvre, Gagnon, \$20,000, (general store). J. H. Lefebvre, E. G. Mahon.

Midland, Ont.—Simcoe Construction, \$50,000. P. T. Murphy, Midland; A. J. R. Melville, J. Walmsley.

Magog, Que.—Compagnie de Fonderie de Magog, (foundry). A. Tourigny, G. A. Brown, G. H. Patuo.

Ottawa, Ont.—British-American Cigar Stores Company, \$40,000. G. A. Wanless, J. R. Rea, E. R. E. Chevrier.

St. John, N.B.—Ready's Breweries, \$500,000. J. Ready, J. L. O'Brien, Fairville, N.B.; H. G. Ellis, St. John.

Pelee Island, Ont.—Pelee Island Navigation Company, \$50,000. H. A. Henderson, F. W. Harris, E. Dieffenbach.

St. Catharines, Ont.—Packard Electric Company, \$1,000,000. R. B. Hamilton, G. C. Rough, M. J. McCarron.

Burlington Junction, Ont.—Vera Chemical Company of Canada, \$150,000. G. H. Sedgewick, A. G. Ross, A. E. Langman.

Winnipeg, Man.—Unit Ownership Company of Canada, (real estate), \$300,000. G. A. Glines, J. Scroggie, H. Allenberg.

St. Basile, Que.—Compagnie d'Immeubles Jacques Cartier, (real estate), \$20,000. W. Germain, D. Descarreaux, E. Godin.

Manitou Iron Mining Company, \$1,000,000. M. A. Phelan, W. Bovey, R. Fleet.

LIFE INSURANCE OFFICERS WATCHING
LEGISLATION

(Continued from previous page).

"During the year the Travellers' Life Insurance Company, of Montreal, and the Gresham Life Assurance Society of London, England, now transacting business in this country, have been admitted to regular membership in the Association.

Election of Officers.

The other officers elected for the year were as follows:—First vice-president, T. B. Macaulay, managing director, the Sun Life Assurance Company of Canada, Montreal; second vice-president, Alexander Bissett, manager for Canada, the London and Lancashire Life and General Assurance Association, Montreal; honorary secretary-treasurer, D. E. Kilgour, actuary, the North American Life Assurance Company; assistant secretary, W. G. Reburn, the Imperial Life Assurance Company; auditors, E. W. Cox, general manager, the Canada Life Assurance Company and J. Milne, managing director, the Northern Life Assurance Company, London. Executive Committee,—Col. W. C. Macdonald, secretary and actuary, The Confederation Life Association; J. E. Kavanagh, superintendent of agencies, the Metropolitan Life Insurance Company, New York; G. A. Somerville, general manager, the Manufacturers' Life Insurance Company; A. R. Howell, manager for Canada, the Gresham Life Assurance Society, Limited, Montreal.

The new president of the Canadian Life Insurance Officers' Association, Mr. George Wegenast, is as stated above, the managing director of the Mutual Life Assurance Company of Canada, our second oldest native life insurance office. Mr. Wegenast is an insurance manager who learned the business from the lowest rung of the ladder. He entered the service of the Mutual Life of Canada in 1880, and after holding the positions of cashier, assistant actuary and actuary, became the managing director of the company in 1898. The continued progress and high standing of the company eloquently attest his sound judgment and business capacity. In Mr. Wegenast the Life Officers' Association has a presiding officer of energy, experience, and a capacity for well-directed effort a man of action rather than words.

CANADIAN NORTHERN'S GROWING TIME

Annual Report Shows Substantial Advances—Dominion's Resources Aid Revenue—Land Sales

The gross earnings of the Canadian Northern Railway for the year ended June 30th, 1912, as shown in the company's annual report, amounted to \$20,860,093. Working expenses were \$14,979,048. The net earnings are given as \$5,881,045, and the net surplus was \$575,396. An increase of \$4,499,381, or 27.50 per cent., is thus shown in the gross earnings, while net earnings are \$890,698, or 17.85 per cent. greater than the preceding year. The working expenses were 73.82 per cent. of the gross earnings proper, and 71.81 per cent., including taxes, of the gross earnings from all sources, compared with 72.59 per cent. and 69.50 per cent. respectively last year. During the year over 586 miles of newly constructed tracks were added to the system, the average mileage operated being 3,888 miles.

Tabulation of Returns.

The detailed report follows:—

Gross earnings—	
From passenger traffic	\$ 3,434,140.81
From freight traffic	15,567,998.17
From express, mail, telegraph, dining and sleeping cars, interest and profits from elevators and other subsidiary companies and investments	1,857,954.65
	\$20,860,093.63
Working expenses (including taxes, &c.)	\$14,979,048.52
	\$ 5,881,045.11
Net earnings	
Deduct—	
Fixed charges (per statement, page 17)	4,630,844.12
	\$ 1,250,200.99
Surplus	
From this deduct interest at 5% per annum paid on income charge convertible debenture stock outstanding	674,804.11
	\$ 575,396.88
Net surplus for the year	

The classified table of freight, printed in the report, carried again, reflects a substantial development of the industrial and agricultural resources of the country served by the railway. Statistics covering grain, including the figures representing flour shipments, show a total movement of over sixty million bushels, or approximately 32 per cent. of the total inspected crop of Western Canada. This shows a notable advance over any previous year, and is a reliable indication of the productiveness of the territories the directors have selected.

Coal Areas and Land Values.

An increase of 120 per cent. in the total bulk of commercial coal carried is also remarkable, the figures being 804,803 tons moved this year, compared with 370,161 tons for the previous twelve months. This increase is indicative of the growth of the coal mining industry in Western Canada, which, upon the completion of the extensions now being constructed in the larger coal areas, will receive an even greater stimulus. There is also a further indication of the prosperous extension of the cities, towns and settlements along the lines, as shown by the increase of 48 per cent. over last year in the amount of building materials carried by the railway during the year.

Land sales during the year were 55,111 acres for \$836,084.37, an average of \$15.17 per acre, compared with 279,151 acres for \$3,345,498.73, an average of \$12.00 per acre, the preceding year. The reduction in sales is substantial, but the directors, recognizing that the value of productive acreages in Western Canada is assured, and being desirous of, as far as possible, selling to settlers only, have not pressed the sale of lands. On the other hand, they have adopted an aggressive policy of colonizing the free lands offered by the Dominion Government in territories adjacent to the railway. Two million four hundred and seventy-nine thousand acres of these lands were entered upon by settlers during the year, of whom a largely increased number were a most desirable class of British emigrants.

Trans-Atlantic and Trans-Continental Progress.

The operation of the Royal Line of steamships continue to vindicate the wisdom of engaging in the Atlantic trade. The increasing popularity of the route emphasizes the necessity for extending the service so that the company may take the full benefit of the business controlled by its organization.

Great progress has been made in the construction of the transcontinental line of the Canadian Northern system, which it is hoped will be completed by the end of 1913; the line

through British Columbia to connect the western lines with tidewater at the Pacific Coast is advancing rapidly. In addition to a very fortunate advantage of easy gradients the location of the line enters without competition into a large territory, the physical characteristics of which will attract a very desirable class of settlers. The line will also give access to an hitherto unknown section of the Canadian Alps, of which the scenic attractions are such as will divert a large volume of the transcontinental tourist traffic to the route.

Forging Various Links.

The work of linking up the lines in Western Canada with the railways of the Canadian Northern system in the eastern provinces is making satisfactory progress, having regard to weather and other conditions. The resources of the country opened up by this line will be productive of great traffic advantages. Capital is only awaiting the completion of these transportation facilities before entering upon the development of iron and other mineral deposits, extensive pulpwood and timber areas. In addition to the tonnage assured from this industrial development, there are the traffic advantages which will accrue from the agricultural development of the great clay belt of Northern Ontario, through which the railway will pass for a distance of three hundred and fifty miles. Experienced officers who have carried out explorations of the entire area estimate that the industrial and agricultural resources of this territory will attract and support a population of over two million of people.

Advantages in Eastern Canada.

During the year another section of the Canadian Northern Ontario Railway was opened for traffic, but the directors regret that owing to adverse weather and other conditions the completion of the line between Ottawa and Toronto has been delayed. The work is, however, progressing, and it is hoped in a short time to establish a through service connecting Toronto with Ottawa, Montreal and Quebec. The pulp and paper industries in Northern Quebec are expanding quite satisfactorily, the traffic advantages of which chiefly accrue to railways operated under Canadian Northern control in Quebec.

In conclusion, Sir William Mackenzie refers to the numerous prominent men who have recently visited Canada, stating that personal and unbiased examination of the actual and potential resources of the Dominion will result in still greater confidence in the future of Canada and the close co-operation in her development.

PANAMA TOLLS

President Taft has issued a proclamation fixing the rates that the foreign shipping of the world shall pay for passage through the Panama Canal. The proclamation, made under authority of the canal act passed by Congress in August, establishes a merchant vessel rate of \$1.20 per net ton of actual carrying capacity, with a reduction of 40 per cent. on ships in ballast.

The provisions of the proclamation are as follows:

1. On merchant vessels carrying passengers or cargo, \$1.20 per net vessel ton—each 100 cubic foot—of actual earning capacity. 2. On vessels in ballast without passengers or cargo, 40 per cent. less than the rate of tolls for vessels with passengers or cargo. 3. Upon naval vessels, other than transports, colliers, hospital ships and supply ships, 50 cents per displacement ton. 4. Upon army and navy transports, colliers, hospital ships and supply ships, \$1.20 per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

The secretary of war will prepare and prescribe such rules for the measurement of vessels and such regulations as may be necessary and proper to carry this proclamation into full force and effect.

American coastwise shipping was exempted from toll payment by Congress. It was to this provision of the act that Great Britain diplomatically protested.

Mr. Samuel Price, K.C., has resigned his position as mining commissioner for Ontario, and has been succeeded by Mr. T. E. Godson, K.C., of Bracebridge.

Mr. C. E. Sampson states the Saskatchewan Life Insurance Company will be actively engaged in all branches of the life insurance business the early part of the coming year. The operation and general business policy of the company will be administered by a board of directors made up of the following well-known residents of the province, who have been connected with the company from its inception: Hon. W. C. Sutherland, Saskatoon; J. W. Sifton, Moose Jaw; H. D. Powell, Weyburn; N. T. Mollard, Chas. Willoughby, W. M. Martin, M.P., G. H. Barr, W. H. Duncan, D. Dow, M.D., Regina.

MORTALITY EXPERIENCE ON PAID-UP POLICIES

Issued in Lieu of Surrendered Policies by Mutual Benefit Life Company

In investigating the mortality experience of the Mutual Benefit Life Insurance Company on paid-up insurances, issued in lieu of surrender policies, it was thought desirable to determine not only whether there had been any selection by the insured against the company, but to ascertain how the experience thereunder compared with the experience under extended insurances, stated Mr. E. E. Rhodes in a paper given at the recent convention of the Actuarial Society of America held at Toronto. Under the company's original non-forfeiture system of 1879 provision was made for automatic extended insurance in the event of lapse, or for a paid-up policy if the original policy was surrendered within three months from date of lapse. Prior to 1879 the insured who was unable to continue the payment of premiums had no choice but to take a paid-up policy for a smaller amount, or a cash value. In investigating the mortality experience under paid-up policies the experience under all such policies was first investigated, excluding such limited premium policies as by their terms stood good for paid-up insurance for such a proportion of the original policy as the number of premiums paid bore to the full number. A subsequent investigation was then made of the experience under paid-up policies issued since 1879, which, as stated, covered only those policies which were chosen by the insured in preference to the extended insurance.

Under All Paid-up Policies.

The experience under all paid-up policies issued by the company in lieu of policies surrendered covered the following data:

Mode of Exit.	Year "o."		Other than Year "o."	
	Policies.	Amount.	Policies.	Amount.
Surrendered	160	\$143,208	3,151	\$2,527,160
Existing	...	...	2,643	1,731,732
Died	...	...	3,874	3,419,361
Total decrements ..	160	\$143,208	9,668	\$7,678,253
	...	...	160	143,208
Total data	...	...	9,828	\$7,821,461

The total exposed to risk was equivalent to 142,184 policies insuring \$98,126,090.00 at risk for one year. The average duration of policies which entered into the investigation was 14.71 years by policies, and 12.78 years by amounts, showing a somewhat shorter duration on the policies for large amounts. The average duration of exposure under extended insurances was 3.65 years by policies, and 3.62 years by amounts. This difference is partially accounted for by the fact that the experience under extensions covered the years 1879-1907, while under paid-up policies the experience covered the years 1868-1910.

Percentage Terminated by Death.

A feature of the data is the fact that a large percentage of the policies was terminated by death. The percentage for each mode of exit is as follows:

Mode of Exit.	Policies.		Percentage by	
	Policies.	Amount.	Policies.	Amt.
Surrendered	3,311	\$2,670,368	33.69	34.14
Existing	2,643	1,731,732	26.89	22.14
Died	3,874	3,419,361	39.42	43.72
	9,828	\$7,821,461	100.00	100.00

The data relating to paid-up policies issued since 1879 is as follows:

Mode of Exit.	Year "o."		Other than Year "o."	
	Policies.	Amount.	Policies.	Amount.
Surrendered	78	\$71,145	1,180	\$1,030,960
Existing	..	...	1,550	1,266,600
Died	..	...	1,602	1,694,583
Total decrements ..	78	\$71,145	4,332	\$3,992,152
	..	...	78	71,145
Total data	..	...	4,410	\$4,063,297

The paid-up policies issued since 1879 amounted to about 45 per cent. of the total paid-up policies issued, but the amount insured under policies issued since 1879 accounted for nearly 52 per cent. of the total amount insured. Prior to 1879 there were 5,418 policies for \$3,758,164.00, showing an average of \$694.00. Since 1879 there were 4,410 policies for \$4,063,297.00, showing an average of \$921.00.

Each Mode of Exit.

Under paid-up policies issued since 1879 the total exposed to risk was equivalent to 60,554 policies, insuring \$46,-

908,095.00 at risk for one year. The average duration of these policies which entered into the investigation of 13.98 years by policies, and 11.75 years by amounts. The elimination of the paid-up policies issued prior to 1879 reduced the average duration by about three-fourths of a year in the case of policies, and approximately one year in the case of amounts. Although the elimination of paid-up policies issued prior to 1879 reduced the number of policies entering into the investigation to less than one-half the total and to a little more than one-half the amount, yet the proportion of policies terminating by death in the experience under policies issued since 1879 is still large, and only slightly smaller than for all the paid-up policies. The percentage for each mode of exit is as follows:

Mode of Exit.	Policies.		Percentage by	
	Policies.	Amount.	Policies.	Amt.
Surrendered	1,258	\$1,102,114	28.53	27.12
Existing	1,550	1,266,600	35.15	31.17
Died	1,602	1,694,583	36.32	41.71
	4,410	\$4,063,297	100.00	100.00

The policies and amounts at risk, the actual deaths, and the percentage of actual to expected deaths according to the four tables used in the former investigation were summarized for all ages combined. Owing to the fact that there were only five deaths occurring amongst paid-up policies issued one year after the date of issue of the original policies, the paid-up policies issued during the first and second year of the original policies have been combined.

What was the Result of Elimination?

The ratio of actual to expected deaths is generally higher by amounts than by policies, which was the case with the experience under extended insurances. There is very little difference between the experience on all paid-up policies issued and on those issued since 1879. In other words, the elimination of the earlier issues had but little effect on the experience. The result of the elimination was in some instances to decrease, and in some to increase, the percentages, the tendency being to increase the percentages so far as the policies were concerned, and decrease the percentages in the case of amounts.

Comparing the experience under paid-up policies issued since 1879 with the experience under extended insurances, there is a remarkably close agreement for all years combined between the two experiences, as measured by the Modified English table, the paid-up policies showing 92.69 per cent. and 97.35 per cent. for policies and amounts respectively, as compared with 92.0 per cent. and 97.5 per cent. for the extended insurances.

According to Various Tables.

Measured by the O(M) table, the percentage of actual to expected was about 6 per cent. less than in the case of extensions. Measured by the Compound Progressive table, the percentage of the paid-ups was from 15 per cent. to 17 per cent. less, and according to the American Table from 2½ per cent. to 5 per cent. less than in the case of extended insurances. When the comparison is made with reference to the years between the date of issue of the original policy and the issue of the paid-up policy or granting of the extension, as the case may be, the general tendency is for the experience under paid-up policies to be in excess of that under extended insurances, where the paid-up or the extension occurs within a few years of the original date of issue. Where the termination of the original policy occurs after it has been in force for a longer term of years the tendency then appears to be for the experience under paid-up policies to be more favorable than under extended insurances.

In the extended insurance investigation the data was very much more extensive than the data entering into the experience under paid-up policies. The data entering into the paid-up investigations did not seem to be sufficiently extensive to warrant any attempt at keeping the experience according to the years of exposure under the paid-up policy. Accordingly, the experience was taken off for the first twenty years' duration under the paid-up policies, and the figures are shown for ages at the date of paid-up, grouped in order to compare with the similar figures for the extended insurances.

Tendency to Higher Mortality.

In the extended insurance investigation attention was drawn to the fact that there was a tendency to a higher mortality as the age at which the extended insurance was granted increased. In the experience under paid-up policies there is apparently the same tendency to an increase in mortality up to about age 65, but from that age on there appears to be a well marked tendency to a decrease in mortality, compared with the expected.

In the investigation of the extended insurances the total deaths numbered 1,069, and of this number 747 occurred within the first four years of extended insurance. In the experience covering all paid-up policies issued there were 3,874 deaths, and only 504 occurred within the first four

years. Furthermore, 1,141 occurred after twenty years. In the experience under paid-up policies issued since 1879 there were 1,602 deaths, and of this number 278 occurred within the first four years and 257 after twenty years. These figures show that there was a very different distribution of deaths in the paid-up experience from that which occurred under extended insurances. These figures are all the more significant when account is taken of the fact that the exposures in the extended insurance investigation were considerably greater than in the case of the paid-up experience.

Experience Varies in Years of Duration.

In the extended insurance investigation it was found that the percentage of actual to expected mortality in the first year of extension was heavy. The percentages steadily decreased during the first four years, after which the tendency appeared to be for the percentage to remain fairly constant. Remembering that the O[M] and the Compound Progressive are true select tables, it will be seen that under the paid-up policies the experience in the later years of duration was considerably higher than in the earlier years. In other words, as compared with the Compound Progressive table, for example, it would appear that the experience under the paid-up policies showed a mortality with a greater effect of selection than that shown by the Compound Progressive table.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Saskatchewan.

Berg, No. 1044, \$2,000. H. A. Davis, Hart.
Titanic, No. 1057, \$1,900. P. Rich, Neville.

Graindale, No. 2702, \$1,800. D. W. Bohannon, Alsask, Sask.

GRAIN VIA PANAMA CANAL

A Western grain growers' convention is to be held in Vancouver, B.C., early in December, to discuss the question of providing facilities for exporting grain from Western Canada by way of the Pacific coast and Panama Canal to Europe. In this connection the engineer of that province, Mr. F. W. Aylmer, has been inspecting the Columbia River to ascertain the feasibility of utilizing water navigation to the seaboard at Portland, Oregon. The Panama Canal convention recently held at Calgary declared that the Columbia offered the only solution to the question of reasonable freight rates to the Pacific coast, and the federal government was urged to make necessary improvements to render navigation by barges a success. A report made by a grain freight authority states that for 5 cents a bushel grain could be shipped from Revelstoke to Portland, compared with 19½ cents, the present rail export rate from Calgary to Vancouver, a lesser distance by 200 miles. The Calgary-Vancouver route is approximately 725 miles, or about the same distance as from Calgary eastward to the upper lakes.

ADMINISTRATION OF MUNICIPAL FINANCES

Uniform System of Annual Accounts—Suggested Central Authority to Do All Borrowing for Municipal Requirements—School Accounts

Sinking fund administration is closely bound up with the borrowings of municipal authorities, and both these could be advantageously administered by the provincial government or a body of trustees appointed by the government, is an interesting suggestion made by Mr. J. Haydn Young, C.A., of the firm of Webb, Read, Hegan, Callingham and Company, Vancouver, before the British Columbia Government Municipal Commission recently, whose address, in part, follows:—

The administration of municipalities resolves itself ultimately to the financial question of the ways and means for the carrying on of such municipalities, and accordingly the question of finance is of the utmost importance.

British Columbia at present holds a high place in the financial quarters of the world on account of the careful administration of the government, but any reaction which might take place in the financial position of any municipality would naturally react against the province and the government as a whole.

The municipalities have in the past been large borrowers, but in respect that the province is only awakening to its destined position these municipalities will require in the near future to borrow to a very much greater extent. It therefore behoves all who have the interest of the country at heart, but particularly the government, to see that the administration is such as not to in any way impair the credit of any municipality or the province, for good credit is most difficult to obtain and quite easy to lose.

The Municipal Clauses Act has laid down certain laws for the administration of public affairs and, no doubt, has admirably suited past requirements, but with the development which has taken place, and likely to take place, the act in certain respects requires alteration.

Importance of Accounts.

The act referred to has left no provision whereby the provincial government may be satisfied that the laws laid down in the said act have been adhered to.

Now, to intelligently record or follow up financial dealings with public moneys it follows that the financial system of accounts is of vital importance, and I respectfully submit that a uniform system of annual accounts should be prepared and prescribed by the government, and that a copy of these accounts should annually be lodged with the government and duly passed by them, and also that an opportunity should be given to the ratepayer of seeing the copies of such accounts.

Under section 415 of the Municipal Clauses Act the matter of audit is left optional on the part of the municipalities, although sections 418-423 prescribe regulations for compulsory audit, should certain eventualities take place. The weakness will here be seen when it is considered that the audit is only deemed necessary when the state of affairs is discovered to be such as necessitates an investigation.

The examination of accounts by members of the recognized institutes of chartered accountants holds an important place in financial circles, and would therefore recommend that the audit be made compulsory each year, and further, that the appointment of auditors should be made by the government.

The auditors, so appointed, would then be outside the influence of the municipality whose accounts they might be examining.

As an economical and efficient method of carrying out such examination I would recommend that the work be distributed among the chartered accountants of the province.

British Columbia's municipalities have created a considerable indebtedness, and this must naturally increase with future development.

Central Authority to Deal With Loans.

The question of providing funds to repay the indebtedness incurred on account of previous borrowing, when such loans mature, strikes at the root of the stability and credit of any municipality. It therefore follows that great care must be exercised as to the security and nature of the investments made, of the sinking fund, and the readiness with which these investments can be realized when required.

Prosperity is predominant, and the high rate of interest now prevailing in certain classes of investments may effect the judgment of those in charge of affairs of municipalities as to the nature of the investments made of the funds belonging to the sinking fund.

Throughout Canada the municipalities are in many cases, to a large extent, not governed by gentlemen with the necessary technical and executive ability, and would suggest

that the administration of all the sinking funds should be controlled and administered by the provincial government, or by a body of trustees appointed by the government.

Section 182 of the Municipal Clauses Act, giving power to the council to place any surplus accumulation of the sinking fund account of past years against the current year's assessment should be rescinded as being antagonistic to the true basis of taxation, and is in addition bad finance. Any such accumulation should be held in reserve, and thereby strengthen the financial position.

The sinking fund administration could be also thus advantageously administered.

Existing Conditions Cause Loss.

Throughout British Columbia and Canada we have had evidence of the competition of one municipality with another for the placing of loans, with the accompanying loss thereby entailed, as well as the trouble of placing loans at anything like reasonable terms when the money markets are tight.

If the borrowing powers of all the municipalities of the whole province were vested in the government, or body of trustees referred to, great saving in interest and terms could be effected, as well as considerably greater security felt.

The central authority could borrow in one large sum for all the estimated requirements of the various municipalities when money markets were favorable on much better terms than individual municipalities for their respective amounts.

The security to the borrowers would be greater, and, as has been found when one municipality might have on hand uninvested moneys belonging to the sinking funds bearing practically no interest, and another having large temporary overdrafts paying large interest, the saving which could be effected to the province by the reasonable and practical administration by the central authorities would be great.

In the matter of the school accounts, I would suggest that this administration be entirely separate from the municipalities, and that the suggestion made previously as regards accounts of municipalities and audit should also apply to the school accounts.

The Cockshutt Plough Company are erecting a large warehouse at Twelfth Avenue and Centre Street, Calgary.

The annual meeting of the Royal Trust Company was held at Montreal last week. The annual statement presented by the board was regarded as satisfactory. There was little or no discussion of the yearly report, the proceedings being of a purely formal nature. The directors were re-elected as follows: Lord Strathcona and Mount Royal, president; Sir Edward Clouston, Bart., vice-president; Sir H. Montagu Allan, R. B. Angus, A. Baumgarten, E. B. Greenshields, C. R. Hosmer, Sir W. C. Macdonald, Hon. R. Mackay, A. Macnider, H. V. Meredith, David Morrice, Jas. Ross, Sir T. G. Shaughnessy, Sir William C. Van Horne and A. E. Holt, manager.

At the regular monthly meeting of Winnipeg Life Underwriters' Association, presided over by Mr. D. J. Scott, president of the association, an entertaining and instructive address was given by Prof. W. F. Osborne on "British Imperialism." The speaker described briefly the various forms of government adopted by civilized communities in the past two thousand years, and, dealing particularly with republican and monarchical, stated that up to the present time the former had always been a failure, and the monarchical, of which the British Empire was an example, had stood the test of time and evolution better than any other. Other speakers were; Mr. J. B. Morgan, president of Edmonton Life Underwriters' Association, who gave an interesting account of the progress made by this association, which has gained 50 per cent. in members in the past year; Mr. Wm. McBride, of the Dominion Life Underwriters' Association; Mr. H. B. Andrews, Mr. D. J. Scott, and Mr. George McCuish.

Prince Albert board of trade recently considered the following proposals made by Mr. Felix Frank, general manager of the Great West Iron, Wood and Chemical Works, Limited: To take over the Lacolle Falls undertaking, to refund the city the money that has been expended on the scheme for the generating of hydro-electric power, and guarantee to supply the city with 10,000 horse-power of electricity at \$10 per horse-power per year. This followed that previously suggested, which was to establish in the city a manufactory to produce nitrogenous fertilizers, etc., which would give employment to 2,000 men. For this industry a quarter section of land from the city at least was asked. 10,000 horse-power of electric current at a fixed rate of \$10 per horse-power per year. If the city would grant those concessions, the company would guarantee to employ 2,000 workmen, which, Mr. Frank claims, would represent an additional population of about 5,000 people. The company would enter into an agreement with the city and immediately take steps to have the buildings and plant erected.

HOLLINGER FINANCIAL STATEMENT

According to the report of the Hollinger Gold Mines, Limited, to which brief reference was made in The Monetary Times last week, the company's surplus exceeds \$800,000, of which \$550,000 represents profits from operations. It is therefore expedient to commence the payment of dividends, allowing the surplus to grow at a somewhat slower rate.

The profits are over \$40,000 per week, and the management is confident of continuing this at an undiminished rate, hence the payment of regular dividends every four weeks appears to present few difficulties, and will permit concurrently therewith substantial increases to be made to the reserve fund of the company. The dividend period of four weeks has been chosen, as it will enable more careful comparisons to be made of the production and expenditures of various periods than would be the case if calendar months, which are not of equal duration, were chosen as the dividend intervals.

The provisional statement of the company's finances, as on October 26th, 1912, is as follows:—

Assets and Liabilities.

Current Assets—

Cash on hand and in Imperial Bank	\$	33,496.44
Bullion on hand		27,570.00
Bullion shipped (not paid for)		89,498.65
Gold precipitates on hand		97,500.00
Gold in mill solutions		24,000.00
Gold in slags on hand		17,000.00
Materials and supplies on hand		30,659.54
Accounts receivable		7,407.30
Guarantee Deposits		500.00
Imperial Bank, Toronto, reserve for dividend No. 1		90,000.00
Insurance paid in advance		2,832.41
	\$	420,464.34

Capital Assets—

Mining properties	\$2,500,000.00
Developments	302,556.24
Plant	593,728.00
	\$3,396,284.33
	\$3,816,748.67

Current Liabilities—

Wages	\$	18,254.00
Salaries		2,750.00
Accounts payable		36,972.86
	\$	57,976.86

Capital Liabilities—

Capital stock	\$3,000,000.00
Surplus, made up as follows, viz.:	
Premium on shares sold invested in plant and development	\$250,000.00
Profits from operations	
Reinvested in plant ..	\$ 82,432.92
Reserve for Dividend	
No. 1	90,000.00
Balance in reserve ..	336,338.89
	508,771.81
	758,771.81
	\$3,816,748.67

The above figures are provisional, and are subject to correction after actual returns from smelters are received. It is estimated that the surplus on November 2nd will amount to approximately \$800,000.00

The favorable opinion of one of the leading mining engineers of the continent was printed in last week's issue of The Monetary Times. It was stated therein that more exploration work is needed at below the 300-foot level.

COBALT ORE SHIPMENTS

The following are the shipments, in pounds, of ore from Cobalt Station for the week ended November 15th:—La Rose, 130,241; McKinley-Darragh, 57,700; Peterson Lake, 60,800; City of Cobalt, 84,000; Hudson Bay, 61,878; O'Brien, 65,980; Kerr Lake, 122,317; total, 582,916 pounds, or 291 tons. The total shipments since January 1st are now 37,653,202 pounds, or 18,826 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,080 tons.

OCTOBER BANK STATEMENT

Figures Show that Financial Strength was Concentrated upon the Crop Movement —
Deposits Remain at High Level.

	Oct., 1911.	Sept. 1912.	Oct., 1912.	Year's Inc.	Month's Inc. or dec.
Deposits on demand	\$331,953,562	\$374,368,017	\$383,814,572	+ 15.6	+ 2.5
Deposits after notice	568,451,045	640,536,652	640,097,928	+ 14.3	— 0.06
Current loans in Canada	768,492,008	859,341,193	879,676,655	+ 14.4	+ 2.3
Current loans elsewhere	36,862,543	39,440,472	41,300,588	+ 11.7	+ 4.7
Call loans in Canada	69,088,467	75,205,281	73,959,866	+ 7.0	— 1.6
Call loans elsewhere	88,722,640	112,767,036	101,186,983	+ 14.0	— 10.2
Circulation	105,855,021	104,334,287	110,696,877	+ 4.5	+ 6.0

The above are the principal items in the October bank statement, with comparisons. Call loans in Canada decreased during the month by about \$1,000,000 or 1.6 per cent. Call loans abroad declined \$11,000,000 or 10.2 per cent.; and deposits abroad, about \$3,000,000. The figures of the statement show that the banks have concentrated their resources upon the movement of the crop. Circulation was nearly \$6,000,000, or 6 per cent. greater than in September. The following table shows the course of the domestic loan account for the past thirteen months.

Loans.	Current in Canada.	Call in Canada.
1911—October	\$768,492,008	\$69,088,467
November	770,356,419	72,033,493
December	774,909,172	72,640,526
1912—January	775,972,243	71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866

Current loans in Canada are \$111,000,000 or 14.4 per cent. greater than a year ago. Call loans are about \$5,000,000, or 7 per cent. larger than in October, 1911. Domestic current loans have made a steady gain during the past year. The following table shows the extension of bank credit during the past few years both at home and abroad:

	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
October.	\$519,263,607	\$27,480,811	\$42,102,565	\$ 70,239,118
1908	579,837,956	37,311,103	56,996,005	129,964,353
1909	679,820,039	41,269,126	64,561,641	103,279,774
1910	768,492,008	36,962,543	69,088,467	88,722,640
1911	879,676,655	41,300,588	73,959,866	101,186,983

Current loans in Canada have increased since October, 1908, from \$519,000,000 to \$879,000,000 a gain of \$360,000,000 or 69.4 per cent. Current loans elsewhere than in the Dominion in the same period have made a gain of over \$13,000,000 or 50.2 per cent. Canadian call loans have not shown as comparatively as large an increase as the other account, having changed from \$42,000,000 to \$74,000,000, an expansion of \$32,000,000 or 75.6 per cent. Call loans elsewhere

than in Canada in the autumn of 1908 were at a low point, namely, \$70,000,000. In the following year they rose to \$130,000,000, while last October they stood at \$101,000,000.

The gain between 1908 and 1912 was \$31,000,000 or 29.8 per cent. The following figures show the deposits accounts in Canada for the past thirteen months:—

	On demand.	After notice.
1911—October	\$331,953,562	\$586,451,045
November	341,712,265	588,942,142
December	335,020,693	591,068,932
1912—January	316,936,962	596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596
September	374,368,917	640,536,652
October	383,814,572	640,097,928

Demand deposits are \$52,000,000 or 15.6 per cent. greater than a year ago. Those after notice are \$72,000,000 or 14.3 per cent. greater in October, 1911. These accounts have shown almost continuous extension during the past thirteen months. The following figures give an idea of the remarkable growth in domestic deposits since October, 1908:—

October.	On demand.	After notice.	Total.
1908	\$190,114,091	\$414,789,347	\$604,903,438
1909	250,968,487	480,837,606	731,806,093
1910	280,838,612	549,016,725	829,855,337
1911	331,953,562	586,451,045	918,404,607
1912	383,814,572	640,097,928	1,023,912,500

Demand deposits since 1908 have changed from \$190,000,000 to \$383,000,000, a gain of \$193,000,000, or 101.8 per cent. Deposits after notice have increased from \$414,000,000 to \$640,000,000, a gain of \$226,000,000, or 54.3 per cent. Total deposits last October remained at above a billion dollars, having increased since 1908 from \$605,000,000 to \$1,024,000,000, a gain of \$419,000,000, or 69.1 per cent.

Some of the individual banks circulated notes during October to a greater amount than the paid-up capital, taking advantage of the Government emergency circulation regulation, but the statement of their collective position at the end of October shows circulation about three and a half millions below the combined paid-up capital. Circulation expanded in October by \$6,362,590, which is not so great as the growth during October of last year.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates as follows:—

	Between banks.	Buyers.	Sellers.	Counter.
N. Y. funds	3-64 dis.	1-32 dis.		¾ to ¾
Montreal funds	5c. dis.	Par.		¾ to ¾
Sterling—				
60 days' sight	8 1-16	8 3-32		8 5-16 to 8 7-16
Demand	9 1-32	9 3-32		9 5-16 to 9 7-16
Cable transfers	9 3-16	9 7-32		9 7-16 to 9 9-16
New York—		Posted.		Actual.
Sterling—60 days' sight		4.80.50		4.81 ¾
do. demand		4.84.85		4.86
Call money in Toronto, 6 to 6½ per cent.				
Bank of England rate, 5 per cent.				
Open market discount rate in London for short bills, 4½ per cent.				

Several Montreal and Toronto brokerage houses have sent notices to clients that the interest rates will be raised from 6½ to 7 per cent.

RECENT FIRES

(Continued from Page 783).

Saskatoon, Sask.—November 4.—Mr. J. O. McLaren's garage, 314 Avenue C. South. Cause unknown.

November 8.—King Edward Hotel, 20th Street. Cause, defective chimney. Loss in both fires slight.

November 12.—412 20th Street West. Loss and cause unknown.

London, Ont.—November 17.—Wright Hat Company's warehouse, Ridout Street. Loss \$35,000. The stock was valued at between \$20,000 and \$25,000. The insurance will be somewhat over half of the total loss, the companies affected being the Atlas, the Phoenix, the Dominion, the General Fire Insurance, the Hand-in-Hand, the Fire Insurance Exchange, the Queen, the Commercial Union, the Canadian Fire, the London Mutual and the Economical. Cause unknown. Messrs. McLeod, Nolan and Company suffered loss from smoke and water amounting to \$10,000.

The Home Bank of Canada has opened two new branches in Ontario, at Manilla and Creswell. For the present both branches will be managed from the Cannington branch of the Home Bank.

NEW YEAR EXPENDITURES

Many Proposals Involving Large Amounts Being Discussed by Ratepayers Both East and West

The Toronto city council have decided to send the following six money by-laws to the ratepayers to be voted upon on January 1, the aggregate amount being \$12,706,000:—

Grant to the National Sanitarium Association for the fight against tuberculosis, \$200,000; waterworks system at Scarboro Bluffs, \$6,677,000; new filtration plant and conduit, \$1,375,000; Bloor Street Viaduct, \$2,500,000; modern garbage disposal plant, \$1,000,000; storm overflow sewers, \$954,000.

Then there are the harbor commissioners' proposals which will cost in all \$19,142,088.

The government gives \$6,123,284 to build the bridges, seawall, ship channel, turning basin and breakwaters. The harbor commission finances \$11,215,920 of the cost on its own debentures. The city is asked to spend \$1,802,883 for the improvements and 894 acres of new park lands.

Hamilton's ratepayers will vote on by-laws which, if carried, will authorize an expenditure of \$910,000 for various civic works.

London's, Ontario, requirements total over a million and a half dollars. Among the money by-laws are the following: Electrification of the London and Port Stanley

Railway	\$890,000
Construction of a storm water sewer system	200,000
Federal Square by-law	250,000
Breakwater for West London	50,000
Grants to industries	75,000
Grant to Byron Sanatorium	15,000
School debentures, 1913	80,000

Alberta's Ambitious Cities.

Street improvements; the extension of the street railway, water, electric light and telephone, and other services; the erection of needed buildings, and the carrying on of the ordinary current business of the city, will bring Edmonton's estimate up to nearly \$12,000,000.

For the coming season Calgary's municipal development work is being outlined as the reports of the different departments come in. So far an expenditure of over \$2,000,000 is forecasted. The total will probably be five or six millions. The largest single item so far is the anticipated appropriation for three concrete bridges, \$900,000. Next in order comes the city planning commission's recommendation which asks for \$600,000 for parks and general improvements to be divided equally between the four city wards. Municipal street railway extension, 17½ miles of new trackage and thirty new cars, including a 5,000 gallon street sprinkler, will require \$500,000. Another unit to the street paving plant will cost \$60,000. The fire chief advises the commissioners that the horse-drawn apparatus now used at the inside stations is required at the outlying districts, and before being transferred provision should be made to replace it with motor apparatus, which at the fully equipped central station has given such satisfaction. The motors asked for are: a city service truck for No. 2 station, \$7,000; hose wagon, also for No. 2, \$6,500; chemical and salvage car for No. 1 station, \$8,000; combination engine, No. 3 station, \$10,500. Additions to the alarm system, adding fifty new boxes and installation will cost \$8,614. Two lots in Elbow Park for a new station site, which can be acquired for \$3,000, making a total of \$43,600.

Winnipeg's school board's by-law for \$1,000,000 is to be submitted in December.

British Columbia's Advances.

Victoria has a sewerage scheme which its city engineer estimates will cost \$750,000 to complete, and a hospital by-law for \$250,000 will be submitted in January.

In addition to Vancouver's municipal expenditures, the civic exhibition committee has recommended to the city council the submission of a \$150,000 by-law for the Vancouver exhibition, and a money by-law for \$675,000 for waterworks purposes during the year 1913 was authorized by the waterworks committee to be recommended to the city council.

While the total amount of the Vancouver board of school trustees' by-laws is \$776,000, the first by-law being for \$621,000, and the second for \$155,000.

The capital stock of the Shawinigan Knitting Company, Limited, has been increased from \$49,000 to \$200,000, the increase consisting of 1,510 shares of \$100 each.

Mr. H. M. Cherry recently presided over a meeting of the general committee of the Manitoba Chartered Accountants' Association at Winnipeg to consider ways and means with reference to a proposal to hold a convention in Winnipeg next year in connection with the Dominion Association.

CANADIAN NORTHERN RAILWAY'S SECURITIES

Are Object of Official Announcement—Industrial Bond Notes

Several important industrial bond issues will be made before the close of the year, including the Atlantic Sugar Refineries Company and the Abitibi Pulp and Paper Company.

Certain companies have circulated literature of such a nature respecting the Canadian Northern convertible debenture stock, that the railway company have found it necessary to make an official statement. This says that neither the Canadian Northern Railway nor any of its allied companies control or are in any way interested in or have at any time controlled or had any interest in the Canadian Railways Bond Corporation or the Canadian Northern Securities and Lands Corporation, or any other such company, by which, whether as owner or agent, there has by circular or otherwise been offered in Canada for subscription or purchase on instalment basis any of the Canadian Northern Railway Company's 5 per cent. income charge convertible debenture stock, or any of the statutory or common stock of the Canadian Northern Quebec Railway Company, and that no such company acts as agent for the Canadian Northern Railway Company or any of its allied companies.

Canada Southern Railway.

The Canada Southern Railway Company has executed a new first and refunding mortgage to secure an authorized issue of \$40,000,000 consolidated 50-year 5 per cent. gold bonds, guaranteed, principal and interest, by the Michigan Central Railroad Company. Out of this authorized issue the Canada Southern will in the near future issue a total of \$22,500,000 for the purposes of taking up the \$14,000,000 of first mortgage 5's, due on January 1st next; \$6,000,000 of second mortgage 5's, due on March 1st next, and of reimbursing the Michigan Central for \$2,500,000, being moneys expended in betterments and improvements to the Canada Southern.

Bond Guarantee for Saguenay?

It is believed in Montreal that Sir Rodolphe Forget will succeed in having the Government guarantee the bonds of the Quebec and Saguenay Railroad on the ground that the development of the north shore will warrant such a move.

The Montreal, Ottawa and Georgian Bay Canal Company will apply to Parliament for alterations in its charter to permit it to issue bonds to the extent of \$175,000,000, and extending the time for the construction of the canal.

FIRE LOSS OF UNITED STATES AND CANADA

The fire loss of the United States and Canada during the month of October, as compiled by the Journal of Commerce, shows an aggregate of \$13,651,650, as compared with \$13,945,000 for the same month of 1911, and with \$37,188,300 in October, 1910, when climatic conditions resulted in serious losses from forest fires. The fire losses for the first ten months of 1912 reach the sum of \$191,181,600, as against \$192,933,800 for the same time in 1911, and \$196,535,650 for 1910. The following table gives a comparison by months of the fire losses for this year and the preceding year:—

	1910.	1911.	1912.
January	\$15,175,400	\$21,922,450	\$35,653,450
February	15,489,350	16,415,000	28,601,650
March	18,465,500	31,569,800	16,650,850
April	18,091,800	17,670,550	16,349,400
May	18,823,200	21,422,000	21,013,950
June	13,183,600	20,691,950	16,103,450
July	26,847,900	25,301,150	15,219,100
August	21,570,550	12,662,650	14,158,800
September	11,700,000	11,333,250	13,779,300
October	37,188,300	13,945,000	13,651,650
Total, for 10 months.	\$196,535,600	\$192,933,800	\$191,181,600
November	16,407,000	18,680,600	
December	21,528,000	22,722,850	
Total year	\$234,470,600	\$234,337,250	

The Monetary Times estimate of Canada's fire loss for October was \$1,416,218.

The Western Terminal Elevator Company have increased the number of their directors from seven to nine.

The North-West Guarantee and Accident Insurance Company will apply for a Dominion charter, authorizing it to carry on the business of an accident, sickness, steam boiler, guarantee and plate glass insurance company. Mr. Russell Hartney, of Saskatoon, is solicitor for the applicants.

MUNICIPAL BONDS AND FINANCING

Moose Jaw is Issuing More Treasury Notes—Finances of Western Cities

Moose Jaw is among the Western cities which have felt the congestion in the London market for Canadian securities. In July the city council, on the advice of their fiscal agents, Messrs. Wood, Gundy Company, sought to overcome the condition by issuing treasury notes. It was decided to issue treasury notes for the sum of \$1,296,399, which is 80 per cent. of the value of the debentures issued.

In 1911 the city debentures were not sold until late in the fall. So far this year no debentures have been sold by the city, but treasury notes have been sold which amount approximately to \$975,000 or £195,000. In addition to this amount the city has credit with its bank on debenture account for \$250,000, and the sale of the balance of the treasury notes is being arranged.

The total amount of the unsold debentures which have been authorized by by-law is \$1,620,499.84, plus the amount of the public library by-law of \$95,000; making a total debenture issue unsold of \$1,715,499.84. Against this there is the sale of treasury notes amounting to \$975,000.

The unsold debentures are as follow:—

By-law.	Purpose.	Amount.
540.	Hospital extension	\$ 75,000.00
560.	Fire alarm and equipment	17,000.00
562.	Sandy Creek water scheme	550,000.00
603.	Eleventh Avenue subway	95,000.00
605.	Sewer and water extensions	170,000.00
609.	Electric power extensions	225,000.00
611.	Street paving	160,000.00
634.	Sidewalks	50,000.00
619.	Permanent improvements to roads	25,000.00
621.	High pressure system	60,000.00
623.	Parks and boulevards	40,000.00
632.	Milling Company bonds	146,000.00
576.	Ornamental street light standards	7,499.84
	Public library	95,000.00
Total		\$1,715,499.84

Sale of Lethbridge Bonds.

Messrs. G. A. Stimson and Company report that they have completed the purchase of \$623,000 city of Lethbridge debentures on behalf of London clients. This completes the sale of all the debentures which the city of Lethbridge has, and places the finances of that city on a good basis.

After a conference with a delegation of the North Vancouver city council, the ferry directorate decided to place by-laws for the re-purchase of the old ferry bonds and for the building of No. 4 ferry, before the people next month; to re-purchase the old debentures (amounting to \$128,000) immediately at an advance of five per cent. over their par value; and to leave the sale of the \$130,000 worth of debentures for the new ferry to a time when the markets are more favorable.

Calgary and Long Term Loans.

Calgary will probably seek powers to issue long term debentures. The city clerk has received information as to the period of loans of other cities. Winnipeg issues debentures on consolidated stock for a term up to 50 years, power purposes 40 years, and waterworks 30 years. In Toronto for certain by-laws they run as long as 40 years.

From Ottawa the information is given that the Ontario legislature limits general by-laws to 30 years, but for parks 40-year bonds are permitted.

The Calgary committee will report their findings to council, and it is likely that an application for this change will be applied for at next meeting of the Alberta legislature.

Nanaimo's Assessment.

The assessment of the city of Nanaimo for 1912 shows a large increase over the assessment for the previous year. This year the total land assessment of the city is \$2,637,000 and the improvement assessment is \$2,016,135, giving a total assessment of \$4,659,135. Last year the land assessment was \$1,649,175, and the improvement assessment \$1,856,660, a total of \$3,505,835. Thus the total assessment of the city for the year 1912 shows an increase over 1911 of about 38 per cent.

The total assessed value of real estate in Montreal this year is \$638,081,015, of which amount \$505,390,451 is available for taxation and \$132,690,565 is exempt. This shows an increase in the gross assessment of \$136,183,390 over last year and in the net assessment of \$124,242,245. The valuation of exempted properties has advanced from \$120,110,419 in 1911 to \$132,690,565 in 1912.

The financial statement of the city of Regina for the first

ten months of the year 1912 shows that its assets are double its liabilities, \$10,870,887.37 of assets and only \$5,847,177.75 of liabilities. Of the total assets, taxes, electric light receipts, rentals, property sales, municipal houses and cottages and loans to property owners affected by the cyclone, make up \$1,051,866.58, while the city properties unsold total \$2,563,628.87.

Another large item is that of city properties in buildings and sites, such as the city hall, hospital, fire halls, power house, car barns site, market building, and exhibition site and buildings, which total \$1,349,985.71.

Municipal works completed, such as sewerage system, pavements, sidewalks, electric light, waterworks system and street railway rolling stock, etc., total \$2,513,196.00, while municipal works uncompleted, but provided for, such as sewer extension, fire fighting apparatus, pavements, trunk sewer, Broad Street subway, and General Hospital extension, total \$2,104,081.89.

Five bids were received for the \$1,200 6 per cent. 10-year debentures of Vernezcanka S.D., Sask. The offer of the Western School Supply Company was accepted.

ST. JOHN RIVER IMPROVEMENT

The International St. John River Commission, a body of men appointed by the governments of the United States and the Dominion of Canada to investigate and report upon the conditions and uses of the St. John River, has received from its board of consulting engineers a report on the possibilities of water storage and channel improvement on the river. As is well known, the St. John River forms an important part of the south-eastern boundary of Canada. For some years past there has been considerable trouble along the river due to the fact that the river is used to a great extent for the lumbering industry. The report covers an area comprising the watershed of the St. John River, and suggests a system of water storage and channel improvements which, if the report is acted upon, will doubtless do much to improve present conditions. If the plans outlined by the board of engineers meet with the approval of the commissioners, an outlay of some millions of dollars will be required, which would be jointly met by the Canadian and the United States governments.

It is expected that the International Commission will make their final report to their respective governments in a short time, and this report of the board of engineers will form an important part of the final report.

NEW SURETY COMPANY IN CANADA.

For the purpose of facilitating the handling of its Canadian business the American Surety of New York has organized the Canadian Surety Company, which will have its home office in Toronto. A controlling interest in the new company will be held by the American Surety, and its operations will be conducted under the general management of Mr. W. H. Hall, for many years manager of the American Surety's branch office in Toronto.

Mr. W. H. Burgess, recently manager of the Albany, N.Y., branch office of the American, will be secretary of the Canadian Surety. Among its stockholders are prominent men of the Dominion. Several Canadian capitalists will be on the board of directors.

The American Surety Company has recently taken over several large lines of suretyship in the Dominion, which will be transferred to the new company. The transfer will probably take place at the end of this year. Thereafter the American Surety will have a close working arrangement with the Canadian Surety Company, under which it will, as heretofore, be able to furnish bonds required by its United States patrons at various Dominion points.

Six gentlemen have been called to the Senate, all to fill vacancies in the representation of the Maritime Provinces. Five will represent Nova Scotia and one Prince Edward Island. The five from Nova Scotia are:—Hon. Nathaniel Curry, Amherst; Hon. W. B. Ross, K.C., Middleton; Hon. William Dennis, Halifax; Hon. E. L. Girroir, Antigonish; Hon. William McKay, Reserve Mines. The new Senator from Prince Edward Island is Hon. P. C. Murphy, of Tignish.

A private banking business. J. O. Hettle & Company, Limited, is being started in Saskatoon. The officers are as follows: President, Messrs. J. O. Hettle vice-president, C. H. Wentz; secretary, W. R. Drennan; treasurer, R. O. Kerans; directors, Fred Engen, Hon. W. C. Sutherland, N. Gardner Boegs, J. A. Forrester and F. W. Young, general manager of the Lake Shippers' Association, Winnipeg. The venture is capitalized at \$200,000 in 2,000 shares, and is legalized to transact all the business of a private bank. Mr. J. O. Hettle is appointed managing director.

T. C. BOVILLE.

Deputy Minister of Finance

NEW TRUST COMPANY

A new trust company has been organized at Montreal under the name of the Credit General du Canada. The capitalization of the company is \$2,000,000, of which \$200,000 has been issued. The company will carry on a general trust and loan company business in Canada and in the United States.

The provisional board of directors includes Hon. F. L. Beique, Messrs. J. A. E. Dubuque, G. N. Moncell, director of Montreal City and District Savings Bank; Alfred St. Cry, A. B. Frigon and Georges Gonthier, the three latter of the firm of St. Cyr, Gonthier et Frigon. The managing director of the company will be M. Gonthier.

ORE PRODUCTION IN MILLIONS

Metal production at the Consolidated Mining and Smelting Company's smelter at Trail in September reached a value of \$715,696, of which 38.2 per cent. was in gold, according to figures recently made public. This is the highest monthly production for the present year and exceeds the average for the previous two months by about \$300,000. Ore treated at the smelter totalled 26,099 tons, so that the average value per ton was a trifle over \$27. As the greater part of the ore smelted came from the company's Rossland mines which are regarded as low grade properties, this average is considered satisfactory. The Consolidated Company's metal production for the first three months of this fiscal year totals \$1,567,867.

Ore production in the Kootenay and Boundary districts for first week in November totalled 51,014 tons, making a total for the year to date of 2,162,902 tons. Smelter receipts for the week were 44,756 tons; for the year, 1,939,934 tons.

Lucky Jim Mine at Bear Lake shipped 213 tons of high grade zinc ore, and the Standard shipped 140 tons of zinc concentrates. Zinc ore and concentrates shipped from the Slocan districts for the year to date total 6,507 tons, and were all exported to American smelters.

The Pelee Island Navigation Company, Limited, has changed its name to Windsor and Pelee Island Steamship Company, Limited.

BRITISH COLUMBIA LIFE ASSURANCE COMPANY

The British Columbia Life Assurance Company, Vancouver, which was incorporated in 1909 with a Dominion charter, with an authorized capital of \$1,000,000 fully subscribed, obtained its license to write business on April 1st, 1911, and up to October 31st, 1912, assurance amounting to \$2,700,000 had been issued. Of this amount, \$1,600,000 has been issued since the beginning of this year. The cash premium income during the first ten months of 1912 amounted to over \$50,000.

The funds of the company are being loaned on first mortgages on improved city and farm property. Securities are scrutinized by the directors and by the insurance department of the Dominion Government.

The following is a list of the directors and officers of the company:—Messrs. Jonathan Rogers, president; J. J. Banfield and L. W. Shatford, vice-presidents; J. N. Ellis, L. A. Lewis, T. E. Ladner, J. T. Phelan, D. G. Williams, F. C. Wade; Sanford S. Davis, general manager; C. F. Stiver, secretary; W. D. Brydone-Jack, L.R.C.P. and S., Edinburgh, medical director.

STRIKE RECORD DURING OCTOBER

According to the statistical record maintained from month to month by the Department of Labor, and published in The Labor Gazette, the number of disputes in existence throughout Canada during the month of October was twenty-one. This compares with ten disputes during October, 1911, and twenty-one during the month of September. From the standpoint of the number of working-days lost, October of the present year shows a great improvement over the corresponding period of 1911. This year the loss in working-days was about 98,000 whereas a year ago it was 191,200. The great majority of the disputes of the past month involved only comparatively small bodies of workmen at scattered points. The number of disputes coming within the scope of the Industrial Disputes Investigation Act was two, affecting 3,300 employees, as compared with three disputes affecting 7,500 employees in October, 1911. The most serious dispute was that involving coal miners on Vancouver Island, which began in September. On the whole, in view of the industrial activity which characterized the past summer, October may be regarded as closing under exceptionally favorable conditions as regards labor disputes.

LEGAL NOTICE

DOMINION WHEEL AND FOUNDRIES, LIMITED.

PUBLIC Notice is hereby given that under the First part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 15th day of November, 1912, incorporating Gerard Ruel, Reginald Herbert Montague Temple, and Samuel Percy Biggs, barristers-at-law; William Watson Evans, student-at-law; and Robert George Osborne Thomson, secretary, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on trade or businesses of iron makers, steel makers, steel converters, smelters, engineers, tinplate makers and iron founders in all their branches; to work, make merchantable, sell and deal in iron, steel and other metals, lumber and other materials and all or any articles consisting or partly consisting of iron, steel, copper, wood or other materials and all or any products thereof, and to carry on business as manufacturers and dealers in chemicals and metallurgists and mechanical engineers; (b) To acquire by lease, license, purchase or otherwise trade marks, trade names, labels and designs and hydraulic, electric or other power and to utilize the same and dispose of any surplus power; provided however that any sale, transmission or distribution of hydraulic, electric or other power beyond the limits of the lands of the company shall be subject to local and municipal regulations in that behalf; (c) To construct, acquire, operate, hire, lease, sell or otherwise hold and dispose of real estate and personal property, manufactories, sheds, stores and warehouses, for the manufacture and for the reception and storage of goods and merchandise with the requisite plant, machinery and appliances; (d) To construct or acquire by lease, purchase or otherwise and to operate and maintain undertakings, plant, machinery, works and appliances for the purpose or any of the purposes aforesaid; (e) To hold, purchase or otherwise acquire and to sell, assign, transfer or otherwise dispose of shares in the capital stock, bonds or other evidences of indebtedness created by any corporation or corporations having objects similar or in part similar to the objects of this corporation, and while the holder thereof to exercise all the rights and privileges of ownership, including the right to vote thereon, notwithstanding the provisions of section 44 of the said Act; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business and calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which this company is authorized to carry on or possessed of property suitable for the purposes of the company and to issue paid-up or partially-paid-up shares of the capital stock of this company in consideration or part consideration thereof, or for any property or rights acquired by this company; (h) To apply for, purchase or otherwise acquire any patents, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company,

or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired; (i) To enter into partnership or into any agreement for sharing of profits, union of interest, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as to directly or indirectly benefit the company; and to lend money to, guarantee the contract of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, notwithstanding the provisions of section 44 of the said Act, and to sell, hold, re-issue with or without guarantee or otherwise deal with the same; (j) To enter into agreements with any authorities, municipal, local or otherwise that may seem conducive to the company's objects or any of them, and to obtain from any such authority any rights, privileges or concessions which the company may think it desirable to obtain and to carry out, exercise and comply with any such arrangements, rights, privileges or concessions; (k) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company or for any other purpose which may seem directly or indirectly calculated to benefit the company; (l) To construct, improve, maintain, work, manage, carry out or control any roads and ways and tramways, branches or sidings on lands owned or controlled by the company, bridges, reservoirs, water courses, wharves, manufactories, warehouses, electric works, shops, stores, buildings and other works and conveniences which may seem calculated directly or indirectly to advance the company's interest, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (m) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (n) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (o) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether in part similar to those of the company; (p) To adopt such means of making known the products of the company as may seem expedient; (q) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (r) To do all or any of the above things as principals, agents, contractors, trustees or otherwise and either alone or in conjunction with others; (s) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Dominion Wheel and Foundries, Limited," with a capital stock of two hundred and fifty thousand dollars, divided into 2,500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 15th day of November, 1912.

THOMAS MULVEY,
Under-Secretary of State.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

THE ROYAL BANK OF CANADA

Dividend No. 101.

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of December next, to shareholders of record of 15th November.

By order of the Board,

E. L. PEASE,

General Manager.

Montreal, P.Q., October 11th, 1912.

THE CANADIAN PACIFIC RAILWAY COMPANY

DIVIDEND NOTICE

At a meeting of the Board of Directors held to-day a dividend of two and one-half per cent. on the Common Stock for the quarter ended 30th September last, being at the rate of seven per cent. per annum from revenue and three per cent. per annum from interest on the proceeds of land sales and from other extraneous assets, was declared payable on 2nd January next to shareholders of record at 3 p.m. on 2nd December next.

By order of the Board,

W. R. BAKER,

Secretary.

Montreal, November 11th, 1912.

THE CANADIAN BANK OF COMMERCE

Dividend No. 103

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this institution has been declared for the three months ending the 30th November, 1912, together with a bonus of one per cent., and that the same will be payable at the bank and its branches on and after Monday, 2nd December, 1912. The transfer books will be closed from the 16th to the 30th November, both days inclusive.

By order of the Board,

ALEXANDER LAIRD,

General Manager.

Toronto, 30th October, 1912.

THE BANK OF NEW BRUNSWICK

Special Meeting of the Shareholders.

NOTICE is hereby given that a special general meeting of the shareholders of The Bank of New Brunswick will be held at the office of the said Bank in the City of Saint John, New Brunswick, on Monday, the 9th day of December, 1912, at the hour of eleven o'clock in the forenoon, for the purpose of considering an agreement for the sale by the said The Bank of New Brunswick of the whole of its assets to the Bank of Nova Scotia upon the terms set out in such agreement, a copy of which is mailed to each shareholder with this notice, and, if deemed advisable, of passing a resolution or resolutions approving the said agreement and authorizing the President and General Manager of The Bank of New Brunswick to affix thereto the corporate seal of the Bank and to sign and execute the same for and in the name of and on behalf of the Bank; and also for the purpose of considering and, if deemed advisable, of passing all such other and further resolutions for fully carrying out the said agreement and the terms thereof, as the shareholders shall consider expedient or advisable, and for the purpose of authorizing the Board of Directors to give all such notices and make all such applications and to pass and execute all such other acts, resolutions, deeds, instruments, matters and things as may be deemed necessary for procuring the approval of the Governor-in-Council to the said agreement and for carrying out the same and for winding up the affairs of the Bank and distributing the proceeds of the said sale.

By order of the Board,

C. H. EASSON,

General Manager.

NORTHERN CROWN BANK

Head Office, Winnipeg

Dividend No. 12

Notice is hereby given that a dividend at the rate of six per cent. per annum upon the paid up capital stock of this institution has been declared for the six months ending November 30th, 1912, and that same will be payable at its banking house in this city and at all its branches on or after the second day of December next to shareholders of record of the fifteenth day of November, 1912.

By order of the Board,

ROBERT CAMPBELL,

General Manager.

Winnipeg, October 22nd, 1912.

THE BANK OF TORONTO

Dividend No. 125

NOTICE is hereby given that a dividend of TWO AND THREE-QUARTERS PER CENT. for the current quarter, being at the rate of eleven per cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared; also a Bonus of ONE PER CENT., and that the same will be payable at the Bank and its Branches on and after the 2nd day of December next, to the Shareholders of record at the close of business on the 15th day of November next.

THE TRANSFER BOOKS will be closed from the 16th to the 25th days of November next, both days inclusive.

By order of the Board,

THOMAS F. HOW,

General Manager.

The Bank of Toronto, Toronto, October 30, 1912.

CANADIAN PACIFIC RAILWAY COMPANY

Issue of New Ordinary Capital Stock

Notice is hereby given that, pursuant to Resolution passed at the Special General Meeting of Shareholders on 2nd October, 1912, an issue of \$60,000,000, additional Ordinary Capital Stock of the Company, or 600,000 Shares of \$100 each has been ordered by the Board of Directors.

The said Stock will be offered to the Shareholders of record at 3 p.m. on Thursday, the 2nd day of January, 1913, at the price of one hundred and seventy-five dollars per share, being at a premium of seventy-five per cent. over and above the par value thereof, on the basis of thirty per cent., or three shares in ten of their respective holdings.

The right to subscribe will expire at 3 p.m. on Thursday, 13th February, 1913.

Payments will be received at the Bank of Montreal, London, New York or Montreal, as follows:—

Twenty per cent. or \$35 per share on subscription on or before 13th February, 1913.

Twenty per cent. or \$35 per share on 14th April, 1913.

Twenty per cent. or \$35 per share on 16th June, 1913.

Twenty per cent. or \$35 per share on 18th August, 1913.

Twenty per cent. or \$35 per share on 20th October, 1913.

Interest at the rate of 7 per cent. per annum will be paid in October, 1913, from the due date of each instalment to September 30th, 1913, on instalments up to and including that of 18th August, 1913, which have been paid on or before due dates.

All shares of the issue on which full instalments have been paid in full on the due dates will rank with the existing stock for the full dividend accruing for the quarter ending 31st December, 1913.

A circular containing the terms of subscription and payment and enclosing warrants of subscription will be mailed to the Shareholders on or about the 15th day of January, 1913.

By order of the Board,

W. R. BAKER,

Secretary.

A writer describes the trials and troubles of a technical man whose stenographers insisted on transcribing their notes incorrectly. He would say: "The tube wall is stressed circumferentially," and the letter would read: "The tube wall is dressed reverentially." Or, "A wattmeter in use" would come out as, "What's the matter with us." "Synchronizing force," appeared as "A singing icicle farce"; and "Helical reducing gears" appeared one day disguised as "Hellish reducing tears."

DIVIDEND NOTICE

UNION BANK OF CANADA

Dividend No. 103

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, and that the same will be payable at its Banking House in this City, and also at its branches, on and after Monday, the second day of December next.

The Transfer books will be closed from the 16th to the 30th of November, both days inclusive.

The Annual General Meeting for the election of Directors and other general business will be held at the Banking House in the city of Winnipeg, on Tuesday, the 17th December, 1912. The Chair will be taken at 12 o'clock noon.

By order of the Board.

G. H. BALFOUR,
General Manager.

Winnipeg, October 22nd, 1912.

CALGARY'S GAS SUPPLY

(Special Correspondence.)

Calgary, November 12.

What will be the outcome of the agitation for municipal natural gas in Calgary, is difficult to predict. The Canadian Western Natural Gas Company which has the franchise, is standing pat without a word officially in reply to all critics. It is said, that the company, only a short time in operation, does not yet know what the cost of distribution and maintenance will be. If, however, it is found that for domestic use and heating of business blocks and institutions the present rate of 35 cents per thousand feet is a free revenue producer, the company will of its own volition reduce the rate in order to assume itself against the coal competition. When the branch lines of railway, are prepared to haul gas as they will be in a short time, this city will have the advantage of a cut in freight rate equivalent to \$1.50 per ton on coal. Pending a better understanding of the gas company's franchise the city council decided not to commit itself to any settled policy, so that for the moment civic interference is eliminated. The whole problem is one of those in the solution of which almost anything is liable to happen. That there will be competition either in cheaper coal or natural gas, from some source, is the generally accepted idea, but whether municipally or by private enterprise is not certain.

Differences between the Canadian Pacific and the Canadian Northern railways having reached adjustment, the work on the Canadian Northern is being rushed and in a few weeks should be near the city limits. Several cut-offs and branches by the Canadian Pacific Railway will add to the feeders of Calgary's business, are progressing to the finished stage. Telegraph lines too are connecting many of the smaller towns in the contiguous territory and a new through wire is strung to Vancouver.

LONDON MARKET SHOWS IMPROVEMENT

Alberta Government and New Westminster City Make Issues—Ten-year Loans Seem to be Popular

The London market is showing signs of a slight recovery from the heavy congestion of unabsorbed securities which have depressed it for several months past. Canadian government and municipal securities have been in better demand. If these good signs are not obliterated by an avalanche of new securities, the market may improve from month to month.

The issue was made in London last week of 4 per cent. bonds of the Alberta Government to the amount of £1,000,000. They were underwritten through Lloyd's Bank at 97. These bonds are to take up an equal amount of treasury bills which were authorized for the purpose of carrying out improvements and additions to the telephone service and other public utilities.

The only other direct Albertan loan now on the market is 4 per cent. debentures issued in 1909 and repayable in 1939. These are quoted at par, but including five months' accrued interest, amounting to nearly 2 per cent.

Encouraged by Success.

The issue of the Alberta province loan at present was probably encouraged by the success of two colonial loans that have recently been issued. The city of Sydney, New South Wales, ten-year loan of £500,000 recently offered at 97 was largely over-subscribed.

The Queensland government loan of £2,000,000 fours, which was recently offered, was also successful, the underwriters taking only 20 per cent. Only £500,000 of this amount represents new borrowing, as the new issue meets the maturity of £1,466,000 old 4 per cents.

Ten Year Loans Popular.

It is said that the Alberta issue is the forerunner of several important Imperial loans which will shortly be issued in London. Ten year loans appear to be in vogue in the London market. The Alberta issue is one of several such loans raised recently.

New Westminster's Issue.

The city of New Westminster offered in London this week £256,300 in 4½ per cent. debentures, to yield about £4 14s. per cent.

Some confusion occurred as to the Sydney issue overseas. Canadian correspondents in London apparently took it for granted that the Sydney referred to was in Nova Scotia, whereas it was Sydney, New South Wales. The Monetary Times was able to give the first intimation that the cabled messages were incorrect.

London papers gave considerable prominence to Mr. F. Williams Taylor's address on Canada's borrowings and credit, a summary of which appeared in The Monetary Times last week.

The Standard says it is evident, reading between the lines, that Mr. Taylor felt, while he had a good case for maintaining that in the aggregate Canada had under, rather than over-borrowed, he was on more delicate ground when dealing with some of the smaller municipal loans and certain industrial ventures.

Straining for Terms.

As regards the former, there was the veiled suggestion that smaller municipalities, by straining for terms scarcely consistent with their standing, had impaired rather than strengthened the popularity of loans of that description.

Some Poor Promotions.

Another message from London states that the addresses both of Mr. Taylor and Hon. George E. Foster on Canadian borrowings, made an excellent impression, and carried the conviction that the governments, federal and provincial, and also the municipalities, are moving within the limits of the most conservative finance.

Hon. Mr. Foster's evidence of the solid basis of production from the soil was regarded as conclusive. Many heterogeneous Canadian issues, some of which have been severely criticized, were shown to have been promoted and sponsored by British, not Canadian, banks and financiers.

DEBENTURES AWARDED.

Verneozanka, Sask.—\$1,200 6 per cent. 10 years, to Western School Supply Company.

Suffield S.D.—\$4,000 6 per cent. 10 years, to Messrs. G. A. Stimson & Company, Toronto.

Lethbridge, Alta.—\$623,000 4½ per cent. 30 years, to Messrs. G. A. Stimson & Company, Toronto.

Mount Forest, Ont.—\$14,000 5 per cent. 11 instalments, to Messrs. Wood, Gundy & Company, Toronto.

Chiniquacousy Township, Ont.—\$12,000 5 per cent. 20 instalments, to Messrs. Wood, Gundy and Company, Toronto.

Mr. Georges Haardt, who has been associated with Lieutenant-Colonel A. Smart, has decided to establish, with several partners, a banking and commission business in Montreal under the name of Messrs. Georges Haardt and Company. This new house will have for its object the institution and organization for its own account and that of others of all kinds of public and private enterprises. The new firm is said to be in an advantageous position to influence the necessary capital for the development of enterprises in Canada.

STOP THE FIRE WASTE.

The Canadian cannot hear too much about the costly fire waste occurring in his country every hour. The report of Fire Chief Tremblay, of Montreal, on this question, and printed in detail on other pages, is an important contribution to a discussion which is gradually growing into a widespread protest. Mr. Tremblay does not express many new ideas, but he reinforces old arguments with some startling statistics of recent date. He recalls the fact that, while serious factors are working in the cause of heavy fire waste, they are opposed by comparatively little action. Although his arguments refer chiefly to Montreal, at the same time the general principles are applicable to almost every town and city in the Dominion.

He points out that gambling in insurance is rife, and that it leads to arson in order to benefit by over-insurance on stock. Forty per cent. of Montreal's fires are said to be of incendiary origin. No effort is made, he also says, to make many buildings comply even with the dictates of common prudence. His remedy for that is drastic. People wishing to erect a building should submit plans to the building inspector, and in case of fire, if it were found to be caused by construction not in compliance with the by-laws and with the plans previously submitted, the proprietor should lose his insurance. Montreal's fire chief thinks that the building by-laws should be radically revised, and declares that gross carelessness should be considered a crime.

-----------------------------------	-----

In European countries a man who causes a fire is responsible not only for his own damage, but for the damage to neighboring property. In this country, a man is punished for causing the spread of disease by his carelessness, but a person may throw a lighted cigarette butt in a waste-paper basket, and cause appalling loss of life, and no law can touch him. In this connection he urges that the Fire Commissioners' Court should be empowered to fine people who cause fires through carelessness in that way.

Mr. Tremblay is likely to receive objections to his suggestion that over-insurance is the work of the insurance agent, whose only interest in the matter is the commission he gets out of it, and who will recommend a risk to almost anybody for the sake of getting a commission. The experience of the legitimate licensed companies is that a large number of their risks are under rather than over-insured. The same companies are not anxious to get business at any price. That kind of insurance develops men who burn their properties for insurance, and ultimately it leads to the insurance company's disaster. Over-insurance undoubtedly exists, but chiefly with weak companies, which take the business rejected by the strong concerns, and with unlicensed companies. If the honest citizen places his fire insurance with those companies which conform to the laws of the country, that will leave questionable companies and dishonest insurers in their own sphere.

But the public has a duty even in that sphere. When fires are thought to be of incendiary origin it should be the specific duty of an official to track the

criminal and bring him to justice. Every fire insurance manager knows the frequency of well-grounded suspicions in regard to incendiary fires. They also know the extreme difficulty of obtaining a conviction against a suspect. These facts emphasize the necessity of the appointment of fire marshals in every province. Manitoba is the only province which has such an officer. Among his duties, are the investigation of the causes of fires, the placing of the responsibility therefor in its proper place, and a ceaseless search for the incendiary.

The Monetary Times has advocated the appointment of fire marshals in Canada for many years, and still hopes that the provincial governments will be forced to action by the increasing annual fire waste. Mr. Tremblay has based some of his calculations on the combined fire losses of the United States and Canada. The Canadian losses alone, which are tabulated by *The Monetary Times* every month, have aggregated, from January, 1909, to October, 1912, no less than \$83,905,225. The fire waste of Canada has equalled \$48 every minute since the dawn of 1912.

ALBERTA'S RANCHING PROBLEM

The event of the week to Southern Alberta at large was the visit of the Commission appointed by the Minister of the Interior to inquire into the advisability of setting aside certain areas of the southern portion of the Western prairie provinces for grazing, or, in other words, determining just what should be recommended to the Minister as the right solution of the ranching problem. It is not difficult to imagine the difference between the conditions of twenty, or even ten, years ago, when the whole country was practically one big cattle range, and to-day, when land-seekers have encroached on the cattleman's run, and barbed wire fences surround often the best or only watering-places for miles. The inevitable kept happening, so, to save the industry from either utter extinction or being controlled by a few of the most powerful interests, the majority of those engaged in the business asked for remedial regulations. Before these could be granted, however, a thorough investigation was necessary, and this, with the session of the Commission in Calgary, is nearly complete. In response to the request that they should state to the Commission the improvements required, the ranchers have formulated a series of recommendations, varying somewhat in detail with the locality, but all along the same general lines. Hitherto, since the land-seeker became a factor to be catered to by the immigration people, ranching leases have been subject to termination at 'two years' notice, and this, in the open country, has led to withdrawal by some and curtailment by others, owing to the uncertainty. There is nothing derogatory to the Province that there should be certain areas naturally adaptable to nothing so well as ranching, and a proper realization of this will result in a satisfactory adjustment to all concerned.

Chief among the reforms requested is the long-term lease, at least fifteen years, and preferably twenty-one, with the right of renewal; no corporation or partnership to have more than four townships in area, and no single lessee more than two townships.

Minor regulations, dealing with horse and cattle ranches as distinguished from sheep, will remove the friction too often underlying the relations between the cow-puncher and he who herds the woolies. As it requires at least five or six years to place a cattle ranch on its best producing basis, the reasonableness of a long lease is recognized, as is also the request to restrict the holdings of any one interest. The other recommendations, while important to those engaged in the business, are more a matter of detail, such as that the stock rated shall be one head to every thirty acres, permission to farm some of the land, the question of taxation, either by the municipality or the province, and the status of the two sections in every township set apart

for school lands. It is worth noting in this connection that cattle are constantly increasing in price, and the prospect, for a time at least, is that there will be no decline.

LOANS ON LIFE INSURANCE

Many problems are presented to life insurance companies in regard to loans made to policyholders. While times of depression multiply such applications for funds, unfortunately it is also true that in days of prosperity, this medium is utilized to secure money for luxuries. Policyholders are not always prompt in paying back what they have borrowed. Plans which some companies are testing may prove successful, as they allow the policyholder to return the money as he is able, without requiring him to wait until he has the ready cash to make a lump sum payment.

One of the most interesting arguments at the recent meeting of the Association of Life Insurance Presidents in New York was on the subject of policy loans. Various schemes were discussed, and among other things the suggestion was urged that a company should reserve the right to delay thirty days before granting loans, as this might serve a good purpose in case of financial panic.

It would be difficult to insist upon a plan of that nature unless every life insurance company would adopt it, and that is improbable. It is much better to make reasonable inducements for a policyholder to pay back, from time to time, the money which he has borrowed.

The experience of most companies has been that the proportion of all policyholders taking advantage of the loan provision is increasing yearly, as well as the amounts loaned. It would, perhaps, be impracticable to curtail the loan privilege, but the policyholder should frequently be told of the advantage in repaying a loan.

If the carrying of loans becomes burdensome the man is liable to lapse his insurance. He can never secure the same amount of protection at the same cost by taking up a new policy, owing to the advance in age, which would call for a higher premium. The borrowing of money by policyholders for the purchase of luxuries should be discouraged. The original intention of policy loans was to furnish funds for the payment of future premiums.

SMALL CHANGE

The superstitious may as well have 1913 next year as at any other time.

Four banks this year have paid a bonus in addition to the regular dividend. This helps to keep the double liability clause in memory's background.

CANADIAN LOANS ARE SAFE

Analysis of Amounts Borrowed in London Market—
Ability of Canada to Meet Obligations is Shown

The statement has been made that Canada is over-borrowing in the London market, the cry has been taken up, and now both the press and the public generally are expressing their views on the subject. Still more serious is the fact that men in high financial places voice this opinion, and as the maintenance of our high credit and an uninterrupted flow of capital are essential for the Dominion's further development, introspection becomes imperative in order to ascertain if in fact Canada is open to criticism in this respect. It is gratifying to Canadians to know that there has been little, if any, ill-natured comment, but harm has been done nevertheless, and more will follow unless we are able to refute the charge. Before the Royal Colonial Institute Mr. F. Williams Taylor, manager in London of the Bank of Montreal, thoroughly analyzed the position.

The assertion, he said, may be accepted without hesitation that little effort has been made to analyze our borrowings, and therefore it follows that the criticism excited abounds in generalities and is based on hasty conclusions and wrong premises. Surely it is sound economics and irrefutable logic that no borrower can be charged with over-borrowing provided he is in a position to pay his interest regularly and be undoubted for the principal sum at maturity? If so, then Canada is not a fair mark for unqualified criticism.

Credit Has Been Established

It is common knowledge that Canada has been a large and popular borrower in London during the past few years. For instance, the federal government of the Dominion has been able to renew its maturing obligations and finance its fresh requirements on terms more favorable than any other colony or empire borrower, with the sole exception of the imperial government itself. The credit of our provinces and large cities has become so well established that they have been able to float loans on highly favorable terms, as good, for example, as many favored European governments and other high-class borrowers. Secondary Canadian towns of comparatively limited population have borrowed on a 4½ per cent. basis to the envy of cities twenty times their size in the United States, South America and elsewhere. Our railways generally have borrowed on terms equal to the best American roads. It is an interesting and historic fact that the Canadian Pacific Railway sold a million pounds of its four per cent. debenture stock in London at over par in the midst of the panic of 1907, when high-class American railway securities were unsaleable within reasonable distance of the same basis. As for general investment, public and private, in public utilities, in land and industrials, money has been freely forthcoming. This flow of capital to Canada has not been unattended by heart-burnings on the part of those whose interests lie in other portions of the empire or in foreign countries. Pessimists have not been lacking to predict misadventure in consequence of the confidence in Canada thus practically expressed. Until recently they were in such a hopeless minority that their gloomy prognostications were unnoticed; now, however, from one cause and another, pessimistic statements are receiving more attention, and for the first time in ten years or more Canada is called upon to justify borrowings necessitated by her growth and development.

Canadian Banks Alive to Responsibilities

As a matter of fact, every intelligent Canadian welcomes analysis and investigation, in the full knowledge and belief that the results will be to allay latent or expressed anxiety, and re-establish a full measure of confidence—confidence vital to Canada and of vast importance to the empire as a whole.

May I be permitted to add, continued Mr. Taylor, that no section of the community views more regretfully some of the Canadian public issues made in London or appreciates more keenly the necessity of preserving our credit in this market than Canadian bankers. American money will be forthcoming as in the past for the development of private enterprise, and English money for such purposes will doubtless follow in increasing volume, but the federal government, the provincial governments, important municipalities and the great transportation companies, must be mainly financed in London. That is one reason why the safeguarding of the national credit of Canada in this, the greatest of all money markets, has been, is to-day, and will continue to be, one of the most important accepted duties and responsibilities of the Canadian banks with branch offices in London, and it also explains why they have so persistently declined to become the medium for public emissions of speculative character.

According to the most reliable English records, Great Britain and Ireland have invested more money in Canada

than in any other country—excepting only the United States—the total being approximately £430,449,000, made up as follows:—

Dominion government	£ 50,484,000
Provinces	16,700,000
Municipals	32,327,000
Railways	236,129,000
Miscellaneous	74,809,000

Sundries not publicly recorded (estimated)....	£410,449,000
	20,000,000

£430,449,000

In ten years Canada has borrowed in this market through the medium of public issues about £205,043,900, plus probably £20,000,000 invested privately, of which there is no published record. The comparative figures to-day as compared with ten years ago are as follows:—

	1902.	1912.	Increase.
Dominion Govt. ..	£ 36,370,000	£ 50,484,000	£ 14,114,000
Provinces	9,533,000	16,700,000	7,167,000
Municipals	9,299,100	32,327,000	23,027,900
Railways	125,375,000	236,129,000	110,754,000
Miscellaneous ...	24,828,000	74,809,000	49,981,000
	£205,405,100	£410,449,000	£205,043,900

Sundries not publicly recorded (estimated)	20,000,000
--	------------

£430,449,000

Included in the above are:

Railway loans guaranteed by Dominion Govt. ..	£17,000,000
“ “ “ “ by provinces	13,800,000

Taking the items seriatim, it will be seen that the debt of the Dominion government aggregates £50,484,000, in addition to which there are £17,000,000 of railway guarantees forming a portion of the railway total of £236,129,000.

Represented by Tangible Assets

The amount of fresh money borrowed by the Dominion government during the past ten years is £14,114,000, the remaining loans floated during that period having been renewals of maturing obligations. It should be noted that the sum in question has been embarked in remunerative enterprises and in public works, etc., represented by tangible assets. In view of the development which has taken place in Canada during the period in question £14,114,000 is—to put it mildly—a modest amount to have borrowed, and indeed the total debt is unimportant in comparison with the vast resources of the Dominion. It is not out of place to add that a knowledge of the moderate extent of the demands of the government of the Dominion of Canada on the London market for fresh money during the past ten years is confined to a very limited circle, though the information has of course been at the disposal of all who cared to investigate.

There is only one question the English investor need ask in this connection, viz., is his investment safe? And the answer is: surely no sane person can doubt the Dominion's ability to meet its obligations, both in the way of interest and principal. The fact that Canada is more immune from a war of invasion than practically any country of importance in the universe, with the exception of the United States, is in itself an important safeguard.

Financed on Favorable Terms

Canada has admittedly been well financed. No other country—certainly no other of the dominions, including India—could have financed its requirements on more favorable terms, or with less straining of credit. It would be superfluous to say more, except that the Dominion's 3½ per cent. stock of 1930-1950, which is the standard of its credit, precedes India stock in price and competes for second place with British funds in freedom of market. For the first seven months of the present fiscal year the surplus revenue of the government of the Dominion of Canada was \$8,000,000, which sum will doubtless be materially increased during the remainder of the year.

Next in order come the provinces, whose funded and floating debts are as follows:—

Name.	1902.	1912.
Alberta		£ 411,000
British Columbia	£2,199,000	1,646,000
Manitoba	859,000	2,553,000
New Brunswick		450,000
Nova Scotia	354,000	995,000
Ontario		2,773,000
Quebec	4,621,000	3,071,000
Quebec, in Paris	1,500,000	1,325,000
Saskatchewan		1,411,000

	£9,533,000	£14,635,000
Treasury bills		£ 2,065,000

£16,700,000

Principal and interest of railway loans guaranteed by provinces:—

Alberta	£3,000,000
Manitoba	4,000,000
British Columbia	1,500,000
New Brunswick	800,000
Saskatchewan	3,000,000
Ontario	1,500,000

The total outstanding funded debt of the provinces of Canada is some £14,635,000, plus treasury bills about £2,065,000, in addition to which there are railway guarantees aggregating £13,800,000—an increase during the past ten years of about £7,167,000, or of £20,967,000 including (vide railway loans).

Nothing in Figures to Justify Criticism

There can be nothing in these figures to justify criticism—certainly not from those conversant with the great resources, natural and otherwise, of these immense political sub-divisions of the Dominion. Who is there to assert that our provinces have over-borrowed or borrowed too rapidly, or that they are not undoubted for both the principal and interest of their financial obligations? Their securities have not been admitted to the British trustee list it is true, but on intrinsic merit they could be admitted—indeed, it seems a fair statement to make that there are few sounder securities in the British Empire. It is doubtful if the real merit of the securities of the provinces has ever been fully realized in this country. This is due to the fact that here the term "province" is conventionally applied to the country in general outside of London other than Scotland and Wales, whereas in Canada a province corresponds with a state of the United States. Thirty-four years ago Canada was constitutionally a vast disjointed territory composed of scattered provinces and areas stretching from the Atlantic to the Pacific, and from the international boundary line north to—in the words of a local Bret Harte—"a land where the mountains are nameless, and the rivers all run God knows where."

Welding of Provinces.

Under the memorable administration of Sir John Macdonald, the process of political integration known as Confederation was inaugurated in 1867, and presently the whole country became welded into the Dominion of Canada. Far from the financial securities of the provinces being weakened by Confederation, they were strengthened, each province having become an integral part of a great country. The provinces might possibly over-borrow in the future—governments, corporations, companies and individuals have been known to do so—but up to the present they have kept well within bounds, and the bulk of the proceeds of the loans floated in the London market has been judiciously expended in legitimate development work. As a matter of fact, though the excellence of the securities of the provinces has not been fully appreciated in London, their credit has never been questioned. Such being the case, it seems unnecessary to say anything more under this heading, but to complete the argument it should not even be admitted that the provinces have borrowed on too favorable terms. In point of merit their securities are undoubtedly as much entitled to admission to the trustee list as, say, Southern Nigeria, Straits Settlements and Newfoundland, but being outside the charmed circle let them at least stand next to trustee stocks. If this be admitted then their price should be in keeping. As the debts of the respective provinces are small the market in their securities is necessarily somewhat narrow.

Municipalities Borrowings in London

The aggregate of Canadian municipal loans in London is £32,327,000, including treasury bills.

Name.	1902.	1912.
Burnbay		£ 118,000
Calgary		1,906,000
Edmonton		1,804,000
Fort William		108,000
Hamilton	£ 482,000	687,000
London	44,000	44,000
Maisonneuve		232,000
Moncton	69,000	55,000
Montreal	4,015,000	6,346,000
Moose Jaw		190,000
New Westminster		221,000
North Vancouver		256,000
Ottawa	235,000	373,000

Toronto	2,600,000	2,640,000
Vancouver	269,000	3,374,000
Victoria	61,600	684,000
Westmount		100,000
Winnipeg	364,500	4,825,000
	£9,299,100	£27,557,000
Treasury bills		4,770,000
		£32,327,000

Flotations Have Been Rapid

It is doubtless the case that public borrowing in London on the part of small Canadian municipalities has attracted much attention, aroused some unfavorable comment, and probably been responsible—or at least partially responsible—for the views openly expressed that the Dominion has been borrowing too freely.

When, however, an analysis is made it reveals the fact that out of the total debt of £32,327,000 of Canadian municipalities in this market, the sum of £23,933,000 is divided among such high-class and undoubted borrowers as Montreal, Toronto, Ottawa, Quebec, Winnipeg, Vancouver, Victoria, Hamilton and St. John, New Brunswick, leaving £8,394,000 divided among twenty of the thriving cities and towns of Canada.

The public flotations by this group of twenty have been rapid and continuous, and as the emissions have been freely advertised a greatly exaggerated idea as to the aggregate amount has not unnaturally got abroad.

Not a Doubtful One in List

There may be people who think the sum in question excessive, but those possessed of a knowledge of Canada and the rapidity with which small towns develop into important ones, would not share in this opinion. There is not, in my opinion, a doubtful investment in the list, and if the security is good and payment of principal and interest, humanly speaking, certain, there is little room for criticism. It may be that the prices secured by the smaller places especially, have been rather audacious, but is this not a matter regulated by the powerful rule of supply and demand? Competition for Canadian business in this class has been keen, and Canadian cities have reaped the benefit.

(To be concluded.)

CAUSE OF THE DESTRUCTION OF THE CANADIAN TAMARACK

The almost total destruction of the tamarack, or larch, which took place throughout Eastern Canada almost thirty years ago, was caused by an insect, the Larch Sawfly. It appeared again about eight years ago, and in its spread westward it is repeating its former devastation on the younger tamaracks.

To all who are interested in our forests the appearance of a comprehensive account of this insect entitled "The Large Larch Sawfly, with an account of its Parasites, other Natural Enemies and Means of Control," by the Dominion entomologist, Dr. C. Gordon Hewitt, will be welcome. This has been published by the Dominion Department of Agriculture as Entomological Bulletin No. 5 and Bulletin No. 10 of the Second Series of the Experimental Farms Bulletins, and may be had free, on application to the Publications Branch, Department of Agriculture, Ottawa.

Dr. Hewitt has studied the life-history, habits and means of control of this injurious sawfly, both in England and North America. In England, it was found that the natural enemies, especially parasitic insects, effectively gained control of outbreaks of the insect. Other natural enemies were mice and birds and a system of bird encouragement was started on a large scale. The devastating spread of the sawfly in North America was due to the comparative absence of the natural means of control. Several important species of parasites new to science were discovered and have been studied and described. To increase the number of natural enemies of the sawfly, attempts are being made to introduce and establish in Canada parasites which were discovered in England and which appeared to control the pest there. An account of these interesting experiments and of the methods devised to encourage the birds and other means of control are described in this bulletin which consists of forty-two pages and contains twenty-six figures, including a colored plate. The publication of this bulletin is indicative of the attention which the Division of Entomology is now devoting to the insect pests of our forests which are responsible for incalculable loss each year.

Mr. Norman Dawes has been elected managing director of National Breweries Limited, as successor to Mr. E. C. Pratt.

DEVELOPMENT OF POWER IN EASTERN CANADA

Two Large Schemes Before Government for Consideration—Suggestion of Hon. Clifford Sifton

Monetary Times Office,
Montreal, Nov. 28th.

The latest factor in the power field is the Eastern Canada Power Company, it being through the instrumentality of that company, apparently, that Mr. McGibbon is putting forward the following scheme. The formation of this company was announced fully a year ago, it being stated that a wonderful scheme of power development was contemplated by the concern. Sir Max Aitken was said to be the organizer of the company, and it was stated that the amount of power to be produced was very large. The story attracted considerable interest at the time, especially as there then seemed a probability of keen rivalry between the Montreal Light, Heat and Power Company and the Canadian Light and Power Company, each of which companies possessed hydraulic developments thirty miles from the city in the vicinity of Cedar Rapids. About the same time, also, Mr. D. Lorne McGibbon had succeeded in getting control of the Cedar Rapids power. Just where the Eastern Canada Power Company was going to get its enormous power from was somewhat of a mystery.

In the course of the following year Mr. McGibbon's plans for developing the Cedar Rapids Power were matured, and it began to be rumored that he was selling out control to certain other interests. The story was at first denied, but its truth was ascertained later. It was admitted that some of the principal interests in the Montreal Light, Heat and Power Company and the Shawinigan Water and Power Company were the purchasers. This meant that the Montreal, Light, Heat and Power Company was now in control of practically all the sources of hydraulic power located within commercial distance of Montreal.

Larger Scheme Proposed.

A recent dispatch from Ottawa is to the effect that Mr. McGibbon now appears in a larger power scheme. It is proposed to build an enormous dam in the vicinity of Coteau, Cedar, Split Rock and Cascade Rapids for the purpose of developing an hydraulic power with an estimated capacity of 1,000,000 h.p. The dam will connect up a number of islands in the vicinity mentioned, and will have a total length of, perhaps, fourteen miles. The rapids will thus be dammed up to a level with Lake St. Francis, thus obliterating them and flooding a portion of the Soulanges Canal. The proposal is from the Eastern Canada Power Company, and behind it are Mr. McGibbon, and with him Sir Max Aitken. The proposal has already been brought before the government at Ottawa, and, so it is believed, has made progress with the powers there.

The other big power scheme is the Long Sault Development Company, which is backed by the Aluminum Company of America. This, also, is before the government at Ottawa, but whether it is in any way opposed to the Eastern Canada Power scheme or not is impossible to say at this moment. It may be remembered that the Long Sault scheme was brought up at Ottawa during the regime of the Liberal Government and met much opposition from the Conservatives, and, on the recommendation of the conservation commission, was not adopted. For some time past the Long Sault Scheme has been showing new life once more. It has been written much about and discussed, and there is no doubt that another attempt will be made at Ottawa.

Requires Sanction of Two Governments.

The Long Sault scheme is not quite so ambitious in some respects as the Eastern Canada Power Company. Instead of a development of 1,000,000 horse-power, one of but 600,000 to 800,000 horse-power is claimed, and the engineering problem, it is stated, would not be anything so vast or complicated. On the other hand, however, the consent of both the United States government and the Canadian government would have to be obtained. These governments both refused consent in the past. Subsequently, the governments have been changed in both countries, and the new governments may feel more kindly disposed to the proposals.

Canadians must feel that the leasing of these powers in the St. Lawrence River is one of the most serious matters dealt with by parliament in many decades. They are the last big, commercially available powers in Canada, and their absorption by private interests can only mean that the advantages of ownership will be absorbed by the owners, whether these be the private interests or the country at large. The Hon. Clifford Sifton, as head of the conservation Commission, made the statement that "leases of these powers for limited periods" was the proper method, and in his suggestion there is much to commend.

NEW DIRECTOR OF BANK OF TORONTO

Mr. J. L. Englehart has been elected a director of the Bank of Toronto in place of Mr. W. H. Beatty, deceased. Mr. Englehart is best known perhaps as chairman of the Temiskaming and Northern Ontario Railway Commission. In that capacity he has not only shown an excellent grasp of railroad problems and affairs but has maintained also an un-

J. L. Englehart.

matched enthusiasm respecting the prospects and development of Northern Ontario, backing his opinions with hard work.

Mr. Englehart was born at Cleveland, Ohio, in November, 1847. Since 1866 he has been the head of the firm of Messrs. J. L. Englehart and Company, engaged in the refining, producing and exportation of Canadian petroleum and its products, with works in London, Ontario, and offices in New York. He was one of the pioneers in the trade. In 1881, he removed to Petrolea, Ont., where he became second vice-president of the Imperial Oil Company. He is also vice-president of the Crown Savings and Loan Association, Petrolea, and vice-president of the London and Western Trust Company, London, Ont. He has been a governor of Toronto University.

METAL PRODUCTS COMPANIES AMALGAMATE

The Metal Shingle and Siding Company has been re-organized with an authorized capital of \$1,500,000, of which \$500,000 is 7 per cent. cumulative preference stock. This preference stock has all been underwritten by Messrs Turner, Tucker and Company, bankers, of Boston, and is being offered by them. The common stock is closely held, 90 per cent. of it being in the hands of Mr. C. Dolph, president of the new company, and A. K. Cameron, vice-president and general manager.

The new company have associated themselves with the United States Metal Product Company, of Long Island, New York, and will erect a large plant in Toronto for the manufacture of the products of the United States Metals concern. They have purchased all the Canadian patents of the American concern, and will add their complete line to those now manufactured by the original company and the A. B. Ormsby Company.

The A. B. Ormsby's Company, of Toronto and Winnipeg, has been taken over by the Metal Shingle and Siding Company, and will be conducted as the A. B. Ormsby plant, and will be in direct charge of Mr. A. B. Ormsby. The new company will have seven plants in all, viz., Montreal, Preston, Toronto, Winnipeg, Saskatoon, Calgary and Detroit. The officers of the new company will be: Messrs. C. Dolph, president; A. K. Cameron, vice-president and general manager; A. B. Ormsby, second vice-president, manager Toronto branch; J. D. Murdock, secretary-treasurer. The directors are: C. Dolph, president Metal Shingle Company; A. K. Cameron, vice-president and general manager; A. B. Ormsby, H. C. Randall, vice-president and general manager United States Metal Products Company; J. D. Murdock, Simcoe, Ont.

CANADIAN NORTHERN RAILWAY STATISTICS

Details of Fixed Charges—Securities Acquired and Earnings

The following important and interesting statistics are included in the Canadian Northern Railway Company's tenth annual report, and show the progress being made in the various departments by this aggressive corporation. The details of fixed charges for the year ended 30th June, 1912, are as follows:—

Guaranteed as to Principal and Interest by the Dominion Government of Canada.

Amount.	Date of issue.	Annual charge.
3 % stock, £1,923,287.....	29th July, 1903.....	\$280,799 86
3½ % stock, £1,622,586 *		258,405 24

Guaranteed as to Principal and Interest by the Government of Manitoba.

4% bonds, £2,497,800.....	30th June, 1904	\$487,010 54
4% bonds, £1,180,600.....	30th. Sept., 1901.....	230,699 46
4% bonds, £ 616,438.....	(Winnipeg Terminals)	120,000 00
4% bonds, £ 587,671.....	1st March, 1910.....	113,828 49

Guaranteed as to Principal and Interest by the Government of Saskatchewan.

4% stock, £1,625,000 *	18th May, 1909.....	\$236,319 28
------------------------------	---------------------	--------------

Guaranteed as to Principal and Interest by the Government of Alberta.

4% stock, £1,122,945 *	10th June, 1909.....	\$89,960 00
Four Per Cent. Perpetual Consolidated Debenture Stock.		
£7,690,011 *		\$1,496,988 82

Qu'Appelle Guaranteed Four Per Cent. 30-Year Mortgage Debenture Stock.

£1,037,972.....	17th October, 1906.....	\$202,055 99
£ 6,600 * (six per cent. first mortgage bonds, 1911)		963 60

Four Per Cent. Land Grant Bonds.

£830,200.....	15th February, 1909.....	\$163,792 52
---------------	--------------------------	--------------

The fixed charges on leased lines were:—

Northern Pacific and Manitoba Railway.....	\$ 225,000 00
Minnesota and Manitoba Railroad	13,960 00
Interest on equipment securities	711,060 32

\$4,630,844 12

* For part of year only.

Securities Acquired, Earnings, etc.

The various securities acquired by the Canadian Northern are given herewith:—

Minnesota and Ontario Bridge Company—4½ per cent. first mortgage debenture bonds, \$180,000; capital stock, \$100,000. Minnesota and Manitoba Railroad—5 per cent. general mortgage bonds, \$250,000; capital stock, \$400,000. Lake Superior Terminals Company, Limited—5 per cent. mortgage gold bonds, \$2,000,000; capital stock, \$500,000. Canadian Northern Telegraph Company—5 per cent. general mortgage bonds, \$800,000; capital stock, \$500,000. Winnipeg Land Company, Limited—5 per cent. first mortgage gold bonds, \$300,000; capital stock, \$100,000. Canadian Northern Coal and Ore Dock Company—5 per cent. first mortgage bonds, \$437,000. St. Boniface and Western Land Company—5 per cent. first mortgage bonds, \$750,000; capital stock, \$250,000. Edmonton and Slave Lake Railway Company—5 per cent. first mortgage bonds, \$420,000. Canadian Northern Prairie Lands Company—Capital stock, \$483,393.55. Canadian Northern Railway Express Company, Limited—4 per cent. first mortgage gold bonds, £616,438, \$3,000,000; capital stock, \$1,000,000. Canadian Northern Steamships, Limited—5 per cent. first mortgage debenture stock, £600,000, \$2,920,000; capital stock, \$2,000,000, total—£16,390,393.55.

The earnings, expenses and net earnings were:—

Year.	Aver. miles operated.	Earnings.	Expenses.	Net earnings.
1902-3	1,276	\$ 2,449,579	\$ 1,589,294	\$ 860,285
1911-12	3,888	20,860,093	14,979,048	5,881,045

And per mile operated:—

1902-3	1,276	1,918	1,244	674
1911-12	3,888	5,365	3,852	1,512

Classification of Freight.

The freight carried is classified under these headings:—

	For year ended June 30th.	1912.	1911.
Flour.....	Sacks (100 lbs. ea.) ...	2,854,136	2,215,094

For year ended June 30th.

		1912.	1911.
Grain.....	Bushels . . .	53,441,149	40,249,939

Miscellaneous.....	Tons	1,203,887	1,170,964

LIVE STOCK INDUSTRY OF CANADA

Last February there were brought together at Ottawa from the various provinces upwards of one hundred men officially delegated to represent forty-four Live Stock and Record Associations, besides a large number of interested persons to consider and discuss the various features of the live stock industry. This gathering, which constituted the third general convention of the National Live Stock Association, spent two days each of three busy sessions upon its programme, which included reviews of the conditions of the live stock industry prevailing in the respective provinces, inter-provincial trade in pure bred live stock, the beef cattle industry in the east and the west, the dairy cattle industry, the development of the sheep and swine industries, the market for Canadian horses, transportation of live stock, stallion legislation, the chilled meat trade, bovine tuberculosis, and other business.

A full report of the addresses and discussions that took place has been printed for the information of persons interested in the live stock, or, in fact, the general agricultural welfare of the Dominion. Among many other striking things it was brought out that our export cattle trade is rapidly approaching the vanishing point, that South American tinned beef is being used all the way across the Dominion, that we are exporting very little mutton and importing a great deal, while millions of pounds of pork are each year imported into Canada.

This report, which constitutes a book of 130 pages, embodies a fairly complete review of the live stock situation in Canada, and offers many wise suggestions for its much needed improvement. The distribution of this work is in the hands of the Publications Branch of the Department of Agriculture at Ottawa, to whom applications for copies should be sent.

TRUST AND LOAN COMPANY OF CANADA

The net profits for the six months ended September 30th of the Trust and Loan Company of Canada amounted to £56,983 14s. 8d., and after carrying to the reserve fund the moiety of profits over dividend at the rate of 6 per cent. per annum, as required by the Trust and Loan Company of Canada Act and Royal Charter, viz., £19,491 17s. 4d., the amount at credit of revenue, including £5,777 1s. 5d., brought forward from March last, was £43,268 18s. 9d.

Out of this amount there has been written down the cost of issue of debenture stock by £12,989 os. 7d., £2,025 was placed to the special reserve account, bring the amount of this fund to £90,000; £874 8s. 5d. was provided for income tax, leaving a balance of £27,380 9s. 9d. available for distribution.

The directors have decided to distribute out of this balance of £27,380 9s. 9d. an interim dividend at the rate of 8 per cent. per annum for the six months, free of income tax, on the paid-up capital, leaving a balance of £3,380 9s. 9d. to be carried to the credit of the current half-year's accounts.

During the period embraced by these accounts the reserve fund has been charged with £7,553 os. 2d. for depreciation in the value of investments held in England, and £8 4s. 5d. has also been charged against it for loss on securities realized in Canada. This fund now amounts to £318,592 15s. 10d., compared with £307,799 3s. 6d. on the 31st March last, being an increase of £10,793 12s. 4d.

The investments of the company consist of: In Canada—

Mortgages	\$16,163,591.86
Land investments, &c. (properties bought in and held under foreclosure)	24,573.97
	\$16,188,165.83

The head office of the company is at No. 7 Great Winchester Street, London, E.C. The officers in Canada are Captain R. D. Macdonnell, chief commissioner, Winnipeg; Colonel L. Edye, commissioner, Montreal; Messrs. J. Campbell, commissioner, Regina; E. R. Whitehead, assistant-commissioner, Winnipeg; R. C. Young, assistant-commissioner, Montreal.

GOVERNMENT GUARANTEES AND RAILROAD RATES

Dominion and Provincial Authorities Have Backed Numerous Issues—Relation to Rate Question

BY H. M. P. ECKARDT.

In that portion of the public accounts of Canada which deals with the national debt, is to be found a recapitulation of the Dominion Government's indirect liabilities represented by railway bonds guaranteed by the minister of finance. The list as published contains four issues of Canadian Northern bonds and debentures, as follows:—In 1903, Canadian Northern Railway Company £1,923,287, three per cents. for fifty years; in 1908, Canadian Northern Railway Company £1,622,586 19s. 6d., 3½ per cents. for 50 years; in 1911, Canadian Northern Ontario Railway Company £7,493,385 12s. 4d. 3½ per cents. for 50 years; in 1912, Canadian Northern Alberta Railway Company, £647,260 5s. 6d. 3½ per cents. for 50 years. Altogether these items amount to £11,686,519, or say \$58,432,595. The annual interest approaches \$2,000,000. For both principal and interest the national treasury is responsible.

Then there is the matter of provincial government guarantees. In all, the three western provinces—Saskatchewan, Alberta, and British Columbia—have guaranteed bonds for more than \$80,000,000 for local railway lines. A considerable part of these guarantees have been applied to bonds issued by the Canadian Northern and by the Grand Trunk Pacific branch lines.

Heavy Expenditure in Mountain Section.

With reference to the Grand Trunk Pacific, there had been issued up to March 31st, 1912, bonds amounting to £7,200,000. Also the federal government holds an additional £1,668,000 of these bonds to secure advances made by it to the Grand Trunk Pacific. That makes a total of £8,868,000, or say, \$44,340,000 in advances and guarantees furnished by the government to aid in the construction of the prairie section of the western division of the national transcontinental. The mountain section will absorb a vast amount of money, most of which will have to be raised through issues of bonds bearing the government guarantee. And, of course, there is the huge expenditures on the eastern division of the national transcontinental to take into the account.

In these items alone there is a total of approximately \$330,000,000 covering expenditures, guarantees, and advances, to represent the interest which the Dominion and provincial governments have in the successful operation of the railways. Outside of these items there are others of considerable importance. The capital expended in the Intercolonial, the Timiskaming and Northern Ontario, and numerous other lines in Western Canada.

No Preparations Made to Meet Liability.

In the case of the governmental guarantees it is, of course, obvious that the respective guaranteeing governments are interested in the successful operation of the properties by the railway companies. When a guarantee of railway bonds is given by the Dominion or by a provincial government, usually there is no expectation that the guarantor will be called upon to pay either principal or interest. It is cheerfully assumed by the finance minister, or the provincial treasurer as the case may be, that the railway company will surely be able to meet its engagements, and that the only purpose served by the government guarantee is to enable the borrowing corporation to get a higher price for the bonds upon offering them in London.

This is much the same attitude as is taken by farmer Jones when he endorses neighbor Brown's note for \$100 at the bank. As it is not expected that the guarantor will be called upon, no preparations are made to meet the liability. However, it is clear to all that if the railway company cannot pay, then the government must come forward. The interest of the Dominion government in the successful operation of the eastern division of the national transcontinental railway is more direct. Over \$150,000,000 of public funds—some borrowed and some taken from the people in the form of indirect taxes—have been expended in this work; and it is of great consequence to have the enterprise pay its way. If it is operated successfully then, after a few years the Dominion treasury will receive a suitable income from its investment, and the army of investors who put their money into the securities of the operating company or companies will perhaps be encouraged to invest more money in the Dominion.

Freight Rates Must Be Profitable.

These remarks indicate how heavily the Dominion and the provinces are interested in the successful operation of the railways. The facts referred to have a direct bearing on the matter of the agitation for government action in reducing freight rates. It is clear that if the freight rates are reduced

to an unprofitable basis, the government will be imperilling its position and the position of several of the provinces—they may be called upon to provide large sums annually to meet the interest on guaranteed bonds.

There is another respect in which the railways are entitled to consideration at the hands of the government. No one can deny that the policy followed by both Liberal and Conservative governments, of building up Canadian industries by means of a protective tariff, has served to increase the cost of constructing railway lines in Canada and of equipping and operating them. Locomotives, cars, steel rails and other supplies cost more because the railways are denied the right to buy free of duty in the markets of the world.

If it be assumed that the upbuilding of Canada's great iron and steel industry has been of great benefit to the country, it should be remembered at the same time that the laws have forced the railways to contribute handsomely to that result. It would be well if the general public could be induced to give the railways due credit for their share in thus building up the country's industries.

LA BANQUE INTERNATIONALE

Certificates for over fifty thousand shares of Banque Internationale stock held by French and Swiss investors were expected in Montreal this week, after which final arrangements for the purchase of this stock can be made. When this has been accomplished, the situation with regard to an amalgamation of the Internationale and Home Banks will be simplified, as more than the seventy-five per cent. of stock required to ratify an amalgamation will be controlled by interests working together.

COMING STOCK ISSUES

An issue of the securities of the Atlantic Sugar Refineries, Limited, is to be made by Messrs. Murray, Mather and Company. The capitalization of the company will be \$1,000,000 bonds, \$2,500,000 preferred stock and \$3,500,000 common stock. The preferred stock will be issued shortly with a bonus of common stock, while the bonds will not be issued until the completion of the plant at St. John, N.B. The refinery will cost over \$2,500,000, and will have a capacity of 2,500 barrels a day.

The Royal Securities Corporation, Limited, is offering 500 shares of Steel Company of Canada preferred stock at 90. In a circular issued in connection with the offering it is pointed out that "the net earnings of the company available for preferred stock dividends last year amounted to \$792,422, or approximately 1¼ times the amount required."

A block of the securities will be offered shortly of Ready's Breweries, Limited, St. John, N.B. The new company is taking over the business of James Ready, Limited, Fairville, N.B., and St. John, N.B. The reorganization is on the basis of authorized capitalization, including bonds, preferred and common stock, amounting to \$750,000, of which \$480,000 is being issued, \$250,000 bonds, and \$115,000 each of common and preferred stock.

LIFE POLICIES AND THEIR DISABILITY FEATURES

Mr. S. H. Pipe Gave a Practical Address to Insurance Institute of Toronto

At a recent meeting of the Toronto Insurance Institute, Professor W. H. Day, B.A., of the Ontario Agricultural College, discussed the subject "Lightning Rod Hazards," a summary of which appeared in *The Monetary Times* of March 16th. Mr. S. H. Pipe, F.A.S., A.I.A., also addressed the meeting on "The Disability Features in Life Insurance Policies." He said, in part: A life company is permitted by the following section of the Insurance Act, 1910, to include in its policies a sickness benefit not exceeding annually the premium under the policy and a total and permanent disability benefit equal to the sum insured.

The section 8 sub-section 1 is as follows:—"Subject to the right of renewal of licenses granted previously to the eleventh day of August, one thousand eight hundred and ninety-nine, a license shall not be granted to a company to carry on the business of life insurance in combination with any other branch of insurance: Provided that any life insurance company within the legislature power of the parliament of Canada, and any other life insurance company licensed under this Act whose charter authorizes it, may, under the authority of its license to transact life insurance, issue life policies including in the same policy insurance against disability caused by accident or sickness, but the amount of such disability insurance shall not exceed the premiums payable or accruing on such life and disability policy during the period of disability insured against; but in case of total and permanent disability the company may, at the request of the insured, and without further payment of premiums, pay, in full settlement of the policy, and as a substitute for all other benefits and privileges thereunder, a total and permanent disability benefit not exceeding the sum insured under the policy."

Have Restricted Disability Feature.

Life companies have restricted the disability feature in their policies to a benefit dependent upon total and permanent disability. The following clause embraces its most usual features:

"It is hereby provided that should the assured before attaining the age of sixty years, and after paying at least one full annual premium, and before default in payment of any subsequent premium, furnish proof satisfactory to the company that he has, by bodily injury or disease, become wholly and permanently disabled and is thereby prevented from performing any and every kind of duty pertaining to his occupation or any other occupation or gainful pursuit, the company will waive payment of the premiums thereafter falling due, which premiums so waived will not be an indebtedness hereon and this policy will continue in full force. Provided that notwithstanding proof of disability may have been accepted by the company as satisfactory, the assured shall, on each and every premium due date, furnish the company with satisfactory proof of the continuance of such disability, and if the assured shall fail to furnish such proof, or if it shall appear to the company the assured is able to perform any work, or to follow any occupation whatsoever for compensation, gain or profit, all premiums thereafter falling due must be paid in accordance with the terms of this contract.

"Without prejudice to any other causes of total and permanent disability, the company will consider the entire and irrecoverable loss of the sight of both eyes, or the severance of both hands at or above the wrists, or of both feet at or above the ankles, or of one entire hand and of one entire foot, as total and permanent disability within the meaning of this provision."

According to this clause the policy becomes paid up upon the assured becoming totally and permanently disabled, and is known as the "waiver of premium" benefit.

Clause Used by One Company.

Another form of disability benefit is to pay the sum assured in 20 annual instalments. One prominent company uses the following clause to cover this benefit: "The company will also, upon the written request of the assured and of the beneficiary and assignee, if any, and after payment of all indebtedness to the company in respect of the policy under the non-forfeiture provision, or otherwise, agree by endorsement hereon to pay in lieu of all other benefits and privileges herein provided, and in full settlement of this policy, one-twentieth of the amount assured immediately, and a like amount yearly thereafter until twenty such instalments in all shall have been paid. Should the assured die before the twenty instalments shall have been paid, the remaining instalments shall be paid to the beneficiary as they become due." In the event of disability proving to be temporary in-

stead of permanent, it is provided that the instalments shall cease and the original policy shall be restored for its face amount, less the sum of the instalments paid; and also that the guaranteed values shall be reduced proportionately but that no reduction shall be made in the future premiums.

The disability feature in the policies of a regular life insurance company is a modern innovation on this continent. In Europe, however, Germany has been the principal exponent of the various benefits dependent upon total and permanent disability for over thirty years, and Russian companies are also considerably interested in this subject.

Use Statistics Compiled by Fraternal Societies.

There are abundant German statistics but they are not considered applicable to conditions in Canada. They consist of the experience of railway employees and miners, the former being subdivided into three sections, namely, (a) trainmen, (b) other than trainmen, (c) office employees. The German government has also published statistics relating to compulsory insurance against permanent disability. Since the policyholders in life insurance companies here are medically examined lives of a different social class from the risks comprising the German experiences, the latter are of little or no value for Canadian companies in determining the cost of the disability benefits granted by them.

For this information we have to make use of the statistics compiled by the fraternal societies. One, at least, of these organizations has been granting disability benefits for over thirty years. Here we have a sufficiently close resemblance between the risks accepted by these societies and the policyholders of a regular life insurance company to make a suitable basis for computing the cost of the "waiver" or "instalment" benefit. This statement may be disputed by regular life insurance companies owing to the cheapness of the medical examination undergone by applicants for admission to fraternal societies. But judging by the resulting mortality rates, the societies get good value for their money in this respect.

(To be concluded.)

NEARLY FIFTY THOUSAND TONS OF ORE

British Columbia's ore production and smelter receipts in detail for the second week in November was as follows:—

East Kootenay—Week, 532 tons; year, 39,291 tons.
Slocan and Ainsworth—Week, 2,066 tons; year, 97,902 tons.
Nelson—Week, 2,014 tons; year, 64,369 tons.
Rossland—Week, 4,883 tons; year, 213,945 tons.
Boundary—Week, 39,990 tons; year, 279,402 tons.
Consolidated Company's Receipts—Week, 5,506 tons; year, 279,402 tons.
Granby Smelter Receipts—Week, 22,734 tons; year, 1,114,609 tons.
British Columbia Copper Company's Receipts—Week, 15,231 tons; year, 590,365 tons.

INTERNATIONAL BILLS OF EXCHANGE LAW

An international conference was held at The Hague in June and July, 1910, for the purpose of agreeing upon a uniform international law of bills of exchange. As the result of the deliberations of this conference a draft code was prepared which had been translated into English and circulated in Great Britain, and the British delegates, Sir Mackenzie Chalmers and Mr. Frederick Huth Jackson, published a report explaining their own attitude in the matter. A second conference met at The Hague on June 15th, and sat until July 23rd, Great Britain being represented by the same delegates as in 1910. At this second conference a Uniform Law of Bills of Exchange and Promissory Notes was agreed upon, and it is to be brought into effect by a convention open for signature until August 1st, 1913. So far, of the 37 nations represented at the conference, 24 had already signed the convention, including the whole of the Great Powers except Great Britain and the United States. The terms of the convention provide that the signatory States shall bring the new law into force in their territories, and so far as they are able in their colonies, within six months of the date of signature. There is a definite probability, therefore, that within the next year there will be only two codes in existence throughout the civilized world. On the one hand the Uniform law, on the other the Anglo-American Code, operating throughout the English-speaking countries, for most of the States of the American Union have adopted the New York Negotiable Instrument Law, which is in its turn based almost entirely on the English Bills of Exchange Act, and the British Dominions have all adopted the Bills of Exchange Act.

CANADA'S FIRE LOSSES ARE TOO HEAVY

Poor Building By-Laws, Insufficient Legislation and Speculation in Insurance Are Some of the Causes

Speculation in Insurance is rife and forty per cent. of the fires are incendiary.

Building by-laws are inadequate, resulting in the construction of improper buildings.

Fire prevention laws are inadequate.

There is criminal carelessness with the fire risk.

Europe spends 50 cents per capita per annum for fire protection, and Canada \$1.25.

Europe's fire losses per capita per annum are 33 cents and Canada's \$3.07.

These are the points emphasized by Fire Chief Tremblay, of Montreal, in a special report on the high fire losses of that city. His facts, figures and conclusions are of national interest as they apply not only to Montreal but also to cities and towns throughout the Dominion.

Discussing first the comparison of the fire loss between this country and Europe, in the United States and Canada, the annual fire loss amounts to two hundred and fifty millions, and is costing every man, woman and child in the country the sum of \$3 each yearly. Taking all the European countries (even those which are not supposed to be so advanced in civilization as our own is), the fire waste amounts to only 33 cents per capita. Why this great difference? It is not because our fire-fighting equipment or personnel are inferior to those of Europe, as it is acknowledged the world over that we are at least their equals in this respect.

Costs More for Protection.

It is costing us \$1.25 per capita yearly for the maintenance of our fire-fighting systems, as compared with the expenditures in Europe for the same purposes of only 50 cents per capita. In spite of our expenditures for fire-fighting equipment and our admitted equality in that respect our fire loss is eight times greater than the loss in Europe—three times the expenditure for one-eighth of the benefit. The annual fire loss in this country alone is over twenty millions dollars. The fire loss in the United States and Canada is fifty millions more than the output of gold.

Berlin, with the population of about three million inhabitants has an annual fire loss of \$250,000. Chicago, with about the same population, has an annual fire loss of over four million dollars. Montreal, with the population of about half a million, has a fire loss of about a million dollars a year.

In a table of fire losses of European countries, Chief Tremblay shows that Russia is the heaviest sufferer. With a population of 2,673,427, it loses \$1.16 per capita, whereas the United Kingdom with a population of 4,319,816, only loses 42 cents per capita, and Germany with 7,446,447 only loses 25 cents per capita.

Our Per Capita Loss.

In four years ended 1911, the New York Journal of Commerce estimates the economic loss to both countries, that is United States and Canada, by fire, is over nine hundred and ten millions of dollars. This is divided as follows:—

United States	\$832,005,795
Canada	79,674,105
	\$911,679,900

On the basis of the average population for the four years, the per capita loss is:—

United States	2.45
Canada	3.07

The loss of life is greater than any other country in the world. For the last four years, over one thousand lives have been lost, and the most unfortunate part of it is, that each year has shown an increase larger than is represented by the proportionate growth of the country. In 1911, the fatalities reached 317.

We Do Not Prevent Fire.

Our weakness does not lie in the direction indicated, but in the fact that we have devoted our brains, time and money to improving the means of extinguishing fires without giving the same attention to the more important question of the prevention of fires, coupled with the fact we have not the same sense of individual responsibility as they have in Europe. Here we sympathize with a man who has burned out, whereas,

in some European countries, the laws are as to make it very uncomfortable and expensive for the man who has a fire.

In France, for instance, a man on whose premises a fire originates is responsible for the damage done not only to the other tenants in the building but for the damage done to the neighbors. In Berlin when a fire occurs it is at once investigated, and if it is found to have originated through carelessness or non-observance of any of the municipal by-laws, the person in whose place the fire has been is condemned to a fine and also has to pay the expenses of turning out the fire brigade. All this is in addition to his liability to pay the damages to others who may have suffered as a result of his fire.

The principal reason for our unnecessarily high fire loss may safely be put down to the lack of a sense of individual responsibility, which includes incendiarism, speculation in insurance, indifference, carelessness, improper building, the lack of adequate fire-prevention laws, the lack of endorsement of these laws.

Over-Insurance Is Rampant.

Fire Commissioner Latulippe informs me that at least 65 per cent. of the fires investigated by him reveal over-insurance, 40 per cent. of these in his opinion, being incendiary.

There is no doubt in my mind, and Mr. Latulippe agrees with me, that some people make what might be called a business of fires or speculate in insurance. I may cite a case which came under my notice not long since. The firemen responding to an alarm, found fire set in three different rooms. The fires were extinguished before much damage was caused, and it was established by the Fire Commissioner that the proprietor of the place had only about \$1,000 worth of stock, yet he carried over \$5,000 insurance. Why? This is only one out of very similar cases which come before the Fire Commissioners every year.

A comparatively short time ago a man had a fire, which was not at all satisfactorily explained, although nothing definite could be proven against it. The insurance company had to pay the loss, which they did—cancelling the policy and refusing reinsurance. Shortly afterwards this man went to another company and got all the insurance he wanted. Eight months later he had another fire which left the same doubt as the first; again he collected the insurance. Why was this individual reinsured without his past being looked up?

Fire Chief Blames Insurance Agents.

How are we to account for cases like these? Either the insurance companies interested did not care, or they did not know. It is impossible to imagine a company carrying on business on the former basis. Perhaps they did not know. Is it not explained by the work of the insurance agent whose only interest in the matter is the commission he gets out of it, and who will recommend a risk to almost or anybody for the sake of getting the commission.

In New York State a committee which was called the committee of incendiarism and arson, reported that although there had been several liberal awards offered for the capture of what may be called the "fire bugs," the results were practically negative and the committee declared itself unable to conclude that there was any decrease in incendiary fires following the system.

Carelessness or indifference is one of the prolific causes of fires and in instances it is hardly other than morally, if not legally, criminal. That certain fires are the result of criminal carelessness should be obvious without the saying. This fact was long ago recognized in European countries; and until such time as we make drastic laws covering it we shall never be able to stop the increase of fires. Present laws are absolutely inadequate to protect the community from reckless property owners and criminally careless individuals, who are indifferent to the appalling fire waste of the country so long as they are protected by the fire insurance companies.

Carelessness or Crime.

We should favor the enactment of laws, by which every individual shall be held responsible for the loss of life and property caused by gross carelessness or negligence.

The general notion seems to be that when a man has an insurance policy on his property that all responsibility for fire prevention ceases, so far as he is concerned. If it burns he is insured. What we need is the adoption here of the foreign idea, which has resulted in such an enormous saving of life and property. They hold every man responsible when he causes a fire, through gross neglect or carelessness. In

Europe every fire is regarded as a crime against the community until such time as it is satisfactorily explained.

The question of incendiarism and speculation in insurance also involves the question of over-insurance. I am satisfied that there is not an insurance company in the country today that wishes to carry on a business of over-insurance, just as I am satisfied that there is no man of common sense and honesty who considers it necessary to carry insurance not justified by the extent of his business or the value of the property protected. Still over-insurance is a fact. Leaving aside the question of the companies doing it regularly as a business, how are we to account for it? Is not this evil also explained by the work of the agent whose only interest is in his commission and who looks at it from the point of view of the more insurance the higher the premium and the greater the commission.

Our department was called to a fire in a block of some thirty flats one night during the winter. These flats were heated by hot water furnaces placed directly on the wooden floors, in absolute contravention of the city by-laws. On the night of the fire the thermometer registered 20 degrees below zero, yet practically every one of these thirty families had to take to the street, some of them without a cent of insurance. The only after results was that the proprietor collected his insurance. Dozens of cases could be given of fires caused solely as the result of some contravention of the by-laws.

Must Remedy Building Laws.

My suggestion as to a remedy for this condition of affairs is that when a person is about to construct a building he should be obliged to submit his plans and specifications to the Building Inspector for approval, filing a copy with the Inspection Department, as a record. Then it should be seen to that the building is constructed according to the plans and specifications as approved, and if at any time it should appear that the building was not so constructed the Department should have the power to order its demolition. I would go a step further, and say that if a fire occurred in such building, and it was found that the fire was caused by the fact that the building was not constructed in compliance with the by-laws and the plans and specifications approved by the building inspector's department, the proprietor should lose the insurance he carried on the building.

In regard to the lack of adequate fire prevention laws, I do not consider it necessary to say a great deal. It is well known that we are immeasurably behind the European cities in this respect. The most important and successful step which could be taken would be the framing of a law which would authorize the penalizing by fine or imprisonment, or both, of a man whose neglect or carelessness is shown to have been responsible for a fire, making the penalty sufficiently heavy to show that an unsatisfactorily explained fire is a very serious matter.

Reform Building By-Laws.

The building by-laws should also be radically reformed along the lines of the laws of some of the large European cities, which have made a special study of fire protection for years.

Having enacted the proper laws, we come to the question of their proper application and enforcement. In my opinion the Fire Commissioners' court is the organization to deal with the matter. Give this court the power not only to investigate all fires, but also to impose a fine or imprisonment on such persons whose infractions of the laws have resulted in fires. Occupying itself exclusively with fire investigations and the administration of the fire prevention and fire protection laws, this court would be (and I say it with all due respect) in a much better position to enforce the proper carrying out of the regulations than would any of the other courts, because the attention of the latter is taken up continuously with all manner of cases. In other words, the Fire Commissioners' court would practically be concentrated of our efforts to eliminate the preventable fires.

Fire Waste is Preventable.

It is an indisputable fact that at least 50 per cent. of the fire waste of this country is preventable. Consider what this means in the light of the millions of dollars' worth of property destroyed here annually. Remember also that it is not only the person in whose premises a fire starts who suffers; in very many cases fires do a great deal more damage in other buildings or premises than the premises where they start. As an instance—a man occupying the top floor of a building carries about two hundred thousand dollars' worth of stock, fully insured. He has a fire which does some damage to his place, but which is directly and indirectly responsible for the destruction of perhaps \$100,000 worth of stock on the floors below, besides demoralizing the business of every one in the building.

It is also reasonable to suppose that a decrease of 50 per cent. in the fire losses would bring a corresponding decrease in the premium rate.

CURRENT TRADE CONDITIONS

Tight Money is Cause of Complaint—Collections Are Fair

Roads in the Quebec interior are in bad condition, but country trade is reported by Duns as being fairly active, and there is comparatively little complaint in regard to remittances. The 10th and 13th were heavy days for dry goods payments, and wholesalers in that line profess satisfaction with results. The late spell of wintry weather, while handicapping shipping men to some extent, was decidedly helpful to retailers of dry goods, clothing, furs, rubbers, footwear, etc., the activity in sales being reflected in increased sorting orders. Wholesale dry goods men at Montreal are preparing for stock-taking, and already some large Western buyers are in looking up bargains in jobs usually offering about stock-taking times.

All textile values are very firmly held, and both American and domestic manufacturers of flannelette blankets have advanced prices this week. The iron market shows continued strength under a well-sustained demand. Domestic furnaces have orders in hand for some months ahead, and are indifferent about booking further orders for No. 1, except at a further advance. It is reported that \$21, at furnace, has been quoted for No. 2, said figure having been the recent quotation for No. 1. Some large shipments of low-grade English iron are due before close of navigation for pipe foundries, etc. The strong advance in hides is fully maintained, dry South American hides being now quoted up to 35 cents, and the local market for green hides is firm at last week's revision. Sole leather tanners are now quoting 27 cents for No. 2 sole, present delivery, or 28 cents on contract up to July 1st, 1913. There is a better movement in splits at improved prices. Boot and shoe manufacturers keep busy. Other lines present no special features. There is much tightness in the money market, and the fact that several of the larger banks have been calling in loans has intensified the stringency.

Christmas Trade Good.

Trade in Toronto wholesale lines is fairly active. The weather has not been propitious for sales of heavy dry goods, but business in fancy lines, notions, etc., for the Christmas trade has been large. The season's trade in dry goods, on the whole, has been larger than in the past. Prices are very firm in both cotton and woolen staple lines. Payments are fairly satisfactory. The outlook continues bright for spring goods. The fur trade is rather quiet at present. Hardware and metals are in good demand, with prices generally very firm. Many contractors find it difficult to get a full labor supply, a great many foreigners, including a large number of Bulgarians, having gone home to the seat of war.

Groceries are fairly active, with a large movement of heavy goods going westward by boat. Leather is again higher for some lines, with a good business. The prices of Manitoba wheat have declined, owing to liberal receipts in Winnipeg and the action of the Canadian Pacific Railroad in stopping shipments to lake ports, owing to the congestion there and the difficulty of forwarding the grain eastward. Ontario grades of wheat are steady, owing to very light supplies. Coarse grains are dull, but generally firm. Provisions are firm, with demand fair. Hogs are easier. The supply of butter is good, but prices continue firm because of active demand.

At Hamilton and Vancouver.

Hamilton's retail trade continues good and a few lines of holiday goods are being displayed. Shipments by water are being rushed, and there is still considerable complaint heard as to railway freight conditions. Collections are reported somewhat slow, though there is apparently no uneasiness felt, and it is expected money will be easier in the near future. The local markets are fairly well supplied and prices remain unchanged. Country trade is reported good.

General trade conditions at Vancouver continue favorable, but building operations are restricted by wet weather and the stringency of the money market. Considerable railroad work throughout the Province stimulates the demand for staple merchandise, and numerous good orders are being received by wholesalers. Holiday shopping has begun and an active Christmas trade is expected. Money is in demand and collections are fair.

COBALT'S FIRE INSURANCE

The Cobalt Board of Trade on Monday decided to inform Mr. E. M. Carroll, of Toronto, that his proposal to sell to the business men of the town a stock mutual fire insurance company, presumably the Metropolitan, could not be accepted owing to lack of information regarding it and lack of time to obtain the information. This matter was referred to in The Monetary Times last week.

OIL COMPANIES TO BE DISSOLVED

Over One Hundred Will Probably be Struck off
Alberta Register

At the end of January, 1913, no less than 132 oil companies will be struck off the register of joint stock companies in Alberta, and the companies will be dissolved. That will happen "unless cause is shown to the contrary." The Monetary Times learns that these concerns have failed to file returns described under the Companies Ordinance of Alberta. Although they have been written time after time and the necessary forms sent them, no attention was paid to the requests of the provincial government.

Clause 24 of the act regulating this matter reads in part as follows:

"Where the registrar has reasonable cause to believe that a company (whether registered before of after the passing of this Ordinance) is not carrying on business or in operation he shall send to the company by post a letter inquiring whether the company is carrying on business or in operation.

Will be Dissolved.

(2) "If the registrar does not within one month of sending the letter receive an answer thereto he shall within fourteen days after the expiration of the month send to the company by post a registered letter referring to the first letter and stating that no answer thereto had been received by him and that if an answer is not received to the second letter within one month from the date thereof a notice will be published in the gazette with a view to striking the name of the company off the register.

(3) "If the registrar either receives an answer from the company to the effect that it is not carrying on business or in operation or does not within one month after sending the second letter receive any answer thereto the registrar may publish in the gazette and send to the company a notice that at the expiration of three months from the date of that notice the name of the company mentioned therein will unless cause is shown to the contrary be struck off the register and the company dissolved."

List of the Companies.

The following are the companies which have been warned, as noted above. With one exception, the Oil Lands Investment Company, the words "Oil Company, Limited," have been omitted from the list:

Olympia, Hudson, Lindsay, Guelph, Great Falls, Roman, English, Boston, Quincy, Port Arthur, Fortune, Kalkaska, Glory, Okanagan.

Richmond, London, Forest, Hartford, Jasper, Orange, Rock Island, Pittsburg, Peterboro, Arizona, Prince Albert, Louisville, Monarch, Muskegon.

Quebec, Geneva, Kootenay, Norway, Kansas, Halcyon, Oshkosh, Norwich, Brandon, Butte, Oxford, Berlin, Key West, Jersey City, Lethbridge, Pueblo.

Huron, Milwaukee, Medicine Hat, Minneapolis, Holyoke, Atlas, Buffalo, Niagara, Findlay, Newark, Galt, Aspanola, Nashua, Houston.

Fort Garry, Mikado, Lansing, Providence, Ithaca, Duluth, Eagle, Iriquois, Manitou, Oil Lands Investment Company, Rainy Lake.

Lincoln, Manchester, New Orleans, Regina, Columbus, Marquette, Cuba, Dauphin, Diamond, Portland, Hague.

Cincinnati, Montreal, Philadelphia, Albany, Baltimore, Atlantic, French, Michigan.

Belfast, Prince Rupert, Kingston, Kilarney, Galveston, Hoboken, Honolulu, Phoenix, Colorado, Eau Claire, Kalamazoo.

Cadillac, Detroit, Czar, Nashville, Cobalt, Renfrew, Juneau, Kaiser,

Mobile, Grand Rapids, Republic, Hamilton, Emerald, Ogden, El Paso, Dubuque, Bristol.

Lawrence, Indian, Omaha, Denver, Owasso, Reno, Portage, Alconda, Alabama, Holland, Newport, Cleveland, Florida, New York, Alaska, and Ottawa.

Not Popular Investments.

Investors are not showing any eagerness to patronize the stocks of oil companies. Few of the stocks offered in Canada have had any merit or have proved remunerative to those who have purchased in answer to glib-tongued methods.

The production of petroleum in 1911 in Canada was valued at \$357,373.

Negotiations for the proposed absorption of La Banque Internationale are still in progress. It is not considered probable that the Home Bank will be willing to pay for the acquisition of the other institution's business beyond the actual amount of the valuation placed upon the surplus of assets over liabilities.

WINTER OUTLOOK IN NEW BRUNSWICK

Preparation for Shipping Trade—Agricultural Affairs
Receive Attention

(Special Correspondence.)

Saint John, N.B.,

November 25th.

The winter steamship season has opened with prospects of last winter's record of exports to the value of \$35,000,000 being exceeded, as more steamship sailings have been provided for. The grain shipments will be large, and grain is pouring into both the Intercolonial and Canadian Pacific elevators. The steamship companies have as usual brought down a staff of officers and workmen from Montreal and Quebec. General trade conditions in New Brunswick are healthy, and the demand for both carpenters and laborers exceeds the supply. The cut of logs will probably be smaller this winter than usual on the streams of the province, as the prohibitive ocean freights of the past season compelled mill-owners to carry over considerable stocks of manufactured lumber. The farmers have had a very good year, and prices of produce are high. There has been a slight advance in the price of potatoes, and farmers are not anxious to sell, as they look for a further advance. A shipment of three hundred barrels has been made to South Africa, and the Cuban market a little later is expected to absorb a large quantity.

Construction Activities Are Large.

The Norton Griffiths Dredging Company have begun dredging in the channel into Courtenay Bay, and are making rapid progress with the great breakwater. At West St. John the J. D. Metcalf Construction Company have 300 men at work on the foundation of the new grain elevator, and will soon increase the number to 500. Outside of St. John the new Palmer, McLellan Shoeack Company's new factory at Fredericton has begun operations. The Humphrey Unshrinkable Underwear Company, of Moncton, have their carding machines in operation in a four-story building, and another building is nearly completed.

The federal government has purchased another piece of property at Fredericton, enlarging the new experimental farm to 460 acres. W. W. Hubbard, late secretary for agriculture, has been appointed superintendent.

Orchards Are More Numerous.

Much progress has been made in the orchard industry in New Brunswick this year. Fully 20,000 more trees were planted than last year, and arrangements are being made for setting out many new orchards. Short courses in fruit-growing will be held during the winter for the benefit of orchardists. Some shipments of early apples were sent to England this fall and yielded good returns. The province has an apple exhibit in London, and more will be sent to be distributed through the United Kingdom. Exhibits will also be sent to Montreal, Toronto and other Canadian cities, and next year an exhibit will be made at Ghent, in Belgium.

The provincial immigration department anticipates a much larger influx of desirable settlers from the Old Country next year. The government's ready-made farm scheme is said to be working well.—M. O. M.

BANKS AND GOVERNMENTS

In view of the forthcoming revision of the Bank Act and the discussions which it will evoke, The Monetary Times has arranged for the publication of a series of four articles dealing with the governmental supervision of European banks. The first of these will appear in The Monetary Times next week. It will discuss this question as it affects the banks of

England and France.

The subsequent articles will examine the position in relation to the banks of

Germany,**Belgium and Switzerland,****Italy, Sweden, Denmark, Norway and
the Netherlands.**

These articles have been prepared for The Monetary Times by Mr. H. M. P. Eckardt, the well-known author and writer on banking, financial and economic subjects. This is the first series of several, on subjects of current interest written by experts, and to appear from time to time during the next few months.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Cottons, Limited.—\$1,050,200 additional bonds of this company were listed on the Montreal Exchange this week.

Ontario Power Company.—The Ontario Power Company has declared an initial dividend of $1\frac{1}{4}$ per cent. on the common stock, payable December 2nd to shareholders of record November 30th.

Quebec Central Railway.—The Lieutenant-Governor of Quebec has issued a proclamation enforcing the act by which the convention passed between the Quebec Central Railway and the Canadian Pacific Railway is ratified. This is the last procedure by which the Quebec Central Railway is leased by the Canadian Pacific Railway for a period of 999 years.

Dominion Bank.—The Dominion Bank has declared a 2 per cent. bonus in addition to the regular quarterly dividend of 3 per cent., payable January 2nd. This makes a total disbursement for the year of 14 per cent. on the paid-up capital of \$4,962,810. The bank has paid dividends at the rate of 12 per cent. per annum since 1906, prior to which the rate was 10 per cent. for several years.

Canadian Car and Foundry Company.—The annual statement of Canadian Car and Foundry Company for the fiscal year ending September 30th, is now in the hands of the printers. It is expected that the earnings for the past fiscal year will be at the rate of 18 per cent., while some believe that the statement will be made as conservative as possible, with a view to not having earnings shown much in excess of last year, when they were equivalent to 16 per cent.

Montreal Light, Heat and Power Company.—Montreal Light, Heat and Power Company's surplus over all charges, or net income, for the first six months of the current fiscal year—up to October 31st—shows an increase of \$171,000 over surplus for the same period last year. The increase would be equivalent to one per cent. on the \$17,000,000 of capital stock, or at the rate of two per cent. for the year. As the first six months is the lean half of the company's year, the actual gain for the full year will probably be considerably larger. Last year Power showed a surplus equivalent to 13.87 per cent. on the capital stock.

Montreal Cottons, Limited.—A dividend at the rate of 4 per cent. has been declared, and is payable quarterly to holders of record on December 5th. In August, 1911, the company was reorganized in order to permit of the doubling of its capital, each shareholder receiving one share of 7 per cent. cumulative preferred stock and one share of common stock in the new company in exchange for each share of the old stock. The capitalization is \$3,000,000 common and \$3,000,000 preferred, and the full dividends on both classes means a distribution of \$330,000 per annum. Under the old capitalization the company paid at the rate of 8 per cent., so that under the new conditions shareholders are getting 3 per cent. additional on \$90,000 per annum.

Spanish River Pulp and Paper Mills, Limited.—In an article setting forth the security behind the bond issue of the Spanish River Pulp and Paper Mills, Limited, the Dominion Bond Company concludes: "Earnings from the ground wood mill alone have been more than sufficient during the last several years to take care of the interest on the entire bond issue. Now that the different units of the company's plants are in active operation the officials of the company can forecast future results with fair accuracy, and the earnings for the ensuing year have been estimated at from \$800,000 to a million dollars. These earnings will, therefore, at the lowest, show from five to seven times the interest on the Spanish River bonds."

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail smelter for week ending November 7, and from July 1 to date, in tons:

	Week ending November 7.	July 1, to date.
Company's Mines.		
Centre Star	3,846	59,295
Le Roi	611	15,825
Sullivan	71	10,386
Richmond-Eureka	34	514
St. Eugene		478
Molly Gibson		797
No. 1		153
Other mines	1,488	24,840
Total	6,050	112,288

Dominion Iron and Steel Company.—The output of the Dominion Iron and Steel Company for the nine months of this year, up to and including October 31st, was one of the largest in the history of that company. The figures for the several months show an increase in practically every department but that of rods, and these were unusually good.

The total output from the various departments, with a comparison for 1911 output, is given as follows:—

	Tons. 1911.	Tons. 1912.
Coke	372,857	431,017
Pig iron	222,021	262,271
Steel ingots	266,081	288,900
Steel blooms	230,695	147,579
Rails	128,219	147,597
Rods	66,795	46,977

Granby Consolidated Mining, Smelting and Power Company, Limited.—In Granby's quarterly statement, President Nichols says that net profits for the four months ended October 31st average about \$140,000. The board has recommended the completion of the 2,000-ton smelter and power plant, and work will proceed with all possible speed. It is believed the smelter, outbuildings and equipment can be completed and the power plant installed by a further expenditure of \$2,000,000. The board is considering whether earnings should be accumulated to meet this outlay or whether some comprehensive financial plan should be devised to take care of this and further opportunities as they arise.

Canada Machinery Corporation.—The rearrangement of the capitalization of the Canada Machinery Corporation, Limited, has been effected by the leading interests in that company. These interests have accumulated the entire issue of preferred stock, and also the bulk of the common stock, and arranged to convert their preferred into common and reduce the common to the price at which they purchased it. These plans have been completed, subject to legal details, and the total capitalization of the corporation reduced thereby to approximately \$1,200,000 of common stock. The conversion of preferred into common was made on the basis of nine shares of common for every ten shares of preferred. This would mean that the preferred had been exchanged at 90 for new common at par. In view of the fact that the market price of the common stock jumped during the past week from 20 to 50, the holders of the old common stock have found their holdings increased in value. The capitalization of the company, outside of an issue of \$600,000 6 per cent. bonds, formerly consisted of \$908,700 7 per cent. preferred stock and \$653,400 common stock. The company last year, after paying bond interest and dividend on the preferred, had net earnings equal to about 5 per cent. on the common stock.

Dominion Park Company, Limited.—The total revenue of the Dominion Park Company, Limited, as given in the annual statement to the shareholders this week, was \$214,512, which is \$10,000 better than last year and \$4,000 better than the best previous record except that of the opening year. Running expenses totalled \$150,556, against \$139,859, but this year's total appears to include the allowance for maintenance, which last year amounted to another \$29,708. The fixed charges are reduced (by the extinction of a large portion of the bonded indebtedness) to \$12,588 in place of \$14,700. The dividend disbursement was increased from \$20,000 to \$28,000 by the raising of the rate from 5 to 6 per cent. and the payment of a 1 per cent. bonus, and there is left a balance to surplus of \$23,367, compared with \$1,354 last year.

The profit and loss statement for the year was as follows:—

Revenue.	
General earnings	\$214,512 62
Expenditure.	
Repairs and replacements	\$ 17,553 42
Insurance	4,238 46
General expense	29,328 25
Operating	99,436 03
Interest	\$150,556 16
Dividends	12,588 62
Balance to surplus	28,000 00
	\$214,512 62

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Cannington, Ont.—The ratepayers of Cannington carried the hydro-electric enabling by-law.

Galt, Ont.—A by-law to raise \$75,000 for macadamizing the streets of the town has been carried.

Steeltown, Ont.—Until December 3rd for \$7,000 school, \$9,000 park, and \$15,500 pavement debentures. J. Robinson, clerk.

Raymore, Sask.—The village has been authorized to issue \$3,000 fire hall debentures. C. E. Drake, secretary-treasurer.

Holdfast, Sask.—The village will issue \$3,000 roads and sidewalks debentures. H. Birkenstock, secretary-treasurer.

Wawota, Sask.—The village has been authorized to borrow \$800 for a fire hall. W. B. Thomson, secretary-treasurer.

Montmartre, Sask.—The village will borrow \$3,000 for the purpose of erecting a curling rink. A. J. Boyer, secretary-treasurer.

Denzil, Sask.—The village has been authorized to borrow \$2,000 for sidewalks. B. P. Elverum, secretary-treasurer.

Tantallon, Sask.—Authority has been granted to village to borrow \$1,000 for sidewalks, grading roads and installing waterworks.

Barton Township, Ont.—Until December 7th for \$32,300 4½ per cent. 20-year bonds. A. G. E. Bryant, clerk, Mount Hamilton P.O.

Denholm, Sask.—Authority has been granted the village to borrow \$2,100 for sidewalks and fire hall. A. J. Greensill, Denholm.

Victoria, B.C.—A vote may be taken on December 16th on the by-law to raise a loan for \$225,000 for the new buildings at the Jubilee Hospital.

Rosser R. M., Man.—On December 17th the ratepayers will vote on by-law for the issuance of \$110,000 4½ per cent. 30 instalments for good roads.

Collingwood, Ont.—Until December 4th for \$7,000 4½ per cent. 30-year; and \$30,000 20-year 5 per cent. hydro-electric power debentures. A. D. Knight, town treasurer.

Whitewold Beach S.D., No. 1386, Man.—On December 17th the ratepayers will vote on a by-law to borrow \$1,000, payable in 10 years. J. D. Forster, secretary-treasurer, Clandeboye.

Winnipeg, Man.—The city council decided on the amount of \$1,000,000 10-year debentures for new wells, etc., and a by-law will be submitted to the electorate with a by-law for \$1,000,000 for school purposes on December 13th.

Bridgeburg, Ont.—Until December 2nd for \$13,582.20 10-year 5 per cent. local improvement sewer, and \$28,010 30-year 5 per cent. sewer debentures. R. A. Land, clerk. (Official advertisement appears on another page.)

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C.

Medicine Hat, Alta.—Eight by-laws will be presented to the ratepayers of the city on December 27 to be voted upon. Six of the eight will be money by-laws providing for the expenditure of \$168,000 and two for the granting of concessions to industries.

Brandon, Man.—By-laws for the issue of \$125,000 debentures for school purposes; to guarantee an issue of \$50,000 bonds of Western Agricultural and Arts Association of Manitoba; to provide for the raising of a loan of \$12,000 for city hall repairs and \$17,000 for the purchase of land will be voted upon December 17th.

Vancouver, B.C.—At the meeting of the city council a request will be presented by the park board for the submission to ratepayers in January of two by-laws, aggregating \$420,000. Waterworks by-law estimates as prepared by Alderman Williamson, chairman of the water committee, will total approximately \$750,000.

Toronto, Ont.—The city council gave two readings to six money by-laws for a total of \$12,706,000, to be voted upon by the ratepayers on January 1st next, and passed by-laws for the issuance of debentures for \$1,928,960 for the construction and enlargement of schools, etc., and to issue debentures to the amount of \$200,000 for the purchase of a site for a new Registry Office. They also guaranteed by by-law the debentures of the Industrial Schools Association to the amount of \$35,000.

Hon. J. D. Rolland, head of the Rolland Paper Company, president of the Hochelaga Bank, member of the Quebec Legislative Council, ex-president of the Canadian Manufacturers' Association, director of the Manufacturers' Life Insurance Company, Governor of Laval, etc., is dead.

PERSONAL NOTES

Mr. Henry S. Mara, who was prominent in Toronto real estate circles for forty years, died suddenly at his home recently.

Mr. F. F. Parkins, Canadian manager of the Hartford Fire Insurance Company, has been on a business tour of the Maritime Provinces.

Mr. W. S. Naylor, formerly accountant at the Waterloo, Ont., branch of Molsons Bank, has been appointed the assistant manager there.

Mr. E. C. Pratt, general manager of the National Breweries, Limited, since the formation of the company, will be the new local manager of the Molsons Bank, Montreal.

Mr. W. Hunter, formerly one of the managers in Scotland for the Canada Life Assurance Company, has become associated with the Toronto office of the Mutual Life Assurance Company of Canada.

Mr. J. W. Langmuir, managing director of the Toronto General Trusts Corporation for over thirty years, has been elected one of the vice-presidents of the company, in place of Mr. W. H. Beatty deceased.

Mr. K. F. A. Graburn, who for seven years has been connected with Messrs. Gowans, Kent and Company, Toronto, has joined the firm of Messrs. Toole, Peet and Company, financial, real estate and insurance agents, Calgary.

Mr. G. E. Musgrove, who is well known in London financial spheres, has been appointed London representative for Messrs. J. M. Robinson and Sons, bankers, St. John, N.B., and Montreal, Que. His office will be at 27-31 Spencer House, South Place, Finsbury Circus, London.

Mr. C. Hamilton Wickes, British Trade Commissioner in Canada and Newfoundland, with headquarters in Montreal, has just returned from a trip to Newfoundland and the Maritime Provinces, and leaves on a trip to England next week.

Mr. Arnold F. Miller, formerly of the staff of Messrs. Wood, Gundy & Company, has recently returned from a three months' trip through Western Canada, and is leaving shortly for Edmonton, where he will open a real estate office in partnership with his father, Mr. Geo. A. Miller, of that city. The new firm will also handle Western school district debentures.

Mr. F. Howard Wilson, head of the firm of Messrs. J. C. Wilson and Company, and Mr. Andrew J. Dawes, president of the National Breweries, Limited, have been elected directors of the Merchants Bank of Canada. The two new directors replace on the directorate the late Mr. Charles M. Hays, and Mr. Jonathar Hodgson, who recently retired after a service of thirty-two years on the board.

Mr. William Tatley died at Montreal. The late Mr. Tatley was born in Norwich, England, and came to Canada in 1874, re-entering the offices of the Royal Insurance Company, in which he rose to the position of manager. He entered private life fifteen years ago, prior to which he had been president of the Canadian Underwriters' Association.

Mr. G. A. Case, a well-known figure in Toronto, died recently at Toronto. He was born at Exeter, Ontario, in 1858. About 1878 he started in the real estate business for himself, branching out later into the stock brokerage. He was a member of the Toronto Stock Exchange, and enjoyed a long membership in the Albany Club.

Mr. J. A. McKee, a well-known Toronto financier, died last week. The late Mr. McKee was born at Rosemount, Simcoe County, in 1859, and at about 25 years of age became a commercial traveller for the firm of Milburn and Company, proprietary medicine manufacturers. In 1885 he founded the Dodds Medicine Company of Canada, and later similar concerns in the United States and Great Britain. He was the president and owner of the Western Steamship Company, whose vessels ply on the Great Lakes. He owned a large stock farm at Willowdale, York County, and had large real estate interests in and around Toronto. He was also a director and stockholder in a number of financial concerns.

Mr. William Miller Ramsay, of Montreal, for many years Canadian manager of the Standard Life, died recently. Mr. Ramsay was born in Edinburgh in 1834, the second son of the late Alexander Ramsay, who was for many years manager of the Edinburgh Water Company. He entered the service of the old Colonial Life (afterwards the Standard) at the age of 17, and was sent out to Canada as an inspector for the company in 1857, and in 1861 was appointed manager for Canada. In 1901 he retired from active management of the company, and was appointed a member of the Canadian board, of which he was chairman for several years. He was a director of Molsons Bank, president of the Insurance Managers' Association, and also of the Insurance Institute of Montreal. He is survived by a brother, Mr. A. G. Ramsay, of Toronto, formerly president of the Canada Life.

INTERNATIONAL PAPER COMPANY AND CANADA

Suggestion That Company May Move its Plant to the Dominion if United States Tariff is Raised

The report of the International Paper Company for the year ended December 31st, 1912, will likely show the largest net earnings in any year since 1905, the directors anticipating that it will total about \$6,000,000. Discussing the decline in this company's stock, it was suggested in New York last week that if a reduction were made in the paper tariff, the plants of the company in the United States might be transferred to Canada with very little expense.

Big Daily Production.

The company is producing at the rate of about 1,750 tons of paper a day. The production varies from 1,746 to 1,777 tons. Of this, 80 per cent. is news print. The remainder of the output consists of tag paper, box paper and supplement paper. It is selling its product at \$2.25 per 100 pounds and finds the market favorable, so that its entire output is sold. Beginning next year, International Paper will begin supplying news print on several new contracts, of which the New York Sun is the largest. The Sun contract calls for 40 tons of news print per day. The Sun is now receiving its paper from the Great Northern Paper Company and is paying less than it will have to pay on the new contract at the first of the year.

International Paper is spending considerable money in improving its property and has expended a large amount of money for this purpose during the last three years, and now has a profit and loss surplus of approximately \$9,000,000. One of International Paper's greatest assets is its ownership of timber lands in Maine and Canada. The policy of the company is not to use its own wood where it can buy in the open market at a reasonable price. Directors of International Paper believe that the timber lands should be held as a final reserve, and should not be used until the price for wood pulp timber in the open market advances too much.

Holdings in Canada.

The International Paper Company was incorporated in 1898 in New York for the manufacture and sale of pulp and paper, and was a consolidation of nineteen paper producing companies. Among the concerns it controls are the Miramichi Lumber Company, incorporated in 1905 in Maine. It has rights to cut timber on about 415,000 acres of Crown land limits in New Brunswick. It also controls the St. Maurice Lumber Company, incorporated in 1891 in New York. This company owns cutting up and wood preparing mills at Batiscan, Three Rivers and Pentecost, Quebec, with water powers and rights to cut timber on more than 2,000,000 acres of Crown land limits in Quebec.

The International has authorized common stock of \$20,000,000; 6 per cent. cumulative stock, \$25,000,000; and a bonded debt of \$16,473,000, exclusive of \$1,189,000 bonds of controlled companies.

BRITISH GOLD RESERVES

Discussing the subject of gold reserves in his presidential address to the Institute of Bankers in London, the Right Hon. Viscount Goschen said: "Various suggestions have been made from time to time by well-informed people with a view to increasing the gold reserves in the country. As representatives of an important section of the banking community, we cannot afford to belittle the importance of this subject. I am confident that we all desire to strengthen and build up a safe reserve that would be always at hand to meet exceptional demands, secure us against panic in a time of national crisis, and also to minimize, as far as possible, the penalizing of the trade of the country. I have never seen a scheme put forward, however good that scheme may be, which does not call upon someone to make great sacrifices. If the Bank of England substitutes gold for securities in the Issue Department, it seems to me that it must end in the Bank selling securities in order to rectify the ratio of reserve to liabilities in the Banking Department. In that case you are asking the Bank to be the martyr. If you persuade the Government to pay off its debt to the Bank of England there must be a loss of interest to the Bank if that capital sum is to be converted into bullion. If the Government make a concession to the Bank equivalent to its loss of interest on the present debt, the Government itself would then become the martyr. In my opinion, this question is far from settlement unless the burden be distributed over many shoulders. Much may be done by individual banks strengthening their own inner reserves, and I venture to think that much has already been done in this direction."

ALBERTA'S LOAN IN LONDON

Seventy-five Per Cent. Left With Underwriters, and Sixty Per Cent. of New Westminster's Bonds

Seventy-five per cent. of the \$5,000,000 4 per cent. loan issued in London at 97 has been left with the underwriters. Premier Sifton, of Alberta, who is in London, says that the result is entirely satisfactory considering the present state of the money market. Although 75 per cent. seems a large proportion for the underwriters to absorb, they were anxious, he says, to secure at least 60 per cent. That the sale is one of the best and most advantageous financial deals for this province that has been made since the inauguration of the province, is the opinion of bankers and capitalists generally in Edmonton.

Good Price Received.

In all, \$5,000,000 of 10-year 4 per cent. debentures were sold for immediate issue at 97, while the highest United States bid for the same issue of bonds was about 88, which was not entertained by Premier Sifton and his colleagues.

The Fire Underwriters' Association has issued the following Alberta since 1905 are gathered from "Capital Investments in Canada," published by The Monetary Times:—

Date.	Amount.	Security.	Issued at
Jan., 1909	.. £411,000	.. 4% sterling debentures	 99½
Jan., 1911	.. 1,400,000	.. 4% 6 months' treasury bills	 —
Feb., 1912	.. 500,000	.. 3¾% notes	 —

New Westminster's Loan.

Forty per cent. of the city of New Westminster's 4½ per cent. loan of £256,300 has been subscribed for by the public here.

The fact that large parts of these loans have been left with the underwriters does not necessarily signify poor credit on the part of the borrowers. On the other hand, the percentage proportions taken by the underwriters will naturally add to the floating securities which are to be absorbed by the public.

CANADIAN BANK EXPANSION

While the United States has been wrestling with depression and undergoing liquidation, Canada has been enjoying a period of uninterrupted prosperity—the special causes being heavy influx of new settlers and of new capital. It is but natural, under those circumstances, that the banking of the Dominion should show a very important expansion. Thus on August 31st, 1908, the total resources of the banks were \$954,518,493, or 10.6 per cent. of the resources of the United States national banks. In 1909 the total had risen to \$1,079,284,640, or 11.3 per cent. of the American total at the same date. The increase for that year was 13.1 per cent. as compared with an increase of 6.1 per cent. effected by the national banks.

Coming finally to August, 1912, it is seen that the bank assets in Canada amounted to \$1,501,817,795, or 13.7 per cent. of the national bank totals, is the conclusion of an article by Mr. H. M. P. Eckardt, in a New York contemporary. In this year the banking expansion north of the international boundary has been even greater than in preceding years, the totals as at August, 1912, representing an increase of 13.6 per cent. over the totals of August, 1911. In the whole four years the Canadian banks have increased their resources over 57 per cent., the ratio of increase being 2-2-3 times as great as that applying to the national banks.

A notable feature of the situation is the decrease in number of banks. Four years ago there were 33 banks reporting; and now there are only 27. Thus the average bank has nearly doubled in size during the past four years. In 1908 it was an institution with \$28,924,000 of assets; and in 1909 it is one with \$55,622,000 assets.

The interesting question is, can the Canadian banks maintain the ratio of growth? That question is exceedingly difficult to answer. As remarked above, the rapid growth has been largely due to heavy influx of capital and population. If that influx continues on the present scale, no doubt the assets of the banks will continue to increase rapidly; if it is interrupted the progress will be slower.

TRUE BILLS RETURNED AGAINST BEATTIE NESBITT

Five true bills were returned by the Grand Jury of the Criminal Assize Court, Toronto, this week, charging Dr. Beattie Nesbitt with "making fraudulent returns to the Government" in connection with the Farmers Bank. It is reported that Dr. Nesbitt is ill and confined to his bed.

CONTROL OF COMPANIES

Jurisdiction of Dominion and Provinces Over Incorporation and Regulation of Commercial Companies

The following is a statement of the facts in the case of the John Deere Plow Company, Limited, versus Agnew, together with the text of the judgment of Mr. Justice Murphy, dismissing action. This case raises in an acute form one phase of the general issue which is now before the Supreme Court in the form of a reference as to the jurisdiction of the Dominion and the provinces over incorporation and control of commercial companies, states Mr. F. W. Wegenast, secretary of the legal department of the Canadian Manufacturers' Association.

The John Deere Plow Company is operating under a Dominion charter, with head office at Winnipeg. The company applied for a license but was refused because there was already an American company of the same name registered in the province and under a provision of the act the registrar of companies was forbidden to register two companies of the same name. The company was, therefore, if the act is valid, completely shut out of British Columbia, though it had a charter from the Dominion entitling it to carry on business throughout Canada.

Will Affect Status of Companies.

The company sued on a number of notes which it held against a merchant in the province taken for goods sold and delivered to him. The merchant sets up no defence on the merits but relies entirely on the provision declaring the company in the absence of a license incapable of taking any proceedings in the courts of the provinces. The company pleads that the act in so far as it purports to apply to Dominion companies is invalid and unconstitutional as beyond the powers of the provincial legislature under the British North America Act.

If the contention of the plaintiff is upheld it will affect the status of Dominion companies under the extra provincial licensing and foreign companies acts in the other provinces as well and will render it unnecessary for Dominion companies to comply with these acts. The case has been set down in the Supreme Court for hearing at the present sittings.

The plaintiff is a company incorporated under the Companies Act of Canada under a charter authorizing it amongst other things to carry on throughout Canada the business of dealers in agricultural implements, carriages and wagons, machinery and a general agency, commission and mercantile business.

The defendant is a merchant residing and carrying on business at Elko, British Columbia.

Transactions Under Agreement.

The plaintiff and defendant entered into an agreement at Winnipeg, Manitoba, under which the company agreed to give him the exclusive right within a certain territory of selling the company's goods. The company agreed to mail to a list (to be supplied by the defendant), of persons within this territory, a newspaper published by the plaintiffs in which a full-page advertisement was to appear of the defendant as dealer in the plaintiff's goods. The defendant agreed to deal exclusively in the company's goods in certain specified lines, and not to sell these goods below certain specified prices. The contract contained a list of prices at which goods ordered by the defendant would be paid. The property and the title to all goods shipped was to remain in the company and not to pass from it until all the obligations given in respect of them were satisfied. Moneys received by the defendant on account of goods supplied by the company were to be held by the defendant in trust for the company. It was further agreed that whenever requested by the company the defendant would obtain as security for goods sold to customers lien notes or other securities payable by the customers direct to the company.

Under this agreement the defendant ordered at various times certain goods to be shipped by the plaintiff f.o.b. Calgary, Alberta, consigned to the defendant at Elko. Part of the goods were ordered by the defendant personally at Winnipeg and part were ordered by letters posted by the defendant at Elko directed to the plaintiff at Winnipeg and fulfilled by the plaintiff by shipping the goods to Elko.

Questions of Law Arising.

In respect of the goods shipped by the plaintiff to the defendant the defendant gave to the plaintiff four promissory notes. All these notes were dated at Winnipeg and payable at Elko, but two of the notes were in fact signed at Elko.

The plaintiff had not complied with Part VI. of the Companies Act of British Columbia, requiring companies incorporated otherwise than under the authority of the legislature of British Columbia to become licensed before carrying on any part of their business in British Columbia.

The parties to the case agreed to a statement of facts and concurred in stating the question of law arising upon the facts for the consideration of the Court.

The questions submitted for the opinion of the court were as follows:—

First:—Whether the plaintiff is in the absence of a license under Part VI. of the Companies Act of British Columbia (10 Edw. VII. c. 7), precluded from carrying on business in British Columbia or from maintaining action in respect of any of the claims or notes aforesaid.

Second:—Whether the provisions of the said Part VI. of the Companies Act are, in so far as they purport to prohibit the plaintiff from carrying on business in the Province of British Columbia and to maintain actions in the courts of the said province, intra vires of the Legislature of the Province of British Columbia.

Justice Murphy Hears Case.

The case was argued in court before Mr. Justice Murphy on the 10th July, 1912, and on his request was re-argued on the 11th September, 1912. On the 2nd October, 1912, he delivered judgment, answering both questions in the affirmative and giving reasons as follows:—

"As to the questions that the sections of the Companies Act applicable here are ultra vires because they seek to impose conditions on a company incorporated by the Dominion and authorized to do business throughout Canada, this has already been passed upon in *Waterous Engine Company versus Okanagan Lumber Company*, adversely to plaintiff's contention. As the decision still stands I adopt it pro forma and hold the legislation complained of to be intra vires.

"On the second branch of the case, that what was done here does not fall within the disabling sections, putting the plaintiff's case on its strongest ground it must be conceded that, if section 139 has been violated, section 168 becomes operative and this action fails. Now section 139 inter alia states: no company, firm, broker, or other person shall, as the representative or agent of or acting in any other capacity for any such extra provincial company carry on any of the business of an extra-provincial company within the province until such extra-provincial company shall have become licensed or registered as aforesaid. Does the contract in question here provide that defendants as representative or agent of or acting in any other capacity shall carry on any of the business of plaintiffs. I think it does. The defendants need not be agents; they need not even be representatives as required by the Alberta Act. It is sufficient if they act in any capacity.

Violation of Section of Act.

"The contract requires them to ensure the goods shipped in the company's name; to sell according to a fixed price list; on demand, to take notes in the company's name from purchasers and forward same to the company; to hold in trust for the company proceeds of sales until payment of all obligations and to do a variety of other things on behalf of the company. It is argued that all these provisions are merely the giving of security for payment of the indebtedness and not a carrying on of any of the business of the company. But the defendants have to act within the province in providing such security. They must insure here. The contracts of sale are evidently intended to be made here and, therefore, if demands to take notes in the company's name is made, the defendants must act here in obtaining such notes and so on with many other provisions of the contract. To put the matter in a nutshell, in my opinion, granting for the sake of argument the plaintiff's contention, the making of security for indebtedness is a part of the plaintiff's business as it would be of any merchant and the defendants are in some capacity—it matters not what under the wording of the section—bound to do various things in this province to obtain such security for plaintiffs. This is a violation of section 139 and the present action cannot be maintained. The questions are answered accordingly.

UNIFORM BANKRUPTCY LAW WANTED

A uniform bankruptcy law is requested in a petition addressed to the Federal Government by the Montreal Chamber of Commerce. The petition, which was embodied in a resolution adopted by the Chamber, recalls that since 1880 there has been no such uniform law, and that ever since 1888 the Chamber has been praying that such a law be passed. It is pointed out that such a demand has been continually made by various local business organizations, and a resolution embodying such a reform was adopted unanimously at the congress of the Chambers of Commerce of the Empire, held in Montreal in 1903, and in London in 1906. The expansion of Canadian trade demanded that foreign capitalists and traders be given every security. In its petition to the Ottawa authorities the Chamber asks that it be furnished with a copy of any projected legislation on the subject.

WEST CONTRIBUTES EIGHTY-THREE CHARTERS

Large Financial Corporation—Several Lumber, Wood Products and Manufacturing Companies

Western Canada continues to add to the numbers of new companies incorporated, no less than 83 companies having received charters this week, making a total of 126 for the Dominion with \$17,734,000 capital.

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capital.
Manitoba	10	\$4,680,000
British Columbia	25	3,639,000
Quebec	22	3,274,000
Saskatchewan	24	2,441,000
Ontario	20	2,330,000
Alberta	24	1,270,000
New Brunswick	1	100,000

The largest companies this week are:

Company.	Capital.
Alloway & Champion, Winnipeg	\$3,000,000
People's Canadian Land and Improvement Company, Winnipeg	1,000,000
Crown Investment Company, Montreal	1,000,000
Great West Textile Company, Regina	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Winkle, Sask.—Quebec Land and Mortgage Company, \$50,000.

Peterborough, Ont.—Forest Products Company, \$40,000. H. G. Rogers, H. G. Logan, W. H. Hill.

Moncton, N.B.—Vye Sectional Brake Shoe Co., \$100,000. B. D. Vye, J. H. Rogers, S. Humphrey.

Brookville, Ont.—Gilbert Motor Boat Company, \$100,000. F. R. Gilbert, J. E. Lowey, S. J. Kilpatrick.

Port Arthur, Ont.—Russell Timber Company, \$50,000. W. H. Russell, T. A. Read, W. F. Langworthy.

Woodstock, Ont.—Standard Tube and Fence Company, \$200,000. J. L. Hossack, C. Jones, H. A. Little.

London, Ont.—T. B. Escott & Company (grocers), \$130,000. G. S. Gibbons, F. F. Harper, W. J. Smith.

Moose Jaw, Sask.—Consolidated Agencies, \$100,000. M. and A. Primeau, \$100,000. Owls' Building, \$15,000.

St. Jacques, Que.—St. Jacques Tobacco Packing Co., \$150,000. L. A. Cusson, V. Cusson, R. Gagne, Montreal.

Three Rivers, Que.—La Compagnie Immobilière des Trois-Rivières, \$49,000. W. E. Roy, A. Lebrun, J. Balcer.

Chicoutimi, Que.—La Compagnie Gaudreau, Gagnon, Chicoutimi, \$20,000. P. Gaudreault, S. Lapointe, A. Langlais.

Montreal West, Que.—Montreal West Bowling and Curling Club, \$20,000. J. Ballantyne, A. E. B. Giles, J. R. Colly.

Medicine Hat, Alta.—Westmount Realty Company, \$120,000. Alberta Glass Bottle Company, \$200,000. Connaught Gardens Realty, \$35,000.

Rock Island, Que.—Lay Whip Company, \$100,000. T. J. Norris, Rock Island; J. O. St. Pierre, Stanstead Plain; H. Tomkins, Beebe Plain.

Sherbrooke, Que.—Compagnie de Placements de Sherbrooke, \$199,000. J. A. Begin, Windsor Mills; F. Campbell, O. C. Morissette, Sherbrooke.

Thetford Mines, Que.—Compagnie Chimique Anglo-Canadienne, \$20,000. E. Roberge, Sherbrooke; J. E. Marcoux, A. Roberge, Thetford Mines.

Bridgeburg, Ont.—Economy Fuse and Manufacturing Company of Canada, \$10,000. G. E. Bennett, E. B. Mallory, New York; W. B. Stephenson, Pittsburg.

Ottawa, Ont.—Ottawa Football Club. W. A. Cameron, D. J. O'Donohoe, F. W. Carling. Women's Hostel and Travellers' Aid. Mrs. E. Shortt, J. C. Ewart, M. C. McLachlin.

Calgary, Alta.—Retail Lumber-Men's Credit Association, \$10,000. Compressed Gas Company, \$10,000. Port Douglass Townsite Company, \$30,000. Eureka Oil Company, \$100,000. Rosebud Farm Lands Company, \$180,000.

Regina, Sask.—Edmonton and Prince Albert Land Company, \$20,000. United Typewriter Company of Saskatchewan, \$10,000. Regent Motors, \$100,000. Coal Savers, \$260,000. Great West Textile Company, \$1,000,000. Henderson's, \$20,000.

Berlin, Ont.—Acme Furniture Company, \$40,000. J. Lauffer, J. Hunt, P. L. Kroetsch. Wino Manufacturing Company, \$40,000. C. M. Zuber, J. M. Zuber, H. B. Taylor. Chippewa Oil and Gas Company, \$50,000. E. Shantz, A. Cressman, M. C. Bowman.

Hamilton, Ont.—Echo Park (land and building company), \$40,000. W. Lees, L. F. Stephens, H. S. Lees. Hamilton Hotel Company, \$900,000. J. R. Moodie, P. J. Myler, H. L. Frost. Hamilton Labor Temple Association, \$100,000. A. Fontyn, R. Pevler, J. Pryke.

Victoria, B.C.—Syndicated Properties, \$100,000. Investors' Securities (real estate), \$200,000. Telkwa Light and Power Company, \$500,000. Ideal Homes, \$20,000. Merchants' Club, Incorporated, \$45,000. J. Bruckshaw, J. Haras, J. A. Johnstort

KEY TO CANADA'S COMMERCIAL LIFE

So Sir George Ross Describes the Panama Canal—
Short Route to the Orient

That the Panama Canal is the key to the commercial life of Canada was the statement of Sir George W. Ross in Toronto recently. Should the bill passed by the United States Senate come into force it would be an unjust discrimination against the trade of the Dominion, he added. The United States Senate had shown a lack of consistency in passing a measure discriminating between coastwise and foreign shipping when twelve years before, in 1900, that body voted down a like measure. To be sure, conditions were changed, in as much as the United States owned the land and had built the canal, but under the Hay-Pauncefote treaty the canal was to be free and open to all vessels of war and commerce on payment of equitable tolls. By this the United States relinquished sovereign rights. Moreover, the United States had practically no foreign shipping, so that the exemption of its coasting vessels from tolls would practically make the canal free to the shipping of that country.

Two Courses for Canada.

Two courses, he said, lay open to Canada—either to remonstrate through the British Foreign Office or to apply to The Hague Tribunal. Whatever the verdict, friendly relations should be maintained between these nations of a common stock. So great and powerful a nation as the United States, he thought, would not do so great an injustice to a smaller and weaker State.

The value of the canal to Canada may be estimated from the fact that Vancouver would be about 7,000 miles nearer to Montreal by water than now, and the cost of shipping would be from \$6 to \$9 per ton as compared to the present rate of \$30 to \$40 per ton by rail. Its significance lay in the fact that it would mean more extensive commercial relations between Eastern and Western Canada, just as it would between the Eastern and Western States. This commercial intercourse would be the very life of a new country like Canada.

On the other hand, should this bill become law, it would be necessary to ship to ports in the United States by rail and then by United States coasting vessels to escape the toll of \$1.20 per ton freight weight levied at Panama. Surely this was discriminating against Canadian shipping and contrary to the Hay-Pauncefote treaty.

Short Route to Orient.

The importance of the canal to the world would be immeasurable. The long-sought short route to the Orient was to be opened at last. It would be of great importance to the foreign trade of Canada. It would put Eastern Canadian manufacturers in touch with the commerce of the millions of people living on the west coast of South America, in Australia, New Zealand and the Orient. It was still more important that the Canadian farmers would be able to find cheaper transportation to Europe for their grain—Canada's greatest source of wealth. Already the present grain routes were inadequate, and as yet only 6 per cent. of the grain-growing territory was under cultivation. Moreover, there would be an actual yearly saving to the Canadian farmers of from forty to fifty million dollars in transportation.

WANT CANADIAN PRODUCTS

Several firms in Birmingham, England, are under the impression that Canadian brooms, brushes and whisks can be sold in this district, is the statement of Mr. J. E. Ray, Canadian trade commissioner at Birmingham, who has also received enquiries for hard wheat flour. One large importer asserts that there is certain to be a big demand for the Canadian product, as the quantity and quality of British and continental wheat are not up to the average this year. It is believed that enhanced prices will be obtainable by Canadian millers, and that the Midland counties will be relying more than usual upon shipments from Canada. Correspondence with a few manufacturers, however, has revealed a heavy demand for their goods in the home market, and consequently they can export only small quantities. Firms in a position to export regularly can be introduced to probable buyers by notifying the Birmingham office.

Application will be made at the next session of the Dominion government for the incorporation of the Quebec Rapid Transit Company, with powers to construct a railway from a point in the city of Quebec, through Montmorency to Lake St. Charles, making a belt line from the city of Quebec through the county of Quebec.

CANADIAN PACIFIC STOCK RIGHTS

Forthcoming is the Ninth Such Privilege Accorded to
Stockholders Since Nineteen Hundred and Two

The subscription rights to the new \$60,000,000 of Canadian Pacific common stock possess an arithmetical value of 20.77, on the basis of a market valuation of 265 for the old stock. Quotations on the Stock Exchange opened at 20.65, with the high for the day at 20.75, and the closing price at 20.50. As they are not to be exercised until February, the rights now offered may be said to belong to the stockholders' returns for 1913.

The offer to participate in the new issue of stock accords to stockholders the ninth privilege of this nature they have had since 1902, the latest being by far the most valuable right to subscribe as yet extended by the company. Ever since last August, when directors announced to stockholders that the company purposed increasing the common capitalization of the company by \$60,000,000, there has been much interest as to what the value of the prospective rights would be. The full amount of \$60,000,000 was duly authorized by the stockholders at the annual meeting, but all estimates of the value of the forthcoming rights was precluded because it was not known generally whether the amount as authorized would be issued at once and the same time, or whether, as was believed in some substantial quarters, only \$25,000,000 or \$30,000,000 would be put upon the market.

Rights of Eleven Years.

Now that it is definitely known what amount of and on what basis the new stock will be offered next January comparison with the value of preceding rights accorded during the last eleven years will be interesting. They are tabulated as follows by the Wall Street Journal:—

Year.	Rights.	Dividends.	Rights and Dividends.	Yield on Aver. Price.
1912	8.37	10.0	18.37	7.22
1911	8.33	10.0	18.33	7.57
1910	...	9.5	9.50	4.20
1909	9.56	2.0	16.56	9.36
1908	7.00	7.0	14.00	9.17
1907	...	7.0	7.00	4.21
1906	11.00	6.0	17.00	9.04
1905	...	6.0	6.00	3.80
1904	5.62	6.0	11.62	9.45
1903	...	5.5	5.50	4.33
1902	4.75	5.0	9.75	7.46
Av. 11 yr. ..	5.08	7.17	12.26	6.07

A Twelve Point Twenty-Six Stock.

Thus, on the basis of the average prices of these rights and the dividends paid over the indicated period, Canadian Pacific was a 12.26% stock. In cash dividends above, the stock showed an average yield of 4.13 on an average price of 162, a figure which compares with the yield on average price and over the same period of two other stocks now on a 10% basis, viz.: Union Pacific, 5.44% and Lehigh Valley, 6.50%. As this comparison indicates, rights have played a much more important part in determining the market value of Canadian Pacific than in that of the other two named.

SASKATCHEWAN'S INDUSTRIES

The industrial development of Saskatchewan is at the present time receiving the special attention of the government. Mr. Wynne-Roberts and Dr. Andrews have been engaged in conducting an investigation on behalf of the provincial government as to the best means of utilizing the coal resources of the south-eastern part of the province, and there can be no doubt that in the northern part of Saskatchewan opportunities for obtaining cheap water power are equal to those of any other province.

The number of factories in Saskatchewan has increased very rapidly during the last few years and indications are that in the near future there will be a much greater rate of increase than is shown in past years.

An enumeration of Saskatchewan's industries shows that it has 28 lumber and planing mills, 17 brick yards, 39 flour mills, 4 pork packing plants and 227 factories employing 3,708 males and 332 females.

Application will be made to the Dominion parliament for the incorporation of a company to carry on the business of fire insurance in all its branches, under the name of the Great West Fire Insurance Company. Messrs. Elwood, Embury, Scott and Graham, Regina, are solicitors for the applicants.

SHERWIN-WILLIAMS ANNUAL MEETING

Progress Being Made—Developments in the Dominion
and Other Countries—Various Companies
Concerned

Monetary Times Office,
Montreal, November 28th.

The first annual meeting of the Sherwin-Williams Company of Canada was held at the company's offices in Montreal last week. The financial statement for the year ending August 31st, 1912, showed profits for the twelve months amounting to \$576,941. From this was deducted bond interest amounting to \$140,168, and preferred stock dividend amounting to \$210,000, making a total between these two of \$330,168. The balance, amounting to \$226,773, was the surplus applicable to common stock dividends, had such been paid. This would have represented 5.67 per cent. on the \$4,000,000 of common stock issued. This surplus, added to the surplus of \$73,227, carried forward from the previous period, makes a total surplus of exactly \$300,000 on the company's books.

During Period of Reorganization.

The surplus of \$73,227, just mentioned as having been brought forward, was accumulated during the operations of the company, from June 15th until September 1st, during which period the company was undergoing reorganization, having just previously been formed of several concerns engaged in the manufacture of paints. During this interim period, surplus profits amounted to \$366,754. Of this, \$200,000 was applied towards the reduction of property account; \$93,527 added to reserve set up for depreciation, and the remainder, namely, \$73,227, was carried to surplus, as already stated.

In the estimates of earnings for the year 1911, issued at the time of the formation of the consolidation, Mr. C. C. Ballantyne, the company's general manager and its vice-president, stated that the consolidated concern should have profits of \$550,000 during 1911 and \$600,000 during 1912. It will be seen that the profits for the period mentioned were midway between these two sums. The bond interest, as stated above, was only for the period during which the bonds were issued. During the present year, the bond interest will run for the full twelve months, and the sum of \$147,000 will be required to pay the interest at the rate of 6%.

Subsidiary Companies Successes.

Mr. Cottingham presided at the meeting and explained that during the past year the company had made good progress. The sales of all the subsidiary companies had been larger than ever before, and the profits had also exceeded those of previous years. During the year, the English subsidiary of the Sherwin-Williams Company of Canada had established a branch in Sydney, Australia, to take care of the increased business which was expected from that quarter in the near future. The company was also expanding in Canada, the Winnipeg works being now in the process of reconstruction and enlargement, in order to take care of the rapidly increasing trade of the north-west provinces. It was also Mr. Cottingham's opinion that the outlook for the coming year was exceedingly bright.

Companies in Consolidation.

The Sherwin-Williams Company of Canada was a consolidation of the Canadian end of the business of the Sherwin-Williams Company of America, the Canada Paint Company, and Lewis Berger, of England, which latter concern had been working in close connection with the Sherwin-Williams, of America. The consolidation was effected about a year ago, and Mr. Walter Cottingham was elected president, and Mr. C. C. Ballantyne vice-president and general manager. Both these were instrumental in persuading the Sherwin-Williams Company to open its branch in Montreal many years ago, and Mr. Cottingham was later called to the head office, and in course of time became the president of the American company, while Mr. Ballantyne remained here to look after the Canadian end of the business. The officers and directors were all re-elected.

During the past two or three weeks Western applications for loans have been coming in from the country in large numbers. "It is by no means certain that we are to encounter a money stringency," writes a correspondent to The Monetary Times. "The grain movement has been late and the money therefrom is not yet forthcoming. The banks are window dressing for November 30th, and the loan companies for December 31st. Later in the season, more money will be available for loans. In the meantime there is certainly an indisputable tightness."

TRANSPORTATION OF CANADIAN WHEAT

Railway Files Tariffs at Washington—Competition of
United States Grain—Extension of Navigation
Seems Unlikely

Tariffs have been filed with the Interstate Commerce Commission at Washington by the Canadian Northern Railway, comprising export rates on Western Canadian grain from Western points to Duluth and Minneapolis. The rates will come into effect on December 9, and the Canadian Pacific Railway rate, notice of which was filed some time previously, will come into effect on December 2. The Grand Trunk Pacific tariffs are still applicable to Minneapolis and Duluth.

The Canadian Northern Railway, when approached by the department of trade and commerce in the first instance, declined to file rates until they were certain that their own Canadian lines and elevators would be filled. It is believed, however, that the company has realized that the danger of congestion at terminals calls for an outlet through American channels.

Traffic Arrangements for the West.

Mr. Cy. Warman, general assistant of the Grand Trunk Railway system, has made the following announcement after a conference of railway officials at New York:

"At the request of the Dominion Government the Grand Trunk Railway has authorized a traffic arrangement which is intended to relieve the traffic situation and to prevent a congestion in the Canadian West. By this arrangement the Grand Trunk will open every gateway along the border west of the Great Lakes, and allow traffic to flow out over American lines and back to the Grand Trunk at Chicago.

The rates in question apply simply to grain for export purposes, and not for domestic consumption in the United States. On account of the superior quality of the Western grain this year it is believed by the railways that the percentage of the whole crop offered for shipment to the south will be considerably lower than in 1911.

Competing in World's Markets.

The spring wheat crop of Minnesota and the Dakotas is estimated this year at 220,000,000 bushels, which is said to be a hundred million bushels more than was ever produced before in these states. It is contended, therefore, that there will be a heavier export movement than usual competing with the export wheat of Canada in the markets of the world.

It is claimed that the Canadian Pacific Railway will be in a better position to move the grain along the north shore lines after the close of navigation than it was last year. More elevator capacity at the head of the lakes, more motive power, and more cars incline the railway to believe that a less amount of grain than last year will have to seek an outlet to the south.

During the seven months, April 1st to November 1st of the current fiscal year, 300,481 immigrants arrived in Canada. Of this number, 200,701 arrived at ocean ports, and 100,140 from the United States. These figures show an increase of 13 per cent. as compared with the number of arrivals for the corresponding months of the last fiscal year, which were 172,260 at ocean ports, and 93,573 from the United States, making a total for the seven months, April 1st to November 1st, 1911, of 265,833 persons. During the month of October this year there were 27,192 arrivals, 16,711 of them having been at ocean ports and 10,481 from the United States, as against 23,902 for October last year, 13,646 of whom were at ocean ports and 10,256 from the United States.

Fruit trees in Ontario as a rule are in fair condition where cared for, the season having been a good one for general growth. Some correspondents, however, more especially in some of the Lake Erie counties, speak of the serious injury done to orchard trees, where the San Jose Scale has been neglected. Although considerable spraying is reported to have been done, there is room for more of it. The codling moth was much in evidence, and some of the apples were also spotted and scabby. There has been a considerable surplus of apples, more especially of the earlier varieties. Instances are reported in Western Ontario where it was impossible to find a market for all the fall apples, and thousands of barrels had to be fed to live stock or be left on the ground to rot, after the evaporators were supplied. Even good winter varieties have not commanded satisfactory prices in the orchard. A scarcity of apple barrels has been complained of. There was also a surplus of pears, plums, and cherries of a good saleable character, but peaches, although fairly plentiful, were of a poorer quality than usual. Grapes also were very slow in ripening and were not up to their usual quality.

BANK AND THE FARMER

Agricultural Credits of a Strictly Business Nature—
Central Control

Delegations from Western Canada are expected at Ottawa to present ideas regarding the relation of the farmer and the bank, in connection with the Bank Act revision. Some changes in the Bank Act extending the security given for loans, may be made. While the banking system in the United States is different to that of Canada, and therefore makes somewhat different the relation of banks and farmers, the recent address of Mr. E. B. Fisher, Deputy Comptroller of New York City, on this subject, is of interest. He declared, at New York, that the farmers of the United States were nearing a period in the history of agricultural development when methods of production must be altered, the principles of business efficiency established, and broader credit relations developed with the capitalist and the banker.

Asserting that a bad banking system has been the chief cause underlying the panics of 1884, 1893 and 1907, Mr. Fisher added: "It may now be said with confidence that we are at last able to discern the causes of the financial difficulty, but it remains to be seen whether the farmers of the country, in co-operation with its merchants, manufacturers and bankers, will have the decision to remove these causes."

Frequent undermining of confidence in the deposit has been due both to the United States banking system and to the attitude of the depositors, Mr. Fisher said. There are periods of excitement in business life when men want to see and feel the actual money. Leading from this to a discussion of a central banking organization, Mr. Fisher said in part:

Central Banking System.

"There should be developed in this country some central banking organization which would be in a position at all times to aid institutions in need of funds to meet occasional and unusual demands. To the farmer, and to every other business man in the country, banking reform means that there shall be no question as to his ability to get the full amount of his deposit at any time. Our banks have no systematic method of expanding and contracting their credit and currency to meet the varying needs of business. Banking reform, then, means the establishment of such a market through the development of a central banking organization which will at all times stand behind the banking world, and through it safeguard the interests of the merchants and farmers.

"In Germany, under central banking, the discount rate rose to but 7% under war-scare conditions in the fall of 1911. In New York, in 1907, the rate for call loans, which is our only open market; was as high as 125%, and averaged 20% for October, while during the same period the rates of the Bank of France, the Bank of England and the Bank of Germany were advanced to but 4%, 7% and 7% respectively. In the United States, decentralization has grown to such an extreme that during the last crisis, \$2,000,000,000 of gold in the banks and in the hands of the people was absolutely inefficient as a basis for the extension of credit and of no service to those in financial trouble or for the purposes of ordinary business."

As to Agricultural Credits.

Mr. Fisher declared that agricultural credits of a strictly business nature that will be promptly paid should be acceptable for re-discount. Such a principle developed through central banking would be a very definite benefit to the farming interests. The speaker divided agricultural credit in three classes: First agricultural-commercial credits, that are acceptable by banks because paid at maturity and which represent value already created; second, that class of paper whose payment is not so certain and which it is desired to give the quality of commercial credit through some principle of co-operation such as is used by the Mutual Credit Associations of Europe; and third, credits that are based upon mortgages and available for general investment, more particularly through the co-operative principle of bond issues.

Fear of Central Control.

Sale of bonds based upon mortgages needs the collateral development of a discount market guided and supported by a central organization, Mr. Fisher believed. Prospective purchaser of mortgage bonds could at any time sell commercial bills for the money necessary for such investment. Under existing American practice, with frequently recurring periods of high rates and scarcity of money, such bonds would be a drug on the market.

Mr. Fisher said in conclusion that the fear of central control, under law, is the fear of the ignorant mind. Money needs must have direction and guidance, he said. The reserve supply should be ever ready to flow through the channels of currency and credit to promote the prosperity and develop the wealth of all the people.

RESPONSIBILITY FOR HIGH PRICES

Toronto Board of Trade's Committee Finds Many
Reasons, as Tariffs, Railways, etc.

The principal causes of the world-wide rise in the price level of all commodities, including foodstuffs, are cited as follows by the special committee of the Toronto Board of Trade which has investigated the matter:

(1) The great increase in the production of gold which has continued now for twenty years. Moreover, the effect of this increase has been magnified by economy in the use of gold on the part of bankers and other manufacturers of credit money who have succeeded in increasing the volume of credit money in proportion to the gold basis on which it rests. The world's stock of money has thus increased more rapidly than the world's stock of commodities which are measured in terms of this money—in other words the price of commodities has risen.

(2) The enormous sums expended every year by the great nations of the world in preparation for war. This unproductive expenditure has now reached a height undreamed of a generation ago, and it is still mounting, drawing away every year millions of men and billions of dollars which would otherwise be employed in the production of commodities of value.

(3) A third cause which has especially affected the increased cost of food is to be found in the migration citywards which has been taking place nearly all over the civilized world. Modern cities have been made more and more attractive in comparison with the monotony and isolation of the farm. This is particularly true of the newer cities of North and South America, Australia and New Zealand. Moreover, the adoption of the principle of protection by the food exporting countries has greatly increased in such countries this movement citywards, and has, in North America for example, developed great manufacturing industries in the cities largely at the expense of the country districts—even in a fertile province like Ontario, land has been actually going out of cultivation during the past few years.

Causes Operating in Canada.

One cause operating in Canada, as a whole, which permits the prices of foodstuffs to be higher in Canadian cities than in London, is the tax levied on imports of food from abroad and paid, of course, by the Canadian consumer. This tax was intended to protect the Canadian farmer in times of Canadian scarcity and to be inoperative in times of Canadian plenty, but the development of the packing and canning industries, coupled with the growth of cold storage facilities, has made it possible to-day for a group of men to entirely control the prices at which our farmers must sell certain products, nearly all the possible buyers being in the group, and also to maintain the prices at which the consumer must buy the same products up to the level of the foreign price plus the freight plus duty. We all know how high are the prices of domestic fruit and vegetables, while imported tropical fruits upon which there is no duty, are said to be as cheap in Toronto as in any other city outside the tropics. It was never intended that a tax imposed to protect the farmers should be used by dealers to corner domestic produce. If Argentine beef, New Zealand mutton, and Australian butter, for example, had free access to Canada, no one could doubt that the prices of these commodities would at once drop to about the London level, and it is pretty certain that the Canadian producer would on the average get at least as much as he is getting now. That this tax on the importation of food has resulted in raising the price of food to all who live within the taxed area is now clearly seen by the industrial classes of Germany and of Austria, and is apparently becoming obvious even in the United States. In these countries manufacturers and municipal councils are joining forces with the artisans in demanding the removal of the tax on foodstuffs.

Apparent Disappearance of Competition.

The causes which make for higher prices in Toronto as against the smaller places are:—

(1) The apparent disappearance here of any competition in some of the businesses connected with the collection and distribution of food products, which businesses appear to have fallen into the hands of a few powerful allied interests. Milk is a good example. We pay 9½c. a quart for milk which cannot compare in quality with the 6c. milk of the small town a few miles away. The committee have been informed that the association of Toronto commission merchants engaged in the fruit and vegetable business have secured exclusive control of the only Toronto market for the wholesale trade and thus by eliminating competition are in a position where they can dictate terms to both producer and consumer. Men engaged in raising fruit and vegetables for city consumption report that they have found the conditions

here so intolerable as to force them either to seek for other markets or to go out of the business. It is not probable that any relief can be obtained by municipal or governmental interference. The history of nearly all attempts at such interference with existing commercial conditions is not a hopeful record. The privileged corporations can afford and do employ the best brains available, and are usually better served even by their legal advisers than is the municipality or government which attempts to coerce them.

Co-operative Marketing of Produce.

As a rule our economic troubles arise not from the want of but from an excess of official regulations. A better remedy would appear to lie in the hands of the growers of fruit and vegetables themselves, who appear to have completely lost control of the selling end of their own business. Ireland to-day affords a splendid object lesson in this matter. Ten years ago the small Irish farmer was absolutely at the mercy of the middleman, who kept the prices at which they bought as low as they liked and maintained the prices to the city dealer as high as they dared. To-day these small Irish farmers are learning the trick of combination so as to control the selling end of their own business, with the result that the farmer is getting better prices for his produce and the city dweller is paying less for the same. A still better example of the effects of combination is perhaps to be found in Denmark where the farmer does not lose control of his butter or bacon until it is sold on the London market. The produce may go through several hands, but these hands are all agents or servants of the combination of producers.

Retail Merchant on Co-operative Societies.

While there is no evidence of any combination in Toronto among the small retail dealers for the purpose of keeping up the prices of food, and the small dealer seems barely able to make a living in the keen competition to which he is subjected, yet the unnecessarily large number of retail places of business makes for inefficiency and adds to the cost of distribution. For example, a hundred well equipped and well placed stores could probably do the whole city business in groceries and do it cheaper than the present multitude of small stores do; but to limit the number of grocers would at once enabled the favored few to combine and raise prices. In order to secure the advantages of the large store for the customer and not for storekeeper, numerous co-operative societies have been formed in the Old Country where the members divide among themselves the profits of the business after the payment of salaries to managers and employees. In 1908, the last year for which complete figures are available, the co-operative societies of the United Kingdom numbered about 3,000 and had aggregate sales amounting to \$565,500,000.00, on which there was a net profit of \$55,000,000.00 for division among the members.

Rail and Shipping Facilities.

But in the United Kingdom the railways and other public carriers, including the post office, upon the services of which these societies had to depend to obtain supplies, appear to be in reality the servants of the people, which is not exactly the role that our own public carriers assume in Canada.

The very poor shipping facilities which are available for produce coming into Toronto. To begin with, our navigation laws appear to have been drawn up with the idea of injuring American shipping rather than with the idea of serving Canadian shippers, certainly not with the idea of serving Canadian consignees. Also, we have no public wharf in Toronto. The railways are thus almost freed from the competition of waterborne freight into the city. Moreover, we have no parcel post service, so that the express companies, that is to say the railway companies again, can and do make us pay dividends on stock that has been shown to be largely water. It seems to be the universal opinion of shippers and consignees that in spite of—perhaps it is because of—the monopoly these railways enjoy they do not give proper facilities for bringing produce into the city. It would be difficult to over-estimate the advantages of a parcel post service such as is maintained throughout Europe, even in Russia, whereby produce could reach the consumer directly from the farmer. The small charge necessary for such service would at once put a limit to the profits of the middlemen and would compel the express companies to meet the competition of the postal service.

Markets, Rents, etc.

The absence of a market, or markets, where the people might secure food supplies at minimum cost. These markets are a real benefit to those who live in our smaller cities and towns, and could be made so in Toronto provided that the fees charged for stalls were reduced to a minimum, that access by street car or radial line was made easy, and that the roads converging upon the city were put into and kept in a proper state of repair. The South American city of Monte-

video, about the same size as Toronto, recently established an absolutely free market for food supplies. This was done in an effort to bring down the cost of living, and the experiment has been a great success, according to the report of the local United States Consul, who was asked by his government to investigate the matter.

The very high rents prevailing in Toronto, which rents must, of course, be added to the price of their goods by the shopkeeper. These abnormal rents are one inevitable consequence of our method of taxation, which may be equitable in a stationary community, but which makes it profitable in a rapidly growing city to hold land for a rise in value, but renders it expensive to improve the land by putting buildings upon it. The penalty imposed by this system upon all improvements is, of course, transferred by the landlord to his tenant and by him passed on to his customers.

VANCOUVER'S PROPOSED HARBOR COMMISSION

Three Commissioners Will Have Broad Powers—Harbor Limits

As noted previously in *The Monetary Times*, at the next session of the federal parliament a bill is to be introduced by Mr. H. H. Stevens, M.P., to provide for placing the port of Vancouver under a commission of three, two members to be appointed by the government for terms of five years, and the other by the city council, for a term of three years. The commission, if the bill passes, will be empowered to improve, operate, maintain and govern Vancouver harbor.

The proposed port limits will include Burrard Inlet with the North Arm and Port Moody, False Creek and English Bay; in fact, all tidal waters to a line drawn from Port Atkinson to Point Grey. The commission is to be the pilotage authority.

Powers of the Commission.

The commission may acquire, expropriate, lease and dispose of lands deemed necessary for development, improvement, maintenance and protection of the harbor; may acquire movable property, plant, vessels, machinery, etc. It can acquire property for wet or dry docks, warehouses, elevators and railways in connection with the harbor, and all tidal lands within the harbor limits shall be under its jurisdiction. Further, the commission may construct and operate tracks and harbor lines and may make agreements with railroads, affording all companies whose lines reach the harbor equal facilities for traffic. Laws governing the harbor not contrary to laws existing or the jurisdiction of the corporation may be enacted, fairways, special anchorages, etc., regulated, and the navigation of the harbor will be generally managed by the commission. The harbor master will be appointed by the commission.

May Issue Debentures.

Rates will be levied at discretion upon all goods landed or shipped in the harbor, moved by rail on the harbor tracks, excepting military supplies. Powers will be given the commission to borrow such moneys as are necessary to carry on its work, and debentures may be issued to cover such loans. The governor-in-council may advance funds necessary to complete the harbor works. Salvage disputes will be heard by the commission and all wreckage or flotsam dealt with.

Upon certain conditions the commission may seize vessels or goods, the detention being effected upon order of any judge or magistrate having power of two justices of the peace. Judicial powers will be given the commissioners to cover infringements of the Canada Shipping Act within the harbor limits. The government may waive duties on all merchandise required for the port commission work.

During October 6,780,566 bushels of grain passed through the Welland Canal, as against 4,826,900 for the same month last year. Three million bushels passed down during the first twelve days of November.

Under the double liability clause against the shareholders of the Farmers Bank, Official Referee Kappelé has given judgment in default of any defence against the following:—M. D. Chapman, of New York, as trustee, \$885,500; H. L. Lancaster, \$225; the estate of T. W. Dickison, \$440; the estate of Joshua H. Griffin, \$220; the assignees of Ellen Edwards, \$100; George F. Wilson, \$225; James Simpson, \$1,125; Mrs. Lizzie Cunningham, \$430; William Chisholm, \$330; Melville D. Chapman, \$3,240; Alfred T. Bodier, \$550; Dugald Blue, \$110; Alexander Dick, \$106; Joseph Fortier, \$208; Mrs. Helen Freeman, \$1,900; William Hutchinson, \$106; James Marshall, \$550; William McPherson, \$220; Isabella McMillan, \$550; W. J. Newman, \$960; Dr. George Sutherland, \$1,100; Mrs. Isabella Wilson, \$220.

SASKATOON'S LOAN IN LONDON

The city of Saskatoon is issuing a 5 per cent. loan in London this week at slightly below par.

PACIFIC COAST COLLIERIES

The Pacific Coast Collieries, Limited, has been formed with capital of \$3,500,000 bonds, \$1,500,000 6 per cent. preferred stock, and \$3,500,000 common stock, which has taken over the Pacific Coast Coal Mines, Limited.

DEBENTURES AWARDED

Fort William, Ont.—\$392,280.
Chester R. M., Sask.—\$5,000 5½ per cent. 20 years to Flood Land Company, Regina.
Meaford, Ont.—\$40,000 5 per cent. 20 instalments to Messrs. W. A. Mackenzie & Company, Toronto.
Niagara Falls, Ont.—\$25,684 5 per cent., 20 and 30 instalments, to Messrs. Wood, Gundy and Company, Toronto.

MONEY MARKETS

Toronto.—Call money on bonds, 6 per cent., and on stocks, 6 to 6½ per cent.

Time loans are quoted at 6 to 6½ per cent., and commercial discounts at 6 to 7 per cent.

London.—Bank of England rate is 5 per cent.; three months' discount rate is firmer at 4¼ to 4 13-16 per cent.

Bar silver in London, 29½d. per ounce; in New York, 63c. per ounce.

New York.—Time money in New York, 6 to 7 per cent. for 60 days, 6 to 6½ per cent. for 90 days, 6 per cent. for four months, and 5¾ per cent. for five months.

Commercial paper in New York is discounted at 6 per cent.

The Bank of Montreal at New York shipped \$1,000,000 in gold to Canada in two consignments of \$500,000 each this week.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of November 30th, 1911; November 21st, and November 28th, 1912, with percentage change:—

	Nov. 30, '11.	Nov. 21, '12.	Nov. 28, '12.	Ch'ge. %
Montreal . . .	\$41,811,654	\$59,362,145	\$51,121,071	+ 22.2
Toronto . . .	37,852,218	46,373,820	40,884,081	+ 8.0
Winnipeg . . .	34,769,787	46,652,937	42,096,170	+ 21.3
Vancouver . . .	12,059,164	14,264,689	14,022,672	+ 16.2
Ottawa . . .	4,162,680	4,057,846	3,692,016	— 11.2
Calgary . . .	5,062,544	6,203,067	5,594,050	+ 10.4
Quebec . . .	2,769,066	3,455,861	3,500,373	+ 26.4
Victoria . . .	2,465,261	4,266,835	3,808,576	+ 54.0
Hamilton . . .	2,656,382	3,972,708	3,595,383	+ 35.3
Halifax . . .	1,872,536	2,654,988	1,807,717	— 3.4
St. John . . .	1,525,306	2,018,689	1,973,315	+ 29.4
Edmonton . . .	3,023,638	5,625,635	4,931,910	+ 63.1
London . . .	1,555,231	1,849,540	1,581,649	+ 1.6
Regina . . .	2,093,082	3,421,750	2,997,832	+ 43.1
Brandon . . .	756,950	1,034,606	811,711	+ 7.1
Lethbridge . . .	603,531	938,035	708,547	+ 6.7
Saskatoon . . .	1,916,357	3,065,982	2,958,443	+ 54.3
Brantford . . .	536,120	725,499	656,754	+ 22.4
Moose Jaw . . .	1,726,977	1,786,483	1,799,531	+ 41.7
Fort William . . .	553,002	968,158	966,986	+ 74.6
Total . . .	\$159,831,486	\$212,609,429	\$189,508,787	+ 18.5

Calgary's street railway operations for the month of October shows a satisfactory balance of \$8,277. The figures show receipts of \$54,618 as against \$35,591 for last year. But to offset this the operating expenses have increased in an even greater proportion—\$35,396 against \$18,027. The item of power alone is responsible for a very large increase, as the bill for last year was \$5,638, while this year it has mounted to \$11,132. The percentage tabulation compiled by the superintendent shows that the revenue per car mile is decreasing, with a corresponding increase in operating expenses, the natural result is that the gross surplus per car mile has been reduced from 14 to 9 cents.

NEWS AND NOTES

The number of directors of the Dominion Bridge Company has been increased from eight to ten.

The Dominion Gresham Guarantee and Casualty Company has been registered in Saskatchewan.

The Quebec Bank has opened a branch at Medicine Hat, Alta., under the management of Mr. J. Inwood.

The number of directors of the Hamilton Stock Yards Company, Limited, has been decreased from seven to three.

The head office of the Cedar Rapids Manufacturing and Power Company has been changed from St. Joseph de Soulanges to Montreal.

A branch of the Canadian Bank of Commerce has been opened at Youngstown, Alta., under the temporary management of Mr. D. Thomson.

The Northern Pipe Line Company, Limited, has increased its capital stock from \$100,000 to \$300,000 by the issue of 2,000 shares of new stock of \$100.

The North Empire Fire Insurance Company will apply at the present session of parliament for authority to increase its capital stock from \$1,000,000 to \$2,000,000.

The New Zealand Minister of Customs announces that a tariff bill will be introduced at the next session of Parliament taxing foreign goods in favor of those of British origin.

The capital stock of the Western Canada Mortgage Company, Limited, has been increased from \$100,000, divided into 1,000 shares, to \$1,000,000, divided into 10,000 shares.

The capital stock of the London Concrete Machinery Company, Limited, has been increased from \$100,000 to \$1,000,000 by the issue of 9,000 shares of new stock of \$100 each.

The Metropolitan Mortgage and Trust Corporation will apply at the next session of parliament for a Dominion charter. Messrs. Leech, Leech and Sutton, Winnipeg, are solicitors for the applicants.

Application will be made to the next session of the Saskatchewan Legislature for an act to incorporate the British Western Trust Corporation. Messrs. Balfour, Martin, Casey, and Blair, Regina, are solicitors for the applicants.

Nova Scotia Life Underwriters recently received a visit from Mr. G. H. Allen, general manager of the Travellers' Insurance Company, of Canada, who delivered a practical and inspiring address on the subject of "Insurance Salesmanship."

The capital stock of the following Alberta companies has been increased:—Langdon Farm Company, Limited, from \$60,000 to \$250,000; Alberta Financial Brokers, Limited, from \$100,000 to \$2,000,000; the Western Cartage, Limited, from \$10,000 to \$100,000.

Application will be made to the next session of the Saskatchewan Legislature for an act to incorporate the Saskatoon Banking and Loan Company, with power to act as a trust, loan and private banking company. Messrs. Borland, McIntyre and Borland, Saskatoon, are solicitors for the applicants.

The Motor Union Insurance Company will apply for an Ontario charter, with power to carry on the business of vehicle and motor vehicle insurance. The company's capital stock is to be \$50,000, divided into 2,500 shares of \$100 each, and the head office will be in Toronto. The applicants are as follow:—Messrs. G. A. Kennedy, Milton, Ont.; and W. J. Lovering, lumberman; S. McNairn, grain merchant; W. R. Bird, broker; T. H. Wilson, barrister, all of Toronto.

Hull, Ont., waterworks system having been completed, Mayor Dupuis is going to make a strong effort to induce the fire insurance companies carrying risks in the city to reduce their rates. In addition to the waterworks system, the city has built two new fire stations, and as last year when application was made to the insurance companies to reduce their rates, they replied that this would be done when additional fire protection was provided, it is likely that the reduction will now be granted.

Victoria is a city of wonderful natural resources, strategically located and blest by nature with unsurpassed natural charms. Victoria has developed steadily and sanely to the point at which you see it to-day. And its present stage of development is only the beginning of its real future. reads the introduction to an excellent, artistic production issued by Messrs. Tracksell-Douglas and Company, estate and financial agents, in which is depicted by excellent illustrations and informative reading matter, Victoria's possibilities and probable development, and also opportunities existing for the investor.

MINERAL PRODUCTION DECLINED

Nearly All Metals, Except Pig Iron, Showed a Decreased Value—Increased Copper Output

Preliminary figures show that the mineral production of Canada for 1911 is valued at \$102,291,686, a decline of \$4,531,937, or 4 per cent., compared with the production of 1910. The sub-division of the mineral production in 1911 and in the preceding year by provinces was approximately as follows:—

	1911. Value.	1910. Value.
Nova Scotia	\$ 15,354,928	\$ 14,195,793
New Brunswick	611,597	581,942
Quebec	9,087,608	8,270,136
Ontario	42,672,904	43,538,078
Manitoba	1,684,677	1,500,359
Saskatchewan	618,379	498,122
Alberta	6,404,110	8,996,210
British Columbia	21,237,801	24,478,572
North-West Territories	4,619,592	4,767,474
Total for Dominion	\$102,291,686	\$106,823,623

How the Provinces Shared

The provinces showing an increased output for the year are: Nova Scotia, New Brunswick, Quebec, Manitoba and Saskatchewan; those showing a falling off being Ontario, Alberta and British Columbia.

In Nova Scotia the coal industry was particularly active, and to that and the clay and stone industries are the increases in the province to be chiefly ascribed. In Ontario the net result was a decrease of about \$1,000,000, being chiefly in copper, nickel and petroleum. On the other hand, there were substantial increases in nearly all of the other products in which a great variety is obtained in this province.

Small Production of Metals

Of the total production in 1911, a value of \$46,197,428, or 45 per cent. is credited to metals, and \$56,094,258 to non-metallic products. Practically all of the metals, with the exception of pig iron, show a falling off production in so far as value is concerned. In the case of copper, however, there was an increased output of the metal, although the average price per pound was slightly lower than in 1910. The increase in pig iron production was quite considerable although this is chiefly attributable to imported ore.

Among the non-metallic products, increases are shown in the production of arsenic, asbestos, feldspar, graphite, natural gas, pyrites, salt, and in nearly all of the structural materials, including cement, clay products, stone, lime, etc.

Important Metals and Minerals

The following table shows the production of the more important metals and minerals in comparison with that of the preceding year:—

	1911.	1910.
Copper, lbs.	55,848,665	55,692,369
Gold, ozs.		493,707
Pig iron, lbs.	917,535	800,797
Lead, lbs.	23,525,050	32,987,508
Nickel, lbs.	34,098,744	37,271,033
Silver, ozs.	32,740,748	32,860,264
Less pig iron credited to imported ores	875,349	695,891

The value of the minerals produced follow in comparison with the value in the preceding year:—

	1911.	1910.
Copper	\$ 6,911,831	\$ 7,094,094
Gold	9,762,006	10,205,835
Pig iron	12,306,860	11,245,622
Lead	818,672	1,216,249
Nickel	10,229,623	11,181,310
Silver	17,452,128	17,580,455
Other metal production	409,674	510,081
Total	\$57,890,884	\$59,033,646
Total	\$57,890,884	\$59,033,646
Less pig iron credited to imported ores	11,693,456	9,594,773
Total metallic	\$46,147,428	\$49,438,873

Non-Metallic Products

The production of non-metallic products in comparison with the previous year follows:—

	1911.	1910.
Asbestos and asbestic, tons	126,914	102,215
Coal, tons	11,291,553	12,909,152
Gypsum, tons	505,457	525,246

	1911.	1910.
Petrol, bbls.	291,092	315,895
Salt, tons	91,852	84,092
Cement, bbls.	5,635,950	4,753,975
Lime, bushels	7,227,310	5,848,146

* Gold in 1911 not given.

The value of the non-metallic produce in 1911 in comparison with 1910, follows:—

	1911.	1910.
Asbestos and asbestic	\$ 2,943,107	\$ 2,573,603
Coal	26,378,477	30,909,779
Gypsum	978,863	934,446
Natural gas	1,820,923	1,346,471
Petroleum	357,073	388,550
Salt	443,004	469,624
Cement	7,571,299	6,412,215
Clay products	8,317,709	7,629,956
Lime	1,493,119	1,137,079
Stone	3,680,371	3,650,019
Miscellaneous	2,110,313	1,993,008
Total non-metallic	\$56,094,258	\$57,384,750
Grand total	\$102,291,686	\$106,823,623

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Saskatchewan.

Milly, No. 926, \$2,000. J. A. Thomson, Milly.
Gladwin, No. 469, \$700. A. Stephens, Clinworth.
Badger, No. 913, \$1,000. R. A. Chapman, Plunkett.
Perigord, No. 850, \$1,500. G. Chartrand, Perigord.
Oak Knoll, No. 2703, \$1,500. S. W. Firth, Rocanville.
Two Tree Point, No. 631, \$1,800. T. Domaille, Dilke.
Mine Valley, No. 939, \$1,500. A. C. de Briant, Cloverley.
Springwater, No. 1073, \$2,000. W. F. Plumb, Springwater.

Alberta.

Jenson, No. 2666, \$800. E. A. Everson, Comrey.
Seattle, No. 2761, \$1,000. I. D. Bunney, Yeoford.
Newton, No. 2770, \$1,600. S. M. Newton, Langdon.
Parkland, No. 2672, \$1,500. E. Mayhew, Parkland.
Edon, No. 2335, \$3,500. W. D. Guthrie, Coronation.
Funnell, No. 2638, \$800. W. B. Smith, Stones Corners.
Young Maiden, No. 2559, \$1,500. U. A. Wiltse, Webber.
Durlingville, No. 2664, \$1,400. J. M. McLeod, Durlingville.

HARBOR IMPROVEMENTS AT NEW WESTMINSTER

(Special correspondence.)

New Westminster, B.C., November 25th.

New Westminster is seemingly entering the most active building period of its career. A statement which is creating great interest in New Westminster, Port Mann and every part of the Fraser River is that Messrs. Mackenzie and Mann have rejected the agreement between Vancouver and the Canadian Northern Railway.

It is stated that the clauses which Messrs. Mackenzie will not accept are those binding them to make Vancouver their home port, to enter the city by a tunnel and to purchase additional property in the city for their hotel site. If this report ultimately proves to be correct, it will only be in accordance with the steady conviction of a great many that the Canadian Northern Railway would never go to a vast expenditure to make Burrard Inlet their shipping point when they already owned a port capable of magnificent development at Port Mann.

New Westminster's harbor developments may also have had some influence on the Canadian Northern Railway's decision. These are taking concrete shape, and the expenditure of the \$500,000 worth of bonds that have been sold for this work will begin very shortly. Mr. Powell, the engineer in charge is calling for tenders for 3,000 linear feet of cedar pile quay wall and 1,000,000 yards of back filling with rock rivetted slope. This is for the widening of Front Street to 192 feet, and the construction of a straight municipal quay of over a mile in length.

At the same time the harbor commission bill has been drawn up and will be presented to parliament at the November session by Mr. J. D. Taylor, M.P. As the plans have been approved by practically every member of the cabinet every confidence is felt that the bill will pass.—K. Myers.

CROP RESULTS IN ONTARIO

Effect of Continued Rains Shown—Cereals Are Much Damaged—Some Root Crops Did Well

The following statement regarding crop conditions, based on the reports of 2,000 correspondents, sent in during the first week of November, has been issued by the Ontario Department of Agriculture:

Fall wheat has fallen off in average yield, and the grain is hardly up to its own standard of quality. The wet weather during harvest caused considerable sprouting in the stook, and a portion of the crop was also hauled in before being dry. Harvesting was relatively late, owing to the comparatively cool and wet weather then prevailing.

Spring wheat is not now largely raised in this province, but where grown the quality was relatively better than that of fall wheat.

A smaller area of wheat has been sown this fall, owing largely to the lateness of the harvest, and the difficulty of getting on low lands owing to the frequent rains. The Georgian Bay district is the only fall wheat section closely approaching its own normal acreage. Correspondents report a favorable seed bed, and most of the fields of new wheat look fairly promising, although there is a rather small top owing to late seeding and the comparatively cool fall weather. Sowing ranged from the last week of August until the first week of October, most of the crop having been put in between the 9th and 15th of September. Only scattering mention was made of the Hessian fly, in the counties of Elgin, Norfolk and Grey.

Hardly Reached Average Standard.

There has been a good yield of barley, but the quality of much of the crop is not up to the mark, considerable of the grain having been discolored by the almost continuous rains prevailing during harvest. Some of the barley also sprouted after having been cut. Owing to the rainy weather, harvesting was considerably delayed.

Like the other cereals, oats were much damaged both in grain and straw by the wet weather during the period of harvesting. In fact, much of the crop had to lie in the fields for weeks after being cut, which in some instances started fresh growth in the shocks, sprouting or grain, etc. While much of the oat crop may be classed as A1 in every respect, the general condition may be summed up as large in yield, but rather lighter in weight and poorer generally in quality.

There is not much rye grown for grain in Ontario. What was raised did well despite the drawback of the unusually rainy weather.

Peas and Buckwheat.

The wet season was very trying to peas, there being some sprouting of the grain and considerable injury to the straw. However, practically no mention was made of the weevil.

The buckwheat crop has come more into favor during the last two or three years, and considering the prolonged wet weather this season it has given good satisfaction so far as yield and quality of grain are concerned. Harvesting was unusually late, and as the land was very soft from frequent rains some of the crop had to be cut with the scythe. There were also some complaints of the grain shelling during the gathering.

But for the continued rains of the early fall beans would have done well. The wet weather, however, was hard upon the crop, many of the pods being imperfectly filled owing to uneven ripening, and the beans in some cases were discolored and rather soft. Harvesting was very late on account of the almost steady rains; in fact, some beans were yet unpulled at the end of October.

Corn and Mixed Grains.

While some correspondents report favorably regarding corn, the general opinion is that the crop is not up to the average in either yield or quality. There was too much rain and not enough warm weather for the best results. As a rule there is much soft, immature corn both for husking and the silo. Some of the crop was caught by frost, but not to a serious extent.

There appears to be a lessening of enthusiasm over the growing of mixed grains. Oats and barley are by far the most popular mixture, as these grains can be selected to ripen closely together, and they make good chop for all kinds of live stock. Some growers prefer to add a little peas. Wheat, barley and oats, and oats and peas, are also said to give satisfaction as grain mixtures.

The growing season was too wet and cold for best results with tobacco, and some of the plants got a touch of frost. The yield and quality vary greatly, some describing

the leaf as very poor, while others classify it as being fair to good.

Potatoes Suffer from Rot.

Potatoes have been the disappointment of the season. The fields promised most liberal at the time of digging, and the appearance of the tubers was first-class. Since being taken up, however, considerable of the crop has rotted in the cellars and pits; and while some correspondents report no injury from this cause, the bulk of the returns place the losses from rot at from 5 to 60 per cent. The rot has been the worst on low-lying fields and heavy soils. Correspondents found it difficult to estimate the yield of sound potatoes. Their remarks show that a record crop would have been reported but for the unusual severity of the rot. The white grub also did injury to the growing potatoes.

Turnips were not very promising in the early part of the season, but the frequent rains later on helped growth wonderfully, and a good general yield has resulted. Some remained to be pulled when correspondents wrote in the first week of November. Mangels also did well, a good yield being reported in nearly every locality. Most of these roots were under cover by the end of October. Field carrots are now but little grown, but where raised they did fairly well. Although not so generally grown as turnips and mangels, sugar beets also made an excellent showing, nearly every report received being favorable.

RETIREMENT OF MR. HANNAH

Monetary Times Office,

Montreal, November 28th.

An event has just taken place in connection with the Allan Line Steamship Company, which is not without significance. This event is the retirement of Mr. George W. Hannah, the company's chief passenger agent. Mr. Hannah has just announced his intention of retiring from the position which he has held for so long a time.

Mr. Hannah is perhaps the best known steamship official in the Dominion of Canada from the passenger end of the business. For twenty years he has been at the head of the passenger department of the Allan Line, and during that time has given his personal attention to the equipment of the ships and to the comfort of passengers generally.

Although Mr. Hannah has only been intimately connected with the Canadian steamship business during the past twenty years or so, his experience extends over forty-five years. The first twenty-five years of this period he spent in the service of the Inman Line of steamships of New York City. He was born in Glasgow and received his early education there, and later went to school in Brooklyn, N.Y. After spending twenty-five years in the service of the Inman Line, he came to Canada to assume duties in connection with passenger department of the Allan Company, becoming general passenger manager. He has made a study of the history of the North Atlantic trade, more especially as concerns lines running between Montreal and Great Britain, and has naturally paid more particular attention to the part which the Allan Line played in this business. It seems as if some considerable changes are taking place in connection with the ownership of the company. Mr. Hugh A. Allan, formerly manager here, is now located permanently on the other side of the Atlantic, in connection with the business of the company there. Sir Montagu Allan, it was recently announced, had retired from the line. Though Sir Montagu never was what might be called actively interested in the line, he has always been a large shareholder. Other changes also have taken place, in which the Allan interests on this side of the Atlantic would seem to have diminished considerably. So far as is known, the only member of the Allan family remaining in position of management in connection with the company, here is Mr. Andrew A. Allan, and Mr. Hannah's retirement severs one of the few remaining personal knots which bind the company with its past.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, for the week ended November 22nd:—Cobalt Lake, 66,000; Trethewey, 60,400; Cobalt Townsite, 50,300; Penn, Canadian, 68,918; Crown Reserve, 39,220; Peterson Lake, 228,263; La Rose, 172,801; Temiskaming, 60,517; total, 746,509 pounds, or 373 tons. The total shipments since January 1st are now 38,300,711 pounds or 19,100 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Hedley, B.C.—November 21.—New Zealand Hotel. Loss and cause unknown.

Russell, Man.—November 15.—Central Hotel barn. Loss and cause unknown.

Horand, Man.—November 15.—Mr. W. R. Ross' store. Loss and cause unknown.

Edmonton, Alta.—November 27.—Elevator at Bremmer. Loss and cause unknown.

Royal, Ont.—November 24.—Conflagration. Loss \$30,000. Cause unknown.

Essex, Ont.—November 19.—Mr. W. Lee's barns, etc. Loss and cause unknown.

Hazleton, B.C.—November 21.—Mr. C. McKinnon's shack. Loss and cause unknown.

Renfrew, Ont.—November 19.—Textile factory. Loss slight. Cause, tar on roof.

Guelph, Ont.—November 22.—Mr. Hugh Guthrie's barn. Loss \$200. Cause unknown.

Sydney, N.S.—November 22.—Brooklands Hospital. Loss, \$1,000. Cause unknown.

Sarnia, Ont.—November 26.—Hub and spoke factory. Loss \$100,000. Cause unknown.

Fredericton, N.B.—November 21.—Mr. H. Buckley's store. Loss and cause unknown.

Riverdale, Ont.—November 16.—Mr. R. Gibson's residence. Loss and cause unknown.

Kelowna, B.C.—November 16.—Mr. W. Bowser's residence. Loss and cause unknown.

Parry Sound, Ont.—November 27.—Mr. J. Tack's residence. Loss and cause unknown.

Carleton Place, Ont.—November 22.—Mr. J. Evoy's residence. Loss \$100. Cause unknown.

Hepworth, Ont.—November 21.—Mr. E. M. Coleman's grist mill. Loss and cause unknown.

York Mills, Ont.—November 21.—York Springs factory. Loss, \$20. Cause, defective chimney.

Pinewood, Ont.—November 15.—Mr. F. Beeman's blacksmith shop. Loss and cause unknown.

Blyth, Ont.—November 25.—Mr. T. R. Forsythe's woolen mill. Loss and cause unknown.

Simcoe, Ont.—November 21.—Mr. W. Barlow's slaughter-house. Loss, \$100. Cause, gas stove.

Wallaceburg, Ont.—November 15.—Mr. W. Piggott's grocery store. Loss slight. Cause unknown.

Sandwich, Ont.—November 21.—Mr. F. Stewart's residence. Loss slight. Cause, lighted cigar end.

Lethbridge, Alta.—November 15.—Crown Cleaning premises. Loss \$50. Cause, overheated stove.

St. Catharines, Ont.—November 22.—The "Standard" newspaper office. Loss unknown. Cause, oil ignited.

Unity, Sask.—November 24.—Crawford Block. Loss and cause unknown; only small insurance was carried.

Udora, Ont.—November 20.—Mr. J. Wills' residence. Loss unknown. No insurance. Cause, defective chimney.

Windsor, Ont.—Mr. W. Drulard's residence, 45 Goyeau Street. Loss slight. Cause, children playing with matches.

North Bay, Ont.—November 17.—Mr. F. Demarco's residence. Loss \$3,000. Insurance \$1,700. Cause, stove fire.

North Vancouver, B.C.—November 21.—Mr. M. Johnson's residence, Lynn Valley. Loss \$1,200. Cause unknown.

Petrolia, Ont.—November 16.—Messrs. R. T. and C. P. Polley's building on Main Street. Loss and cause unknown.

Stratford, Ont.—November 20.—Mr. W. Dally's residence. Loss, contents, \$500; building, \$300. Cause, upset lamp.

Brockville, Ont.—November 22.—Mr. J. Burn's barns, etc. Addison-Greenbush Road. Loss unknown. Cause, sparks.

Victoria Harbor, Ont.—November 18.—Mr. J. Stewart's barn. Loss unknown; no insurance. Cause, supposed incendiary.

Goderich, Ont.—November 21.—Messrs. Brown and Patherick's store. Loss unknown. Insurance \$2,000. Cause unknown.

Starbuck, Man.—November 24.—Mr. A. Lacroix's blacksmith shop. Loss, \$2,000. Insurance, \$700. Cause unknown.

St. Flavien de Lotbiniere, Que.—November 20.—Mr. J. G. Roy's residence. Loss, \$25,000. Cause, child playing with matches.

Owen Sound, Ont.—November 19.—Mr. D. McMillan's residence, Fourth Avenue West. Loss unknown. Cause, lamp exploded.

Namur, Que.—November 18.—Dr. L. E. Coulombe's residence. Loss and cause unknown. Dr. Coulombe's life was lost in this fire.

Rodd and Company, dwelling and store. Loss, stock \$266. Insurance \$2,250. Sackville Hay and Feed Company: Loss, stock \$77. Insurance \$800. Mr. J. W. Colwell: Loss, dry goods, \$6,915. Insurance \$3,000. Cause of conflagration, said to be bursting of stove.

DOMINION TRUST COMPANY'S NEW HOME

The accompanying cut represents the new premises which will in future be the home of the Dominion Trust Company, Limited, at Vancouver, B.C. The rapidly increasing business of the company necessitated its securing larger quarters, and for this reason a building was constructed at the corner of Homer and Pender Streets, which is an eight-story building and basement.

The basement is occupied by the safe deposit and storage vaults, which are in every way thoroughly up-to-date. The safe deposit vault is built of 22 inches of concrete in which is embedded 5-inch I-beams interlocking. The steel interior vault is of 1-inch of open hearth steel, screwed to which is an

Home of the Dominion Trust Company, Vancouver.

inch layer of five ply chrome steel, securely fastened to which is an inch layer of Bessemer steel, thus completing what is one of the finest vaults on the Pacific Coast.

The main floor, or Trust Chamber, will be occupied by the Vancouver branch of the company, and is 50 feet by 120 feet. The ceiling is 30 feet from the floor, and no supporting pillars of any kind are used in the interior of the office. The document vault of the company is situated on this floor, and consists of 18 inches of reinforced concrete, as well as one and one-half inches of steel, made up of three layers of one-half inch each of the same qualities as the safe deposit vault. The counters are of Belgian marble, the floors of Italian marble, while the tellers' cages are of solid bronze.

A mezzanine floor over the entrance will be used as the board room, and will have marble floors and solid mahogany panelling about 12 feet high.

The third floor will be occupied as the head office of the Dominion Trust Company, and will contain, besides a main office, private offices for the officers, and five private offices for the members of the advisory committee of the company. This floor will be furnished entirely in mahogany. A private elevator for the exclusive use of the employees of the company will run from the head office to the basement.

The floors above will be rented, and already nearly the entire space is under lease. The building is modern in every respect.

SERIOUSNESS OF FINANCIAL FRAUDS

Financial frauds are very serious because they affect the savings of the people. When a promotion stock is advertised as a safe investment—no matter how meritorious the enterprise—misrepresentation is present, remarked Mr. Harry D. Robbins, publicity manager of Messrs. N. W. Halsey and Company, New York, in an address before the first annual convention of the National Federation of Retail Merchants at St. Louis, Mo. It is not safe, but a business venture with plenty of risk attached to it. Safety permits of no doubt. Until an enterprise has a successful record back of it there must be doubt.

If an enterprise is not meritorious, if, in fact, it is simply a plausible stock jobbing scheme, as is often the case, then it is a situation involving fraud.

I am not here to discuss the relative merits of investments but to discuss dishonest advertising. I will say this, however, before leaving the subject; never deal with any seller of securities until you have looked him up and he checks up correct in every particular. Fortunately there are plenty of reputable houses in the business. If the public would follow this advice it would save many millions of dollars annually.

As business men, you may not appreciate to what extent advertising influences people to stake all their savings on empty guarantees, without first investigating the character of the advertiser.

Financial advertising frauds include the swamps advertised as good land, alleged gold, silver and copper mines, co-operative orchard schemes, stock jobbing of patents, and the like.

WARNING AGAINST CHRISTMAS FIRES

The Fire Underwriters' Association has issued the following circular:—

"Following the usual custom at this season of the year, your attention is called to the dangers to life and property from Christmas decorations, displays, etc., which are frequently made at this time of the year. The use of Christmas greens, harvest specimens and other inflammable materials such as draperies, scenery, cotton to represent snow, and the like (especially in connection with electric and other lighting systems) is decidedly an increase of hazard, it being impossible to make displays of that nature perfectly safe.

"The statutory conditions of the insurance policy read in part as follows: 'Any change material to the risk, but within the control or knowledge of the assured, shall void the policy as to the part affected thereby, unless the change is promptly notified in writing to the company or its local agent.'

"In addition to the danger to property from the displays referred to, the danger to life in crowded stores, or places of meeting, by reason of a panic occasioned by fire, even though it be small and easily controlled, is so great that the underwriters, who have made a study of such hazards, would fail in their duty should they not give this warning."

A proposed amendment to the fire limits by-law at Nanaimo, B.C., reads thus: "The outside walls of all buildings hereafter erected within the fire limits shall be constructed of brick, stone, concrete or other substantial or incombustible material."

LEGAL NOTICE

SOUTHERN ONTARIO LAND COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 30th day of September, 1912, incorporating James Steller Lovell, accountant, Robert Gowans, Joseph Ellis, John Joseph Dashwood, William George Flood and William Bain, solicitors' clerks; Ewen James MacEwen, student-at-law; and Samuel Goodman Crowell, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease, take in exchange or otherwise acquire improved or unimproved lands, or any interest therein, of any kind whatsoever (including agreement for sale or options), together with any buildings or structures that may be on said lands or any of them and to sell, lease, exchange or otherwise dispose of the whole or any portion of the said land and all or any of the buildings or structures that are now or may hereafter be erected thereon and to take such security therefor in payment or part payment for the same as may be deemed advisable; (b) To improve, work, manage and turn to account the said lands, buildings and structures and to develop, cultivate and farm the said lands and to sell and dispose of the produce therefrom and to survey the said lands and to lay the same out into lots and to advertise the sale of the said lands and lots; (c) To erect buildings and deal in building material; (d) To take and hold mortgages for any unpaid balance of the purchase money for any of the lands, buildings or structures so sold, and to sell or otherwise dispose of the said mortgages or any agreements for the sale of the said lands, buildings or structures; (e) To purchase, take on lease or in exchange, hire or otherwise acquire and undertake the whole or any part of the business assets, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or of any person or company owning or possessing property suitable for the purposes of the company and to pay therefor with cash, shares in the capital stock of the company or bonds or debentures of the company or part in cash and part in the said shares or bonds or with such other consideration as the company may deem fit; (f) To acquire by purchase, lease, grant or otherwise whatsoever options, water rights, concessions or rights for the construction of and to work, manage and construct roads, leats, canals, wharves, tunnels, dams, reservoirs and tramways or railway sidings on lands owned or controlled by the company, or works of any kind, and to make, build, purchase or hire engines, rolling stock, wagons, ships, barges and other plant and machinery of every description in connection with or for the use of or convenience of the company's property or the transit of produce, ores, minerals and other things, or the supply of materials and other things required by the company; (g) To take, acquire by purchase, lease, grant, license or exchange any buildings, easements, machinery, plant, stock-in-trade, patents or other rights or privileges and generally any property whatsoever of any kind, whether real or personal, or any estate or interest therein which the board may consider desirable in the interests of the company; (h) To improve, manage, work, develop and turn to account any property, real or personal, acquired by the company or in which the company is interested, and to sell, lease, convert into money, barter or otherwise dispose of the undertaking, property, assets and effects of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, stocks or securities of any other company either fully or partly paid up, and to accept payment for any property so sold by instalments and to distribute any such consideration from time to time amongst the members of the company; (i) To purchase or otherwise acquire shares or stock, bonds, debentures or other securities in any other corporation (notwithstanding the provisions of section 44 of the said Act), and to hold, sell or otherwise dispose of the same; (j) To act as brokers and agents in connection with the effecting of insurance, the selling, purchasing, leasing, valuing and managing of real estate and for the investment and collection of money and in general the management of estates and acting as financial agents or otherwise; (k) To aid and assist by way of bonuses, cash advances or otherwise, with or without security, settlers and intending settlers upon any lands belonging to or sold by the company and generally to

promote the settlement of any lands that may be at any time owned by the company, and to establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company or in the neighborhood of such lands; (l) To enter into any arrangement for sharing of profits, union of interest or co-operation with any other person or company carrying on or about to carry on any business or transaction which may be of benefit to the company; (m) To take, acquire and hold as a consideration for the sale or other disposal of any of the assets or properties of the company or for work done by the company by contract or otherwise, shares, debentures, bonds or other securities of or in any other company; (n) To distribute among the members in specie any property of the company whether by way of dividend or bonus; (o) To invest and deal with any reserve funds of the company and any moneys of the company not for the time being required for the general purposes of the company upon such investment (not being shares of the company) and in such manner as may seem expedient; (p) To pay all expenses of and in connection with the incorporation or in or about the promotion of the company and the obtaining of subscription of the share and debenture capital thereof and all commissions and other remunerations to brokers or others for procuring or guaranteeing subscriptions or for underwriting, placing, selling or otherwise disposing of any of the shares, mortgage debentures, debentures, debenture stock or other securities or property of the company, or of any other company, or assisting so to do or for procuring or obtaining settlement and quotation upon London or foreign colonial or provincial stock exchanges of any of such share capital or securities; (q) To guarantee the payment of the principal of or the dividends or interest on any stock, shares, debentures, securities, loans or undertakings in any case in which the board consider it expedient; (r) To amalgamate the business with that of any other company whether by sale or purchase of the undertaking, subject to the liability of this or any such other company, firm or person, with or without winding up or by sale or purchase of all the shares, stock, debentures or other securities or assets of this or any such other company, firm or person as aforesaid, or by partnership or by an arrangement of the nature of partnership or in any other manner; (s) To be interested in or promote and undertake the formation and establishment of companies of any kind whatsoever and to subscribe for or guarantee the subscription of or to buy, sell, hold and deal in and with shares, stocks, bonds, debentures, securities or obligations issued or guaranteed by any government, sovereign, ruler, commissioners, public body or authority, supreme, municipal, local or otherwise, or by any company or association of persons; (t) To do all or any of the matters aforesaid either as principals or agents or trustees for others and either in the name of the company or of any person or persons, firm or company as trustee or agent for the company and either alone or in concurrence with any person or persons, firm, company, government, body or authority; (u) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments and to give guarantees or undertakings of any kind; (v) To do all such acts, matters and things as are incidental or necessary to the due attainment of the above objects or any of them; (w) To sell any property of the company, whether real or personal, for such consideration as the company may deem fit, including shares, debentures or securities of any corporation; (x) To raise and assist in raising money for and to aid by way of bonus, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Southern Ontario Land Company, Limited," with a capital stock of two hundred and fifty thousand pounds, divided into 250,000 shares of one pound each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 1st day of October, 1912.

THOMAS MULVEY,

Under-Secretary of State.

BLAKE, LASH, ANGLIN & CASSELS,

Solicitors for the Company.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

Notice is hereby given that a quarterly dividend of $1\frac{3}{4}$ per cent. for the three months ending the 31st day of December, 1912, being at the rate of 7 per cent. per annum, has been declared on the Common Stock of the Company.

Notice is also given that a bonus amounting to 1 per cent. of the par value of the Common Stock of the Company has been declared for the year ending the 31st day of December, 1912.

The above dividend and bonus are payable on the 2nd day of January, 1913. The Transfer Books will be closed from the 16th to the 31st December, 1912, both days inclusive.

By order of the Board,

J. J. ASHWORTH,
Secretary.

Toronto, November 21st, 1912.

UNION BANK OF CANADA

Dividend No. 103

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, and that the same will be payable at its Banking House in this City, and also at its branches, on and after Monday, the second day of December next.

The Transfer books will be closed from the 16th to the 30th of November, both days inclusive.

The Annual General Meeting for the election of Directors and other general business will be held at the Banking House in the city of Winnipeg, on Tuesday, the 17th December, 1912. The Chair will be taken at 12 o'clock noon.

By order of the Board.

G. H. BALFOUR,
General Manager.

Winnipeg, October 22nd, 1912.

THE CANADIAN BANK OF COMMERCE

Dividend No. 103

Notice is hereby given that a quarterly dividend of $2\frac{1}{2}$ per cent. upon the capital stock of this institution has been declared for the three months ending the 30th November, 1912, together with a bonus of one per cent., and that the same will be payable at the bank and its branches on and after Monday, 2nd December, 1912. The transfer books will be closed from the 16th to the 30th November, both days inclusive.

By order of the Board,

ALEXANDER LAIRD,
General Manager.

Toronto, 30th October, 1912.

CANADIAN CREDIT MEN

After the monthly dinner of the Winnipeg branch of the Canadian Credit Men's Association, Rev. Dr. G. B. Wilson delivered an able address on Canadian citizenship to a large and appreciative audience.

President W. S. Fallis, who was in the chair, was supported by Henry Detchon, secretary-treasurer, and Mr. Rowley.

At Toronto, in pursuance of an active campaign for members, Mr. L. G. Ball, secretary-treasurer of the Ontario Division, gave an illustrated address on the practical work of the Canadian Credit Men's Association, and cited instances in which merchants in Toronto and other cities had been protected, and the loss of thousands of dollars prevented. Several well-known members added their varied experiences to the examples which Mr. Ball quoted, and eulogized the work of the association.

It would seem that as a result of this endeavor, this branch will commence the new year with a membership of two hundred.

THE ROYAL BANK OF CANADA

Dividend No. 101.

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of December next, to shareholders of record of 15th November.

By order of the Board.

E. L. PEASE,
General Manager.

Montreal, P.Q., October 11th, 1912.

THE ROYAL BANK OF CANADA

ANNUAL MEETING

The Annual General Meeting of the Shareholders of the Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the Bank, in Montreal, on Thursday, the 9th day of January next. The chair will be taken at 11 o'clock a.m.

E. L. PEASE,
General Manager.

Montreal, November 30th, 1912.

THE BANK OF NEW BRUNSWICK

Special Meeting of the Shareholders.

NOTICE is hereby given that a special general meeting of the shareholders of The Bank of New Brunswick will be held at the office of the said Bank in the City of Saint John, New Brunswick, on Monday, the 9th day of December, 1912, at the hour of eleven o'clock in the forenoon, for the purpose of considering an agreement for the sale by the said The Bank of New Brunswick of the whole of its assets to the Bank of Nova Scotia upon the terms set out in such agreement, a copy of which is mailed to each shareholder with this notice, and, if deemed advisable, of passing a resolution or resolutions approving the said agreement and authorizing the President and General Manager of The Bank of New Brunswick to affix thereto the corporate seal of the Bank and to sign and execute the same for and in the name of and on behalf of the Bank; and also for the purpose of considering and, if deemed advisable, of passing all such other and further resolutions for fully carrying out the said agreement and the terms thereof, as the shareholders shall consider expedient or advisable, and for the purpose of authorizing the Board of Directors to give all such notices and make all such applications and to pass and execute all such other acts, resolutions, deeds, instruments, matters and things as may be deemed necessary for procuring the approval of the Governor-in-Council to the said agreement and for carrying out the same and for winding up the affairs of the Bank and distributing the proceeds of the said sale.

By order of the Board,

C. H. EASSON,
General Manager.

St. John, N.B., October, 19th, 1912.

FACTORY FIRE PRECAUTIONS

The Committee on Safety of the City of New York has issued a leaflet containing the following safety code for factories and workrooms:

- (1) Forbid smoking in the workrooms.
- (2) Blow out matches before throwing them away.
- (3) Clear out rubbish and clippings every day from workrooms, hallways, and basements. Metal cans or metal-lined boxes are required by law to hold such rubbish during working hours.
- (4) Do not keep benzine, naphtha, gasoline, alcohol, turpentine, paint or varnish, except in safety cans, as required by law.
- (5) Get a license from the fire department before storing these inflammable fluids on your premises.
- (6) Keep gas jets guarded by wire cage, so that materials may not touch the flame.
- (7) Keep motors and gas engines boxed and enclosed in fireproof partitions.

SIR EDWARD CLOUSTON DEAD

Sir Edward Clouston, Bart., the famous Canadian banker and financier, well known in many countries, died last week. He was sixty-three years of age. He was the son of Mr. S. J. Stewart Clouston, chief factor of the Hudson's Bay Company, and was born at Moose Factory, Hudson's Bay. After spending a year in the service of his father's company, he joined the staff of the Bank of Montreal in 1865 as a junior clerk. He became general manager of the bank in 1890. He was elected first vice-president in 1906, and resigned from the position of general manager last year.

In retiring from the general managership of the Bank of Montreal, Sir Edward Clouston retained the vice-presidency which he had held since Sir George Drummond became president, the latter succeeding Lord Strathcona as head of the executive of the bank. As vice-president, Sir Edward was also a regular attendant at the board meetings, never once ceasing to be in touch with the affairs of the bank. He also had an office in the Transportation Building adjoining the Royal Trust offices, as he was vice-president of that important adjunct of the Bank of Montreal. He was chairman of the Liverpool and London and Globe Insurance Company, director of the Canada Sugar Refining Company, the Guarantee Company of North America, vice-president of the Canada Cottons Company, Limited, a director of the Ogilvie Flour Mills Company, Limited.

Mr. H. V. Meredith who was associated with Sir Edward Clouston for many years, spoke of the death of the late financier as a personal loss. "Having been associated with Sir Edward in business for over thirty-five years," said Mr. Meredith, "and being a close personal friend of his during that long period, his sudden and unexpected death has shocked and grieved me beyond expression. His brilliant career is well known to, and appreciated by, the public generally and will long be remembered. I have never known him to bear ill-will, and his infinite tact, his charm of manner, and loyalty to his friends will not soon be forgotten by those who had the privilege of knowing him intimately."

BANK ACT AMENDMENTS

A bill was introduced in the Dominion House this week by Mr. J. A. M. Aikins, being an amendment to the Bank Act, empowering the banks to make loans to farmers upon agricultural products and unthreshed grain.

"What about live stock?" asked Mr. W. F. Maclean.

"That is not so urgent, but I think that, too, should be good security," replied the member for Brandon.

Hon. W. T. White informed the House that the bill foreshadowed amendments which he himself proposed offering when the Bank Act comes up for revision. The bill was read a first time.

CANADA LIFE'S NEW MONTREAL MANAGER

Lieutenant-Colonel E. W. Wilson has resigned from the managership of the Manufacturers' Life Insurance Company after serving in that capacity for the past seventeen years, and has already entered upon his duties as manager of the Montreal branch of the Canada Life Assurance Company, to which position he was appointed at a meeting of the board of directors of that body held in Toronto last week.

Lieutenant-Colonel Wilson is well known throughout Canada, having been commanding officer of the Victoria Rifles and latterly commander of the 12th Infantry Brigade. He has also been connected with a number of financial institutions.

Lieutenant-Colonel Wilson in his new position succeeds Mr. J. A. Bucknell, formerly manager of the Canada Life Assurance Company for western Quebec, who has been removed to Detroit in a similar capacity.

The following agents have associated themselves with Lieutenant-Colonel Wilson in his new undertaking:—Messrs. E. Herbert Brown, A. B. Haycock, W. O. H. Percy, J. D. Sutherland and A. G. Racey.

MUNICIPAL BONDS

Toronto Has Three Millions to Sell—Victoria May Raise Interest Rate

City Treasurer Coady assured the Toronto board of Control and the treasury board last week that no bona fide offer had been made to him by any banker or financial agent this year for the purchase of the \$6,000,000 of debentures which he and ex-Mayor Geary unsuccessfully endeavored to sell in England last summer. Mr. Coady explained the transaction with Lloyd's Bank, London, by which the city obtained a loan of £1,200,000 sterling on treasury bills at 4½ per cent., the debentures being used as collateral security. This course was the only possible one open at the time owing to the condition of the London money market. He also stated that the city's finances were in excellent condition, that over \$500,000 worth of bonds had been sold within the past month to small buyers; that there were about \$3,000,000 of debentures on hand, which it was expected would be sold before the end of the year, probably in New York.

Victoria's Treasury Notes.

It is not unlikely that the Victoria city council will be advised to follow the example of other municipalities who are large borrowers of money in the British market, and advance the rate of interest to four and a half per cent. for local improvement issues. The interest offered in the past has been four per cent. on ten-year bonds, but with the competition from other borrowers it is not improbable that the city's fiscal agents, the Dominion Securities Corporation, will recommend a change being made at an early date.

A block of \$450,000 debentures of the city of Victoria is likely to be sold to the Dominion Securities Corporation at 92 net to the city. This will be the first sale of its debentures since last spring. The bonds are those issued under the authority of the school loan by-laws passed early in the year. According to a recent return made by City Comptroller Raymur the amount of debentures awaiting sale was over \$1,500,000 and while the city has been making temporary loans by floating treasury stock at a high rate of interest, every effort was being made to dispose of the debentures from the proceeds of which the short term loans made by the issue of treasury stock would be redeemed.

In addition to the school debentures, the city will probably be able to dispose of local improvement bonds to an amount of \$285,000. The debentures have been sent to the fiscal agents who have informed the city that they have very reason to believe the sale can be effected at the same figure, and probably higher, as that secured for the school bonds. Besides the debenture sales, negotiations have been completed for the issue of £65,000 worth of treasury notes under

the Sook Lake loan by-law. The interest paid on this issue is not made public, but the rate on the preceding issue made some time ago, was five and one-eighth per cent.

Ontario Government and Municipal Bonds.

That difficulties are in the way of the Ontario Government taking over municipal debentures was made evident by Hon. A. J. Matheson to the deputation representing Ontario municipalities that called upon the government. The deputation urged the government to consider the matter emphasized the expense and discouragement municipalities experience in endeavoring to float their debentures independently. The Provincial Treasurer suggested that the municipalities take more advantage of the legislation permitting them to deposit their sinking funds with the Provincial Treasury at four per cent. interest. He criticized the practice of municipalities in vesting sinking funds in their own shorter-term debentures, and warned his auditors that in so doing they were damaging their credit.

Municipal Bond Bidding.

Five bids were made for the \$5,000 5½ per cent. 20-year road debentures of Chester Rural Municipality, Sask. The offer of the Flood Land Company, Regina, was accepted.

For the Mount Forest, Ont., \$14,000 5 per cent. 11-year debentures for aid to carriage factory, three offers were received from Toronto bond houses. As previously noted, the award was made to Messrs. Wood, Gundy and Company, Toronto.

According to a financial statement prepared recently by city comptroller Raymur the estimated shortage in the amount required this year by Victoria, B.C., to conduct civic business out of general revenue will be in the neighborhood of \$30,000. The estimated expenditure for the year at the time the annual estimates by-law was passed was \$1,728,691 and since then new votes have been authorized to an aggregate amount of \$257,750, making a total expenditure (estimated of \$1,986,441).

Prince Rupert and Edmonton.

Prince Rupert's city treasurer reported that the city has \$157,437 on hand and advised that the note held by the Bank of Montreal, amounting to some \$83,000, be taken up, as the interest amounted to \$13.77 per day. After everything was paid a balance of \$32,319 would remain.

Edmonton city council authorized the borrowing of another \$238,000 from the bank, as a temporary loan, as the commissioners reported the necessity for borrowing from the bank this sum to cover various expenditures at present incurred and likely to ensue between now and the thirty-first day of December, 1912. We deem it expedient that this sum be provided for by way of a special charge upon the debentures authorized under various by-laws amounting to the sum of \$1,238,170.37, which by-laws have already been ratified by the burgesses and upon which authority has been granted under by-law No. 439, to borrow the sum of \$1,000,000.

ALMOST UNBROKEN PROSPERITY

Being the first review of the year, the address of Mr. R. B. Angus, president of the Bank of Montreal, at its annual meeting, is awaited almost with impatience by the many who follow month by month the fluctuations of the business and financial barometers. Once again Mr. Angus, whose analysis of conditions is printed in detail on other pages, has been able to report "a year of universal and almost unbroken prosperity throughout the length and breadth of the land." He cites numerous substantial reasons for the continuance of such a happy condition. Dealing with the Western crop, he gives the following estimated yield:—

	1912.	1911.
Wheat	188,000,000	177,000,000
Oats	220,000,000	190,000,000
Barley	31,000,000	33,000,000
Flax	13,000,000	8,000,000

A conservative estimate of the value of the crop of the three provinces is given at \$207,000,000 for the grain alone.

While the prices of wheat are much lower this year, Mr. Angus recalled the fact that the proportion of the contract grades in the prairie provinces is much larger. The better condition of the grain renders it easier to handle and to market, and the returns to the producer are quicker and safer.

Partly owing to the good condition of the grain, but chiefly because of the excellent arrangements of the railways, the crop has been moved with unparalleled celerity; there has been no car famine and little talk of congestion, although there has been more grain handled. At the close of this season's navigation, there appears to have been a serious blockade of grain on its way to market, caused by insufficient facilities for taking delivery from the railway cars, and it may be that a greater number of vessels for grain carrying across the lakes and larger elevator capacity for temporary storage must be provided or future wants. Storage for grain has been much neglected in the prairie provinces; it would be advisable that granaries of moderate capacity to store at least a portion of the crop should be a feature on every well-equipped farming establishment, so that there would be no occasion to rush produce to a market at inconvenient seasons.

Mr. Angus urged the farmer, as so many have done previously, to give more attention to mixed farming instead of relying upon importation of vegetables, meat and butter, etc., from Eastern Canada or from the older settlements in the United States. Ontario is a good example of the way in which diversified agriculture counteracts poor grain crops and other unfavorable conditions when they arise. In that province, the harvest of wheat and corn has not been bountiful, but rather under the average, in consequence of the wet and cold season, and yet we are assured that the farmers have done well, as few depend solely on the raising of grain

for a livelihood, their resource being scientific and mixed farming, while dairying, produce and fruit have been more remunerative. As an indication of the diversity of farming in that province, Ontario is said to own 6,000,000 head of live stock, horses, cattle, sheep and pigs. The raising of live stock, which has declined of recent years, will receive an impetus from the high prices obtainable for cattle and by the greatest safety which which the business is conducted.

None the less interesting was the address of the general manager of the bank, Mr. H. V. Meredith. Dealing with the adverse balance of trade, he pointed out that in the fiscal year ending March 31st, 1912, the imports for consumption in Canada were of the value of \$521,000,000, and the exports of domestic products were \$290,000,000, showing a balance against the country of \$231,000,000, undoubtedly a very large sum. In the five months ending August 31st last the excess of imports over domestic exports was \$130,700,000, showing an even greater ratio than in the preceding year. The gap between imports and exports is not likely to be soon closed; not, indeed, until our manufacturing industries have expanded to a point when the home market can be supplied fairly well within the country, nor until the large demand for foreign goods, arising out of the construction of permanent works, railways, etc., is satisfied from domestic mills. Meanwhile the gap is bridged by foreign loans, by investments of capital in Canada from Great Britain and by money brought in by immigrants. It is, therefore, all the more important to guard against unpropitious circumstances tending to lessen the confidence of British and foreign lenders in Canadian securities.

LA BANQUE INTERNATIONALE

Certain serious charges are said to have been made against an official or officials of La Banque Internationale.

Those charges are said to have been heard in private by Judge Leet.

On November 19th, Judge Leet had the matter under advisement, and "at the moment" could not "say how soon judgment will be rendered."

The Minister of Finance has no authentic information as to the matter.

An inquiry regarding the subject addressed by *The Monetary Times* to the Minister of Justice remains unanswered.

The Monetary Times contends that guesses as to what occurred at the bank should be supplanted by an early, official announcement as to what really did happen at the bank and the early publication of judicial findings on those occurrences.

SMALL CHANGE

After all, that fire at Medicine Hat burned only the brim.

* * * *

In future, for brevity, we will call that living cost, the H. C. of L.

* * * *

The mills of the civic tax grind slowly but they grind exceeding small.

* * * *

The national gramophone at Ottawa has not yet reached its classical selections.

* * * *

Toronto's best current news is that Thomas L. Church will not run for Mayor.

* * * *

The next municipal wedding may be Berlin and Waterloo, a well-matched couple.

Some one should switch the small Western towns' street railway craze into the car barns.

* * * *

Call money in New York at 20 per cent. should permit one to call money anything at that price.

* * * *

Vote only for municipal necessities on January 1st, 1913. The term embraces also councillors and aldermen.

* * * *

A New York agent went after a \$10,000 life policy in an aeroplane—which was all right if he ballasted with accident insurance.

* * * *

Saskatoon, by selling its bonds at a five per cent. rate and at 99½, seems to have been the first city to recognize the inevitable.

* * * *

The Hawthorne mining promoter's case at New York indicates that many dollar-and-a-quarter novelists strayed along the wrong vocational path.

* * * *

Canada tenders its thanks to Mr. F. Williams Taylor for his remarkable and convincing address before the Royal Colonial Institute on Canadian borrowings.

* * * *

The Right Honorable Winston Churchill, in speaking of a terminological inexactitude, may have referred to the railway's appeal against the Toronto waterfront viaduct.

* * * *

The Canadian Pacific Railway's order for urgently required new rolling stock this year was valued at \$48,000,000. That incident is a further reason for our heavy borrowings abroad.

* * * *

While folks are vehemently discussing a barrel of apples which netted the Ontario grower \$0.75 and charged the Winnipeg consumer \$5.75, tons of the same kind have rotted for the want of picking.

* * * *

The numerous interviews given in London by Mr. G. T. Somers, president of the Toronto Board of Trade, respecting Canada's credit, have acted as a favorable market factor. Mr. Somers' analyses of conditions, revealing as they did excellent reasons for Canada's borrowings, are widely appreciated.

*Railways leased by or controlled by Canadian Pacific Railway.

Railway Requirements Have Been Easily Met

There are thirty-one railways in all, out of which nine are leased by, or controlled by, the Canadian Pacific Railway.

It will be noted that the Canadian Pacific Railway, the Grand Trunk and Grand Trunk Pacific, and the Canadian Northern Railways, account for nearly ninety per cent. of the aggregate. It would be somewhat out of place to discuss the respective merits of the securities of these three great lines, but evidence of intrinsic merit and of the confidence of the British public in these great transportation systems lies in the price of their securities and the ease with which the powerful groups through whom they operate have been able to finance their requirements. As for the Canadian Pacific Railway, its shares, as everyone knows, are in high favor, not only in Canada, but on all American and British exchanges and on every bourse in Europe. It is only fair to interject that the success of this vast undertaking and the ability and probity with which its affairs have been administered constitute a national asset, of which the British Empire may well be proud.

That fine old pioneer road, the Grand Trunk Railway, has rendered invaluable service to Canada—service which is highly appreciated by all thoughtful Canadians.

The construction of the Canadian Northern system by Messrs. Mackenzie & Mann in about sixteen years is one of the most prodigious achievements of the kind the world has ever witnessed.

A close scrutiny of the whole list of railway securities reveals but a small percentage properly describable as doubtful. Personally I should consider almost the whole list as in the undoubted class. For what country can more be claimed?

Long List of Miscellaneous Investments.

Now, regarding the £74,809,000 miscellaneous investments, the list is a long one, and lack of time and other obvious reasons preclude analytical explanation, commendation, or criticism, as the case may be, though it would be comparatively easy to furnish particulars of the various loans making up the total. Certain loans there are open to severe criticism, being unsound or highly speculative on their faces, some of which obviously should never have been brought to this country. There are

bonds secured on assets lacking tangibility, stocks consisting entirely of water, etc., etc. No one can deplore and regret more than thoughtful Canadians some of the public emissions in this miscellaneous class made in this market, but we have in Canada, as have most countries, promoters whose sole object is self-aggrandisement, some of them too young to have experienced the periodical cycles of depression from which no country is immune, others unrestrained by regard for their country's credit at home or abroad. There are some unwise financiers in Canada whose lack of knowledge of London conditions and methods is monumental, men perhaps honestly desirous of steering the right course, but unable to do so through ignorance of the channel.

Subject to Vicissitudes as Elsewhere

Some money will be lost—that may be taken for granted—but after the worst that can be said is said regarding the aggregation in question, I venture to suggest that the great bulk is sound in its class—and as safe as a miscellaneous list of English securities would be of the same description. If asked to go through the list and select the bad and doubtful items I should be in a quandary. Certain issues have been made in London which were open to severe criticism at the time, but the striking prosperity of Canada in many cases has since added greatly to their intrinsic merit, and as the prosperity of Canada is bound to continue no matter what checks the Dominion may receive, I cannot see, speaking generally, that there is good cause for the anxiety and pessimism so freely expressed in some quarters. Only let me say to investors that trade ebbs and flows, and that industrial securities are subject to vicissitudes in Canada as elsewhere. I should also like to add that the whole blame ought not to be thrown on Canada in the case of improper flotations in this market. I venture to assert that there are as many—let us say, not to be too critical—“unsound” Englishmen as Canadians connected with this miscellaneous group, and it is pertinent to remark that very many of the heterogeneous Canadian issues brought out in London during the past few years have not been under the sponsorship of Canadian banks. Furthermore, may I suggest that men of high social position in this country should not lightly become directors of Canadian companies of whose business management, standing and prospects they are incompetent to form an opinion.

Gone Into Canadian Land.

Last on the list come the unlisted and unrecorded private investments, roughly estimated at £20,000,000. Regarding this aggregate, an important portion has gone into land. It is doubtless the case that a good deal of money has been made in Canadian realty by English people, but equally true that losses and lockups will accrue. Those completely familiar with Canadian conditions, but resident in this country, are possibly in a position to take a broader view of the danger of the present speculation in land than the majority of those resident in the Dominion. Personally I incline to the opinion that although the value of many central properties in the principal cities of Canada—particularly in the East—will be higher, say, ten years hence, the value of much suburban and outlying realty may easily be considerably lower. There are even points where the value of central properties may possibly cause disappointment. With all due regard for strategic position, natural resources and potentialities of the country tributary thereto, the fact remains that certain districts at present lack one of the fundamental elements of greatness in the sparseness of their agricultural population.

It is well known in Canada that the good people of this country have played a responsible part in the land boom which has taken place in the Dominion. Members of the English, Scottish and Irish aristocracy, landed gentry, retired merchants, Army and Navy officers, etc., etc., have visited the Dominion and bought land wisely and unwisely to an extent probably unprecedented in history. If Canadians and Canadian-Americans have shown a readiness to trade on the eagerness of these people to get rich quickly it need not excite surprise, as the people of any other country showing similar wonderful progress would doubtless have succumbed to similar opportunities.

Will be in Affirmative

Before leaving this subject this important and reassuring assertion must be made: the most serious set-back in realty values that could occur would not in itself materially disturb the general financial stability of the Dominion, thanks to that far-sighted provision of the Bank Act which precludes the banks of Canada from lending money against the security of real estate.

It is to be hoped that enough has been said to convince the fair-minded and discerning that though we are not free from criticism, the unqualified statement that Canada has over-borrowed in this market is too sweeping. If so, one would ask in natural sequence if Canada's credit is still sufficiently high to enable her to obtain what further funds will be required to keep pace with the remarkable progress and extension of the last decade.

The consensus of opinion will be in the affirmative, provided Canadian borrowers and Anglo-Canadian associates recognize in the future more clearly than they have in the past the absolute necessity of exercising discrimination and restraint in the securities they offer the British public.

Though the sum of money invested in Canada by Great Britain and Ireland aggregates £430,449,000 sterling, and although some £225,043,900 out of that total has been borrowed in the last ten years, Canada's requirements are not yet satisfied.

and her demands must continue if this great British Dominion is to be developed. It is true there may be a check to her phenomenal progress, but it will be merely in the nature of a pause. The development of the Dominion with funds from this country and from other countries will continue beyond peradventure, and if I may say so, under proper advice there is no better field for investment the world over.

Who is there to dispute the fact that Canada is a land of great natural resources, including that inestimable boon, water power, available from the Atlantic to the Pacific? Do we not possess to a marked degree the three elemental forms of wealth, viz., material wealth, the wealth of labor and the wealth of credit? Have we not a climate which has produced and is producing a hardy, virile northern people? Have we not a banking and currency system admirably adapted to the requirements of our country? Is it not the case that justice is obtainable throughout the Dominion, and that the laws of the land are administered in a manner comparing favorably with any other portion of the world? Have we not immunity from war, to say nothing of freedom from political, social and seismic disturbances, and last but not least, does not the British flag float over the land?

Attainments That Have Been Achieved

I have seen the population increase from 3,200,000 to nearly eight millions, and can easily go back to the inception of the Canadian Pacific Railway. Less than twenty years ago the Canadian Northern Railway, Grand Trunk Pacific and National Transcontinental Railways were undreamt of.

The North-west Territory has been converted from waste, unpopulated land into a district producing crops which this year will approximate forty million pounds in value, although only an inconsiderable portion, say ten per cent., of the arable acreage is under cultivation. If 50 per cent. of this sum is deducted for cost of production, £20,000,000 profit remains from our North-west provinces alone, or more than the amount required to pay four per cent. interest on our total London indebtedness. Is not this satisfying information for nervous investors?

In conclusion, there are two principal criticisms directed at Canada by embryo political economists, one with regard to the Dominion's adverse balance of trade, the other the debt per capita.

Economics of Present Situation

Respecting the former, it is true our imports exceed our exports by a large amount, and if this condition were to last indefinitely there would naturally be room for dissatisfaction, but Canada to-day may be compared to a mighty industrial enterprise.

We have had foundations to lay, superstructure to erect, plant to instal, mines to develop, inland and water transportations to create, even labor to import, all of which has entailed enormous expenditure, but the proof that such expenditure was justified will be furnished by steady increase in our output of products of the forest, the field, the mine, and in manufactured articles.

Economists may urge that there is a point where capital investment should be curtailed until production catches up, but in the case of Canada there seems no necessity as yet to apply such arbitrary rule, for the simple reason that the natural resources of the Dominion are of vast magnitude, and the development thereof is only in its initial stages.

Imports and Exports

In other words, our imports have been largely for constructional purposes, our exports are mainly in food supplies; the ratio of the former will diminish in time, the volume of the latter must steadily increase.

Statisticians should not forget to give us credit for another source of wealth in the uninterrupted stream of immigration which has been pouring into Canada at the rate of 250,000 per annum for the last five years, immigration of a superior class, appraisable at, say, one thousand dollars per individual without allowance for the fact that those from the United States in particular bring with them actual cash in considerable volume.

IS HOME BANK AWAITING JUDGE LEET'S DECISION?

Why is the Home Bank hesitating in its negotiations for the proposed acquisition of La Banque Internationale? That question is arousing considerable interest in banking spheres. It is generally thought that the officials of the Home Bank have had ample time to examine the assets of the French institution, yet no announcement has been made and the impression gains ground that a hitch has occurred in the negotiations.

Is the Home Bank awaiting for the publication of Judge Leet's decision regarding charges heard by him in private against officers of La Banque Internationale? That appears to be the case.

The capital stock of the San Martin Mining Company of Canada, Limited, has been increased from \$600,000 to \$750,000, such increase consisting of 30,000 shares of \$5 each.

REVIEW OF THE MONTH

Flotations in London—Investment Offerings—Dividend Changes

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during November:—

Humphrey's Unshrinkable Underwear, Limited.—\$180,000 7 per cent. cumulative preferred stock at par, with bonus of 40 per cent. common stock.

Ready's Breweries, Limited.—\$115,000 7 per cent. cumulative preferred stock at par with bonus of 50 per cent. common stock.

Tooke Brothers, Limited.—\$200,000 7 per cent. preferred stock.

Legal and Financial Corporation, Limited.—\$300,000 common stock at par.

Ontario National Brick Company, Limited.—\$1,250,000 6 per cent. 40-year first mortgage sinking fund bonds.

British Columbia Cafes, Limited.—Offering of shares. Authorized capital, \$25,000, divided into 25,000 shares of \$1 per share.

Belgo Canadian Steel, Limited.—\$40,000, 7 per cent. first mortgage gold bonds at par with a 50 per cent. bonus of capital stock.

Ontario and Manitoba Flour Mills, Limited.—\$200,000 6 per cent. first mortgage sinking fund bonds at par, with 10 per cent. bonus in common stock.

Jack Canuck Publishing Company.—\$12,000 6 per cent. 20-year debentures bonds at par, with bonus of 50 per cent. common stock.

Dominion Marble Company, Limited.—\$150,000 6 per cent. first mortgage 15-year sinking fund gold bonds at par with 25 per cent. stock bonus.

Province of Ontario.—\$2,210,000 4 per cent. bonds at 100 and 102.

Vancouver Lumber Company.—\$1,000,000 6 per cent. guaranteed gold bonds at par.

CANADIAN FLOTATIONS IN LONDON

The following flotations of interest to Canadians were made in London during November:—

Alberta Province.—£1,000,000 4 per cent. 10-year debentures at 97.

New Westminster.—£256,300 4½ per cent. bonds at 96.

Saskatoon.—£82,302 5 per cent. bonds at 99½.

Southern Ontario Land Company.—£150,000 shares of £1 at par.

The following flotations were omitted from the October list:

British Empire Trust Company.—£250,000 5 per cent. cumulative perpetual preference shares of £1 at par.

Manchester Canadian Investments, Limited.—£50,000 6 per cent. participating cumulative preference shares at par.

British Canadian Investments, Limited.—£20,534 6 per cent. first mortgage bonds at 95.

Algoma Central Terminals, Limited.—£500,000 5 per cent. first mortgage 50-year gold bonds at 95.

DIVIDEND CHANGES

Montreal Cottons, Limited, have declared an initial quarterly dividend of 1 per cent. on the common stock.

The Cobalt Lake Mining Company have declared a dividend of 2½ per cent. payable January 2nd to shareholders of record December 14th.

The Dominion Bank has declared a 2 per cent. bonus in addition to the regular quarterly dividend of 3 per cent., payable January 2nd.

The Canadian General Electric declared a bonus of 1 per cent. in addition to the quarterly dividend of 1¼ per cent., payable January 2nd.

The Ontario Power Company declared an initial dividend of 1¼ per cent. on the common stock, payable December 2, to shareholders of record November 30.

NEW LISTINGS

The following securities of the Tuckett's Tobacco Company, Limited, were listed on the Montreal Exchange:—25,000 common shares and 20,000 preferred shares.

The Montreal Stock Exchange listed \$1,050,200 additional Canadian Cotton bonds.

Forty-five thousand additional preferred shares of Tooke Brothers, Limited, have been listed on the Montreal Exchange.

The British Canadian Securities, Limited, have removed from their premises, Hastings Street, Vancouver, to the Dominion Trust Building, corner Pender and Homer Streets.

GOVERNMENTAL SUPERVISION OF BANKS

By H. M. P. Eckardt

I—ENGLAND AND FRANCE

In view of the general expectation that the new Bank Act, to be submitted to the Canadian Parliament by Hon. W. T. White, will contain provisions for external supervision of the banks, it will be interesting to take note of some of the methods by which the banking institutions operating in the principal European countries are supervised and controlled.

Owing to the predominating position held by British banking, one naturally turns first to the United Kingdom in making this examination. There is, however, very little supervision exercised by the British Government over the banks within its direct jurisdiction. Perhaps that is one reason why British banking occupies its pre-eminent place.

We may consider the Bank of England on the one side, and the joint stock banks on the other.

No Actual Supervision by Government

The Bank of England is controlled altogether by its proprietors or shareholders through the medium of the governor and court of directors. The proprietors elect annually a governor, deputy governor, and a court of 24 directors; and the supreme control rests with the body thus elected. Over the actions and business of the bank the government exercises no actual supervision; the only stipulation referring to the matter being that under which the bank is required to furnish weekly statements of position to the Chancellor of the Exchequer and to the Commissioners of Stamps and Taxes. And the court of directors may make what by-laws they please for governing the bank's business, provided the by-laws be not repugnant to the laws of the kingdom.

The British joint stock banks, too, are controlled altogether by the owners of their stock. Also they are free from governmental supervision or inspection. In the United Kingdom it is customary for the banks to have their annual balance sheets audited by chartered accountants; and the certificate of the auditing house is published with the balance sheet in the annual report. But the action of the banks in calling in the accountants is purely voluntary; each bank selects the firm which shall audit its affairs.

Continental Systems Are Different

Upon turning to the continent of Europe we find a different state of affairs. It should be remembered, while considering the various systems, that the continental peoples appear to be strongly disposed toward bureaucratic systems. If anything goes wrong with a business there is a marked tendency to establish a new government office and to appoint parties to supervise or control the business—at good salaries, of course.

Naturally the Bank of France comes first in view when one undertakes to look over continental banking. The bank is privately owned—all the shares are owned by private parties. There are about 30,000 stockholders, one-third of whom have not more than one share. Only the 200 largest shareholders are allowed to vote for the general council of the bank. The affairs of the bank are managed by the governor, two sub-governors, and the general council of the bank.

Named by President of France

The governor and two sub-governors are named by the President of the French Republic on the proposal of the minister of finance. The general council is composed of 15 regents and three censors. The censors would perform the duties of auditors or inspectors. Five of the regents and the three censors must be selected from the commercial and industrial classes. So, through its appointment of the governor and sub-governors, whom we may compare with the general manager and his lieutenants in Canada, the government exercises a measure of control over the bank. Then the President of the republic also names the managers of the branches. He does so upon the report of the minister of finance in each case upon three names submitted by the governor of the bank. Each branch has a local board of directors "selected from the best qualified commercial, industrial and agricultural representatives in the region."

Special Privileges Were Granted

The right of the French government to exercise a special measure of control over the Bank of France arose through the granting by the state of special privileges to the bank. Thus the bank was given the monopoly of note issue and sole custody of the government funds. Outside of the Bank of France there are only a few great joint stock banks.

The monopoly of the note issue and the extraordinary powers conferred upon the central bank tended to prevent the development of a system under which a considerable number of large, strong institutions would be found in competition for the business of the country.

The French credit banks, as they are called, were formed under the general law for joint stock companies. Under this law industrial companies as well as banks are organized. It is required that at least one-fourth of the capital stock shall be paid in cash, and the government takes strict measures to

see that this is done. However, beyond requiring the publication of an annual report, the government does not undertake to supervise or control the operations of the banks.

Responsibility for Liabilities

Owing to the large measure of control exercised by the government over the Bank of France, and owing to the extent of the public duties it is required to perform, the French government could not escape the responsibility for the liabilities of the Bank of France. But it is not under any responsibility for the liabilities of the credit banks. Each bank is at liberty, within certain limits, to devise its own administrative machinery. Thus in the case of the Credit Lyonnais the council of administration controls the operations of the bank. This council is composed of from 10 to 15 administrators, one of them being president and two others vice-presidents. Some of these administrators are active, that is to say, they regularly manage their respective departments of the bank's business.

Qualifications of an Administrator

To qualify as an administrator it is necessary to have at least 300 shares. The administrators are elected by the general body of shareholders. Election is for a period of five years, and the practice is to elect one-fifth of the council each year.

The business of the annual meeting is to fix the rate of the dividend and to elect one-fifth of the administrators.

In the case of the Comptoir D'Escompte and the other banks the board of directors is elected by the general body of shareholders and the board chooses the managers of the bank. So it will be seen that in France there is not any important measure of governmental supervision of the ordinary banks; and that there are special reasons for the governmental control of the Bank of France.

WORKMEN'S COMPENSATION IN ONTARIO

Sir William Meredith has returned to Toronto from a trip in Europe, where he continued his investigation into the question of workmen's compensation. He made inquiries in England, France and Germany, although his principal investigations were in London.

Sir William said that he had not changed his opinions at all with regard to his conclusions. Theoretically they were correct; the only question was the practicability of carrying out the scheme as proposed. He had met experts in workmen's compensation under various forms of legislation, representatives of insurance companies and employers' associations in Germany and labor leaders interested in the movement. He was inclined to favor a state insurance scheme with a tax on the yearly wage roll, provided it could be carried out.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended November 7th:—

	1911.	1912.	Increase or Decrease.
Canadian Pacific	\$2,493,000	\$2,938,000	+ \$445,000
Grand Trunk	956,818	1,061,984	+ 105,166
Canadian Northern	526,000	590,300	+ 64,300
Temiskaming & N. Ontario...	38,693	32,011	— 6,682

The following are the railroad earnings for the week ended November 14th:—

	1911.	1912.	Increase or Decrease.
Canadian Pacific	\$2,486,000	\$2,916,000	+ \$430,000
Grand Trunk	959,980	1,064,317	+ 104,337
Canadian Northern	504,000	609,500	+ 105,500
Temiskaming & N. Ontario...	35,794	28,864	— 6,930

For the quarter ending September 30th the receipts of the Guelph Junction Railway amounted to \$12,072.70. The receipts for the other three quarters were \$8,794.93, \$6,510.36, and \$8,840.30, making a grand total of \$36,227.99 for the year.

The statement of earnings of the Canadian Northern Railway for October shows a gross increase of \$322,300; net increase is \$24,900. The four months' figures of the company, from the beginning of the new fiscal year on July 1st last to October 31st, make a more favorable showing in this respect, a gain of \$1,096,400 in gross being accompanied by a gain of \$218,100 in net.

The statement for the month follows:—

	1912.	1911.	Increase.
Gross earnings.....	\$2,351,200	\$2,028,900	\$322,300
Expenses	1,645,900	1,348,500	297,400
Net earnings	705,300	680,400	24,900
Mileage in operation.....	4,297	3,731	566
	July 1 to date.	July 1 to date.	Increase.
Gross earnings	\$7,598,200	\$6,501,800	\$1,096,400
Expenses	5,604,000	4,725,700	878,300
Net earnings	1,994,200	1,776,100	218,100
Mileage in operation.....	4,297	3,717	580

VICTORIA'S FIRE PREVENTION CRITICIZED

Water Consumption has Outgrown Supply—Fire Brigade is Up-to-date

An exhaustive report on the water supply and fire fighting appliances of the city of Victoria and district has been prepared by Mr. H. R. Page, secretary-treasurer of the Vancouver Island Fire Underwriters' Association.

The report expresses the opinion that a conflagration hazard exists in Victoria owing to the narrowness of the streets in some instances, and the congested condition of a number of the mercantile blocks, which are solidly built up and lack lanes or other modes of access to the rear of the buildings.

The report considers there is no conflagration hazard in Oak Bay, but the abandoned shacks at Wharf Street, Esquimalt, are a danger.

The fire losses, the report says, have been rather severe during the past few years, the losses paid by insurance companies being as follows:—

1909	\$ 74,435 00
1910	582,975 00
1911	128,377 00
1912 (to end of October).....	128,584 00

Total \$914,471 00

or roughly calculated, slightly more than 60 per cent. of premiums received during the same period.

Condition Should be Remedied

The Victoria city council decided to refer the report to the fire wardens, fire chief and water commissioner.

The mayor remarked that they would search in vain for any reference to the reduction of premiums. They had doubled in the last 18 years, steadily advancing from time to time as the city improved the fire brigade equipment.

The following findings of the report contain the observations of Mr. Page on the application of the city's apparatus to cope with an emergency:—

"The consumption has outgrown both the supply and capacities of the supply mains and pumps; at the present moment, with the Beaver Lake and North Dairy pumping stations in operation to the limit of their output, which equals approximately 4½ million gallons per 24 hours, there is a gradual drop of the water stored in Smith's Hill reservoir.

"This during a season when the consumption is probably at its minimum, promises a serious condition of affairs during the coming summer unless some provision is immediately made for increasing the supply.

"Further, the supply mains mentioned in this report are single lines, and have been laid for a period of 20 years or more, also the pumping units are not in duplicate, and should the larger pump at the North Dairy station, which has been steadily in commission for the past year, become inoperative through any cause, the city, or a large portion of it, would be without water for domestic purposes.

Temporary Provision Needed Immediately

"The attention of the civic authorities has been drawn to these matters at different times during the past three years, and beyond repairing of the reservoir no material improvements have been made towards insuring an adequate domestic supply.

"It is proposed, and the work is at present under way, to bring water from Sooke Lake, some 27 miles distant; but this work, at the present rate of progress, will not be completed before 1914. It therefore becomes necessary to make some temporary provision, the two most feasible propositions being to lay a new supply main from Elk Lake to Smith's Hill reservoir and install additional pumping machinery at the North Dairy station, or connect the 36-inch main now laid on Gorge road with the Esquimalt Water Works Company's main. Should the latter course, which would appear the most simple, be adopted, the actual work of connection could be completed within two months, but under their charter the Esquimalt Water Works Company are privileged to demand 15 months' notice before such connection can be made, and also that a minimum of 500,000 gallons of water per day, at the rate of 6c per thousand gallons, be accepted for a period of not less than five years. Taking it for granted that the period of notice be waived by the company, and that the joint trouble in their supply main has been remedied, and considering that the head is sufficient to supply Smith's Hill reservoir without recourse to pumping, and the quality of the water unquestionably superior to that of Elk Lake, the latter proposition should be preferable.

Hydrants Too Far Apart

"A large percentage of 4-inch pipe has been laid in James Bay district, and the section between Hillside, Tolmie, Victoria and Sidney Railway and Cook Street being particularly bad in this respect.

"The hydrants in some dwelling sections are widely scattered, while in the outlying business area the distances between hydrants runs as high as 500 feet. In such blocks intervening hydrants should be installed.

"When taking pressure tests, a number of hydrants were found in poor condition, three within the business area being

entirely out of commission. A thorough inspection is recommended of all hydrants and also that all faulty ones be replaced by an approved pattern of hydrant having a steamer connection, and also that where the main permits, the branch connections be not less than 6-inch.

"Service mains running parallel on Wharf, Government, Douglas and Blanchard Streets would be materially assisted if cross connected, say, at Discovery, Cormorant and View Streets, also more gate valves should be provided; under present conditions a break in any one of these pipes during fire service would cause serious delay owing to the distance apart of the salt water hydrants in an easterly and westerly direction.

Some Changes Suggested

"As before stated, the salt water mains, when not in commission, are kept filled with fresh water and connected to the domestic system. In order not to waste the 65,000 gallons required to fill the system after service, the high pressure pumps are not started until a second alarm is sent in. As the steamers frequently connect to the high pressure hydrants for suction, there would appear to be a possibility of serious consequences in the event of a fire getting out of hand during the interval between releasing the steamer and changing the hose lines to the salt water hydrants. However, this is a matter that will be remedied when the scarcity of fresh water ceases to be a factor for consideration.

"The wires carrying the current from the British Columbia Electric sub-station to the salt water pumping plant should be in duplicate and underground in conduit, and kept live at all times, thus doing away with the manual agency at the sub-station. These wires should also enter the pump room direct, without passing through workshop and room in which the distributing tower is located.

"At time of inspection the North Dairy pumping station was practically without fire protection, one fifty-foot length of hose without a nozzle being the only equipment on hand. The two adjacent fire plugs should have hose and nozzles permanently attached.

Efficient Fire Fighters

"This department has kept pace with the growth of the city, the equipment being fully modern and organization good. The strength of the brigade has doubled in the past three years.

"The headquarters station is located in a poor class of building, originally constructed for a market. This constitutes a serious hazard to the alarm system, the central station of which is located at this building. Should a new fire hall not be contemplated within reasonable time, it would be as well to have the alarm equipment housed in a separate fireproof building.

"The city by-law re electric wiring is incomplete and elastic, the system of inspection inefficient; on the whole, however, the new work is comparatively good, but a large amount of old wiring should be condemned.

"The building by-law recently adopted covers the ground fairly well, but makes no provision for mandatory protection of exposed openings in district B. This is an important feature, especially in blocks having no lanes, and where buildings on either street are built back to within a few feet of one another.

"The building inspector's department is apparently understaffed, and during the busy season unable to carry on the necessary supervision, but I have at all times received most courteous attention when reporting any defects."

RAILROAD DEMURRAGE RATES RAISED

The Dominion Railway Commission has granted the application of the railways for permission to increase demurrage rate. The rates asked for by the railways were:—For the first 24 hours after free time, \$2; for second 24 hours, \$3; and for third and every succeeding 24 hours, \$4. The \$4 rate was not granted.

A Canadian railway official, commenting upon the application made by Canadian Pacific, Grand Trunk and Canadian Northern for an increased demurrage rate schedule, says that these railways were justified in making such an application to the railroad commission. Granting of the increases, this official says, would certainly minimize the evil of the existing annual car shortage, which is caused largely by an unreasonable detention of cars by shippers, by making it for the best interests of shippers and their consignees to unload cars quickly.

Under the present schedule of demurrage rates there is no inducement for shippers to load or unload quickly, and it often happens that it is cheaper to pay demurrage at the rate of \$1 per day than to provide adequate warehouse facilities. Car detention over the allotted free period of 48 hours is most prevalent at large terminals. The value of the car to the railroad is greater than any demurrage charge that could be imposed; in conjunction with this fact, the track space occupied by the detained cars is also not being used to the maximum capacity in the interest of shippers generally and the railroads.

This official says an unusually severe shortage and congestion is expected towards the end of December and throughout the following three or four months, and that in the face of this the railroads, wishing only to keep rolling stock in continuous service, seek to have a higher demurrage schedule imposed during the period of the prospective shortage.

LIFE POLICIES AND THEIR DISABILITY — FEATURES

Two Experiences Have Been Published—Death Rate Amongst Disabled Lives

BY S. H. PIPE.

(Concluded).

Generally speaking, continued Mr. Pipe, a society is also protected by conditions in its policy contracts and by its constitution and laws. Their policies never become indisputable. Cases of suicide are seldom settled for the face value of the policy, and where death can be traced to the excessive use of alcohol the claim is generally treated as one of suicide. These facts are cited to show that the lives accepted by fraternal societies do not differ from those accepted by life companies to such an extent as to make the disability experience of these societies unsafe for use by regular life insurance companies.

It is impossible to make a correct comparison between the rates of disability experienced by different societies unless the method is known which each society uses in dealing with the claims.

Two separate experiences have been published, namely, that compiled by Mr. Landis from the records of the Maccabees and Royal League, and used by Mr. Mead, F.A.S., in his paper in Volume XI. of the transactions of the Actuarial Society, and the experience of the Independent Order of Foresters compiled by myself. The two societies used different methods of dealing with their disability claims. A member becoming disabled in the Maccabees filed his claim with the local lodge which passed upon it. At the end of a probationary period of six months the lodge again passed upon it, and forwarded it to the head office, where it was finally accepted or rejected. The effect of this method was that a number of members became disabled, and died within the six months probationary period who were not recorded at the head office. Consequently, both the rate of disability and the death rate amongst disabled lives were shown to be lower than was actually the case.

A member in the Foresters sent his application for disability benefit through the local lodge to the head office. After a probationary period of six months a further application and medical examination were made, and the benefit paid or the application rejected, or probationary period extended. Consequently, this society would include in its experience many cases of disability which would not come into the experience of the Maccabees.

Combined into an Ultimate Table.

There is no object in giving the results of these two experiences since Mr. Arthur Hunter, actuary of the New York Life, has combined these two experiences into an ultimate table by eliminating the first five policy years and had made an allowance for the difference in the practice of the two societies in dealing with their disability claims. The following table shows the rate of disability per 10,000 at each age obtained by him:

Age.	Rate.	Age.	Rate.	Age.	Rate.
20	5.15	35	6.42	50	16.96
21	5.17	36	6.70	51	18.51
22	5.19	37	7.03	52	20.27
23	5.21	38	7.41	53	22.30
24	5.24	39	7.84	54	24.68
25	5.28	40	8.32	55	27.52
26	5.33	41	8.85	56	30.95
27	5.39	42	9.43	57	35.12
28	5.46	43	10.06	58	40.21
29	5.53	44	10.75	59	46.43
30	5.61	45	11.51	60	54.02
31	5.71	46	12.56	61	63.26
32	5.84	47	13.31	62	74.47
33	6.00	48	14.38	63	88.02
34	6.19	49	15.59	64	104.33
				65	123.88

The data was too scarce after age 65 to obtain reliable rates, owing to the rapid increase in the rate after 60, it is usual for companies to stipulate that disability must occur before that age.

Death Rate Amongst Disabled Lives.

To determine the cost of disability features in life policies, it is necessary to know the death rate amongst disabled lives.

The following table is based upon the Foresters' experience, and shows the distribution of the causes of disability according to chief causes.

Cause.	Ratio Per Cent.
Consumption	23.4
Paralysis	12.8

Cause.	Ratio per Cent.
Insanity	12.0
Diseases of the circulatory system	7.3
Diseases of the urinary system	5.3
Cancer	4.7
Injury	4.4
All others	30.1

A mortality experience consisting of lives suffering from the above complaints must necessarily show an extremely high rate.

Results from Same Experience.

Mr. Hunter used the same experience and obtained the following death rates per 1,000 amongst disabled lives. The death rates for the first five years only following disability are given, for each quinquennial age at disability, for the purposes of illustrating the peculiarities of the experience.

Age at disability.	Years following disability.				
	1st.	2nd.	3rd.	4th.	5th.
20	471	232	175	133	110
25	400	190	134	91	73
30	353	162	109	71	56
35	327	148	99	64	49
40	306	139	96	64	49
45	290	140	106	74	51
50	273	144	118	86	62
55	248	147	119	94	74
60	220	147	122	103	86

It will be noticed that the mortality improves with the time elapsed since disability. Year by year it must more nearly approach the mortality shown by standard tables owing to the death of the most serious cases in the first two or three years following disability.

First Year Following Disability Eliminated.

A combination of a high rate of disability with a low death rate amongst disabled lives, is the safe course to pursue in the calculation of the cost of the "waiver" and "instalment" disability benefits. It is far too complicated a process to use a mortality table, as above, in the "select" form, for disabled lives so Mr. Hunter eliminated the first year following disability from the mortality experience and obtained the following table, which, as far as our present knowledge goes, may be considered a safe and practical one.

Mortality among disabled lives per 1,000.

Age.	Rate.	Age.	Rate.	Age.	Rate.	Age.	Rate.
20	205	35	89	50	91	65	115
21	193	36	88	51	92	66	115
22	182	37	88	52	94	67	115
23	171	38	87	53	96	68	115
24	161	39	86	54	99	69	115
25	151	40	85	55	101	70	115
26	141	41	85	56	103	71	116
27	132	42	85	57	105	72	116
28	123	43	86	58	107	73	116
29	114	44	86	59	109	74	117
30	106	45	87	60	111	75	118
31	100	46	88	61	113	76	119
32	95	47	88	62	114	77	121
33	92	48	89	63	114	78	126
34	90	49	90	64	115	79	133

From age 80 and upwards the table is assured to run with the American Experience Tables. By slightly modifying the rates at ages 78 and 79 to 124 and 129 per 1,000 respectively, the table will run smoothly into the Om (5) Table.

BIG PACIFIC COAST ORE SHIPMENTS

The shipments from the various British Columbia mining districts for the third week in November were:

Nelson production—Week, 1,903 tons; year, 63,213 tons.
Rossland production—Week, 36,975 tons; year, 218,850 tons.

Boundary production—Week, 760 tons; year, 1,828,548 tons.

East Kootenay production—Week, 760 tons; year, 30,814 tons.

Slocan and Ainsworth production—Week, 3,861 tons; year, 111,629 tons.

Consolidated receipts, Trail, B.C.—Week, 6,951; year, 288,461 tons.

Granby receipts, Grand Forks, B.C.—Week, 20,858 tons; year, 1,135,467 tons.

British Columbia Copper Company's receipts, Greenwood, B.C.—Week, 14,310 tons; year, 604,684 tons.

Output for the Kootenay district and Boundary district for the week was 48,427 tons and for the year to date 3,361,054 tons.

AMONGST MONTREAL'S FINANCIERS

Quebec and Saguenay Railway—St. Laurent and Franchise Granting

Monetary Times Office,
Montreal, December 4th.

Whether there is any significance or not in the recent strength in the common stock of the Quebec Light, Heat and Power Company, as well as in the bonds, is being discussed on the local Street. The statement has been made that Sir Rodolphe Forget hopes to succeed in an effort to get the Quebec Government to guarantee the bonds of the Quebec and Saguenay Railway, or to take the whole road over, or otherwise relieve the Quebec Railway, Light, Heat and Power Company of the burden which is at present exercising such a depressing influence on the price of the securities of the company. It is claimed that something in the nature of a denial has been given out concerning the attempt credited to Sir Rodolphe, but the denial, if such has been given, has not been in a sufficiently public manner to have reached the general public, so that the belief that there is something in the story still holds sway on the street.

Opinions Regarding Success of Plans.

As to the likelihood of the success of the efforts, opinion is divided. Some are pinning their faith in the resourcefulness of Sir Rodolphe, and it is no doubt this which has been having the stimulating effect upon the market for the securities in spite of the present money stringency. A further story is to the effect that Sir Rodolphe has been engaged upon a plan of reorganization of the Quebec Light, Heat and Power Company.

Council Will Grant Franchises.

The matter of granting franchises for the supply of water, light and transit in the parish of St. Laurent, near Mount Royal, on the Island of Montreal, has been occupying attention, and has been referred to in these columns from time to time. Not long since the Franco-Belgian syndicate secured the franchise for the supply of water, under certain conditions, which conditions were apparently considered somewhat onerous, it having, among other things, refused to post the guarantees of \$20,000. This may have been partly owing to the fact that of the three franchises it was only successful in obtaining one.

It would now appear that the council has consented to grant all three franchises to the Franco-Belgian Syndicate, the stipulation being that the company must deposit the sum of \$50,000. The franchises are to have a life of twenty-five years, and work on the waterworks and lighting must be commenced within thirty days after notice has been given by the council, while the tramway is to be commenced within six months of the adoption of the by-law which is now before the legislature at Quebec.

Belgian and French Resources.

The company now has a capital of but \$100,000, but it is the intention to apply to the Dominion government to increase this to \$2,000,000. It is claimed by the general manager that the company has resources in Belgium and France and will have no difficulty in getting all the money required.

An interesting turn has been given to affairs by the action of the Canadian Northern Railway in its effort to have its model city removed from St. Laurent in order, probably, that it may control the granting of the franchises for public services. The Franco-Belgian people are applying to legislature to have their franchises apply also to the model city.

TWO MORE ISSUES IN LONDON

Underwriting is in progress for the issue of \$5,000,000 4 per cent. debenture stock Grand Trunk Railway, the price of the issue to be 95. A full half year's interest will be paid in April. The issue of the city of Lethbridge loan of \$64,000 4½ per cent. debentures at 92 will also shortly be made.

New Zealand's imports of Canadian products amounts to \$888,915 for the six months ended September 30th.

Port Mann, B.C., Nov. 19th, 1912

THE MONETARY TIMES,
TORONTO

Enclosed is a cheque for \$9.00 for three years' subscription to June, 1915.

CHARLES F. MILLAR

BRIDGE COMPANIES' MERGER MAY MATERIALIZE

Dominion and National Bridge Companies' Consolidation Seems Probable—Shawinigan's Outlook

Monetary Times Office,
Montreal, December 4th.

The latest merger spoken of here is that of the Dominion Bridge Company and the National Bridge Company. The expectation is that the Dominion Bridge Company will buy the National out, and that following this there may be an issue of the stock of the Dominion Company and that this may be listed on the local stock exchange where the public may buy and sell it as in the case of other stocks. There can be no doubt that Dominion Bridge would be one of the popular trading stocks as the company has been so well known for many years past and has been unusually progressive and successful.

The National Bridge Company has a capital of \$1,000,000 common stock and a bond issue of \$560,000 of 6% first mortgage, 40-year sinking fund bonds. The plant has only been in operation since July 1st, 1911, and a year after it had begun was turning out a total of 1,300 to 1,400 tons per month.

Has Valuable Assets.

It is the owner of 350,000 feet of land and a plant at Longue Point, near the city, and although its plant is operating to full capacity it is quite unable to keep up with the orders which are coming in from all quarters. There are now orders in hand, it is claimed, to keep the plant going until well into next year.

Not the least remunerative of the assets of the company must be an option possessed on a block of 560,000 feet of land adjoining its own property. This option has till next April to run and land has been increasing at a very rapid rate in value in the vicinity mentioned.

It is stated that the Dominion Bridge Company will guarantee the interest on the National Company bonds and give one of its shares for four of the National shares. The directors of the National are Messrs. J. N. Greenshields, K.C., president; William Lyall, W. G. M. Shepherd, Hon. R. Mackay and H. W. Beauclerc.

Following upon the action of the Montreal Light, Heat and Power Company in raising its dividend recently to 9%, from the previous 8%, the Shawinigan Water and Power Company has this week raised its dividend to 6% from the previous rate of 5% per cent. per annum. This action has been taken in view both of the improved outlook and the actual improvement which has taken place in the earnings of the company during the past week. The first quarterly dividend at the new rate of 1½% per quarter has been declared for the period ending December 31st, payable January 20th to holders of record of January 7th.

Companies are Interlinked.

The Shawinigan Company and the Montreal Power Company have now very close relationships with each other, even to the extent of each being the owner of a considerable proportion of the stock of the other. It will be seen, therefore, that the Shawinigan holdings of Montreal Power stock will bring it in considerably more in the way of dividends than a year ago, owing to the recent advance in the dividend of the Montreal Power Company, while considerable of this will now be given back to the Montreal Power Company by the increase in the dividend of the Shawinigan Company.

During the past season the shares of the Shawinigan Company were selling at the highest price, considering the dividend return, of any company on the Montreal Stock Exchange, so it is thought. The stock was up to the vicinity of 154 to 155, and as the dividend was by 5% the return on the investment was quite low. The subsequent break in the market has carried the stock down once more so that with the increased dividend, holders are ready to sell at 140.

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended November 29th:—Peterson Lake, 94,200; McKinley-Darragh, 87,100; La Rose, 66,100; Cobalt Townsite, 125,000; Kerr Lake, 61,674; total, 434,074 pounds, or 217 tons. The total shipments since January 1st are 38,833,785 pounds, or 19,416 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

The capital stock of Corporation Estates, Limited, has been increased from \$100,000 to \$200,000.

SIXTY CONCERNS INCORPORATED

Atlantic Sugar Refineries' Capitalization to be Ten Millions—Several Realty Companies

Sixty companies have this week received charters, six of them being capitalized at one million dollars and over each. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capital.
Quebec	15	\$14,235,000
Ontario	26	4,900,000
Manitoba	3	1,140,000
British Columbia	16	1,907,000
	60	\$22,182,000

The largest companies this week are:—

Atlantic Sugar Refineries, Montreal	\$10,000,000
Dominion of Canada Stamp Vending Company, Toronto	2,000,000
Canada Stone Company, Montreal	1,000,000
J. C. Wilson, Montreal	1,000,000
West Crescent Heights, Montreal	1,000,000
Canada Pulp and Lumber Company, Winnipeg.	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Kelowna, B.C.—Gaddes-McTavish, \$50,000.
Bruno, Sask.—Bruno Clay Works, \$150,000.
Port Mann, B.C.—Seaport Agencies, \$14,000.
Nelson, B.C.—City and Farm Lands, \$250,000.
Yorkton, Sask.—Yorkton Holding Company, \$25,000.
Reddell, Alta.—Stoner, Lockwood & Wheeler, \$100,000.
Eckville, Alta.—Eckville Improvement Company, \$10,000.
Coquitlam, B.C.—Godard Mercantile Company, \$25,000.
Prince Albert, Sask.—Cement Products Company, \$6,000.
Imperial, Sask.—Imperial Development Company, \$25,000.
Silverton, B.C.—Silverton Skating Rink Company, \$5,000.
South Vancouver, B.C.—Cement Products Company, \$10,000.
Lethbridge, Alta.—Lethbridge Union Realty Company, \$10,000.
Berlin, Ont.—Charles A. Ahrens, \$100,000. C. A. Ahrens, F. H. Ahrens.
South Wellington, B.C.—Wellesley Lumber Company, \$32,000.
New Westminster, B.C.—Westminster Development Company, \$150,000.
New Westminster, B.C.—Westminster Woodworking Company, \$100,000.
Champion, Alta.—Champion Farmers' Grain and Supply Company, \$20,000.
Mimico, Ont.—Star Athletic Club. A. C. Harrison, A. Dods, C. C. Hele.
Victoria, B.C.—Adkison and Dill, \$150,000, (builders.) Canada Sales Company, \$10,000.
Hamilton, Ont.—High Park of Hamilton, \$20,000. E. M. Faulknor, H. D. Petrie, C. H. Long.
Tilbury, Ont.—F. S. Carr Rubber Company of Canada, \$40,000. J. E. Day, J. M. Ferguson.
Caledonia, Ont.—Haldimand Gypsum Company, \$150,000. J. Old, G. H. Hornbrook, J. W. Avery.
Thorold, Ont.—Fibre Products, \$250,000. F. W. Manson, G. J. Manson, W. McA. Marquis.
Sudbury, Ont.—Sudbury and Copper Cliff Dairy, \$100,000. C. McCrea, G. J. Valin, A. J. Manley.
Peterborough, Ont.—Peterborough Co-operative Society, \$10,000. J. Begley, J. Pitchford, B. T. Cuffe.
Quebec, Que.—Eagle Battery Company, of Canada, \$100,000. A. Galipeault, L. S. St. Laurent, H. LaFerte.
Brantford, Ont.—M. B. and P. Company, \$40,000. H. McReynolds, M. D. Judah, H. R. Mason, Hamilton.
Virden, Manitoba.—Empire Publishing Company, \$40,000. H. C. Simpson, T. A. Carscadden, D. M. Handy.
Fort Frances, Ont.—Canadian Message Iron Company, \$250,000. O. C. Damm, L. H. Nord, D. C. McKenzie.
Walkerville, Ont.—Peabody's Sales Corporation, \$40,000. W. J. Peabody, Grosse Pointe, Mich.; H. B. Peabody, H. R. Crusoe, Detroit.

Windsor, Ont.—Canadian Roofing Manufacturing Company, \$75,000. L. H. Cheeseman, C. J. Cheeseman, Detroit; H. W. Unsworth, Sarnia.

Ottawa.—National Saw and Forge Company, \$500,000. N. A. Belcourt, J. A. Ritchie, E. R. E. Chevrier. French Industrial Company, \$500,000. J. A. Therien, R. Beaudry, L. R. Beaudry, Montreal.

Winnipeg, Man.—Canadian Pulp and Lumber Company, \$1,000,000. L. E. Brownell, R. Brownell, T. R. Ferguson. Queen Investment Company, \$100,000. C. A. Crawley, G. F. de O'Grady, G. S. Rutherford.

Vancouver, B.C.—Sooke Beach Townsite Company, \$500,000. Local Securities, \$50,000. Gift Electric Supply Company, \$25,000. United Boot Shops, \$250,000. Alberta and British Columbia Oil Lands, \$10,000. British Pacific Fisheries, \$250,000. Purdy and Loneragan, (builders), \$10,000. Lito-Silo, (acquire patents including one for compounding plastic composition for use as flooring, wainscoting, etc.), \$10,000. Rickard and Rickard, (express and transfer agents), \$10,000. Middlewest Lumber Company, \$100,000. Vancouver Reinforced Concrete Company, \$100,000.

Toronto.—Western and Central Canada Investments, \$50,000. J. F. MacGregor, T. W. Lawson, G. W. Morley. Aztec Securities Company, \$10,000. J. S. Lovell, W. Bain, R. Gowans. Northern Quarries, \$50,000. J. H. Young, A. Todd, L. W. Archer. Medina Shale Brick Company, \$180,000. A. W. Holmsted, W. L. Carr, C. J. F. Collier. Chinese Union Club, \$15,000. J. Wom, L. Hing, Lee One. Orient Realty Company, \$50,000. J. J. Hoidge, H. V. W. Laughton, E. F. Borrett. Methodist Union. C. D. Massey, C. D. Daniel, W. L. Armstrong. King Street Realty, \$500,000. H. Riley, W. B. Sturup, J. F. MacGregor. Radcliff Saw Manufacturing Company, \$40,000. W. E. Radcliff, F. Watts, T. M. Mulligan. Welland Estates, \$40,000. H. Catley, T. H. Barton, J. H. Cooke. Cox and Cummings, \$40,000. A. H. Cox, F. J. Cummings, F. W. Cox. Floating Castile Soap, \$100,000. J. L. Galloway, T. M. Mulligan, W. E. Whitehead. Dominion of Canada Postage-Stamp Vending Company, \$2,000,000. W. A. J. Case, J. B. Taylor, G. C. Loveys.

Montreal.—Guarantee Plumbing, Heating and Ventilating Company, \$10,000. W. R. Dunn, Maisonneuve; J. Stopford, A. Hall, Montreal. United Railway Supplies, \$20,000. E. E. Howard, H. U. P. Aylmer, J. Dewitt. Canada Stone Company, \$1,000,000. W. H. Fulton, J. B. Kennv, D. C. Sinclair, Halifax. Fyfe Scale Company, \$10,000. J. A. Mann, C. G. MacKinnon, T. B. Gould. Stilenfit Clothing, \$150,000. C. G. MacKinnon, J. A. Mann, T. B. Gould. Pinehurst Land Company, \$35,000. S. H. Wilkinson, J. W. Blair, C. A. Hale. La Compagnie du Parc Napoleon, \$50,000. E. N. Hebert, J. P. Lacroix, E. Morin. Atlantic Sugar Refineries, \$10,000,000. A. Chase-Casgrain, E. M. McDougall, I. J. Creelman. Montreal Show Case Company, \$50,000. F. G. Bush, G. R. Drennan, M. J. O'Brien. J. C. Wilson, \$1,000,000. T. S. Stewart, F. H. Wilson, W. Stewart. West Crescent Heights, \$1,000,000. T. S. Owens, G. A. Coughlin, H. McIntyre. John Round and Son, Canada, \$500,000. A. Wainwright, J. R. S. McLernon, M. Alexander. Farrell, Belisle & Company, \$300,000. J. W. Belisle, Westmount; A. A. Senft, Westmount; M. F. Farrell, Outremont. Oceanic Oyster Company of Canada, \$10,000. J. O. Johnson, J. C. Smith, G. F. Converse, New Haven, Conn.

TROUBLES AND HUMOR OF THE MUNICIPAL BOND MARKET

TOWNSHIP OF TURNBERRY.

Clerk's Office.

Bluevale, Ont., Nov. 28, 1912.

Messrs. Goldman and Company, Toronto:

Yours of the 27th instant to hand and in reply I may state we got four tenders from dealers in Toronto. The highest bid was 97¼ and were not taken into consideration by the council, but were assigned to the waste basket. We got three verbal tenders from farmers in the township. One of them was accepted at par. None of the farmers want their names mentioned, and as I did not enter the names or amount of tenders from Toronto, I cannot give you any more information.

Yours respectfully,

(Signed) JOHN BURGESS,

Clerk.

P.S.—We were ashamed of the tenders received from Toronto for debentures running 20 years and bearing 5 per cent. interest from a township with an assessment of nearly one and a half millions and no previous debt except a small drain debenture of about 600 dollars.

J. B.

POWER SITUATION IN QUEBEC CITY

Large Developments in Contemplation—Demand for Power is Rapidly Growing

The large undertakings now under way, or in contemplation for Quebec city and surrounding district, have served to draw particular attention to the power situation at the ancient capital. At present, the Quebec Railway, Light, Heat and Power Company is obtaining about 5,000 horse-power at Montmorency and 1,500 horse-power from the Chaudiere. It had also been obtaining from 2,000 to 2,500 horse-power from the Jacques Cartier, but a short time ago the power plant of the Jacques Cartier Company was destroyed by fire and as yet the company has not proceeded with the reconstruction of the plant owing, undoubtedly, to arrangements that have been made for securing power elsewhere. This gives the Quebec Railway a combination of between 8,500 and 9,500 horse-power.

New Companies in the Field.

Recently, two new companies have come into the field, the Dorchester Electric, a small concern which, when connected, will have an output of about 1,500 horse-power, and the Stadacona Hydraulic Company, which will at the outset develop 10,000 horse-power from its powers at Seven Falls, and have so laid out their development that the output will be increased to 15,000 horse-power.

Owing to the large contract which the Stadacona Hydraulic has with the Quebec Railway, it was at first thought that there was some connection between the two companies. There is, however, no connection whatsoever, and while the Stadacona will sell a portion of its power to the Quebec Railway, it may indeed be a competitor against the Quebec Company for a portion of the balance of this power.

The development carried out by this new company brings about an entirely new condition in the city of Quebec and surroundings, as it will have an output in excess of all other companies combined and, in a measure, will be able to meet the requirements of a number of larger enterprises which will be established during the next few years. The Stadacona Hydraulic Company already has its output of 10,000 horse-power disposed of, 4,000 horse-power being under contract to the Quebec Railway, Light, Heat and Power, and 6,000 horse-power to the Bayliss Pulp and Paper Company. The Stadacona also has the right to enter the field in the city of Quebec, but the intention of the company at the present time is to be a wholesale concern only, turning over its output to large concerns, or to some of the existing power companies for distribution, thus occupying the same position as regards Quebec City as the Shawinigan Water and Power does in Montreal.

Growing Market for Power.

In view of the number of large undertakings now being provided for, it would seem as though the interests identified with the Stadacona Hydraulic had not carried out their plans for the new installation a moment too soon, and the new Harbor Commission of the city of Quebec is calling for tenders for the erection of a 2,000,000 bushel elevator which will take 3,000 horse-power to operate it. The Hon. Mr. Cochrane, Minister of Railways, has stated that the Grand Trunk Pacific intends to start in the spring of 1913 on the construction of a 5,000,000 bushel elevator which will require 8,000 horse-power. The Quebec Railway, Light, Heat and Power has closed a contract which comes into force in June, 1913, for 1,300 horse-power for the Quebec bridge, while the Transcontinental Railway shops now being erected are in the market at the present time for 3,000 horse-power.

Undertakings like the above make it apparent that existing companies will have to expand just as rapidly as possible in order to keep pace with the growing demand.

The Stadacona Hydraulic Company will be supplying power about the middle of 1913. The large dam at Seven Falls, which is 70 feet high, has been completed, while the work has also been finished on the construction of the 8 feet penstock which extends a length of 3,200 feet. This leaves only the power-house to be constructed early next spring. The entire machinery for this plant has all been contracted for, assuring its delivery well within the time required. The power of the Stadacona Hydraulic has the greatest head of any in the world, amounting to 410 feet. The next in point of height is said to be located on the White River in California, which has a total head of 400 feet.

The British Columbia Electric Railway Company's order for sixty-five city cars has been placed with the Preston Car and Coach Company of Preston, Ont., the cost of which will amount to over \$500,000. By the terms of the contract all the cars must be delivered early in the spring.

NOVEMBER BOND SALES

Issues Were Not Numerous—Four Provinces Were in the Market

The municipal bond sales in Canada for November, as compiled by The Monetary Times, amounted to \$1,396,664, compared with \$1,060,597 for October, and \$2,915,765 for the corresponding period last year.

Four provinces were in the market. The largest issue was made by Lethbridge, Alberta.

The following are the particulars by provinces:—

Ontario	\$668,464
Alberta	627,000
Saskatchewan	96,200
New Brunswick	5,000
	\$1,396,664

The following are the monthly totals compared with 1909, 1910 and 1911:—

	1909.	1910.	1911.	1912.
January	\$2,540,862	\$881,838	\$420,337	\$2,133,531
February	4,074,125	1,272,977	1,037,287	2,596,378
March	1,615,368	1,169,730	6,271,025	1,726,716
April	4,033,988	6,805,078	3,910,288	927,160
May	5,185,530	5,964,896	3,946,047	1,928,748
June	2,243,569	2,187,588	3,983,670	1,690,344
July	1,989,442	1,536,424	1,594,566	1,967,376
August	3,011,242	1,312,953	1,493,507	1,649,547
September	1,503,108	2,841,486	1,748,778	1,998,605
October	1,510,132	2,211,461	1,730,075	1,060,597
November	2,725,166	2,292,781	2,915,765	1,396,664
December	1,100,428	566,113	1,243,593	
Total	\$31,532,960	\$29,043,325	\$30,295,838	\$19,077,666

The following are the details:—

Ontario.			
Peterboro	\$19,500	4¾	1932
Fort William	392,280	..	
Meaford	40,000	5	1932
Niagara Falls	25,684	5	1932-42
Penetanguishene	15,000	5	1932
Mitchell	10,000	5	
North Toronto	140,000	4¾	1942
Mount Forest	14,000	5	1923
Chinquacousy Township	12,000	5	1932
	\$668,464		
Alberta.			
Lethbridge	\$623,000	4¾	1942
Suffield	4,000	6	1922
	\$627,000		
Saskatchewan.			
Chester R.M.	\$5,000	5¾	1932
Snipe Lake R.M.	5,000	5¾	1932
Wilkie S.D.	75,000	5	1942
Gap R.M.	10,000	6	1932
Verneczarka	1,200	6	1922
	\$96,200		
New Brunswick.			
Fredericton	\$5,000	4	1925

THE QUEBEC BANK

Evidence of the managerial and directorial efficiency and of the progress being made by the Quebec Bank is shown in its satisfactory ninety-fifth annual statement. The year's profits amount to \$294,804. This, together with \$22,283 brought forward from last year, gives \$317,088, distributed as follows: Dividends, \$175,000; reserved for pension fund, \$5,000; expenditure on premises at branches, \$26,689.21; business taxes, \$10,720; transferred to contingent account, \$75,000, leaving a balance of \$26,678 to be carried forward to credit of profit and loss account. The total assets amounted to \$22,215,225, while liabilities to the public were \$18,393,781 and to stockholders \$3,821,444. The opening of a number of new branches has been the policy of the bank for the last two or three years, and this has necessitated the incurring of heavy expenses, but the results have been satisfactory, and should increase. By this report another link is forged in the lengthy chain of substantial results obtained by this old-established and staunch financial institution.

NOVEMBER FIRE LOSSES

Four Hundred and Eighteen Separate Burnings Destroyed Over One Million Dollars' Worth of Property

The Monetary Times' estimate of Canada's fire loss during November amounted to \$1,184,010, compared with October loss of \$1,416,218 and \$1,506,500 for the corresponding period last year. The following is the estimate of November losses:—

Fires exceeding \$10,000	\$ 855,300
Small fires	174,275
Estimates for unreported fires	154,435
	\$1,184,010

The following are the monthly totals of the losses by fire compared with 1909, 1910 and 1911:—

	1909.	1910.	1911.	1912.
Jan.	\$1,500,000	\$1,275,246	\$2,250,550	\$3,002,650
Feb.	1,263,005	750,625	941,045	1,640,153
March	851,690	1,076,253	852,380	2,261,414
April	720,650	1,717,237	1,317,900	1,355,955
May	3,358,276	2,735,536	2,564,500	2,251,815
June	1,360,275	1,500,000	1,151,150	4,229,412
July	1,075,600	6,386,674	5,384,300	1,741,371
Aug.	2,582,915	1,667,270	920,000	1,164,760
Sept.	1,615,405	894,125	1,123,550	883,949
Oct.	2,208,715	2,195,781	580,750	1,416,218
Nov.	935,191	1,943,708	1,506,500	1,184,010
Dec.	1,433,813	1,444,860	2,866,950	
	\$18,905,538	\$23,593,315	\$21,459,575	\$21,130,807

Large Fires

The fires at which loss was estimated at \$10,000 and over were as follows:—

North Lake, Ont.	Lumber yard	\$ 30,000
Winnipeg, Man.	Church	21,500
Montreal, Que.	Factory	300,000
Nelson, B.C.	Lumber yard	50,000
Blind River, Ont.	Conflagration	20,000
Port Arthur, Ont.	Newspaper office	15,000
Spanish, Ont.	Business section	18,000
Coleman, Alta.	Machine shop	40,000
Quebec, Que.	Factory	30,000
Toronto, Ont.	Store	50,000
London, Ont.	Warehouse	15,800
Royal, Ont.	Conflagration	30,000
Sarnia, Ont.	Factory	100,000
St. Havien de Lotbin- ière, Que.	Residence	25,000
Prescott, Ont.	Freight sheds	40,000
Guigues, Que.	Residence	11,000
Langdon, Alta.	Conflagration	35,000
Weyburn, Sask.	Residence	24,000

What Was Destroyed and Damaged

The structures damaged and destroyed were 111 residences, 59 stores, 46 barns and stables, 18 buildings (various), 16 factories, 12 hotels, 10 warehouses, 8 saw and lumber mills, 6 churches, 4 newspaper offices, 3 laundries, 3 elevators, 3 garages, 2 lumber yards, and 1 each evaporator, theatre, pool room, post office, café, bank, gristmill, hospital, slaughter-house, round-house, convent.

There were destroyed 43,556 bushels wheat, 8,000 bushels flax, 3,750 bushels barley, 3,000 bushels oats, 238 tons hay, 12 tons straw, 25 tons potatoes, 24 horses, 13 cows, 6 pigs, 300 chickens, 200 quintals cod fish, 30 cords wood, 100 cheese boxes, 300,000 feet lumber, 12 freight cars, 4 automobiles, 3 steamers, 2 gasoline launches, 1 each tent, dancing platform, barge, steam launch, street car, greenhouse, grand stand.

Of the presumed causes all too many were attributed to unknown causes; 22 incendiary, 16 sparks, 14 defective flues, chimneys and stovepipes, 13 overheated stoves and furnaces, 11 matches, 10 gasoline, 7 oil stoves, 6 lamps, 5 spontaneous combustion, 4 upset lanterns, 3 electrical defects, 3 gas, 3 burning rubbish, 3 burning paper, 3 oil, 2 tar, 2 kindling wood, 1 chemicals, 1 candle, 1 lightning, 1 alcohol stove, 1 hot ashes.

Deaths in all Provinces

The number of deaths from fire is 22, making 175 for the first eleven months of 1912.

The following are the monthly totals compared with 1909, 1910 and 1911:—

	1909.	1910.	1911.	1912.
January	16	27	27	27
February	8	15	12	11
March	16	20	18	24

	1909.	1910.	1911.	1912.
April	18	37	20	15
May	21	15	28	18
June	16	52	13	6
July	4	15	110	5
August	17	11	22	16
September	10	10	13	6
October	26	16	17	21
November	34	19	20	22
December	33	19	17	..
Totals	219	256	317	175

The fires at which fatalities occurred were as follows:—

Fort Frances, Ont. ...	Railway collision	1
Toronto, Ont.	Upset lamp	1
Montreal, Que.	Clothes set alight	1
Niagara Falls, Ont. ..	Clothes set alight	1
Prince Albert, Sask. ..	Clothes set alight	1
High River, Alta.	Burning building	1
Battleford, Sask.	Burning building	1
Englishtown, N.S.	Burning building	1
Vancouver, B.C.	Burning building	1
St. John, N.B.	Clothes set alight	1
Montreal, Que.	Burning building	1
Brandon, Man.	Railway collision	1
Halbrite, Sask.	Burning building	3
Toronto, Ont.	Clothes set alight	1
Charlottetown, P.E.I. ..	Clothes set alight	1
Stratford, Ont.	Upset lamp	1
Richmond, Que.	Burning building	1
Namur, Que.	Burning building	1
Portage La Prairie, Man.	Playing with matches	1
Berkeley, Ont.	Burning building	1

COLONEL ROOSEVELT'S ACCIDENT POLICY

It now appears that Colonel Roosevelt, defeated Progressive candidate for the Presidency of the United States, who was shot at Milwaukee during his campaign, did not draw \$125 weekly indemnity under an accident policy.

The \$25,000 policy issued to the Colonel on his return from Africa by the Missouri Fidelity & Casualty, is stated by the New York Commercial to have been cancelled a short time before he was shot at Milwaukee, but a new policy for \$2,500 was issued, carrying a weekly indemnity of \$12.50.

Most of the original insurance was reinsured, there being, in all, ten companies on the risk. When Colonel Roosevelt entered into the recent campaign, the reinsuring companies got off the risk, the Missouri company remaining for amount it had retained of the original insurance.

MANITOBA'S TELEPHONES

The statement of the condensed earnings of the Manitoba government telephones for the month of October, 1912, and also for the ten months ending October 31, were issued by the public utilities commissioner recently. The report shows a heavy increase in earnings and an equal decrease in operating expenses. They were as follows:—

	Month of October.	Ten months ending October 31.
Revenue:		
Exchange revenue	\$107,007.04	\$ 925,485.50
Total revenue	33,917.06	274,810.28
Sundry net earnings	1,415.50	12,165.77
	\$142,339.60	\$1,212,461.55
Expenses:		
Operation	\$51,130.35	\$533,927.20
Maintenance	34,555.65	375,254.35
	\$85,686.00	\$909,181.55
Revenue balance	\$56,653.60	\$303,280.00
Increase of revenue over previous month		\$6,276.38
Decrease of expense over previous month		692.21
Net increase over previous month		\$6,968.59

Comparative station report:

	Jan. 1, 1912.	Nov. 1, 1912.	Net gain.
Exchange stations	\$22,403	\$24,038	\$1,635
Rural stations	9,194	9,311	117
Private branch exchanges ..	2,586	3,108	522
Extension sets	2,026	3,196	270
	\$37,109	\$39,653	\$2,544

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Quebec Bank.—The directors of the Quebec Bank announce a forthcoming issue of \$500,000 capital stock at 125. Stock of the bank is selling at from 132 to 133.

Dominion Textile Company.—Dominion Textile stock has been on a 6 per cent. basis. The first dividend at the new rate will be paid on January 2nd. The old rate was 5 per cent.

Shawinigan Water and Power Company.—At the meeting of the directors on Tuesday the Shawinigan Water and Power Company increased the dividend from 5 to 6 per cent. The new rate will be paid at the end of the present year.

Dominion Coal Company.—The output of the Dominion Coal Company for November was 400,000 tons. Secretary Corey stated that the company will have mined by the end of the year four and a half million tons.

Island Smelting and Refining Company.—Stockholders of the Island Smelting and Refining Company, Limited, will hold a special meeting on December 5, to ratify a proposed agreement for the purchase of the Trout Lake smelter and to sanction a by-law for a bond issue to provide for the purchase.

Brazilian Traction, Light and Power Company, Limited.—The statement of combined operating earnings and expenses of the tramways, gas, electric lighting and power, and telephone services, owned or controlled by the company, for the month of October, 1912, shows: Gross earnings from operation, \$1,770,187; operating expenses, \$765,858; net earnings, \$1,004,329.

Ames-Holden-McCready, Limited.—The past six months' business of the Ames-Holden-McCready, Limited, ended October 30th, shows an increase of sales of over \$750,000 in excess of the same period last year, and largely increased profits. The joint out-put of the three factories is now about 9,500 pairs per day. The advance sales for the spring trade are ahead of last year, and reports from all branches indicate a heavy business for the coming spring.

Porto Rico Railways Company, Limited.—The comparative statement of earnings for October, 1912, is as follows:—

	1911.	1912.	Increase.	%
Gross	\$64,013.21	\$69,613.26	\$5,600.05	8.75
Net	31,800.04	29,726.80	2,073.24	6.52

And for 10 months:—

	1911.	1912.	Increase.	%
Gross	\$616,413.19	\$685,159.23	\$68,746.04	11.15
Net	312,239.99	267,337.53	44,902.46	14.38

Tooke Brothers, Limited.—A block of \$200,000 additional preferred stock has been sold privately, and the proceeds will be used to build an extension at the company's plant at St. Henry and to provide additional working capital. Mr. B. Tooke, president, says that the new issue made necessary by the large growth of the company's business, which is at a record level, with the new issue of \$200,000 preferred stock, the total capitalization of the company stands at \$1,000,000 seven per cent. preferred stock and \$650,000 common stock. The Stock Exchange has been notified of the company's desire to list \$450,000 additional preferred stock, which would bring the total up to the full authorized amount of \$1,250,000, but there is no intention to issue beyond the \$200,000 just sold.

Windsor Hotel.—At the Windsor Hotel annual meeting Mr. Herbert Molson was elected to the board, replacing Mr. W. S. Weldon, who retired some months ago. The other directors elected were: Messrs. Henry Joseph, president; F. L. Wanklyn, vice-president; N. J. Dawes, J. M. McIntyre, Charles Cassils Cross and Herbert Molson.

The reorganization plan, under which holders of stock in the old company surrender their shares and receive in exchange two fully paid-up shares in the new Windsor Hotel Company, is meeting with the hearty approval of the shareholders, according to reports made to the meeting, over ninety per cent. of the stock having been converted so far. As soon as all the stock is exchanged the old company automatically goes out of existence. Under this plan of re-financing, the capital of the company will be increased to \$3,000,000.

British Canadian Fire Insurance Company.—The first annual meeting of the British Canadian Fire Insurance Company was held at Victoria, a large number of shareholders being present. The following officers and directors were

elected:—President, Mr. F. C. Cook, director of the Bankers' Trust Corporation, Limited, Western Union Fire Insurance Company, and president of the Title Holding Company; vice-president, Mr. A. G. Sargison; directors, Messrs. John Mowat, president of the Globe Realty, chairman of the Victoria Real Estate Exchange; E. W. Whittington, of Moore and Whittington; G. A. Kirk, manager Turner-Beeton Company; Noah Shakespeare; R. L. Drury; J. O. Hearn, treasurer and general manager Negotiators, Limited, and Aldermen Baker and Gleason. Mr. Henry S. Angus, under-writing manager for the Hudson Bay Fire Insurance Company, was appointed manager. Before coming to this country he was connected with the Commercial Union, London, England, of which his father is manager of branches.

White Pass and Yukon Railway.—The net profit of £25,800 shown by this company in respect of the year ended June 30 last, which is arrived at after providing for debenture interest and all other charges, compares with £33,400 for 1910-11. Including £9,200 brought forward, the credit balance now to be dealt with is £35,000, out of which the full sinking fund instalment on the 5 per cent. consolidated debenture stock, together with the sinking fund for the branch line bonds, have been provided. The directors now recommend a dividend of 1 per cent., the same as for 1910-11, leaving £3,400 to be carried forward or £5,800 less than was brought into these accounts. It will be observed that, so far as earnings are concerned, the period under review was not particularly satisfactory, but during the current year the decision of the Canadian Railway Commission in March last to rescind the order to reduce the company's rates has benefited the operations materially, a substantial increase over the corresponding period having already been secured.

Belding, Paul and Corticelli, Limited.—The first fiscal year for the Belding, Paul and Corticelli, Limited, ends November 30th. While the statement for the year is not accessible it is understood that the earnings of the company will be shown as even greater than anticipated. As one of the newer of the big industrial stocks much interest is attached to the forthcoming announcement.

The standing of Belding, Paul, Corticelli, Limited, is:—
Capital—Common, \$1,250,000; sub, \$750,000; paid-up, \$750,000. Preferred, \$1,250,000; sub, \$850,000; paid-up, \$850,000.

The average earnings for the past nine years up to May 21st, 1910, of the three companies now merged totalled \$120,161.60.

On April 10th, 1911, Mr. Frank Paul, president, estimated that the new company would effect economies of at least \$60,000 over and above the average earnings. He estimated earnings as follows:—

Surplus	\$180,000
Less deferred interest	37,500
Less preferred interest	59,500
Leaving a surplus of	\$83,000

La Rose Mining Company.—The statement of earnings of the La Rose Mining Company for the month of October, and the ten months ending October 31, presents a satisfactory showing of earnings, profits and surplus.

The main items for October are as follows:—
Production of silver, 240,203 oz, gross value \$ 151,951
Sundry income 9,448 |

Total income \$ 161,399
Operating expenses: Marketing and concentration . 64,307

Profit \$ 97,092

For the ten months the showing is as follows:—

Production of silver, 2,272,584 oz. gross value ... \$1,403,545
Sundry income 29,535 |

Total \$1,433,080

Market, concentrating and operating expenses ... 655,784

Profit \$ 777,296

The surplus in cash amounts to \$1,328,293.85, with other surpluses, such as comprised in outstanding shipments, and ore on hand and ready for shipment to a value of \$320,587.62. Combined this makes a surplus of \$1,658,881.47.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Sarnia, Ont.—November 20.—Mr. Eacrett's store. Loss and cause unknown.

Langdon, Alta.—November 28.—Conflagration. Loss \$35,000. Cause, stove.

Cundles, Ont.—November 22.—Mr. Woodrow's residence. Loss and cause unknown.

Woodstock, Ont.—November 25.—Hospital for Epileptics. Loss and cause unknown.

Orangeville, Ont.—November 21.—Mr. J. Best's barn. Loss unknown. Cause, spark.

Grenville, Ont.—November 22.—Board and Pulp factory. Loss slight. Cause unknown.

Durham, Ont.—November 28.—Mr. D. O'Connell's barn. Loss unknown. Cause, upset lantern.

Rednerville, Ont.—November 27.—Mr. W. H. Brickman's residence. Loss and cause unknown.

Montreal, Que.—November 29.—34 Vitre Street, St. Louis. Loss unknown. Cause, gas explosion.

Jerseyville, Ont.—November 26.—Mr. H. Hunter's residence. Loss \$3,500. Cause unknown.

Weyburn, Sask.—November 22.—Dr. Mitchell's residence. Loss \$24,000. Cause, defective chimney.

Midland, Ont.—November 22.—Mr. J. A. Letherby's lumber yard. Loss \$1,800. Cause unknown.

Markham, Ont.—November 28.—Ontario Farm Company's mill. Loss \$5,000. Cause unknown.

Ottawa, Ont.—November 27.—Mr. Finless' residence, 259 Albert Street. Loss \$65. Cause unknown.

New Glasgow, N.S.—November 27.—Mr. W. P. Neil & Company's offices. Loss and cause unknown.

St. Catharines, Ont.—November 28.—Mrs. J. McLaren, 74 Lake Street. Loss \$500. Cause unknown.

Stratford, Ont.—November 29.—Mr. J. Thorpe's residence, Erie Street. Loss slight. Cause, sparks.

Bishop's Crossing, Que.—November 25.—Mr. D. Lassell's residence. Loss unknown. Cause, hot ashes.

Niagara Falls, Ont.—November 28.—Mr. H. Buckley's store, Ontario Avenue. Loss and cause unknown.

Bracebridge, Ont.—November 29.—Mr. W. Goggin's residence, Manitoba Street. Loss and cause unknown.

Dunnville, Ont.—November 29.—Mr. T. McQuillen's barn, Forks Road. Loss \$1,000. Cause unknown.

Dryden, Ont.—November 29.—Dryden Timber, Power and Pulp Company. Loss \$1,000. Cause unknown.

Kingston, Ont.—November 28.—Mr. L. Abramson's fire, 220 Queen Street. Loss \$150. Cause, burning paper.

Peterboro, Ont.—December 2.—Mr. C. Cameron's clothing store, George Street. Loss and cause unknown.

Cananoke, Ont.—November 26.—Parmenter and Bullock's shops, Mill Street. Loss slight. Cause unknown.

New Westminster, B.C.—November 21.—Drayton Harbor Shingle Company's drying kiln. Loss and cause unknown.

Guigues, Que.—November 30.—Mr. T. Breen's cheese-box factory. Loss \$11,000. No insurance. Cause unknown.

East Flamboro, Ont.—November 25.—Mr. R. M. Breckenridge's barns. Loss \$3,000. Cause, supposed upset lantern.

Swan Lake, Man.—November 28.—Mr. C. K. Wilson's residence, one mile south of the town. Loss and cause unknown.

Strathmore, Alta.—November 21.—Mr. C. O. Bray's farmhouse, one-half mile south of the town. Loss \$1,000. Cause unknown.

Petrolia, Ont.—November 22.—Lambton Packing Company's evaporator. Loss \$400, covered by insurance. Cause unknown.

West Lorne, Ont.—November 29.—Mr. A. Monteith. Loss unknown. Cause, defective chimney.

Kentsville, N.S.—November 29.—Mr. J. Tobin's barn, Chapel Hill. Loss unknown. 6 horses were burned. Cause, upset lantern.

Calgary, Alta.—November 29.—Mr. Kellat's residence, Elbow Avenue. Loss \$500. Cause, supposed children playing with matches.

New Westminster, B.C.—November 22.—Mr. W. T. Cooksley's residence, 4th Avenue and 8th Street. No loss. Cause, chimney fire.

Pictou, Ont.—November 24.—Mrs. A. Griffith's farmhouse, Lot 2nd Concession north of Carrying Place, Hallowell. Loss and cause unknown.

Winnipeg, Man.—November 29.—Mr. J. Kelly's residence, 760 Marion Avenue. Loss \$400. Cause unknown; 1578 Elgin Avenue, Weston. Loss and cause unknown.

Moose Jaw, Sask.—November 23.—Mr. G. Antill's residence, 100 High Street. Loss and cause unknown.

November 26.—Shack on Manitoba Street. Loss and cause unknown.

Brantford, Ont.—November 26.—O'Keefe Brewing Company's premises. Loss slight. Cause, gas stove.

November 27.—Mr. F. Trenwith, 140 Oxford Street. Loss \$200. Cause unknown.

Hamilton, Ont.—Mr. W. A. Butler's residence, 224 John Street N. Loss small. Cause, children playing with matches; Mr. J. Warburton's residence, 75 Princess Street. Loss unknown. Cause, dropped match.

Chilliwack, B.C.—Mr. J. H. Keith's residence, Lickman Road. Loss and cause unknown.

November 20.—Mrs. Crossman's residence, Westminster Street. Loss and cause unknown.

Saskatoon, Sask.—November 20.—McMillan and Blain's new building, Great West Furniture Company's warehouse.

November 21.—Chown Lee's restaurant. No loss reported in these fires.

November 23.—Mr. A. H. Shannon's real estate office. Loss \$15. Cause, hot ashes.

Fort William, Ont.—November 24.—Mr. Haywood's residence, 209 Powley Avenue. Loss and cause unknown.

November 27.—Messrs. Gavin and Kerrs, 118 North Street. Loss small. Cause, hot ashes; 229 St. Marks Street. Loss \$150. Cause, overheated furnace pipe.

November 29.—Grand Trunk collision. Loss about 6 cars wheat and flax.

Edmonton, Alta.—November 23.—Wellington Block. Loss unknown. Cause, overheated furnace pipe; 14 Woodward Street. Loss unknown. Cause, hot ashes.

November 24.—Acme Tin Shop, Tenth Street. Loss unknown. Cause, hot ashes; German newspaper office, corner Kinisto and Bellomy Streets. Loss unknown. Cause, hot ashes.

Toronto, Ont.—November 20.—86 Hastings Avenue. Loss \$50. Cause, overheated stove.

November 23.—American Fire Company, 196 King Street West. Loss, contents \$15; building \$25. Cause unknown; 489 Manning Avenue. Loss \$35. Cause unknown.

November 25.—30 Dale Avenue. Loss \$25. Cause, defective chimney.

November 29.—St. Martin's Church, Macaulay and Perth Avenues. Loss, building \$1,000; contents, \$200. Cause, overheated stove.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED.

Yorkton, Sask.—November 4.—Imperial Elevator and Lumber Company's stables. Loss \$10. Cause, explosion of lantern.

Qu'Appelle, Sask.—November 5.—Mr. C. R. Dealy's residence. Loss, contents \$300, building \$400. No insurance. Cause unknown.

Sault Ste. Marie, Ont.—November 19th.—The Northern Building Material and Iron Company's material. Loss \$400. No insurance. Cause unknown. Building owned by The Superior Oil Company.

CANADIAN PACIFIC FINANCING

The Minister of Finance told the House, that in August last the Canadian Pacific Railway petitioned the governor-in-council for permission to increase the capital stock by \$75,000,000. President Shaughnessy, while the application was pending, intimated verbally that the company would, in addition, increase its common stock by \$60,000,000, under authority of its charter. This was done on October 2nd last. The application for the \$75,000,000 issue is still pending.

On August 13, President Shaughnessy wrote the prime minister, enclosing a copy of a resolution passed by the board of directors on August 12, asking permission to make the \$75,000,000 issue, raising the Canadian Pacific Railway's capitalization from \$200,000,000 to \$275,000,000.

While admitting that a percentage of the money required to keep pace with the country's expansion could be provided out of surplus earnings, and from other sources, the president added that "but by far the largest portion must be secured by the issue and sale of the company's ordinary share capital."

Hon. George H. Perley, acting for Premier Borden in the latter's absence in England, replied two days later in a letter that he "would take up the matter with the finance minister in a few days."

VANCOUVER'S OCTOBER FIRE LOSS

The fire department responded to fifty alarms in all during October, the total amount of damage by fire for the month being \$28,790. The fifty alarms were divided as follows: Fires inside city limits where damage occurred, 19; small fires where no damage resulted, 12; smoke scares, 3; fires outside city limits, 1; false alarms, 9; chimney fires, 6. The value of property involved was \$162,900; \$27,202 insurance was paid on the losses, leaving the loss above insurance \$1,588. The most serious fire the department had to contend with occurred on October 3rd, when the dry kiln at the Vancouver Lumber Company's plant was destroyed. A heavy westerly wind was blowing at the time, driving the flames in the direction of the plant, and the department were fortunate in confining the blaze to the building where it originated. The total amount of hose laid during the month was 15,950 feet, while 1,087 gallons of chemical was used. A complete list of fires where damage occurred follows:—

October 1st—Telephone alarm at 3.02 p.m. Fire at 128 and 132 Hastings Street East. The blaze started in a restaurant on the second floor of 128 from a defective stove and spread to the roof, and also set the roof of the adjoining building on fire before it was extinguished. No. 128 was owned by R. J. Cameron and occupied by a tailor shop, with Chinese restaurant above, and 132 was owned by T. M. White, and occupied by the London Chop House and furnished rooms above. Damage, \$1,489, partly covered by insurance. Telephone alarm at 10.30 p.m. Fire in a two-story frame building at 425 Dufferin Street West, owned by Mrs. Stanford, and occupied by W. Holt, glass dealer, and the Vancouver Beveling Company. The blaze started in the rear on the second floor in the premises of the Vancouver Beveling Company's plant from some cause unknown, and did considerable damage to both building and contents before it was brought under control. Damage, \$1,300, partly covered by insurance.

October 3rd—Telephone alarm at 2.30 p.m. Fire in dry kiln at the Vancouver Lumber Company's plant, False Creek, caused by sparks from open burner. A strong westerly wind was blowing at the time, and both building and contents were totally destroyed, but the efforts of the department were successful in confining the blaze to the dry kiln. Damage, \$18,500, covered by insurance. Telephone alarm at 5.58 p.m. Small fire at 129 Harris Street, caused by an overheated furnace. Building owned by A. E. Suckling and occupied by Mrs. A. M. Foster. Damage, \$5.

October 4th—Alarm from Box 847 at 9.32 a.m. Small fire around chimney on roof at 4077 St. George Street, caused by a defective flue. Building owned by L. David and occupied by E. Gravell. Damage, \$3. Telephone alarm at 1.30 p.m. Fire on roof at 530 Burrard Street, caused by sparks from chimney. Building owned by S. Gintzburger and occupied by Mrs. Schmidt. Damage, \$75, partly covered by insurance.

October 5th—Telephone alarm at 7.25 p.m. Fire in three-story brick building at 2020 Granville Street owned by Mrs. Kate Moore and occupied by F. E. Bestland, and used as a furniture store, with furnished rooms above on the two top flats. The fire started in some mattresses under the stairway from some cause unknown and was confined to the first floor. Damage, \$1,100, covered by insurance.

October 8th—Telephone alarm at 2.15 a.m. Fire in three-story brick building at the south-east corner of Eighth Avenue and Heather Street, owned by S. Beaumont and occupied by Mr. Harris bake shop; S. T. Marsden, grocer, and S. Beaumont, furnished rooms. The fire started in the bake shop from some cause unknown and spread through the upper floors before it was brought under control, considerable damage being done to both building and contents. Damage, \$7,077, partly covered by insurance. Alarm from Box 139 at 12.50 p.m. Small fire in automobile owned by Captain Roberts at the corner of Hastings Street and Heatley Avenue, caused by back-fire in carburetor. Damage, \$5.

October 9th.—Alarm from Box 847 at 7.55 p.m. Fire in rubbish in upstairs rear room at 3904 Fraser Avenue; cause unknown. The building, which is owned by Mr. Munroe, was vacant at the time. Damage, \$5.

October 10th—Telephone alarm at 4.10 p.m. Small fire in floor of vacant house at 783 Sixteenth Avenue West, caused by children playing with matches. Building owned by George Eaton. Damage, \$5.

October 11th—Telephone alarm at 2.25 p.m. Small fire in wall at 143 Dufferin Street East, caused by a defective chimney. Building owned by D. Lamb and occupied by Lee Wang, and used as a laundry. Damage, \$5.

October 15th—Telephone alarm at 2.23 a.m. Fire in wood-box alongside stove at rear of 831 Granville Street; cause unknown. Building owned by Powis & Boughton and occupied by N. J. Sterner, and used as a millinery store. The stock was damaged by smoke. Damage, \$431, covered by insurance.

October 19th—Telephone alarm at 12.15 a.m. to 2134 Thirteenth Avenue West, where an electric iron in the

pantry had burnt a hole through the cabinet. Building owned and occupied by G. Miller. Damage, \$50, covered by insurance. Telephone at 10.15 p.m. Small fire in bedroom at 711 Cambie Street, caused by washstand being placed too close to fireplace. Building owned by Morden & Thornton, and occupied by Mr. Baldry. Damage, \$30, covered by insurance.

October 21st—Verbal alarm at 10.26 a.m. Small fire in kitchen at 1823 Bismark Street, caused by an overheated stovepipe. Building owned and occupied by T. Lancaster. Damage, \$15, covered by insurance.

October 28th—Telephone alarm at 11.35 a.m. Small fire under grate at 1138 Cardero Street, caused by a defective fireplace. Building owned by M. J. Conlin and occupied by H. L. Virgil. Damage, \$5.

Total number of alarms, 50; false alarms, 9; chimney fires, 6; value of property involved, \$162,900; loss \$28,790; insurance paid, \$27,202; loss above insurance, \$1,588; hose laid at fires, 15,900 feet; chemical used, 1,087 gallons.

BANK OF MONTREAL'S ANNUAL MEETING

Once again the shareholders of the Bank of Montreal were presented at the annual meeting with a gratifying statement respecting the year's operations. The profits for the year ended October 31st, after making the usual deductions, were \$2,518,408. Adding that to the balance of profit and loss account at the end of last year, amounting to \$1,855,185, and to premiums on new stock \$834,322, there was a sum available for distribution of \$5,207,916. The shareholders received in dividends and bonuses almost one-third of that amount, or \$1,894,101. In addition to the regular annual dividend of 10 per cent., a bonus of one per cent. was paid on June 1st and another on December 1st. The reserve was credited with \$1,000,000, that account now being \$16,000,000, a similar amount as capital stock. The contingent account was credited with \$1,000,000 and \$511,000 was expended on bank premises. There remained a substantial balance of \$802,814 of profit and loss account. In June it will be remembered an increase of \$9,000,000 in the capital stock of the bank was authorized, making the total authorized capital \$25,000,000.

The deposits of the Bank of Montreal remain at a large sum. At the end of October they totalled \$187,000,000. Deposits not bearing interest showed a small decrease, occasioned by the withdrawal of a large deposit of a temporary nature which appeared in the statement of a year ago. Were it not for this fact, the bank would show a gain in these deposits of \$2,000,000. Interest-bearing deposits show an increase of \$6,400,000. Part of this increase is of a temporary character, but it is gratifying to find that the ordinary savings deposits have grown in a satisfactory manner, notwithstanding the withdrawals that have taken place for investment and otherwise.

Current loans and discounts in Canada and elsewhere and other assets are \$2,200,000 less. This decrease does not represent a curtailment of current loans in Canada, which are in reality \$1,600,000 larger than a year ago, but a reduction in current loans elsewhere. Investments in railway and other bonds are \$1,600,000 less, affected by realizations, and balances due by agencies of this bank and other banks show a net reduction of \$3,800,000. The increase in call loans in Great Britain and the United States is accounted for by the various changes mentioned above.

Following the practice of the British and colonial banks, the Bank of Montreal show, in the form of a footnote, the contingent liabilities and the securities held against them. This item has not heretofore appeared in the annual statement.

The annual statement of the bank is undoubtedly a strong one. Mr. H. V. Meredith, the capable general manager, said that it was well that the Bank of Montreal should always be able not only to meet all the legitimate demands of its clients, but at the same time to provide for any exceptional call that may be made upon it to promote the general welfare of the country. These two functions, it is generally conceded, have been well performed by the bank during the past year.

ORIGIN OF FIRES

A tabulation has been made by the Texas State Insurance Board of the origin of all fires reported to it. The tabulation now covers 20,000 fires. The fires in dwellings, apartments, boarding houses and the like number 8,954, and of these 82.4 per cent. are scheduled by the board as due to preventable causes. Exposures lead the list with 16.2 per cent.; flues with 16.1; stoves and heating with 10.5; and sparks on roof with 5.1 per cent. The fires in mercantile risks and special hazards number 10,720, of which 65.6 per cent. were scheduled as preventable. Exposures were charged with 29 per cent.

REGULATION OF TRUST COMPANIES

CURRENT TRADE CONDITIONS

Restriction on Semi-Banking Operations is Proposed in Bill Before Quebec Legislature

One of the important government bills to be submitted to the Quebec legislature this session is that governing the powers of trust companies.

Clauses Regarding Deposits.

Here are some of the provisions of the bill:—

1. No company shall borrow money by receiving deposits or by issuing bonds or debentures by whatever names such bonds or debentures may be described.

2. Whenever money is entrusted to a company for the bona fide purpose of having such money invested by the company in its capacity of trustee or agent, the fact of the company guaranteeing the payment of such money or of the interest thereon at an agreed rate of interest at fixed dates shall not constitute a loan or an issue of bonds or debentures forbidden.

3. A company may, however, borrow or issue bonds or debentures to an amount of not more than seventy-five per cent. of its paid up capital, in order to construct buildings, for its own use, in whole or in part.

Powers of Trust Companies Defined.

Then follow several clauses in the bill defining the powers of trust companies which authorize them, for instance, to invest money in bonds, or obligations of any incorporated company when secured by hypothec, etc. It is added:—

A registered company may also invest money belonging to persons, firms, or corporations, having the right to freely dispose of their property in the manner mentioned in the instrument creating the trust.

An interesting clause in the bill states the proportion of the shares to be held by provincial interests. This clause reads:—

At least three-fourths of the shares issued by a company incorporated after the coming into force of this section shall be held by persons domiciled in the province or by companies incorporated in virtue of the laws of the province.

Liability of Officials.

The officials of a trust company are to be held as liable to imprisonment as an individual doing any unlawful act as the following clause states:

The president, the vice-president, the secretary and the manager of a registered company, and, in the case of an extra provincial or foreign company its chief agent in the province, are personally subject to coercive imprisonment in cases where individuals exercising the functions which the company exercises would be subject thereto.

Another clause requires that no trust company shall carry on business in this province unless it is registered in the office of the provincial treasurer. Trust companies being solvent and incorporated by virtue of the laws of the province may be registered, and: "extra provincial trust companies that issue permanent stock only and have a subscribed capital stock of at least \$500,000, of which at least \$100,000 has been paid up, foreign trust companies, but only on the terms and conditions fixed by the lieutenant-governor-in-council."

The bill contains a heavy penalty liable to be imposed on those who violate the act. The fine is fixed at \$200 or three months' imprisonment for every manager, director, officer or agent of a trust company and every trust company, which, in violation of the provisions of this subsection undertakes or transacts or offers or attempts to undertake or to transact, or which advertises or solicits any business, or which collects or receives money within the meaning of this section, is guilty of an offence, etc.

Government Inspection of Operations.

Other clauses in the bill provide for the government inspection of the operations of trust companies and a new official is to be appointed who is to be called the inspector of trust companies. To defray the expenses of the inspector's office the registered companies shall pay annually to the provincial treasurer a contribution of not more than \$4,000. Each registered company is required to file an annual report of its operations for the year preceding, which report shall contain a list of its officers and members, a statement of its authorized capital, a statement of its subscribed capital, a statement of its paid-up capital, a statement of the assets and of the liabilities of the company, a statement showing the dividends declared and paid, and such other particulars as the provincial treasurer may require.

Groceries in Much Demand—Stringency in Monetary Market Continues—Business is Generally Good

The recent heavy snowstorm hastened the close of navigation somewhat, but there are still eight or ten ocean liners to clear for sea, and the last actual sailing from Montreal is timed for about December 2. In most lines of trade wholesale business, states Duns, continues satisfactory. In dry goods spring dating went into effect on the 25th and business has been brisk. Values all rule firm and American quotations for indigo drills, ducks, etc., are advanced 2½ per cent. Groceries show a good movement, more especially in dried fruits, nuts and canned goods, but complaints are frequent of slow deliveries by railways and cartage companies. California muscatels are quoted at lower figures. Sugars are steady at \$4.75 for standard granulated. Hides are steady at the late advance. Receipts of green hides have been quite liberal of late, but they seem to move off freely. In some cases tanners are reported quoting up to 29c. for manufacturers' No. 2 sole and 31c. for jobbers' sole—figures hitherto unequalled. The snow has not tended to improve traffic conditions in the country, but collections as a whole are described as very fair. There is no relaxation in the loan market, nor will there probably be till after the turn of the month.

Remittances are Satisfactory.

Wholesale trade in Toronto is good. More seasonable weather has helped the turnover in heavy lines of dry goods and furs, and the dealers in these descriptions of merchandise are more hopeful. There is a fair sorting-up demand in general dry-goods and retail trade is active. Prices are very firm, including linens, woolsens, and cottons. On the whole, remittances are satisfactory. The movement of grain in the West up to date has been heavy, but the congestion at the upper lakes for eastern markets has as yet not been relieved. Trade in hardware and metals has been good, with prices firm all round. Much new building has been contracted for, but the stringency of the money market may delay work to some extent. There is a fair movement in groceries, with prices generally firm. Leather is in good demand, with prices as strong as ever. Hides are unchanged. The wheat market is a little firmer on the strength of cables from Continental markets. Provisions are in moderate request and butter and eggs very firm.

Industrial Activity is Shown.

The week has been without special incident in local Quebec wholesale circles, the majority of merchants being still busy. Dry goods bookings for spring trade are satisfactory and sorting-up orders are fairly numerous. In groceries the movement is satisfactory, with the leading staples firm. Boot and shoe manufacturers continue busy and the leather market is firm. Other industries are also well employed. While roads in certain parts of the country are reported as being in rather unsatisfactory shape, trade as a whole does not appear to have been appreciably affected. Retail city trade is good and remittances are up to the average for this season of the year.

Business is very good and prospects for a large holiday trade appear favorable at Hamilton. Building operations are being rushed, but it is thought there will be considerable unfinished work this year. The local markets are well supplied and prices remain steady.

Various Conditions in Western Canada.

With settled mild weather at Winnipeg, the heavy forward movement of grain is expected to continue far beyond the usual period. Realty sales continue at high figures and farm lands are in good demand, the low prices of grain having little apparent effect. Clothing and furs are rather quiet, provisions and groceries are moving freely and sales of holiday goods are fully up to expectations. Money is hardening and collections are not better than fair. At Saskatoon the grocery trade is larger than a year ago and a good business is already commencing in holiday goods. Most of the crop has been moved and farmers have marketed as fully as conditions would permit. The weather at Edmonton has had a retarding effect on general trade, but favors building operations, and cash is coming in better than last year, indicating fairly satisfactory conditions.

SASKATOON'S LOAN OVER-SUBSCRIBED

The city of Saskatoon's loan in London of £400,000 five at 90½ has been over-subscribed and the list closed in advance. Considering the large amount of Canadian treasury bills now afloat, and the urgent needs of several Canadian municipalities, the result is welcomed with relief, says a cable to the Montreal Star. Saskatoon's price is generally regarded as right.

The Wroxeter Rural Telephone Company's capital stock has been increased from \$25,000 to \$40,000.

DECEMBER FIRES

Carp, Ont.—December 3.—Mr. F. E. Argue's store. Loss \$25,000. Cause unknown.

Evanville Ont.—November 29.—Mr. A. Mills' warehouse. Loss and cause unknown.

Clive, Alta.—November 24.—Mr. H. Thomas' house and barn. Loss and cause unknown.

Montreal, Que.—Mr. A. Peltier's grocery store, 176 Breboeuf Street. Loss \$150. Cause, upset lamp.

North Bay, Ont.—November 23.—Mr. A. T. Smith's store. Loss and cause unknown.

Vancouver.—November 25.—Building on Beatty Street. Loss \$2,500. Cause unknown.

Parry Sound, Ont.—November 27.—Mr. J. Tuck's residence. Loss and cause unknown.

Bolssevain, Man.—November 27.—Mr. P. Fine's residence. Loss and cause unknown.

Chatham, Ont.—December 2.—Mr. H. Peel's residence, Raleigh Township. Loss and cause unknown.

Niagara Falls, Ont.—December 2.—Mr. J. Quagliarello's store. Loss unknown. Cause, electrical defects.

Peterboro, Ont.—December 2.—Mr. N. C. Cameron's clothing store. Loss \$6,000. Insurance \$3,000. Cause unknown.

Ottawa, Ont.—December 3.—Peerless Garage. Loss unknown. Cause, lighting lamps. Street car. Loss and cause unknown.

South Vancouver, B.C.—November 26.—P. C. Hughes' residence, Prince Albert Street and 36th Avenue. Loss and cause unknown.

Yarmouth, N.S.—November 28.—Mr. W. H. Gridley's residence, Pleasant Street. Loss unknown. Insurance, Royal \$500. Cause unknown.

Calgary, Alta.—November 26.—Cottage on Fifth Avenue West. Loss \$5. Cause, hot ashes.

November 27.—1319 First Street West. Loss unknown. Cause, overheated pipes.

Renfrew, Ont.—November 23.—Mr. W. A. Moore's planing mill. Loss and cause unknown.

November 26.—Renfrew Knitting Company's factory. Loss slight. Cause unknown.

Fort William, Ont.—November 29.—Mr. E. H. North's residence, 227 Mark Street South. Loss, contents \$30, building \$107. Cause, overheated flue. Steamer "Jacques." Loss, freight \$1,500. Cause unknown.

Quebec, Que.—December 1.—Misses Lizotte's store. Loss \$150. Cause unknown.

Sandy Cove, N.S.—November 29.—Mr. W. L. Nicker-son's residence. Loss and cause unknown.

Medicine Hat, Alta.—December 2.—Mr. R. Mitchell's building, occupied by Messrs. Birnie Brothers, hardware, loss \$40,000; Messrs. Barker and Patten, men's furnishings, loss \$50,000; the Acme Restaurant and Messrs T. F. Dawson and Company, real estate offices.

Peterboro, Ont.—November 28.—Mr. J. McLaren's premises. Loss, contents \$100, building \$625. Insurance, contents, British American, \$500; building, Hartford, \$1,000. Cause, hot ashes.

December 2.—Mr. J. Quinn's hotel. Loss \$50. Insured with Hartford Company. Cause, grease on range.

Winnipeg.—November 25.—Stable at 1578 Elgin Avenue West. Loss and cause unknown.

November 27.—Mr. E. W. Darby's store, Main Street South. Loss and cause unknown.

December 2.—Mr. F. Waite's residence, 907 Bowring Avenue. Loss unknown, partially insured. Cause, defective chimney. 223-5 Garry Street. Loss and cause unknown.

Toronto, Ont.—November 30.—Trinity College. Loss \$50. Cause, spark.

December 3.—Mr. H. B. Latimer's laboratory, 508 Dovercourt Road. Loss unknown. Cause, supposed incendiary. Art Metropole, Yonge Street. Loss \$22,000. Cause unknown.

December 5.—Top story of Paul Building, 72-74 Bay Street. Loss about \$1,000. Cause, supposed defective wiring.

THIS COMPANY RESISTED MERGER WOOLING

Mr. J. A. McCrae, secretary-treasurer of the Sarnia Fence Company, in a letter to the press regarding statements made by Major J. A. Currie, of the Imperial Steel and Wire Company, in the House of Commons, says:—

"The major has denied all sorts of immaterial details, but neither in the House nor out of it has he had the hardihood to deny the essential parts of my statement: that he was endeavoring to form a merger of the wire fence interests; that he wanted the Sarnia Fence Company to join his proposed merger; that we refused, and that he assured us that he had inside information that a duty on fence wire would be imposed before the end of this year; that we would not be able to continue in competition with the steel interests with a duty on wire against us; and that he used

his position as a member of parliament to give greater weight to his allegations. These he has not denied, and cannot deny.

"The attitude of the Sarnia Fence Company," continues Mr. McCrea, "has been one of opposition to the renewal of the steel bounties, as well as opposing any change in the tariff on plain galvanized wire for fence purposes, and our opposition has absolutely no party significance. We have opposed it because we think further protection of the steel interests in Canada is unjustified and unfair to the people of Canada as a whole, and our views are backed by one hundred thousand Canadian farmers, who will resent further taxation on an article of so great importance to them as wire fence. We are accused of wanting further tariff protection against American competition, and we take this opportunity to say to the honorable members of the House, as well as the public, that we do not need nor do we now take advantage of the 15 per cent. tariff protection which is in effect on wire fencing. If plain galvanized wire for farm fence purposes is left on the free list, which will leave us free to purchase our raw material where we choose, we can manufacture wire fencing in Canada as economically as any place in the world, and we do not fear American competition on our finished product. The prices of the Sarnia Fence Company will prove that they are below the price of fence in the United States."

LIFE UNDERWRITERS AT OTTAWA

Ottawa Life Underwriters' Association held their semi-monthly meeting this week when Mr. C. H. Pepper gave an address on "Life Assurance from the Standpoint of Organized Labor." The speaker expressed his strong belief in straight line life insurance for all classes, and particularly for the working man. He deplored the fact that there were not more working men taking this class of insurance because, in his opinion, they were the ones who had the most to gain by carrying limited payment life or endowment insurance. He realized the difficulty life insurance men experienced in reaching the average working man for a personal interview. At the present time most of the working men had to be seen in the evening, which meant work all day and mostly every night for the insurance man. Mr. Pepper also pointed out that every time an agent gets a young man committed to an endowment policy he is conferring a benefit not only on that young man but also upon the community. It helps to provide him with sufficient capital to eventually start in business for himself and become an employer of labor rather than an employe, or it permits him to provide a home for himself that he could not otherwise hope to have.

At the close of his address, a vote of thanks was moved by Mr. C. R. Lavoie, of the Union Life, and seconded by Mr. A. E. Switzer, of the Manufacturers' Life, and Mr. A. J. Meiklejohn, of the Confederation Life.

Besides the speaker, those present were: President W. G. Keddie, Messrs. I. A. Mill, A. J. Meiklejohn, A. E. Switzer, H. G. Rouleau, F. O. Schryburt, George O. Morisset, W. Lyle Reid, W. M. Stevens, E. S. Ashfield, Charles R. Lavoie, W. J. Phillips, Archie La Moth, and the secretary, W. Merrill Eastcott.

Applications for membership were received from F. C. Schryburt, representing the Confederation Life, and George O. Morisset, superintendent for Ontario of La Sauvegarde.

MODERN COMMERCIAL REQUIREMENTS

Include Systematic Keeping of Records—Cost Accounting—Value of Simple Working System

By W. J. McCoy.

In order to keep any kind of a record of business transactions, it is necessary to use some kind of a system. In order to keep a complete and accurate record of affairs, so that one is able to show at the close of the year, or period, the assets and liabilities, it is necessary to obtain a system suited to the needs of the particular business. This has been overlooked by many business men, and often by accountants.

It has been shown that there are rarely two systems alike. One office will have one system, while another office, conducting the same or a similar business, will work on similar lines perhaps, but not exactly the same. There are several reasons for this, one being that this business man wishes to have much detail, combined with absolute accuracy of records, while the other man would not be so particular.

It is surprising to see the number of offices lacking system, and to note the loose manner in which some business offices are conducted. This may be accounted for in several ways.

The question of the cost of installing the system is possibly the principal one. One man will call in a systematizer, and may pay him fifteen dollars per day, or in some cases more, and will have his office systematized in such a manner that at the close of the month the business man can ascertain the exact condition of his affairs, while on the other hand some men will consider this too much to pay to a systematizer.

Work of Office Systematization

The writer has had one experience of the latter kind. Upon being requested to give a price on the systematizing of an office, and upon giving the figure which would be charged, it did not appear to appeal to the possible client, and later this gentleman offered to pay exactly half of the figure asked, and it is needless to say the offer was refused, as this man's affairs were then in such a state as would require weeks of work to straighten. Men who conduct their business in this manner generally come to the conclusion that it is absolutely necessary to obtain the services of a systematizer, with their enhanced value.

There are many arguments in favor of system, and none against excepting that some would consider the cost of installing an argument against this branch of the business. It may be thought that in systematizing an office an accountant will bring with him methods which will necessitate such minute attention and will be so complicated that it will mean practically training themselves for some time, in order to meet the demands of the system. This is a mistaken idea, for while a good system may need more attention than the makeshift which had been in use previously, it does not necessarily follow the system means complication. System is merely a matter of ideas. Not all accountants can systematize, for it is becoming a branch of business all by itself. While one accountant might be a perfectly competent auditor, he might not have sufficient ideas, combined with his training, to make him a good systematizer.

In placing a system in an office, a good systematizer will make simplicity the key-note, and proceed to work on that basis.

Manufactories and Land Accounts

In the case of a factory, it is necessary to have a method of costs, in order to obtain the costs on the various articles manufactured, and if the system in force is not both simple and suitable, an exorbitant figure may be charged for the goods, and as a result business is lost, or sufficient may not be charged to give the firm a reasonable profit. The cost system must be worked in such a manner as to dovetail with the work in the office, and enable a balance sheet to be obtained showing the exact condition of affairs.

There is another business which, while not the hardest, requires some little attention, and that is the real estate, where they deal in sub-divisions, and where payments are scattered over a period of, in many cases, four or five years. In this business it is necessary to keep in close touch with your collections, and the dates upon which they fall due, and also be in a position to tell at the close of the month how much money is still outstanding in the form of "accounts receivable."

Out of the first payments the salesman usually get their commissions, and it is therefore necessary to keep their accounts accurately, for while the average salesman does not carry books, he can usually tell you how much you owe him, and if he makes a claim which you do not see fit to recognize, you have to be in a position to show him in writing. Many real estate concerns are in trouble over this same question, and this is surprising when it is necessary to use a simple method only in order to get good results.

Not Complicating But Simplifying

On one occasion a client argued that the system which the writer would place in his office would be too complicated, and require too much attention to detail. He was soon convinced that it was the reverse, and that his present system required attention and a remarkable memory, and if the bookkeeper was absent no one could give information about the condition of the business, and in addition to this the results could not be obtained as under the system suggested. This man now has a

system, and each month he can obtain a statement showing him the exact condition of his affairs, whether it shows profit or loss.

The day comes when the business man is confronted with the problem of making up a statement of his assets and liabilities, as shown by his books, sometimes in order to get accommodation from his bank, sometimes for other purposes. He then begins to realize that had the right system been used this statement could be taken from his books when required. He might get such a statement, under present methods, but it would entail so much work and be so uncertain that not only would a bank refuse it, but the business man himself would not be pleased with it.

The modern business man realizes the value of a good system, and that a good systematizer is worth his fee, and when this idea is generally accepted the accountant who can systematize will be much in demand.

ATLANTIC SUGAR REFINERIES

The Atlantic Sugar Refineries Company, organized by Mr. D. Lorne McGibbon, has completed its financial arrangements. The capitalization of the company will be:—

	Authorized.	Paid-up.
Bonds, 6 per cent.	\$1,500,000	\$1,000,000
Preferred stock	3,000,000	2,500,000
Common stock	7,000,000	3,500,000

Subscriptions to the preferred stock will commence January 1st, 1913, and are spread over a period of 13 months. Interest will be paid on the amount of cash paid in at the rate of 6 per cent. per annum, and dividends will accrue when the plant commences operations.

The public offering of stock is to be made by Messrs. N. B. Stark & Company, Montreal, and Messrs. Murray, Mather & Company, Toronto.

A public offering will be made of \$2,500,000 seven per cent. cumulative convertible preferred stock at 95 with a bonus of 35 per cent. common stock. The preferred is convertible into common stock, par for par, at the option of the shareholder.

Mr. McGibbon will be president and Mr. F. H. Anson, vice-president and managing director. Sir Thomas Tait, Hon. T. Chase Casgrain, Mr. H. J. Fuller, Mr. S. H. Ewing, Hon. Wallace Nesbitt (Toronto), Mr. W. R. Allan (Winnipeg), and Mr. F. H. Ward will act as the board.

By the time the company's plant is in operation, the consumption of sugar in Canada will probably be 9,000 barrels per day. If the new company gets one-sixth of this business, it will have a demand for 1,500 barrels per day, out of a capacity of 2,500 barrels, which on a minimum basis of profit of 50 cents per 100 pounds, will, for 300 working days, give an annual net profit of \$675,000. Bond interest will take \$60,000; preferred stock dividends \$175,000, leaving \$440,000 available for common stock.

PACIFIC COAST COLLIERIES

The Pacific Coast Collieries, Limited, has been formed to take over the Pacific Coast Coal Mines, Limited, one of the large operating coal mines on Vancouver Island. The company's capitalization will be as follows:—

Common stock	\$3,500,000
6 per cent. preferred stock	1,500,000
Bonds	3,500,000
	\$8,500,000

The preferred stock of the company has been placed and the underwriting of the bonds will be made through the Canada Securities Corporation, Limited, of Montreal, Toronto and London, England.

The company owns its own railways, docks, etc., and is at the present time shipping about 600 tons of coal per day from Boat Harbor and Suquash on the east coast of the island. The No. 3 mine of the company is almost equipped, and the company's production will probably be close to 1,500 tons per day in the early part of 1913. The company expect to produce in 1914 from the extensions contemplated over 2,500 tons per day. The company controls 20,000 acres of the best coal land on the island and on part of this area there has been over 115,000,000 tons of coal proven.

Mr. James Carruthers of Montreal is the president of the company, and associated with him are Messrs. Robert Bickerdike, M.P., of Montreal; Hon. Price Ellison, provincial treasurer of British Columbia, of Victoria; A. H. B. MacGowan, M.P.P., of Vancouver; R. T. Elliott, K.C., of Victoria, and Edmund Bristol, K.C., M.P.P., of Toronto.

Track-laying on the Edmonton, Dunvegan & British Columbia Railway is proceeding actively northward from Edmonton. It is understood that some 65 miles of steel is laid at present. The laying of steel on the main line of the Canadian Northern westward from the Pembina River has commenced, the big steel bridge over the Pembina having been completed.

MODERN LIFE INSURANCE SUPERVISION

Discussed by Company Presidents—Conservation of Energies of Field Men—Sacredness of Trusteeship

The sixth annual meeting of the Association of Life Insurance Presidents was held at New York on Thursday, and among the several addresses given in part were the following:—

After referring to the change of attitude of the public to the government, Hon. W. T. Emmet, superintendent of insurance, of New York, stated: The only supervision which will henceforth be tolerated is the sort that is called strict as distinguished from the sort that is called lax; and, with that for a starting point, we will endeavor to determine what the precise channels of strict supervision are through which, in the coming years, the energy and intelligence of state insurance departments can best be directed.

We shall find at the outset that by no means all of these channels have been defined by law at all. Even where they have been broadly laid out, there exists a good deal of unchartered middle ground where the question of how far departmental activities should extend is left, and necessarily must be left, to the discretion of the superintendent of insurance. Take, for instance, that very important branch of an insurance department's duty, the examination of companies. That is a duty imposed upon all supervisory departments by law, but the question of the thoroughness with which such examinations are conducted—the question of their scope and completeness—rests entirely in the discretion of the man who is at the head of the insurance department.

Depends on Spirit of Examination

Any sort of supervision—the most lax as well as the most strict—compels the department, we will say, to conduct a periodical examination of the companies, but the extent to which you as company men have any practical interest in the matter depends upon the spirit in which the examination is conducted. That isn't a matter of law at all. Now in this matter of company examinations, if we are correct in thinking that the spirit of the times requires strict supervision rather than lax, the duty of insurance departments for the future seems to be tolerably plain.

The standard which the New York department now tries to live up to in this regard is the one upon which the public may be expected to insist for many years to come. Examinations by American departments of supervision will never again be mere audits of company figures. Whether rightly or wrongly, they will never again stop with merely finding out whether or not a company is solvent. They will go into questions of management pure and simple, as distinct altogether from the question of solvency. Administrative matters will be discussed, economies will be suggested, the company's attitude toward its policyholders in the settlement of claims will be fully considered.

That is what the public now expects, and it will never, I think, be content with anything less.

Work of Insurance Departments

A well-equipped insurance department is capable of performing much legislative work, and the ideal insurance department of the future should be organized along lines which frankly recognized this as one of its most important occupations. It should devote not a little time each year to the killing of crude and ill-digested legislative proposals before they ever see the light of day in the legislature. It should be able to give expert consideration to the necessary changes in insurance law which suggest themselves to thoughtful people each year. In this sort of work it should co-operate with every responsible insurance interest having at heart the best development of the business. It should be prepared, when a session of the legislature commences, to lay before the law-making body, in proper form, the results of months of patient labor.

Publicity and Personal Responsibility

Mr. G. E. Ide, president Home Life Insurance Company of New York, spoke on the sacredness of trusteeship in the investment of life insurance funds. The fundamental principles essential in the administration of these stewardships, he said, were (1) publicity, (2) personal responsibility.

With these two checks and safeguards, we have about all that is needed in the way of restriction. If you can unite simple, plain and effective publicity with strict personal accountability, you are doing about all that can be done by legislation to enforce honest and careful conduct by the trustees.

The assets of companies doing business in New York State are invested approximately as follows:—

Real estate	4%
Bonds and mortgages.....	31%
Stocks and bonds.....	48%
Loans to policyholders.....	13%
Cash and miscellaneous.....	4%

Expand on Natural Lines

The assets of insurance companies have helped to build our cities, to construct our railways, to promote our industries, to develop our farms and to finance our municipal, our state and national governments. We can well afford to allow this divergence in investments to expand on natural lines. We must not

try to force it in one direction or another by artificial stimulus which will inevitably be followed by discouraging reaction.

We must remember always that the sole duty of life insurance trustees is a simple one; namely, to conserve as a sacred trust the enormous funds committed to their charge. They should not be persuaded by pressure from within nor mandates from without to invest in new fields until they have explored most thoroughly the unknown land.

Better Understanding of Insurance Principles

Let each company, singly or all of you collectively, determine that henceforth a religious, conscientious effort shall be expended in educating your direct representatives in the field—your managers and general agents—that they in turn may pass along a surer and safer and saner knowledge of human nature as well as the technical knowledge that they now are well provided with, was the advice of Mr. Darby A. Day, manager Chicago department Mutual Insurance Company of New York. Let your managers tabulate the number of men employed, the percentage who obtain mediocre success, the percentage who are ordinarily successful, and those who attain great success. Classify the efficiency of your field representation by this process of building and not by the volume of business that they produce, and time will evolve a better understanding of insurance, a more thorough acceptance of its principles and a greater business to all of the companies.

Companies and Railway Securities

In view of the fact that there is more or less advocacy of the view that a state should require a life insurance company doing business in its borders to invest a fixed percentage of its reserve held against policies issued to citizens of that state in securities which are local to that state, it is important to emphasize the proposition that railroad securities ought to be treated as local securities for the purposes of complying with any such state requirement, stated Mr. W. D. Hines, chairman of the executive committee of the Atcheson, Topeka and Santa Fe Railway.

ELECTRICAL DEVELOPMENT COMPANY TO ENTER UNITED STATES

The Electrical Development Company of Ontario and the Toronto Power Company will shortly commence work on the construction of a power transmission line, followed later by an electric railway, from Niagara Falls to Syracuse, New York, a distance of 162 miles. The plans have all been prepared by the companies' engineers and the right of way was secured some years ago.

The permit obtained by the Electrical Development Company and the allied interests from the United States Secretary of War, under the Burton Act of 1905, allows them to export to the United States 46,000 horsepower. At present the companies are exporting only 25,000 horsepower to the Niagara Falls Power Company, and this is being consumed in the cities of Niagara Falls, N.Y., and Buffalo.

The Electrical Development Company is developing at Niagara Falls 90,000 horsepower, of which 65,000 is being used in Canada.

OFFERING OF OFFICE BUILDING SHARES

The Legal and Financial Corporation, Limited, has been formed for the purpose of erecting a large office building on the south-east corner of Bay and Temperance Streets, Toronto, and to purchase from Mr. N. G. Heyd, Toronto, a lease of that property. The company will erect a modern fireproof building twelve storeys in height. They estimate that the structure can be erected and fully completed ready for occupation at a maximum cost of \$250,000. Their estimated expenditure and revenue account shows total gross revenue of \$96,725 and annual expenses of \$45,240, leaving available for dividends \$51,485. That is equal to over 17 per cent. on the paid-up capital stock of \$300,000.

The capital stock of the company is to be \$500,000, divided into 5,000 shares of \$100 each, all common stock, of which \$300,000 is to be issued. The amount to be subscribed before any allotment of stock is made is \$100,000. The company will not commence building operations until \$200,000 has been subscribed and \$40,000 paid thereon.

For their services in obtaining the lease and for forming, promoting and selling the stock of the company, a commission of 10 per cent. of the paid-up capital stock is to be paid to Messrs. Charles H. Rooke and Edward W. Bickle, said amount to be paid in capital stock of the company, this stock being included in the proposed paid-up capitalization of \$300,000.

The directors of the company are as follows: Messrs. A. J. Gough, vice-president Sellers-Gough Fur Company, Limited, Toronto; A. J. Russell Snow, K.C., Beaty, Snow and Nasmith, solicitors, Toronto; James E. Murphy, vice-president Vancouver Portland Cement Company, Limited, Vancouver; A. S. Butchart, vice-president Monarch Realty and Securities Corporation, Limited, Toronto; Dr. H. H. Pierie, Dundas; F. Gordon Dyke, solicitor's clerk, Toronto; and Daniel Lang, solicitor's clerk, Toronto.

INSURANCE, DOMINION AND PROVINCIAL CONTROL

Supreme Court is Considering Reference—Clauses in Dispute

The Supreme Court is considering the reference as to the business of insurance, the following questions being submitted:—

1. Are sections 4 and 70 of the Insurance Act, 1910, or any or what part or parts of the said sections, ultra vires of the Parliament of Canada?

2. Does section 4 of the Insurance Act, 1910, operate to prohibit an insurance company incorporated by a foreign state from carrying on the business of insurance within Canada, if such company do not hold a license from the Minister under the said Act, and if such carrying on of the business is confined to a single province?

License From Minister

The following are the clauses in question:—

"4. In Canada, except as otherwise provided by this Act, no company or underwriters or other person shall solicit or accept any risk, or issue or deliver any receipt or policy of insurance, or grant any annuity on a life or lives, or collect or receive any premium, or inspect any risk, or adjust any loss, or carry on any business of insurance or prosecute or maintain any suit, action or proceeding, or file any claim in insolvency relating to such business, unless it be done by or on behalf of a company or underwriters holding a license from the Minister."

"70. Every person who:—

"(a) In Canada, for or on behalf of any individual underwriter or underwriters, or any insurance company not possessed of a license provided for by this Act in that behalf and still in force, solicits or accepts any risk, or grants any annuity or advertises for, or carries on any business of insurance, or prosecutes or maintains any suit, action or proceeding, or files any claim in insolvency relating to such insurance, or, acting as an insurance agent, receives directly or indirectly any remuneration from any British or foreign unlicensed insurance company or underwriters; or, except as provided for in section 139 of this Act, issues or delivers any receipt or policy of insurance, or collects or receives any premium, or inspects any risk, or adjusts any claim; or

Not Resident in Canada

"(b) except only on policies of life insurance issued to persons not resident in Canada at the time of issue, collects any premium in respect of any policy; and every director, manager, agent, or other officer of any assessment life insurance company subject to Part II of this Act, and every other person transacting business on behalf of any such company, who circulates or uses any application, policy, circular or advertisement on which the words "Assessment System" are not printed as required by Part II of this Act; shall, on summary conviction before any two justices of the peace, or any magistrate having the powers of two justices of the peace, for a first offence, be liable to a penalty not exceeding fifty dollars and costs, and not less than twenty dollars and costs, and in default of payment, to imprisonment with or without hard labor for a term not exceeding three months and not less than one month; and for a second or any subsequent offence, to imprisonment with hard labor for a term not exceeding six months and not less than three months."

BREWERIES STOCK OFFERED

A block of \$115,000 7 per cent. cumulative preferred stock, with a bonus of 50 per cent. common stock, of Ready's Breweries, Limited, is being issued at par by Messrs. J. M. Robinson and Sons, Montreal. The company's capitalization is as follows:

	Authorized.	Issued.
First mortgage 25 year sinking fund bonds.	\$250,000	\$250,000
Preferred stock, 7 per cent. cumulative....	250,000	115,000
Common stock	250,000	115,000

With total assets of \$441,035.55, deducting the bond issue \$250,000, and preferred stock \$115,000, there remains a balance of \$76,035.55, representing an equity on the common stock issue of \$66 per share. A large increase in sales and profits is anticipated owing to the policy of the management and directorate and additional capital in the business. The capacity of the plant is 50,000 barrels per annum, and the net profits about \$3.50 per barrel. The present output is about 15,000 barrels.

The directors are as follow:—Messrs. James Ready, president and general manager; J. M. Robinson, of J. M. Robinson & Sons, bankers and brokers, St. John, N.B., and Montreal, and Joseph L. O'Brien, who has been for years connected with the business.

The Canadian Car & Foundry Company has contracted for about 10,000 tons of malleable foundry and 10,000 tons of basic iron with Buffalo furnaces for shipment over the first half of next year. The specific tonnage not reported. Some other additional sales of foundry iron are also understood to have been made for delivery in the Dominion.

REINSURANCE OF SOVEREIGN FIRE'S BUSINESS

Referee's Decision in Proceedings Between the Canadian Company and New York Trust Company

The Sovereign Fire Assurance Company of Canada, having decided to withdraw from the United States, negotiated re-insurance contracts of a small portion of its risks with the Citizens Insurance Company of Baltimore, and the large entire balance of its risks in the United States with the Globe and Rutgers Fire Insurance Company, of New York, by and with the consent and approval of the insurance department of the state of New York. It immediately served requisition, says the New York Journal of Commerce, upon its United States trustee, the New York Trust Company, for enough of its securities to pay the re-insurance premiums, which requisition was approved by the insurance department.

The trust company declined to honor it upon the ground that a disbursement for re-insurance was not one authorized by the insurance law, under which the deed of trust was executed.

Abrogated Trust Deed

The Sovereign offered to deposit additional funds to meet outstanding, but not due losses, but the trust company still adhered to its position. Thereupon the Sovereign immediately abrogated the trust deed, which action had the approval of the state insurance department. Notice was served upon the trust company with a demand that it immediately turn over to the superintendent of insurance all securities held by it under the deed of trust.

This was declined and thereupon the Sovereign commenced legal proceedings, through Mr. Arnold L. Davis, to compel the trust company to surrender these securities. A form of action in equity was agreed upon and in order that there might be a speedy decision the issues were referred to a referee, Mr. George Gordon Battle, to hear and determine. His decision has just been rendered.

Ample Security and Protection

It is to the effect that the United States branch of the Sovereign (which alone was under consideration) is entirely solvent, that its United States policyholders and creditors are afforded ample security and protection by the assets of this branch over and above all liabilities, that the proposed re-insurance of its outstanding risks was not only an act in the interest of its policyholders and for their protection, but was expressly authorized by the insurance law of New York State; that in abrogating the deed of trust and demanding the surrender of its securities to the superintendent of insurance, the Sovereign acted entirely within its rights and thereby insured to its policyholders and creditors in the United States ample protection.

The referee holds that this demand of the Sovereign should have been and must be granted.

VICTORIA'S BUILDERS ARE BUSY

When the building permit was issued for Victoria's new high school, costing \$416,750, the permits for structures aggregated \$7,217,000 to date since the beginning of the current year.

The total building permits for 1911 amounted to \$4,025,000.

With the permits for Oaklands and Quadra Street schools, costing nearly \$100,000, to be issued next month, and the many private residences and stores now being planned, the grand total will be over eight millions, or twice the total of permits for last year. Oak Bay, Victoria's important residential suburb, has constructed over one million dollars' worth of building this year.

Greater Victoria's permits, including Oak Bay, Esquimalt and South Saanich, amount to nearly ten million dollars.

OFFICE RENTS IN TORONTO

The following table gives some interesting figures respecting the rentals of large office buildings in Toronto:—

Building.	Rental per sq. ft. per annum.
Canadian Pacific Railway Building.....	\$2.10 to \$2.60
Standard Bank Building	2.10 to 2.50
Union Bank Building	2.00 to 2.50
Royal Bank Building	1.80 to 2.25
Traders Bank Building.....	1.75 to 2.25
Lumsden Building	1.75 to 2.10
Kent Building	1.50 to 1.75
Toronto General Trusts Building.....	1.50 to 1.75
Continental Life Building.....	1.50 to 1.75
Temple Building	1.50 to 1.75

The Delaware Insurance Company, of Philadelphia, has ceased to carry on the business of fire insurance in the province of Saskatchewan.

ALBERTA'S LOAN IN LONDON

Saskatoon's Five Per Cent. Issue—Two Grand Trunk Loans Coming

The cable wires were apparently thrilled with optimistic current in conveying reports of the reception accorded the loan of the province of Alberta. The issue was made in London of 4 per cent. bonds to the amount of £1,000,000. They were underwritten through Lloyds Bank at 97 and were issued to take up an equal amount of treasury bills which were authorized to carry out improvements and additions to the telephone service and other public utilities. Seventy-five per cent. of the loan was left with the underwriters, who, Premier Sifton of Alberta says, were anxious to secure at least 60 per cent.

Deductions to Be Made

At a price of 97, the cable messages rejoiced. An examination of the prospectus, however, would indicate that several deductions must be made to obtain the figure which the province actually netted. These are approximately as follows:—

	Per Cent.
Underwriting commission	1
Interest accrued at December 30th, two months, at .33 per cent. per month.....	0.66
Discount allowed for full payment on December 30th at 4 per cent. on £27 for one month.....	0.08
Commission to issuing bank, to brokers bringing in subscriptions, legal and advertising expense, say at least	1
	2.74

If The Monetary Times understands correctly the wording of the prospectus, the price received by the province for its bonds was about 94.

Saskatoon City's Loan

The city of Saskatoon's loan in London last week was one of \$400,000. The price was 99½ and the rate 5 per cent. This is regarded as a sign that a straight 5 per cent. rate will operate for future Canadian municipal loan offerings.

Saskatoon's existing 5 per cent. loan, issued in 1908 at 101, is now quoted at 106.

Application has been made to the London Stock Exchange to list the following issues: Montreal Tramways, \$10,445,000, fives; Upper Fraser River Lumber Company, \$1,000,000, bonds; British Columbia Electric, £200,000 deferred, £200,000 preferred, fives; Calgary, £500,000, four and a half; Investment Corporation, £250,000, four and a quarter.

Grand Trunk Pacific Loan

The Grand Trunk Pacific and the Grand Trunk have each applied to Parliament for authority to issue \$25,000,000 four per cent. debenture stock, or \$50,000,000 in all. This issue will probably be devoted to the purchase of equipment for both roads, as the previous votes have become exhausted.

EMPIRE COTTON COMPANY ORGANIZED

The organization of the Empire Cotton Company, which recently obtained a Dominion charter, has been completed. The capital of the company is as follows:—

Common stock	\$1,500,000
7% cumulative and preferred stock.....	1,500,000

The company will not have any bonds, mortgages or liens against real estate. The mill equipped ready for work will cost \$700,000, leaving a working capital of \$400,000.

The company are building the mill, which they expect to have running about September 1st, 1913. They have fifteen acres of land in the town of Welland, and a flat rate of taxation for 25 years on \$20,000 valuation, together with a satisfactory arrangement for power for 25 years at about \$10 per h.p. They are building a mill of the most modern type. The plans have been passed by the fire underwriters and will embody everything which will make a good fire risk. The design has been made by some of the best engineers in the United States, and the machinery will be the most modern and all automatic. The company will produce cement and sail ducks. For the first year the output of the mill will be slightly over 3,000,000 lbs. of manufactured cotton, 90 per cent. of which will be used in the business of Smart-Woods, Limited.

The directors of the company will be: Mr. J. Woods, who will be president; Lieut.-Col. Chas. A. Smart, president and managing director of Smart-Woods, Limited; Messrs. C. E. Archibald, Howard Wilson, with W. G. McMahon, who is now western managing director of the Smart Bag Company; W. H. Rowley, of the E. B. Eddy Company; and Mr. Gordon C. Edwards, of the W. C. Edwards Company. Mr. C. T. Grantham will be managing director. Mr. Grantham built the Yarmouth Mill in Yarmouth and the Imperial Cotton Company in Hamilton, and is reputed to be one of the best cotton men in America.

There will be 1,100,000 of preferred shares issued and a like amount of common.

ALBERTA'S REGISTRAR REFUSED TO LICENSE

International Home Purchasing Contract Company—They Then Applied for a Mandamus and It Was Refused

The International Home Purchasing Contract Company, Limited, of Vancouver, recently applied to the registrar of joint stock companies, Alberta, for a license to do business in that province under the foreign companies ordinance, which the registrar, after examining carefully the powers of the company, refused on the grounds (1) that the company had powers to which the legislative authority of the province did not extend, (2) that it was not in the interests of the public good that this class of company should be permitted to do business in Alberta. The company applied to the court for mandamus to compel the registrar of companies to grant registration.

Mandamus Was Refused

The hearing was commenced before Justice Simmons, but as he had such a heavy docket it was adjourned. As Chief Justice Harvey had returned to Edmonton, after finishing at Lethbridge, the case was brought before him and the application of the International Home Purchasing Contract Company for a mandamus was refused.

A memorandum of Mr. Trowbridge, the provincial registrar, who, by the way, is active in safeguarding the interests of investors in Alberta, states that the company is essentially a general loan company from funds obtained on an accumulation by way of monthly payments derived from the public. By their memorandum of association they have many other powers. They have the right to construct, work, manage or control in British Columbia and elsewhere railways, telephone and telegraphic lines and all other works for public utility. They can go down to Mexico, to South America, all over the world. The provincial department did not think that was prudent legislation.

They have the right to speculate in timber limits and to erect saw mills. In clause (M) they can carry on the business of importers and exporters, printers, publishers, ship builders, ship owners, brokers and bankers, and in clause (Y) to transact as capitalists, bankers and financiers. Clause (G), the company is empowered to carry on the business of carriers and licensed victuallers, and in addition to these powers and many others recited in their charter, they may carry on, acquire and undertake under clause (T) "any other business, whether manufacturing or otherwise."

They can guarantee the payment of debtors or interest on any stocks or shares issued by any company (vide clause Q), acquire and hold shares in any other company (vide clause V), and under clause (X) to promote any company or companies. Clause (Z), the company can lend money either with or without security to such persons and upon such terms and conditions as the company may think fit. This was thought an unwise power in view of reading of clause (3) of their contract in connection with "lending or employing temporarily any idle money."

Business of Bankers

Clauses (M) and (Y) distinctly gave them powers to carry on the business of "bankers."

If a company of this class were permitted to enter the province, and clothed as they are under their incorporation with such extraordinary powers to go into commercial enterprises and speculative ventures all over the world, they might become involved in difficulties that would spell disaster to the concern, thought the registrar.

The clause (ee) generally appears in the memorandum of association of companies incorporated locally in Alberta under the companies ordinance in the proviso inserted in every memorandum of association, "nothing herein contained shall be deemed to confer the right to issue promissory notes in the nature of bank notes."

Under the charter of the company they have power to carry on the business of bankers, the business of discounting and selling paper, issuing paper payable to bearer, paper that is negotiable, without any restrictions whatever.

CANADIAN NORTHERN LINES UNDER CONSTRUCTION

The following are the lines of the Canadian Northern Railway now under construction:—

Line.	Miles.
Sydenham-Ottawa	86
Montreal-Hawkesbury	60
Roberval Extension	30
Ottawa (Rideau Junction)-Capreol Junction.....	304
Ruel-Port Arthur	543
	1,023

Canada's increase of \$47,961 in imports to Newfoundland for 1911 has been increased to \$211,338 for 1912, while the increase of \$372,682 for the United States in 1911 has fallen to \$130,497 in 1912.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Winnipeg, Man.—A by-law for widening Marion Street bridge will be submitted to the electors in December.

Victoria, B.C.—A by-law for the expenditure of \$225,000 will be voted upon December 12 by the ratepayers.

St. Thomas, Ont.—The by-law to raise \$45,000 to construct a building for the E. T. Wright Shoe Company was carried.

Berlin, Ont.—The board of health recommended that the city council submit a by-law to raise \$30,000 for the construction of an abattoir.

Barton Township, Ont.—Until December 7th for \$32,300 4½ per cent. 20-year bonds. A. G. E. Bryant, clerk, Mount Hamilton P.O.

Guelph, Ont.—At the municipal elections the ratepayers will be asked to approve a by-law for \$15,000 for additional fire protection.

Peterboro, Ont.—A by-law to authorize the expenditure of \$120,000 upon a municipal lighting system was passed by the city council.

Stratford, Ont.—The new street railway by-law has been given its first reading by the city council, and will be voted on by the ratepayers January 6.

Saskatoon, Sask.—A bridge by-law for the expenditure of \$337,000 for steel, or \$343,000 for concrete construction, may be voted on by the city council.

Moose, Jaw, Sask.—The city council passed a by-law for expenditure of \$59,226 for frontage assessment, the debentures will be for 40 years at 4½ per cent. interest.

South Vancouver, B.C.—The school board revised its next year's estimates providing for a total expenditure of \$427,000, instead of \$398,000, as at first decided.

Brantford, Ont.—By-laws for \$15,000 for flood prevention; \$150,000 for water main extension; \$10,000 for collegiate purposes, may be voted on by the electors on January 6.

Moore Township, Ont.—Until December 14th for \$32,000 5 per cent. debentures for purchase of St. Clair and Bridgen rural telephone system. C. C. Watson, township clerk, Bridgen.

Swift Current, Sask.—Until December 13th for \$20,000 5 per cent. 20-year school debentures. D. McLean, treasurer, Box 29, Swift Current. (Official advertisement appears on another page.)

Govan, Sask.—Until December 16th for \$15,000 6 per cent. town hall debentures, repayable in 20 years. A. Graham, secretary-treasurer. (Official advertisement appears on another page.)

Parry Sound, Ont.—The council resolved that a by-law be prepared to raise by debentures the sum of \$5,500 for the purpose of separating the street lighting from the balance of the electric plant.

Souris, Man.—On December 17th the ratepayers will vote on by-laws to issue \$40,000 30-year debentures for electric light works, and \$5,000 20-year school debentures. J. W. Breakey, secretary-treasurer.

Gilbert Plains Rural Municipality, Man.—On December 17th the ratepayers will vote on a by-law to borrow \$30,000 to construct a bridge and other municipal public works. James C. Turner, clerk, Gilbert Plains.

Esquimalt, B.C.—The school board estimates recently submitted to the council included the sum of \$25,000 as necessary for the provision of new schools and playgrounds. Altogether the estimates amounted to \$32,189.

Point Grey, B.C.—Debenture by-laws aggregating \$740,000 may be put before the ratepayers of Point Grey in January, to raise money for extensive additions to the municipal sewerage system. Road by-laws amounting to \$250,000 are also proposed.

Armstrong, B.C.—The municipal council passed a resolution in reference to the government proposal to give the municipality \$2,500, providing the municipality contribute a like amount. The sum of \$2,500 is to be raised by debenture for the erection of stabling on the agricultural grounds.

Calgary, Alta.—The \$800,000 bridge by-law was carried. The ratepayers will vote on the following by-laws on December 20th:—Sewer extensions, \$50,000; catch basins, \$50,000; fire alarm extensions and fire apparatus, \$45,000; and \$60,000 for the new paving plant.

A report of the city commissioners advising a by-law for a new 10,000,000 gallon pump and equipment costing approximately \$20,000, was endorsed by the aldermen.

Brandon, Man.—On December 17th the ratepayers will vote on the following debenture by-laws:—\$125,000 for

schools, interest 5 per cent., payable in 30 years; guarantee of \$50,000 bonds issued by Western Agricultural and Arts Association of Manitoba; \$12,000 for city hall improvements, payable in 10 years, interest 5 per cent.; \$17,000 to purchase land, payable in 20 years, interest 5 per cent. Harry Brown, city clerk.

Vancouver, B.C.—The money by-laws for 1913, passed by the city council, amounted to between four and five million dollars, and include:—School board, \$776,000; general hospital expenditure, \$325,000; Vancouver exhibition association, \$165,000; city market, \$72,000; park commissioners, \$396,300; board of works, \$1,605,000; new cemetery, \$400,000; cemetery purposes, \$15,000; waterworks, \$800,000; old people's home, \$50,000; sanitary conveniences, \$55,000; police sub-station in east end, \$16,000; pedestrian ferry sub-way, \$47,300; and east end viaducts, \$148,500.

The hospital board have asked civic authorities to submit by-law for \$325,000 for an isolation home.

WILL ABOLISH CHARGES ON OUTSIDE CHEQUES

The New York Clearing House Association have voted to abolish collection charges on cheques originating in New York, New Jersey, Connecticut, Rhode Island and Massachusetts. The practice of charging for the collection of out-of-town cheques by clearing house banks was a subject of inquiry last spring by the Pujo Committee of the House of Representatives investigating the so-called money trust. It was alleged that the profits of the clearing house banks on such collections amounted to \$50,000,000 annually.

NOVEMBER BANK CLEARINGS

The following are the returns of the Canadian Bank Clearing Houses for November, 1912, compared with November, 1911:—

	Nov., '11.	Oct., '12.	Nov., '12.	Ch'ge %

THE BANK OF MONTREAL

Proceedings at the 95th Annual Meeting of Shareholders

The 95th Annual General Meeting of the Shareholders of the Bank of Montreal was held at noon yesterday in the board room at the Bank's headquarters.

Amongst those present were:—Messrs. R. B. Angus, Sir Thos. Shaughnessy, Sir W. Macdonald, Senator R. Mackay, Major G. Hooper, D. Morrice, Alfred Piddington, W. A. Murray, C. J. Fleet, D. F. Angus, W. F. Angus, Edward Fiske, A. Baumgarten, G. F. C. Smith, W. B. Blackader, W. Stanway, Wm. H. Evans, H. V. Meredith, J. J. Reid, W. R. Miller, C. R. Hosmer, Bartlett McLennan, E. B. Greenshields, Dr. W. B. Yates, Henry Joseph, J. B. Learmont, Henry Mudge.

On motion of Mr. W. R. Miller, the President, Mr. R. B. Angus, was requested to take the chair.

It was also moved by Mr. C. J. Fleet, K.C., seconded by Mr. A. Piddington, that Messrs. G. F. C. Smith and Bartlett McLennan, be appointed to act as scrutineers, and that Mr. James Aird be the secretary of the meeting. This was carried unanimously.

The President then called upon Mr. H. V. Meredith, General Manager, to present the Annual Report of the Directors to the Shareholders at their 95th Annual General Meeting, held Monday, 2nd December, 1912.

THE ANNUAL REPORT

The Directors have pleasure in presenting the Report showing the result of the Bank's business for the year ended 31st October, 1912:—

Balance of Profit and Loss Account, 31st October, 1911	\$1,855,185.36
Profits for the year ended 31st October, 1912, after deducting charges of management, and making full provision for all bad and doubtful debts	2,518,408.76
Premiums on New Stock	834,322.50
Dividend 2½% paid 1st March, 1912	\$385,798.70
Dividend 2½% paid 1st June, 1912	400,000.00
Bonus 1% paid 1st June, 1912	160,000.00
Dividend 2½% paid 1st Sept., 1912	388,302.98
Dividend 2½% payable 1st Dec., 1912	400,000.00
Bonus 1% payable 1st Dec., 1912	160,000.00
Amount credited to Rest Account	\$1,894,101.68
Amount credited to Contingent Account	\$1,000,000.00
Amount expended on Bank Premises during year	1,000,000.00
	\$511,000.00
	\$4,405,101.68
Balance of Profit and Loss carried forward	
	\$ 802,814.94

Since the last Annual Meeting, Branches have been opened at points in the following Provinces, viz:—

In Ontario—Windsor.

Quebec—Thetford Mines, Granby, Lachine, Magog, St. Lawrence (Montreal), Maisonneuve (Montreal).

Northwest—Plum Coulee, Man.; Swift Current, Sask.; Red Deer, Alta.; Ogden Shops (Calgary, Alta.); East End (Calgary, Alta.).

British Columbia—Port Alberni, Princeton, North Vancouver, Sapperton, Invermere.

The Branches at Marysville, N.B., Rosenfeld, Man., and Oakville, Man., have been closed.

At a Special Meeting of the Shareholders, held on 18th June, 1912, an increase of \$9,000,000 to the Capital Stock of the Bank was authorized, making the total Authorized Capital \$25,000,000.

With deep regret the Directors have to record the death of their esteemed Vice-President, Sir Edward S. Clouston, Bart., who had been a member of the Board, and Vice-President for seven years, and who had held the position of General Manager for upwards of twenty-one years.

All the Offices of the Bank, including the Head Office, have been inspected during the year.

(Signed) R. B. ANGUS,
President.

Bank of Montreal,
2nd December, 1912.

THE GENERAL STATEMENT

The General Statement of the position of the Bank on October 31, 1912, was read as follows:—

LIABILITIES

Capital Stock	\$ 16,000,000.00
Rest	\$ 16,000,000.00

Acceptances Current other than the above	£1,717,519 8s. 5d.

H. V. MEREDITH,
General Manager.

PRESIDENT'S ADDRESS.

The President, Mr. R. B. Angus, then addressed the meeting as follows:—

At the shareholders' meeting in June last, you sanctioned a By-Law permitting the extension of the Bank's capital in case it should appear to be required; this has since been approved by the Treasury Board. The recent issue of stock was also readily taken up, and your capital now stands at \$25,000,000, authorized and \$16,000,000 fully paid, with a Rest of like amount. This increase of capital did not come before it was wanted, as at certain seasons the circulation has exceeded the legal limit and we are liable to the Government for interest on the excess.

The well established business and good earning power of the Bank, together with comparative immunity from bad debts, enable the management to present a statement of results for the year's operations which I presume will be considered satisfactory. The Directors were gratified to be able to add a Bonus of one per cent. on each half year, in addition to the usual dividend. The Directors have audited the books of Head Office, the cash and securities have been verified, ample provision has been made for bad and doubtful debts, and the amount expended on Bank premises has been transferred to Profit and Loss Account.

We have again to report a year of universal and almost unbroken prosperity throughout the length and breadth of the land. The unfavorable conditions which retarded the harvesting operations and which it was feared would prove calamitous, passed without much injury in the western prairies, where the yield of wheat and other grains has proved satisfactory both as to quality and quantity. In the East, where the damage was perhaps greater, some compensation has been derived from good results in other directions. While the prices of wheat are much lower this year, the proportion of the higher, or contract, grades in the Prairie Provinces is very much larger. The better condition of the grain renders it easier to handle and to market, and the returns to the producer are quicker and safer. The estimated yield in the Northwest may be set down as:—

Wheat, 188,000,000 bushels, against 177,000,000 last year.
Oats, 220,000,000 bushels, against 190,000,000 last year.
Barley, 31,000,000 bushels, against 33,000,000 last year.
Flax, 13,000,000 bushels, against 8,000,000 last year. A conservative estimate of the value of the crop of the three Provinces is given at \$207,000,000 for the grain alone.

Partly owing to the good condition of the grain, already mentioned, but chiefly because of the excellent arrangements of the railways, the crop has been moved with unparalleled celerity; there has been no car famine and little talk of congestion, although there has been more grain handled. At the close of this season's navigation, there appears to have been a serious blockade of grain on its way to market, caused by insufficient facilities for taking delivery from the railway cars, and it may be that a greater number of vessels for grain carrying across the Lakes and larger elevator capacity for temporary storage must be provided for future wants. Storage for grain has been much neglected in the Prairie Provinces; it would be advisable that granaries of moderate capacity to store at least a portion of the crop should be a feature on every well equipped farming establishment, so that there would be no occasion to rush produce to a market at inconvenient seasons.

Irrigation by which vast areas of arid land are being converted into most productive farms, is being prosecuted with vigor, and the model farms established by the Government and the Canadian Pacific Railway are more and more resorted to and much valued by the settlers.

The raising of live stock, which had been allowed to decline, will receive a great impetus from the high prices obtainable for cattle, and by the greater safety with which the business is conducted.

Immigration for the twelve months ended September 30th, has reached the total of 385,955 souls, or 37,322 over the previous year. Many are farmers possessing both experience and capital. These form a welcome addition to the population, where labor is so scarce and land so productive.

Loans to farmers, if sometimes slow, are well paid. Wages are high, as is the cost of living, but that condition may be greatly mitigated by the farmer, if only he will give his attention in some measure to mixed farming instead of relying upon importations of vegetables, meat and butter, and such like from the East or from the older settlements in the United States. In the most important Province of Ontario, the harvest of wheat and corn has not been bountiful, but rather under the average, in consequence of the wet and cold season, and yet we are assured that the farmers have done well, as few depend solely on the raising of grain for a livelihood, their resource being scientific and mixed farming, while dairying, produce and fruit have been more remunerative. As an indication of the diversity of farming in this progressive Province, Ontario is said to own 6,000,000 head of live stock, horses, cattle, sheep and pigs.

The mining industry of Ontario is important; the Province ranks high with other countries in the production of silver and nickel, and her total output for last year, on the Bureau of Mines estimate, was \$41,000,000.

The same general remarks as regards agriculture and the season's results will apply to Quebec.

Lumber and pulpwood have had a good year, last winter's cut being large and prices high. The increase in British prices, however, has been fully set off by material advance in ocean freights, with the result that the United States has been our best market.

The Maritime Provinces have had a fair year. Hay, which is an important crop, has been at least up to the average, and in many cases considerably above. Potato and other root crops, with a few exceptions are reported good. The apple crop, although not equal to the abnormal yield of last year, is a good average; the fruit is much appreciated and brings good prices in England and many young orchards are being planted.

British Columbia has in recent times been a highly favored Province. General trade has been large and profitable; its lumbering operations, after languishing for some years, have suddenly revived owing to the improved demand from the prairies and to the better condition of commercial affairs among our neighbors, who, instead of being keen competitors, have become good customers for our products. There is a shipbuilding industry, although still in its infancy. The great fleet of vessels employed in the coastwise traffic and the larger steamships trading to the Orient give great importance to the port of Vancouver. Speculation is rife as to the advantages likely to accrue to that port and the Western country generally on the opening of the Panama Canal.

Commercial activity has doubtless been stimulated by the impulse of active railway construction, which cannot be expected to continue on the same gigantic scale for many more years, but there will remain a more solid and enduring source of wealth in the vast forests of virgin timber which now cover the hill-sides of mainland and islands.

Speaking of the Dominion as a whole, the trade and commerce of the country have been and promise to continue both sound and good.

The lumber business, on the Atlantic as on the Pacific side, shows much improvement, apart from the pulp and paper industry, which is specially adapted to this country, and has been very prosperous for some time past, but owing to the number of new concerns in operation, there is a tendency to overproduction, with slackening demand and lower prices.

The coal and iron production has been on a scale never before equalled in Canada, although the latter, owing to delays in installing or completing the necessary plants has fallen far short of supplying demands, especially in the matter of steel rails. The car builders have also been notably behind in their orders.

Agricultural machinery of the best and most modern type has been in great request and the factories which supply every kind of electrical equipment have been unusually busy.

The revival of trade in the United States has had a marked effect on several of our manufacturing industries, relieving them from the competing shipments of surplus goods from that market.

The woollen mills are doing better, while an unusually good year has been experienced in cottons.

Old establishments have been fully occupied and a great variety of manufacturers are finding a home in Canada even in the middle and far West.

The wholesale distributing trades have everywhere enjoyed a good year. Groceries, dry goods, clothing, boots and shoes had an unusually large turn over, with good results. Accounts have been fairly well paid and bad debts have been comparatively small.

Transportation by sea and land, with its accompanying mechanical works, is instrumental in making large accessions of population to the cities.

Railway earnings have been phenomenal, but are far surpassed by the extraordinary outlays in building of new lines, in improving the old, in double tracking, terminals and equipment to provide for the ever increasing traffic.

By the judicious expenditure of the Dominion Government, the facilities for shipping are being much improved by dredging, and the supply of elevators and docks at the several important harbors on the Pacific and Atlantic coasts as well as on the Great Lakes.

The principal cities of the Northwest and British Columbia exhibit a marvellous increase in size, in population and business activities. A phenomenal advance in these respects has also been made by some of the Eastern cities, notably Montreal and Toronto. Some of the smaller towns in the West have, perhaps, been too ambitious in providing public utilities, and in rushing work that might better have extended over a greater length of time, but, after all, they are only anticipating future necessities. The municipal expenditures have consequently been large and hence the unusual amount of borrowing both at home and abroad. The comparative cheapness of money and the ease with which municipal securities could be placed in England, had misled some borrowers, who refused to accept the prices offered earlier in the season, but it is feared they may have to submit to higher rates of interest on future transactions.

Industrial loans and investments are quite out of our sphere, but I take this opportunity of saying that it is much to be regretted that some of these offered on the London market were of a distinctly questionable character, unsound or highly speculative, and calculated to reflect injuriously on Canadian credit, while others, and doubtless the great bulk of them, are both safe and promising, and offer to the investor an opportunity of participating in the prosperity of the country. I fear it is useless to ask certain promoters to be more careful as to the class of security they offer, but intending investors may be more discriminating.

With the rapidly developing country and the Government pledged by guarantees or otherwise to liberal expenditures, the building of railways, the improvement of harbors, and other works of a national character, Canada must necessarily be a large borrower for some time. But with nearly 8,000,000 of people, vigorous, intelligent and resourceful, with immense treasures in virgin forests, mines, fisheries, and, above all, with a large area of unoccupied fertile land, Canada can better afford than most countries to mortgage her future to a moderate extent, and her credit in the money markets of the world must always stand high.

Canada is well prepared to absorb and utilize the immigrants that every season seek her shores or cross her boundaries. The laborer and the artisan are most welcome, and the farmer, with or without capital, will find opportunities at his hand. We have excellent and prosperous Banks, well adapted to the requirements of the country, which offer facilities to farmer and tradesman in every town and village, and I may remark, in passing, as convincing proof of the country's progress, that their deposits in ten years have mounted up from 350 millions to over 1,000 million dollars.

We possess a system of transportation that is almost complete, although being daily added to—a large mercantile fleet of steamers on river, lake and sea, and railways that not only link the various Provinces together, but also give a service to the newly opened country better than is to be found in any other country similarly circumstanced.

As to investment in lands—the price for farming properties is still moderate and low, but speculation in suburban lots is surely overdone. For the real estate movement in the cities there may be more justification, prices being advanced by the pressure of increasing population and by keen competition in acquiring choice properties for commercial or domestic purposes.

In New York and other points in the United States where the Bank is represented, business may be described as in a normal and sound condition.

In Mexico, politics have been a very disturbing element, but there are indications of an improvement which will allow business to resume its usual course.

The ample revenues of both Provincial and Dominion Governments indicate a season of great prosperity for the country at large.

The exports for the twelve months ended 30th September, 1912, amount to \$351,952,292, an increase of \$49,601,798 over the corresponding period of last year.

Imports for the same period amounted to \$616,842,090, an increase of \$120,004,619, giving a revenue from custom duties of \$102,695,974, or an increase of \$23,903,849.

I have in a cursory manner touched on these various topics, reviewing the condition of the country and indicating the great range of interests the Bank has to consider in the course of its business, and on whose fortunes the prosperity or otherwise of the Institution in a great measure depends.

LATE VICE-PRESIDENT.

In view of the recent and much regretted demise of Sir Edward Clouston, I cannot refrain from alluding to the circumstance that at the last Annual Meeting he announced his retirement from active participation in the management of the Bank. He had entered the service as a boy, had passed up through various grades, and during the last twenty-one years had occupied the position of Chief Executive Officer. His death is much deplored by the Directors and Staff of the Bank.

THE GENERAL MANAGER.

The General Manager, Mr. H. V. Meredith, spoke as follows:—

The President has covered the ground so fully in the address he has presented to you to-day that little is left for me but to explain the changes which have taken place in the balance sheet during the year, and to add a few remarks in connection with financial matters affecting the Bank which have not been touched upon.

Since our last Annual Meeting, the Treasury Board of the Dominion Government has sanctioned an increase in the authorized capital of the Bank from \$16,000,000 to \$25,000,000, thus permitting of a further issue of stock from time to time as circumstances may, in the opinion of your Directors, render desirable.

Turning to the general statement, of which you have a copy, you will notice the Paid-up Capital has increased during the year from \$14,887,570 to \$16,000,000, and the Rest from \$15,000,000 to \$16,000,000. From the net earnings, transfers have been made of \$1,000,000 to Rest Account and Contingent Account respectively, and a balance of \$802,000 is carried forward at credit of Profit and Loss Account, as compared with \$1,855,000 a year ago. A bonus of 1 per cent. was paid shareholders on June 1st and December 1st over and above the quarterly dividends of 2½ per cent.

Deposits not bearing interest show a small decrease, occasioned by the withdrawal of a large deposit of a temporary nature which appeared in the statement of a year ago. Were it not for this fact, we would show a gain in these deposits of \$2,000,000. Interest-bearing deposits show an increase of \$6,400,000. Part of this increase is of a temporary character, but it is gratifying to find that the ordinary savings deposits have grown in a highly satisfactory manner, notwithstanding the withdrawals that have taken place for investment and otherwise.

Turning to our assets, you will notice that "Current Loans and Discounts in Canada and elsewhere and Other Assets" are \$2,200,000 less. This decrease does not represent a curtailment of our current loans in Canada, which are in reality \$1,600,000 larger than a year ago, but a reduction in our current loans elsewhere. Investments in railway and other bonds are \$1,600,000 less, affected by realizations, and balances due by agencies of this Bank and other Banks show a net reduction of \$3,800,000. The increase in our call loans in Great Britain and the United States is accounted for by the various changes mentioned above.

I think you will agree with me that the statement is a strong one, but it is well that the Bank of Montreal should always be able not only to meet all the legitimate demands of its clients, but at the same time to provide for any exceptional calls that may be made upon it to promote the general welfare of the country.

You will observe that, following the practice of the British and Colonial Banks, we have shown, in the form of a footnote, the contingent liabilities of the Bank and the securities held against them. This item has not heretofore appeared in our Annual Statement.

Business generally has been exceedingly active in Canada during the past year. Good crops, notwithstanding a wet season, have been reaped, and all manufacturing industries have been kept fully employed. Wage earners are in receipt of good wages, and labor, in many sections, is difficult, if not, impossible, to obtain. With an increasing immigration, a soil producing a large surplus of food products without serious failure over a comparatively long term of years, the assurance of a vastly increased production as the area of unoccupied arable land is brought under cultivation, and other great natural resources awaiting development, one cannot but be an optimist in regard to the future of our country.

Owing to this ever-increasing and rapid development, we must, for many years, be borrowers from the British Islands as well as foreign countries. Just now, there is undoubtedly a

feeling in some quarters abroad that Canadians are spending too lavishly and over borrowing to an extent which may later on prove burdensome to us. In this connection, our adverse balance of trade, our so-called real estate boom, etc., are cited. While I do not share these pessimistic views, there can be no doubt that if we are to maintain the preference which Canadian securities have so long enjoyed, caution at the present time is more essential than it has been for a long time past, and it is clear any ill-advised move on our part, any undue speculation, or the flotation of doubtful schemes which may have the effect of causing distrust abroad and so prevent the free flow of capital into Canada, cannot but have a serious effect on business generally, and bring about a check to our prosperity. It must not be forgotten that there are countries other than our own seeking capital, and offering possibly quite as attractive terms, and that once a stream is turned in another direction, a long time may elapse before it returns to its former channels.

Money has been in strong demand in Canada during the year, while in London and New York, in which outside markets we are chiefly interested, the rates continued low until September, since when more stringent conditions and higher rates have prevailed. With buoyant trade practically the world over, and with, as far as we can judge, a probable continuance for some time of such conditions, money is not so readily obtained. Those seeking capital should have regard to existing conditions and also to the fact that borrowers cannot hope to name their own terms.

The increased cost of living, and the reasons therefor, form a subject much discussed the world over, and commissions of enquiry are now engaged in seeking the cause. I mention the subject because of its effect on the Bank's net earnings, owing to the necessity of our having to increase our fixed charges from time to time as a result of bringing up the salaries of the staff to a point which may be considered a fair and reasonable one for the services rendered. The cause for the enhanced value of all commodities is difficult to determine. There are no doubt a number of reasons for it; among them, the largely increased output of gold, resulting, to a great extent, from the more scientific treatment of ore bodies. The higher standard of living by all classes is also a factor; but I am of the opinion that the root of the matter may be found in the fact that the percentage of population engaged in production of foodstuffs is not increasing in the same ratio as is that of our manufacturing wage earners and salaried officials. This view is supported by figures showing conditions in the United States, where the number of farm families indicates an increase of only 11 per cent. between 1900 and 1910, while the artisan and clerical classes have increased practically 30 per cent. in the same period. A similar condition of affairs obtains in Canada as regards the five Eastern Provinces, and while, in our Northwest, the rural population is relatively large and grows apace, mixed farming has not yet been generally resorted to. In this connection, it may be interesting to note, that the exports of dairy products from older Canada to the newer Western Canada were this year not less than \$3,000,000, while New Zealand and the United States supplied these commodities to the extent of an additional \$1,000,000.

I have noticed at different times, in certain newspapers, paragraphs calculated to give the impression that the Banks in this country are not affording the farmers the financial assistance to which they are entitled. Such statements are erroneous. There are in Canada some 2,500 bank branches, the great majority of which are located in towns and villages supported by the surrounding agricultural population, and no unimportant part of the business of the Banks is derived from this class. As for this Bank, I may say that our loans to farmers and small traders amount to many millions.

I have alluded to the adverse balance of trade. In the fiscal year ending March 31st, 1912, the imports for consumption in Canada were of the value of \$521,000,000, and the exports of domestic products were \$290,000,000, showing a balance against the country of \$231,000,000, undoubtedly a very large sum. In the five months ending August 31st, last, the excess of imports over domestic exports was \$130,700,000, showing an even greater ratio than in the preceding year. The gap between imports and exports is not likely to be soon closed; not, indeed, until our manufacturing industries have expanded to a point when the home market can be supplied fairly well within the country, nor until the large demand for foreign goods, arising out of the construction of permanent works, railways, etc., is satisfied from domestic mills. Meanwhile the gap is bridged by foreign loans, by investments of capital in Canada from Great Britain and by money brought in by immigrants. It is, therefore, all the more important to guard against unpropitious circumstances tending to lessen the confidence of British and foreign lenders in Canadian securities.

The delayed revision of the Banking Act will shortly be submitted to Parliament. The present Act has been developed with the growth of the country. It has served its purpose well, and I feel confident that under the direction of the able and experienced financier who now occupies the position of Finance Minister no radical changes will be entered upon lightly.

No one can feel more strongly than I do the necessity of conserving the profits of the Bank so that when lean years come, as come they must, there may be no question of dividend curtailment. At the same time, in periods of prosperity, I feel that shareholders should enjoy a measure of that prosperity. The policy of your Directors, therefore, in my opinion, should

be to maintain the dividends at 10 per cent., and to make distributions in prosperous years by way of bonuses as the Bank's earnings warrant; in lean years; should they unfortunately come, to withhold the bonus and to tell the shareholders frankly the reasons for so doing. The writing down of assets to meet a shrinkage in values under all conditions is, I am convinced, more in your interests than to make a display of abnormal profits. Stability of business and continuity of earnings should be our aim.

I cannot close without referring to the loss the Bank has sustained in the sudden and untimely death of Sir Edward Clouston, the Vice-President. His whole life was spent in its service. Entering the Bank as a youth, nearly half a century ago, and manifesting from the first great ability, he steadily rose to the highest position in the service. Under his guidance, for many years as General Manager, until ill-health necessitated his retirement, the Bank continued to maintain its commanding position, and enjoyed great prosperity. On more than one occasion, his experience and knowledge of banking were availed of not only by his confreres in other institutions, but by those who had the direction of legislation governing the Banks. To myself his death is a personal loss, for I was associated with him many years, during which I came to recognize not only his talent but the great graciousness of his personality.

The President's invitation for general remarks being passed over,

The President moved and Mr. E. B. Greenshields seconded—That the report of the Directors, now read, be adopted and printed for distribution among the Shareholders. This was carried unanimously.

The President, Mr. R. B. Angus, then moved, and Mr. E. B. Greenshields seconded—That the Shareholders By-Law No. 3, be amended as follows: By replacing the word "twelve" in the third line of the By-Law, as printed, by the word "fourteen."

The President explained that this was done with a view of adding two more men to the board of the Bank. It was, he said, considered advisable in some respects that they should have more men connected with the business of the city and also some younger men to aid in the administration.

The President—This is a motion that must be ratified by a ballot. If it is your pleasure, I shall deposit this ballot which accounts for sixty thousand shares. Carried.

The President further moved, and Mr. E. B. Greenshields seconded—That the Shareholders' By-Law No. 9 be amended as follows—By replacing the word "thirty-five" in the second line of the By-Law, as printed, by the word "forty-five."

This, Mr. Angus explained, would increase the remuneration of the board from thirty-five to forty-five thousand dollars, which was desirable on account of increase of duties. This also needed to be ratified by a ballot, and if it was the pleasure of the meeting he would deposit ballots in the box. This was carried.

On motion of Mr. George Hooper, seconded by Mr. W. Stanway, it was resolved:—That the thanks of the meeting be presented to the President, the Vice-President, and Directors, for their attention to the interests of the Bank.

The President, Mr. E. B. Angus, in acknowledging the vote, said: On behalf of the Directors and Officers, I beg to thank you for your continued confidence, and assure you it gives us great pleasure to serve a Bank which is so prosperous and so well respected both abroad and at home. (Hear, hear.)

Mr. W. H. Evans made a few commendatory remarks regarding the business capacity of the management, and expressed the particular appreciation of the Shareholders in receiving the recent bonus, with the promise of more to come during periods of prosperity.

On motion of Mr. D. Morrice, seconded by Mr. C. B. Hooper, it was resolved that the thanks of the meeting be given to the General Manager, the Superintendents, the Managers, and other officers of the Bank, for their services during the past year. Mr. Morrice commented on the fact that the prosperity of such an institution as the Bank of Montreal was largely due to the ability, good judgment and loyalty of the officials.

Mr. H. V. Meredith—I beg to thank you, on behalf of the Staff, for the resolution just passed, and you, Mr. Morrice, for the kind words of appreciation you have used in proposing it. If thanks are due for the results of the year's business, they belong very greatly to the rank and file, whose untiring energy, loyalty and devotion to your interests are deserving of every commendation.

While ballots for the election of officers were being cast, Sir Thomas Shaughnessy, referring to the decision to add two new directors to the board and also in replacing the late Sir Edward Clouston, said the board had inaugurated the policy of introducing younger blood and younger men. Mr. C. B. Gordon, Mr. Huntly Drummond and Mr. Forbes Angus, he said, represent important commercial and financial interests here; but I desire more particularly to say that against the earnest protest of the President, the board insisted on nominating Mr. Forbes Angus, because they felt that Shareholders in the Bank would be delighted to have the assurance that for a time we will have two members of that family and that the name will be perpetuated in the affairs of the Bank. (Hear, hear.)

ELECTION OF DIRECTORS.

The result of the ballot for the election of Directors was declared by the President as follows:—Messrs. R. B. Angus,

A. Baumgarten, E. B. Greenshields, C. R. Hosmer, Sir William Macdonald, Hon. Robert Mackay, H. V. Meredith, D. Morrice, James Ross, Sir Thomas Shaughnessy, Rt. Hon. Lord Strathcona and Mount Royal, D. Forbes Angus, Huntly R. Drummond, C. B. Gordon.

The meeting then terminated.

OFFICERS ELECTED.

At a subsequent meeting of the Directors, the following officers were elected:—Hon. President, Right Hon. Lord Strathcona and Mount Royal; President, Mr. R. B. Angus; Vice-President, Mr. H. V. Meredith.

THE QUEBEC BANK

REPORT OF PROCEEDINGS OF THE NINETY-FIFTH ANNUAL MEETING OF THE SHAREHOLDERS

Proceedings of the ninety-fifth annual meeting of the shareholders of The Quebec Bank, held in the Banking House Quebec, on Monday, the 2nd December, 1912.

Present: John T. Ross, Esq.; Vesey Boswell, Esq.; Thomas McDougall, Esq.; W. A. Marsh, Esq.; Gaspard Lemoine, Esq.; R. MacD. Paterson, Esq.; Peter Laing, Esq.; Herman Young, Esq.; Andrew C. Joseph, Esq.; A. E. Scott, Esq.; John Shaw, Esq.; J. G. Scott, Esq., and others.

On motion the chair was taken by John T. Ross, Esq., and Mr. R. C. Patton was requested to act as secretary of the meeting.

The chairman read the report of the directors, and B. B. Stevenson, Esq., general manager, read the statement of the affairs of the bank as on the 31st October, 1912.

DIRECTORS' REPORT

The directors submit herewith to the shareholders the ninety-fifth report, covering the year ended 31st October, 1912, together with the balance sheet of the bank as on that date.

PROFIT AND LOSS ACCOUNT

Balance at credit of Profit and Loss Account brought forward	\$ 22,283.71
Profits for the year ended the 31st October, 1912, after deducting charges of management, rebate on discounts and interest on deposits ..	294,804.45
	<u>\$317,088.16</u>
Dividends Nos. 191-192-193-194, at 7 per cent. per annum...	\$175,000.00
Reserved for Pension Fund...	5,000.00
Expenditure on premises at Branches	26,689.21
Business taxes	10,720.00
Transferred to Contingent Account	75,000.00
	<u>292,409.21</u>

Balance at credit of Profit and Loss Account carried forward	\$ 24,678.95
--	--------------

During the year branches have been opened at Rock Island in the Province of Quebec, at Port McNicoll in the Province of Ontario, at Craven, Denzil, Markinch, Neville, Pennant, Rosetown, Sovereign, Swift Current and Young in the Province of Saskatchewan, at Bassano, Clive and Medicine Hat in the Province of Alberta, and at Huntingdon in the Province of British Columbia. The branch at Alix, Province of Alberta, has been closed.

The opening of a number of new branches, which has been the policy of the bank for the last two or three years, has necessitated the incurring of heavy expenses, but the results, so far, have been entirely satisfactory, and we look for still more satisfactory results in the future.

The head office and all the branches of the bank have been duly inspected during the year.

The statements submitted to you, in our opinion show that the operations and interests of the bank are steadily growing and widening.

We have again to express our satisfaction with the earnest and capable efforts of the staff.

The directors consider that owing to the increased business of the bank, it is advisable to issue shortly 5,000 shares of the unissued capital stock of the bank. They recommend that this be offered to the shareholders of the bank at a premium of twenty-five per cent., that is to say, \$125.00 for each share of the par value of \$100.00.

All of which is respectfully submitted.

JOHN T. ROSS,
President.

GENERAL STATEMENT.

31st October, 1912

LIABILITIES

To the Public:—	
Notes of the Bank in Circulation.....	\$2,552,267.00
Deposits not bearing interest..	\$ 3,871,924.00
Deposits bearing interest ..	11,659,105.56
	<u>15,531,029.56</u>
Balances due to Banks in Canada.....	164,155.80
Balances due to Agents in Great Britain.....	116,761.84
Reserved for rebate of Interest on Current Bills Discounted	29,566.08
	<u>\$18,393,781.18</u>

To the Stockholders:—

Capital Stock paid up.....	\$ 2,500,000.00
Rest	1,250,000.00
Balance of Profits carried forward	24,678.95
Dividend No. 194, payable 2nd December	43,750.00
Unclaimed Dividends	3,015.50
	<u>3,821,444.45</u>
	<u>\$22,215,225.63</u>

ASSETS

Specie	\$ 427,127.56
Dominion Notes	900,407.00
Deposit with Dominion Government for security of Note Circulation	116,000.00
Notes of and cheques on other Banks	1,732,739.91
Government, Municipal and Railway Bonds and other securities	1,372,614.23
Call Loans on Bonds and Stocks in Canada	2,941,983.62
Call Loans on Bonds and Stocks in the United States	700,000.00
Balances due by Banks in Canada	4,158.08
Balances due by Banks in Foreign Countries	261,729.51
	<u>8,456,759.91</u>
Other Current Loans and Discounts	12,013,948.67
Overdue Debts (Loss provided for)	93,558.53
Real Estate (other than Bank premises)	51,093.05
Mortgages	23,920.00
Bank premises	1,157,084.98
Other Assets	418,860.49
	<u>13,758,465.72</u>
	<u>\$22,215,225.63</u>

B. B. STEVENSON,
General Manager.

Messrs. John Shaw and A. E. Scott were appointed Scrutineers of the ballot, and after the ballot had been cast and declared closed, the Scrutineers reported that the following gentlemen were elected Directors for the ensuing year, namely: John T. Ross, Esq.; Gaspard Lemoine, Esq.; W. A. Marsh, Esq.; Vesey Boswell, Esq.; Thomas McDougall, Esq.; G. G. Stuart, K.C.; J. E. Aldred, Esq.; R. MacD. Paterson, Esq.; Peter Laing, Esq.

At a meeting of the Directors, held immediately after the Annual Meeting, John T. Ross, Esq., was re-elected President, and Vesey Boswell, Esq., Vice-President.

CANADIAN NORTHERN MAKES OFFER TO LONDON

Judge Phippen, Colonel Davidson, and Engineer McCrea, representing the Canadian Northern Railway, have made a definite offer in regard to the leasing of the London and Port Stanley road, which is owned by the city.

They offer to lease the road for 99 years at \$20,000 a year for the first ten years, and \$25,000 a year for the balance of the time. They agree to run a line of steamers to Port Stanley, and make London a divisional point, with shops that will employ from 150 to 250 men. They promise also to place London on their main line.

Michigan Central Railway and Pere Marquette will be given running rights over the system and summer excursions to Port Stanley.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Tenders will be received by the undersigned up to 8 p.m. on **Monday, December 16th, 1912**, for the purchase of \$15,000 6 per cent. Town Hall Debentures, repayable in 20 equal annual instalments.

A. GRAHAM,
Secretary-treasurer.

Govan, Nov. 28th, 1912.

DEBENTURES FOR SALE

Sale of Swift Current School Debentures, District No. 167, for the sum of twenty thousand dollars (\$20,000.00) at the rate of 6 per cent. per annum, extending over the term of twenty years (20). Tenders to be received up to **December 13th, 1912. Apply**

D. McLEAN, Treasurer,
Box 29,
Swift Current, Sask.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED—A Manager for an Accident Insurance Company. Applicants must send copies of testimonials to this office. Salary, \$4,000.00 a year to commence. Apply—The Secretary, British Columbia Accident and Employers' Liability Insurance Company, Limited, 433 Seymour Street, Vancouver Street, B.C.

WANTED, LOANING AGENCY for the City of Regina and district, experienced man in charge of that department. Cathcart, Price & Boyd Company, Limited, 2121 Eleventh Avenue, Regina.

AGENTS WANTED

One of the strongest and most reliable Loan Companies in Canada desires to appoint reliable agents in towns and cities throughout Ontario for the sale of its Short Term Debentures. Liberal commission will be paid. Address Box 81, The Monetary Times, Toronto.

WANTED—A party with money to buy some valuable securities, as good as bonds, bearing large interest. Box 117, Monetary Times, Toronto.

WANTED—Inspector by leading Accident and Guarantee Company for Province of Ontario; must be good business producer. Applications treated "confidentially." State age, experience and salary expected to Post-Office Box 430, Montreal, Que.

WANTED—\$25,000.00 for twelve months; interest, 9 per cent., first mortgage; security, \$175,000. Particulars from J. J. Miller, Loo Building, Vancouver, B.C.

WANTED—A young Chartered Accountant as chief clerk in a Western accountant's office. Apply, giving experience, etc., and salary expected, to W. A. Henderson & Company, P.O. Box 805, Winnipeg, Manitoba.

FIRE INSURANCE.—Thoroughly capable Inspector and Agency Superintendent desires change of company. Experienced in Specific Rating, both Manufacturing and Mercantile Schedules. Successful with closing large lines of business and co-operating with Agent. Good Underwriter, conversant with all insurance detail, steady and reliable, and thoroughly well recommended. Box 115, Monetary Times, Toronto.

QUEBEC'S FIRE PREVENTION BILL

Hundreds of thousands of dollars' worth of property, at least, will undoubtedly be saved every year in Quebec, and, in all probability, the lives of a certain number of people, as a result of the bill for the preventing of fires, which was presented in the provincial assembly by the Honorable L. A. Taschereau, minister of public works.

A bill not so wide in its scope as this one was enacted in Manitoba, and led to a decrease of 50 per cent. in the fire losses.

The fire insurance companies doing business in Quebec fully appreciate the value of the measures to be undertaken as provided for by the bill, for they have signified their willingness to co-operate to the extent of contributing \$10,000 a year to help defray the expenses that will be incurred.

The scheme will be commenced this year, and will be more fully developed later. The government will make an appropriation of \$10,000 in addition to the \$10,000 coming from the insurance companies. This latter sum, the Honorable Mr. Taschereau explained last night, will be the proceeds of a tax of one-quarter of one per cent. to be levied on the \$4,000,000 of fire insurance premiums annually collected in this province, and the companies are willing to pay such a tax.

The plans for the prevention of fires include the appointment of a fire commissioner for the whole province, with as many assistants as are found necessary.

The commissioner and his assistants will have authority to hold inquiries into the origins of fires of all kinds, including forest fires, and they will also be armed with warrants for the arrest of persons suspected of having committed arson.

All cities, towns and villages must provide fire-fighting apparatus to the satisfaction of the fire commissioner. The latter will visit the municipalities, show them how to or-

ganize a fire brigade and how to use the apparatus, and will give them all the information needed in regard to the prevention of fires.

No penalties are provided for in the bill except a fine of \$10 per day against the owner of any property who does not obey the orders of the fire commissioner and allows conditions to continue which constitute a menace to the neighborhood. The commissioner will have authority to enter any building and order the removal of any dangerous substance. He can also order special protection in the case of any building which is a source of danger to the surrounding buildings.

"We expect much from these steps for the prevention of fires," the minister added. "This year would just see the commencement," he said, "but, supposing the Government appointed the fire commissioner and his assistants, and spent say, \$500 in each of twenty villages, it would undoubtedly accomplish much good and the work could be extended later."

Portage la Prairie's, Manitoba, municipal electric light plant has paid a profit of over \$10,000 in eighteen months.

Fort William's new industrial plants are making much progress toward completion. Additional elevator capacity and harbor facilities are being planned. When these various developments are completed the citizens will be claiming largest manufacturing city of the west.

At the ninth annual convention of Manitoba municipalities at Winnipeg the following officers were elected:—President, R. G. Willis; vice-president, Reeve Ives, of Wallace; secretary and treasurer, John Cardale; solicitor, ex-Mayor Adolph, Brandon; executive committee—ex-Reeve Forke, of Pipestone; Mayor Berry, St. Boniface; Councillor MacDonald, Dauphin; Reeve Henderson, Kildonan; Councillor Seaton, Daly; Reeve Hubbuk, Langford; and Reeve MacDonald, of Archie. President Forke vacated the chair after having occupied it for two years.

We offer for Sale

\$2,500,000

**7% Cumulative Convertible Preferred Stock at 95 with 35% bonus
in Common Stock, of the**

ATLANTIC SUGAR REFINERIES LIMITED

(Incorporated by Letters Patent of the Dominion of Canada)

Application will be made in due course to have both Preferred and Common Shares listed on the Montreal and Toronto Stock Exchanges.

BOARD OF DIRECTORS

D. LORNE MCGIBBON, Esq., President, MONTREAL
President Canadian Consolidated Rubber Company
President Ames-Holden-McCreedy, Limited

F. H. ANSON, Esq. MONTREAL <i>Vice-President and Managing Director</i>	SIR THOMAS TAIT MONTREAL
S. H. EWING, Esq. MONTREAL <i>Vice-President Molsons Bank President Montreal Cotton Company</i>	W. R. ALLAN, Esq. WINNIPEG <i>Director Union Bank of Canada</i>
H. J. FULLER, Esq. MONTREAL <i>President Canadian Fairbanks-Morse Company</i>	F. H. WARD, Esq. MONTREAL <i>Vice-President Canadian Consolidated Rubber Co.</i>
HON. WALLACE NESBITT, K.C. .. TORONTO	HON. Th. CHASE-CASGRAIN, K.C. ... MONTREAL
<i>Trustee and Transfer Agent</i> MONTREAL TRUST COMPANY	
<i>Bankers</i> THE DOMINION BANK	
<i>Solicitors</i> MCGIBBON, CASGRAIN, MITCHELL & CASGRAIN	

We call attention to the following facts as set forth in the letter of D. Lorne McGibbon, President of the Company:—

- (1) The total assets of the Company, when the plant is completed, including real estate, cash working capital and other concessions will be not less than \$4,000,000.
- (2) The net earnings on a most conservative estimate will be not less than \$500,000 per annum, and should be considerably in excess of this amount. This is equal to 6% on the common stock after allowing for bond interest, sinking fund and preferred stock dividend.
- (3) The Company has acquired seven acres on the waterfront at the entrance to St. John Harbor, an unexcelled location for a sugar refinery.
- (4) The plant, which will have a capacity of 2,500 barrels per day, will be the most modern and complete on the continent, every known appliance for efficiency and economical operation being adopted in its construction. Mr. Joseph F. Stillman, under whose supervision the plant will be built, is considered the foremost sugar refinery expert in America.
- (5) The management of the Company is in the hands of an efficient Board of Directors. Mr. F. H. Anson, who assumes the Executive duties as Managing Director, is very favorably known from his years of experience as general superintendent of the Ogilvie Flour Mills Company. The Superintendent of the plant will be a man chosen by Mr. Stillman, in whom he has every confidence.
- (6) Interest at the rate of 6% per annum will be paid semi-annually during the period of construction, on all instalments as paid, after which time the dividends become cumulative at the rate of 7% per annum.
- (7) The preferred stock is convertible into common stock at the option of the holder at any time. As the common stocks of most Canadian and American refineries have been in receipt of large dividends for many years past, it is reasonable to expect that this convertible feature will eventually prove very profitable.

Payment may be made in full on January 1st, or in instalments as follows:—

20% on January 1st, 1913	15% on August 1st, 1913
15% on March 1st, 1913	15% on November 1st, 1913
15% on May 1st, 1913	15% on February 1st, 1914

Interim instalment receipts will be issued by The Dominion Bank.

Fractional shares of Common Stock will be adjusted at \$30 a share.

Subscription books are now open at our offices, and will close not later than 1 p.m. December 7th. The right is reserved to allot only such subscriptions and for such amounts as may be approved.

Prospectus, Application Form, etc., will be forwarded on request. Subscriptions may be telegraphed at our expense.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 103

Notice is hereby given that a dividend of four per cent. (being at the rate of eight per cent. per annum) on the amount paid up on the Capital Stock of this Company has been declared for the current half-year, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the **2nd day of January, 1913**, to shareholders of record at the close of business on the 14th day of December, 1912.

By order of the Board,
EDWARD SAUNDERS,
Managing Director.

Toronto, November 20th, 1912.

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

Notice is hereby given that a quarterly dividend of $1\frac{1}{2}$ per cent. for the three months ending the **31st day of December, 1912**, being at the rate of 7 per cent. per annum, has been declared on the Common Stock of the Company.

Notice is also given that a bonus amounting to 1 per cent. of the par value of the Common Stock of the Company has been declared for the year ending the **31st day of December, 1912**.

The above dividend and bonus are payable on the **2nd day of January, 1913**. The Transfer Books will be closed from the 16th to the 31st December, 1912, both days inclusive.

By order of the Board,
J. J. ASHWORTH,
Secretary.

Toronto, November 21st, 1912.

THE BANK OF TORONTO

ANNUAL MEETING

The Annual General Meeting of Shareholders of this Bank will be held at the Banking House of the Institution on **Wednesday, the Eighth day of January** next. The Chair to be taken at noon.

By order of the Board,
THOS. F. HOW,
General Manager.

The Bank of Toronto,
Toronto, December 2nd, 1912.

THE SHAWINIGAN WATER & POWER COMPANY.

DIVIDEND NOTICE

Notice is hereby given that a dividend at the rate of one and one-half per cent. ($1\frac{1}{2}\%$) upon the paid-up Capital stock of the Company has been declared for the quarter ending December 31st, 1912, and will be payable on January 20th, 1913, to Shareholders of record January 7th.

Interim Receipts for new stock are exchangeable for Definitive Certificates on and after January 2nd, 1913, at the office of the Royal Trust Company, Montreal.

By order of the Board.
W. S. HART,
Secretary.

December 4th, 1912.

EDMONTON'S EXPENDITURE

The report that Edmonton proposes to expend \$12,000,000 during 1913 is entirely unauthorized, Mr. G. S. Armstrong, Edmonton's mayor, tells The Monetary Times.

At Victoria, B.C., a by-law concerning the regulation of garages, in the care and storage of explosives and protection against fire, was carried. It will require a watchman to be kept on the premises, and strictly prohibits smoking.

THE ROYAL BANK OF CANADA

ANNUAL MEETING

The Annual General Meeting of the Shareholders of the Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the Bank, in Montreal, on **Thursday, the 9th day of January** next. The chair will be taken at 11 o'clock a.m.

E. L. PEASE,
General Manager.

Montreal, November 30th, 1912.

DIVIDEND NOTICE

THE COLONIAL INVESTMENT AND LOAN COMPANY

Half-Yearly Dividend

Notice is hereby given that a dividend of two and one-half per cent. on the Permanent Preference Stock of this Company has been declared for the half-year ending December 31st, 1912, and that a dividend of two and one-half per cent. upon the Ordinary Permanent Stock of the Company has been declared for the half-year ending December 31st, 1912, and that the same will be payable on and after Thursday, the 2nd of January next.

The Transfer Books of the Company will be closed from the 15th to the 31st of December, inclusive.

By order of the Board,
A. J. JACKSON,
General Manager.

Dated this 5th day of December, 1912.

COBALT LAKE MINING COMPANY, LIMITED.

NOTICE TO SHAREHOLDERS.

In order that the Shareholders of the Cobalt Lake Mining Company, Limited, should receive their checks in payment of dividend due January 2nd, 1913, it is imperative that the shares of this Company should be registered in the holders' names before December 17th, 1912.

The Company requests that holders send in their shares for transfer at as early a date as possible.

G. F. MORRISON,
Secretary.

THE CANADIAN BANK OF COMMERCE.

The annual general meeting of the shareholders of this Bank for the election of directors and for other business will be held at the banking house on Tuesday the 14th day of January next.

The chair will be taken at 12 o'clock noon.

By order of the Board.
ALEX. LAIRD,
General Manager.

Toronto, 29th November, 1912.

BANK ACT AMENDMENTS

The bill introduced by Mr. J. A. M. Aikins to amend the Bank Act proposes to empower banks to lend "to a person engaged in farming upon the security of threshed grain, a product of agriculture."

Mr. W. F. Maclean asked a question about live stock, to which Mr. Aikins replied that many persons desired that banks should be authorized also to advance money on live stock, but that the urgency of it was not so great nor the reasons so apparent.

SELLING BONDS OVER THE COUNTER

The city of Charlottetown, P.E.I., is selling its debentures locally at par. They bear 4½ per cent. interest and are for a period of 20 years. The latest sale was made to Mr. D. Goodwill, the amount being \$2,000. Mr. W. W. Clarke, the city clerk, expects to sell about \$3,000 more before the end of the year.

PORT ARTHUR'S NOVEMBER FIRE LOSS

Port Arthur's fire department during the month of November had 12 calls to various parts of the city. The damage by fires for the month was approximately \$16,250, of this amount \$6,800 was for damage done to the building and plant of the Daily News. The following is the monthly report:

November 1, corner of McVicar and Front Streets, Queen's Hotel, no damage.

November 3, 332 Bay Street, bath house.

November 12, 48 Empire Avenue, dwelling, damage \$150.

November 13, 185 Lorne Street, printing office, damage \$6,800; 264 Wolseley Street, slight damage.

November 15, 415 First Avenue, damage \$1,000; 417 First Avenue, damage \$1,000; 419 First Avenue, damage \$1,000; 421 First Avenue, damage \$1,000; 22 Court Street South, damage slight.

November 17, 208 Cumberland Street North, no damage.

November 23, 326 Cornwall Street, no damage; Lorne Street, damage \$2,300; 104 Empire Avenue, no damage.

November 24, 209 Powley Street, damage \$3,000.

Application will be made to the next session of the Dominion Parliament for an act to incorporate the Globe Casualty Company, with power to carry on the business of a general casualty and accident insurance company in all its branches. Messrs. Montgomery, Fleury and Company, Toronto, are solicitors for the applicants.

COLONIAL COAL COMPANY'S BOND ISSUE

Six per cent. first mortgage bonds of the Colonial Coal Company, Limited, to the extent of \$300,000 is being issued by the Canada Industrial Bond Corporation at par with a bonus of 25 per cent. common stock. The capitalization of the company is as follows:

	Authorized.	Issued
6 per cent. first mortgage bonds ..	\$1,000,000	\$450,000
Common stock	1,000,000	800,000

The company was incorporated under the laws of Nova Scotia, in 1909, to acquire and develop 700 acres of mining rights in the Sydney Coal Field at Little Bras d'Or. In 1911 the adjoining property, known as the Mackay Colliery, carrying with it a further 800 acres, was taken over. The mining property of the company consists of four leases from the Crown, of which one has an unexpired term of sixty-five years and the other three of seventy-eight years each. These titles are unencumbered except by the trust deed in favor of the bondholders.

The bonds are a first charge upon all the real and personal property, mining areas, mining leases, concessions, rights, and franchises now owned or later acquired by the company. An appraisal of the company's assets has been placed at \$1,131,976.75, of which \$173,672 represents development and equipment.

An annual sinking fund of 3¼ per cent. of the total amount of bonds issued is payable by the company to the trustee on January 1st of each year after 1913, to be applied to the purchase and cancellation of bonds at a price not to exceed 105 per cent. and accrued interest, at which rate the bonds are by their terms redeemable.

The following issues have been listed on the London Stock Exchange: Canadian Car and Foundry Company, £102,700 sixes; Sao Paulo Tramway Company, £221,917 fives, and Standard Chemical Company, \$250,000 sevens.

MUNICIPAL BONDS

West Vancouver Negotiating Sale—Regina is Awaiting Better Market Conditions.

Messrs. Dow, Fraser and Company, Vancouver, may purchase \$50,000 worth of the road by-law debentures of West Vancouver. A civic committee has been appointed to complete negotiations with the firm.

Hamilton's city treasurer points out that with the present rate of 4 per cent. Hamilton receives approximately only \$96 or \$97 for a debenture valued at \$100, whereas with a prevailing rate of 4½ per cent. the bonds would invariably sell at par.

May Buy Prince Rupert Bonds

At a meeting of Prince Rupert city council a letter from Messrs. G. A. Stimson and Company, Toronto, was read, who stated that they had a client for the \$375,000 treasury certificates which the city desired to sell, who might be willing to take them up if a sufficiently attractive offer was made by the council.

Four Toronto bond firms bid for the \$12,000 5 per cent. 20-year bridge debentures of Chinguacousy Township, Ontario. As previously noted, the offer of Messrs. Wood, Gundy and Company, Toronto.

No Tenders Received

No bids were received for the following debentures of Wetaskiwin, for which tenders were called until October 30th:—\$16,000 5 per cent. 50-year waterworks and sewers; \$23,000 5 per cent. 20-year electric light; \$6,445 5 per cent. 20-year concrete walks; \$2,069 5 per cent. 30-year sewers; and \$819 6 per cent. 7-year plank walk debentures.

No tenders were received for the Imperial, Saskatchewan, \$6,000 6 per cent. skating and curling rink debentures.

No tenders were received for the \$169,000 5 per cent. 50-year streets, sidewalks, park and school debentures, and \$61,823 5 per cent. 20-year local improvement debentures of North Vancouver.

Regina Waiting for Market

"Regina is not likely to try to negotiate its debentures until the money market improves," says Finance Commissioner Mantle. "Some cities are accepting 80 for their debentures, but it would not be wise for Regina to do so, and accordingly no attempt is being made to get the by-laws passed on for the approval of the ratepayers."

The Collegiate board decided, on the advice of Mayor Mc-Ara, to take over their bonds, amounting to \$100,000, from the city of Regina and take them to the Bank of Montreal and seek to arrange an agreement whereby the bank will advance sums to the Collegiate on them up to eighty per cent. of their face value. This, if it can be arranged, is considered to be a much more advantageous arrangement than attempting to sell them in the present state of the market when they would not bring much above eighty.

The action of the city in negotiating for \$400,000 from the Bank of Montreal at a rate of 5.8 per cent., with added commission of one-eighth of one per cent. and 1.20 for stamp duty, was approved by Calgary's aldermen. This money is repayable April 10, 1913.

DEBENTURES AWARDED

Sutton R.M., Sask.—\$5,000 to Messrs. Nay and James, Regina.

Melville, Sask.—\$104,300, to Messrs. R. C. Matthews, Toronto.

Golden West R.M., Sask.—\$12,000 to Messrs. Nay and James, Regina.

Sovereign, Sask.—\$3,000 6 per cent., to Flood Land Company, Regina.

Emerald R.M., Sask.—\$10,000 5 per cent. 20 instalments, to Flood Land Company, Regina.

Sandwich, Ont.—\$12,498 5 per cent. 20 instalments, to Dominion Securities Corporation, Toronto.

Peterboro, Ont.—\$19,500 4½ per cent. 20-years to Messrs. Wood, Gundy and Company, Toronto.

Canora, Sask.—\$29,100 5½ per cent. 20 instalments, to Messrs. C. H. Burgess and Company, Toronto.

PACIFIC COAST AND PANAMA CANAL

The effect of the Panama Canal in the development of trade, particularly that of grain carrying in the West, is the principal feature of the report of the Public Works Department tabled by the Hon. Robert Rogers. Deputy Minister Hunter reviews at length the work of the department, and refers to the harbor improvements which have been begun at Victoria and Vancouver.

Both cities, he states, are looking forward to a great development from the opening of the new canal, and in consequence a start has been made upon extensive dredging operations and docking facilities. It is pointed out that a car loaded with Alberta wheat could make four trips to Vancouver and Victoria in the time it would take for one trip to St. John.

As a consequence there is no reason why millions of bushels of Western grain should not find an outlet by the way of Panama and not to the injury either of the lake ports of Montreal and St. John. It is considered that the fast-increasing crop output will greatly tax the capacity of all these ports, and the new outlet will consequently be of the greatest advantage.

An enormous increase in immigration also is looked for by reason of the cheap rates when the trip is made all the way by water.

CANADIAN BORROWINGS IN LONDON

No one has denied that Canadian borrowings in Great Britain have been large. Few, if any, who know their Canada, its financial virtues and faults, will, however, admit that this country has over-borrowed. There are probably two leading causes for the raising of questions regarding this matter during the past few months. The first is the size of the amount borrowed, with little thought as to what has been done with the money and as to how faithfully the interest has been paid. The second is slight envy on the part of nations who have found the price of money rising, Canada a bulky borrower in the British markets, and consequently more difficulty with their financing.

It is not enough to dismiss criticisms of our borrowings with impatient gestures and optimistic assurances. The British market has every right to know the facts and figures relating to Canadian loans. Canada, for its part, can reply to all reasonable criticism. The most convincing and comprehensive analysis of the position ever given to the investing public was the address of Mr. F. Williams Taylor, manager in London of the Bank of Montreal, before the Royal Colonial Institute. Mr. Taylor's statement will be welcomed, not because it glosses a faulty position, but because it shows clearly the reasons why we have borrowed such large amounts, how they have been applied legitimately, and why we must continue to raise further large sums for many years to come—Sir Edmund Walker has said for at least fifty years. The address has already been printed in detail in *The Monetary Times*.

Mr. Taylor reminded us that, according to the most reliable English records, Great Britain and Ireland

have invested more money in Canada than in any other country—excepting only the United States—the total being approximately £430,449,000, made up as follows:—

Dominion Government	£ 50,484,000
Provinces	16,700,000
Municipals	32,327,000
Railways	236,129,000
Miscellaneous	74,809,000

£410,449,000

Sundries not publicly recorded (estimated) 20,000,000

£430,449,000

In ten years Canada has borrowed in this market through the medium of public issues about £205,043,900, plus probably £20,000,000 invested privately, of which there is no published record. The comparative figures to-day as compared with ten years ago are as follows:—

	1902.	1912.	Increase.
	£	£	£
Dominion Govt. ..	36,370,000	50,484,000	14,114,000
Provinces ..	9,533,000	16,700,000	7,167,000
Municipals ..	9,299,100	32,327,000	23,027,900
Railways ..	125,375,000	236,129,000	110,754,000
Miscellaneous ..	24,828,000	74,809,000	49,981,000
	205,405,100	410,449,000	205,043,900

Sundries not publicly recorded

(estimated)

20,000,000

430,449,000

Included in the foregoing are:—

Railway loans guaranteed by Dominion Government £17,000,000
 Railway loans guaranteed by provinces 13,800,000

Mr. Taylor then analyzes the standing of each class of investment. In connection with the government loans, there is only one question the English investor need ask, viz.: Is his investment safe? It scarcely requires answering, for, as this prominent banker says: "No sane person can doubt the Dominion's ability to meet its obligations; both in the way of interest and principal." Nothing can be found in the provincial government's borrowings to justify criticism. Their securities have not been admitted to the British Trustee List, but that is not because of the intrinsic merits of Canada's provincial securities. It is because they await the favor of the Dominion and Imperial Governments. *The Monetary Times* feels sure that the day will come, and not in the distant future, when those securities will be added to the British Trustee List, a privilege which they earned many years ago.

The analysis of municipal borrowings will be read with interest, especially by Canadian municipal civic treasurers. It reveals several important points. Out of the total debt of £32,327,000 of Canadian municipalities in the London market, for instance, the sum of £23,933,000 is divided among such first-class and undoubted borrowers as Montreal, Toronto, Ottawa, Quebec, Winnipeg, Vancouver, Victoria, Hamilton and St. John. That leaves only £8,394,000 divided among twenty of the thriving and progressive cities and towns of the Dominion. Mr. Taylor, while admitting that the public flotations by this group of twenty have been rapid and continuous, thinks that, as the emissions have been freely advertised, a greatly exaggerated idea as to the aggregate amount has not unnaturally got abroad. Those possessed of a knowledge of Canada and the rapidity with which small towns develop into important ones, will not share any opinion that our municipal borrowings are excessive.

A close scrutiny of the list of railway securities, totalling £236,129,000, reveals only a small percentage properly describable as doubtful. Of the aggregate amount, £70,000,000 are guaranteed by the Dominion Government and £13,800,000 guaranteed by various provincial governments. Among the miscellaneous investments, Mr. Taylor admits several are open to severe criticism, being superficially unsound or highly speculative, and some of which obviously should never have been sent to the British investor. No one can deplore and regret, he says, more than thoughtful Canadians some of the public emissions in this miscellaneous class made in the English market, but we have in Canada, as have most countries, promoters whose sole object is self-aggrandisement, some of them too young to have experienced the periodical cycles of depression from which no country is immune, others unrestrained by regard for their country's credit at home or abroad.

Last on the list, come the unlisted and unrecorded private investments, estimated roughly at £20,000,000. A large part of those have gone into land, and responsibility for the Canadian land boom is shared by English and Canadians alike. Even so, the most serious setback in realty values that could occur would not in itself materially disturb the general financial stability of the Dominion. The Bank Act precludes our banks from lending money against the security of real estate. Mr. Taylor concluded with the following important statements:—

"Respecting the former, it is true our imports exceed our exports by a large amount, and if this condition were to last indefinitely there would naturally be room for dissatisfaction, but Canada to-day may be compared to a mighty industrial enterprise. We have had foundations to lay, superstructure to erect, plant to install, mines to develop, inland and water transportations to create, even labor to import, all of which has entailed

enormous expenditure, but the proof that such expenditure was justified will be furnished by steady increase in our output of products of the forest, the field, the mine, and in manufactured articles.

"Economists may urge that there is a point where capital investment should be curtailed until production catches up, but in the case of Canada there seems no necessity as yet to apply such arbitrary rule, for the simple reason that the natural resources of the Dominion are of vast magnitude, and the development thereof is only in its initial stages. In other words, our imports have been largely for constructional purposes, our exports are mainly in food supplies; the ratio of the former will diminish in time, the volume of the latter must steadily increase."

These are unanswerable arguments to those who seek to injure Canadian credit abroad.

CONTINUED SILENCE

Why does almost unanimous silence persist regarding the charges said to have been made against an official or officials of La Banque Internationale? Surely the public have been kept in suspense sufficiently long. Surely the time has arrived for the announcement of Judge Leet as to his decision in the matter.

On November 19th, Judge Leet had the question under advisement, and "at the moment" could not say how soon judgment will be rendered." The Minister of Finance has no authentic information as to the matter. An inquiry regarding the subject addressed by *The Monetary Times* to the Minister of Justice remains unanswered.

The Bank Act is to be revised shortly. Did anything happen in connection with the affairs of La Banque Internationale which makes necessary more stringent regulations in the Act? This and many other questions arise from the chatter heard as to what might have occurred at the Bank. That gossip and its attendant guesses should be supplanted by the early publication of the decision of Judge Leet. Canadian banking and Canadian credit are injured by continued silence. What really did happen at the Bank and what is the judicial finding?

FIRE INSURANCE AND TRUST COMPANIES IN QUEBEC

Two bills before the Quebec legislature are arousing interest, particularly in financial circles in this province. The bills affect more especially the insurance and the trust companies. For some time past the rapid growth in the number of trust companies has been the cause of comment. It is suspected that a number of these companies are little more than concerns for the selling of real estate and for other purposes, which, while not altogether foreign to the aims of some trust companies, are commonly expected to be merely incidental to the more responsible functions assumed by them. In addition, it is evident that the banks have resented somewhat the rights of accepting deposits granted to the trust companies. The bill has as its aim, among other things, the defining of the nature of banking business which the trust companies may carry on. It is proposed to prevent them granting the privileges to depositors to cheque out their deposits at will. Other restrictions are proposed which are not altogether welcomed by the trust company directors. More will be heard of the matter when the bill comes up for discussion.

Last week, the bill evoked considerable discussion in the provincial house. The clause particularly under discussion was one which forbids a trust company to borrow money by receiving deposits or by issuing bonds or debentures "by whatever names such bonds or debentures may be described." A company is, however,

empowered to borrow or issue bonds or debentures to an amount of not more than seventy-five per cent. of its paid-up capital in order to construct buildings for its own use, in whole or in part.

Mr. Greenshields argued that the bill was a most serious piece of legislation, so far as the industrial development of the province was concerned. He had for his company bought \$1,250,000 worth of bonds a few days ago, and an institution had been provided with the capital it needed, but it could not have been done under the clause. Mr. Greenshields urged the appointment of a commission to examine thoroughly "this piece of hasty legislation."

The bill in which the insurance companies are concerned is one which proposes the appointment of a fire commissioner for the province of Quebec who will enquire into the origin of all fires and have the necessary powers for making his work effective. The expenses of the department are estimated at about \$10,000 per year. These it is proposed to meet by a tax of $\frac{1}{4}$ of 1 per cent. on all fire insurance premiums collected in the province. The insurance men are not opposed to the principle of the tax, and they seem to favor the proposal as a whole, but they think the tax will fall unequally, inasmuch as Montreal and Quebec carry the bulk of the insurance premiums in the province. The matter is being closely watched by the fire insurance interests of the province.

NAVY PROPOSALS

The proposal that Canada should make a cash contribution of \$35,000,000 to build three powerful battle-ships for the British navy will, we think, appeal to the country at large. They will be constructed in Britain and form part of the royal navy for the common defense of the Empire, and will be maintained and controlled by the British admiralty. Orders for smaller vessels from time to time will be given for construction in Canada by the British authorities.

Politics requires that the opposition oppose everything that the government brings forward. Sir Wilfrid Laurier, however, and his followers do not differ with their political opponents on the question of devotion and loyalty to the British Empire. After politics has had its fling, Canada's contribution to Empire defense will likely be made with an unanimous vote.

Premier Borden raised the question of representation in Imperial councils, and it is pleasing to know that problem is under consideration. Meanwhile, there are assurances from the Imperial authorities that a Canadian minister resident in London will be welcome. These and other signs tend to show the determination of the units of the British Empire not merely to work as individual nations, but also as partners. That is good sentiment. It is good business, too.

CALGARY'S TAXATION

Calgary has had under consideration the question of business taxation. This is an assessment made on two-thirds value of the average stock carried by merchants, in addition to assessment on the value of the land and on one-eighth value of the buildings. In some Western centres all taxes are levied on land values only, and to this Calgary is approaching. One difficulty in the way of a fair application of the rule is that in the up-town districts greater expense is incurred for police, fire protection, etc., and in a manner the business tax provides for this. In 1910, by amendments to the city's charter it was made permissible to reduce the assessment on real estate improvements to the vanishing point, which will be reached next year. Next in order to go is the business assessment, and the incoming city council will have an enquiry made as to how this may be best accomplished.

SMALL CHANGE

Conservative optimism is a good brand.

* * * *

"You will find it in *The Monetary Times* annual."

* * * *

The Currie-McCrea wire controversy is of the barbed variety.

* * * *

When will La Rose shareholders feel the warm glow of that surplus?

* * * *

The English suffragettes will soon qualify as a factor in the high cost of living.

* * * *

A visitor to the Toronto stock exchange gallery the other day was scanning the board with field glasses. Enough said!

* * * *

The government is busy answering questions, the opposition is busy preparing them. In the meantime, somebody is doing the work.

* * * *

Canada's navy grant is \$13,000,000 less than the amount spent on new equipment this year by the Canadian Pacific Railway.

* * * *

The Minister of Railways has been asked as to free transportation of hay on the Intercolonial Railway. What about a few carrots to tickle the latent powers of the Intercolonial deficit?

* * * *

President-elect Wilson's ears must have burned in Bermuda when Senator Ross was citing at Ottawa Canada's Panama Canal rights. White House ears ceased burning long since.

* * * *

Now Sir Thomas Shaughnessy has had to deny that the Canadian Pacific Railway has bought the Michigan Central. We await the launching of the story that the Canadian Pacific has purchased the Panama and New-market Canals.

FINANCIAL CONDITIONS IN MONTREAL

Some Reasons for the Prevailing Tight Money—Investment Buying—Intentions of Canadian Northern Railway

Monetary Times Office,

Montreal, December 11th.

Conditions in the stock markets in Montreal have been anything but favorable during the past week. In fact, in spite of the expectations that the first of December would witness a loosening up of the purse strings of the various banks, these seem to have rather tightened so that at the present time it is necessary to pay 7% for practically all new call commitments. Loans which have been carried for a considerable time past are still at 6½%, which is an unusually high rate save for short periods of time.

Brokers for the most part are of the opinion that the present rate is not fully justified on a basis of the actual situation as concerns the circulation and paid-up capital and offer the view that there is something else amiss which has not yet been defined. That Wall Street was due for a slump was fairly evident to most save those in Wall Street, but that the slump would be quite as sharp as it proved to be to-day was hardly expected.

Bankers are Watching Situation.

The determination of the United States to get the tariff down to a reasonable basis would of necessity cause a squeezing process in which some water would run out of stocks capitalized on the high-tariff basis. Also, must be considered the effect, sentimental if nothing else, of the Supreme Court decisions on Union Pacific stock and the probability of similar decisions on other stocks.

That these matters were being considered by bankers in the United States would largely explain the tightness of money across the line. At the same time, it probably explains its tightness in Canada, to some extent. Over and above the actual unwillingness of Canadian bankers to let money out, from a standpoint of precaution, there is no doubt that it would be next to impossible to let out much even if they desired so to do. There has been a very active demand for commercial loans and, according to one banker, this demand has not fallen off in the customary way with the advent of winter. As may be known, the cold weather compels the abandonment of much of the outside work carried on during the summer months and as a consequence of this, loans tend to contract about this time of year. This year, so it is claimed, the contraction on this account, is not what it generally is, the explanation being quite possibly the absence of really keen weather up to date. Throughout the city of Montreal, construction work on new buildings appears to be going forward as actively as during the summer. This, however, is not likely to long continue. On the other hand, Christmas is now approaching and this will call for additional circulation.

Prospects for New Year are Better.

Everything considered, it is the general feeling on the street now that the money situation will not show any change of consequence until after the turn of the year. At the end of this month, a number of banks finish their year and this will probably tend to a more generous policy in January. Besides all this, money will be coming back from crop financing in considerable volume, and much of this will be available for market purposes. Of much influence, also, will be the millions which will be distributed as interest and dividends.

Meantime, quite a little investment buying has been going on in Montreal. A large number of stocks look reasonable at present prices, and will in all probability give back good profits ere long to purchasers.

Looking Ahead for Future Extensions.

The Canadian Northern Railway makes the claim that the recent application to parliament for permission to cross the river St. Lawrence, at Montreal, was merely a matter of foresight, it not being the intention of the company to carry on construction work in the direction named in the near future. This explanation is generally accepted in Montreal. It is a certainty that the Canadian Northern will want to cross the St. Lawrence before many years have passed but the company has a good many projects on its hands now and will probably want to get some of these disposed of before entering upon any others.

At the present time, the work of tunnelling under the mountain is going well forward, according to all claims. If any evidence were wanting, the frequent muffled explosions which are heard for considerable distances from the route of the tunnel would supply it. These explosions were for a time most disturbing in the vicinity of the city portal of the tunnel, the depth below the surface being there but slight

and the effect upon the buildings in some instances rather startling. As the work progresses, however, and the distance to the surface increases, the effect of the explosions is less marked. It is claimed that the tunnel will be through in little more than another year.

It seems likely that instead of the Canadian Northern acting independently in the matter of crossing the St. Lawrence River, a joint project of some nature will be undertaken by the various steam and electric railways which require to pass to and fro between the north and south shores. The project will be a big one and calls for the expenditure of a great deal of money, so that the statement of the company that nothing is intended at the moment finds all the more ready acceptance.

MERCHANTS BANK OF CANADA

The statement of the result of the business of the Merchants Bank of Canada for the year ended November 30th, 1912, shows net profits after payment of charges, rebate on discounts, interest on deposits and making provision for bad and doubtful debts, amounted to \$1,338,844. The premium of new stock totalled \$560,760. These items, together with the balance of \$58,878, brought forward from 1911, made a total of \$1,958,482 for distribution. This was disposed of as follows: Dividends at the rate of 10 per cent. per annum, \$649,004; transferred to reserve fund from profit and loss account, \$450,000; transferred to reserve fund from premium on new stock, \$560,760; written off bank premises account, \$100,000; contribution to officers' pension fund, \$50,000, leaving a balance carried forward of \$148,718.27.

The rest account is made up as follows: Balance, November 30th, 1911, \$5,400,000; transferred from profit and loss, \$450,000, and premium on new stock, \$560,760. Total, \$6,410,760.

The average paid-up capital during the year ended November 30th was \$6,496,332. The statement is again a good one.

STEAMSHIP STOCK ISSUE

A block of \$950,000 of the 7 per cent. cumulative preference shares of the Canadian Interlake Line, Limited, is being offered at par with 15 per cent. bonus of common shares by Messrs. A. E. Ames and Company, of Toronto and Montreal. The shares are redeemable at 110. The authorized capitalization of this company is \$1,500,000 of the cumulative preferred stock and a similar amount of common stock, the par value of shares being \$100. One million dollars of each kind of stock has been issued.

The Canada Interlake Line, Limited, was formed some months ago to take over the prosperous business of the Canadian Interlake Line, Limited. To the line of vessels operated by that company this year are being added eight vessels, making in all fourteen. It is now the largest company in Canada engaged entirely in freight lake transportation. All the vessels are modern and of steel construction.

The company's charter provides that a reserve fund, which may be used in the business of the company, shall be established out of the earnings at the rate of 3 per cent. per annum on the amount of the outstanding preference capital. This transfer to reserve is cumulative, and is to be made before payment of any dividend upon the common stock. When the fund reaches 50 per cent. of the total outstanding preference stock, the charter provides that it is to be so maintained, and if at any time it is drawn upon for the contingency against which it is provided, it is to be in like manner restored and maintained. The advantage to the preference shareholders of this provision is manifest.

The actual earnings from operation of nine vessels for the season 1912, up to November 30th, were \$211,270 although two of the vessels were not available until July. The estimated earnings from the end of November to the close of navigation will bring the total earnings of the nine vessels to \$225,270 for 1912. The net earnings of the fourteen vessels of the fleet for 1913 have been estimated by Mr. Norcross, the managing director, at \$348,000. Deducting from this amount, interest and sinking fund on bonds of \$113,750, there is left a balance of \$234,250, which represents 23.4 per cent. on the preference capital, or over three times the dividend thereon. After providing the dividend on the preference capital and the special reserve of 3 per cent., there is a surplus of \$134,250, or over 13 per cent. on the common stock. This is after payment of \$67,000 out of profits for the sinking fund, which is actually paying off liabilities and is not really a charge upon profits.

An unusually complete prospectus has been published by the issuing house, by which investors can thoroughly examine the merits of an attractive preferred stock issued.

GOVERNMENT SUPERVISION OF EUROPEAN BANKS

Control of Imperial Bank of Germany—One Large Institution Has Nearly Fifty Supervisors

II—GERMANY

By H. M. P. ECKARDT

At the centre of the German system is the Imperial Bank of Germany, or Reichsbank as it is called. The shares are all held privately in small lots, mostly in Germany and Holland. But the bank is controlled absolutely by the German government. The business of the bank is transacted by the direktorium, which is composed of nine members, of whom one is president and another vice-president. Members of the direktorium are appointed by the German Emperor, for life. The Bundesrath, or federal council of the empire, recommends parties for appointment, and the Emperor acts on their recommendations.

This direktorium carries on the general business of the bank—authorizes loans, regulates the issues of notes, the movement of the cash reserves, and, with the advice of the central ausschuss, representing the general body of shareholders, fixes the official rate of discount.

Powers of Chancellor

Sitting over the direktorium in authority is the curatorium, which has five members. The chancellor of the empire is chairman. The second member is appointed by the Emperor; the practice is to appoint the Prussian minister of finance. Then the Bundesrath selects from its own members the three other members of the curatorium. Meetings are once in three months. The chancellor has supreme power over the actions of the bank when he chooses to exercise it.

Finally, there is the third body—central ausschuss—representing the shareholders or proprietors. This is composed of fifteen stockholders elected at the annual meeting. Also elected at the annual meeting are fifteen alternates to serve in case of absence of members of the board. Then this body elects a sub-committee composed of three of its members, with three alternates; and this sub-committee meets weekly with the president and directors to receive information as to the transactions carried on by the bank, and to give advice and recommendations regarding the same. It is said that their advice is generally taken.

May Limit Amount of Securities

These representatives of the general body of proprietors are given actual power with reference to two matters: "They may limit the amount of securities which may be purchased by the bank—not as to the character, but as to the amount," and "They have the power to veto any proposed transactions with the empire, if such transactions run counter to the general conditions of business."

The directors usually follow the advice of the central ausschuss in regard to changing the official rate, but sometimes they disregard it.

The Reichsbank has a practical monopoly of note issue, the sole custody of the government funds, and other special rights and privileges. It is required to hand over a part of its profits to the government of the empire. The shareholders get three and one-half per cent. dividends, and one-fourth of the excess. The remaining three-fourths of profits over three and one-half per cent. go to the imperial treasury. Besides that the government taxes the note issues beyond a certain figure.

There is a provision in the law forbidding other banks quoting a rate of discount which is more than one per cent. below the Reichsbank's official rate.

Not as Yet Subject to Government Examination

Although there is an exhaustive imperial law dealing with the charter and business of the Reichsbank, the credit or ordinary banks are organized as in France under the General Companies Act, and they can within certain limits prescribe their own systems of administration and management. Interviewed in 1909 by the sub-committee of the Washington National Monetary Commission, one of the directors of the Deutsche Bank stated that although there had been considerable agitation in the press demanding that the government appoint a commission to audit the banks of the empire, the banks as yet were not subject to any examination by government.

In the case of the Deutsche Bank, which is the largest of the German large banks, the stock is held principally in Germany, but also in England, France, Austria and other countries. The stockholders of this bank meet annually and elect a board of supervisors to serve four years, one-quarter of its members retiring each year. This board then proceeds to appoint a committee of from three to seven members, which meets monthly. The whole board meets quarterly, or oftener, if required on special occasions. It elects the president and vice-president of the bank, and appoints the directors of the bank who have charge of the active management. The president and directors in this case would therefore correspond in large degree to the general managers and other heads of executive de-

partments in Canada. Several of the directors are required to be present at the monthly meetings of the committee, at which the transactions of the bank are reviewed. They, the directors, are required also to report to the full board.

The Deutsche Bank has from forty to fifty men who travel from branch to branch auditing the accounts and supervising the business. This of course corresponds to the system of internal inspection as practised in Canada. Judging by the size of the inspection force, one might suppose that the great German banks cover more details in the inspection of the branches than is the case in the Dominion.

Dresdner Bank is Known in Canada

The Dresdner Bank, which will be remembered in Canada in connection with its investment in Sovereign Bank stock, is organized in practically the same manner as the Deutsche Bank. The general body of stockholders elects a board of supervisors consisting of thirty-six members, one-quarter of the number retiring each year, but eligible for re-election. The board elects the president and vice-president and appoints the directors who are to have the active management.

The sub-committee, which meets monthly, is composed of twelve members. It must give its authorization before loans exceeding a certain amount can be undertaken.

The directors are in attendance every day. As mentioned above, "director" in German banking is similar to "manager" in English and Canadian banking.

The Canadian Porcelain Company, Limited, has been incorporated with a capital stock of \$300,000 to manufacture vitrified white porcelain for electrical and other purposes. They have purchased a 20-acre site in Hamilton, Ontario, and will erect a plant, the first unit to cost \$150,000. The buildings will be of steel and brick and will be ready for operations next spring. Messrs. John Alden and Chas. Palmer, of Rochester, N.Y., and Mr. Fred D. Palmer, of Galt, Ont., are the principal directors.

The Canadian Pacific Railway will spend \$48,000,000 in new rolling stock ordered this year. This money will secure them 467 locomotives and 28,671 cars of various descriptions. When this large order is completed the company will have in commission 2,225 locomotives and 98,804 cars. The new locomotives ordered cost nine millions, the balance of forty-eight millions being expended for cars of various kinds. This equipment will be operated over a trackage of more than 12,500 miles.

Mr. L. Melekov, second vice-president of the British Columbia Accident and Employers' Liability Insurance Company, recently stated that his company not only intends to have offices in Saskatchewan, with headquarters in Saskatoon, but have formed a local board of management, consisting of Messrs. J. F. Cairns, G. H. Clare, F. A. Blain, Charles W. Underhill, and Dr. H. E. Munroe. This board will manage the affairs of the company in Saskatchewan, with Mr. J. C. Foster as provincial manager.

Mr. W. F. Lawry is the new president of the Cobalt board of trade. Mr. R. F. Kellock, vice-president, and Mr. D. H. Way secretary-treasurer. The council for the ensuing year will consist of:—R. H. James, R. S. Taylor, D. A. McDonald, D. L. Jenmett, T. Pipe, J. W. McKay, H. S. Browning and W. E. T. Barton. The board of arbitrators elected was as follows: F. Aboud, A. N. Davis, D. Quirk, C. H. Lloyd, J. Morra, H. Kelly, T. E. Armstrong, L. Stadelman, W. R. Rodd, T. Cameron, Geo. McKay and Chas. Weir.

The Diamond Knitting Company, of which Mr. John Penman, the founder of Penman's, Limited, is vice-president and general manager, have purchased from J. R. Moodie and Sons a building on Park street, Hamilton, which was bought by the Moodie firm from the defunct Princess Underwear Company. They will make stockings there. The Diamond Company intends building a mill immediately in the east end of Hamilton, to manufacture underwear and sweaters, and will specialize on balbriggans and lines closely similar to those of the Penman Company.

At a meeting of the Saskatchewan Bond Corporation, Limited, it being the first statutory meeting, the following board of directors was chosen: Messrs. G. E. Meldrum, A. W. Irwin, W. B. Hooker, S. A. Hamilton, James Armstrong, Richard Loney, A. E. Beaton, J. E. Caldwell, R. H. Fulton, W. E. Burke, D. E. Macintyre, H. F. Stirk, E. J. Chegwin, H. Y. Smith, J. L. Thomas and C. E. Austin. Mr. A. E. Beaton acted as temporary secretary. The directors then met and appointed their officers as follows: President, Mr. Richard Loney; vice-president, Messrs. J. E. Caldwell and C. E. Austin; secretary, Mr. D. E. Macintyre, and treasurer, Mr. A. W. Irwin.

Among those present at the sixth annual meeting of the Life Insurance Presidents at New York were the following Canadians. Messrs. T. H. Purdon, president Northern Life Assurance Company of Canada, London; John Milne, managing director Northern Life Assurance Company of Canada, London; L. Goldman, first vice-president and managing director North American Life Assurance Company, Toronto; A. Homer Vipond, representing Canadian Life Underwriters' Association, New York Life, Montreal; George A. Somerville, general manager Manufacturers' Life Insurance Company, Toronto; Herbert G. Cox, president Imperial Life of Canada, Toronto.

HALIFAX TO BE PORT OF GREATER PROMINENCE

Proposals of Dominion Government Have Awakened its Citizens to the Possibilities of Their Position

(Special Correspondence).

Halifax, N.S., December 9th.

Since Honorable Frank Cochrane, minister of railways and canals, announced that the federal government would nationalize the port of Halifax and equip it with terminals, there has been an optimistic feeling hitherto unknown here.

The scheme, as outlined, will involve the expenditure of at least \$30,000,000. It provides for the building of a bulkhead, reclaiming about 300 feet of shore line, from which will be built a landing pier 2,000 feet long, six piers of 1,250 feet long by 300 feet wide, and a breakwater—there will be sufficient berthing space for thirty modern transatlantic steamships. The piers will be fitted with freight sheds equipped with latest mechanical devices.

Provision for Passengers and Immigrants.

In connection with the piers and in close proximity will be built an up-to-date union passenger station, and a building for immigration purposes, the whole occupying about 1½ miles of harbor front.

There will also be a direct service yard, connected with the present main line of the Intercolonial with two tracks running along the western portion of the city, the tracks will be sunk to a depth of about thirty feet from the present levels of the city roads, and where the latter cross, bridges will be constructed.

In addition to the foregoing, the government will also carry out the previous plans at the present terminal piers. Pier No. 2 will be completed, and the new pier No. 4 will be similarly built.

These plans in connection with the present terminals will involve an expenditure of between \$2,500,000 and \$3,000,000.

The department of railways will also construct a large classification yard at a point near the Three Mile House. This yard will probably mean the appropriating of some 600 acres of land; and it is understood a new round house and machine shops will be erected near Africville.

Development of Navy Scheme.

These plans have enhanced real estate values.

In connection with the railway plans, property upwards in value of \$2,500,000 has been purchased and held in trust for the department of railways by a local trust company.

The honorable minister of railways also made an announcement in connection with the imperial dockyard property, stating that plans in connection with it were being formulated. Many believe that this will form part of the Canadian naval scheme.

The winter port season has opened, and one steamship agency have announced twelve steamers weekly to this port. Increased bookings have also been announced by other agencies and a largely increased business this season is anticipated.—E. A. S.

FROM BRITISH COLUMBIA'S MINES

The output and smelter receipts of the British Columbia mines for the last week in November in detail were:

Nelson production, week—1,842 tons; year, 64,078 tons.
East Kootenay production, week—1,873 tons; year, 41,687 tons.

Slocan and Ainsworth production, week—2,509 tons; year, 109,462 tons.

Rossland production, week—3,942 tons; year, 222,792 tons.

Boundary production, week—39,728 tons; year, 1,865,317 tons.

British Columbia Copper Company's smelter receipts, Greenwood, B.C., week—12,506 tons; year, 614,190 tons.

Granby smelter receipts, Grand Forks, B.C., week—25,153 tons; year, 1,160,620 tons.

Consolidated Company's smelter receipts, Trail, B.C., week—5,690 tons; year, 291,401 tons.

Application will be made by the following gentlemen, to the Secretary of State for a charter of incorporation as a loan company under the name of Dominion Loan and Mortgage Company:—Messrs. G. B. Strathy, barrister; J. F. MacGregor, accountant; W. H. Walter, accountant; H. C. Fowler, solicitor, and H. Rilev, law clerk, all of Toronto. The company's head office will be in Toronto, and the capital stock will be \$1,500,000, divided into 15,000 shares of \$100 each.

ST. JOHN IS BUSY TERMINUS

Provision of Industrial Sites—Board of Trade's President—Export Trade

(Special Correspondence).

St. John, N.B., December 10th.

The winter steamship business is in full swing, and an army of men are employed at the wharves and warehouses at West St. John, while several hundred men are engaged on the foundation work of the new Canadian Pacific grain elevator, which will have a capacity of a million bushels. Outward passenger traffic by the steamships is heavy, and thousands are going to the old country for Christmas. Grain and general freight traffic outward is also heavy.

St. John board of trade, at its annual meeting, elected Mr. J. M. Robinson as president. While the board has been an active organization in the past, it promises to be more aggressive and will adopt a campaign for publicity and new industries, etc.

An address on tax reform, under the auspices of the Canadian Club, by Mr. A. B. Farmer, of Toronto, following closely a visit from Mr. Doty, of Cleveland, Ohio, who represents the Somer unit system of valuation, has awakened much interest in the question of civic taxation.

Large Commercial Undertakings

Doubts concerning the sugar refinery proposals were given the quietus when Mr. F. H. Anson, on behalf of the company, deposited \$100,000 with the city council as a guarantee that a refinery would be built.

The city council is considering the question of filling up the pond at West St. John, which was intended as the drydock site. The drydock is to be built at Courtenay Bay and by utilizing the pond in this way some acres of valuable industrial sites would be reclaimed.

Wholesale merchants in St. John have had difficulty in securing supplies in some lines, and report an active demand for merchandise of all kinds. Country produce prices are high and demand good.

Prospects for Coming Year are Bright

Various industrial proposals are being discussed, including cement works, steel works and lumber mills.

The first rails have been laid on the St. John Valley Railway at a point near Woodstock. There are now about 1,500 men at work on that line.

There is a scarcity of houses in St. John. Building prospects are bright.—M.O.M.

VICTORIA SHARES WESTERN PROSPERITY

Prevailing conditions in Victoria are satisfactory and result from sound business progress, is how the Victoria board of trade sums up the city's development in its thirty-third annual report. As there is no special development to which the recent growth of the city is attributable it is safe to state that Victoria is fully sharing in the general prosperity of Western Canada and that its pre-eminent attractions as a residential town are being recognized. More direct advantages may be expected when the railways arranged for on Vancouver Island are in operation and the natural resources adjacent thereto are developed. The increased harbor accommodation to be undertaken by the government of Canada, the opening of the Panama Canal and all-rail connection between Vancouver Island and the Mainland by way of Seymour Narrows, are other factors upon which to base expectations that the prosperity of Victoria in the future will be greater than at the present time.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended December 6th: Hudson Bay, 63,300; Peterson Lake, 62,535; Crown Reserve, 40,050; Cobalt Lake, 200,300; Coniagas, 352,242; LaRose, 120,000; Buffalo, 248,701; Temiskaming, 87,761. Total, 1,174,888 pounds or 587 tons. The total shipments since January 1st are now 40,008,674 pounds or 20,004 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

The capital stock of the McDonald, Dure Lumber Company, has been increased from \$100,000 to \$300,000.

BRITAIN'S PROTEST AGAINST CANAL ACT

Has Been Presented—Speaks of Violation of Treaty
Arbitration Proposed

Great Britain's protest against that section of the Panama Canal act which exempts United States coastwise shipping from payment of tolls for passing through the Panama Canal, has been presented to Secretary of State Knox by the British Ambassador, Mr. James Bryce.

In brief, Great Britain's objections are: That while it was clearly in violation of the Hay-Pauncefote treaty either to remit or refund tolls on all American shipping using the canal, the same objection probably would apply to the coastwise trade shipping in view of the probable impossibility of framing regulations that would not result in a preference to American shipping.

In addition to supporting these points by long arguments, Sir Edward Grey, the British Minister of Foreign Affairs, indicates very clearly that strong resistance will be offered to any attempt to exclude from the canal British ships owned by Canadian railroads, or whose owners may be guilty of violating the Sherman anti-trust act. He holds that this section of the act cannot apply to British shipping, but only to United States vessels.

Fear Extension of Principle.

He also indicates in his note that underlying the objection to the exemption from tolls of American coastwise ships is an apprehension that in the future the principle might be extended to cover American ships in the foreign trade.

Otherwise the note is devoted almost entirely to an effort to demonstrate that any such exemption of American shipping as is proposed is in direct conflict with the terms of the Hay-Pauncefote treaty, and that President Taft was clearly wrong when he took the contrary view. Generally, the British note might be summed up as a clear definition of the differences between the two governments regarding the construction of the Hay-Pauncefote treaty, winding up by proposing that issues should be settled by arbitration, provided that they cannot be adjusted by mutual agreement, for which a way remains open.

Quotes Views of Prominent Citizens.

In conclusion, "the British Government recognize that many persons of note in the United States, whose opinions are entitled to great weight, hold that the provisions of the act do not infringe the conventional obligations by which the United States is bound, and under these circumstances they desire to state their perfect readiness to submit the question of arbitration if the government of the United States would prefer to take this course. A reference to arbitration would be rendered unnecessary if the government of the United States should be prepared to take such steps as would remove the objections to the act which his Majesty's Government have stated."

Finally Sir Edward declares that it is with great reluctance that these objections have been raised; that they have been confined to the narrowest possible limits, had recognized in the fullest manner the right of the United States to control the canal, and that the British Government looked with confidence to the United States not to impair the safeguards granted to British shipping by treaty.

STANDARD FIRE POLICY

The attention of the North Dakota insurance department has been called to the fact that few of the fire insurance companies doing business in that state issue policies which conform in every particular to the standard form which was established by legislative enactment. Section 6057 of the revised codes, provides that "No fire insurance company, corporation or association, their officers or agents, shall make, issue, use or deliver for use, any fire insurance policy or renewal of any fire policy on property in this state other than such as shall conform in all particulars as to blanks, size of type, context, provisions, agreements and conditions, with the printed form of contract or policy heretofore filed in the office of the commissioner of insurance as a standard policy for this state, and no other or different provisions, agreement or clause, shall in any manner be made a part of such contract or policy or be endorsed thereon or delivered therewith." Then follows a number of exceptions, but these relate in no manner to the contract per se. The department has had printed, in typewriter form, copies of the standard form of policy. A copy of each will be sent to each of the fire insurance companies authorized in North Dakota with advice that this form, and no other, may be issued in this state after January 1, 1913.

LONDON MARKET TO BE FLOODED WITH
LOANS

Canadian Municipalities Will be Heavy Borrowers—
Many European Government Issues Pending

There is excellent basis for the statement that Canadian cities are in the London market in the aggregate for £10,000,000 sterling. This is a sum that will certainly need diplomatic handling, says a cable message.

A large amount of temporary municipal loans will be falling due during the next few months, when long term debentures will be sold. The Saskatchewan government is also awaiting a favorable opportunity in the London market.

Many New Government Loans

The Berlin correspondent of the New York Evening Post says: "The prospect, now generally recognized, that the war in the Balkans will soon reach its end is already raising misgivings in European money markets as to the large amount of new government loans that will be offered for underwriting as soon as possible after peace shall have been declared. According to the Frankfurter Zeitung, there will be such a flood of new loans in a comparatively short time as the markets have probably never known before. Not only the belligerent States will have to put their finances again on a sound basis, but other countries are also preparing to issue great international loans."

Turkey, the writer points out, will need large sums to place its military equipment again on a tolerable basis. Bulgaria was negotiating a loan of \$37,000,000 from Austria and German banks when the war broke out. Of this, \$5,000,000 had been advanced, and since then \$8,000,000 has been borrowed on 5½ per cent. treasury notes in Paris. Large amounts will be required after the war for the replacement of military equipment and the development of newly acquired territory. The same is true of Greece, Servia, and Montenegro. Negotiations are pending with the Paris Rothschilds for a \$140,000,000 loan to Italy. Spain is said to want to borrow \$60,000,000, to all of which is to be added China's \$300,000,000 loan.

In English and French Markets

"Most of these prospective issues will go to the English and French markets. It is not believed that Germany will take any considerable part in supplying the wants of the countries in question. Whatever be the attitude of German financiers, however, it is evident from the foregoing that the European money markets will have to meet large demands for new capital within a relatively short period. When this will begin depends upon the speed made in settling up matters in the Balkans. If a European conference is called to carry through the territorial and other readjustments these financial operations may be considerably delayed."

Applications have been made to the London Stock Exchange to list the following Canadian issues: Algoma Steel Company, £1,130,000 fives; Dominion Steel Corporation, 356,568 shares; City of Vancouver, £326,700 fours.

New South Wales Loans

The charges on the last three inscribed stock 3½ per cent. loans issued in London by the New South Wales government are stated as follows:—

	£1,500,000 1908-9. Issued at £99 10s.	£3,000,000 1908-9. Issued at £98 10s.	£2,750,000 1909-10. Issued at £97.
Interest and discount bonuses to investors.....	£12,230	£29,691	£22,154
Underwriting	18,750	37,500	34,375
Brokerage	3,448	6,923	6,607
Duty	9,375	18,750	17,187
Bank commission	3,750	7,500	6,875
Petty expenses	1,104	975	1,149
Total	£48,657	£101,339	£88,347
Rate per cent.	£3 4 10½	£3 7 6¾	£3 4 3
Including discount on par, the net proceeds of the three loans were £96 ss. 1½d., £95 2s. 5¼d., and £93 15s. 9d. respectively.			

SPECIAL BANK AUDITS

Although the new Bank act will not be brought down for some days, Hon. W. T. White, minister of finance, in accordance with the rules of the house, has given notice of a resolution providing that the government may pay an auditor or auditors of a bank for any special report required by the minister.

CURRENT TRADE CONDITIONS

PERSONAL NOTES.

Collections Are Favorable—Holiday Trade May Beat Previous Records—Preparations for Stocktakings

With the close approach of the holiday season, wholesale trade is assuming a quieter phase in Montreal, although in the grocery line there is still much activity, and a very fair amount of sorting in Christmas specialties. The continued mild weather, with a lack of any decided snowfall, has not been favorable to traffic and trading in the interior, but there is no marked complaint with regard to collections.

Local manufacturers in all lines continue to be busily employed, but there is universal complaint on account of the great scarcity of labor, both male and female, which seriously handicaps many firms in making prompt deliveries, says Dun's report. Values continue to stiffen up in many lines. The advances by cotton companies noted last week are confirmed, and since then the Canadian Cottons, Limited has issued a new price list showing a rise of from 5 to 7 per cent. on all their makes of shirtings, Saxonomies, flannelettes, etc.

The Dominion Wadding Company has also advanced all bats and waddings. Advices from Great Britain report strengthening markets for all lines of textiles. In other lines there is nothing specially new. There are as yet no signs of relief from the stringent conditions governing the money market.

Structural Material in Much Demand.

Trade in wholesale lines in Toronto the past week was fairly active in most cases. Dealers in Christmas goods, notions, stationery, books and jewelry, are kept very busy, with prospects of the largest trade on record.

Staple lines of dry goods rather quiet, which is usual at this season of the year. The dry goods trade generally has had a satisfactory year, with the turnover the largest on record, but profits in most lines were small. Advances in some lines of textiles were made last week.

Payments on the whole were good. There has been an active trade in hardware and builders' material, with prices firm. A large lot of building is in progress, and structural material is in good request. Groceries in fair demand, with a good business in dried fruits and other Christmas goods. Leather is very firm and hides unchanged.

The grain trade has been quiet this week. Prices of Ontario grains are easier, with receipts larger. The demand, however, is restricted. Ontario wheat is away above an export point, with shipments confined to Manitoba grades. Provisions quiet and generally steady. Dressed hogs a shade weaker. Four failures in this district are reported this week.

Retailers busy at Hamilton.

Retail trade in general at Hamilton is brisk, dealers in dry goods, fancy goods and similar lines report Christmas trade opening up in a promising manner, and a large business is expected this year. Some wholesale houses are already making preparation for their annual stocktaking, and wholesale lines are as usual slackening off somewhat at this season of the year; on all sides a very satisfactory year's business is expected to be shown. This has been a record year for building contracts, and activity continues in this line. Hardware houses say they are practically full up with orders, and local factories are well employed. There have been three failures in the district this week, though none of commercial significance.

SIR HENRY PELLATT BUYS INTERNATIONAL BANK CONTROL

A syndicate, headed by Sir Henry Pellatt, of Toronto, has taken over the Paris shares of La Banque Internationale, an option on which was secured by a local group of capitalists, headed by Mr. J. M. Fortier, a month ago. The transfer of the shares was made on Wednesday, 52,575 shares in all, and a cheque for \$286,000 was drawn up and was paid to the representatives of the Paris interests on Thursday.

Sir Henry Pellatt gave The Monetary Times confirmation of the above statement, but said there was nothing to add at present.

The bank will probably be reorganized.

Presiding at the annual meeting of the British Columbia Electric Railway Company, in London, Mr. J. Home-Payne said it had been alleged that the company was grinding untold wealth from the public. The truth was that Vancouver's prosperity was largely due to the company's enterprise during the last ten years. Six per cent. dividend on the preferred ordinary and eight per cent. on deferred ordinary shares were declared.

Senator Gibson is chairman of the Senate banking committee.

Mr. T. B. Phepoe, who has been manager of the Molsons Bank at Montreal, will succeed Mr. J. H. Campbell as manager at Vancouver.

Mr. R. Mason and Dr. J. E. Cox, of London, England, have been visiting the Pacific Coast on a trip of observation with a view to investment.

Mr. G. D. C. Dobbin, who has been connected with the firm of Messrs. F. Nash and Company for a considerable time, has now been admitted into partnership.

Mr. W. T. Shannon, manager of the Chatham, Ont., branch of the Standard Bank, recently addressed the members of the Macaulay Club on the subject of "Banking."

Mr. C. G. Pennock, who has been manager of the Bank of Ottawa at Vancouver, will take over the general management of the Bank of Vancouver on March first next.

Mr. Arch. R. Howell, manager for Canada of the Gresham Life Assurance Society, has returned to Montreal after a tour of the society's branches in Western Canada.

Mr. L. W. Shatford, general manager of the Bank of Vancouver, has resigned that position, but will remain on the directorate of the bank in the capacity of vice-president.

Messrs. S. P. Clark, of Messrs. Clark and Martin, grain exchange; and E. E. Hall, of the Hall Company, Limited, have been elected members of the Winnipeg Stock Exchange.

Mr. M. Morris, assistant manager of the Imperial Bank of Canada, Winnipeg, was presented with a travelling bag on leaving to take up the management of the Brandon branch.

Mr. W. A. Black, general manager of the Ogilvie Milling Company, has been elected a director of the Molsons Bank in succession to Mr. C. B. Gordon, who lately joined the directorate of the Bank of Montreal.

Mr. C. G. Pennock, manager of the Vancouver branch of the Bank of Ottawa, has just tendered his resignation, to accept the position of general manager of the Bank of Vancouver, vice Mr. L. W. Shatford, M.P.P.

Mr. W. M. Birks, vice-president of Henry Birks & Sons and director of Messrs. Ryrie Brothers, Toronto, and of the Sun Life Assurance Company, has been elected to the board of directors of Molsons Bank. He succeeds the late Mr. W. M. Ramsay.

Mr. Thomas H. Hall, manager of the General Accident Fire and Life Assurance Corporation, Toronto, left for England this week for a brief holiday in Europe in company with Mr. B. M. Armstrong, manager of the insurance department of Messrs. Robinson and Black, of Winnipeg.

Mr. J. Stuart McCuaig, son of Mr. Colin M. McCuaig, has been elected a member of the Montreal Stock Exchange. He will take his father's place at the exchange, as floor member of the firm of Colin M. McCuaig and Company. Mr. McCuaig, senior, will remain with the firm as office member. The seat on the exchange was not purchased but transferred.

Mr. F. W. G. Johnson has resigned his position as manager of the St. Catharine's Street Montreal branch of Molsons Bank. Mr. Johnson will now enter the general insurance business and real estate. He has been for many years a special agent of the British America Assurance Company, and will continue to represent them. He has also obtained the Montreal agency of the Railway Passengers' Assurance Company, of London, England.

Chief Findlay, of the North Vancouver fire department, recently submitted his report of the year's development in that department. At the end of 1911, one hundred and twenty hydrants had been installed throughout the city, while up to date this year 102 additional had been installed. Fifteen hundred feet of additional hose had been purchased by the department, making 4,700 feet in all. Four extra men had been engaged, a new motor fire truck had arrived and a permanent team of horses secured for the fire-engine. Nine streets had been macadamized and several other streets opened for traffic. The chief reported that there had been three alarms last month, the aggregate damage by fire being nothing.

Banks in Vancouver have decided not to keep open at nights after February 22nd next. Some months ago, this movement was started and one by one the banks fell in, but now it has been agreed that the extra long hours are not compensated by the small increase in business. Moreover, with the winter nights, it is feared that hold-ups are encouraged by banks being open at nights.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

F. N. Burt Company.—The offering to the shareholders of the F. N. Burt Company, Limited, of \$545,000 of new, seven per cent. cumulative, convertible, preferred stock met with an excellent response from the shareholders. Up to this evening subscriptions were received from three hundred and eighty-five shareholders for a total of \$427,200, payments being made thereon for \$214,522. Many of the shareholders did not take advantage of their right to make payment in four instalments.

British Columbia Electric Railway Company.—The city and suburban lines of the British Columbia Electric Railway Company carried 4,218,766 passengers in the month of October last as compared with 3,671,929 for October of 1911, according to figures issued from the offices of the company.

The railway's percentage payment to Vancouver for last month was \$8,627.37, which marks a substantial increase over the payment of \$7,739.91, the payments for the first ten months of the year have amounted to \$63,968.

Williams Manufacturing Company.—The Williams Manufacturing Company, Limited, has been reorganized with a capital of \$1,000,000. The company manufactures sewing machines and typewriters, and additional capital is being secured in order to permit of extensions being carried on that will result in the company having a much larger output than at present. Among the incorporators of the reorganized company are Messrs. C. W. Davis, B. McLennan, James Rodger, William Yuile of Montreal, Charles Tutton and Alexander Langlois of Plattsburg, N.Y.

Dominion Steel Corporation.—All departments of the Dominion Steel Corporation made a good showing for the month of November. The outputs of the various departments, in tons, were as follows:—

	Nov.	Oct.
Pig iron	28,670	31,090
Steel ingots	28,010	29,975
Blooms	27,060	27,880
Rails	15,385	15,650

Total shipments	26,520	29,360

The company for November showed a production of 46,660,000 tons of coke.

The output of the Dominion Coal Company for November was 400,000 tons. Secretary Corey states that the company will have mined by the end of the year four and a half million tons.

Ames, Holden, McGready, Limited.—The past six months business ending 30th October, show an increase of sales of over \$750,000 in excess of the same period last year and largely increased profits. The joint output of the three factories is about 9,500 pairs per day.

The advance sales for the spring trade are ahead of last year and reports from all branches from the Atlantic to the Pacific indicate a heavy spring business.

Two additions have been made to St. Hyacinthe factory, and notwithstanding this orders which will keep the works at full capacity until next March have been received in addition to those being received daily.

A new warehouse has been erected at Edmonton and one nearly completed at St. John, N.B. Larger warehouses will have to be erected at Winnipeg and Calgary in the near future to meet requirements, and a larger showing of sales and profits during the next six months of the fiscal year are expected.

Canadian Financiers, Limited.—At an extraordinary general meeting of the shareholders of the Canadian Financiers, Limited, held recently, the resolution to increase the authorized capital from \$2,000,000 to \$5,000,000 (passed at a previous meeting) was confirmed unanimously. Owing to the expansion of the business and the intention of the directors to extend the operations of the company, it has been found expedient to increase their authorized capital. This decision will increase the company's scope of usefulness and enable them to carry out plans to increase the efficiency of the service rendered their clients, and to strengthen the position of the shareholders. The company now has a subscribed capital of over \$1,600,000, and this, in conjunction with the

new authorized capital, places the company in the front rank of the fiduciary companies of British Columbia. The company has since its inception paid substantial dividends and its growth augurs well for the future. The company has no branch offices, and is under the management of Mr. Patrick Donnelly, who is also president of the company.

ROYAL BANKS' RAPID PROGRESS

Net profits for eleven months amounting to \$1,527,324, are shown in the Royal Bank of Canada's annual statement, the first issued since the Traders was taken over. As a result of a change in the fiscal year of the bank only the results for eleven months ended November 30th, are given.

This profit is equivalent to 19.19 per cent. on the average paid-up capital of the bank of \$8,680,756. These profits, together with the balance carried forward at the end of the previous year and the premium on the new capital stock, made the amount available for distribution, \$7,432,617.33. This amount was applied as follows:—To dividends, \$943,585; officers' pension fund, \$75,000; written off bank premises' account, \$300,000; reserve fund, \$5,503,812, leaving the amount to be carried forward \$610,219.

The general statement of assets and liabilities shows the bank to be in a strong position, the proportion of liquid assets being in excess of 47 per cent. of the total liabilities to the public.

Total deposits now amount to \$137,891,667. Of this deposits bearing interest totalled \$100,663,364, and deposits not bearing interest \$36,058,812. Which amounts are increases over the combined deposits of the Royal and Traders' at the end of last year. The reserve fund is now \$12,560,000, being \$1,000,000 in excess of the paid-up capital of \$11,560,000. Current loans and discounts amount to \$99,828,879. Among the liquid assets are call and short loans in foreign countries of \$14,556,189, call and short loans in Canada of \$9,422,451; railway and other bonds, debentures and stock \$11,715,900; Dominion Government notes \$14,443,785. Notes and cheques of other banks \$9,769,273.

WOOLLEN INDUSTRY SEEKS MORE PROTECTION

Woollen manufacturers from Quebec and Ontario have waited upon the Dominion government with a view to obtaining greater protection for the woollen, flannel and clothing factories of Canada. They also object to any proposals to increase the British preference.

It is said that a specific duty is being asked for against what they call the "shoddy" clothing material now imported in large quantities from England under the preferential rate.

The imports to Canada from the United Kingdom of wool and their manufactures, for the past five years, have been as follows:

Year.	Dutiable.	Free.	Total.
1908	\$17,675,384	\$ 1,110,056	\$18,785,440
1909	12,895,581	12,982,102	13,877,683
1910	18,979,164	1,543,373	20,522,537
1911	20,780,497	1,515,285	22,295,782
1912	21,115,290	1,531,687	22,646,977

The census of Canadian manufactures taken in 1911 for the calendar year 1910, gives the following figures respecting these industries:

Industry.	No. of establishments.	Capital employed.	Value of products.
Clothing, men's	330	\$ 4,857,073	\$ 8,724,063
Clothing, men's (factory product)	225	11,492,654	25,020,865
Clothing, women's	238	3,253,088	5,943,997
Clothing, women's (factory product)	93	5,671,005	15,083,345
Woollen goods	87	7,057,701	\$ 28,771
Woollen yarns	13	740,044	701,750

The matter is likely to be discussed at the present session.

South Vancouver is strong for annexation to Vancouver, and it is confidently expected that this will be consummated during the next year.

CANADIAN CAR AND FOUNDRY REPORT

Shows Large Sales and Increased Net Profits—Future Capital Requirements—Assets and Liabilities

Gross sales amounting to \$16,500,000 are shown in the Canadian Car and Foundry Company's third annual report, and the profits for the year available for dividend purposes after providing for the first instalment of the bond sinking fund, as shown by the profit and loss account, were \$1,040,000.

At the close of the fiscal year, the unfilled orders amounted in value to over \$15,000,000, and at the date of the report the value of unfilled orders is \$16,000,000.

An analysis of this year's statement shows that the total capital assets have grown from \$11,607,734.91 to \$13,384,212.65. The current assets have increased from \$5,217,699.36 to \$7,334,492.82. The capital liabilities amount to \$15,088,306.67 as against \$13,875,000 in the previous report. Current liabilities are increased \$1,784,710.90 to \$3,561,418.79. An increase of \$383,932 is given in the balance carried forward.

Company Will Need More Capital.

A further increase in working capital is shown will be a need of the company, but until the Fort William plant is completed the directors prefer temporary banking accommodation to supply the requirements.

The comparative figures for 1912 and 1911 of the company's assets and liabilities follow:

Assets.		1912.	1911.
Property account	\$10,652,747.95	\$10,147,297.41	
Investment account	2,621,299.39	1,460,437.50	
Cash in hands of trustees for bond sinking fund	275.31		
Current assets	7,334,492.82	5,217,699.36	
Deferred charges to operations	188,396.25	199,918.01	
Liabilities.			
Capital stock	\$10,075,000.00	\$ 9,975,000.00	
Bonds	3,933,306.67	3,500,000.00	
Platt & Letchworth Co.	780,000.00		
Purchase money notes	400,000.00	400,000.00	
Canadian Steel Foundries Bonds	3,650,000.00	3,650,000.00	
Current liabilities	3,561,418.79	1,784,710.90	
Reserve funds	707,219.47	309,307.14	
Surplus	1,440,266.00	1,056,334.00	

Weekly Pay-Roll Aggregates Half Million.

When the Fort William works are finished the company will own eight complete plants, in addition to the Rhodes-Curry building and contracting business, extending from Sydney, Cape Breton, N.S., to Fort William, Ontario, and will probably be the most self-contained car building company in the world, manufacturing, as it does, nearly everything that enters into the construction of railway cars.

The number of employees on the pay rolls and its subsidiary companies at the present time is about 7,500, and this number will be materially increased when present enlargements are completed and the Fort William Works are in operation. The pay-rolls aggregate about \$500,000 per month.

NOVEMBER'S COBALT ORE SHIPMENTS

CANADA SOUTHERN RAILWAY BOND ISSUE

Present Holders of First and Second Mortgage Bonds Are Given Opportunity to Reinvest at 105³/₄

The holders of the first and second mortgage bonds of the Canada Southern Railway Company are being given the opportunity to reinvest the proceeds resulting from the payment of their maturing bonds in the company's new issue of \$22,500,000 consolidated guaranteed fifty-year 5% gold bonds, Series A, dated October 1, 1912, and maturing October 1, 1962, at 105% and accrued interest, for each \$1,000 bond of the new issue. At this price the new bond, if held to maturity, yields approximately 4.70% per annum. Messrs. J. P. Morgan & Company are authorized to handle the matter.

The consolidated guaranteed fifty-year 5% bonds upon the payment early in 1913 of a total of \$20,000,000 first and second mortgage bonds now outstanding will become a direct first mortgage lien upon all of the property of the Canada Southern, except for the first mortgage of \$130,000 upon the Leamington Branch, about fourteen miles in length. To retire this divisional issue maturing in 1945, an equal amount of the consolidated bonds has been reserved.

Will Be a First Mortgage

Subject only to this divisional issue, the consolidated mortgage bonds after March 1, 1913, will be a first mortgage upon the 380 miles of railway lines extending with branches from the Niagara to the Detroit River. Two hundred and twenty-six miles are standard double-track trunk line railway of exceptional strategic importance, being the integral indispensable part of the Michigan Central Railroad Company route, connecting the manufacturing and distributing centres of Buffalo and Detroit, and forming with the Detroit Tunnel Company and the Michigan Central Railroad Company a part of the shortest line of the New York Central system from New York to Chicago.

The payment of the principal and interest of the bonds will be guaranteed unconditionally by the endorsement on each bond of the guaranty of the Michigan Central Railroad Company.

Property of the Railway

The property of the Canada Southern Railway Company includes the entire main line between Suspension Bridge, Ontario, and Windsor, Ontario, opposite Detroit, with branches running to Courtright, Leamington, Amherstburg, Old Fort Erie and Niagara-on-the-Lake. Its road is of modern construction, with low gradients, easy curve, and is equipped with electric automatic block signals, etc. The lines of the Canada Southern were leased to the Michigan Central Railroad Company for a period of 999 years from January, 1904.

During the fiscal year 1911 the Michigan Central Railroad Company, the guarantor, earned a total of \$2,116,364, after the payment of fixed charges, including rentals, etc.

ROYAL CANADIAN AGENCIES, LIMITED

The Royal Canadian Agencies, Limited, with head office in Winnipeg, have moved into large and commodious offices, occupying the entire third floor of the new Union Trust Building. This company is a combination of Messrs. W. Sanford Evans & Company, Savage & McGavin, and Henry F. Mytton. The directors are W. Sanford Evans, Henry F. Mytton, J. C. McGavin, J. M. Savage and N. J. Black, secretary. Mr. Mytton is the Canadian managing director of the British Crown and other Investment Companies, Limited, who have large amounts of money invested in Western enterprises.

The Royal Canadian Agencies are managers of the Canadian Bond and Mortgage Corporation, of which Mr. J. C. McGavin is managing director. This company was organized last summer and commenced business with a subscribed capital of one million two hundred and fifty thousand dollars (\$1,250,000).

In Insurance Companies the Royal Canadian Agencies represent Le-Union (of Paris), the British Crown and English Companies and the Germania and American Company. They also have the general agency of the National Surety Company, of New York, and Lloyd's Plate Glass Insurance Company. They are members of the Winnipeg Stock Exchange, and have recently organized the Boulevard Realty Company, Limited, having a paid-up capital of over a half million for the purpose of handling Winnipeg real estate.

During November a daily average of 1,810 cars in and out were handled at the Fort William terminals of the Canadian Pacific Railway.

ROYAL BANK AND ALBERTA

Case Regarding Alberta Waterways Railway Moneys Reached Privy Council—Hearing This Week

The final stage of the Alberta and Great Waterways Railway incident is being reached. Argument began this week before the Privy Council in the case of the Royal Bank of Canada and others against the provincial government of Alberta, the question at issue being the validity of an act of the legislature respecting the Alberta and Great Waterways railway project.

The history, in brief, of the dispute is as follows:—An issue of \$7,400,000 5 per cent. 50-year first mortgage bonds of the Alberta and Great Waterways Railway, guaranteed by the provincial government, was made in London at 110 by Messrs. J. S. Morgan & Company, in December, 1909. The proceeds were placed on deposit in three Canadian banks.

The route and length of the road were: Edmonton, north-east of Athabasca River to Fort McMurray, 350 miles.

The government pressed the railroad agreement, a crisis occurred, and the provincial cabinet was dissolved.

A royal commission was appointed to investigate the deal. Their report was of little value, material witnesses not having been summoned to give evidence. The provincial government cancelled the railroad agreement, alleging that the company had defaulted in bond interest.

The provincial government sought the proceeds of the bond sale from the banks which had the money on deposit. The banks refused to hand it over without an order of court.

The provincial government commenced action against the company for the money and judicial decision was made in favor of the province. An appeal was lodged.

The Supreme Court of Alberta, in April, 1912, dismissed the appeal of the Royal Bank from the decision rendered in the lower court. An appeal was then made to the Privy Council, which commenced the hearing this week.

Says Act Was Ultra Vires

Sir Robert Finlay, in opening the appeal, says a Canadian Associated Press cable, said that the main defence to the claim was that the act of 1910, requiring payment to the provincial treasurer, was ultra vires, but it was contended that, even if valid, it was not got on a proper construction to support plaintiff's claim; because the act was ultra vires, the legislation of which did not come within any of the clauses of the subjects assigned by section 92 of the British North America Act to the Provinces, because it dealt with essential banking legislation, which was assigned exclusively to the Dominion under section 91, and was in conflict with the Dominion Bank Act of 1906, in altering a time deposit to a demand deposit. In destroying a banker's lien and in destroying effect of the assignment, which was a valid security under the bank act. Again, it confiscated private property for the raising of revenue.

Powers of Two Statutes

Sir Robert went on to deal at considerable length with the two acts over which the question turned, namely, the provincial statute and section 93 of the British North America Act of 1867, and the powers which those two statutes read together purported to confer. He desired to emphasize that the provincial act gave no power to raise revenue for provincial purposes except by legitimate taxation, and gave, therefore, no power to do that which was here complained of, namely, to augment the revenue by confiscation.

The Lord Chancellor, interposing: "You say that the subject matter of the provincial statute does not fall within any of these clauses enumerated in section 92 of the British North America Act of 1867?"

Would Affect Rights

Sir Robert: "Certainly, that is my point. I say, further, that the money on deposit which the statute purports to deal with does not fall under the head of property and civil rights in Alberta province. This would affect the rights of many persons outside the province, and, therefore, outside the act altogether."

Sir Robert Finlay, then spoke of the provincial legislature passing two acts in 1910, the first containing three important provisions, firstly, confirming the guarantee; secondly, directing that the proceeds of the sale bonds and interest in certain banks including \$6,000,000 in the Royal Bank, should form part of a general fund for Alberta province, clear from any claim by the railway, and enacting that such deposit, with all accrued interest, should to the extent which it was so held be paid the provincial treasurer without a set off deduction whatsoever, and, thirdly, that the province should, as between itself and the railway, be primarily liable upon the bonds to the several holders thereof, and that the province should indemnify the railway's assets and undertakings from any claim under the bonds.

The Lord Chancellor, interposing—"This legislation was treated as public legislation?"

Counsel—"Yes, no notice was given to the defendants. The provincial treasurer on the day the statute was passed notified the bank requiring payment of the amount of deposit with accrued interest. A cheque was presented at the bank and payment refused. On the same day the bank was notified that interest would be claimed at five per cent. Proceedings were then taken against the bank, and the other defendants were joined on their application."

Power to Borrow Money Defined.

The Lord Chancellor—"The result so far is that the trial judge gave judgment for six millions to plaintiff with interest at three and a half per cent. on appeal. Judges of the Supreme Court unanimously confirmed it."

Sir Robert Finlay—"They were unanimous that plaintiffs were entitled to judgment for the capital sum claimed, but were not unanimous concerning the interest."

The Lord Chancellor—"You said your main ground of appeal was that the statute passed in December, 1910, was ultra vires of the provincial legislature?"

Counsel replied that was so. The power of the provincial legislature to raise money was defined by section 92 of the British North America Act to be direct taxation within the province, borrowing money on the sole credit of the province, the management and sale of public lands, and the issue of licenses.

Lord Atkinson—"You say the provincial treasurer claims what is not within any one of these powers?"

Had Force only in Alberta.

Counsel—"I say it is simple confiscation." Sir Robert proceeded to submit a case as illustration, in the judgment of Dobie v. Temporalities Board in 1882, when Lord Watson said: "But that the provincial legislature shall have the power also to confiscate these funds, or any part, for provincial purposes, is a proposition for which no warrant is found in the 1867 act." Sir Robert Finlay submitted that action against a branch of the bank was altogether an action against the bank itself. The appellant bank was the Edmonton branch of the Royal Bank, whose chief offices were at Montreal, consequently it was an attempt to compel the bank at Montreal to obey an act which had force only in Alberta.

The bank was entitled to know to whom it was really liable from a banking point of view. The position of the plaintiffs was wholly ultra vires. It made the bank's position that of a stakeholder rather than that of a bank towards a client who had deposited money in the ordinary course of business.

Unanimous on Main Point.

The Lord Chancellor—"I agree that the bank cannot be in a fiduciary position to two rival claimants at the same time."

Counsel then discussed very fully the evidence at the trial.

The Lord Chancellor intimated they did not desire to have the judgments of the Supreme Court read in full. They were unanimous on the main point, namely, the right of the government to annex the balance at the bank. Counsel thereupon soon concluded. R. B. Bennett, K.C., was heard on special points affecting the bank.

Mr. Buckmaster then opened for the respondents, asserting the bank was debtor to the provincial treasurer in the sense that he was made a customer of the bank under the provisions of chapter nine, Alberta, 1910. The cheque ought, therefore, to have been paid. If any legal claim ever existed against the fund in question in favor of the third parties it was extinguished by certain provisions in that statute.

BANK OF TORONTO

The annual meeting of the shareholders of the Bank of Toronto will be held on January 8th, when an excellent statement for the twelve months ended November 30th, 1912, will be presented. The paid-up capital of the bank is now \$5,000,000, and the "rest" fund \$6,000,000, the premium on new stock, \$391,950, being added during the year. The average amount of paid-up capital for the fiscal year was \$4,926,006, on which net profits were \$835,787, or a profit of 16.96 per cent. on capital. The balance of profit and loss account is \$176,578.

The Bank of Toronto has available cash assets of \$12,189,000, or about 30 per cent. of total deposits, which amount to \$41,622,000. In addition it has fixed assets of \$47,000,000, or total assets of over \$59,000,000.

Mr. J. M. Robinson was elected president of St. John board of trade.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Sturgeon Falls, Ont.—December 7.—Ontario Hotel. Loss \$10,000.

Stayner, Ont.—December 1.—Clark Block. Loss \$2,000. Cause unknown.

Hepworth, Ont.—Mr. E. M. Clements' Flour Mills. Loss and cause unknown.

Edmonton, Alta.—November 29.—Twin City Coal Mine. Loss and cause unknown.

Westville, Ont.—House rear North Street. Loss unknown. Cause, upset lamp.

Prince Albert, Sask.—December 4.—St. Regis Hotel. Loss \$200. Cause unknown.

Dundalk, Ont.—December 4.—Mount Forest Casket Factory. Loss and cause unknown.

Ruthven, Man.—December 5.—Methodist Church. Loss unknown. Cause, upset lantern.

St. Catharines, Ont.—December 2.—Russell Hotel. Loss slight. Cause, pan of fat ignited.

Windsor Mills, Ont.—December 2.—Model School. Loss unknown. Cause, dropped lantern.

Moose Jaw.—December 2.—Barn on 11th Avenue. Loss unknown. Cause, supposed incendiary.

Osaquan, Ont.—November 30.—Mr. D. L. Mather's planing factory. Loss and cause unknown.

Port Colborne, Ont.—December 4.—Mr. W. J. Hogan's steel derrick. Loss and cause unknown.

Westfort, Ont.—December 4.—Ruthenian Hall. Loss \$1,550. Insurance \$1,250. Cause, from stove.

Tottenham, Ont.—December 4.—Mr. McNabb's residence, Huron Street. Loss and cause unknown.

Oxbow, Ont.—November 30.—Mr. J. Guittard's barn. Loss unknown, partially insured. Cause unknown.

Guelph, Ont.—December 2.—Mr. Coulson's tobacco store, Upper Wyndham Street. Loss and cause unknown.

Frankford, Ont.—December 4.—Mr. D. Coyle's apple storage. Loss \$12,000, partially insured. Cause unknown.

Scott, Sask.—November 27.—Mr. R. P. Waldo's residence, S.E. 14-39-21. Loss \$1,000. Cause, defective chimney.

Windsor, Ont.—December 4.—Windsor Steel Mat Company, galvanizing room. Loss \$50. Cause unknown.

Dunnville, Ont.—December 2.—Mr. T. McQuillen's barns, Forks Road. Loss unknown. Cause, lantern exploded.

Cobalt, Ont.—December 9.—Seneca Superior Mine, head frame, rock house, etc. Loss \$13,000. Cause unknown.

Glace Bay, N.S.—December 2.—Mr. A. McDonald's residence, McDougall's Lane. Loss \$10. Cause, defective flue.

Portage la Prairie, Man.—December 1.—C.P.R. car loaded with canned goods. Loss unknown. Cause, oil heater.

Portage la Prairie, Man.—December 5.—Mr. C. McLeary's residence, west of the city. Loss and cause unknown.

Thornbury, Ont.—December 7.—Messrs. Reid and Best's evaporator. Loss \$6,000, partially insured. Cause unknown.

Welland, Ont.—December 8.—Mr. W. Minnis' residence, Hellems Avenue. Loss unknown. Cause, overheated chimney.

Port Arthur, Ont.—December 4.—Mrs. Cooke's residence, Algoma Street North. Loss unknown. Cause, ignited curtains.

Zurich, Ont.—December 6.—Mr. J. Meidinger's apple drying building. Loss \$1,000, no insurance. Cause unknown.

Berlin, Ont.—December 4.—Mr. W. T. Barrie's building. Loss \$1,000. Mr. S. O. Schmitt's stock, \$2,000. Cause unknown.

Cazaville, Que.—Barns owned by Mr. A. Quenneville, Valleyfield, and Mr. L. Carrier, Sr. Loss and cause unknown.

Hespeler, Ont.—December 11.—Canada Machinery Corporation plant. Loss \$20,000, partially insured. Cause unknown.

Conmee Township, Ont.—December 3.—Mr. M. Colpitt's residence, concession 1. Loss unknown. Cause, defective stove pipe.

Newmarket, Ont.—December 3.—Residence, owned by Mr. C. Lundy, Bolton Street. Loss unknown. Cause, overheated stove pipe.

Renfrew, Ont.—December 6.—Mr. R. B. Campbell's residence. Loss and cause unknown. Mr. Campbell has experienced three fires.

Owen Sound, Ont.—December 1.—Mr. J. Keeling's residence, 1179-16th Street East. Loss unknown. Insurance \$500. Cause unknown.

Yarmouth, N.S.—November 28.—N. Witham Street; residence owned by Mr. F. Doucette, Harrison Avenue. Loss and cause unknown.

Yarmouth, N.S.—December 10.—Conflagration destroying Queen's Hotel, numerous residences, garage, newspaper office, etc. Cause unknown.

Hawkesbury, Ont.—December 9.—Mr. Leclair's residence. Loss and cause unknown. Mr. Leclair and his wife both lost their lives in this fire.

Kenora, Ont.—December 4.—Mr. C. J. Dooley's residence. Loss and cause unknown. Mr. Dooley's daughter lost her life in this fire.

Montreal, P.Q.—December 7.—Mr. Goger's residence near Canadian Northern tunnel portal. Loss unknown. Cause, upset lamp.

Regina, Sask.—December 3.—Mr. Cowan's residence, 2317 Toronto Street. Loss unknown. Cause, supposed children playing with oil stove.

Oakville, Ont.—December 7.—Mr. S. Joyce's residence on Forster farm. Loss slight. Cause, overheated chimney. December 10.—Public school marsh. Set alight.

Callander, Ont.—December 3.—Miss Smith's millinery store \$500, Mr. F. W. Fowler's general store. Loss \$15,000. Insurance \$7,000. Mr. J. Hick's grocery store. Loss \$5,000.

Shelburne, Ont.—November 29.—Mr. W. Hall's barns, etc. Loss unknown. Insurance, Mr. Hall \$1,000, Dufferin Farmers' Mutual Company; Mr. Best, \$500 in same company.

North Bay, Ont.—December 3.—Mr. J. Hick's grocery store, Mr. F. Forwlois' general store, Miss Smith's millinery store, 12 miles from North Bay. Loss, \$75,000. Cause unknown.

Dryden, Ont.—December 4.—Presbyterian church. Loss \$25. Cause unknown; Mr. G. Elliot's residence. Loss and cause unknown; Dare's shoe repairing store. Loss and cause unknown.

Assinibola, Man.—December 3.—341 Kensington Street, owned by Mr. S. Smith, Furby Street; residence between Bradford and Kensington Street. Cause of both fires, supposed to be incendiary.

Quebec, Que.—December 3.—Mr. J. T. Cote's residence, corner St. John and d'Aiguillon. Loss \$500. Cause, furnace. December 11.—Nova Scotia Steel and Coal Company's coal shed. Loss nearly \$20,000. Cause unknown.

Fredericton, N.B.—November 30.—Mr. C. H. Burt's residence, Park Street. Loss and cause unknown. Mr. Dykeman's residence, York Street. Cause, chimney; Mr. C. E. Miller's residence, St. John Street. Loss and cause unknown.

Kingston, Ont.—December 10.—Swift Coal Company's shed and office. Loss \$1,000. Insured with Waterloo Mutual. Cause, spark lodging between studding and outside wall.

December 11.—Steamer "Sowards." Loss \$1,000. No insurance. Cause unknown.

North Vancouver, B.C.—December 2.—Mr. A. Philip's residence, 242 Second Street. Loss \$200. Cause, rubbish heap.

December 5.—Mr. Duval's residence. Loss unknown, includes \$250 in cash. Insurance, building \$1,000. Cause unknown.

Hedley, B.C.—November 21.—Mr. J. Jackson's hotel. Loss, building, \$4,500; contents, \$3,500; fixtures, \$750. Insurance, building: Montreal Canada, \$1,000; New Jersey Insurance Company, \$1,000; Sovereign, \$1,000; Rimouski, \$500; contents, Dominion Fire, \$1,000; fixtures, \$500. Cause, kitchen range. Adjusted by J. S. Rankin, Vancouver.

Vancouver, B.C.—November 24.—Mr. C. A. Scurry's residence. Loss, building \$500, contents \$500. Insurance, building \$800. Hartford Fire Insurance Company. Adjusted by J. S. Rankin, Vancouver.

November 29.—325 Homer Street. Loss \$25. Cause, shavings ignited.

December 5.—Restaurant, corner Powell and Main Streets. Loss and cause unknown.

Winnipeg, Man.—December 2.—333 Bannerman Street. Loss and cause unknown; 259 Cathedral Avenue. Loss and cause unknown.

December 4.—Cottage on Bradford Street, St. James. Loss \$450. Cause unknown.

December 8.—Messrs. Potter's wholesale furniture warehouse, Messrs. Bromley and Hagues and McKenzie Brothers' premises. Loss \$250,000. Cause unknown.

Saskatoon, Sask.—November 25.—Cleaning store. Loss \$300. Cause unknown; Messrs. Nicholson and Bain's warehouse. Loss slight. Cause, hot ashes.

November 27.—Messrs. McGuire & Company, offices. Loss \$25. Cause, overheated pipes.

November 28.—Office rear 126 2nd Avenue. Loss slight. Cause, hot ashes.

December 1.—Corner Avenue C. and 22nd Street. Loss and cause unknown.

State Lake, B.C.—November 22.—Mr. Salisbury's residence owned by Western Canada Power Company. Loss, building \$400, contents \$200. Insurance under total schedule of \$64,800, as follows:—Royal, \$15,000; Northern, \$10,000; London and Lancashire, \$10,000; Guardian, \$5,000; Manitoba, \$5,000; Agricultural, \$5,000; North British, \$2,500; Alliance, \$5,000; Liverpool and London and Globe, \$2,500; Union, \$2,400; Western, \$2,400; total, \$64,800. Adjusted by J. S. Rankin, Vancouver.

Port William, Ont.—December 3.—Mr. J. Neville's automobile, 137 Cameron Street. Loss \$1,200. Insured. Cause, engine back-firing.

December 4.—Ruthenian Hall, 905 Superior Street. Loss \$1,500, partially insured. Cause, supposed overheated stove; Mr. P. Czepesak's store. Loss, building \$300, stock \$200; Mr. F. Wolt, 903 Superior Street, 12 tons hay and 5 loads green feed. Loss \$250. These two fires were caused by burning of hall.

December 6.—Mrs. J. Dunlop's residence, 553 McKellar Street. Loss \$10. Cause, defective stove pipe; Mrs. Frankish's residence, 315 Tupper Street. Loss unknown. Cause, stove set floor alight.

Toronto.—November 26.—76 York Street. Loss, stock \$200, building \$75. Cause, defective chimney.

November 27.—Rear 128 Markham Street. Loss, contents \$3, building \$75. Rear 130 Markham Street. Loss, contents \$100, building \$75. Cause, sparks from bonfire.

November 29.—Mr. G. A. Abraham's residence, 35 Muir Avenue. Loss, contents \$200, building \$15. Cause unknown.

November 30.—Mr. G. Patterson's residence, 436 Sherbourne Street. Loss, building \$25, contents \$25; Mr. E. J. Norman's residence, 10 Spruce Hill Road. Loss, building \$200. Cause, defective grate.

December 5.—Belding Paul building, top floor. Loss and cause unknown.

December 6.—20-22 Wellington Street West. Loss: The Hartwick Fur Company, \$4,000; the strong Fancy Goods Company, \$667; the Mikado Japanese Silks Company, \$2,847; Ross and Wright, Toronto, adjusters for the insured; W. H. Payne and Company, woollen goods, \$3,000; Boulter, McMillan and Company, woollen goods, \$7,500; Ross and Wright, Toronto, adjusters for the insured; Wm. R. Begg, manufacturers' agent, \$300; Herman E. Boulton, manufacturers' agent, \$200. Cause, supposed defective wire; Mr. C. J. McKeggie's residence, 121 Park Road. Loss, building \$50, contents \$75. Cause, gas jet; St. George's Hall, Elm Street. Loss \$300, fully insured. Cause, supposed match thrown down ventilator.

December 10.—Swamp set alight; Mrs. M. Moirs residence, 254 Bellwoods Avenue. Loss \$30. Cause, sparks.

December 7.—Ideal Dress Company, 592 Yonge Street. Loss \$3,500. Insured with German American and one other company. Cause unknown. Ross and Wright, Toronto, adjusters for the insured.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Parry Sound, Ont.—November 30.—Mr. J. Tuck's residence. Loss \$300. No insurance. Cause, defective stove pipe.

Viking, Alta.—November.—Fire hall. Property loss, \$700. Insurance, Canadian Fire \$500. Adjusted by E. A. Lilly, adjustment agency, Calgary.

Vancouver, B.C.—November 16.—Mrs. C. E. Beard's residence. Loss \$150. Insurance, \$9,000 Commercial Assurance Union. Cause, defective chimney. Adjusted by J. S. Rankin, Vancouver.

Tête Jaune Cache, B.C.—November, 1912.—Crummy and Lambert, general store. Insurance, Norwich Union \$2,000, National Union \$2,000. Being adjusted by E. A. Lilly, adjustment agency, Calgary.

New Westminster, B.C.—October 19, 1912.—Mr. N. H. McQuarrie's residence. Loss \$215. Insurance, \$5,000. Agricultural Insurance Company. Cause, defective place. Adjusted by J. S. Rankin, Vancouver.

New Norway, Alta.—November 16.—James F. Willows, implement warehouse. Loss on building \$4,000. Insurance, Royal \$4,000. Loss on stock \$800, not insured. Adjusted by E. A. Lilly, adjustment agency, Calgary.

Buctouche, N.B.—November 6.—Barn owned by Herbert Murray, totally destroyed. Insured Royal \$500. Dwelling, damage \$75, insured Royal. Furniture of John A. Irving, damaged, \$200, insured Royal. Cause, spark burning rubbish.

Loughboro' Inlet, B.C.—Messrs. Davidson Ward Company's saw mill, bark and mess houses. Loss, building \$2,500. Cause, stove pipe. Commercial Union Assurance Company, Limited. \$30,000 covering entire plant, insurance on items affected being \$3,500. Adjusted by J. S. Rankin, Vancouver.

Coleman, Alta.—November 12.—International Coal and Coke Company, locomotive shed, machine shop, snow sheds and contents. Property loss \$25,000. Insurance, Lloyds \$30,300, Mount Royal \$6,080, Pacific Fire \$5,000, Underwriters of Pennsylvania \$17,500. Adjusted by E. A. Lilly, adjustment agency, Calgary.

Summerland, B.C.—November 7.—Mr. A. Richardson's sawmill near here. Loss, building \$1,500, contents \$7,500. Insurance, Commercial Union Assurance Company, schedule, \$1,666.66; Nova Scotia, schedule, \$1,666.66; Insurance Company of North America, schedule, \$1,666.66; total, \$5,000. \$1,000 on building and \$4,000 on machinery; total loss. Cause, sparks from boiler. Adjusted by J. S. Rankin, Vancouver.

New Glasgow, N.S.—November 27.—The office building of the Wm. P. McNeil Company, Limited, bridge builders. Loss \$8,900. Loss to insurance companies \$4,900. Insurance under schedule. Fidelity Underwriters \$10,500, Rimouski \$10,000, Northern \$10,000, Sun \$7,500, Yorkshire \$7,500, and \$5,000 each in Insurance Company of North America, British America, New York Union Agency, Atlas, Occidental, Hudson Bay, and Continental, \$2,500. Cause unknown.

Medicine Hat, Alta.—December 2, 1912.—Birnie Brothers, hardware store. Property loss \$40,000. Insurance, Atlas \$2,000 British America \$3,000, British and Canadian Underwriters \$3,000, Canadian \$2,000, General \$3,000, Liverpool and London and Globe \$1,000, North British and Mercantile \$2,000, National Fire \$6,000, Phoenix of Hartford \$4,000, St. Paul, \$6,000. Barker and Pattan, dry goods store. Property loss about \$30,000. Insurance \$28,500. Liverpool, Manitoba, \$15,000, Springfield \$5,000, Germania \$3,000, North Empire \$3,000, Quebec \$2,500. Adjusted by E. A. Lilly, adjustment agency, Calgary.

Toronto, Ont.—December 6.—74 Bay Street, Canadian Fine Art Company, \$1,500; Messrs. J. Schwartz and Company, \$900; building, \$900. Messrs. Ross and Wright, Toronto, adjusters for the insured. Austin and Company, \$800. Messrs. Ross and Wright, Toronto, adjusters for the insured.

December 3.—Mr. H. B. Latimer's, 508 Dovercourt Road. Building, loss \$400; insurance, \$400 Royal and Aetna Companies. Contents, loss \$2,000; insurance, \$2,000 Royal and Atlas Company. Messrs. Ross and Wright, adjusters for the insured. Art Metropole, Yonge Street. Loss, building \$8,000, machinery \$2,000, stock \$71,000. Insurance, building \$28,000, machinery \$3,500, stock \$42,500 with Scott and Walmsley's Companies, Royal and other companies. Cause unknown.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of December 14th, 1911; December 5th, and December 12th, 1912, with percentage change.

	Dec. 14, '11.	Dec. 5, '12.	Dec. 12, '12.	Ch'ge %
Montreal.	\$51,531,092	\$61,189,536	\$60,567,345	+ 17.3
Toronto.	41,304,268	48,290,114	48,394,272	+ 16.9
Winnipeg.	30,530,041	45,263,248	41,049,735	+ 34.4
Vancouver.	11,627,445	14,332,552	13,124,214	+ 12.8
Ottawa.	5,145,264	4,451,910	3,578,863	— 30.4
Calgary.	5,140,410	6,619,527	6,184,559	+ 20.3
Quebec.	2,775,604	3,975,882	3,830,357	+ 37.9
Victoria.	2,680,133	4,192,741	4,066,601	+ 51.2
Hamilton.	2,786,002	4,415,092	3,660,603	+ 31.3
Halifax.	2,073,856	2,540,613	2,066,701	— 0.3
St. John.	1,660,855	1,066,068	1,042,022	+ 16.2
Edmonton.	3,237,070	5,412,430	5,003,375	+ 54.2
London.	1,556,882	2,157,593	1,958,833	+ 25.7
Regina.	2,325,683	3,033,715	2,885,695	+ 24.0
Brandon.	741,270	1,040,627	806,067	+ 20.6
Lethbridge.	660,644	824,444	627,075	— 6.2
Saskatoon.	1,050,827	3,075,832	2,870,634	+ 47.5
Brantford.	550,322	702,855	640,315	+ 16.1
Moose Jaw.	1,147,126	2,052,761	1,844,060	+ 60.6
Fort William.	570,200	1,054,774	1,022,308	+ 79.2
Total.	\$170,123,703	\$216,611,223	\$206,312,733	+ 21.2

The British Columbia Electric Railway Company will build into Port Mann, and connect this new railroad city with its system on the lower mainland of British Columbia.

UNITED STATES FACTORY EXPORTS

Total Forms Over Fifty Per Cent. of Entire Exportation of Domestic Products for the First Time

More than half the foreign trade of United States commerce this year is conducted by or on behalf of their manufacturers. The value of factory products exported from the United States in the ten months ended with October was \$607,000,000 worth of manufactures ready for consumption and \$321,000,000 worth of manufactures for further use in manufacturing, their total forming 50.3% of the entire exportation of domestic products, this being the first time in which manufactures formed as much as 50% of the exports of the period in question. The value of crude materials imported for use in manufacturing was \$524,000,000, and of manufactures for further use in manufacturing \$263,000,000, the combination of the two classes of materials for use in the factories forming 52% of the total imports of the period under review.

Over a Billion Dollars

These figures also seem to fully justify the prediction of the United States Bureau of foreign and Domestic commerce that the exports of manufactures in the year ending with December will exceed \$1,100,000,000, since a continuation during November and December of the monthly average attained in the ten months would bring the total above that sum. The value of manufacturers' materials imported during the year will apparently exceed \$900,000,000, making the aggregate value of merchandise imported and exported by, or on behalf of our manufacturers over \$2,000,000,000 against less than \$1,000,000,000 a decade ago.

This increase of more than 100% in ten years in the commerce conducted on behalf of United States manufacturers is chiefly due to increased quantities of merchandise moved, though in some degree to higher prices. Of India rubber, for example, the quantity imported in the ten months ended with October, 1912, was 97,000,000 pounds, against 41,000,000 pounds in a like period of 1902; while the value in 1912 was \$82,000,000 against \$20,000,000 a decade earlier, the price having advanced from about 50 cents per pound to 85 cents. Wool also shows a material increase in price, ten months' imports having increased in quantity from 149,000,000 pounds in 1912 to 212,000,000 pounds in 1912, while the value increased from \$16,400,000 to \$37,500,000, indicating an advance in price from 11 cents per pound in 1902 to 17 cents in 1912. Tin imported in the ten months increased from 71,000,000 pounds in 1902 to 99,000,000 in 1912, while the value rose from \$17,750,000 in 1902 to \$42,500,000 in 1912 and the price per pound from 25 cents to 43 cents. In most other cases, however, the increase occurs chiefly in quantity. Silk has nearly doubled in quantity as compared with ten years ago; hides and skins have also nearly doubled; cotton has increased more than 60%; tobacco has practically doubled, while copper shows a large increase both in quantity and value.

Heavy Iron and Steel Exports

On the export side the growth has been even more striking. Iron and steel manufactures exported in the ten months in question have increased from \$82,000,000 in 1902 to \$239,000,000 in 1912; copper manufactures, from \$40,000,000 to \$106,000,000; leather and manufactures of leather from \$25,000,000 to \$53,000,000; manufactures of wood, from \$40,000,000 to \$84,000,000; refined mineral oils, from \$51,000,000 to \$97,000,000; agricultural implements, from \$16,000,000 to \$35,000,000; electrical appliances and scientific instruments, from \$5,250,000 to \$16,000,000; cars and carriages, from \$8,000,000 to \$38,000,000, and automobiles from less than \$1,000,000 in ten months of 1902 to \$21,000,000 in the corresponding period of 1912.

Canada is an important factor in this trade. During the past fiscal year the United States obtained no less than 64.17 per cent. of our import business.

GRAND TRUNK AND NEW HAVEN RAILWAYS

In connection with the proposed traffic agreement between the Grand Trunk and the New York, New Haven & Hartford, it is stated that the final settlement of the points at issue is remote. The agreement is still in the hands of Mr. E. J. Chamberlin, president of the Grand Trunk, and his officials, and any changes which they may consider necessary will have to be submitted to the directors of the New Haven and approved by them. When all interested parties in Montreal and New York are in accord, the agreement must then be sent to London for ratification by the Grand Trunk board of directors. It is felt that all difficulties will be overcome in time since some kind of arrangement between the two roads is desirable for both.

PUBLICITY FOR PROGRESSIVE PACIFIC COAST

Associations Are Building for Future—Prevailing Conditions—Increased Products of Forest and Mine

(Staff correspondence.)

Vancouver, December 9th.

Associations in Vancouver, North Vancouver and New Westminster, are making preparations for arousing increased interest in the lower mainland. Vancouver has its progress club and its board of trade, and now the half million club is in the field, and is perfecting its organization. Its object is as the name would indicate, to have half a million population in Greater Vancouver in 1918. The Vancouver exhibition association is also starting a campaign to increase its membership to 5,000. The object of this organization is to have the annual exhibition one of the best in Canada, and a place where it can be seen what it is possible to do in British Columbia. Another organization is the Vancouver Chamber of Mines, composed principally of those who know about mining, and therefore are aware of the expansion that follows profitable mining operations. They are familiar with the resources of this province and will seek to interest capital in mining propositions in British Columbia.

New Westminster has its progressive association, and at a recent meeting it was decided to raise \$10,000 to carry on the work of publicity during the coming year. A quarter of this amount was subscribed at the meeting. It is expected that the Lewis and Clarke Steel Corporation, which is establishing a plant at Chambers Creek, near Tacoma, will have a branch plant at New Westminster, and all that is necessary is for the company and the city to agree on site matters. The company says it will be ready to build in four months. The Heaps Engineering is now erecting a large plant in New Westminster.

Lumber Mills are Active.

This being a good year for the lumber industry in British Columbia, has meant active mills in all parts of the province, and it is expected that this will be continued next year. Reports from the prairies are that stocks are well down, and the extent of which lumber is being absorbed is instanced by the fact that at one Western town ninety carloads of lumber were waiting to be unloaded. Immigration is steadily increasing and in 1913 there will be a greatly increased wheat area. With better times across the border, there is not so much American lumber being imported just now. That overseas markets may develop is the opinion of a visitor from South Africa. He says that timber is a dear article in South Africa, but at present Norway has the best opportunities, the long haul from British Columbia making the cost too high. With the opening of the canal, better rates might be obtained. And then shipments might also be made, to India, where timber is in demand for railway ties. Many Americans are interested in timber propositions in British Columbia and they look for a vastly increased business between British Columbia and Atlantic ports once the shorter route for traffic is available.

Shipping Is Showing Increases.

Increased shipping for Western Canadian ports is beginning to be mooted. It is announced that the British Indian Navigation Company, now operating between Calcutta and Yokohama, will extend its service across the Pacific, for which four steamers of 10,000 tons each are being built. The Royal Mail Steam Packet will also have boats on the Pacific. A recent arrival from the Clyde told The Monetary Times that when he left a few months ago, keels had been laid for four big boats by a company operating at present to the West Indies. As the steamers were not required for that trade, it was believed by shipping men that the intention was to go after North Pacific trade via the Panama canal. November's statistics show that percentages of increase are still being maintained in all lines.

Millions Invested in Mines.

Conditions in the mining districts of the southeastern part of the province are better than since the boom days. Large concerns are steadily developing to meet expanding conditions. The Grandby Company, in its first quarterly statement, says that a further expenditure of two million dollars will be made in connection with the development of its property at Hidden Creek, beyond Prince Rupert. The net profits of this company for the four months ended October 31st were \$140,000. The Consolidated Mining and Smelting Company, a Canadian Pacific Railway concern, has bonded a group of four copper claims on Howe Sound, being its first move in regard to coast properties. This company has a capital of \$7,500,000, and operates extensively in Kootenay and Boundary districts. The Britannia mine, also on Howe Sound, has 650 men on its payroll, and it is declared a fine body of ore has been opened up. This mine is less than thirty miles from Vancouver, being near the head of Howe Sound.

TWENTY-THREE MILLION DOLLARS

Is the Capitalization of Ninety Companies Receiving Charters This Week

Ninety-nine companies have this week received charters and their total capitalization amounts to \$23,613,000. Quebec heads the list with 25 companies.

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capital,
Quebec	25	\$11,273,000
Ontario	23	4,920,000
Manitoba	12	1,480,000
Saskatchewan	17	2,414,000
British Columbia	22	3,526,000
	99	\$23,613,000

The largest companies this week are:—

Abitibi Pulp and Paper Company, Montreal	\$5,000,000
National Wire Products, Montreal	1,500,000
Williams Manufacturing Company, Montreal	1,000,000
Pelham Pork Improvement, Hamilton	1,000,000
Canadian Fritchle Electric Automobile & Battery Company, Toronto	1,000,000
Overseas Securities, Vancouver	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Kelowna, B.C.—Western Cannery, \$250,000.
Canora, Sask.—Canora Rink Company, \$5,000.
Hanley, Sask.—T. O. Hamre and Sons, \$20,000.
Hosmer, B.C.—Hosmer Liquor Company, \$10,000.
Nelson, B.C.—Rutherford Drug Company, \$10,000.
Kamloops, B.C.—Gold Securities, (mining), \$300,000.
Weyburn, Sask.—Weyburn Wine and Spirits Company, \$5,000.
Sidney, B.C.—Sidney Printing and Publishing Company, \$10,000.
Estevan, Sask.—Great West Brick & Fuel Company, \$250,000.
Salmon Arm, B.C.—Mount Ida Mining and Development Company, \$300,000.
Sarnia, Ont.—Sarnia Golf Club, \$40,000. T. H. Cook, G. French, J. M. Newton.
Saskatoon, Sask.—Saskatchewan Conservatories, \$500,000. Redcliffe Securities, \$20,000.
Cochrane, Ont.—Cochrane General Hospital. W. S. Carter, O. Thorning, W. J. Quinn.
North Hatley, Que.—Jean B. Le Baron, \$20,000. J. B. Le Baron, J. R. McKay, C. A. Call.
Caledonia, Ont.—Roper Drug Company, \$20,000. C. E. Donaghy, J. M. Forbes, J. T. Arrell.
Sherbrooke, Que.—S. & W. Fortier, (grocers), \$19,000. S. Fortier, J. C. Fortier, R. V. Fortier.
Chesley, Ont.—Canada West Real Estate, \$100,000. C. J. Mickle, E. B. Caldwell, G. L. Phillips.
Quebec, Que.—P. Dumontier et Cie, \$50,000. J. J. Beaud, J. C. P. Dumontier, F. T. Leclerc.
Nanaimo, B.C.—Builders' Supply Company, \$25,000. Pacific Coast Packing Company, \$50,000.
Prince Albert, Sask.—One Northern Milling Company, \$250,000. Fuel Supply Company, \$20,000.
Cananogue, Ont.—Cowan & Britton, \$200,000. A. J. Thomson, W. S. Morlock, N. B. Wormwith, Toronto.
Megantic, Que.—Silver Lake Fishing and Game Club, \$10,000. P. H. Renaud, H. T. Buckley, E. O. Renaud.
Hamilton, Ont.—Pelham Park Improvement Company, \$1,000,000. G. H. Levy, M. J. O'Reilly, A. H. Gibson.
St. Thomas, Ont.—St. Thomas Metallic Vault Company, \$40,000. A. J. Stough, W. K. Cameron, Miss M. Ronan.
St. Jerome, Que.—Compagnie Manufacturiere St. Jerome du Lac St. Jean, \$20,000. J. B. Simard, T. Bolly, P. Deschene.
St. Hyacinthe, Que.—Compagnie Co-operative d' Immeubles, \$250,000. F. H. Daignault, Acton Vale; J. E. Phaneuf, St. Hugues.
Peterborough, Ont.—Peterborough Machine and Lubricator Company, \$60,000. E. R. Wilson, A. Gillespie, Peterborough; J. A. Davidson, Smith Township.

Princeville, Que.—Lacoursiere and Pepin, (wholesale and retail lumber), \$20,000. J. Lacoursiere, D. Lacoursiere, A. Pepin.

Regina, Sask.—Crystal Ice Company, \$25,000. Rutley Lumber Company, \$200,000. Craftsmen, \$150,000. Industrial Heights, \$28,000. Independent Real Estate Exchange, \$1,000.

Moose Jaw, Sask.—Richard Loney and Company, \$100,000. R. Loney, J. Craig, E. G. Loney. Cordova Building Company, \$300,000. Caswell and Davis Company, \$40,000. Moose Jaw Citizens Hotel Company, \$500,000.

Fort William, Ont.—Eureka Match Company, \$500,000. G. W. Pepper, O. A. Winter, A. Greengrove. Trans-Canada Land & Agencies, \$1,000,000. S. C. Young, W. C. Lillie.

Ottawa.—Lecky and Collis, \$50,000. W. S. Lecky, W. R. Rowatt, C. J. R. Bethune. Inventor's Machinery Company, \$40,000. M. Alexander, D. Burley-Smith, A. Labelle. Rideau Lawn Tennis Club, \$40,000. J. F. Orde, N. W. Lyle, Miss A. L. Deacon. Alumium Castings, \$40,000. T. H. Sedley, R. M. Kirby, R. G. Code. Carleton Drug Company, \$40,000. W. F. Garland, A. R. Legg, H. P. Hill. Currie-Livock, \$40,000. A. H. Currie, J. Livock, W. J. Carson.

Toronto.—Temiskaming Exploration Company, \$40,000. G. M. Miller, J. V. Guilfoyle, C. H. C. Leggott. Royal Typewriter Sales Company, \$40,000. G. H. Sedgewick, A. G. Ross, E. V. Macmillan. Canadian Fritchle Electric Automobile and Battery Company, \$1,000,000. G. H. Sedgewick, A. G. Ross, A. E. Langman. A. B. Ormsby Company, \$500,000. A. B. Ormsby, T. A. Rowan, J. E. Jones. Ellis, Jackson Hat Company, \$40,000. W. G. Ellis, W. R. Ellis, J. A. Coakwell. Canadian Multipost Company, \$50,000. D. J. Lynch, T. Williamson, W. J. Tubman. Minet's \$40,000. W. H. Walter, J. F. MacGregor, G. W. Morley.

Vancouver, B.C.—Barriere Land Company, \$100,000. Cariboo Power Company, \$250,000. Overseas Securities, (real estate), \$1,000,000. Whiteman and Shofner, \$15,000. (pottery, earthenware). Vancouver Cut Glass Company, \$10,000. Franco-English Delicatessen Company, \$10,000. Universal Wine Company, \$20,000. Forest Mills of British Columbia, \$500,000. Martins, \$6,000. (restaurateurs). Farmers International Loan Company, \$50,000. Great West Lithograph Company, \$300,000. Pill Box Drug Stores \$10,000. Lamb Lumber Company, \$200,000. Independent Securities, (loan company), \$100,000.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Kamloops, B.C.—A \$25,000 park improvement by-law was carried.

Prince Albert, Sask.—The council has decided to sell \$121,000 4½ per cent. debentures.

Tugaske, Sask.—The village will borrow \$4,000 for a skating rink. J. S. Crozier, secretary-treasurer.

Gabriel, Sask.—The village will borrow \$3,500 for sidewalks and roads. J. W. Hopton, secretary-treasurer.

Welland, Ont.—By-laws to provide \$5,500 and \$4,250 for water main extensions will be voted on in January.

Perdue, Sask.—The village has been authorized to borrow \$3,500 for a skating rink. H. W. Reeder, secretary-treasurer.

West Vancouver, B.C.—The ratepayers will be asked to vote at least \$80,000 for additional improvements at the January elections.

Weyburn, Sask.—A vote on by-laws to raise \$80,000 for a new collegiate and \$35,000 for power plant extensions may shortly be taken.

Victoria, B.C.—By-laws for swimming baths and an additional sum of \$40,000 to supplement the jail by-law will be voted on in January.

Covan, Sask.—Until December 16th for \$15,000 6 per cent. town hall debentures, repayable in 20 years. A. Graham, secretary-treasurer.

Nelson, B.C.—The council is issuing \$7,456 debentures bearing interest at 5 per cent., and redeemable in ten years, for sidewalk construction.

Gilbert Plains R.M., Man.—On December 17th ratepayers will vote on a by-law to raise \$30,000 for bridge construction and other municipal works.

Transcona, Man.—On December 17th ratepayers will vote on by-laws to raise \$85,000 for waterworks system and \$25,000 for a municipal building.

Kingston, Ont.—A by-law to purchase a combination hose and chemical motor car at a cost of \$7,850 will be voted upon at the January elections.

Portage la Prairie, Man.—On December 17th ratepayers will vote on a by-law authorizing the issue of a bonus to the Portage Development Company.

Vancouver, B.C.—An additional by-law for \$70,000 authorized by city council was added to those already carried to be voted on by the electors.

Montario Rural Municipality No. 262, Sask.—Authority has been granted the municipality to borrow \$5,000 for roads. H. Leach, secretary-treasurer, Montario.

Widdifield Township, Ont.—Application will be made for an act to consolidate the floating debt of \$10,000. Debentures will be issued in order to raise the necessary money.

East Kildonan S.D., No. 14, Man.—On December 17th the ratepayers will vote on a by-law to issue \$26,000 20-year debentures. H. Thompson, Winnipeg, secretary-treasurer.

St. Vital Rural Municipality, Man.—On December 17th the ratepayers will vote on a by-law to issue \$250,000 5 per cent. 30-year debentures. G. J. Charette, municipal clerk.

West Kildonan S.D., No. 8, Man.—A by-law to raise \$100,000 for school purposes will be voted on by the ratepayers on December 17th. H. Thompson, Winnipeg, secretary-treasurer.

Rosser Rural Municipality, Man.—On December 17th the ratepayers will vote on a by-law to issue \$110,000 4½ per cent. 30-year debentures for roads. W. H. Beachell, Rosser P.O., clerk.

Moore Township, Ont.—Until December 14th for \$32,000 5 per cent. debentures for purchase of St. Clair and Bridgen rural telephone system. C. C. Watson, township clerk, Bridgen.

Wadena, Sask.—Until December 20th for \$13,000 6 per cent. 40-year electric light and power debentures. J. F. T. Saich, secretary-treasurer. (Official advertisement appears on another page).

Minto Rural Municipality, Man.—A by-law to issue \$2,500 debentures for the Bethany S.D. No. 161, will be voted on by the ratepayers on December 17th. C. T. Turley, Minnedosa, secretary-treasurer.

Buchanan, Sask.—Until December 23rd, for \$5,000 6 per cent. 15-year debentures for permanent improvements. H. P. A. Hermanson, secretary-treasurer. (Official advertisement appears on another page).

Cobalt, Ont.—The council received a communication from the Public School board requesting the town council to pass a by-law for the sale of debentures to the extent of \$10,000

Petrolea, Ont.—A by-law to furnish Petrolea Motor Car Company, Limited, with water at cost, a fixed assessment and \$10,000 towards the erection of a factory building will be voted on by the ratepayers January 7th.

Assiniboia Rural Municipality, Man.—On December 17th the ratepayers will vote on by-laws to issue \$17,000 5 per cent. 10-year road, and \$50,000 5 per cent. 20-year bridge debentures. Frank Ness, St. Charles, municipal clerk.

Stratford, Ont.—At a special session the city council gave the street railway by-law its second reading, and it will go to the ratepayers on January 6th. The by-law grants the Stratford Railway Company a twenty-five year franchise.

Kamsack, Sask.—Until January 15th for \$2,000 5½ per cent. 5-year hospital, \$5,000 5½ per cent. 15-year road, and \$20,000 5½ per cent. 20-year town hall debentures. A. A. Crawford, secretary-treasurer. (Official advertisement appears on another page).

London, Ont.—Until December 30th, for \$231,400 debentures. J. S. Bell, city treasurer. (Official advertisement appears on another page).

The citizens will vote on a by-law to grant \$15,000 to the Queen Alexandra Sanatorium at Byron.

Athabasca Landing, Alta.—The period for receipt of tenders for the \$8,000 issue of waterworks debentures has been extended to January 2nd, 1913. The bank is carrying the town until the spring on that portion of the waterworks system which has and will be installed this fall and early winter. Mr. C. E. Nancekivell is secretary-treasurer.

Wilkie, Sask.—The ratepayers have passed by-laws authorizing the borrowing of \$76,500 for public improvements, as follows:—Electric power plant, \$10,000; waterworks, \$25,000; grading roads, \$1,100; extending waterworks, \$28,000; extending electric light system, \$2,250; fire protection, \$2,150; skating and curling rink, \$8,000.

Berlin, Ont.—The city council has decided to submit five by-laws, two of them industrial propositions, to the electors in the municipal elections. They are:—To grant a loan of \$9,000 to George Hashborn and Company, furniture manufacturers, for ten years, for the erection of a new factory; to grant a fixed assessment for ten years on the Lippert Furniture Company's plant, for which the company promises to erect a large four-story addition and to employ 100 more hands; to increase fire protection in the factory district by the erection of a fire station in the North Ward, which, with equipment, is to cost \$18,800; to spend \$6,000 on the erection of municipal barns, and \$30,000 for the establishment of a modern abattoir.

SOME GRAND TRUNK DEBENTURES LEFT WITH
UNDERWRITERS

The underwriters have taken 38 per cent. of the Grand Trunk Railway issue of £1,000,000 4 per cent. debentures in London this week.

They have also taken 44 per cent. of the Western Australian £1,000,000 4 per cent. inscribed stock.

FARMERS BANK INQUIRY CLOSED

The Farmers Bank inquiry was closed this week. Sir William Meredith, the commissioner, after digesting the exhibits and testimony will present his report.

Mr. Thompson acted as counsel, and produced a letter dated May 2nd, 1907, from Mr. T. C. Boville, Deputy Minister of Finance, Ottawa, to Mr. W. R. Travers, Toronto. It reads:—

"I am directed by the Honorable, the Minister of Finance, to call for a special return of your bank, showing:

"What portion, if any, of the \$375,473 paid-up capital of the bank, as per return of liabilities and assets of March 30, 1907, is represented by promissory notes, or other obligations of shareholders, or the proceeds of the same, of which the bank is the holder, or is liable thereon.

"Names and holdings of stock of such shareholders, if any, with particulars of such notes or obligations now current.

"In this connection, let me draw your attention to subsections 2 and 3 of section 113 of the Bank Act.

"I should be very much obliged to have this information at your very earliest convenience."

Mr. Travers, in reply, sent a special return, or what purported to be one.

No further light was thrown on the cheque for \$3,000 taken by Travers to Ottawa, and, so Travers says, sent by Travers to Mr. Peter Ryan's room at the Russell House, Ottawa. Mr. Thompson informed the commission that Mr. Ryan had not registered at the Russell House at that time. Mr. Ryan has previously denied having received or having

GRAND TRUNK AND PACIFIC FINANCING

BANKING AND COMMERCE COMMITTEE

Government to Purchase Large Block of Bonds—Two
Railroad Financing Bills Introduced

The financing of the Grand Trunk and of the Grand Trunk Pacific Railways is occupying considerable parliamentary attention. This week the Hon. W. T. White, Minister of Finance, submitted a resolution by which it is proposed to purchase Grand Trunk Pacific bonds. By this method the millions of dollars which go to the Grand Trunk Pacific Company through the "implementing" clause become an interest-bearing investment. This clause provided that the difference between the selling price of the company's bonds and par should be paid by the Dominion Government.

So far bonds have been issued for £7,200,000. They are guaranteed by the Dominion as to principal and interest, and not being a direct liability, have not brought high prices on the money market. At present they stand at 78. So far, as a result of the clause, the government has paid to the Grand Trunk Pacific no less than \$4,994,000.

Would Realize About Seventy-Four

There remains to be issued within the next two or three years £6,800,000. After allowing for sundry commission, etc., these bonds would, on the basis of the present market price, realize about 74, thus leaving 26 points, or some eight millions of dollars, to be made good.

What Mr. White proposes to do is from time to time to buy these bonds, which, as stated above, are guaranteed absolutely as to principal and interest by the Dominion Government. This year there will be a surplus of about fifteen to twenty million dollars after defraying all charges, current and capital. Part of this surplus will be devoted to purchasing these bonds, and in the ensuing two or three years the remainder will be taken up. The result should also strengthen all Dominion guaranteed securities on the London market.

Perpetual or Terminable Debentures

Two private bills were introduced in the House last week. One is called The Grand Trunk Pacific Act of 1913, and authorizes the Grand Trunk directors to issue perpetual or terminable debenture stock up to \$25,000,000, the proceeds from the sale of same to be applied toward the completion of the Grand Trunk Pacific, providing equipment and for the general purposes of the company.

Before the issue of any such stock the company is required to pass a by-law providing for the issue, and each such by-law shall form the basis of the issue, and shall provide the rate of interest, which, if deemed expedient, may be different from each issue.

These issues of debenture stock are required to be consolidated with the debenture stock issued or to be issued under the laws of 1906, and shall constitute a lien ranking *pari passu* with the debentures issued under the act of 1906 upon the property of the company described in the deeds of trust by way of mortgage set forth in the statutes of 1905.

Perpetual Consolidated Stock

The other bill authorizes the Grand Trunk Railway Company of Canada to raise by the issue of perpetual consolidated debenture stock, to be called Grand Trunk consolidated debenture stock, bearing interest at a rate not exceeding 4 per cent., such sum as the proprietors of the company may from time to time determine, provided that the annual interest upon the same shall not exceed £200,000 sterling. This stock shall rank equally and be consolidated with the debenture stock issued or to be issued as Grand Trunk consolidated debenture stock under any act now in force.

The bill provides that so much of the proceeds of the stock as the directors may determine may be used for the purpose of carrying out the powers conferred by Grand Trunk Acts of 1910, 1911 and 1912.

MONTREAL WILL NOT INVESTIGATE

The request of the Canadian Fire Underwriters' Association and the Montreal Board of Trade for an investigation of the waterworks department, has been refused. The civic board of control prepared a statement of the case against permitting such investigation, sending a copy of it to the Canadian Fire Underwriters' Association. The statement reviews the work done and projected in connection with the water system; states that the projects have already been studied by experts, and, coming down to the accident to the Worthington pump and the breaking of the main on St. Antoine street, says that it is difficult to advance a reasonable theory as to the causes of the accidents, but insists that the engineers have taken every precaution, and that there is nothing to lead one to impute criminal lack of competence or want of prudence of the engineers of the department.

The Canadian Mortgage Trust Company and Le Credit Hypothecaire Canadienne is the name of the latest trust company to secure a charter. It has a capitalization of \$1,000,000. Ex-Mayor Guerin is president.

The Dominion committee on banking and commerce consists of the following members of parliament:—Sir Edmund Osler, Sir R. Forget, and Messrs. Aikins, Ames, Armstrong (Lambton), Armstrong (York, Ont.), Baker, Ball, Barker, Barnard, Beattie, Bellemare, Bennett (Calgary), Best, Bickerdike, Blondin, Boivin, Boyce, Bristol, Buchanan, Burnham, Cardin, Carrick, Carvell, Charlton, Clark (Bruce), Clark (Red Deer), Cockshutt, Crockett, Currie, Demers, Donnelly, Edwards, Emmerson, Fisher, Fortier, Foster (King's, N.S.), Foster (Toronto, N.), Fowler, Gauthier (St. Hyacinthe), Graham, Guthrie, Haggart, Henderson, Hughes (King's, P.E.I.), Hughes (Victoria), Jameson, Kay, Kemp, Knowles, Law, Lemieux, L'Esperance, Loggie, Macdonald, Macdonell, Maclean (Halifax), Maclean (York, Ont.), McCraney, McCurdy, McLean (Sunbury), McMillan, Martin (Regina), Meighen, Middlebro, Nesbitt, Nickle, Northrup, Paeaud, Papineau, Pardee, Perley, Porter, Power, Pugsley, Rainville, Rhodes, Robb, Roche, Ross, Sexsmith, Sharpe (Lisgar), Sharpe (Ontario), Sinclair, Steele, Stewart (Hamilton), Stewart (Lunenburg), Sutherland, Thompson (Yukon), Thornton, Tobin, Ver-ville, Warnock, Webster, Weichel, and White (Leeds).

The quorum of the committee consists of twenty-one members.

BRITISH TRADERS MAY RUN CANADIAN SHOW TRAIN

At the last meeting of the council of the Sheffield chamber of commerce it was reported that the Canadian chamber of commerce in London had brought before the chamber the scheme of a mobile exhibition in Canada of manufactures of cities and towns of the United Kingdom.

The idea is that various cities and towns in Great Britain should hire one or more large bogey passenger cars from one of the Canadian railways for a period of at least two years, and that in the car a display should be made of the products of the city or town hiring it, and the car would be moved about from place to place in Canada. Each city or town would have to appoint a man to look after the exhibits, and living accommodation would be provided for him in the car. The Canadian chamber of commerce estimates that the cost of the hire of one car would be from £1,000 to £1,500 per year, which would include a haulage of about 10,000 miles, and it also estimates that, with additional expenses, the total annual cost (including hire, attendance, etc.) per car per annum would be about £2,640. The chamber also suggests that firms wishing to exhibit should be asked to pay for space at rates varying from £40 per foot per annum to £20 per foot per annum, in accordance with the position of the show cases.

MAKING SHEEP RAISING PROFITABLE

In their report on the sheep industry, the commissioners who investigated it on behalf of the Dominion Government state, among other things, that sheep in this country are, as a rule, poorly housed and poorly fed; that severe losses are sustained through lack of proper care during the winter season, and that from shearing to marketing no country in the world handles its wool in a worse manner. Besides pointing out these weaknesses of many Canadian sheep raisers, the commissioners report fully upon the state of the industry in Great Britain and describe how Old Country shepherds handle their flocks. "Evidences of a definite object in breeding operations," they state, "are to be found on every hand, a certain demand being kept in view and every effort made to build up a reputation, and afterwards to hold it." A farmer there may keep sheep of the breed popular in the district, and although they may not be eligible for record in an association flock book, they are very highly bred and young ewes are sold at very remunerative prices to neighboring farmers for crossing purposes. For producing early lambs the ewes are bred to lamb soon after New Years. Male lambs not intended for the early trade are always wethered. Besides grass pastures such crops as kale, vetches, rape, cabbages and turnips are grown for the sheep. These are often sown in succeeding periods in season, so that when one is consumed another is ready, thus providing fresh feed a great part of the summer. The sheep are not allowed to forage over large areas, but are often kept within portable fences, which are moved periodically to take in new patches. The same thoroughness is exercised in the treatment of the flock throughout the winter, with the result that sheep keeping is a highly profitable branch of English agriculture.

The report of the sheep commission is rich in information of the greatest value to persons interested in any branch of the sheep industry. Copies are still available for distribution to those who apply for them to the publication branch of the department of agriculture at Ottawa.

The greater portion of the grain around Brandon has been successfully harvested. The crop is the largest known and the financial situation is promising.

Mr. Walter Thomas, of Vancouver, is behind the proposal to establish a gas manufacturing plant in South Vancouver. For several years Mr. Thomas was manager of the Vancouver Gas Company.

MARITIME PROVINCE OF THE WEST

This Year's Grain Production—Municipalities Convention—Financial Interests.

Monetary Times Office,
Winnipeg, December 10th.

The Northwest Grain Dealers' Association has adjusted its acreage estimates in accordance with the Dominion Government census re report, and for November gives the following estimate of grain production for 1912:—

	Bushels.
Wheat, 10,126,000 acres at 18.6.....	188,333,000
Oats, 5,065,000 acres at 43.5.....	220,327,500
Barley, 953,000 acres at 33.0.....	31,449,000
Flax, 1,400,000 acres at 9.5.....	13,300,000
Wheat inspected to No. 1.....	34,433,670
Wheat in store at country points.....	19,132,000
Wheat in transit, not inspected.....	4,300,000
Wheat marketed in Winnipeg.....	30,000
Allow seed, feed and country mills.....	35,000,000
	92,895,670
Balance wheat to market.....	95,437,330
Oats inspected to date of report.....	6,805,800
Barley inspected to date.....	2,756,400
Flax inspected to date.....	1,670,000
20 per cent. of crop No. 4 and under.	

Better Grade Than Last Year

Official grain inspection figures showing inspection at Winnipeg by the government inspector for the two months ended October 31st show a slight falling off in quantity as compared with the inspection for the corresponding period last year, owing to lateness of movement in starting. Since it began, however, the movement has been at an unprecedented rate. For two months mentioned of the present year 34,594,575 bushels of wheat were inspected, as compared with 34,624,675 bushels for the corresponding period last year.

The grade, however, shows a superior quality this year. By carloads of 1,000 bushels each the following are comparative figures:—

	1911.	1912.
	Cars.	Cars.
No. 1 Hard	4	12
No. 1 Northern	1,834	5,394
No. 2 Northern	8,028	11,494
No. 3 Northern	8,329	5,974
No. 4 Northern	3,907	914

The larger quantity of the superior grade is a feature of the year's inspection. Nearly a million bushels more oats inspected during the months this year than last year, the figure being 6,805,806 bushels, as compared with 5,948,950 bushels; of barley, 1,670,000 bushels were inspected this year, as compared with 408,000 last year.

Manitoba Municipal Convention

At the convention of the Union of Manitoba Municipalities, which was attended by Mayor Waugh and most of the members of the council, and Hon. C. H. Campbell, minister of public works, acting premier of the province. The speakers included Mayor Waugh, Hon. C. H. Campbell, Lendrum McMeans, M.P.P., and President Forke, of the Union of Manitoba Municipalities. Replying to a toast of the province of Manitoba, Hon. C. H. Campbell referred to the early struggles of the province since Confederation, and said that it was the aim and desire of the government that the metropolis of Winnipeg be linked with the great inland sea of the north, so that the produce of Manitoba and the western provinces could in large measure be exported via that route. "We congratulate ourselves," he said, "that whilst hitherto we have been regarded as the great prairie province, that did the pioneer work of the west and demonstrated to the world that there was a great west in Canada, capable of being the granary of the empire, we have now enlarged our views, and have become a great maritime province in the province of Manitoba, and I hope before long that we will be able to advertise that you can leave the city of Winnipeg and arrive at the Hudson's Bay shores in less than 24 hours." A large amount of business was transacted during the sessions of the convention, and amongst other matters the movement for better roads was considerably strengthened.

The Fidelity Trust Company

The rapidity with which the things are accomplished in the west have been particularly noticeable in the promotion of the Fidelity Trust Company, with head office in Winnipeg. From the time the stock was placed on the market, only three weeks elapsed till full amount of the issue, \$900,000, was subscribed.

This company, also the Empire Loan Company, the Winnipeg Fire Assurance Company, and Messrs. Simpson and Mitchell, are moving this week into splendid new quarters, occupying the second floor of the new Union Trust Building, just being completed.

ALBERTA'S AGRICULTURAL AND MANUFACTURING ACTIVITIES

Clay Products Company's Plant Opened—Threshing Nearly Complete—Cattle Raising Proposals

(Special correspondence.)

Calgary, Alta., December 9th.

In Alberta alone it is estimated that the glove trade reached a million and a quarter dollars last year, and the opportunity for a glove factory in Calgary is to be taken advantage of by a firm from south of the international boundary.

The Tregillus Clay Products Company's initial plant at Ross-carrock Vale was formerly opened by Mayor Mitchell. Destined to be one of the largest brick-making establishments in Canada, the undertaking is in the hands of a close corporation of local capitalists, who have faith to the extent of millions in the resources of their own city. That the new company will supply all the clay products called for by the market is scarcely in accord with past history of other plants manufacturing building supplies.

Production and Demand

No matter how optimistic are the prognostications of future expansion, they are so largely exceeded that the market is some distance yet from an over supply. Woodworking factories, cement mills, brick yards, etc., come along with the announcement that they will do the trick, and about the time they are in working order their market has increased two or three-fold, and there is always being created opportunity for another one.

In the country districts, threshing is nearly completed, and a few more days will finish stook-threshing in all but exceptional instances. As measuring the advanced state of farm work over last year, it is noticeable that the sale of holiday tickets in Calgary to the United States and European points is much greater than last season at the same date.

Prizes for Animal Husbandry

At the Calgary Fat Stock Show and Poultry Fair this week, R. S. Hamer, B.S.A., from the live stock commission office, Ottawa, drew attention to the great decline in stock shipments from this country, the decline being 46 per cent. on the Winnipeg market. Accompanying this was an increase in importations, amounting last year to 160,000 sheep carcasses into Western Canada. Simultaneously, notice is given of a sale of 633 head of pure or good grade stock for producing purposes, brought from Ontario by private parties. The Canadian Pacific natural resources department has elaborated a scheme to encourage, by prizes and awards, animal husbandry as a special feature among the purchasers of its lands in Alberta.

RUBBER COMPANY'S STOCK OFFERING

The Dominion Rubber Company, with head office at Toronto, is offering for subscription at par \$300,000 eight per cent. cumulative preferred stock. The par value of shares is \$100. The proceeds of the issue are to be used to build and equip a factory and provide working capital. An elaborate prospectus has been issued by the company. Its capital stock is \$1,000,000, of which \$400,000 is eight per cent. cumulative preferred, and \$600,000 common with a par value of \$50.

The officers and directors of the company are as follows:—Messrs. John Doe, president and secretary-treasurer; John J. Main, managing director; W. R. Blower, general factory manager; W. Deane Tyre, general manager of sales; A. H. Perfect, M.D., and W. J. Ingram, president Bankers Mortgage and Trust Company, Cleveland and New York; president Bankers Bond and Mortgage Corporation, New York; former assistant general manager Merchants Bank of Canada; former auditor Pan-American Railroad.

COMPANIES ACT AMENDMENT

An amendment to the Companies Act, moved by Mr. S. S. Sharpe, M.P. for North Ontario, provides that companies organized by letters patent or by private act of the Dominion parliament shall hold annual meetings, make annual statements and have annual audits of their accounts. Under the Dominion Companies Act at present this is not provided for. In most of the provinces companies are required to make annual statements of their affairs. The present bill provides that companies chartered under Dominion jurisdiction shall make annual statements regarding shareholders, directors and officials, paid-up stock, assets and liabilities—generally that the information required under the Ontario Companies Act shall be filed with the secretary of state for the benefit of creditors and others desiring such information. There are minor provisions, but these are the main ones.

The Dominion Railway Board has granted a request for an order requiring railway companies during cold weather to furnish heated refrigerator cars for the carrying of perishable freight in less than carload quantities.

MODERN LIFE POLICIES

Ordinary Method is Neither Most Economical nor Wisest—New Method is Used Both in Canada and the United States

The old-fashioned policies, giving a uniform amount of insurance for the whole of life, are as much behind the age as tallow candles in these days of electric lights, and should therefore be retired from general use just as was the percentage method of making dividends when the sources of surplus came to be understood, was the suggestion of Mr. David Parks Fackler, senior ex-president of the Actuarial Society of America, at the sixth annual meeting of the Association of Life Insurance Presidents at New York. As a doctor who takes his own medicine, I would state that though my earliest insurances, beginning over forty-five years ago, were taken on the old-fashioned plans—ordinary, or limited payment life and long endowment—my later insurances, taken within the past twenty-five years, have in the main embodied the principles which I now commend to your attention.

The average family man needs insurance most while his children are young, and will need it less after they are wholly or partly grown up, when they will probably be able to contribute to the support of their mother. On these accounts it follows that men generally need a greater amount of insurance before the age of sixty than afterward. If we replace the ordinary life policy by a form of contract which will gradually curtail the insurance after the age of sixty is passed, we can for the same cost give a father a much larger amount of insurance up to the age of sixty, and also free him from all premiums at the age of seventy or seventy-five, when he will probably cease to be self-supporting.

Adjusted Indemnity or Economic Policies

The usual ordinary life policy is in the majority of cases neither the most economical nor the wisest; for it is surely a waste of money to pay for more insurance than is likely to be needed during old age, and it is wrong to undertake to pay premiums all through one's old age when the earning power will have ceased, so that the burden of payment will fall on others.

The special forms to which I would call attention were first introduced about fifteen years ago under the name of "adjusted indemnity" or "economic" policies. These forms provide that when the insured attains the age of sixty-one, and yearly thereafter, the insurance shall be reduced by five per cent., or \$50 per thousand, until age seventy-five is attained, when the reduction ceases, and the insured has a paid-up policy for one-fourth of the original amount, or \$250 for each original thousand.

Should any one think that this insurance for one-fourth of the original amount, \$250 per thousand, or \$2,500 out of \$10,000, beyond the age of seventy-five, is too small to be of any value, or else more than needed at that age, I would urge that when a man has attained the age of seventy-five it is unlikely that any one will be wholly dependent upon him; and on the other hand he is very liable to be dependent on others. For this reason it is desirable that he should have enough paid-up insurance to cover the doctor's bills, and other expenses that will be connected with his death and funeral; so that should he become dependent on others, he shall not have the unpleasant consciousness that his friends will have no guarantee of repayment for the expenses they may incur on his behalf.

Example Showing Benefits

The practical benefits of this plan will be illustrated by the following example:—If a man of thirty-five elects the twenty payment economic plan, he can obtain \$4,000 of insurance at no greater cost than for \$3,000 on the usual twenty payment life plan. For a man of forty the benefit would be still greater, as he could obtain nearly \$7,000 of insurance for the cost of \$5,000 on the usual plan, and a man of fifty would be given nearly \$8,000 at the cost of \$5,000. These instances show the great advantages of an economic distribution of the insurance benefit that can be purchased by a certain amount of premium.

Millions Have Been Issued

Some millions of insurance have been issued upon these plans in the United States and Canada. In some companies the last annual premium on the cheapest form is payable at age seventy-five, and in others at age sixty-nine; the latter age being chosen so that if premiums are paid quarterly there shall be no payment after age seventy is attained.

If agents are asked to fit people out with policies suited to their needs, the companies must provide the forms and make sure that they are appreciated by the agents themselves. The old-fashioned forms have survived partly because of their crude simplicity, and it may require some trouble to teach the agents how to present the new forms to the public, but it can be done, and then as before shown, great advantages will result both to the public and to the companies.

The companies owe it both to the public and to themselves to replace crude and antiquated forms of contract by others which are truly economic.

The Dominion Trust Company is erecting an eight storey building in New Westminster.

DOES NOT FAVOR STATE INSURANCE

Consulting Actuary Wolfe Gives Ontario Commission His Views on Workmen's Compensation

One of the most interesting witnesses at the Ontario Workmen's Compensation inquiry was Mr. S. H. Wolfe, consulting actuary, of New York. Mr. Wolfe was opposed to a state scheme of workmen's compensation, but admitted if the province came to the "unwise" conclusion that it was equal to the task there was no reason for not going ahead with it.

Mr. Wolfe agreed that there was urgent need of some form of compensation to take the place of the common law liability of employers with its costly litigation. He was inclined to look with favor upon the English system, which had little state interference and a maximum of personal freedom.

Employer Could Force Workmen

There was objection to the fact that the employer could force his workman to litigate his claim. Perhaps the most serious drawback of the British form of compensation was the fact that the workman injured had no guarantee that his employer would be solvent when the first payment was due or would continue solvent.

The Massachusetts system was favored by Mr. Wolfe as the best for Ontario. It provided for an employer bringing himself within the act by giving his employees statutory notice. He must become either a policy holder in a stock company or a mutual association authorized to transact business in the state. Another alternative is provided, that of becoming a member of the Massachusetts Employers' Insurance Association.

This association divides its members into groups according to the hazard, charging premiums in advance. After setting aside the necessary reserve to provide for the ultimate payment of losses that have occurred during any one year, the association is authorized to equitably apportion the unexpended balances among its subscribers.

German System is Expensive

Regarding the German system, Mr. Wolfe said the country was prepared for governmental supervision, because the government was more executive than legislative. It was impossible, he said, to present a definite statement of the cost of insurance for industrial accidents in Germany, because the accident department was closely interwoven with the administration of sickness funds, and the German mutual accident associations do not capitalize the future payments on accidents that occur in any one year. Mr. Wolfe pointed out that the benefits paid under the Massachusetts system were greater than those under the German method, while the relative cost to the manufacturer in Germany was greater than in England or the United States.

These Methods Ill Adapted

"I am of the opinion," said Mr. Wolfe, "that the methods now being followed in Germany, Ohio and Washington are ill adapted to the needs of Canada or any of the United States. I am of the opinion that the maximum benefit can be derived from the adoption of a type similar to that in use in the Commonwealth of Massachusetts, with such modifications as will make it applicable to the particular community which it is intended to benefit."

The North-West Brass Foundry Company, Limited, one of the largest concerns in the United States of its kind, operating at present thirteen factories in the United States and two in Canada, will establish a plant in Calgary, which it is estimated will cost \$300,000 to build, and will employ 500 men.

A feature of the grain handling at Fort William this year has been the entire absence of any blockage. This can be attributed to a great extent to the work of the Lake Shippers' Clearance Association, who are responsible for the prompt handling of vessels, not only in this port, but practically the movement of bottoms over the whole of the Great Lakes navigation. The enormity of the grain movement since the season opened can be gauged to some extent by the statement that over 1,000,000 bushels of grain per day has been loaded daily into the holds of vessels leaving the head of the lakes.

Clearly the Canadian Northern Railway intends beating the Grand Trunk Pacific in making entry into Calgary. Work at the Canadian Northern yards in Parkview is being rushed for the steel laying, and it is not impossible that a Canadian Northern engine may be at Calgary's city limits early in the new year. No definite information is forthcoming on the whereabouts of the Grand Trunk Pacific passenger depot. The Canadian Pacific Railway, in addition to the plans as previously outlined for double tracking from Calgary to Vancouver, and the cut-offs at various points both east and west of the city, has in view further enlargement of the city passenger depot. Operations on the Interurban line to Carbon are suspended until spring, with 25 miles graded. The Calgary Polo Club objects to the Western Dominion passing through their grounds in reaching the city, but the company's engineer says it is the only logical route. Affiliated to some extent with railroad work is the visit of Mr. Life, of the Western Union Telegraph Company, who is touring Alberta preparing a report on the opportunity for his company to do business there.

MACDONALD GROCERY BUSINESS SOLD

The Dominion Bond Company has purchased the A. Macdonald Company, of Winnipeg. The price is said to have been approximately \$2,500,000.

The Macdonald Company is the largest wholesale grocery business in Canada; with headquarters in Winnipeg, it has eight branches at central points in the western provinces. In the twelve months ended August 31st last, its sales are said to have exceeded \$7,500,000, a sum which represented a 300 per cent. increase in business in the last four years. The company's stock of merchandise in the year ended August 31st was turned over ten times. A unique feature of the business is that it is all done on a mail order basis. The company dispenses with travellers altogether, issuing merely a catalogue which is a western standard of trade prices.

Announcement will be made shortly of the new basis of capitalization for the company decided upon by the present purchasers. The securities will consist of preferred and common stock; there will be no bond issue. While the respective amounts of the two securities to be issued have not been announced, it was stated that profits from last year's business after the allowance for preferred dividends would represent 9 per cent. on the new common stock. The new financing plan, providing the company with a larger working capital, will not involve any change in the management or the policy of the Macdonald Company.

BANK BRANCHES OPENED AND CLOSED DURING NOVEMBER

Twenty-two branches of Canadian chartered banks were opened during November and five closed. The following table gives details of the branches opened and closed during previous months this year:—

Month.	Opened.	Closed.
January	20	5
February	16	3
March	38	6
April	24	8
May	50	6
June	21	7
July	26	6
August	17	15
September	25	5
October	39	6

Houston's Bank Directory gives the following particulars for November:—

Branches Opened

Callender, Ont.—Royal Bank of Canada.
 Cresswell, Ont.—Home Bank of Canada.
 Fraserville, Que.—Canadian Bank of Commerce.
 La Fleche, Sask.—Bank of Toronto.
 Lewvan, Sask.—Canadian Bank of Commerce.
 Manilla, Ont.—Home Bank of Canada.
 Medicine Hat, Alta.—Quebec Bank.
 Pelee Island, Ont.—Merchants Bank of Canada.
 Redcliffe, Alta.—Merchants Bank of Canada.
 Red Deer, Alta.—Bank of Montreal.
 St. Augustin, Portneuf, Que.—La Banque Nationale.
 St. Gregoire, Nicolet, Que.—La Banque Nationale.
 St. Paulin, Que.—La Banque Nationale.
 Sceptre, Sask.—Union Bank of Canada.
 Standard, Alta.—Union Bank of Canada.
 Stratford, Ont.—Bank of Toronto.
 The Forks, Sask.—Union Bank of Canada.
 Three Rivers, Que.—Canadian Bank of Commerce.
 Victoria, B.C., Oak Bay Ave.—Canadian Bank of Commerce.
 Vulcan, Alta.—Canadian Bank of Commerce.
 Winnipeg, Man., Portage and Arlington—Union Bank of Canada.
 Youngstown, Alta.—Canadian Bank of Commerce.

Branches Closed

Beaumont, Que.—La Banque Nationale.
 Leslie, Sask.—Bank of Hamilton.
 Rosedale, B.C.—Royal Bank of Canada.
 St. Fabien, Que.—Canadian Bank of Commerce.
 Thorburn, N.S.—Bank of Nova Scotia.

The value of proper packing and grading of fruit is emphasized in the report of Mr. W. J. Egan, Canadian trade commissioner at Manchester. One fine lot of Prince Edward Island apples was consigned to Manchester and disposed of to good advantage. They were shipped by Mr. A. E. Dewar, Charlottetown, Prince Edward Island, and the grading, packing and quality of this consignment was so much appreciated, that on a falling market this shipment of Wealthy apples realized as much money on the same day as did a great favorite—the Washington Steyman Wine Sop, while one lot of pears consigned to Liverpool (splendid fruit) were so poorly packed that the agents were afraid to put them on sale in the sales room, and disposed of them in small quantities to different towns in Lancashire. This lot if properly packed would have realized 20 per cent. more money.

DUTCH MORTGAGE COMPANIES IN CANADA

During the last two years there have been started in Canada not less than five Dutch mortgage companies. Out of these, four commenced business through the medium of trust companies; one started on its own initiative.

The Holland-Canada Mortgage Company, and the Netherlands Mortgage Bank of Canada, started in 1910. The Netherlands Transatlantic Mortgage Company, and the Rotterdam-Canada Mortgage Company, in 1911. The Overseas Mortgage Company in 1912.

The following are the amounts of Dutch money which these companies have put out in that period:—

Holland-Canada Mortgage Company.....	\$3,500,000
Rotterdam-Canada Mortgage Company.....	2,400,000
Netherlands Transatlantic Mortgage Company.....	2,200,000
Overseas Mortgage Company.....	400,000
Netherlands Mortgage Bank of Canada.....	1,900,000

So that in the last two and a half years there came into this country for investments on first mortgages from Holland \$10,400,000.

The Holland-Canada Mortgage Company, being the largest and oldest company, recently decided to change the mode of doing business, and is opening its own offices. The head office will be at Winnipeg.

The members of the advisory board for the company have been appointed as follows:—Hon. D. C. Cameron, lieutenant-governor of Manitoba, president; Mr. A. McTavish Campbell, manager of the Canada Life Assurance Company, vice-president; Hon. H. A. Robson, public utilities commissioner; Messrs. D. Wilson, of Messrs. Oldfield, Kirby and Gardner, and F. F. Brock, manager of the investment department, Great West Life Assurance Company.

The general manager, Mr. J. G. Coster, will remain in this country during the first few years. Mr. W. J. Wraggitt, accountant for the London Loan and Agency Company, has been appointed assistant manager.

The Holland-Canada Mortgage Company has large amounts available for immediate investment.

LIFE INSURANCE FUNDS AND TRANSPORTATION FACILITIES

If it is wise public policy for one state to prohibit a life insurance company from investing its reserve in bonds secured by a mortgage on a railroad partly in that state when such bonds are issued by a railroad company of another state, then it would be wise public policy for all the states to do the same thing, and if a few states should adopt such a policy, numerous other states would likely follow the example, said Mr. W. D. Hines, chairman of the executive committee of the Atcheson, Topeka and Santa Fe Railway, at the sixth annual meeting of the Association of Life Insurance Presidents at New York. If practically all the states should adopt such policy the result would be that railroad companies would no longer be able to sell their bonds to any substantial extent to life insurance companies. These insurance companies are among the most important purchasers of railroad securities. If the states should stop such purchases by life insurance companies, the states would thereby close one of the most important sources now existing for the moneys needed for developing the railroads of this country so as to keep pace with the increased demands of the public.

One of the greatest economic problems confronting this country is the question as to how the railroad companies will be able in the future to raise the hundreds of millions of dollars which they must raise if they are to give the public the increased transportation service and the increased safety and comfort which the growth of the country and the growth of civilization imperatively demand. While the raising of this money is a matter of great importance to the railroads, it is a matter of even greater importance to the people themselves. It would be a long step in the wrong direction and a move directly inconsistent with the welfare of the public, for the states to prohibit life insurance companies from investing in railroad securities, for thereby the states would put an additional serious obstacle in the way of raising the funds which ought to be, and must be, raised in order to continue the necessary development of the railroad transportation facilities so that the railroad companies can perform the public service in which they are engaged and which is indispensable to the prosperity and health and comfort of the people of every state in the union.

The financial plan of Messrs. Cluett, Peabody & Co., whose main plant is at Troy, N.Y., with branch factories at various points, including St. Johns, Que., provides for an authorized capitalization of \$10,000,000 7 per cent. cumulative preferred and \$18,000,000 common stock, of which there is to be issued presently \$8,000,000 preferred and all the common. Messrs. Goldman, Sachs & Company, and Lehman Brothers, of New York, and Kleinwort Sons & Company, of London, will acquire an interest in the securities of the enlarged company. The annual production of the Cluett-Peabody plants is about 7,000,000 dozen collars and 500,000 dozen shirts.

Forty-Third Annual Statement of The Royal Bank of Canada

LIABILITIES

To the Public:	November 30, 1912.

Chief Inspector.

EDSON L. PEASE,
General Manager.

INCREASED PRODUCTION OF STRUCTURAL MATERIALS

Is Not Equivalent to Large Consumption Which is Resulting from Canada's Development

Canada's mineral production includes these important and valuable structural materials:—Cement; clay products of various kinds, such as brick, sewerpipe and tile pottery, etc.; lime; sand-lime brick; sands and gravels; slate; and stone for building and other purposes, including granite, marble, limestone, sandstone, etc. No complete record of production of sands and gravels throughout Canada has been obtained, but statistics of exports are published. The statistics of stone production do not include the stone used in making cement or lime, but are as complete as possible for all other established stone quarries; but there is a large production of stone for foundation work, road-making, and railway construction of which no record is available.

The total value of the production of these structural products in 1911 according to the record obtained was \$22,709,611, as compared with a value of \$19,627,592 in 1910, an increase of \$3,082,019, or 15.7 per cent. The total production in 1909 was valued at \$16,533,349, as compared with which the 1910 production showed an increase of \$3,094,243, or 18.7 per cent.

Consumption Greater Than Production.

The Canadian consumption of products of this class is apparently increasing at an even more rapid rate than the production. The consumption based upon the above figures of production in conjunction with the record of exports and imports was in 1911 only a little less than \$30,000,000, as against about \$25,250,000 in 1910 and \$20,350,000 in 1909, the increase in 1911 being 18 per cent. and in 1910, 24 per cent.

The large increase in production and consumption of structural materials is only a natural accompaniment of the great national development taking place in Canada. The normal growth of population supplemented by the large immigration now constantly in progress has resulted in a great wave of construction in the building up of cities, the construction of railways, highways, and public works of all kinds.

Products are Tabulated.

The building permits issued in a number of the principal cities and towns are but one proof of this growth.

Building permits in thirty-four cities in 1911 aggregated nearly \$32,000,000 in value, as against \$29,000,000 in 1910, an increase of over 28 per cent. and the year 1910 shows a similar increase over 1909 in permits issued of nearly 46 per cent.

A summary of the production of structural materials and clay products since 1907 is shown below:—

	1907	1908	1909	1910	1911
	\$	\$	\$	\$	\$
Cement.....	3,781,371	3,709,954	5,345,802	6,412,215	7,644,537
Clay Products	5,772,117	4,500,702	6,450,840	7,629,956	8,359,933
Lime	974,595	712,947	1,132,756	1,137,079	1,517,599
Sand-lime Brick.....	167,795	152,856	201,650	371,857	442,427
Sand & Gravels (exp'ts)	119,853	161,387	256,166	407,974	408,110
Slate	20,056	13,496	19,000	18,492	8,248
Stone.....	2,027,262	2,088,613	3,127,135	3,650,019	4,328,757
Total.....	12,863,049	11,339,955	16,533,349	19,627,592	22,709,611

Exports are Small and Imports Large.

The increase in the value of cement sales in 1911 over 1910 was 19 per cent.; clay products show an increased production of 9.6 per cent.; stone an increase of 18.6 per cent.; lime an increase of nearly 29 per cent.; sand-lime brick an increase of 15.6 per cent. The production of slate is at no time large, but shows a falling off in 1911.

The export of products of this class is comparatively small being valued at only \$484,047 in 1911, of which over 90 per cent. was made up of sand and gravel. The imports, on the other hand, aggregated \$7,710,552 in value, and included Portland cement, \$834,876; clay products, \$5,156,544; lime, \$161,985; sand and gravel, \$246,613; slate, \$169,685; and stone, \$1,140,846.

Brantford Life Underwriters' Association at its annual meeting recently elected the following officers for the ensuing year:—President, Mr. L. E. Percy; vice-president, Mr. F. J. Reid; secretary, Mr. D. Thorburn; treasurer, Mr. L. W. Wood; executive committee, the chairman, and the officers of the association, with Mr. J. Burbank.

"The fallacy that Canada is over-borrowing," said Sir Edmund Walker in Montreal, discussing United States criticisms on this point, "arises from utter failure to comprehend the fact and the significance of the stupendous immigration which is pouring into this country, and which demands unparalleled development and exploitation."

TWENTY MINES EQUAL TO LA ROSE!

"My experience has been that some of the biggest crooks have the best of references," wrote Julian Hawthorne, son of the great novelist, to one of the prospective investors in the Temagami Mines, in a "personal" letter read at the trial of Mr. Hawthorne and his associates in New York, in connection with the promotion of the Temagami mining properties.

Witnesses from several states identified some of the "personal letters" which Hawthorne wrote urging them to invest. George M. Walker, of Indianapolis, testified that he bought \$450 worth of stock in response to some of Hawthorne's letters. "La Rose and other Cobalt mines are paying 12 per cent.," stated one letter, "but we have twenty such properties in our Temagami holdings. One thing my friends may be sure of is that I am not tied up in a stock jobbing scheme."

In a letter identified by Arthur S. Dewolf, a draughtsman, of Melrose, Mass., Hawthorne wrote that the president of a national bank in Virginia had subscribed in the mining propositions in question for several thousand shares of stock.

"If you will visit Cobalt Camp and will look over the properties, which comprise from 20 to 40 acres, and which are capitalized into companies of from \$1,000,000 to \$5,000,000 each, look over what they have done and then look over our property of about 1,000 acres, if you will not conclude that we have the making, and by this I mean legitimately, of a company of from \$500,000,000 to \$1,000,000,000, then I simply don't know what I'm talking about."

"We expended about \$75,000 of our own money. Our interest represents about 1,200,000 shares, and the other 800,000 shares were delivered to property holders."

Mr. Dewolf testified that he became a stockholder in the Temagami-Cobalt Company to the extent of 2,250 shares.

Mr. Neils, a lumberman, from Calf's Lake, Minn., who said he was the owner of 10,000 shares in the Hawthorne Silver and Iron Mines Company and some Temagami-Cobalt Mines stock as well, produced a letter from Hawthorne which said:—

"We already have sold 450,000 shares; as I told you, only 500,000 will be sold. I want to make it clear to you that I am not a promoter."

Mr. John B. Collins, a retired commodore of the United States navy, identified a letter in which Hawthorne wrote:—

"All but a few thousand shares have been sold since I wrote you, and it does not matter much now whether you subscribe or not, as there will be buyers for all unsold shares and then the stock will be listed." The witness said he did not subscribe.

MONTREAL TRAMWAY BONDS SOLD

A block of \$80,000 of five per cent. mortgage Montreal Tramway bonds have been purchased by Messrs. N. W. Harris & Company, of Boston. The same firm bought \$10,000,000 of these same bonds about a year ago.

FIRE INSURANCE MEN GATHER

A successful gathering of the members of the Ontario Pond of the Ancient and Honorable Order of the Blue Goose was held on December 2nd at Toronto. The meeting took the form of a smoking concert, following a Dutch supper. About thirty members of the pond were present, all being representatives of fire insurance companies operating in the districts. Mr. J. A. Robertson, secretary of the Canadian Fire Underwriters' Association, was a guest of honor. After the supper, which consisted of various German dishes, a well arranged and interesting concert was given.

A feature of peculiar interest which took place during the evening was the decoration by Most Loyal Gander John Kay of Past Most Loyal Gander J. R. Stewart with the insignia of office as guardian of the grand nest; Gander Stewart having been elected for that office at the recent meeting of the Grand Nest in Chicago. It was felt by all present that peculiar honor had devolved upon Gander Stewart and the Ontario pond by his election to that office. At the same time it was felt that the honor was well deserved on account of his earnest efforts on behalf of the Ontario pond and the order generally.

It was thought that gatherings of this character are bound to have a very beneficial effect on the business, as they are the means of bringing together and making friends of men who would otherwise only meet more or less formally in a business way.

AIMS OF ALBERTA

Province Opposed to Bonusing—League Formed to Make Known Resources—Associated Boards of Trade

(Special Correspondence).

Calgary, Alta., December 9th.

"One of the outstanding features of the convention of the associated boards of trade of Southern Alberta, held in Macleod, was the statement of the Hon. Mr. Stewart, minister of municipalities, that the bonusing of manufacturers must be stopped, so far as cities and towns of Alberta are concerned," stated Industrial Commissioner Miller, of Calgary, on his return from Macleod, where he represented the industrial bureau.

"Hon. Mr. Stewart gave assurance that the provincial government would do everything in its power to suppress bonusing, which is regarded as one of the worst evils Western Canada has to fight."

United Move for Expansion

A movement was also started at the Macleod meeting which may have a wide influence upon the future of Alberta. The suggestion was offered that an Alberta development league should be formed, which would embrace all the city and town councils, boards of trade, and other industrial and commercial bodies of the province in one large organization, the aim of which would be to unite north, south and central Alberta in a campaign to make the resources and opportunities of every section of the province better known to the world.

At present there is a great duplication of effort through each community or district working separately along development lines, which could be avoided by the creation and operation of a development league, embracing the whole province and giving an equal share of publicity to each portion of the province.

Twenty-two Communities Represented

A meeting of representatives of every part of the province will likely be held in the new year, to take steps to form the proposed development league.

The associated boards of trade of Southern Alberta is a live organization. Twenty-two cities and towns are represented in its membership, including every community of importance south of the main line of the Canadian Pacific Railway to the international boundary. The associated boards has done and is doing much good for Southern Alberta, and will continue to exert a powerful influence in the more southern portion of the province.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

The Fireman's Fund Insurance Company, has been licensed to transact throughout Canada the business of fire, inland transportation, and automobile insurance. Mr. John H. Hunter, Toronto, has been appointed chief agent.

An agreement has been signed with Chicago and Philadelphia business men for the erection of a carpet factory at Owen Sound, Ont., to employ 75 hands. The concern is to cost \$60,000 for building and plant. On their part, the town is to give a loan of \$30,000, and \$1,500 for a site, besides exemption and free water. The loan is to bear interest at 4½ per cent., and principal and interest is to be repaid in 20 equal annual instalments, and will be voted on by the ratepayers at the January election.

EDMONTON'S CIVIC INSURANCE

A memorial signed by the representatives of nineteen insurance companies with businesses established in Edmonton was presented to the commissioners with regard to the city's method of conducting its insurance business.

Objection was raised against one agent being appointed as municipal broker; the memorial stated that no one agent should control the city's business, as all the companies are equally ratepayers. Attention was drawn to the fact that a broker was placing insurance upon the exhibition buildings. The local men want the insurance business to be placed, as heretofore, by an official of the city, and distributed among the local agents.

A number of the latter have offered to lend their aid to the city clerk without remuneration.

Commissioner Harrison told a delegation of representatives that all they could do was to take up the matter with city clerk Cox and Messrs. McGeorge and Chauvin.

A commissioner suggested that where conditions were equal the city should eliminate American in favor of British and Canadian companies.

BANK OF EDMONTON BEING ORGANIZED

Another chartered bank is being organized. It will be called the Bank of Edmonton, will have headquarters in that city, and capital of \$2,500,000. A charter will probably be applied for at the present session. Considerable portion of the stock is said to have been subscribed.

There are 293 branches in Alberta of the existing chartered banks. They are divided approximately as follows:—

Bank.	No. of branches in Alberta.
British North America	3
Commerce	49
Dominion	10
Hamilton	9
Hochelaga	1
Imperial	15
Merchants	47
The Molsons	5
Montreal	13
New Brunswick	38
Northern Crown	6
Nova Scotia	4
Ottawa	1
Quebec	5
Royal	28
Standard	5
Toronto	6
Union	46

293

According to the latest census, the population of Alberta is 374,663. Therefore there is roughly one bank branch in the province for every 1,278 of population.

Mr. E. S. McQuaid, a barrister at Edmonton, is understood to be interested in the proposed bank. European money is reported to be backing him.

JOKE OF A GREAT BANKER'S OFFICE BOY.

Canada has been flooded this week with a circular, mailed from New York, predicting a "violent collapse in all Canadian bonds, stocks and land schemes." In these days of strenuous work, Canadian prosperity and an excellent outlook for 1913, a little New York humour is refreshing. The author of the circular is said to be "a great international banker." His modesty presumably forbids the mention of his name. The interesting missive reads as follows:—

"The Canadian land boom is petering out. A violent collapse in all Canadian bonds, stocks, and land schemes is imminent.

"The Canadian Pacific Railroad has paid out sixty-five million dollars in dividends, and got back ninety-five million dollars from stockholders, selling them debenture bonds, preference stock and common stock.

"Now the Canadian Pacific are going to try and sell sixty millions more common stock at \$175 a share to stockholders.

"This is avarice and booming run mad. Several thousand miles of railroad built in Canada carry nothing but lumber, one way, and the cars go back empty. They continually report increases in gross earnings from carrying their own construction material.

"Little towns all over Western Canada are filled with land boomers—selling lots on their outskirts—at prices that discount 50 years' future value.

"Canadian Pacific stock will fall to 150—and be a poor investment at that figure."

E. H. AMBROSE, Mewburn, Ambrose, Burbridge & Marshall, Hamilton.

J. F. M. STEWART, Treasurer, Toronto.

T. BRADSHAW, Member of firm, A. E. Ames & Company, Toronto.

J. W. NORCROSS, Managing Director, Toronto.

REGISTRAR AND TRANSFER AGENT—National Trust Company, Limited.

BANKERS—The Metropolitan Bank.

The Canada Interlake Line, Limited, has been formed to take over the well-established and prosperous business of the Canadian Interlake Line, Limited. To the line of vessels operated by that Company, this year there are being added the following: Regina, Kenora, Tagona, Cadillac, Calgarian, Fordonian, Pioneer, and Mars, making fourteen in all.

It is now the largest company in Canada engaged entirely in freight lake transportation. All are modern steel vessels. We offer for sale at par 9,500 fully-paid shares of the above-described Preference stock, carrying a bonus of 15% of the amount of the Preference shares in Common stock.

**\$25 per share with subscription,
\$25 " on January 2nd, 1913,**

**\$25 per share on February 1st, 1913,
\$25 " on March 1st, 1913,**

with the right to the subscriber to pay in full on allotment, or on January 2nd, 1913, or with accrued dividend, on February 1st, 1913, thereafter ranking for the full quarter's dividend, payable April 1st, 1913.

Subscription books are now open at our offices, and will close not later than Saturday, the 21st inst., at noon.

The right is reserved to allot only such subscriptions and for such amounts as may be approved, and to close the subscription books without notice. **Fractions of Common shares will be adjusted on allotment at \$70 per share.**

The first dividend on the Preference shares is to be paid on April 1st, 1913, for the quarter commencing January 2nd, 1913. Thereafter Preference share dividends will be paid quarterly. Interest on payments on account of subscriptions will be paid on the first dividend date, April 1st, 1913, at the rate of seven per cent. per annum from dates made.

In view of the large earnings for the current season, and the valuable freight contracts held by the Company, combined with the generally favorable business prospects, the Directors propose to place the Common stock on a dividend-paying basis from July 1st, next, at the rate of five per cent. per annum, payable quarterly, the first payment to be on October 1st for the quarter then ending.

The Company's Managing Director, Mr. J. W. Norcross, has had a wide and successful experience as master of some of the largest vessels on the great lakes, and, later, in the management of transportation companies. He is generally regarded as having a thorough knowledge of the business of water transportation, and his important traffic affiliations will be of great value to the Company in keeping the fleet employed. He will be supported by Directors, several of whom have been actively associated with lake shipping for many years, and whose connections will be valuable in securing traffic.

Application will be made in due course to have the Preference and Common shares listed on the Toronto Stock Exchange.

Preference Shares are preferential, both as to assets and cumulative dividends, at the rate of 7% per annum, and are redeemable at 110. The Preference Shareholders have the right to elect two of the seven directors.

Validity of the issue of Preference and Common shares has been certified to by Messrs. Rowell, Reid, Wood & Wright, and Messrs. Thomson, Tilley & Johnston. The Company has filed a prospectus and an agreement between Canadian Interlake Line, Limited, and S. Casey Wood, the younger, as Trustee for the Canada Interlake Line, Limited, in the office of the Provincial Secretary, where they may be inspected during business hours.

The amount of underlying bonds is \$720,000, and there is mortgage indebtedness of \$66,432.

The Company's charter provides that a Reserve Fund, which may be used in the business of the Company, shall be established out of the earnings, at the rate of 3% per annum on the amount of the outstanding Preference capital. This transfer to Reserve is cumulative, and is to be made before payment of any dividend upon the Common stock. When the fund reaches 50% of the total outstanding Preference stock, the Charter provides that it is to be so maintained, and if at any time it is drawn upon it is to be in like manner restored and maintained. The advantage to the Preference Shareholders of this provision is manifest.

Subscriptions may be forwarded by mail or by telegraph at our expense. They may be on regular forms, which may be had on request, or, where these are not available, letters simply stating that so many shares are subscribed for under the terms of the offering will be sufficient.

A memorandum is appended, giving features of the business furnished by Mr. J. W. Norcross, Managing Director, which includes figures as to earnings for the year 1912, certified by Messrs. Clarkson & Cross, Chartered Accountants.

Full particulars relating to the offering have been published in folder form, and may be seen at our office, or will be mailed on request.

We recommend the purchase of these shares from the standpoint of security, interest return and prospects of increase in their market value.

A. E. AMES & CO.

UNION BANK BUILDING, TORONTO.

ROYAL INSURANCE BUILDING, MONTREAL.

STATEMENTS FROM MANAGING DIRECTOR'S LETTER:

The fleet consists of 14 modern steel freighters, having a capacity, measured in bushels of wheat, of 1,662,500 bushels.

The names of the ships are as follows: Canadian, Acadian, Regina, Kenora, Tagona, Fordonian, Gordon, Hamiltonian, Calgarian, McKinstry, Renvoyle, Cadillac, Pioneer, and Mars.

The "Fordonian" and "Calgarian" are new ships, almost completed, which will be ready for operation at the opening of navigation in 1913.

The first nine vessels constitute the finest, most modern and best equipped fleet of canal size package freighters operating on the Great Lakes. The "McKinstry," "Renvoyle," "Cadillac" and "Pioneer" are thoroughly modern steel bulk freighters, and are also of canal size. The "Mars" is engaged in freight traffic on the Lakes west from Buffalo and Port Colborne and on Georgian Bay.

Arrangements to acquire the 14 vessels were made when tonnage was comparatively cheap, and they could not be replaced to-day except at a considerable advance upon the purchase price.

The total insurance on the fleet is over \$1,800,000, which exceeds the total of the Preference stock and underlying Bonds.

The Company's fleet has been specially constructed for the purpose of handling package as well as bulk freight, with the result that advantage has been taken of the

largely-increasing volume of package freight offering from eastern ports to the west. The considerable number of vessels in the fleet secures to shippers a regular and frequent service, and, as a result, the line has formed important and valuable shipping connections at Montreal and intermediate points, and at Port Arthur, Fort William and Westfort, the lake ports of the three great Canadian railways.

Considerable of the Company's tonnage is protected by favorable contracts, having from three to seven years to run. Under these contracts 180,000 tons of westbound freight were handled this year. The Company has also a contract for each of the next three years for transportation of pulpwood for four boats for the four months of the season of navigation when tonnage is slackest.

The value of seven of the vessels, as fixed by the appraisal made by the Canadian Appraisal Company on April 15, 1912, and by the purchase prices of the additional vessels, totals \$1,851,958, and is in excess of the total of the underlying Bonds and Preference stock.

The Company will be in a strong financial position, having ample working capital and three of its vessels free of bonded indebtedness. By 1925 the Sinking Fund will have retired the Bonds on four other vessels, and those now outstanding will then have been reduced to \$220,000, while in 1927 all the existing Bonds will have been paid off.

NET EARNINGS—1912.

The net earnings for the year 1912, up to November 30th, of the Canadian, Acadian, Regina, Kenora, Tagona, McKinstry and Renvoyle, and of the Gordon from July 1st only (being date of purchase), and the Hamiltonian from July 10th only (being date of completion), were

\$211,270

Estimated for balance of season

14,000

\$225,270

ESTIMATED NET EARNINGS—1913.

Canadian, Acadian, Regina, Kenora, Tagona, McKinstry, Renvoyle, Gordon and Hamiltonian the same as for 1912, notwithstanding that the Gordon and Hamiltonian were not in commission for the first three months of the navigation season

\$225,000

Fordonian, Calgarian (almost completed and will be in commission on April 1st, 1913, at opening of navigation season), Cadillac, Pioneer and Mars (just purchased).

123,000

Total net earnings from operation

\$348,000

Interest on Bonds and Mortgages

\$46,750

Sinking Fund for Bonds

67,000

113,750

Net earnings on Capital Stock

\$234,250

Preference Dividend, 7%

\$70,000

Special Reserve on Preference, 3%

30,000

100,000

Net earnings on Common Stock

\$134,250

It will, therefore, be seen that, after paying out of the earnings the heavy charge of \$67,000 for Sinking Fund, there would, in accordance with the above, remain an earning on the Preference Capital of 23.4%, and after payment of the preferred dividend and making provision for the Reserve Fund there is a surplus equivalent to 13.4% on the Common Stock.

The property owners of Lindsay, Ontario, carried a by-law to guarantee bonds to the extent of thirty thousand dollars of the Fisher Furniture Company.

The Royal Bank announces they have purchased a small bank in British Honduras, which has a capital of \$100,000. The Royal will establish a branch at Belize, in British Honduras.

The supplementary estimates of Saskatchewan have been tabled by Hon. George Bell for the twelve months ending Feb. 28th, 1913. The total sum involved is \$1,506,555.77, of which \$780,000 is chargeable to capital, and the balance to income.

An estimate of the probable cost of a street railway at Prince Albert, Saskatchewan, consisting of eight miles of track and eight or ten cars to start, has been submitted to the civic authorities by Mr. J. S. Townsend, of the Messrs. Stone and Webster Engineering Company of Boston, placing the figure at \$275,000.

The capital stock of Cassidy's, Limited, has been increased from \$5,000,000 to \$10,000,000, such increase consisting of 50,000 preferred shares of \$100 each. Twenty-five thousand shares of common stock of \$100 each have been subdivided into 100,000 shares of \$25 each.

The Van Roi Mining Company, Rossland, B.C., are stated to have paid \$200,000, covering eight copper and galena claims. The properties included in the deal were the Gipsy Queen, the Copper Mountain, High Grade, Bonanza, Seymour, Shuswap, Bluebird and King Edward.

Among Fort William harbor improvements for 1913 is the dredging and removing of 25 acres of land out of the Kaministiquia River, almost immediately opposite the site of the Canadian Car & Foundry Company's plant, near the western limits of the city. By this means the river will be straightened and a turning basin of over 1,000 feet in width will be formed.

United States vessels will have the privilege of taking on grain at Port Arthur and Fort William after the close of the insurance period. The vessels may winter at these ports, and in the spring take their cargoes to Point Edward, Goderich and Georgian Bay ports. In this way at least 5,000,000 bushels of grain can be handled without putting it in elevators.

Mr. A. L. Ruthven, promoter of the Dominion Automatic Train Control Company, Limited, with offices at the Transportation Building, Montreal, was arrested and appeared in court charged with obtaining \$450 by false pretences. The arrested promoter was inviting the public to subscribe \$1,000,000 in payment for \$50 shares to exploit an invention. He pleaded not guilty, and Judge Lafontaine remanded him until Tuesday next on \$500 bail.

The Guarantee Company of North America will erect a ten-storey building on Beaver Hall Hill, Montreal, at a cost of \$300,000.

The Middlewest Fire Insurance Company, of Valley City, North Dakota, has ceased doing business in Manitoba and has reinsured all its outstanding policies in the St. Paul Fire and Marine Insurance Company, of St. Paul, Minneapolis, which company is registered in Manitoba. On February 16th the Middlewest Fire Insurance Company will apply to the provincial treasurer of Manitoba for a release of all its securities.

A deal involving the payment of about a quarter of a million dollars cash took place at Montreal, when the well-known York River Gaspé timber limits, formerly the property of the Gaspé Lumber Trading Company, and forming a part of the assets of that company held by the Charing Cross Bank, London, were sold to the Dalhousie, N.B., Lumber Company for the sum of \$240,000, the terms being spot cash.

The Western Canada Fire Underwriters' Association have notified Camrose agents of a reduction of 10 per cent. in the rates. The reduction has been made subsequent to a visit made to Camrose several weeks ago by a fire insurance inspector. He was satisfied that the fire brigade and the hydrant system were up to the standard and that the town was entitled to the reduction.

Canadians, while observing caution under present conditions, cannot afford to be pessimistic. Outside of European influences the present money stringency is only a striking reminder of our country's great prosperity. We have successfully passed through periods of tight money before, and shall doubtless do so again, says Messrs. A. E. Ames and Company's market letter. The increased transportation facilities which are being offered by railroads and lake shipping companies should assist materially from year to year in shortening the period in which so much money is now tied up in moving the crops.

The capital stock of the Western Distributors, Limited, has been increased from \$25,000 to \$100,000.

Next Monday will be the seventh anniversary of the liquidation of the York County Loan and Savings Company. The liquidators, the National Trust Company, announce their intention of applying to the Dominion parliament this session for a special act to facilitate the distribution of the assets. The purpose of the act will be to distribute among the known shareholders the dividends set aside for those shareholders who have made no claim and those whose addresses are unknown.

DEBENTURES FOR SALE

ATHABASCA LANDING, ALBERTA

EXTENSION OF TIME

Tenders will be received by the undersigned up to 6 o'clock p.m., January 2nd, 1913, for the purchase of eighty thousand dollars, twenty-five year, five and one-half per cent. waterworks debentures of said town, repayable in twenty-five equal annual instalments of principal and interest.

Further particulars may be obtained from

CHAS. E. NANCEKIVELL,
Secretary-Treasurer.

WANTED, LOANING AGENCY for the City of Regina and district, experienced man in charge of that department. Cathcart, Price & Boyd Company, Limited, 2121 Eleventh Avenue, Regina.

WANTED—\$25,000.00 for twelve months; interest, 9 per cent., first mortgage; security, \$175,000. Particulars from J. J. Miller, Loo Building, Vancouver, B.C.

RE INSURANCE TREATY.—A Fire Insurance Company with Head Office in Montreal, and licensed for Quebec and the Maritime Provinces would like to enter into a reciprocal treaty with a Company (Canadian or American) operating in Western Canada. Re-Insurance ceded to present treaty Company has been most profitable.

Address correspondence to "Insurance" Post Office Box No. 2110, Montreal.

AGENTS WANTED

One of the strongest and most reliable Loan Companies in Canada desires to appoint reliable agents in towns and cities throughout Ontario for the sale of its Short Term Debentures. Liberal commission will be paid. Address Box 81, The Monetary Times, Toronto.

WANTED—A party with money to buy some valuable securities, as good as bonds, bearing large interest. Box 117, Monetary Times, Toronto.

WANTED.—A Manager for an Accident Insurance Company. Applicants must send copies of testimonials to this office. Salary, \$4,000.00 a year to commence. Apply—The Secretary, British Columbia Accident and Employers' Liability Insurance Company, Limited, 433 Seymour Street, Vancouver, B.C.

WANTED—A young Chartered Accountant as chief clerk in a Western accountant's office. Apply, giving experience, etc., and salary expected, to W. A. Henderson & Company, P.O. Box 805, Winnipeg, Manitoba.

FIRE INSURANCE.—Thoroughly capable Inspector and Agency Superintendent desires change of company. Experienced in Specific Rating, both Manufacturing and Mercantile Schedules. Successful with closing large lines of business and co-operating with Agent. Good Underwriter, conversant with all insurance detail, steady and reliable, and thoroughly well recommended. Box 115, Monetary Times, Toronto.

LOAN INSPECTOR, with several years' experience in the Western Provinces, is open to consider position with any company doing a large loaning business in the prairie provinces—Life Insurance Company preferred. Box 119, Monetary Times, Toronto.

PARTNERSHIP.—Young Bank Manager, with thorough business training and successful clean record is open to enter into partnership. Several years' Western experience. Only parties in good standing and with some capital need respond. Address Box 121, The Monetary Times, Toronto.

Dividends of 3000%

PER ANNUM

YEARLY RETURN OF \$1200
ON INVESTMENT OF \$40

A BOOK-KEEPER

came to us eighteen months ago and stated his case. He had a fairly good job—he said—but he had not had a rise for two years. His salary was \$75 a month.

He asked if we could equip him for SOMETHING BIGGER, and we told him frankly we would refund his full fee if we failed to satisfy him absolutely.

TO-DAY, he is HEAD ACCOUNTANT to one of the largest Wholesale Grocery Houses in Canada at a salary of \$175 a month—an increase of \$100 a month—and his full fee for tuition was but \$40.

WHERE IS **YOUR** EARNING POWER? Chin Downwards or Chin Upwards?? Chin Downwards you are worth \$6 to \$10 a week. Chin Upwards you may be worth \$25 a week to \$15,000 a year.

Develop yourself CHIN UPWARDS, and “ten years hence” will look after itself.

Decide to-day to take the first step.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

COBALT LAKE MINING COMPANY, LIMITED

NOTICE OF GENERAL MEETING OF SHAREHOLDERS

Notice is hereby given that special general meeting of the shareholders of the Cobalt Lake Mining Company, Limited, will be held at the Head Office of the Company, Traders Bank Building, in the city of Toronto, on Friday, the twentieth day of December, 1912, at the hour of 10.30 a.m., for the purpose of considering, and, if approved, of adopting and confirming:

- (1) A by-law increasing the number of the directors of the company from five to seven.
- (2) A by-law providing for the remuneration of the officers of the company.
- (3) A by-law in regard to declaration of dividends.
- (4) For passing a resolution of shareholders, authorizing the directors to delegate their powers to an executive committee to be elected by the directors from their number with such powers as may be lawfully imposed upon them, and
- (5) For the transaction of such other business as may be lawfully transacted at this meeting.

Dated at Toronto, this sixth day of December, 1912.

GORDON F. MORRISON,

16Dec.14.

Secretary.

THE ROYAL BANK OF CANADA

ANNUAL MEETING

The Annual General Meeting of the Shareholders of the Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the Bank, in Montreal, on **Thursday, the 9th day of January next.** The chair will be taken at 11 o'clock a.m.

E. L. PEASE,

General Manager.

Montreal, November 30th, 1912.

THE CANADIAN BANK OF COMMERCE.

The annual general meeting of the shareholders of this Bank for the election of directors and for other business will be held at the banking house on Tuesday the 14th day of January next.

The chair will be taken at 12 o'clock noon.

By order of the Board.

ALEX. LAIRD,

General Manager.

Toronto, 29th November, 1912.

CANADIAN WESTINGHOUSE COMPANY, LIMITED.

DIVIDEND NO 32 AND BONUS.

The regular quarterly dividend of one and three-quarters per cent. (1¾ per cent.) has been declared upon the outstanding Capital Stock of the Company, also a bonus of two per cent. (2 per cent.) both payable January 10th, 1913, to shareholders as of record at the close of business December 31st, 1912. Payments on account of the new issue of Capital Stock will share in these dividends pro-rata according to the amounts paid on the prescribed call dates. Transfer books will be re-opened January 10th, 1913, at ten o'clock a.m.

Cheques will be mailed to shareholders.

By Order of the Board.

JOHN H. KERR,

Secretary.

Hamilton, Canada,

December 5th, 1912.

THE BANK OF TORONTO

ANNUAL MEETING

The Annual General Meeting of Shareholders of this Bank will be held at the Banking House of the Institution on **Wednesday, the Eighth day of January next.** The Chair to be taken at noon.

By order of the Board,

THOS. F. HOW,

General Manager.

The Bank of Toronto,

Toronto, December 2nd, 1912.

Managing Director.

AMES-HOLDEN, McCREADY, LIMITED.

QUARTERLY DIVIDEND.

Notice is hereby given that a dividend of one and three-quarters (1¾) per cent. upon the Preferred Capital Stock of the Company, now issued and outstanding, for the current quarter, to Shareholders of record on the Transfer Books of the Company on the 20th day of December, 1912, will be payable at the office of the Company in Montreal, on and after the 2nd day of January, 1913.

By order of the Board,

W. A. MATLEY,

Secretary.

Montreal, 7th December, 1912.

DIVIDEND NOTICE

DOMINION TRUST COMPANY LIMITED Head Office—Vancouver, B.C.

Dividend No. 12.

Notice is hereby given that an interim dividend at the rate of 8% per annum upon the paid-up capital stock of this company will be paid on 2nd January, 1913, for the quarter ending 31st December, 1912, to shareholders of record of 14th December, 1912.

Holders of share warrants will receive dividends on presentation of Coupon No. 1 at any of the offices of the company.

The transfer books will be closed on December 16th.

By order of the Board.

A. H. BAIN,

Secretary.

A branch of The Canadian Bank of Commerce has been opened at Moncton, N.B., under the management of Mr. W. H. Lugsdin.

At the second annual convention of the associated boards of trade of Southern Alberta, held recently at McLeod, the following officers were elected:—President, Mr. E. N. Barker, Cardston; 1st vice-president, Mr. C. A. Gigot, High River; 2nd vice-president, Mr. A. H. Allen, Macleod; executive, Messrs. A. F. Dulmage, Bow Island; A. B. Hogg, Carman-gay; and J. B. Turney, Lethbridge. Cardston was selected as the place of meeting for next year.

The Vancouver Mining Club will now be styled the Vancouver Chamber of Mines.

Victoria fire chief's report for November shows the lightest month since August last year. The total loss on buildings was only \$90, and \$30 on contents. There was an insurance of \$1,200 carried on the buildings. Three fire escapes were inspected, and 99 buildings were also examined. There were 110 permits granted, and 37 notices under by-laws were served. The brigade was engaged the short period of two hours and forty minutes during the month at fire.

NOVA SCOTIA AND NEW BRUNSWICK BANK DEAL ENDORSED

The sale of the Bank of New Brunswick to the Bank of Nova Scotia was endorsed at the meeting of the shareholders of the former institution held at St. John this week. Out of the ten thousand shares held, votes for 8,966 were cast, all in favor of the sale of the bank.

Mr. A. P. Barnhill, K.C., solicitor for the bank, read the agreement made by the directors with the Bank of Nova Scotia.

A resolution approving the agreement, and authorizing the directors to complete the transfer of the bank, was moved by Dr. W. W. White and seconded by Mr. W. Mackay.

FOLLOWING SASKATOON'S FIVE PER CENT. LEAD

The city of Saskatoon was the first to recognize the inevitable in the London market—that 4½ per cent. and lower are impossible rates at present. It made its recent issue of £400,000 at 5 per cent. and at one-half point under par, 99½. Following Saskatoon's example, Lethbridge and Moose Jaw are preparing to accede to the public's demand for five per cent. interest on Canadian municipal loans. The Lethbridge issue will be £140,000 in 4½ per cent. stock at a price to yield over 5 per cent. Moose Jaw will pay 5 per cent. on a loan of £300,000, and wants to list the stock at 98. The underwriting commission is 1½ per cent. In addition to £1,000,000 sterling loaned the province of Alberta and a similar amount in Grand Trunk Railway debentures, the loans to Canadian municipalities in the past three weeks represents £796,300. The Saskatoon loan was offered to investors at a return of a fraction over five per cent. The issue has been oversubscribed. New Westminster and Alberta loans offered less than five per cent., and the underwriters have had to take forty and seventy-five per cent. of the stock respectively.

The Union Bank of Canada has opened a branch at 869 Portage Avenue, Winnipeg.

A campaign to reduce the fire waste of Canada is being inaugurated by the Canadian Manufacturers Association at an informal dinner to be held in Toronto on December 19th, when Mr. F. H. Wentworth, of Boston, Secretary of the National Fire Protection Association of the United States, will address the gathering on the problem of reducing the fire waste. It is the aim of this campaign to show "every individual that he is being taxed for not only his own, but his neighbor's carelessness."

La Canadienne, a financial review published in Paris, says a number of subscribers to the stock of the Quebec and Saguenay Railway and other disinterested parties in France are to send a petition to Premier Gouin. The petition, which it publishes, asks Mr. Gouin in the interests of Canada and to maintain its good name with French financiers, to come to the railway's aid to complete the line. It also speaks of the number of people of French descent in Canada, and the efforts being made to bring them closer in business relations. It adds if the building of the railway in question is not completed it will be a setback to Canadian interests in France.

Thirty-nine additional car lines, some of them on new routes and some extensions or doubling of existing lines, are recommended in the report to the city of the transportation experts, Messrs. Isham Randolph, of Chicago, and J. W. Moyes, of Toronto. They include seven lines in the older section of the city—that is, those within the corporate limits in 1891; fourteen civic car lines in the sections outside of the city limits in 1891, including extensions of the three already under way, one of which, Gerrard Street, will be in operation next week; the development of twelve lines outside of the older city, and six radial railway lines. The experts also recommend that if there cannot be a unification of the Toronto Railway Company's lines and the civic car lines, there should be a "tube" constructed up Teraulay Street, from Queen Street to the northern city limits, with a comparatively small loop on Richmond Street.

MUNICIPAL BONDS

Toronto's Loan Discussed Again—Medicine Hat's Finances—Prince Albert to Sell Debentures

Controller McCarthy introduced a resolution at the Toronto city council's meeting asking that city treasurer Coady report to the council as to the terms, rate of interest, commission, exchange, etc., on the loan of \$6,000,000 made in London last summer, "showing exactly what the loan is costing the city, and the securities obtained." Controller McCarthy claimed that the information should be given to the public, particularly as the city was face to face with the business of floating \$20,000,000 of bonds. The motion was defeated, but the city treasurer will give a private report to the board of control on the matter.

The chairman of the finance committee of Medicine Hat has presented the annual financial statement for the ten months ended October 31st, 1912. The income was \$220,884 and the expenditure \$110,337. During the year, bonds to the extent of \$840,000 have been handled, of which \$96,000 were unsold issue from last year, making this year's figure \$744,000. Of this \$443,000 have been disposed of, the average price being 97. The unsold balance is therefore \$301,000.

Will Increase Assessment.

In order to cope with the development of the city it has been estimated that it will be necessary to spend from \$1,350,000 to \$1,500,000 on capital account next year, and in order to finance this work the assessment will have to be increased to about \$14,000,000.

Prince Albert has decided to sell \$121,000 of 4½ per cent. debentures. The city has passed a by-law authorizing the issue of debentures to the amount of \$92,000 for the payment of the cost of the owners' share of certain extensions to the sewers system, and a by-law to authorize the issue of debentures to the amount of \$71,000 for the payment of cost of owners' share of the construction of granolithic sidewalks.

Notes of Bond Bidding.

Four offers were received for the \$10,000 5 per cent. 20-year road debentures of Emerald Rural Municipality, Sask. The award was made to the Flood Land Company, Regina, Sask.

Three Toronto bond firms bid for the Bridgeburg, Ont., \$41,592 5 per cent. 10 and 30-year sewerage debentures. The offer of Messrs. C. H. Burgess and Company was accepted.

Seven Toronto bond houses bid for the Peterborough, Ontario, \$19,500 4½ per cent. 30-year debentures. The offer of Messrs. Wood, Gundy and Company was accepted, as previously noted.

DEBENTURES AWARDED

Montmartre, Sask.—\$3,000, to Flood Land Company, Regina.

St. Vincent, Ont.—\$3,800 5 per cent. 20 instalments, to Messrs. C. H. Burgess and Company, Toronto.

Barton Township, Ont.—\$32,300 4½ per cent. 20-years, to Messrs. A. E. Ames and Company, Toronto.

Magrath, Alta.—\$11,000 5 per cent. 20-years, to Flood Land Company, Regina.

Bridgeburg, Ont.—\$13,582 5 per cent. 10-years, \$28,010 5 per cent. 30-years, to Messrs. C. H. Burgess and Company, Toronto.

THE MAN WHO
MATCHED THE
MOOTED MERGER

IT WAS a long established and well-known business, with extensive operations in the Dominion and elsewhere. So Canadian promoters thought an amalgamation of the individual companies concerned would make a splendid peg on which to hang the hat and coat and rubbers of heavy capitalization, a big bond issue and a bulky bonus of common stock. They had been nourished on the doctrine of combines. The Idea walked with them, it lunched with them. It visited their clubs and stayed around their offices till it became a public nuisance. And frequently it watched by their bedsides.

Already a friendly understanding existed between the companies doing a similar business in various countries. Generally understood it was, too, that the arrangements for disposing of merchandise were dictated practically by one man. Those were among the facts which induced our Modern Financiers to make it a Combine Proper. No savings should be left idle for the want of investment offerings. The companies concerned in the United States, Great Britain, France, Germany, and in fact the World over, were approached, but without success.

The Combine Constructors were then referred to the Man of Influence. Morals took a higher place in his business than did money. Honesty had ousted haggling. On that account, the good fellow had been dubbed Saint Nicholas, known by his numerous familiars as Santa Claus. The Merger Makers explained their scheme. They cited the objects and advantages to be gained by consolidation, by allowing their fingers under the pie crust. Mr. Nicholas by means of their plan, they said, could obtain further working capital to keep pace with the growing demand of the market. He could dispense with reindeer transportation and save a large amount of freight charges. He could standardize his brands and eliminate the needless competition of the pessimist. A hundred other reasons were mentioned, although the real one was not broached, which is the way of the Merger Maker sometimes.

Mr. Nicholas did not favor these proposals. Indeed, he was indignant and more especially when asked to exchange his multiplication table, desk calendar and geography for a twentieth century encyclopedia of financing, with extensive reference to liquid stock. During the interview it was noted that the Piqued Promoters were handed several telegrams informing them of a drastic reorganization of industrial combines of which they were inventors. According to a sharply defined rumor Mr. Nicholas delivered a homily to the Persistent Promoters that might well be included in the next prospectus they issue to the public.

Happily, when the discussion reached its most strained stage, a crowd of several hundred Cheery Customers burst into the board room to give their Nineteen Hundred and Twelve orders. The Pious Promoters held up their hoods in horror at such antiquated business methods, remarked that it was too bad that buyer and seller should ever become so intimate, and left abruptly. The local paper said, "The meeting broke up in great disorder."

The modern financiers swallowed the bitters of defeat. They are working elsewhere, but remain customers, not bosses, of Nicholas Santa Claus and Company, universal providers, a heartsome firm too.

PROVINCIAL SECURITIES AND TRUSTEE LIST

The provincial treasurer of Quebec, Honorable P. S. G. Mackenzie, referred to an important matter in his budget speech, and one upon which *The Monetary Times* has been working assiduously for several years. He pointed out that under existing laws and regulations in Great Britain trustees were excluded from making any investments in the stock or debentures issues by any of the individual provinces of Canada. The inscribed stocks of the provinces of Canada were eligible for registration under the Colonial Stock Act of 1877, and amending acts; but, in view of the uncertainty that had arisen as to the true definition of the word "colony" and some recent rulings of the British courts, it seemed clear that the Canadian provinces were not regarded in law as "colonies or dependencies," and executors or trustees could not invest in their stocks, even when specifically authorized to invest in the stocks of any British colony or dependency. By the Colonial Stock Act of 1900, the powers of trustees of the United Kingdom, under the Trustee Act of 1893 were extended and provision made for the investment of trust funds in colonial securities under regulations made by the Lords Commissioners of the Treasury. And a number of the self-governing colonies, including the Dominion of Canada, had taken advantage of the act and had passed the necessary legislation and given the assurance required under these regulations. As a result the financial position and the credit of the colonies which come under the provisions of the act, had improved, and their stocks had obtained a wider market. It would appear that the difficulty in the way of extending the benefits of the act of 1900 to the provinces of Canada was to be found in provision "c" of the Treasury Regulations, as follows:—

"(c) The Colonial Government shall place on record a formal expression of opinion that any colonial legislation which appears to the Imperial Government to alter any of the provisions affecting the stock to the injury of the stockholders, or to involve a departure from the original contract in regard to the stock, would properly be disallowed."

The Canadian provinces could readily comply with the first two of the regulations, and the only difficulty in the way of extending the benefits of the act of 1900 to them, under the regulations in question, was found in section (c). It was held by the imperial authorities that they had no direct right of disallowance as far as the legislation of the provinces of Canada are concerned, and that the question in that respect was different to the position obtaining in the case of colonies to which the provisions of the act of 1900 have been applied. Under the British North America Act, the power of disallowance in relation to the legislation of the provinces was reserved to the Governor-General-in-Council. There was no doubt that the provinces of Canada were placed in an anomalous position in consequence of this situation. They were excluded from trustee investments when colonies of far less importance were admitted thereto, such as Newfoundland, Trinidad, the states of the commonwealth of Australia, all of which enjoyed the privilege, and the great provinces of Ontario, Quebec, Nova Scotia, New Brunswick, Manitoba, Saskatchewan and British Columbia, all of them of equal, if not greater importance, were excluded. That their stocks were thus excluded from the extensive market of trustee investments in Great Britain was clearly unjust and a serious damage to their credit. In this connection the treasurer quoted the words of a high financial authority in Great Britain: "It is regrettable that our provincial stocks are not trustee securities; if they were, it would at once make a difference of several points in their price. Even as it is, Ontario and Quebec stocks are on the same par with Newfoundland, although the last mentioned is on the Trustee List."

The honorable gentleman further pointed out that, in addition to the trustee investments, there was also the possibility of a still more extended field for investment opened up to provincial securities under the provisions of the Acts of the Imperial Parliament, known as the Irish Land Act, 1909, and the National Insurance Act, 1911, which was at present closed to them.

Since the passage of the Insurance Act, consideration had been given to the subject of the character of the investments which would be accepted by the insurance commissioners, who would have direction over the investment each year, of what promises to become enormous sums, running from £10,000,000 to £15,000,000 per annum. The Act requires that the Government and the approved societies shall have power to invest in any securities in which trustees are, for the time being, by law empowered to invest trust funds; but it adds: "or in any other securities for the time being approved by the insurance commissioners." There was every reason to presume that the approved societies would desire more freedom than the Trustee Act allowed, and it seemed only reasonable in this connection that the securities of the Provinces of Canada should become eligible, thus at once throwing open to them a valuable market from which they were debarred at present, and thus sustaining the price of their issues, which at present were, and unjustly so, classed on the same footing as the issues of the cities of Canada, their prices depreciating or rising with them.

Under the provisions of the Irish Land Act, 1909, trustees had been appointed with power to invest the purchase money in the manner therein provided, and from which provincial securities, such as ours, were now debarred. This would also create enormous funds, which must seek investment.

The Monetary Times some time ago communicated with the Dominion Minister of Finance and the nine provincial treasurers regarding the proposed inclusion of Canadian provincial securities in the British Trustee List. Eight of the nine have agreed to participate in any proper co-operative movement to obtain the privilege. The Dominion Government; both the past Liberal and the present Conservative, up to the present, cannot be said to have exerted any great effort to help the provinces. Nothing is likely to be accomplished until the provinces in a body present their case to the authorities at Ottawa, who, in turn, are desired to approach the Imperial Government. It is pleasing to know from the Quebec finance minister that an inter-provincial conference may be held shortly in order to decide upon the particular action which it might be found by the provinces as advisable to take.

DRIFTING FROM THE FARM

The prevention of the drifting of rural population to the cities has become an acute problem both in Canada and the United States. The constant appeal of the farmer for labor is a serious matter, and is one of the direct effects of the depopulation of country districts. The census figures of the United States show that 83.1 per cent. of all persons reported as having gainful occupations were employed in agriculture in 1820. The fraction declined to 77.5 per cent. in 1840, to 47.3 per cent. in 1870, to 44.1 per cent. in 1880, to 37.2 per cent. in 1890, and to 35.3 per cent. in 1900, or about one-third of the persons having gainful occupations. During the eighty years from 1820 to 1900, the agricultural fraction declined to 47.8 per cent. During the same period the number of persons having gainful occupations in agriculture increased from 2,068,958 in 1820 to 10,249,651, or five times.

Competition between agriculture and other employments in determining wage rates confronts the farmer almost everywhere in Canada and the United States. Hence it is important to the success of farming opera-

tions that depend on hired labor that they should produce commodities whose prices are high enough to sustain competitive wages on the farm. There is at least association, if not the relationship of cause and effect, between high and low farm wage rates, respectively, and high and low average value of product per worker. An examination of the course of prices of farm products at the farm shows that farm wage rates have persisted in an upward movement in spite of a downward price movement at times, as well as during the periods when the price movement was upward, although not in as great a degree.

Two of the problems confronting the Canadian farmer in many parts of the country are to obtain and keep farm help, and to get a fair profit on his products. The price gap between the grower and the consumer, in numerous cases, is far too large, and works to the detriment of the pockets of the producer and the consumer. If the so-called magnetism of the city partly accounts for the situation, our governments should help make the standards of living among country people more attractive. Better dwellings, improved modes of living, home life, the introduction of the telephone, electric power and light, good roads, and many other agencies may help to stem the march of rural population to the metropolitan centres.

BANK ACT REVISION

Whatever are the shortcomings of Canada's banking system, one of its admirable features has been the continual adjustment of banking legislation to the needs of the country. This is an important matter in a young country of constant development. The decennial revision of the Bank Act has helped that adjustment. The explanation of the bill introduced by the Minister of Finance at Ottawa this week again illustrated the strength of the system in that direction. During recent years the farmers, especially in Western Canada, have felt the injustice of having threshed grain in their keeping without being able to obtain a loan upon it. The revision of the Act is providing for that, and in future it is proposed that the banks may lend money to farmers upon the security of threshed grain in their possession, and also to ranchers upon cattle.

One of the most difficult problems in connection with our banking is that of inspection. Many schemes have been suggested, but most of them have contained serious flaws. There are objections to an examination solely by banking officials, and the government would not likely assume the entire responsibility of inspection. Mr. White's proposed system will enable the Minister of Finance not only to call for a return or statement from a bank, but to have the return verified by a special auditor appointed by the shareholders. The government will pay the auditor for the return. This step is thought by some to be insufficiently drastic, but the question of bank inspection is far easier to criticize than to solve. The banks are granted special privileges under their charters, and safeguards to the public must always be in evidence. After that, it must be remembered that the bank, just as any other business, has certain rights. It is difficult to tell how the proposed audit will work until it is in practice. Supposing, however, it to have been operative in the case of a recent failure, the Farmers' Bank, it would probably have saved the wreck of that institution. The Minister of Finance in that instance called for a special return from the bank's general manager. It was duly forwarded, but the Minister had no means of verifying it. The revised Bank Act gives him power to verify such a return.

The clause relating to note issue should help to overcome circulation obstacles. The banks now may issue notes up to the amount of their unimpaired paid-up capital, and during the crop movement period may issue notes to the amount of 15 per cent. of the paid-up capital and reserve. The banks pay for that privilege

a rate of interest not exceeding 5 per cent. They can also obtain Dominion notes issued upon the security of gold. The new act will permit them to issue their own notes upon the security of gold paid into a central gold reserve, the trustees of which will be representatives of the Bankers Association and of the Government. This provision will increase considerably the note circulation and should make Canada one of the leading gold countries.

The time was overdue for greater restrictions during the organization of banks. The revised bank act will provide for additional safeguards at those times. The Treasury Board will not issue a certificate to do business until it has satisfied itself that preliminary expenses have been reasonable. The proposed act will probably be subject to minor amendments, but it is likely to be passed practically as introduced. The important new clauses are fair and reasonable.

STILL WAITING

The public are still waiting for the decision of Judge Leet, respecting charges against officials of La Banque Internationale.

SMALL CHANGE

This is the season of dollar diplomacy.

* * * *

This is the season when money trusts get hurt.

* * * *

"You will find it in *The Monetary Times* annual."

* * * *

Three Dreadnoughts in J. Bull's stocking is a Christmasful.

* * * *

The Guelph winter fair is another medal for agricultural Canada.

* * * *

New laid eggs at sixty cents a dozen, will at least inspire summer thoughts.

* * * *

One need not pull out the ear wool to hear the rumble of the cotton merger.

* * * *

Holiday news from Ottawa—the cost of living advanced one point in November.

* * * *

The British North America Act would make a good Christmas dish, with Provincial sauce.

* * * *

"Semi-panicky condition" of Wall Street sounds like the morning after the Christmas night before.

* * * *

The former Chinese emperor, Pu Yi, has whooping cough. His name, taken after meals and at bedtime, might be a good cure.

* * * *

Mr. J. H. Griesel, a New York money broker, says he often lends \$25,000,000 in a day—a good man as a Christmas friend.

* * * *

A lady was elected treasurer of Wellington County, Ontario, after sixty-five ballots, and one would imagine they were feminine voters, too.

* * * *

The fire insurance companies have only another ten days to hold their breath for a big conflagration. Then they will have 365 days in 1913.

* * * *

In the olden days in the stocking were a penny trumpet and candies; now it is a hundred dollar toy railway, worked by electricity—and we complain of the high cost of living.

HOME AND INTERNATIONAL BANKS

Will Pellatt Syndicate Turn Over the French Bank to the Home, Free from All Complications?

The affairs of La Banque Internationale are still wrapped in some mystery and where will be the ultimate destination of the bank charter is not yet clear. Colonel Mason, the general manager of the Home Bank, which was until recently in active negotiation for the Internationale, refuses to issue any more statements respecting the matter, chiefly for the reason that he is weary of denying stories emanating mostly from Montreal. Colonel Sir Henry Pellatt states he is not in a position to add anything to the fact that he and a syndicate associated with him have secured control of the International Bank.

Pellatt Syndicate a Medium.

From a reliable source, The Monetary Times learns that the Home Bank is still interested in securing an entry into Quebec by taking over the Internationale and that the Pellatt syndicate will be the medium through which this will be achieved. As a banking institution, the Home Bank naturally wishes to absorb the other institution when it is free from legal entanglements. This is a reasonable position. It may be that Sir Henry Pellatt's syndicate will unravel the legal skein and when that is done, hand over La Banque Internationale to the Home Bank, shorn of its present complications.

This assumption is strengthened by the fact that when the stock of the French shareholders was placed with the Canadian syndicate last week, and a cheque for \$265,000 was tendered therefor, an attachment was immediately served by Sir Rodolphe Forget, claiming that the holders of the shares, or some of them, were indebted to him for \$187,173. The syndicate, therefore, has had an early opportunity of entering the legal arena.

French Shareholders Involved.

The following is a list of the French shareholders against whom Sir Rodolphe alleges he has claims for services rendered in connection with transactions on the financial market:—

G. Zucher, \$5,022; Emile. Lachez, \$2,340; Viscount de Ste. Angele, \$32,301; Richard de Richécour, \$8,126; Philippe Morand, \$17,822; C. Nicolai, \$21,420; Francois Henri Gauthier, \$7,465; Pierre Perodin, \$722; Mme. Veuve Charpentier, \$3,754; Eugene Labhardt, \$9,154; A. Kessler, \$7,918; George Morelle, \$8,165; Lucien Laurette, \$110; Gaillard Frank and Company, \$4,500; Maxine Beauvisage, \$1,062; Dame Veuve Emilie Lucille Laurette, \$15,322; Marcel Laurette, \$38,353; Dr. J. J. L. Puig, \$3,329.

In the meantime, the public continues to wait for the decision of Judge Leet, respecting charges heard by him against officials of La Banque Internationale.

FIRE PREVENTION CAMPAIGN

From figures gathered by the United States department of commerce and labor it appeared that the average annual per capita fire loss in six European countries was 33 cents, while in the United States and Canada it was \$3. The annual fire waste in Glasgow was \$325,000, while in the smaller Boston, it was \$2,000,000. In Berlin it was \$175,000, as against Chicago, a city of the same size, with an annual loss of \$5,000,000 during five years. Berlin's fire department costs the city \$300,000, while Chicago's annual tax for this department is \$3,000,000. So stated Mr. Franklin Wentworth, secretary of the National Fire protection Association, in addresses delivered before the Canadian Manufacturers Association at Montreal, Hamilton and Toronto this week.

These statistics were not peculiar, but typical of the psychological attitude of the peoples of both countries to the whole question.

Their forefathers had to cut down beautiful forests of pine to get to the soil. That brought a feeling that the supply of lumber was inexhaustible, and it had been adopted as the national building material. In Wisconsin and Minnesota he had found thousands of acres of stump land from which the forest had been taken fifty years, and on which no effort had been made to start a new forest growing. The same thing was true in Oregon and Washington, the brush and debris being left for the first locomotive spark to start a conflagration, and scarcely any care being taken even to prevent fire in the standing timber. It was only during the last two of three years that the United States had awakened to the fact that there was a limit and that something had to be done.

BANK OF OTTAWA

The comparison of the figures of the past and previous year of the Bank of Ottawa, shows that it has continued to make good progress and has shared in the banking profits of the past twelve months. Deposits, interest and non-interest bearing, for the year ended November 30, 1912, totalled \$38,157,000, and in 1911, \$34,854,000. Its call loans in Canada were increased by approximately \$400,000 and its current loans by about \$3,000,000. Real estate other than bank premises was a trifle less last year, the amount being \$76,288. Bank premises are valued at \$1,500,000, an increase of approximately \$250,000 over the figures of the previous year. Eight new branches were opened during 1912, six in Ontario, one at Regina and one at Vancouver.

The balance at credit of profit and loss account on November 30, 1911, was \$118,167. The net profits for the past year, after making the usual deductions, were \$640,220, a substantial amount, and making a total sum of \$758,387 for distribution. Dividends accounted for \$419,433. Commencing with the quarterly dividend payable at the beginning of June last, the directors increased the rate from 11 to 12 per cent. per annum and they hope that the bank's business will continue to justify the payment of a dividend at that rate. The sum of \$54,395 was applied in reduction of bank premises and furniture and \$15,000 was transferred to the officer's pension fund. This left a balance of \$269,559 to be carried forward at credit of profit and loss account. The reserve account at the end of 1911 was \$4,000,000. To that has been added \$325,480 being premium of new stock issue. The authority for that issue was obtained in 1907 and the directors in September last decided to issue 5,000 shares of new stock at a premium of 100 per cent. Of this 3,578 shares have been subscribed.

Now that bank inspection is such a prominent topic, it is interesting to note that the head office and branches of the Bank of Ottawa have been inspected as usual and that the independent audit of the bank's accounts has been continued. The certificate of the independent auditors, Messrs. Price, Waterhouse and Company, reads as follows:—"We have examined the books and accounts of the Bank of Ottawa at its head office and at five of its principal branches, and have been duly furnished with certified returns from the remaining branches, and with all information and explanations required by us. The bank's investments and securities and cash on hand at the branches visited were verified by us at the close of business, November 30th, 1912. And we certify that the foregoing general statement of liabilities and assets, as at November 30th, 1912, is in agreement with the books, and in our opinion exhibits a true and correct view of the state of the bank's affairs according to the best of our information and the explanations given to us."

WESTERN CONDITIONS ARE SATISFACTORY

The Monetary Times Office,
Winnipeg, December 17.

The wheat situation in the West is probably the most satisfactory as far as the season is concerned of any year in the history of Western Canada. The movement has been unusually heavy and the railroads have done all possible to facilitate the conveying of the crop to the terminal elevators.

The weather has been most favorable all through the fall and little trouble has been experienced.

Notwithstanding the satisfactory movement of the crop many of the firms seem to be holding their wheat for higher prices, as loan company managers have told The Monetary Times this week, that payments are coming in very slowly from the country and the supposition is that the farmers will furnish excuses and blame the railroad for not being able to get out their wheat, when they are in some cases really holding back for higher prices.

The Christmas rush has started in earnest and retail dealers are busy, money with them does not seem to be tight. Many of them stated that the trade has been later this year in getting active, than for several years back.

The Oakes-Gray Realty Company, Limited, Winnipeg, has been incorporated with capitalization of \$500,000, the stock being held principally by A. H. Oakes and Joseph W. Gray—the latter a Minneapolis banker and investor, who has had a large interest in Winnipeg realty for some years. The business of the Oakes Land Company will be taken over, and larger office quarters probably secured to handle an extended business. The company will control over \$2,000,000 worth of Winnipeg city and suburban property, either directly or through the companies for which it will act, including the United Investors, Limited, Co-operative Investments, Limited, and Suburban Estates, Limited.

GOVERNMENTAL SUPERVISION OF BANKS

By H. M. P. ECKARDT

III. BELGIUM AND SWITZERLAND

Belgium is taken next because the National Bank of Belgium is supposed to have perhaps the best organization of the European state banks. When the Bank of Japan was organized, a few years ago, the Belgian state bank was taken as the model. The Marquis Katsura, in a recent article on the banking system of Japan, explains why this was done. He says: "After careful study and comparison of the central banking systems of Europe, we found that, although in extent of business, power, and influence in the financial world, the Bank of France and the Bank of England were unrivaled institutions, yet in point of perfection of organization the Bank of Belgium was peerless."

While we need not necessarily accept this Japanese opinion as conclusive, it will be profitable to note some of the outstanding features of the Belgian state bank.

Privately Owned But Has Special Rights

The National Bank of Belgium is privately owned. It has a monopoly of note issue rights, and has the sole possession of the government business. It is obliged to perform various services gratuitously for the state; and the state participates in its profits in return for endowing it with its valuable special privileges. The management is in the hands of a governor and six directors, these forming the council of administration. The bank is supervised by a board of censors comprising seven members; and the board of discount controls the granting of credit. The directors are elected by the general assembly of shareholders; but the King appoints the governor.

The general assembly of shareholders also elects the censors. Both directors and censors share in the profits of the bank up to a certain fixed maximum. The governor, the directors, and the censors form a general council, which meets at least once a month to consider the condition of the bank. The general council appoints the discount committee. This committee has to pass on the bills submitted for discount.

Government Commissioner Watches Operations

Watching the operations of the bank on behalf of the state, stands the Government Commissioner. His salary is fixed by the King, by agreement with the bank directors, and is paid by the bank. This commissioner may be present at the meetings of the general assembly, of the councils, and of the committees; and he has the right at all times to examine into the condition of affairs and to verify the books and the cash.

This feature of the Belgian system is well worth studying by Canadian bankers. If such a public commissioner could be procured in this country for each great bank, a man capable, just, and incorruptible, to be present at the head office and to follow all the operations of the bank, it might prove to be the most satisfactory solution of the problem of banking supervision.

With reference to other banks in Belgium, it is to be noted that there is the Societe Generale, an old and powerful institution, and two or three other large banks. Apparently they are not supervised by the government.

Switzerland's System Was Remodelled

We may now consider Switzerland, as the banking system of that country was remodelled a few years ago—in 1905. Switzerland had formerly a considerable number of small banks, each one having the right of note issue. But these banks of issue were confined in each case to a canton or to a single locality; the notes issued by a bank in one canton might be questioned or subjected to a discount if circulated in another canton; and the banks failed entirely to regulate the exchanges with France and other foreign countries so as to prevent troublesome drainages of specie.

Their shortcomings in these and other respects caused a prolonged agitation for the creation of a central bank with monopoly of note issue. After many years of bitter political struggling over this question, the Swiss Bankverein was launched. The capital is divided as follows: two-fifths taken by the cantonal governments or by banks partly or wholly owned by the cantonal governments; one-fifth by the old banks of issue; and the remaining two-fifths by the general public.

Has Business of Confederation Government

As mentioned above, the bank has a monopoly of note issue in the Republic and it has sole possession of the financial business of the Confederation Government. The profits of the bank, after placing 10 per cent. of the amount to surplus, go to the shareholders up to 4 per cent.; then a subsidy or indemnity goes to the cantonal governments; and if anything is left, one-third of the amount goes to the Confederation and two-thirds to the Cantons.

Supervision and control are vested in the general meeting of the shareholders, the bank council, the bank committee,

the local committees, the audit commission; and the management is carried on by the direktorium and the local management.

The bank council has 40 members. Of these 15 are elected by the general assembly of shareholders, and 25 by the Bundesrat or federal council. The bank council fixes salaries, authorizes transactions exceeding 5,000,000 francs, or credit limits of customers whose borrowings exceed 3,000,000 francs; and it has various other responsibilities.

The bank committee has seven members, the president and vice-president of the bank council and five other members named by the bank council. Meetings of the committee are to be at least once a month. The committee passes on transactions above 1,000,000 francs which need not be referred to the whole council for action. Its duties are advisory. Then the local committees consist of three to four members according to the importance of the place.

From Among Merchants and Manufacturers

They are selected from the principal merchants and manufacturers, and are named by the bank council. The audit commission consists of three members and three substitutes, elected by the general assembly at its ordinary session each year. The commission has the right to examine the business working of the bank; and it reports to the general meeting, also to the Bundesrat.

The members of the direktorium—three in number—are appointed by the Bundesrat on the proposal of the bank council. This is the active executive management. The Bundesrat also appoints the managers and sub-managers of the branches.

AUDIT IS COMPULSORY.

Editor, The Monetary Times:—

Sir,—In reading over Article No. 1 on the "Governmental Supervision of Banks" from the pen of Mr. H. M. P. Eckardt to-day, I note a slight inaccuracy in one of Mr. Eckardt's statements with reference to the audit of the accounts of British joint stock companies, which I shall be glad if you will permit me to correct.

He states with reference to British joint stock banks, that "the action of the banks in calling in the accountants is purely voluntary; each bank selects the firm which shall audit its affairs." One would gather from this that there are no compulsory provisions for the audit of the accounts of joint stock banks. The Companies Act, 1879, however, provides, Section 7 (1) that

"Once at least in every year the accounts of every banking company registered after the passing of this Act as a limited company shall be examined by an auditor or auditors, who shall be elected annually by the company in general meeting."

Section 7 (2) of the same Act provides that "A director or officer of the company shall not be capable of being elected auditor of such company."

Practically all joint stock banks have availed themselves of the privilege of limited liability, and are governed by the Companies Consolidation Act, 1908, which Act also provides similar provisions to the above, in addition to setting forth the duties of auditors of the accounts of joint stock companies. By Section 19 (4) of Companies Act, 1907, an auditor cannot be removed by the shareholders in general meeting unless at least 14 days' notice has been given to each shareholder prior to the annual general meeting. It is also compulsory that the certificate of the auditor must be attached to the published balance sheet, which certificate must declare whether all his requirements have been complied with, and if there is a special report on the accounts; this must also be attached to the balance sheet or a proper reference made to it in the certificate as required by the Act. Every director, manager, secretary or other officer of the company who is knowingly a party to the default is liable to a fine on conviction of not exceeding fifty pounds sterling.

The audit of the accounts and the publication of certificate is therefore made compulsory by law, and is by no means a voluntary act on the part of banks or their officials, as might be gathered from Mr. Eckardt's article.

Yours, etc.,

E. SNOWDEN, F.S.A.A. (Eng.).

Carriage Factories, Ltd.,
203, Board of Trade Building, Montreal.

December 14th, 1912.

The East Canada Power and Pulp Company, Limited, is in liquidation, a winding-up order having been issued by the Superior Court in Murray Bay. The company failed to meet its bond interest when the last payment fell due on September 1st last. At the expiration of the usual three months period on December 1st the coupons were still unpaid and action was entered in the court at Murray Bay last week, on behalf of the bondholders. The Montreal Trust Company has been appointed provisional liquidator and a meeting of the creditors, bondholders and shareholders has been called for December 27th at Murray Bay to appoint a permanent liquidator.

NEW HAVEN-GRAND TRUNK DEAL

President Chamberlin Refused to Sign Agreement—
What President Mellen Says

The New Haven-Grand Trunk deal continues to evoke considerable discussion in the United States, and especially in New England. Questions have been put by the Boston Post to Mr. Charles S. Mellen, president of the New Haven. They and the answers thereto are as follow:

Who first suggested the traffic agreement between the New Haven and Grand Trunk, yourself or President Chamberlin of the Grand Trunk? A. I do not recall. Impossible to say.

Did President Chamberlin refuse to sign the agreement? A. Yes.

Is there any secret understanding which does not appear in the text of the agreement made public by the New Haven? A. None whatever, neither now or at any previous time.

Not opposed to Grand Trunk

Why did you fight so hard to keep the Grand Trunk out of Providence and Boston? A. We never have been opposed to the Grand Trunk extensions. We have only fought to keep the use of our tracks and terminals to ourselves, as they are insufficient for our own business, and to allow another to use them would force us to secure new capital for their accommodation.

Did you suggest that the Grand Trunk should cease work on its New England extensions? A. No, never.

Would you be willing to have the Grand Trunk as an active competitor, owning its own rails to Boston? A. If it will come without taking our tracks and terminals, yes.

Would the Grand Trunk entering Boston on its own rails, give New England better transportation facilities than would be provided by the New Haven-Grand Trunk traffic agreement? A. I do not think it would.

Do you ever think of quitting the fight in Boston? A. I have no fight with the people of Massachusetts. I am fighting for them. I am looking, not to the immediate present, but to the future, when the result of my work will secure their support and approbation.

New York's Views

Commenting upon the Grand Trunk Railway's movements in New England, the New York Journal of Commerce says:—

"At the close of the hearing before the House Rules Committee on the question of investigating the alleged agreement between the New York & New Haven and the Grand Trunk railroads, the text of the alleged agreement was submitted to the committee by the vice-president of the New Haven road. As we have already said, this was a traffic agreement proposed by President Mellen and not accepted by the president of the Grand Trunk, who wished to have some changes made in it. It makes no reference to the abandonment of the independent connections of the Grand Trunk with terminals at Boston and Providence, but it is a fair inference that it had much to do with the sudden suspension of work on the latter, notwithstanding the pretense that this was due to financial reasons. It contains nothing to incriminate Mr. Mellen and takes all force out of his offer to waive any right to immunity in testifying about it, as nothing was accomplished.

No Violation of Law

"Whatever the effect of the agreement might be if it were to be adopted, there is no violation of law in making the proposal. There is nothing unusual in the terms offered. It was proposed to establish certain through routes, joint rates and through billing by an arrangement for each railroad to run trains over certain lines belonging to the other, which would doubtless be of advantage to both and might under proper regulation be of advantage to the public. It ought to be of advantage to avoid duplication of facilities and expense, and to provide continuous service and through rates on routes belonging to different companies, always provided that the facilities be sufficient, the service adequate and the rates just and reasonable.

Competition Between Them

"There lies the difficulty. As the two systems through New England lie, there is more or less competition between them, and with the contemplated extensions of the Grand Trunk that competition would be materially increased. If those extensions were completed and an agreement should then be made, whereby the competition was suppressed, there is hardly a doubt that this would be held to be a violation of the anti-trust law. There are plenty of precedents to indicate that. If the proposed agreement were to be effected it would stop such competition as may exist and prevent that which was contemplated by the proposed extensions. There is little doubt that it would prevent the extensions from being made or that such was the intention in proposing it. The exposure caused by the suspension of work on the line to Providence has probably prevented the adoption of an agreement which would have been in violation of law, but we do not see how the Grand Trunk can be compelled to make the extensions and establish a competition which does not now exist."

ROYAL BANK AND ALBERTA CASE

Statute in No Way Conflicted With Canadian Bank Act—Involved Issues of Constitutional Gravity

On the resumption of the Alberta Railway appeal case, Mr. Buckmaster, for the respondents, said the contention really was that the statute which obliged the Royal Bank to pay the deposit money to the respondent, namely, the Albertan provincial treasurer, was ultra vires.

The Lord Chancellor, interposing: "This is against you, if this statute so interfered with civil rights in property as to amount to confiscation."

Mr. Buckmaster replied that he was prepared to meet that case.

Alberta was an independent sovereign state so far as the right to make laws in the state were concerned. Its powers were those of an empire subject to two limitation only, namely, geographical area and obligation to do nothing hostile to the rights of other provinces. The bank's liability was a debt. If the province thought fit to pass legislation regulating that debt it was a decision which was not ultra vires and could not be attacked as such.

Property and Civil Rights

Lord Atkinson: "You say so because that statute deals exclusively with property and civil rights within the province?"

Mr. Buckmaster: "That is the whole point."

Lord Chancellor: "I am not so much concerned with the right of the province to pass the act dealing with the payment, but I am concerned with what to me is a very difficult point, namely, the effect it has on civil rights. I agree that if the act is not ultra vires, then the question whether what it purports to do is to be considered by the Court as right or wrong is wholly irrelevant. There was or was not jurisdiction."

Mr. Buckmaster said he would deal with that right away. His first proposition was that civil rights were not affected. The statute did not alter or affect any existing legal rights of the bank. All it dealt with was the existing civil rights between the appellant bank and the customer's property in question deposited in Edmonton. Therefore, geographically, the statute dealing with it was not ultra vires.

Would Be Paid Fully

The property mortgaged was wholly within the province. The only right in question here was the right of the person to invoke the law regarding payment of bonds. It was the right of the customer to go to the bank to demand payment. What was there ultra vires in a statute which said: "You, the customer, are to apply to the provincial treasurer for payment, and not to the bank?"

The customer was not a whit worse off. Whatever he was owed would be paid fully. The statute in no way conflicted with the Canadian Bank Act. It was denied that there were now any customers, therefore no civil rights were effected.

Lord Atkinson: "When you say no civil rights were affected you beg the whole question." Mr. Buckmaster admitted that was the crucial point of the case.

Issues of Constitutional Gravity

Lord Atkinson: "I am not at present satisfied that the Act does not interfere with civil rights of property."

Mr. Buckmaster submitted that it did not, asking their Lordships to assume, for the sake of illustration, that the English Parliament passed a law dealing with the rights of English subjects in London over property in Alberta. Could such a statute be said to be ultra vires of the English Parliament?

Lord Moulton, replying, thought it might very well be, if the Act worked an injustice.

The Lord Chancellor said that the case was difficult, and involved issues of such constitutional gravity that their Lordships would take some time to consider their decision.

UNION BANK'S REPORT.

The profits of the Union Bank for the past year exceeded 14 per cent. on the average paid-up capital. The net profits amounted to \$76,832. The balance at credit of account on November 30th, 1911, was \$71,953. A total of \$826,388 has been applied as follows: Four dividends totalling \$397,964.30; transferred to rest account, \$195,340; premium on new stock, \$47,580; written off bank premises account, \$100,000; contribution to pension fund, \$10,000; balance of profits carried forward, \$75,483.76.

Mr. John Galt, president of the bank, in his annual address referred to the excellent showing made by the institution, and pointed out that its assets are now nearly seventy millions. He placed last season's grain crop of the west as follows: wheat, 188,333,000, average, 18.6 bushels; oats, 220,327,500, average, 43.5; barley, 31,449,000, average, 33; flax, 13,300,000, average, 9.5. In 1904, the bank had 84 branches, this year there are 285, of which 157 are in the west. New branches established in the west this year were: Manitoba, 5; Saskatchewan, 12; Alberta, 9; British Columbia, 3.

HOW UNITED STATES PARCELS POST WILL WORK

Comparison of Express and Postal Rates on Various Trips From New York.

While Canada is agitating for a parcels post system, the United States already has the necessary legislation, and on January 1st, 1913, the new Act will go into force. Since the passage of the Act, many comparisons have been made showing the advantages of the parcels post charges over the express rates. Such comparisons, according to the bulletin of the Merchants' Association, have generally been restricted to the territory near the point of origin, and have not been sufficiently comprehensive to enable a shipper to determine to his satisfaction to just what extent he will be benefited by the new postal service, and none of the comparisons have taken into account the revised express rates.

The traffic bureau of the Merchants' Association of New York has prepared a table showing a comparison of the parcels post rates with the present express rates and also with the proposed express rates from New York city to representative points in each of the parcels post zones.

Within Fifty Miles

Eliminating the local rate which applies on intra-city business, which is not properly comparable with any standard express service, in the first zone, or within 50 miles, the parcels post rates are lower than the present express rates on packages weighing less than 10 pounds; but when compared with the proposed express rates there is no advantage on shipments over six pounds, and the saving on a six-pound package is only two cents; on a five-pound package only five cents.

For distances between 50 and 300 miles, including such points as Portland, Me., and Richmond, Va., the parcels post rates are lower than the present express rates up to 8 and 11 pounds, respectively, but when the new express rates become effective the advantage will stop in the case of Portland at 4 pounds and to Richmond at 5 pounds.

Over Six Hundred Miles

In zone 5, covering distances over 600 miles up to 1,000 miles, the parcels post rates are generally lower than the present express rates. To such points as Chicago, Memphis, Montgomery and St. Paul the proposed express rates are lower than the parcels post charges, as follows: To Chicago, 4 pounds and over; to Memphis, 6 pounds and over; to Montgomery, 5 pounds and over; to St. Paul, 6 pounds and over, with the same rates as parcels post for 5 pounds.

Lower Than Express Rates

Generally speaking, the parcels post rates are lower than present express rates for distances over 300 miles, but when compared with the new graduated express charges fixed by the Interstate Commerce Commission it cannot be said that they will be of any great value, thinks the Journal of Commerce, except on packages weighing up to four pounds for long distances, and on packages of from four to seven pounds when for distances ranging from 50 to 300 miles; in many cases the advantage ceases when the package weighs more than three pounds.

A distinct advantage in connection was the use of the parcels post rates is the requirement that the packages must be delivered to the post office. In a city like New York this will be found a potent factor in favor of the express companies, whose rates include pick-up as well as delivery, and whose charges include the giving of a receipt, which is not the case when the package is mailed.

As to Graduated Charges

Under the present graduated charges of express companies for packages weighing less than 100 pounds, which charges have been so roundly condemned by the Interstate Commerce Commission as extortionate and indefensible, the Post Office Department may expect to receive a greater volume of business from the general public than it will have a right to expect when the new express rates become effective. The merchant or manufacturer will undoubtedly carefully consider the questions of receipt, risk and inconvenience before delivering his merchandise to the post office in preference to the express companies.

MOTOR TRUCKS IN CANADA

That the big cities of Canada present a good future market for United States made motor trucks is the conviction of Mr. E. J. Kilborn, assistant sales manager of General Motors Truck Company, who has just returned to Chicago from a trip that included Montreal and other Canadian cities.

"Although it is a matter of common knowledge," says Mr. Kilborn, "that Montreal is one of the world's first cities from the standpoint of per capita wealth, I was quite unprepared for its general prosperity and the willingness of many business houses to consider favorably the subject of motor transportation."

VENEZUELA ELECTRIC LIGHT COMPANY FORMED

With Head Office in Toronto—Dominion Charter Grants Extensive Powers.

That Canadian promoters and financiers will direct more British capital into electrical enterprises in the South American republics is apparent from a Dominion charter issued during the past few days. It incorporates members of the legal firm of Messrs. Blake, Lash, Anglin and Cassels as provisional directors of the Venezuela Electric Light Company, Limited. The charter gives extensive powers, which are generally indicated in its first clause, which reads as follows:—

"To purchase, lease or acquire lands and interests therein and water powers and water privileges and power and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electric, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power, when exercised outside of the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf."

Head Office in Toronto

The capital stock of the company is \$1,500,000, and is divided into 15,000 shares of \$100 each. Its head office will be in Toronto. It is understood to be another Mackenzie-Mann enterprise. As is usual whenever a company of this nature is promoted, the criticism is heard that Canadian money is being sent abroad rather than kept at home for development. The Monetary Times has previously pointed out that while important Mexican, Brazilian and other companies abroad have Dominion charters and head offices in Canada, it is the British investing public that provides most of the capital. For instance, of the \$26,000,000 of bonds issued last year on account of Canadian corporations operating in foreign countries, the United Kingdom's investors took 98.80 per cent. and those of Canada 1.20 per cent.

The republic of Venezuela, in which the new company will presumably operate, has as its ruler General J. B. Gomez, who was installed as president in June, 1910. It has an area of about 393,976 square miles, with a population of approximately 2,685,000. It is divided into federal districts with twenty states and two territories. There are three distinct zones in the republic, agricultural, pastoral and forest. One-fifth of the population is engaged in agriculture. The country has few industries, all manufactured materials required being imported.

Roads and Railways

The roads of the country are primitive and away from the rivers and railways, traffic is carried on by means of pack animals and small mule carts. There are eleven lines of railway, four national and seven foreign, with a total length of 492 miles. An English company supplies telephonic communication in parts of the country that are settled. An American company is working the iron mines at Imataca.

An interesting story respecting Canadian relations with Venezuela, written by a native of the republic, will appear in the annual number of The Monetary Times.

BANK BRANCHES IN ALBERTA.

The table printed in last week's Monetary Times, showing the bank branches in Alberta, was incorrect. The following are the right figures:—

Bank.	No. of Branches in Alberta.
British North America	5
Commerce	49
Dominion	10
Hamilton	9
Hochelaga	1
Imperial	15
Merchants	47
The Molsons	5
Montreal	13
Northern Crown	6
Nova Scotia	4
Ottawa	1
Quebec	5
Royal	28
Standard	5
Toronto	6
Union	46

CONTROL OF RICHELIEU NAVIGATION COMPANY

Furness and Toronto Interests Are Thought to Have Got Control—Stock Market Trying to Follow Matters

The fight for the control of the Richelieu and Ontario Navigation Company, is one of those financial battles of which the war correspondent is allowed to see little and know less. The belligerent forces are understood to be the Toronto and Furness interests and the Montreal holders of the stock. According to information which has filtered through the lines, the Toronto-Furness combination is in a fair way to obtain control if it has not already done so.

During the summer it was said that Messrs. Furness, Withy and Company, had acquired a one-sixth interest in the Richelieu and Ontario Company. The effect of the absorption by the Richelieu of other navigation companies, practically places under one control an important branch of the shipping industry and competition has been almost eliminated. A clear route is established across the Great Lakes to Montreal and cargoes will be transhipped to the Furness steamers and carried across the Atlantic to Liverpool, Manchester and Hull. The control of this company, therefore, is not a small stake.

Question of Control.

During the amalgamation proceedings, it would seem that the old group lost control through taking in of the Northern. Then occurred a prolonged delay while consideration was being given to ways and means of holding control. This, it is thought, was the cause of the delay in the consummation of the merger in its entirety. It was later understood that the whole matter had been satisfactorily settled, but recent developments would make it appear that such was not the case.

If the Furness and their allied interests, have obtained control, just what they intend to do with it is impossible to say, but the mystery surrounding the situation attracts the attention of the market and excites the acquisitiveness of market followers, a large proportion of whom have already bought the navigation stock.

So far as can be learned, the Furness interests, if in control, have no particular innovations to introduce other than that the terminal facilities will be given close attention and further boats will be constructed and added to the line.

There is said to be a programme which will be welcomed by shareholders when it is announced. The attitude of the opposition is that many of the present holders have stock at a high price and desire to get rid of it. That attitude seems hardly justified in view of the action of the markets.

To Increase Capital.

The act to increase the company's capital stock from \$10,000,000 to \$15,000,000 has passed its second reading in the House at Ottawa, not without discussion however. Mr. Carleton stated if it were a question of increasing the capital of any company there should be no objection provided the money thus asked for were intended for the legitimate use of the company. After reading the second clause of the bill which stated "the company may invest and deal with moneys of the company not immediately required in such manner and upon such terms and conditions as may seem expedient," he said it might all be sold at the same time, but it seemed to him there was not the same necessity in this case where it was a question of a further issue of stock that could be made as the requirements of the company dictated. He wanted to know if it was the intention to use the portion not immediately required by the company for other than the legitimate uses of the company.

Terminal Equipment and Boats.

The Hon. George Graham, while making no objection to the proposal, said that even at this early stage members should have some general idea of the general report of the bill. Mr. Lesperance, who introduced the Richelieu bill, assured the house that the increase in capital had in view the purchase by the company of new terminals, new equipment and new boats, and that there was no idea to use the money except in the interests of the company.

The Richelieu and Ontario Navigation Company now controls the following lake steamship lines:—Niagara Navigation Company, Northern Navigation Company of Ontario, Inland Lines, Turbine Steamship Company, Thousand Island Steamship Company, and the St. Lawrence River Steamboat Company.

The present authorized capital of the company is \$10,000,000, of which at the end of 1911, \$5,311,875 was paid. The company's authorized first mortgage debentures totalled \$2,000,000 of which at the same date \$1,313,933 were issued and \$80,299 were redeemed. These are 5 per cent. 30-year

debentures, but it is interesting to note that they may be redeemed on six months' notice at 110. Sir Rodolphe Forget is its president.

Dividing the directorate in Montreal and Toronto divisions there is the following result:—

Montreal.	Toronto.
Sir R. Forget, M.P., (president.)	Col. Sir H. M. Pellatt.
W. Wainwright, (vice-president.)	J. Playfair, (Midland.)
G. Caverhill.	E. Bristol, K.C., M.P.
W. Hanson.	
C. O. Paradis, (Sorel.)	
H. M. Molson.	
Hon. J. P. B. Casgrain.	
A. H. Sims.	
W. G. Morden.	
J. R. Binning	
C. A. Barnard, K.C.	

A year ago the company's dividend was increased from 6 to 8 per cent.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended November 30th:—

	1911.	1912.	Increase or Decrease.
	\$	\$	\$
Canadian Pacific	3,194,000	3,587,000	+393,000
Grand Trunk	1,233,062	1,442,409	+209,347
Canadian Northern	568,500	748,400	+179,900
Temiskaming and Northern Ontario	46,565	38,537	— 8,028

The following are the railroad earnings for the week ended November 21st:—

	1911.	1912.	Increase or Decrease.
	\$	\$	\$
Canadian Pacific	2,226,000	2,704,000	+478,000
Grand Trunk	959,980	1,064,317	+104,337
Canadian Northern ...	403,000	561,500	+158,500
Temiskaming and Northern Ontario	39,290	28,864	— 10,426

MERCHANTS BANK OF CANADA

The shareholders of the Merchants Bank of Canada have every reason to be gratified with the statement presented to them this week. The profits on the year's operations were large, the reserve fund was strengthened to a fraction over 95 per cent. of the paid-up capital, and the assurance was given by Sir H. Montagu Allan, the president, that the business of the bank is on a sound basis throughout the country, is well represented at all points, and is being capably handled.

The net profits for the past twelve months totalled \$1,338,844, after payment of charges, interest on deposits, rebate on discounts, etc. These large profits were earned on an average paid-up capital of \$6,498,332. Adding the balance brought forward from last year, there was for disposal a sum of \$1,397,722. Dividends of 10 per cent. on the paid-up capital accounted for \$649,004; \$100,000 was written off bank premises; the officers' pension fund benefited by a contribution of \$50,000; and the reserve fund was increased by \$450,000, enabling a balance of \$148,718 to be carried forward in the profit and loss account. The reserve fund was further augmented by the premium on new stock amounting to \$560,760, bringing the fund up to \$6,410,760. The total deposits on November 30th, were \$61,000,000. The Merchants Bank has been doing its full share in financing the business of the country, its current loans in Canada at the same date being \$53,000,000.

The end of the financial year of the bank will be changed from November 30th to April 30th, as the general conditions in Canada in the spring are not so congested as in the autumn when the pressure on the resources of Canadian banks is at its height. The directorate of the bank will be increased from nine to twelve members.

The address to the shareholders of Mr. E. F. Hebden, was unusually interesting. Discussing the bank's loaning business, he stated upwards of \$10,000,000 of the bank's loans represent advances to farmers. The discounting business increased materially in the twelve months and the institution has now as much as can be handled properly. Indeed, added Mr. Hebden, the trend will be downward for the present as the bank has a good deal in short term loans, incidental to the season, which will in due time fall in. The statement of the bank for the past year is eminently satisfactory.

COMPANIES AND THEIR CAPITAL

Six Provinces Charter Ninety-nine Concerns—Many Large Corporations

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Gadsby, Alta.—Van Allen & Company, \$25,000.

Tete Jaune Cache, B.C.—O. E. Hood Company, \$100,000. (grocers).

Listowel, Ont.—Gowdy and Company, \$40,000. O. H. King, E. M. Rowland, J. C. Tuthill.

St. Catharines, Ont.—Meyercord Company, \$50,000. O. H. King, E. M. Rowland, J. C. Tuthill.

Redcliff, Alta.—Redcliff Motors Company, \$200,000. Redcliff Pressed Brick Company, \$150,000.

Stratford, Ont.—Williams Trow Knitting Company, \$60,000. B. M. Willanis, G. E. Trow, J. Trow.

Louisville, Que.—United Refining Company, \$150,000. A. Moisan, A. Lavergne, C. Smith, Quebec.

Grand Forks, B.C.—Grand Forks Canning Company, \$50,000. J. D. Honsberger (ranching), \$75,000.

Sarnia, Ont.—Stuart (fruits and vegetables), \$40,000. V. P. Dawson, N. St. C. Gurd, W. J. Barber.

Trenton, Ont.—Trent Manufacturing Company, \$40,000. C. F. Duquette, H. Desjardins, C. M. Richardson.

Minaki, Ont.—Crossing Lumber Company, \$200,000. A. Stewart, H. R. Patriarche, D. H. Cooper, Winnipeg.

Bromptonville, Que.—Model Dress Manufacturing Company, \$19,000. O. Lambert, E. W. Tobin, D. Paquette.

Cobalt, Ont.—Foster Leasing Company, \$5,000. J. Berry, T. M. Mulligan, M.P., Van der Voort, Toronto.

Nanaimo, B.C.—Hayward and Dods (Nanaimo), \$10,000 (plumbing). J. H. Whittome and Company, \$100,000 (brokers).

Ottawa, Ont.—Syndicat d'Œuvres Sociales, \$100,000. A. Goulet, Bourget, O. Guibord, Clarence Creek; F. X. Giroux, Rockland.

Medicine Hat, Alta.—Redcliff Development Company, \$20,000. Medicine Hat Pump and Brass Manufacturing Company, \$50,000.

Black's Harbor, N.B.—Northern Foxes, \$35,000. L. Connors, P. W. Connors, Black's Harbor; W. L. Barry, Beaver Harbor.

Kingston, Ont.—Kingston Sand and Gravel Company, \$25,000. R. H. Fair, Kingston Township; W. McCartney, J. W. Litton, Kingston.

Winnipeg, Man.—LacSeul Development Company (mining), \$75,000. J. W. Morrison, G. Lennox, W. H. Sullivan. A. Macdonald Company, \$7,000,000. H. Riley, W. R. Anderson, J. F. MacGregor.

Quebec, Que.—Canadian Morris Iron Company, \$50,000. L. H. Gaudry, J. M. Gaudry, T. G. Leonard. Compagnie d'Immeubles de Cap Rouge, \$99,000. N. F. Jacques, E. Paquet, D. I. Pouliot, Montreal.

REVISED BANK BILL INTRODUCED

It Provides for External Audit—Money Can be Loaned to Farmers on Security of Threshed Grain—Central Gold Reserve for Note Issue

An external audit of bank books, the deposit of gold in a central gold reserve, and the issue of notes by banks against it, the loaning of money to farmers by the banks upon the security of threshed grain in their possession and to ranchers upon cattle, are three of the chief provisions of the revised Bank Act, proposed by the Minister of Finance. Mr. White, who introduced his bill on Tuesday, stated that the new system would authorize the Minister to call for an examination of the affairs of a bank by the auditors appointed at the annual general meeting of shareholders.

At present the Minister receives monthly statements from the banks, but there is no machinery by which he can verify the information given by the bank officials. Therefore, Mr. White thought it well that the shareholders should be required to appoint an auditor and that the Government should vote compensation to that official in return for his services in verifying the returns made by the banks and in providing information sought by the Finance Minister. This plan was followed in England. Mr. White said that the auditor would occupy an independent position, would be capable of reporting upon the condition of the bank, would have to check accounts and would be able to report cases of fraud.

How Audit Would Work

The security of the depositors was largely to be found in the integrity and ability of bank directors and managers. He believed that an external audit would prevent such disasters as that to the Farmers Bank. In all probability none of the frauds which wrecked that institution would have been attempted had there been an external audit.

"I believe," said Mr. White, "that a proper system of external audit would have prevented the failure of several banking institutions in recent years, and that in the case of one of them it would have led to the detection of fraud." The statements to the shareholders and the Government in the future would contain more details and would bear the certificate of the auditor or the auditors.

Issue Notes Against Gold

At present, the banks may issue notes up to the amount of their unimpaired paid-up capital. Moreover, the banks are enabled during the movement of the crops to issue notes to the amount of 15 per cent. of the paid-up capital and reserve upon payment of five per cent. The banks can also obtain Dominion notes to be issued upon the security of gold. They were now to be permitted to issue their own notes upon the security of gold paid into the central gold reserve to be established at some central point, such as Montreal, and to be in the custody of four trustees, three appointed by the Canadian Bankers' Association and the fourth by the Government. The gold reserve is to be inspected twice a year by officials of the Finance Department, and the conditions upon which it is to be stored are to be fixed by by-laws drawn by the Bankers' Association and approved by the Treasury Board.

Mr. White felt that this last provision would make Canada one of the chief gold countries of the world, and largely increase its note circulation. He went on to say that large amounts of gold were held for the banks in the offices of the receiver-general as security for the large legal tender notes used in adjusting clearances. Legislation might be introduced requiring the banks to pay the Government for the storage of this specie.

Help for the Farmers

The bill also provides, as stated previously, that the banks may lend money to farmers upon the security of threshed grain in their possession and to ranchers upon cattle. Hitherto the privilege of hypothecating goods has been enjoyed largely by wholesalers, who obtain loans upon warehouse receipts for goods in the hands of third parties.

The clauses dealing with the penalties to be imposed upon directors or officers making fraudulent statements of the affairs of banks to the shareholders are to be amended. At present, Mr. White pointed out, it was necessary to show that an officer or director had had guilty knowledge or criminal intent in signing false statements. It appeared to the Minister that there should be a provision whereby a director or officer guilty of negligence might be indicted. He had, therefore, introduced in the new Act a clause declaring directors and officers liable to punishment for negligence.

Organization of Banks

Additional safeguards will be thrown around the organization of banks. To protect subscribers to stock, the new bill will permit the provisional directors to make no large expenditures until application had been made to the Treasury Board for the certificate to do business. The certificate, moreover, could not issue until the Treasury Board had pronounced the expenses for commissions and the like to be reasonable. In the event of the certificate not being granted, moneys in the hands of the provisional directors could not be paid out for

commissions and the like except with the consent of the subscribers at a special general meeting or upon the order of the courts.

As to Bank Amalgamations

Respecting bank absorptions, under the present Act an agreement was made between the directors of the two banks and was then submitted to the shareholders of the two institutions. If it was ratified an application for approval was made to the Treasury Board. The application came to the Treasury Board at a time when that body would be assuming a grave responsibility in refusing it.

Under the new Act it will be necessary to obtain the assent of the Minister of Finance or some such Governmental authority to the agreement between the boards of directors before ratification by the shareholders is sought. Such a provision, Mr. White thought, would enable the Government to prevent such bank amalgamations as would be contrary to the public interest.

The bill will be considered by the Banking and Commerce Committee.

NEW CARTAGE TARIFFS.

New cartage tariffs of fifty cents per ton and fifteen cents for packages known as "smalls" have been fixed by the Railway Commission. The railways applied to issue increased tariffs of sixty cents per ton and twenty cents for smalls at Toronto, Hamilton and Montreal, and fifty cents per ton and fifteen cents for smalls at other points. The shippers made a compromise offer of forty cents on some classes and forty-five cents on others of freight and fifteen cents for smalls.

CANADIAN PACIFIC ADDS TO FLEET.

Mr. G. M. Bosworth, vice-president of the Canadian Pacific Railway, says that the corporation's fleet would be added to by two new ships, which will be built for the Montreal-Liverpool service.

He negotiated for the ships on his recent visit to England, but the orders were not placed until he made a report to the directors of the company.

"The design," he says, "has met with approval, and an order for the two 12,000 ton boats is now in the hands of Messrs. Barclay, Curle & Company, one of the shipbuilding concerns in Glasgow. They will be the new cruiser type lately adopted by the company. The maiden trips will be made in June and July, 1914."

These boats are to be a combination passenger and freight boat, carrying 530 second class passengers and 1,230 third class, and will make 16 knots.

Each will have an over-all length of 520 feet.

The new vessels are to be specially rivetted for oil burning in event of the company adopting the oil fuel system.

BANQUE D' HOCHELAGA.

Increased profits for the year are shown by the Banque d'Hochelaga. For the year ended November 30th they were \$481,616, or equal to 16 4-5 per cent. on the average paid up capital. The increase over the previous year's profits was \$66,616.

The profit and loss account for the past year compares with that for 1911 as follows:

	1911.	1912.
Balance	\$ 15,041	\$ 32,291
Premium new stock		225,000
Net profits	415,000	481,616
	\$ 430,041	\$ 738,907
Dividends	\$ 50,000	\$ 56,250
Dividends	56,250	56,250
Dividends	56,250	56,250
Dividends	56,250	56,250
Interest on stock payments		31,117
Written off premises	24,000	45,067
Pension fund	5,000	5,000
Added to reserve	150,000	350,000
Interest, reserve		50,000
Balance	32,291	32,723
	Reserve Fund.	
Balance	\$2,500,000	\$2,650,000
Added in year	150,000	350,000
	\$2,650,000	\$3,000,000

During the year \$350,000 was added to the reserve fund, part of which represented the premium received on the new stock issue. The reserve now totals \$3,000,000, being equal to the paid-up capital. A special reserve fund of \$50,000 was created to provide for future interest payments, presumably on the new stock issue. The shareholders will undoubtedly be satisfied with this pleasing statement.

BRIDGE COMPANIES TALKING AMALGAMATION

National and Dominion Bridge Companies May Combine Business and Assets—Market Effect of Discussion.

Negotiations are understood to be nearing completion with a view to the amalgamation of the National Bridge and the Dominion Bridge Companies. Discussion of the proposed merger has acted favorably on the bonds of the National Bridge Company. They were selling at about 76 before the consolidation was broached, and are said to have been quoted around 98 asked.

The National Bridge Company of Canada, Limited, has its headquarters at Montreal. Mr. J. N. Greenshields, K.C., is president. Its authorized capital stock is \$1,000,000, all of which is subscribed and paid. It has an authorized issue of \$3,000,000 6 per cent. first mortgage forty-year sinking fund bonds, of which \$560,000 are issued. The bonds are secured by a first mortgage on the company's property and assets.

Large Plant at Longue Pointe

The company has a large plant at Longue Pointe, Montreal, which has been in operation since July 1, 1911. It has an annual capacity of 20,000 tons, and carries a stock of 5,000 tons of beams, channels, angles, plates, flats and bars for quick delivery, plain or fabricated.

The Dominion Bridge Company, Limited, was incorporated on September 23, 1882, with a Dominion charter. It manufactures steel and iron bridges, and has works at Lachine, Quebec, Toronto and Winnipeg. The annual output is 48,000 tons of bridge and structural work. The bridge building and structural iron department of the Locomotive and Machine Company of Montreal was taken over by the Dominion Bridge Company, Limited, which is also operating the Structural Steel Company, Limited.

Two Millions of Capital Stock

The capital stock in the Dominion Bridge Company is \$2,000,000, of which \$1,471,000 is outstanding. Mr. James Ross is president of the company.

Issuing More Stock

The Dominion Bridge Company has issued a circular to its shareholders offering an issue of \$1,040,000 new stock. This is in the ratio of one in five to the outstanding capital of \$5,200,000, which will make the total \$6,240,000.

The company has nearly completed the absorption of the National Bridge Company, the \$1,000,000 outstanding common stock of which is being paid for in the ratio of four shares of National for one of Dominion.

This will absorb less than one-fourth of the new issue, and it is understood that the balance will go for plant extensions in which the National Bridge Company will share.

BRITISH CAPITAL WANTS TO RUN TORONTO MOTOR BUSES.

British capitalists wish to obtain a franchise to run motor busses in Toronto, with a view to putting fifty busses in operation on October 1, 1913. The company's representative has written to the board of control, stating that there will be \$500,000 in fully paid preference shares of par value of \$100. The city is to be represented in the company by the mayor, a controller and an alderman, and the city is not to grant any other bus franchise for seven years. The matter has been referred to corporation counsel Geary and works commissioner Harris for a report thereon to the board of control.

OTTAWA LIGHT COMPANY'S CAPITAL INCREASE SANCTIONED.

The Dominion Government has sanctioned the proposed increase in the capital stock of the Ottawa Light, Heat and Power Company, Limited, from \$2,000,000 to \$5,000,000. This increase will be made by the issue of 30,000 new shares of \$100 each. Of the present authorized capital of \$2,000,000, at the end of 1911 \$1,934,400 was subscribed and paid. This was an increase in paid-up capital of \$404,000 over 1910. It represented 14,910 shares of the Ottawa Electric Company and 4,934 shares of the Ottawa Gas Company, which were exchanged at par for shares of the Ottawa Light, Heat and Power Company.

The Ottawa Light, Heat and Power Company this week declared a bonus of 1 per cent. with the usual quarterly distribution of 1½ per cent. on the stock of the company. A similar bonus was paid last year with the dividend at the same rate as this year; a stock bonus of 25 per cent. was also paid in 1911. In 1910 the dividend rate was 6 per cent. with which a 2 per cent. bonus was paid, and in 1909 5 per cent. with a bonus of 1 per cent.

WAR CLOUDS DISTURB MARKETS

Bank of France Has Issued Five Franc Notes—General Advance Predicted in European Money Rates

War clouds continue to disturb the European financial markets. Large quantities of five franc (\$1) bank notes for use in a possible war emergency, are being printed by the Bank of France, a national institution. Should the eventuality arise the only thing necessary will be to number them and issue them at once to the public.

The prevailing opinion among financiers in France is that a general war is unlikely, and that the disposition made by the Bank of France is merely precautionary.

The uncertainties of the international situation have had the effect of delaying the start of new enterprises and greatly limiting the volume of ordinary business. The peace conference in London this week, however, is having a good effect.

Fear General Rate Advance

Money is in good demand in London. Harder discount rates there and on the continent have given rise to fears of a general advance of bank rates in Europe.

The possibility of New York drawing gold from London is thought to have passed for the present. The European banks are estimated to have lost about \$185,000,000 gold since last summer through hoarding due to fears of a general war. At the same time there has been great expansion in loans.

Canadian Call Loans

The heaviest withdrawals of Canadian call loans in New York are practically over. The November bank statement, to be issued next week, will probably show only a slight, if any, decrease from the figures of the previous month in that item. The following table shows call loans elsewhere than in Canada, largely in New York, during the present year:—

January	\$ 80,871,118
February	88,589,472
March	94,677,027
April	103,558,392
May	115,832,736
June	120,569,812
July	117,961,437
August	114,847,864
September	112,767,036
October	101,186,983

TRUST COMPANIES IN QUEBEC.

The Quebec Government bill respecting trust companies and their control was amended on several points at a recent sitting of the legislation committee. At a previous sitting of the committee, representatives of Montreal and Quebec companies strongly objected to a clause in the bill by which three-quarters of the shares issued by a new company should be held by persons domiciled in this province. As this was regarded as an unnecessary restriction as to the use of foreign capital the clause was struck out.

The clause in the bill referring to the receiving of deposit was accepted. It reads as under:

"No company shall borrow money by receiving deposits or by issuing bonds or debentures by whatever names such bonds or debentures may be described."

At the opening of the session the premier said he had received a letter from the board of trade of Montreal, endorsing the principle of the bill and expressing the view that legislation of some kind was necessary.

Considerable discussion followed on the clause regarding the borrowing of money and taking deposits. Mr. J. N. Greenshields, representing the Quebec Trust, and Lieutenant-Colonel Carson opposed the restrictions imposed.

Sir Lomer Gouin then stated that he was prepared to attach a saving clause to the bill to the effect that nothing in the act should affect such powers granted in existing charters. The exact wording of the said clause is still to be settled but the principle was accepted as being satisfactory.

Several minor changes in the wording of the bill were agreed to. Those appearing for the interested companies were:

Mr. B. Hall Brown, Prudential Trust Company; Crown Trust Company, Lieutenant-Colonel Carson; Mr. J. E. Martin, K.C., the National Trust Company; Mr. J. N. Greenshields, K.C., the Quebec Trust Company, and Mr. G. H. Montgomery, K.C., Montreal Trust Company.

A provincial town planning committee for Ontario, consisting of Mr. J. G. Jaffray, Galt, chairman; Mr. F. L. Riggs, Toronto, secretary-treasurer; Mr. D. B. Detweiler, Messrs. H. G. Bowman, Schmalz (Berlin), W. B. Burgoyne (St. Catharines), J. B. O'Brien, K.C. (Toronto), H. F. Hutton (Welland), H. F. Holland (Sarnia), E. A. Waterous (Brantford), Dr. Hodgetts (Ottawa), Mayor Hornuth (Preston), was recently formed at Berlin.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

La Banque d'Hochelaga.—La Banque d'Hochelaga has determined to increase its capital stock to \$4,000,000 by issuing \$1,000,000 new stock, which will be offered to the shareholders at 150, payable in 10 per cent. monthly instalments.

Dominion Textile Company.—Mr. C. B. Gordon, president of the Dominion Textile Company, stated this week that his company was planning extensions to two of their plants which would call for the employment of 500 or 600 additional hands.

Detroit United Railway.—Montreal houses, where large amounts of the stock of Detroit United Railway are held, say that it is believed before long the company will increase its quarterly dividend from $1\frac{1}{4}$ per cent. to $1\frac{1}{2}$ per cent., thus placing the stock on a 6 per cent. basis.

Quebec and Saguenay Company.—Judgment for \$381,000 against the Quebec and Saguenay Railway Company has been rendered by Mr. Justice Fortin, in favor of Messrs. O'Brien and Doheny, contractors. Other suits involving half a million dollars are said to be pending.

Island Smelting and Refining Company.—Word has been received that the deal for the purchase by the Island Smelting & Refining Company of the plant of the Cobalt Smelter Company at Trout Lake was ratified at a meeting of the shareholders of the Montreal company. The board of directors of the newly financed company is to be gradually changed until the Montreal interests predominate.

Toronto Paper Manufacturing Company.—The directors of the Toronto Paper Manufacturing Company, Limited, have declared the quarterly dividend at the rate of 5 per cent. per annum for the quarter ending on 31st December, 1912. The dividend is payable on 15th January, 1913, to shareholders of record at 31st December. The transfer books will be closed from 24th December to 31st December, both dates inclusive.

London and Canadian Loan and Agency Company.—A large proportion of the shareholders of the London and Canadian Loan and Agency Company have indicated their desire to take up the new stock, which is to be allotted in the proportion of one share in four. The allotment will be made in February to shareholders on the books of the company today. Mr. Wadsworth, general manager, expressed himself as satisfied that nearly all the allotments would be taken up.

Cobalt Lake Mining Company.—A circular has been sent out to shareholders of the Cobalt Lake Mining Company by its president, Sir Henry Pellatt, advising them of a proposition by an English syndicate to enter into an optional agreement for the sale of their shares. The syndicate's offer is made to all shareholders of the company alike. Sir Henry Pellatt states in the circular that he himself has entered into the agreement for the sale of 1,000,000 shares held by him and has no hesitation in advising all shareholders to join in the agreement.

Canadian Cereal and Milling Company.—At a meeting of shareholders of the old Canadian Cereal and Milling Company, the company was formally closed and the assets transferred to the new Canadian Cereal and Flour Mills Company, which will carry on the business. Mr. William Carslow was appointed permanent liquidator of the old company. Shareholders receive stock in the new company in the proportion of forty per cent. of their old holdings. Mr. J. P. Black, of Montreal, is president, and Mr. A. E. McCuaig, of Toronto, vice-president and general manager of the new company.

La Rose Consolidated Mines Company, Limited.—In addition to the regular quarterly dividend of $2\frac{1}{2}$ per cent., the directors of the La Rose Consolidated Mines have declared a bonus of $2\frac{1}{2}$ per cent., bringing the total disbursement up to 5 per cent. for the quarter, payable January 20 next. A year ago the payment was only 2 per cent., the company at that time paying 8 per cent. per annum. With the payment of this dividend the La Rose will have paid to its stockholders a total of 43 per cent. in dividends, or an amount of \$3,516,685. This does not include the \$1,204,862 paid by the mine when privately owned.

Atlantic Sugar Refineries, Limited.—Mr. F. H. Anson, managing director of the new Atlantic Sugar Refineries, Limited, has returned from New York, where he met repre-

sentatives of the firm of Mirless, Watson & Company, of Glasgow, who will have charge of the construction work of the plant at St. John, N.B., and Mr. J. F. Stillman, the sugar refineries' expert under whose direction the plant will be designed and operated. Mr. Anson stated that the plans and specifications were well under way, and would probably be ready for consideration at a board meeting here early in January. The Glasgow representatives like the site, and assert that for economical operation and facility of production it will be equal to the modern refineries in the old country.

Montreal Tramways Company.—Owing to the change in the close of the fiscal year the Montreal Tramways Company's annual statement covered a period of only nine months and comparisons with the showing in the previous fiscal year were difficult. Figures for the full year to September 30, however, are given in connection with a public offering of the company's bonds. They compare as follows with the figures for the year ended September 30, 1911, as given by the president in the prospectus of the company:—

	1912.	1911.	Increase.
Gross	\$6,047,351	\$5,318,619	\$728,732
Expenses	4,067,866	3,493,781	574,085
Net	1,979,484	1,824,838	154,646
Bond interest	765,650	721,150	44,500
Balance	\$1,213,834	\$1,103,688	\$110,146

As compared with 1911, therefore, net earnings have increased \$154,646, and while fixed charges have also increased, the balance is greater by \$110,146. The surplus available for common stock shareholders is contingent on city's percentage and other deductions.

Gross earnings of the property now owned by the Montreal Tramways Company have increased from \$4,056,100 in 1908 to \$6,047,351 in 1912, a 50 per cent. gain in four years.

MONTREAL TRAMWAYS BONDS WENT WELL

The block of \$890,000 (not \$80,000, as previously stated) 5 per cent. bonds of the Montreal Tramways Company, offered by Messrs. N. W. Harris & Company, of Boston, met with a very ready sale and all of the bonds have been sold.

TWO ONTARIO ARSON CASES

Mr. Kingsley Rand, a Burford township, Ont., farmer, was arrested last week and charged with arson. The barns belonging to Rand's brother, containing implements, the entire season's crops and seven head of cattle, were a total loss, following a fire at which heroic attempts were made by the neighbors to extinguish the flames. The prisoner is said to be mentally unbalanced, and his motive was alleged grievances against his brother. He was remanded in court.

Mr. William Draper, contractor, of Caledonia, was found not guilty on all charges against him of setting fire or attempting to set fire to the premises of Mr. Barney O'Rourke, hotelkeeper, of Caledonia. In his charge to the jury the judge favored the acquittal of the prisoner, stating that there was not sufficient evidence to convict. The jury arrived at the verdict "not guilty on all charges."

CANADA'S NOVEMBER BANKING

The principal figures contained in the November bank statement, compared with those of October, are as follows:—

	November.	October.
Circulation	\$115,473,098	\$110,406,877
Demand deposits	376,829,372	383,814,572
Notice deposits	635,810,703	640,097,928
Outside Canada	81,338,648	78,518,407
Call loans, Canada	70,668,521	73,959,866
Call loans, outside	111,812,858	101,186,983
Current loans	874,721,593	879,676,655
Current loans, outside	40,925,744	41,300,588

Liabilities aggregated \$1,287,699,051, and assets \$1,519,087,523, as against \$1,283,211,402 and \$1,521,105,096 in October, respectively.

Decreases for the month are shown in deposits payable on demand, deposits payable after notice, call loans in Canada, current loans in Canada and current loans elsewhere. The complete statement, together with an analyses, will appear in the next issue of The Monetary Times.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

London, Ont.—Until December 30th, for \$231,400 debentures. J. S. Bell, city treasurer.

Winnipeg.—The citizens passed school and water by-laws, involving an expenditure of \$2,000,000.

Victoria, B.C.—The sewer committee recommends that a by-law for \$700,000, for sewer construction, at the forthcoming elections.

Buchanan, Sask.—Until December 23rd, for \$5,000 6 per cent. 15-year debentures for permanent improvements. H. P. A. Hermanson, secretary-treasurer.

Brantford, Ont.—The third reading was given by the council to the by-law to provide for the payment of \$10,000 to the collegiate institute board for the overdraft on the erection of the school.

Calgary, Alta.—Until January 14th, 1913, for \$25,000 10-year 4½ per cent. school, and \$950,000 4½ per cent. 40-year school debentures. A. T. Jewitt, secretary-treasurer, Calgary Public School Board.

Chatham, Ont.—The ratepayers will vote on January 6th on a by-law to raise the sum of \$14,280.00 for the erection and construction of certain bridges, (in renewal and replacing of old ones now existing).

Kamsack, Sask.—Until January 15th for \$2,000 5½ per cent. 5-year hospital, \$5,000 5½ per cent. 15-year road, and \$20,000 5½ per cent. 20-year town hall debentures. A. A. Crawford, secretary-treasurer. (Official advertisement appears on another page).

Dartmouth, N.S.—The ferry commission resolved that the chairman be authorized to ask the mayor to call a meeting of the ratepayers to consider the issuing of bonds, not to exceed \$25,000, for the purpose of building terminals on the Halifax side of the ferry.

Dunnville, Ont.—Application will be made at the next session of the Ontario Legislature for an act to validate a by-law authorizing the town to borrow \$36,000 for sewer construction; also for power to borrow \$1,500. Messrs. Bradford and Bradford, Dunnville, are the town's solicitors.

Township of Eramosa, Ont.—A by-law to authorize the borrowing of \$6,000 by the issue and sale of debentures, to provide for the cost of a plant to distribute electric power, to be supplied by the hydro-electric commission for the police village of Rockwood, will be voted upon January 3rd.

Regina, Sask.—The list of the by-laws already approved by the council, and the expenditure under each is as follows: Street Railway extension, \$825,000; new power house, \$425,000; general electric light extension, \$310,000; incinerators and disposal of garbage, \$117,000; second by-law for general hospital, \$110,000; police station, \$180,000; market building remodelling, \$7,500 and winter fair building, \$134,000. This with the expenditure for paving and sewer and water extension, which may be carried out next year, will bring the total of municipal undertakings for next year close to three million dollars.

FUTURE OF THE HALIFAX ELECTRIC

The Halifax Electric Tramway Company is controlled by Mr. E. A. Robert, of the Montreal Street Railway, and at the next session of the Nova Scotia Legislature, which opens in February, a bill will be introduced, it is understood, to amalgamate Halifax Tram with the Nova Scotia Power Company, in which the same group of capitalists are also interested. The Nova Scotia Power Company proposes to generate hydro-electricity on the Gaspereaux River in King's County, about seventy miles from Halifax. There is talk of municipal ownership in Halifax and a campaign for the expropriation of the Tram. Company, is being carried on. The move to amalgamate with the Nova Scotia Power, will therefore probably meet opposition. The Tram. Company's franchise expires in 1914, but by the terms of its charter it has a perpetual right to operate on the streets on which it is running at this date. At one time it was thought that the Nova Scotia Power Company, would have strong rivals in a group of local capitalists headed by Mr. F. B. McCurdy, who control an extensive power on the Mersey River in Queen's County, on the South Shore about 110 miles from Halifax. Halifax was looked on as the logical market for this power, but now it is understood a large paper company will shortly be started on the Mersey with capacity sufficient to use all the pulp at present produced in this district.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Yarmouth, N.S.—November 28.—Mr. F. Golden's cottage. Loss \$500. Insurance, \$500 Royal. Cause unknown.

Gatham, Ont.—November 30.—Mr. H. Peel's barns, Raleigh Township. Loss, building \$600, contents \$240. Insurance, Anglo-American \$1,950, buildings \$200; stock, contents \$1,150. Cause unknown.

Brommer, Alta.—Alberta Grain Company's elevator. Loss on building and grain, \$8,500. Loss and insurance equally divided in Springfield and National Fire. Adjusted by E. A. Lilly Adjustment Agency, Calgary.

Medicine Hat, Alta.—December 2.—Barker and Patton, dry goods store. Loss on stock total, insurance, Liverpool-Manitoba, \$15,000, Springfield \$5,000, North Empire \$3,000, Germania \$3,000, Quebec \$2,500. Adjusted by E. A. Lilly Adjustment Agency, Calgary.

Medicine Hat, Alta.—Robert Mitchell, hardware and dry goods store. Loss total, insurance, Liverpool-Manitoba \$1,000, Springfield \$1,500, Home \$2,400, London Assurance \$1,600, Phoenix of London \$2,500—\$9,000. Adjusted by E. A. Lilly Adjustment Agency, Calgary.

Winnipeg, Man.—December 9.—Messrs. Potter's warehouse. Estimated loss, Bromley block, \$10,000, fire and water. Bromley and Hague, \$5,000, water. Mackenzie Brothers, \$20,000, fire, insured with Messrs. Enderton and Company. E. R. Potter, \$25,000, fire. Simpson Produce Company, \$8,000, water, insured with Smith-Fess Company. All covered by insurance. Cause unknown.

Yarmouth, N.S.—December 10.—Conflagration. The losses reported are as follows:—Burrow's machine shop and garage, total loss, \$5,000; insurance, \$2,800. In the Hartford and in the agency of W. M. Kelley.

Small building owned by George Burrows and occupied by Wilbur F. Porter as store rooms for farm machinery. Small insurance on building, no insurance on farm machinery. Loss in this case to Mr. Porter, about \$600.

Blacksmith shop of Enoch Titus, one corner badly scorched; insurance, \$300. In the Connecticut.

Small building in rear of blacksmith shop owned by George Hood, some insurance.

Dwelling owned by Arthur Rogers, value not known; insurance \$1,000.

Large apartment house, single dwelling and double dwelling, owned by Dane estate, total value not known, but probably \$6,000; insurance in the Guardian, Acadia and other companies, amount unknown.

Queen Hotel—Total loss about \$10,000; insurance, \$7,000.

W. H. Kinney—Dwelling occupied by Mrs. Powell, total loss; insurance on dwelling, \$400, in the Liverpool and London and Globe.

Double dwelling owned by the estate of Clara Killam, total loss, insurance not known. Tenants saved about all their effects.

George S. Taylor—Damage to stock and fixtures by water and smoke; quite heavy insurance in the Law Union and Crown, the Guardian, Caledonian and other companies.

George S. Taylor building, owned by Burton and Jenkins, insurance not known.

Yarmouth Light Building, upper portion destroyed, and presses and type damaged by water and smoke; loss heavy, with about \$4,000 or \$5,000 insurance, \$3,000 of which is in the London, Liverpool and Globe, and \$1,000 in the North America, with \$500 on the typesetting machines in the Hartford.

Charles Roy had on his furniture \$250 in the Aetna.

John Crosby, carpenter and builder, damage slight, \$700 insurance in W. M. Kelley's agency.

William Lloyd Porter, dry goods, damage by smoke and water unestimated.

W. A. Lawson, paper dealer, damage by smoke and water; light insurance, \$500 in the Phoenix.

Singer Sewing Machine Company, damage \$500, insurance \$200.

Other losses from smoke were trifling.

The total damage is estimated at around \$75,000.

ALBERTA PAYS HIGH FOR SHORT TERM BILLS

The province of Alberta had to pay 5½ per cent. this week in £1,500,000 sterling six months treasury bills to replace those falling due. "Rightly or wrongly, the London money market does not view Alberta's securities with great favor," says the London Daily Mail. "The dispute between the Provincial Government and the railway company is partly responsible."

ONTARIO'S GOLD RESOURCES

Development and Construction Work on Properties— Value of Transcontinental Railway—Some Low Grade Prospects may Eventually Prove to be Mines

Gold bullion was produced at fourteen properties in Ontario last year, from none of them in large quantity. The principal contributor was The Canadian Exploration Company at Long Lake. At Porcupine the Hollinger and Vipond mines operated small test mills previous to the fire, and the Dome recovered considerable gold in the laboratory. Other producers were the Kenora (formerly Mikado) and Olympia, both at Shoal Lake; St. Anthony (Sturgeon Lake); American Eagle and Detroit Syndicate, in Munro township; Gold Pyramid, in Guibord township; Swastika; Havilah (formerly Ophir); Dr. Reddick (Larder Lake), and the Tingley prospect (Pelican Lake). The number of men employed at the foregoing mines was 597, to whom wages were paid amounting to \$442,519. It is evident from these figures that most of the labor was employed in development and construction work, is Mr. T. W. Gibson's summing up in the twenty-first annual report of the Ontario Bureau of Mines.

New Life in Old Fields

The revival of interest in gold mining caused by the discoveries at Porcupine and the developments now under way there has put new life into a number of the older fields, which for years have lain dormant.

In eastern Ontario the Belmont or Cordova mine, situated in the county of Peterborough, near the border line of Hastings county, is being unwatered and put in shape for a resumption of operations. There are a number of quartz veins on this property, some of them of large size, and the mill is equipped with thirty stamps.

The Elizabeth mine, on locations F M 171 and 172, Steep Rock Lake, has been leased from Mr. W. H. Nelson, of Port Arthur, by the Elizabeth Gold Mining Company. Operations began on 1st May, 1911, consisting of pumping out the old shaft, and erecting a boiler house and 10-stamp mill.

The St. Anthony mine at Sturgeon Lake was operated during the year by the Sturgeon Lake Development Company. Much work was done in the way of refitting the mine and stamping plant, which had lain idle for several years, and in thoroughly testing the ore bodies at various points. Only a small quantity of ore was actually treated, but the new owners are looking forward to a period of active gold production.

Mining Industry Benefited by Railway

The construction of the Transcontinental railway has greatly facilitated the conveyance of freight into Sturgeon Lake, and to this extent has benefited the mining industry there.

The gold area at Swastika, on the Temiskaming and Northern Ontario Railway, near the northern boundary of Ottó township, is being tested by the operations at the mine of the same name. Here a stamp mill has been put up, and fairly extensive underground workings made. There are other prospects in the same locality now also being opened up.

In Munro and Guibord townships the work in progress at the American Eagle, Detroit Syndicate and other properties will tend to show what may be expected from the auriferous veins of that neighborhood. The low-grade bodies at Larder Lake have not yet produced much gold, but there are prospects that some of the properties being exploited here may eventually prove to be mines.

DUBS TOLLS ACTION AS SUBSIDY TO TRUST.

In his paper, the Courier-Journal, Colonel Henry Watterson, of Louisville, Ky., on Monday had some sharp comments respecting the decision of the United States as to tolls to be paid by its coastwise vessels using the Panama Canal. Colonel Watterson, who visited Toronto two years ago, says:—

"The exemption of the coastwise trade of the United States from tolls through the Panama Canal was, to begin with, flagrant and dishonest, a violation of the treaty obligations of the nation, and to end with, a gigantic and perpetual subsidy to a shipping trust quite as objectionable as the sugar trust or the steel trust.

"The Act of Congress was passed in the teeth of a presidential campaign. The shipping trust could afford to contribute a million of money to each party for its support. Mr. Taft, a candidate for president, signed the bill. Who, if not Perkins of the harvester trust, in the community of interest, worked the Roosevelt end of it we know not, but the Democratic end of it was worked by Lewis Nixon, once chief of Tammany Hall.

"Such members of Congress as gave any reflection to the votes they cast in its favor looked to a certain anti-English feeling, which in the last equation would carry with it the German vote and the Irish vote, not stopping to inquire where the spoliation of the nation's honor and the people's money might lead."

IRON ORE PRODUCTION

Canadian Furnaces Manufacture Less Than One-Third of the Dominion's Consumption of Pig Iron and Steel

There has been a rapidly growing demand for iron and steel products in Canada during the past few years, accompanied by a corresponding increase in the output of Canadian iron and steel furnaces, although this output probably supplies not more than 30 per cent. of the tonnage of iron and steel consumed.

The increase in production was continued during 1911, notwithstanding abnormally low prices received for pig iron and steel products, states Mr. J. McLeish, chief of the division of mineral resources and statistics in his latest report. Manufacturers, generally, report a very strong demand, but claim that business has been carried on with a very low margin of profit in order to meet prices quoted on imported products.

At the same time extensive preparations are being made to increase the output and supply a larger proportion of the home market.

Last Year's Shipments Lowest for Twelve Years

The total shipments of iron ore in 1911 from mines in Canada were 210,344 tons, whereas blast furnaces consumed 1,695,802 tons, and steel furnaces, 42,892 tons. The shipments from iron ore mines in 1911 were the lowest recorded in twelve years. The production of pig iron was 917,535 short tons, and of steel ingots and castings, 882,396 tons.

The rate of production of iron ore has shown practically no increase during the past twelve years, while the present production of pig iron is nearly ten times that of 1900. About 6 per cent. only of the iron ore used in Canadian blast furnaces during 1911 was of domestic origin. Of the coke used, 52 per cent. was either imported or made from imported coal, and 22 per cent. of the limestone flux used was from sources outside of Canada. In each instance the proportion of imported raw material used is higher than was the case in 1910.

Cessation of Bounties

The total production of iron ore in Canada to the end of 1910 has probably not exceeded 5,500,000 tons, while the total consumption of ore in iron and steel blast furnaces since 1886 has been over 13,500,000 tons. During 1911 the tonnage of imported ores used was 1,628,368 tons, which was derived chiefly from Newfoundland and the south shore of Lake Superior.

The assistance granted by the Federal Government to the iron and steel industries in the form of bounties ceased on December 31, 1910, with the exception of the bounty on steel rods, which was continued to June 30, 1911, and the bounty on pig iron and steel made in electric furnaces, which is available until the end of this month.

DOMINION'S REVENUE GROWS.

According to the financial statement of the Dominion for November, details of which are printed elsewhere in this issue, the revenue amounted to \$14,297,778, being an increase of \$2,702,108 over 1911. The month's expenditure, which was \$8,177,843, is an increase of \$692,193.

For eight months ended November 30th, revenue shows an increase of \$22,548,527, the figures being \$110,435,375, against \$87,886,848. The expenditure on consolidated fund account increased \$11,669,227 during the eight months, while the capital expenditure was greater by \$3,374,953.

PRODUCTION OF METALS IN ONTARIO

The total production of metals in Ontario, as given below, is subject to a slight deduction, due to its including not only iron ore but also pig iron, into which some portion of it was doubtless smelted, states Mr. T. W. Gibson, deputy minister of mines, in the twenty-first annual report of the Ontario Bureau of Mines, but, after making allowances of this sort, the aggregate value cannot be less than one hundred and eighty million dollars.

Product.	Quantity.	Value.
Gold oz.	165,521	\$ 2,620,627
Silver oz.	130,371,791	79,504,371
Platinum and palladium . oz.	3,364	62,784
Cobalt tons	6,068	756,360
Nickel tons	136,114	36,276,303
Copper tons	108,064	15,655,221
Iron ore tons	3,356,287	6,485,501
Pig iron tons	3,182,715	49,191,732
Lead ore tons	3,351	20,000
Pig lead tons	1,143	96,000
Zinc ore tons	7,704	92,410
Total		\$190,761,306

MACDONALD COMPANY'S NEW FINANCING

Charter Has Been Issued—Authorized Capital Will be Seven Millions—Beginnings of a Merger.

There is little doubt that the purchase of the A. Macdonald Company, of Winnipeg, by the Dominion Bond Company, Toronto, is the embryo of another merger. The company's new Dominion charter, which was issued on December 11th, grants extensive powers and includes the following clause:—

"To acquire by purchase, concession, exchange or other legal title the good will, property, rights and assets and assume the liabilities of any person, firm or company transacting any business similar to that conducted by this company, together with the buildings, stock in trade and assets generally with such business, and to purchase, acquire and hold the stock or shares of stock in any other corporation carrying on business similar to that which this company is hereby authorized to carry on, or any business similar thereto, notwithstanding the provisions of section 44 of The Companies' Act, and to pay for the same wholly or in part in bonds, debentures or other securities or fully or partly paid shares of the company, and to sell, lease or otherwise dispose of the same or any part thereof."

Capitalization of the Company

The authorized capitalization of the company is \$7,000,000 divided as follows:—

	Authorized.	To be issued.
Common	\$4,000,000	\$3,000,000
Preferred	3,000,000	2,000,000

Contrary to general reports, there will not be a public offering of either of the securities. The \$3,000,000 common stock and the \$2,000,000 preferred stock has already been placed. In due course the stocks will be traded in. The rest of the stock will remain in the treasury. There is no bond issue. The preferred stock participates equally in all profits after 8 per cent. has been paid on the common.

Scope of the Business

The A. Macdonald Company, Limited, conducts the largest wholesale grocery business in Canada. The business was established over twenty years ago and has had a steady growth. The business has been developed on the mail order principle; the company having no travellers, but issuing catalogues monthly and distributing them amongst their clients. Branch warehouses are maintained at the principal centres in order that goods can be distributed quickly. The company has adopted a more progressive policy of recent years and opened additional branches, and the substantial increase in turnover is evidence of the success of the business. The inventory as at August 31st, showed total merchandise of approximately \$800,000, which would indicate that this was turned over during the six months ended August 31st at the rate of nearly ten times per annum.

The head office is at Winnipeg, and there are branches at Saskatoon, Moose Jaw, Edmonton, Lethbridge, Kenora, Yorkton, Battleford, and Port Arthur.

Assets and Sales

The real estate, buildings, etc., which are free from all encumbrances, have been valued by independent valuers at \$750,000. These figures are being verified by the Canadian Appraisal Company, Limited. The surplus of liquid assets over and above all liabilities amount to approximately \$1,268,000. The vendors have offered to guarantee the book accounts, and the affairs of the company have been closed up as at November 30, and the above surplus is being verified.

The sales of the companies have increased in a substantial manner, as shown by the following statement:—

Year ended March

1909	\$2,311,043
1910	3,292,358
1911	4,530,535
1912	5,664,370
1913 (based on last six months) . . .	7,500,000

The sales for the six months ended August 31st, 1912, were \$3,650,000.

Notes of Earnings

The net earnings of The A. Macdonald Company, Limited, are being verified by Messrs. Clarkson & Cross, and The Riley, Ramsay Company, Limited, by Messrs. Oscar Hudson & Company. These earnings are merely the trading profits of the businesses and do not include profits made from the sale of real estate, etc. After providing for all interest charges, depreciation and repairs on buildings, bad debts, etc., the combined net earnings have been as follows:—

Year ended 1st March.

1911	\$203,000
1912	318,000
1913 (estimated)	400,000

The net earnings of the two companies for the six months ended August, 1912, amounted to \$186,000, an increase over the net earnings for the same period of 1911 of \$34,000. The estimated net earnings of \$400,000 for 1913 are based on these figures, and are considered very conservative.

The second factor of the proposed merger is the purchase of the Riley, Ramsay Company, Limited, of Port Arthur. The business of this company has been confined to that district. The organization will be altered so as to fit in with the Macdonald business. This will give the new company excellent facilities for storing and distributing goods from the head of lake navigation.

RATES ON LUMBER QUESTIONED

Mr. H. C. Martin, general freight agent of the Grand Trunk Railway, testified at St. Louis, Mo., before Mr. B. H. Meyer, an examiner for the Interstate Commerce Commission, that United States railroads raised their rates on lumber from southern states because the Canadian roads complained that the rate was too low.

The hearing is being conducted on complaint of lumber dealers, who are protesting against the suspension of a rate of 37 cents from territory south of the Ohio River to Canada.

FOREST FIRE FIGHTERS.

During the coming winter the officers in charge of the Brazeau and Athabaska divisions of the Rocky Mountains forest reserve propose to make "administrative site" surveys at different points on the reserves. Upon these sites it is proposed to erect ranger and look-out stations, which will be no farther apart than one day's trip by pack-train, along the the primary trail system of the Brazeau Reserve. It is the intention to erect, this winter, at least three or four log cabins for the rangers. A telephone system is also being planned whereby these Ranger Stations will be connected by telephone to the forest supervisor's office. This office is centrally located and telephone lines will run in from all directions, much in the manner of the spokes of a wheel with the central office as the hub.

This region is one of the richest coal regions in Canada and the future development of these coal fields will be amazing. A number of large coal mines are already in operation, and, with the completion of the branches of the G. T. P. Railway now under construction, will be shipping thousands of tons daily.

With the future development of this country, the timber must be preserved. This region has once been forested with very valuable timber, which has largely been destroyed by fires in the past. There is still an abundant supply of mine-prop timber, however, and the whole region is green with young lodgepole pine from ten to thirty years in age. If preserved from fire this will be an invaluable asset to the country, both for economic uses and as protection to the head waters of all the rivers which rise in the foothills of the eastern slope.

NOVEMBER FIRE LOSS OF UNITED STATES AND CANADA.

The fire loss of the United States and Canada for November, as compiled by the New York Journal of Commerce, shows a total of \$16,172,300. The following table gives a comparison by months of the fire losses for this year and the two preceding years:

	1910.	1911.	1912.
January	\$15,175,400	\$21,922,450	\$35,653,150
February	15,489,350	16,415,000	28,601,650
March	18,465,500	31,569,800	16,650,850
April	18,091,800	17,670,550	16,349,400
May	18,823,200	21,422,000	21,013,950
June	13,183,600	20,691,950	16,103,450
July	26,847,900	25,301,150	15,219,100
August	21,570,550	12,662,650	14,158,800
September	11,700,000	11,333,250	12,779,300
October	37,188,300	13,945,000	13,051,650
November	16,407,000	18,680,800	16,172,300
Total 11 months . . .	\$212,942,600	\$211,614,400	\$207,353,600
December	21,528,000	22,722,850	
Total for year . . .	\$234,470,600	\$234,337,250	

There were 273 fires during November this year, causing a property damage of \$10,000 or over in each instance. Barring some large fire before December closes, it seems likely, says the Journal of Commerce, that the 1912 fire loss will be lighter than the sums chargeable against 1910 and 1911. The December losses so far are quite moderate and underwriters do not expect the fires to become numerous and expensive until a cold snap commences. Canada's November fire loss, as compiled by the Monetary Times, amounted to \$1,184,010.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Eganville, Ont.—Lime kiln. Loss \$800. Cause, hot lime.

Aldershot, Ont.—December 14.—School. Loss \$10,000. Cause unknown.

Peterboro', Ont.—December 13.—548 Willer Street. Loss and cause unknown.

Ladysmith, B.C.—December 5.—Bayview Foundry. Loss and cause unknown.

Capetown, Que.—December 14.—Mr. J. Blue's store. Loss and cause unknown.

St. Marys, Ont.—December 17.—Opera House block. Loss and cause unknown.

Castor, Alta.—December 7.—Miss Buckman's house. Loss and cause unknown.

Antlers, Sask.—December 16.—Antlers Hotel. Loss and cause unknown. One death.

Neepawa, Ont.—December 5.—Mr. Goodwin's harness shop. Loss and cause unknown.

Coldwater, Ont.—December 10.—Mr. C. M. Robinson's barn. Loss and cause unknown.

Pembroke, Ont.—December 10.—Mr. A. Barr's carriage factory. Loss and cause unknown.

Qu'Appelle, Sask.—December 7.—Mr. B. Harvey's frame stable. Loss and cause unknown.

Parrsboro', N.B.—December 12.—Mr. A. Mills' residence. Loss unknown. Cause, defective flue.

Dartmouth, N.S.—December 14.—Mr. W. Foster, Water Street. Loss slight. Cause unknown.

Belmont, Ont.—December 4.—Mr. F. F. Fry's house. Loss \$2,000. Cause, defective chimney.

Huron, Ont.—December 6.—Mr. Sutherby's residence, High Street. Loss and cause unknown.

Nairn Centre, Ont.—December 8.—Mr. M. McDonald's hotel. Loss unknown. Cause, chimney.

Uxbridge, Ont.—December 18.—Messrs Beal Brothers' tannery. Loss \$75,000. Cause unknown.

Cobden, Ont.—December 12.—McCoy's hotel. Loss \$200. Cause, acetylene generator exploded.

Manitou, Man.—December 7.—Mr. W. Wray's residence. Loss unknown. Origin, defective chimney.

Oxford, Ont.—December 12.—Chinese laundry owned by Mrs. A. Reid. Loss \$600. Cause, chimney.

Moosomin, Sask.—December 6.—Mr. J. Endicott's bakery. Loss \$100; insured. Cause, bakery oven.

Coderich, Ont.—December 16.—Mr. T. Warren's residence, Wolfe Street. Loss and cause unknown.

Halkirk, Alta.—December 4.—Mr. D. McKinnon's hotel. Loss \$2,500. Insurance \$700. Cause unknown.

Sarnia, Ont.—December 11.—Mr. Barnes' residence, 155 Peter Street. Loss slight. Cause unknown.

Belleville, Ont.—December 10.—Mrs. G. Brown's residence, Bleecker Avenue. Loss and cause unknown.

Southampton, N.B.—December 8.—Mr. H. Cronkhite's residence. Loss \$1,000; insured. Cause, chimney.

Port Hope, Ont.—December 6.—Mr. E. J. W. Burton's residence, Augusta Street. Loss and cause unknown.

Stratford, Ont.—December 17.—Stratford Mill Building Company's plant. Loss \$75,000. Cause unknown.

Chatham, Ont.—December 10.—Mr. W. Dell's barn occupied by Mr. R. Brown. Loss slight. Cause unknown.

Lindsay, Ont.—December 13.—Messrs. Horn Brothers' Woolen Mills. Loss unknown. Cause, supposed picker.

Elmvale, Ont.—December 12.—Mr. G. Dickie's barn and contents. Loss \$4,000. Insurance \$1,300. Cause, sparks.

Fort Erie, Ont.—December 8.—Mr. E. Fleming's residence, Bertie Street. Loss \$4,500. Cause, open gas jet.

Bobcaygeon, Ont.—December 13.—Bobcaygeon power house. Loss \$5,000, insurance \$2,700. Cause unknown.

Bridgeburg, Ont.—December 8.—Mr. E. Fleming's residence, Bertie Street. Loss \$4,500. Cause, defective furnace.

Campbellford, Ont.—December 12.—Mr. T. J. Horkin's shop, Bridge Street. Loss unknown. Cause, supposed stove.

Chicoutimi, Que.—November 29.—Messrs. Fortin and Brothers. Loss \$18,000; insurance \$8,500. Cause unknown.

St. Thomas, Ont.—December 11.—Mr. W. G. White's residence, South Avenue. Loss unknown. Cause, upset stove.

Todmorden, Ont.—December 17.—Mr. J. McCauley's stables, &c. Loss \$1,500, partially insured. Cause unknown.

Tillsonburg, Ont.—December 11.—Mihirg Livery stables. Loss, building \$2,000. 5 horses were burned. Cause unknown.

Yorkton, Sask.—December 5.—Mrs. Sturgeon's residence, Sixth Avenue. Loss unknown. Cause, defective chimney.

Fredericton, N.B.—December 16.—Mr. J. Lounsbury's residence, York Street. Loss slight. Cause, sparks falling on roof.

Sapperton, B.C.—Mr. J. Saunder's residence, corner Sherbrooke and Eighth Street. Loss \$1,500. Cause, kitchen range.

Regina, Sask.—December 11.—Mr. T. Wilde's residence, 1340 Hamilton Street. Loss unknown; insured. Cause unknown.

Kerrobert, Sask.—December 1.—Messrs. Masden and Stewart's store. Loss unknown. Cause, furnace set beam alight.

Kingston, Ont.—December 13.—Dr. Nash's dental parlors, Princess Street. Loss \$100; insured. Cause, defective wiring.

Prince Rupert, B.C.—December 15.—Grand Trunk Pacific Inn. Loss \$50,000 with \$15,000. Loss and cause unknown.

Comber, Ont.—December 9.—Messrs. J. S. Ainslie and Brothers' saw mill. Loss unknown; no insurance. Cause unknown.

Lambton Mills, Ont.—December 11.—Pavilion in Lambton Park. Loss \$2,100. Cause, supposed sparks from passing engines.

Digby, N.S.—December 9.—Mrs. F. A. Broman's residence, Sydney Street. Loss unknown; partially insured. Cause unknown.

Calgary, Alta.—December 14.—Messrs. Plunkett and Savage's carload of lemons. Loss \$1,500. Cause, defect in heating apparatus.

Fort William, Ont.—December 14.—Mr. D. McKinnon's two houses on Island No. 2. Loss \$1,400. Cause, overheated stove pipe.

New Westminster, B.C.—December 6.—Mr. J. G. Smith's store. Loss, contents \$600, building \$125; insured. Cause, gas range.

Victoria, B.C.—December 8.—Messrs. Kirk and Company's soda water factory, Esquimalt Road. Loss \$150. Cause, exposed lamp.

Brantford, Ont.—December 13.—Verity Plow Works. Loss and cause unknown. Prince Edward Hotel. Loss \$100. Cause, exploded lamp.

Norwood, Ont.—December 6.—Mr. D. Nixon's residence, 10th line of Dummer. Loss unknown; insurance \$750. Cause, defective chimney.

Wyoming, Ont.—December 11.—Mr. J. Chivers' barn and stable. Loss \$700. A mare and colt were destroyed. Loss and cause unknown.

South Vancouver, B.C.—December 12.—Mr. W. McCullough's bungalow, corner 46th Avenue and Prince Edward Street. Loss \$3,000. Cause unknown.

Watson, Sask.—December 11.—Messrs. Robinson and Jones, general store, and Messrs Schinkler Brothers, dealers. Loss \$12,000. Cause unknown.

Munroe, Man.—December 3.—Mr. J. Munro's barn and grain stacks. Loss \$6,000; insurance, \$1,000 on buildings, \$500 contents. Cause, supposed incendiary.

Ottawa, Ont.—December 13.—Six residences on Olmstead Street, Eastview, occupied by Messrs Barber, Wales, Griffith, Blisset, Meade, and Le Page. Loss \$6,000. Cause unknown.

Owen Sound, Ont.—December 7.—1819 2nd Avenue East, chimney fire.

December 8.—Mrs. J. Crannie's residence, 2nd Avenue East, chimney fire.

Wlarton, Ont.—December 7.—Residence north of flour mill. Loss and cause unknown.

December 10.—Mr. and Mrs. Holler's residence. Loss and cause unknown.

Alymer, Ont.—December 11.—Mr. F. Paupst's barn, Talbot Street. Loss and cause unknown.

December 14.—Mr. W. H. Wegenost's jewelry store. Loss unknown. Cause, gas.

Cobalt, Ont.—December 13.—Jajola Porcupine Cobalt Syndicate's and Twentieth Century's plant. Loss \$3,500. Cause unknown. Jamieson Meat Company's smokehouse. Loss slight. Cause, overheated stove.

Hull, Ont.—December 9.—Mr. N. Godmarie's residence, 3 Charles Street.

December 10.—Mr. C. Amban's residence, 248 Lake Street. Loss \$15. Cause, defective flue.

London, Ont.—December 11.—Two Grand Trunk freight cars. Loss unknown. Cause, probably sparks.

December 16.—Mr. H. Montague's residence, 545 Richmond Street. Loss unknown. Cause, chimney.

Sedley, Sask.—December 4.—Mr. J. O. Scott's general store, Mr. G. J. Lauz's drug store, and the Northern Crown Bank were entirely wiped out, while adjoining buildings were badly scorched. Loss \$30,000. Cause unknown.

Sackville, N.B.—December 13.—Business block, including barber's shop, two stores, &c. Mr. H. Miller's loss \$27.

(Continued on page 935.)

STATE INSURANCE AND PRIVATE CAPITAL

Insurance Superintendent Says Sentiment in Favor of Government Enterprise is Strong and is a Menace to Corporation Life Underwriting

Mr. William T. Emmet, State Superintendent of Insurance, in his address at the sixth annual convention of the Association of Life Insurance Presidents, at New York, predicted that the sentiment in favor of State insurance was one that would not quickly down, and that, unless there was a change in public opinion, it represented a serious menace to the business of insurance by private capital. Mr. Emmet made it plain that he was not in sympathy with this sentiment, which he characterized as Socialistic, and, for this very reason, his words of premonition were received with earnest attention by the 250 presidents and other officials present.

He discussed the subject of State supervision of insurance companies and declared that public opinion insisted that it should be of the strictest character. In recognition of this sentiment, through the tacit agreement of superintendents of companies, he said, supervision was extended beyond the functions for which there was specific legal sanction, and more and more questions of management were treated by the State departments, which originally confined themselves largely to mere solvency.

State Insurance in Europe.

"In the background of this whole subject," he went on, "stands the larger problem of governmental or State insurance. We are living in a time of intellectual and political upheaval, and in the forefront of every progressive programme throughout the world to-day we find, in crystallized form, this demand that the State shall take over the business of insurance and conduct it. We find, indeed, that in several of the European nations elaborate systems of State insurance are now in force, and that similar projects, differing from each other in details, but not in principle, are being inaugurated in some of our own States. There has, as yet, been no prohibition against private capital going into the insurance business in competition with the government, although this may well follow if the experiments which have already been started in the direction of State insurance prove in the least successful.

"Splendid as have been the results of private enterprise in building up this great business to its present state of efficiency, I am not one of those who believe that the movement in the direction of governmental absorption of the insurance business is likely to die out very quickly. The undercurrent it setting the other way. The people, in their organized capacity, feel surer of themselves than they ever felt before—surer of their right to invade the realm of private businesses to its uttermost limits, and surer of their ability to produce better results through governmental agencies than have ever been produced through private enterprises.

Basis of the Demand.

"The growing demand for State insurance is based on the fundamental proposition that insurance is a universal need, an absolute public necessity. All the campaigns which the companies have themselves waged to establish that view of insurance in the mind of the average man are now bearing their inevitable fruit in this growing tendency to regard the business of insurance as a proper adjunct to government.

"It would be quite absurd to deal with the subject of insurance supervision and not make any mention of what now seems to be the only possible alternative to a steady growth in the powers and jurisdiction of supervisory departments. I am bound to say, however, that, if the present drift toward Socialism continues, it is not likely that even the upbuilding of great supervisory departments such as we are now trying to maintain in New York will have more than a temporary effect in quieting the demand for State insurance. In the end it may even be advanced as the final argument in favor of it, just as the companies' contention that insurance is a universal commodity has been used to the same end.

Transaction of Insurance Business.

"Once a department of insurance supervision reaches a point of efficiency where it has attracted to itself talent and capacity equal, perhaps, to that which is found in the service of the insurance companies, the question is certain to be asked why all this elaborate and efficient machinery should not be utilized by the people in the direct transaction of the insurance business. There are answers which can be made to that question from the companies' standpoint, but when a revolution is on those answers sometimes do not carry very far. So that, while I may exaggerate the situation somewhat, it seems to me that at the present time those who are interested in keeping the business of insurance in private hands face rather a critical condition. If, in addition to opposing State insurance, they also seek to avoid strict and efficient supervision, they are entirely lost, because there is nothing plainer to me than that for the moment strict supervision is the one thing which stands in the way of State insurance.

"On the other hand, if conservative insurance men should now co-operate strongly in the creation of a system of strict

State supervision—hoping that this will quiet the demand for State insurance—they are apt to find that the structure of supervision which they have helped to build up will, by reason of its very efficiency, serve, perhaps, as the final strong argument for the taking over of the business of insurance by the State."

LIFE INSURANCE POLICY LOANS

One Company Calls Attention of Policyholder to the Fact That Mortgage is Placed on Policy

The question of the repayment of life insurance policy loans recently discussed in these columns, continues to evoke considerable interest. The Manhattan Life Insurance Company of New York attaches to every loan agreement sent in response to policy holders' applications for loans, a notice calling attention to the fact that by making a loan the insured is mortgaging the policy. The notice reads as follows:—

"Your attention is called to the fact that in making a loan on your policy you are mortgaging it for that amount; and in case of your death the loan would have to be deducted from the proceeds of the policy. You are thus depriving the beneficiaries of a part of the insurance protection to which they are entitled, and are increasing your yearly payments by the interest which you will be obliged to pay, in addition to the premium payments called for by the policy. If your circumstances are such that you are obliged to avail yourself of this loan, well and good, but you are urged to place the policy in its original condition by repaying the loan at the earliest possible moment. If you are unable to repay the entire amount of the loan at one time, partial payments will be accepted by the company."

Suggesting Loan Repayment.

There is also enclosed with every premium notice where the insured has a loan or lien on his policy, another notice calling his attention to the fact that there is a loan outstanding and suggesting re-payment. It reads:—

"Your attention is called to the fact that there is a loan (or lien) outstanding against your policy, and in case of your death while the policy is in force, the amount of the loan (or lien) will be deducted from the proceeds of the policy. The beneficiaries are thus deprived of a part of the insurance protection originally afforded by the policy. While no demand is made by the company for the repayment of the loan (or lien), you are earnestly urged to replace the policy in its original condition by repaying the loan (or lien) at the earliest possible moment. If you are unable to repay the entire amount at one time, partial payments will be accepted by the company."

Satisfied With Results.

"When we adopted this scheme," says the vice-president of the Manhattan Life, "we did so mainly with the idea that it was in the nature of an experiment; and we thought that it would probably result in some policyholders hesitating in making a loan, or in their paying it off as soon as possible, and we furthermore had in mind that by calling the policyholders' attention to the loan outstanding, it might impress upon him the importance of not continuing the loan any longer than necessary. But the results that these little notices have accomplished have been marvellous. No doubt you are well aware of the fact that it has generally been the case that a policy loan once effected is rarely paid off. This company had exactly this experience. But since we are sending out these notices, loan after loan has been repaid; and many of the policyholders, if unable to repay the entire loan, take advantage of the privilege of paying instalments. To say that we were more than surprised at the number of loans paid off, expresses it mildly. We were so well satisfied with our experiment that we are continuing the practice right along; and the good results that we are accomplishing in having loans paid off are most gratifying indeed."

TORONTO LIFE UNDERWRITERS.

Toronto Life Underwriters' Association, at the December meeting, elected its officers for the ensuing year as follows:—Honorary President, Mr. O. H. Mabee, Manufacturers Life Company; president, Mr. D. Johnson, Aetna Life Company; vice-presidents, Mr. J. G. Taylor, Mutual Life Company of Canada; Mr. W. E. Nugent, Sun Life Company; J. B. Hall, Dominion Life Company. Secretary, Mr. E. Manning, London Life Company. Executive Committee: Messrs. R. T. Faircloth, Canada Life Company; H. A. Lawrence, Travellers of Hartford; O. H. Carpenter, Great West Life Company; Mr. J. F. McIntyre, Federal Life Company; W. J. Morris, London & Lancashire Life Company; Mr. W. Triggs, North American Life Company, and G. Jenkins, Manufacturers' Life Company. A discussion took place on Rebating, Ways and Means, etc. These were referred to the attention of the incoming executive committee. A vote of thanks was extended to Messrs. Mabee and Hall, the outgoing president and secretary.

UNIFORM CLASSIFICATION OF FIRE RISKS

Suggestions for One Which Might be Utilized as a Basis—Seven General Classes

This important matter—the practical and real net cash results, as to profit or loss, derived from underwriting upon the different classes of hazards—has always attracted attention; but more particularly now, that insurance departments of different states have taken up the subject with a view to uniformity, writes Observer in the New York Spectator. Out of all the several discussions which have taken place there has developed a rather peculiar condition. Most companies classify their business to a greater or less extent. In fact, the list ranges from something like fifty to several hundred classifications—all applying to the same aggregation of risks.

A curious feature in this connection is that the insurance department of New York, in its tentative plan for statistical information, submitted to companies in May last, quotes a list of twenty-seven classifications, while the state of Texas, in the recently published experience table for the year ending June 30, 1912, presents seventy-five divisions.

Simplified Classification to Commence With.

Yet out of all this difference of opinion and experience it may be possible to formulate a simple and short form of classification which will not entail unreasonable hardship or expense upon companies, and at the same time provide a beginning—a starter—for all companies in conformity with state suggestions or requirements. This the writer thinks is possible, if not probable.

As in the case of the standard policy, it is possible to submit a form of classification which will be just as acceptable to the insurance departments as was that document many years ago. The New York department would have made, at that time, a standard policy for New York State if the companies had not gotten together and prepared one in self-defense. Why not the same procedure now?

Trouble as to the proposal for state supervision of classification lies in the enormous amount of work for companies to comply with state requirements and the disturbance of their individual systems and methods. Therefore the use of a simplified form of classification would appear to be at the start a better way of handling this complex subject.

Maintained for All Companies.

Is it not fair, in fact reasonable, to suppose or expect if all or most of the companies ask or demand the same rates because of the same (so-called) experience or unity of belief as to tariff organization and regulations, that the universal classification of risks should be just as feasible and practicable as the Universal Mercantile Schedule? And this schedule has been in successful operation for many years in the metropolitan district.

Uniformity of rates should be governed by uniformity of experience, and this can only be secured by a uniform system of classification.

But, again, this principle of uniformity in statistical information may be combated by the argument that there are companies of \$200,000 capital and others of several millions of strength. Therefore, and for that very reason, how is it possible to make uniform rates from united experience or classification results for all grades of companies? And yet this is exactly what is done to-day all over the country where tariff or board rates, rules or regulations, are maintained for all companies—small or large—without regard to united experience.

Progress and Past Experience.

By reason of the wonderful progress—almost revolutionary—as to mercantile and manufacturing life, which has been working and developing during the past five years, such as difference in insurable values, brought about by changed locations involving rate variations, besides altered methods of conducting business, there is reason to believe that these conditions, so different from those in vogue heretofore, have brought about many changed views as to individual classification. Some prominent underwriters have indicated that this very fact precludes the possibility of an extended and elaborate classification list.

Nevertheless it does not appear that there should be an abandonment of results obtained from long experience, training and education in the business. This reasoning is sound fundamentally, and it does not seem reasonable to conceive an opinion at variance therewith. As to classification of risks, for the purpose of arriving at the proper charges to make on each class of hazard, the author of this article has, for several years, had very decided views.

To Formulate a Basis.

Rome was not built in a day; neither can a classification list that will suit all companies be constructed immediately. It is the belief of the writer that this can be accomplished only by gradual stages. Eventually universal classification must come, but not suddenly nor abruptly. Therefore, merely as a suggestion, the following simple form of classification is submitted, which will not collide with the established and adopted lists of each individual office. It will be noted that the sub-joined list includes but seven divisions, and certainly such a

meagre array should not disturb the voluminous, and, in some cases, ponderous classification lists maintained by several companies.

The object of this article is to submit a simple form of classification which will formulate a basis—that is all—simply a beginning. From this a more extended and elaborate list can evolve and be developed as time, circumstances or experience will warrant or demand.

Embracing Entire Field.

Suppose such a classification of risks as the following, embracing the entire field of fire underwriting, was tried for two, three or even five years, including records of premiums received and losses and loss expenses with incidental legal outlays paid during that period; would it not be a step forward—an advance in the direction of what is bound to come and what is sought after?

The proposed column headings are as follows:

Construction. Frame or Brick and Frame		Construction. Brick, Superior or Fireproof		Blanket Form	
Building. Use and Occupancy Rent or Lease		Contents			
Premiums	Losses and Adjust'm't and Legal Expenses	Premiums	Losses and Adjust'm't and Legal Expenses	Premiums	Losses and Adjust'm't and Legal Expenses

Seven General Classes.

The seven general classes, with their subdivisions, are named below:

Risks.

Class A.—Dwellings—not more than two families; apartment houses or flats—no stores; apartment houses or flats—with stores (see class B.); stables—private; hotels—apartment or transient; churches, schools, colleges, convents, club houses and public buildings; office buildings—chief occupancy. Totals reported for class A.

Class B.—Mercantile risks—wholesale, no manufacturing; mercantile risks—wholesale, omnibus manufacturing; mercantile risks—retail; piers; wharves and bulkheads; storage; department stores. Totals reported for class B.

Class C.—Manufacturing risks or special hazards; wood and metal workers; printing establishments; book binderies; breweries and malt houses; distilleries; paper box factories; wall paper factories; theatres, moving picture shows and opera houses; saw and planing mills and lumber yards; garages; sweat shops; ice houses; elevators; electric light and power plants; stock yards and packing houses; bakeries; candy factories; builders' risks; cotton mills; woolen mills; flour mills; gas works; shoe factories; jute mills; livery stables; laundries; all other manufacturing risks not otherwise classified. Totals reported for class C.

Class D.—Floaters of all kinds.

Class E.—Railroad and traction properties.

Class F.—Vessels of all kinds.

Class G.—Sprinklered risks of every description and equipment.

Special Notes.

Classification as to congested sections in any city is a matter of individual judgment, experience and application. Therefore the above suggestions may not appeal to all underwriters.

Yet there are congested districts, by reason of excellent moral hazard and superior construction and equipment, less dangerous to fire insurance interests than other localities not so well favored.

The aggregation of results for each of the seven classes as above outlined, could be reported in bulk, thus not involving much additional labor upon companies and, at the same time, not disturbing their private or individual systems.

Although the scheme may not be perfect it may, however, offer a means to an end.

Two general divisions may be added as to "protected" and "unprotected" risks.

INDUSTRIAL ACCIDENTS

According to the record of industrial accidents maintained by the Department of Labor, 114 workmen were killed and 359 injured during the month of November. Compared with the record for October, which was 105 killed and 415 injured, there were nine more killed and 47 fewer injured during November. The greatest number of fatal accidents occurred in steam railway service, navigation and the building trades, the figures for which were 28, 24 and 13 respectively. The largest number of non-fatal accidents occurred also in steam railway service, the record being 125, followed by the metal trades with 79, and by the building trades with 33.

Statistics show business conditions at Edmonton are good.

ROMANCE IN FIRE UNDERWRITING

Carelessness Results in Conflagration, But a Happy Adjustment Was the Ultimate End.

(A Story for Christmas.)

BY HENRY LYE.

The town of K— is situate in one of the best agricultural districts in Ontario; in the townships east and west are the well built homes of prosperous farmers who own comfortable carriages and well bred horses, and whose sons and daughters are not tempted by the attractions of the cities.

Rice Lake and its tributaries, the Otonabee and the Indian Rivers, with the Trent as its outlet, which in turn received the Ouse and the Crow; whose waters years ago teemed with maslinonge, bass and trout, whilst its rice-beds were swarming with wild ducks, and sometimes saw brant and geese, with an occasional swan; where Cameron's Point, Idyl-Wyld, the Indian village "Hiawatha," the bathing beaches and the numerous islands all attracting excursions and picnic parties, at which were formed acquaintances often leading to settled courtships followed by happy marriages.

Winter's Attractiveness is Shown.

The winters were no less pleasant than the summers, on account of the frequent gatherings, where dancing and old-time games were in vogue, while the numerous church festivals furnished religious dissipation to the elders, and the ever-recurring sleighing parties, at which the roomy sleighs, well filled with sweet straw and with plenty of real buffalo robes, combining comfort with the occasional necessity of supporting swaying sweethearts on the thank-you-marms (cahots) or the snow drifts disturbed the equilibrium; all these precluded the idea of greater pleasures being found in the more populous cities.

The mothers of these young men and maidens had barefooted (by choice, not of necessity) spun the wool from which many of the garments of the family were made; had milked the cows and made the butter before cheese factories or creameries were established; had poured the melted tallow into the candle moulds before kerosene lamps or electric lights were introduced, and had bound the sheaves of Club or Soule wheat from the swathes left by the cradlers long before Fife wheat or reaping machines were known.

What an Overheated Stove Did.

But it was not into this happy community that a commercial traveler found his way on one wild wintry day with the intent to persuade the merchants to replenish their stocks of goods and order fresh supplies for the coming springtime.

As this "drummer" was about to leave the store of one of his customers, he noticed that the stove was red-hot, and was not in very good condition anyway, so he remarked to the proprietor: "I say, Mac, if you don't look out, that stove will burn you up"; to which Mac replied: "I don't care a continental, I am well insured."

Before very long the traveler's prediction was verified; the stove, which was near the front entrance door, so that it could be fed and cleaned without disturbing the customers or causing the dust and ashes to injure the goods, again became overheated, and set fire to the building, destroying the stock, which could not be removed on account of the flames being near the doorway.

The store immediately adjoining on the south was occupied by a young man who had been paying attentions to the daughter of one of the farmers near the village, with a view to marriage, but had not been able to induce the father to consent because he could not show that the profits of his business were sufficient to justify it.

The Fire Adjuster at Work

Some of this young man's stock of dry goods was burnt, some damaged by water, and some by removal; the usual method of arriving at the amount of loss and damage was by adding to the amount of the latest previous inventory the subsequent purchases, to deduct the amounts of the intervening sales less profits, to find the value at risk; then to make inventory of the goods remaining after the fire and deduct the damage to them; the balance being the amount of loss and damage.

This process demonstrated a less amount of loss than I had estimated, so I decided to closely scrutinize the inventories, invoices and statements of sales and profits.

It is very seldom than an inventory is correct, broken packages causing fractions of dozens or gross which confuse the calculations, "8 only" being apt to be computed as though there were 8 dozen, or 8 gross; list prices being sometimes used instead of net; whilst the calculations are often made by juniors who are inexperienced, but are supposed to be competent because of their attainments at the school they have recently attended, where they were considered "smart," an opinion which they personally share, but which is not justified by their performances.

The revision of the old inventory by the correction of errors in calculations and additions, together with the amend-

ing of a mistake of a thousand dollars in carrying the total from the foot of one page to the head of the next, furnished the foundation for a new statement of loss and damage which led to an amicable and satisfactory adjustment.

After Adjusting Losses He Assists Lovers

But this was not all. The merchant invited me to drive out with him to the abode of his sweetheart, where we were to spend the evening. There the conversation naturally drifted to the subject of the fire and the claim on the insurance companies. This led to an explanation of the errors in the old inventory, the correction of which demonstrated the fact that the business of the young man was really a very profitable one, a fact which apparently impressed itself upon the minds of the young lady's parents and led them to look favorably upon the young man's aspirations, as some time afterwards I received a pressing invitation to attend the wedding, but other business prevented my acceptance.

The next Christmas, however, brought a most urgent invitation to visit the married couple in their neat little cottage which had been presented by the bride's father. Then I learned of the increased business done after the marriage because of the popularity of the bride and bridegroom, whose marriage had been facilitated by the developments attending my adjustment, part of the increase of business being owing to the cessation of competition by reason of the failure of the merchant whose large insurance had induced him to be reckless and who, in consequence, had been unable to collect anything from the insurance companies.

THE CANADIAN BANK OF COMMERCE.

Large profits are reported by the Canadian Bank of Commerce for the year ended November 30th. After providing for all bad and doubtful debts, the amount is \$2,811,806. There was a transfer of \$2,400,000 from the rest account of the Eastern Townships Bank, which the Bank of Commerce absorbed this year. The balance at credit of profit and loss account brought forward from last year was \$203,394, and the premium on new stock \$242,180. These four items made a sum of \$5,657,381 for distribution. Of that amount, dividends at the rate of 10 per cent. per annum and a bonus of 1 per cent. which was paid on December 1st, accounted for \$1,568,622. The sum of \$500,000 was written off bank premises, and the annual contribution of \$75,000 was transferred to pension fund. The amount transferred from the Eastern Townships Bank rest account was placed to the Commerce rest account together with premium on new stock and an additional \$100,000. Altogether this made the reserve account of the Bank of Commerce stronger by \$2,742,180. A balance of \$771,578 has been carried forward. The annual meeting of the shareholders of the bank will be held on January 14th.

PEERAGE MORTALITY EXPERIENCE.

The actuaries of Canadian life insurance companies have not had to figure as to the mortality of peers. They will be interested, however, in the facts and figures given by Mr. R. M. Hunter, F.F.A., at Edinburgh recently on that subject. After giving a resumé of previous investigations which in regard to mortality and marriage dealt with periods ending with the middle of last century, Mr. Hunter gave an account of investigations he had made into the rates of mortality among males and into the rates of mortality, marriage and fruitfulness of marriage among bachelors of the British Peerage in the latter half of the nineteenth century. The experience included peers, sons of peers, sons of the eldest sons of peers, heirs presumptive, and sons of heirs presumptive. The new mortality table for males showed lighter rates at young age, vitality among the young having thus improved, but heavier rates between ages thirty and sixty. The same features appearing in comparisons of tables based on population statistics might be explained by many young lives who at one time would have succumbed in their early years being preserved owing to the advance in medical and sanitary science, but only till middle life. As the families of the peerage would be enjoying many advantages over the general population, it might not be correct to ascribe the same reason for the increase in the rates of mortality among males of the peerage at middle life, but it was difficult to assign a special cause. Still, the peerage showed an advantage in vitality at almost all ages over the general population. Mortality among bachelors was heavier and among married men lighter among males as a whole. The new table of rates of marriage showed a tendency for marriages of bachelors in the peerage to take place nowadays later in life, while such bachelors married later in life than bachelors in the general population. In the general population itself not only was there a tendency to marry later in life, but, more significant, the rate of marriage had at almost all ages become decidedly lower. Fruitfulness of first marriage was also investigated. Derived from modern statistics, the paper showed changes which could not be ignored by those whose duty it was to use figures based on statistics of mortality, marriage and issue among the upper classes.

Saskatoon Retail Merchants' Association have adopted a constitution similar to that used by the Toronto, Winnipeg and Dominion associations.

CO-OPERATION OF ARCHITECT AND UNDER-
WRITER

It Should Reduce the Fire Waste—Protected Buildings
Are the Best Investment.

At the convention of the American Institute of Architects, Mr. Franklin H. Wentworth, of Boston, secretary of the National Fire Protection Association, told the assembled architects how they may assist in reducing the fire waste, and pointed out how the architects of New York city are already co-operating with the underwriters of the metropolis to this end.

"The New York chapter of the institute," he said, "has created a special committee through whose solicitation all architects who are members of the chapter have agreed to give access to their plans to all authorized representatives of the underwriters, and have agreed upon a blank report for information for inspectors regarding constructional features. This blank is sent to the architect's office the day before the visit of the inspector, so that information will be immediately available when the inspector calls. The underwriters considered that in addition to information regarding structural features and fire-proofing, it was of importance for them to know whether the architect who designed the building also supervised its election, and to have a record of the name of the architect. This information is being incorporated in the reports.

Supervision of Construction.

"Supervision of construction by the architect is of the highest importance, as it insures the proper construction, especially of a fireproof building, and insures the specifications being carried out in minute detail. Without such supervision inferior materials may be used and important features of construction and of fireproofing may be done in an inferior manner, and without co-operation of the architect there may be many conditions in a fireproof building which an inspector cannot possibly ascertain.

"To-day the business of an architect is more practical than esthetic, which reverses former conditions and harks back to first principles. In arithmetical proportion the esthetic value of an architect's service is but 10 per cent. of the whole. Schools of architecture are becoming more practical. It is now being taught that the architect who creates the building is the master builder. The contractor who erects the building is not the one who creates it. The old school of builders have been unable to keep abreast of the rapid strides of improvements of building construction, so that the architect to-day becomes as of old the master builder.

Architects, Contractors and Builders See Need.

"Another important feature of the committee's work is to make available the enormous amount of information regarding fires and tests of building materials accumulated by the underwriters, which is now in such shape as to be difficult of access to the architect. The underwriters' reports of fires very seldom reach architects. They usually go to insurance companies and insurance brokers, who are interested more in the insurance standpoint than in improvements in future buildings. The committee of the New York architects, with this in mind, has arranged with the underwriters to have certain of these reports sent to all of its members. The experience of architects in connection with fires is of much value, and the architect is in a peculiar position, because of intimacy with building construction, to furnish information to the fire protection engineer.

"The need of reducing the fire waste of the country is becoming clear to the architects, contractors and builders who are directly responsible for the conditions which increase or reduce the fire hazard. They should use their influence wherever possible to secure the use of non-combustible material and to introduce all possible devices to prevent fires from getting started and from spreading to adjoining buildings.

Surrounded by Blocks of Inflammable Material.

"Modern building ordinances, especially in the downtown districts, are encouraging fireproof and mill-construction buildings with non-combustible roofs and properly protected wall and floor openings. While many such buildings are going up, most of them are surrounded by blocks of old buildings filled with dry timber and inflammable materials. They are fire breeders of themselves, and fire spreaders as well, because of their unprotected openings. While it is economically impossible to tear down all these buildings and replace them with fire-resisting construction, progress toward the reduction of the fire waste can be secured by providing that any changes must be made of a fire-resisting nature. Only non-combustible material should be allowed to go into an old fire trap for alterations.

"Whenever new floors or partitions are needed they should be made of terra cotta, metal, concrete or some other material that will lessen the fire hazard. It is easily possible to remodel old buildings, using the walls and framework, so as to make them practically fireproof within, by the use of clay or terra cotta partitions and floors of cement, thus practically enclosing each story in fireproof materials. The building thus protected commands a better class of tenants and higher rentals, while the saving in insurance cost gives a good return on the investment, to say nothing of the owner's responsibility for the life and property of his tenants and his obligations to do his share to reduce the fire waste of the country."

FIRE INSURANCE MAN ARRESTED

Frank Anthony, Who Operated in Canada as Well as
United States, is in the Toils at Brooklyn

Frank W. Anthony, who has been in the fire insurance business, was locked up on Saturday night in a Brooklyn police station as a fugitive from justice in Philadelphia and specifically on the charge that by means of conspiracy he swindled the Metropolitan Mutual Fire Insurance Company of Pennsylvania out of \$12,000. Mr. R. C. Wilson, state inspector of insurance for the commonwealth of Pennsylvania, stated that Anthony is one of the "most important men in the fake insurance business." He has been committed to jail for 30 days to give the Pennsylvania authorities time to furnish extradition papers.

This man's operations are well known in Canada. Bank managers and others in various parts of the country have received his circulars and The Monetary Times has on several occasions issued warnings respecting his so-called insurance.

No Losses Were Paid

Mr. T. B. Donaldson, a Philadelphia lawyer, who is acting as receiver for the insolvent Metropolitan Mutual Insurance Company, declares that Anthony was the head and front of the concern, which he says was a swindling institution from the outset. "No losses were ever paid," said Mr. Donaldson. "You may judge the extent of the swindling from the fact that the company wrote policies of a face amounting to \$1,600,000 during the year 1911. The premiums were lower than others, and the company did a big business throughout the country, from Canada to Texas.

"New York state seemed to be the only one which escaped, and that, I am led to believe, was due to the fact that Anthony could not get a broker's license in New York. He was too well known in his native place. Many of the losses that were covered by the policies of the concern were in Canada, where, it seems, the company did a big slice of its business. There were many forest and bush fires there, causing thousands of dollars of damage, but none of the policies were recognized, and no money was paid to those poor people who thought they were insured.

"I have been finding out a lot about the business since I took charge of it, and during my investigations Mr. Wilson and myself have been in close touch with Anthony. We did not let him know what we were after, but we got a number of admissions from him which led to his indictment. There are others, who are under indictment and arrest, three men of Philadelphia, but we regard Anthony as the chief of the gang."

Insuring a Monkey

Mr. Donaldson, in an interview, told a story illustrating Anthony's insurance ingeniousness. "Hagenbeck, the animal trainer," he said, "had a trained monkey, which was valued at about \$25,000. Anthony met him and offered to insure the beast. He demanded a premium of \$7,000, and Hagenbeck did not see why he should pay so much. At that time Anthony told the animal trainer that he represented a company in Germany, which insured wild animals, and he had, at a small expense, printed somewhere in Brooklyn a fine policy of this mythical insurance concern, showing its offices in some large business building in Berlin. There was no such company and no such building."

The moral of the Anthony and other such incidents is that Canadians should place their fire insurance in reputable companies licensed to do business in Canada.

SMART-WOODS MERGER COMPLETE.

The amalgamation of the Smart Bag Company and Woods, Limited, under the name of Smart-Woods, Limited, has been completed. The stock of the new company is divided as follows:—

	Authorized.	Issued.
Common	\$2,500,000	\$1,500,000
Preferred	2,500,000	1,000,000

There has been no public offering of the securities, as all the stock has been taken up by the shareholders of the two companies amalgamated. There are no bonds.

While new investment has not yet been made in plant extensions, considerable expansion is now under consideration. When this is completed many new hands will be employed.

The company has given The Monetary Times the following reasons for the amalgamation:—

- (1) The desire to strengthen the position of the company by enlarging the scope of its activities; and by joining forces with another concern manufacturing other lines of goods this object can be obtained;
- (2) The advantage of increasing the buying power of the company in order to obtain the raw material at lowest prices;
- (3) The increased capital under one management can be more economically administered.

RECENT FIRES

(Continued from page 930.)

ooo; insurance \$10,000. Building insured with Nova Scotia Fire Insurance Company, \$3,000. Cause unknown.

Quebec.—December 12.—Dorchester Electric Light plant. Loss slight. Cause unknown.

December 14.—Messrs. A. J. Turcotte and Company's store, St. Paul Street. Loss \$500. Cause, probably a candle.

Brandon, Man.—December 9.—Brandon Heating and Plumbing Company's workshop. Loss slight. Cause, hot ashes.

December 11.—Post office. No loss. Cause, papers set alight.

Ridgetown, Ont.—December 12.—Mr. J. Watson's and A. Scane's three boat-houses and barn. Mr. J. McCullough's camp. Loss and cause unknown.

December 13.—Drader's cooper shop. Loss \$1,200. Cause unknown.

Halifax, N.S.—December 9.—Mr. H. L. Montague's residence, 338 Gottingen Street. Loss unknown. Cause, furnace.

December 10.—Wooden building belonging to military authorities. Loss unknown. Cause, furnace.

St. Catharines, Ont.—December 9.—Premises occupied by Messrs. T. and J. O'Brien, owned by Mr. T. Coulon. Loss \$5. Cause, sparks from wood stove.

December 14.—Mr. J. Pringle's store and dwelling. Loss \$1,500. Cause, child playing with matches.

Montreal, Que.—December 12.—New Read Building, corner Alexander and Lagauchetiere Streets. Loss slight. Cause unknown.

December 13.—Mr. S. Lacombe's residence, 1270 Cote des Neiges Road. Loss \$2,000. Cause, defective wiring.

Moose Jaw, Sask.—December 6.—Canadian Pacific Railway switchmen's building. Loss unknown. Cause, supposed upset coal oil.

December 12.—City hospital, chimney fire. City drying and pressing establishment. Loss unknown. Cause, hot ashes.

Porcupine, Ont.—December 9.—White Rat saloon. Loss \$5,000; no insurance. Cause, defective stove pipe.

December 13.—Mr. A. Morston's restaurant and pool-room, Brown's Royal Hotel, Carrasco's assay office, two stores occupied by House's bakery and the post-office. Loss \$20,000. Cause unknown.

Winnipeg, Man.—December 9.—Mr. A. Muyleart's residence, 844 Burnell Street. Loss, \$3,050; insurance \$800. Great West Permanent Loan Company. Cause unknown. Winnipeg Post's premises. Loss \$2,000. Cause unknown.

December 13.—Mrs. J. Nossey's millinery store, 327 Selkirk Avenue. Loss \$1,500. Building insured with Phoenix Fire Company \$2,300. Cause, overheated stove.

St. John, N.B.—December 9.—Mrs. N. Gaynor's residence. Loss, building \$200, furniture, &c., not known; insurance, building \$2,000, Western insurance Company. Cause unknown.

December 13.—Mr. J. Quinlan's residence, 29 Elliott Row. Loss slight. Cause, overheated stove pipe.

December 14.—Canadian Sand Blast Company's gasoline, rear of Custom House. Loss unknown. Cause, unprotected light.

Ottawa, Ont.—December 7.—Store, 1079 Wellington Street. Loss unknown. Cause, overheated stove pipe.

December 8.—Mr. P. Brennan's residence, Hurdman's Bridge. Loss slight. Cause, overheated chimney.

December 9.—Mr. H. J. Levin's store, 193 Bank Street. Loss slight. Cause, overheated stove.

December 12.—Mrs. C. Herbst's residence, 261 Main Street, Ottawa East. Loss slight. Cause, overheated stove pipe.

Edmonton, Alta.—December 4.—Shack on corner 6th Street and Columbia. Loss and cause unknown.

December 5.—Macray's blacksmith shop on Norwood Boulevard. Loss and cause unknown.

December 6.—Laundry, 647 Jasper Avenue. Loss and cause unknown. One death.

December 7.—Mr. D. J. Munro's barn. Loss and cause unknown. Mr. W. H. Reid's warehouse. Loss unknown. Cause, supposed incendiary.

Hamilton, Ont.—December 11.—49 First Avenue. Loss \$100. Cause, overheated stove. 225 North McNab Street. Loss small. Cause unknown. 64 Norway Avenue. Loss slight. Cause, defective chimney. Commercial Oil Company's premises, West Jackson Street. Loss \$50. Cause, boiling asphaltum. 162 North Ferguson Avenue. Loss slight. Cause, burning rubber set rat alight.

December 12.—Residence of Mr. S. Matthew's. Loss slight. Cause, spontaneous combustion. Mr. H. L. Bastien's boat house, Picton Street. Loss slight. Cause, spark.

December 14.—Diamond Flint Glass Company's factory. Loss unknown. Cause, hole in furnace.

Saskatoon, Sask.—December 1.—Mrs. M. Seely's residence. Loss and cause unknown. Mr. C. Callacio's store.

Loss unknown; insurance with Rimouski Fire Insurance Company, German American Insurance Company.

December 6.—608 McPherson Avenue. Loss \$75. Cause, overheated stove.

December 11.—Royal Clothing Company's store. Loss, building \$1,000, stock \$8,000; partially insured. Cause unknown. Messrs. Elliott and Scott's hardware store, corner Avenue C 4 22nd Street. Loss \$700. Cause, overheated stove.

Toronto, Ont.—December 5.—Mr. E. Moss' automobile. Loss \$150. Cause, engine back-fired.

December 6.—Mr. J. Milligan's residence, 261 College Street. Loss, \$25 contents, \$50 building. Cause, gasoline exploded.

December 8.—Mr. J. Kennedy's residence, 334 Crawford Street. Loss, \$25 contents, \$25 building. Cause, overheated grate.

December 11.—Mr. Jeastin Badgerow's residence. Loss \$7. Cause unknown. Dominion Bank, corner St. Clair and Vaughan Road. Loss \$2. Cause, spontaneous combustion.

December 12.—Mr. Preston's residence, 52 Parkway Avenue. Loss \$800. Cause, defective flue.

December 13.—Messrs. F. Lambert, T. Allen and J. P. Jewell's residences. Loss \$3,500. Cause, exploded oil stove.

December 14.—202 Jarvis Street. No loss. Cause, dropped match. Holy Blossom Synagogue. Loss \$5. Cause, overheated furnace pipes.

December 17.—Mr. J. McKenzie's residence, 93 Blackthorne Avenue. Loss \$2,000, partially insured. Cause, overheated stove.

December 18.—Messrs. G. A. Rudd and Company's harness and saddlery factory. Loss \$50,000. Cause unknown.

Vancouver, B.C.—December 3.—Japanese restaurant at 625 Main Street. Another small fire broke out in a small restaurant at the corner of Main and Powell Streets; another in a house at Seventh Avenue and Carolina Street; another at the rear of the Astor Hotel; another in a house at the corner of Chilco and Georgia Streets, and still another at the Star Theatre, on Main Street. Loss \$300.

December 6.—Messrs. W. Meyers Company, second floor Mercantile Building, 318 Homer Street. Loss and cause unknown.

December 7.—Mr. J. G. Smith's second-hand store, McGinnes Street. Loss slight. Cause unknown.

December 10.—Hoffar Motor Boat Company, 933 Georgia Street. Loss \$17,000, including one 25-foot Seabird model yawl, value \$500, no insurance; one forty-foot sea-going cruiser owned by Captain Anderson and valued at \$5,000, partly insured; one thirty-foot racing craft, valued at \$600, no insurance; one thirty-eight-foot speed craft, nearly completed, valued at \$750, no insurance. In addition to the yachts destroyed, an aeroplane, valued at \$300, together with one 60-horsepower Scripps high speed engine, just overhauled and owned by Messrs. F. Lalonde with a value of \$2,000. Cause unknown. Two fires from unknown causes had been found during the previous week in these premises.

December 12.—Miss Taylor's millinery store, 1124 Robson Street. Loss \$2,000. Cause unknown.

December 18.—Vancouver Country Club. Buildings, loss, \$30,000. Cause unknown.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of December 21st, 1911; December 12th, and December 19th, 1912, with percentage change.

	Dec. 21, '11.	Dec. 12, '12.	Dec. 19, '12.	Ch'g %
Montreal ...	\$51,971,216	\$60,567,345	\$69,204,251	+33.3
Toronto	41,591,921	48,394,272	45,141,838	+85.3

IMPORTANCE OF CANADA'S CEMENT INDUSTRY

Increase of Production Has Been Fourfold Since 1905 —Over Six Million Barrels Consumed in One Year

The production of cement in Canada during the past few years though all classed as Portland, has included an output of Puzzolan cement, made from blast furnace slag at Sydney, N.S., and a small production of "natural Portland" made at Babcock, Manitoba, 75 miles southwest of Winnipeg on the Canadian Northern Railway. The total quantity of cement made in Canada during 1911, as per reports received from the manufacturers, was 5,677,539 barrels of 350 pounds net each, or 993,569 tons, as compared with 4,396,282 barrels, or 769,349 tons, made in 1910—an increase of 1,281,257 barrels, or over 29 per cent, states the report of Mr. J. McLeish, B.A., chief of the division of mineral resources and statistics.

The total quantity of Canadian Portland cement sold in 1911 was 5,692,915 barrels, or 996,260 tons, as compared with 4,753,975 barrels, or 831,946 tons, in 1910, an increase of 938,940 barrels, or nearly 20 per cent.

The total production of Portland cement in 1911, including Canadian and imported cement, was 6,354,831 barrels of 350 pounds net, or 1,112,095 tons, as compared with 5,103,285 barrels, or 893,075 tons, in 1910—or an increase of 1,251,546 barrels or nearly 25 per cent.

The cement industry has been rapidly growing in importance, and its output is now exceeded in value amongst non-metallic products by coal and clay products only.

An average of 3,010 men were employed in 1911, the total wages paid being reported as \$2,103,838.

The increase in annual production since 1905 has been nearly four-fold. The production per capita in 1911 was about 278 pounds, as against only 79 pounds in 1905. The approximate consumption per capita has increased during the same period from 115 pounds to 310 pounds.

A similar rapid increase in both production and consumption has taken place in the United States, where the annual production now exceeds 75,000,000 barrels.

The production per capita in the United States was in 1910 about 332 pounds, as against 204 pounds in 1905.

Twenty-four Plants are Producing.

The production of cement in 1911 was derived from 24 operating plants, having a total daily capacity of \$23,281, the operating plants being distributed as follows: one in Nova Scotia, using blast furnace slag; one in Manitoba, making a natural Portland cement; one in British Columbia; three in Alberta; three in Quebec, using limestone and clay; and fifteen in Ontario, of which twelve use marl and three limestone.

Of the total quantity of cement made in 1911, 1,626,857 barrels were made from marl and 4,050,682 barrels from limestone and slag. In 1910, there were 1,214,479 barrels made from marl and 3,181,803 barrels from limestone and slag, and in 1909, 819,706 barrels were made from marl and 3,336,002 barrels from limestone and slag. Practically all of the newer plants erected during the past few years have been limestone plants. The proportion of cement made from marl in 1908 was about 45 per cent. of the total output, as compared with about 28 per cent. in 1911.

Consumption of Cement.

The consumption of cement is represented practically by the domestic production together with the imports, the exports being so comparatively small as to be negligible. The total consumption of Portland cement in Canada in 1911 was 6,354,831 barrels (1,112,095 tons), made up of 5,692,915 barrels (996,260 tons) of Canadian cement, and 661,916 barrels (115,835 tons) of imported cement; the Canadian cement representing 90 per cent. and the imported cement 10 per cent. of the total.

In 1910 the total consumption of cement was 5,103,285 barrels (893,075 tons), of which 93 per cent. was of domestic production and 7 per cent. imported. In 1901 the total consumption was 872,966 barrels (152,769 tons), of which only 36 per cent. was made in Canada and 64 per cent. imported.

For Past Eleven Years.

The following is an estimate of the annual consumption of Portland cement in Canada during the past eleven years:—

Calendar Year.	Canadian		Imported.		Total.
	Barrels	%	Barrels	%	Barrels
1901	317,066	36	555,900	64	872,966
1902	594,594	52	544,954	48	1,139,548
1903	627,741	45	773,678	55	1,401,419
1904	910,358	54	784,630	46	1,694,988
1905	1,346,548	59	918,701	41	2,265,249
1906	2,119,764	76	665,845	24	2,785,609
1907	2,436,093	78	672,630	22	3,108,723
1908	2,665,289	85	469,049	15	3,134,338
1909	4,067,709	97	142,194	3	4,209,903
1910	4,753,975	93	349,310	7	5,103,285
1911	5,692,915	90	661,916	10	6,354,831

The number of directors of the Atlantic Sugar Refineries, Limited, has been increased from five to nine.

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt station for the week ended December 14th:—Peterson Lake, 101,750; Drummond Mine, 73,449; Nipissing, 85,254; Trethewey, 53,600; La Rose, 66,000; Chambers Ferland, 146,400. O'Brien, 172,011; McKinley-Darragh, 261,278; Cobalt Townsite, 144,000; total, 1,103,742 pounds, or 551 tons.

The total shipments since January 1st are now 41,112,416 pounds, or 20,556 tons.

In 1904 the camp produced 153 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

PRICES CONTINUE UPWARD.

The statistics department's index number of wholesale prices rose approximately one point in November, standing at 134.3 as compared with 133.1 in October and 129.4 in November, 1911. The advance was due chiefly to higher prices for fish, textiles, hides and leathers, fuel and lighting, while Ontario grains, dairy products, metals, lumber and miscellaneous building materials were slightly upward, with western grains, cattle and beef, paints and oils, downward. As compared with the same month last year, grains and fodders, fruits and vegetables, were lower, while animals and meats, dairy products, fish, textiles, hides, leathers, boots and shoes, metals, fuel, house furnishings, and miscellaneous commodities were higher than in 1911. In retail prices, coal, wood, butter and eggs were upward; potatoes also were higher in Ontario, while there was a downward movement in flour, sugar, prunes and evaporated apples.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

ALBERTA.

Camrose, No. 1315, \$10,000. H. J. Dahl, Camrose.
Ruthenia, No. 2408, \$800. R. Fletcher, Lamont.
Cop Hill, No. 2701, \$2,000. T. T. Sater, Sedalia.
Owaking, No. 2760, \$2,000. H. P. Ober, Stirling.
Neutral Valley, No. 2809, \$1,800. G. Bryan, Consort.
Oakhurst, No. 2318, \$1,400. J. Carter, Mannyberries.
Gadsby Lake, No. 2816, \$1,200. F. M. McDonald, Tees.
Waskatemow, No. 2419, \$300. J. E. Vance, Pine Creek.
Diamond City, No. 1861, \$35,000. T. N. Christie, Diamond City.
Little Round Lake, No. 2819, \$1,300. R. Spalding, Lake Thelma.
Athabasca Landing, No. 839, \$40,000. S. R. Farquharson, Athabasca Landing.

The number of directors of the Abitibi Pulp and Paper Company has been increased from five to nine.

The head office of the Montreal Engineering Company, Limited, has been changed from Toronto to Montreal.

The capital stock of the Casey Kismet Mining Company, Limited, has been increased from \$40,000 to \$100,000.

The Canada Stone Company, Limited, of Montreal, has absorbed the Sackville Freestone Company, New Brunswick. The Canada Company will likely take over other quarries in the lower provinces and other parts of Canada.

Application will be made to the present session of the Dominion Parliament for an act to incorporate the Canada Preferred Insurance Company, with head office in Vancouver, and power to carry on the business of fire insurance. Messrs. Maitland and Hunter, Vancouver, are solicitors for the applicants.

The following nominations were made at the December meeting of the Welland board of trade: President, T. D. Cowper, H. L. Hatt and D. Ross; vice-president, W. J. Hickey and L. B. Duff; secretary, J. D. Payne; treasurer, A. H. M. Hay; auditors, T. J. Dillon and F. A. Lount; council, B. L. Booth, G. C. Brown, H. F. Stoddard, L. C. Raymond, L. B. Duff, W. J. Hickey, J. R. McCollum, T. D. Cowper, A. O. Beatty, R. Cooper, F. N. McConnell, O. H. Garner, J. H. Crow, B. J. McCormick, T. J. Dillon, D. Ross.

At the annual meeting of the Portage Industrial Association Mr. J. F. Walker was elected president, Mr. R. C. Cudbert, first vice-president; Mr. Joseph Trimble, second vice-president; Mr. J. S. Dempsford, secretary. A board of 24 directors was also elected. One of the interesting features of the meeting was the election of Mr. Thomas Wallace to an honorary membership. Mr. Wallace was a charter member of the association when it was organized in 1872, and his name has been on the roll as an officer continuously for the intervening 40 years.

HARBOR COMMISSIONER DISCUSSES BIG PROJECTS

Mr. C. C. Ballantyne Says Big Shipbuilding Plant Will be Established at Montreal.

Speaking in Toronto this week, Mr. C. C. Ballantyne, of the Montreal Harbor Commission, suggested that boards of trade, the harbor boards and the Canadian Manufacturers' Association should organize a Canadian Lloyds. "I would also like to see the Government appoint a Commission of three men," he added, "to study the routes of transportation in Canada and to find out if Vancouver will be the principal port through which our grain exports will pass, in view of the Panama Canal, to learn whether it will be practicable and feasible to ship grain from the west via Hudson's Bay ports, to determine what facilities are required at the ports of the great lakes and to inquire why grain can be carried cheaper from Fort William to Buffalo than from Fort William to Georgian Bay ports."

Big Plant at Montreal

"The Harbor Commissioners of Montreal have made arrangements with the great English firm, Vickers, Limited, to establish a large plant in Montreal. We have been working for some months on the reclamation of thirty acres upon which the Vickers Company will erect a large and modern shipbuilding plant, capable in five years time of building anything from a submarine to a super-dreadnought. This company have got their plant and are ready to handle the work if it is offered to them."

Terminal Facilities Inadequate

Before suggesting the appointment of a Commission to study transportation matters, Mr. Ballantyne said terminal facilities at the head of the lakes and at St. John and Halifax were entirely inadequate. The west was producing two hundred million bushels of wheat and the same quantity of oats. He did not know how such a crop would follow Canadian routes to the markets of the old country unless our facilities for handling it were greatly extended. They could not secure enough boats to get the shipments away from Montreal, and as a result the elevators were choked last year and everything was tied up. It meant that much grain went to the seaboard by way of the United States instead of by Canadian channels.

BANQUE D' HOCHELAGA'S NEW PRESIDENT.

The directors of the Banque d'Hochelaga, at a recent meeting, unanimously elected Mr. J. A. Vaillancourt, president of the bank, and Honorable F. L. Beique, vice-president. Mr. Vaillancourt, as vice-president of the bank, had been directing its affairs since the death of the president, Hon. J. D. Rolland.

The vacancy on the board caused by the death of Mr. Rolland was filled by the election of Mr. A. A. Larocque, managing director of the Sincennes-McNaughton Company, and also an ex-manager of one of the agencies of the bank.

TRADE DISPUTES DURING NOVEMBER.

The general industrial situation showed a marked improvement from the standpoint of labor unrest during the month of November, 1912, both as compared with the preceding month and with the corresponding month of 1911. According to the record of strikes and lockouts maintained in the Department of Labor, the number of working days lost from this cause during November was approximately 68,200, compared with 98,000 during the preceding month and 140,000 during the corresponding month of last year. This was in spite of the fact that a number of disputes showed an increase. At the beginning of November fourteen disputes were in existence, but only one, that of coal miners on Vancouver Island, affected a large number of employees. Of the new disputes of the month, the most serious was that of miners of Porcupine, affecting 1,200 employees, and that of employees in the freight departments of the Canadian Pacific Railway System, affecting about 500 men. Four disputes of the month were among classes falling under the jurisdiction of the Industrial Disputes Investigation Act, compared with two such disputes in the preceding month and five in November, 1911. The number of employees affected by disputes was 3,900 in November, 1912, compared with 4,300 in October, 1912, and 11,936 in November, 1911.

"The man who draws the attention of Western Canada to the value of breeding such cattle as he does is one of the greatest benefactors of the country," said Lieutenant-Governor Campbell at Brandon, referring to Mr. J. D. McGregor, who was entertained by the Board of Trade after capturing with his Brandon bred Aberdeen Angus cattle six championships, six first, and numerous other prizes, constituting the best record made by any herd of any breed at Chicago Stock Show.

GUTTA PERCHA COMPANY RE-ORGANIZED

Corporation Will Have Authorized Capital of Six Millions, and Will Operate Throughout Canada in Its Own Name

The incorporation of the Gutta Percha and Rubber, Limited, with a Dominion charter, marks an important internal reorganization of this company. The authorized capital is \$6,000,000, divided into 60,000 shares of \$100 each. The head office of the company remains at Toronto. By the former organization, the Gutta Percha and Rubber Manufacturing Company of Toronto had its head office in that city, with a branch at Montreal, operating under the same name. The Winnipeg Rubber Company had its headquarters in Winnipeg with a branch at Calgary, and the Vancouver Rubber Company had its headquarters on the Pacific coast. The Gutta Percha and Rubber Manufacturing Company of Toronto controlled the subsidiary companies. By the reorganization the parent company will operate throughout the Dominion in its own name. There will be no securities issued in connection with the reorganization and the control will remain the same.

The Gutta Percha and Rubber Manufacturing Company of Toronto, Limited, is a close corporation, and was incorporated in 1887, with an Ontario charter. The original factory was built in 1883, and business started as a branch of the Gutta Percha and Rubber Manufacturing Company of New York, but since the date of incorporation it has been a purely Canadian organization, with factories at Toronto. The company manufactures mechanical rubber goods, rubber footwear, etc. The directors are as follows:—Messrs. S. T. Warren, Trumbull Warren, C. N. Candee, Toronto; officers: President, S. T. Warren; secretary and general manager, C. N. Candee; treasurer, Trumbull Warren.

GRAND TRUNK PACIFIC GRAIN RATES.

In an effort to prevent blockade and also in an effort to capture more of the grain trade, the Grand Trunk Pacific will establish rates to the Atlantic seaboard for export and to eastern Canada points, via Chicago. These rates are in addition to rates on the Fort William basis to Duluth, Superior, St. Paul and Minneapolis, which have been in effect since last February. These rates carry with them milling in transit privileges and are expected to be of great benefit to the millers in Ontario. The rates to eastern Canada take effect on the 20th of this month and those for export on January 20, 1913. It is reported that the movement of grain over the Grand Trunk Pacific is very heavy, and that with the available storage at the head of the lakes, coupled with the arrangements above noted, it is not anticipated that there will be any difficulty in taking care of the balance of the season's crop.

The capital stock of the Canada Machinery Corporation, Limited, has been decreased from \$3,000,000 to \$1,500,000.

The name of the Walbridge Elevator Company, Limited, has been changed to that of the Walbridge Grain Company, Limited.

The capital stock of Firstbrook Brothers, Limited, has been increased from \$300,000 to \$1,000,000, by the issue of 7,000 shares of new stock of \$100 each.

The Montreal metal and hardware association, of the board of trade, held its annual meeting recently, when Mr. J. Fuller was elected president for the ensuing year. Mr. Fuller is also on the directorate of the recently organized Atlantic Sugar Refineries.

The Baldwin Locomotive Works have delivered to the Grand Trunk Railway 18 locomotives of the Pacific type, with 69-inch wheels. Other equipment received includes one first-class car, two baggage cars and 64 refrigerator cars, 155 box cars and 16 automobile cars.

The Montreal lumber association of the board of trade elected the following officers for 1913 at its annual meeting: president, Mr. Arthur H. Campbell, vice-president, Mr. W. K. Graftey; treasurer, Mr. F. W. Cotter. Directors: Messrs. Geo. Esplin, W. A. Filion, T. J. Rutherford, W. Blair. The newly-elected president, Mr. Arthur H. Campbell, has been chosen as the association's nominee for election to the council of the board of trade. The report of the retiring president, Mr. W. K. Graftey, was approved, and will be published as usual in the annual report of the board of trade.

The annual meeting of the Mennonite Mutual Hail Insurance Company was held recently at Rosthern. The secretary's report was interesting, showing that 121,797 acres were insured this year. The rate charged is only ten cents an acre, and yet at the end of this, the fourth year in the history of the company, there is a reserve fund of \$10,000. During 1912, 107 members suffered losses from hail, the total losses being \$9,100. The report was adopted. Four new directors were elected: Messrs. Abraham Funk, Diedrich Epp, Gerhard J. Andres, and D. P. Rempel. The directors are to meet in Waldheim in January.

BRITISH COLUMBIA'S MUNICIPAL AFFAIRS

Vancouver and Point Grey Proposals—Lumber Industry
—Financial and Manufacturing Interests

(Staff Correspondence).

Vancouver, December 18th.

Large municipal expenditures are planned in Vancouver and surrounding municipalities. This city is preparing for the population which all believe will come this way, and the latest is a gigantic sewer scheme to embrace the whole of Greater Vancouver, and which will take two score years to complete. The ultimate cost of this will be large, and it is proposed to spend one million dollars a year for the first five years in the construction of the big mains. Point Grey has also large expenditure in view for sewers, water purposes, etc., and contemplates going after a million dollars very shortly. Improvements are being made on a large scale, for apart from present development, the future holds out great hopes. It will be in Point Grey that the university will be located, the plans for which have just been accepted by the government.

Lumber Men and Duty.

In view of the lumbering industry on the Pacific coast, representations have been made to the university authorities to establish a course in logging engineering in connection with the institution. This is being strongly urged by Mr. George M. Cornwall, editor of the Timberman, Portland, Oregon, and secretary of the Pacific Logging Congress.

Lumber manufacturers will make another effort to secure a duty on lumber imported into Canada. Not much has been heard of this matter for some time, since conditions in the industry have been very good for the year. Importations from the United States have not been so large during the last few months, following a betterment of conditions south of the border, but large shipments are made into Canada constantly. Lumbermen are sanguine about the future, but would like to see that the market is kept for the benefit of Canadians. It would mean a great thing for mills in British Columbia, principally in the interior where their only market is on the prairies.

The Dominion bank is to open a branch in Fairview, Vancouver, at the corner of Broadway and Granville Street.

The Nanaimo Pressed Brick and Terra Cotta Company has started operations. The officers are: General manager,

L. D. Morris; president, H. Shepherd; secretary-treasurer, Alex. Cunningham; and the directors are Messrs. W. Kidd, F. L. Randall, manager of the Merchants' Bank; J. Dickin-son, J. M. McKenzie, E. Fry.

Prominent Vancouver men are connected with the Science of Saving Corporation, Limited, which is securing a charter in British Columbia. Business for the first six months will be carried on through the Dominion Trust Company.

Mr. Charles Gore, of the Western Dominion Land & Investment Company, Vancouver, returned from England, remarked that speculative propositions should not be offered to the English investor.

VANCOUVER'S FIVE PER CENT. HESITATION

The city of Vancouver is considering whether to make its new loan in London 4 per cent. at 90, or 4½ at 98. The moral of Moose Jaw's success and Lethbridge's failure seems obvious, as both issues yielded 5 per cent., but Lethbridge's debentures were 4½ per cent., whereas Moose Jaw's were 5's.

EDMONTON MAY SELL BONDS LOCALLY

Instead of going to London to raise money with city debentures at four and a half per cent., or perhaps more, Edmonton is being asked by the local manager of the Imperial Bank to market its bonds in Canada, the interest rate being raised to 5 per cent.

Stock of the A. Macdonald Company was dealt in for the first time in the unlisted department of the Toronto Stock Exchange on Thursday. One hundred and fifty shares changed hands at 58, with one block at 58½. It is understood that application will shortly be made to list the stock.

The effect of a by-law passed by the Cobalt town council is to repeal, in part, a previous \$50,000 waterworks and sewerage system by-law. Of the \$50,000 worth of debentures, only \$6,500 were sold, when it was found unnecessary to dispose of the rest. The sanction of legislature will be applied for, for the cancelling of the other \$43,500, as that had to be gained before the previous by-law was passed.

THE BANK OF OTTAWA

THIRTY-EIGHTH ANNUAL MEETING

The thirty-eighth Annual Meeting of the Shareholders of the Bank of Ottawa was held on Wednesday, the 18th day of December, 1912, the President, Mr. David Maclaren, in the chair.

Report of the Directors.

The Directors have pleasure in submitting the Thirty-eighth Annual Report and balance sheet to 30th November last.

Balance at Credit of Profit and Loss Account on 30th November, 1911, was \$118,167.44
Net profits for the year ended 30th November, 1912, after deducting expenses of management, and making necessary provision for interest due to depositors, unearned interest on current loans and for all bad and doubtful debts and contingencies 640,220.43
\$758,387.87

Appropriated as follows:—

Dividend No. 82, Two and three-quarters per cent., paid 1st March, 1912 \$96,250.00
Dividend No. 83, Three per cent., paid 1st June, 1912 105,000.00
Dividend No. 84, Three per cent., paid 3rd September, 1912 105,000.00
Dividend No. 85, Three per cent., payable 2nd December, 1912 113,132.74

Applied in reduction of Bank Premises and Furniture	54,395.49	
Transferred to Officers' Pension Fund	15,000.00	\$488,828.23

Balance carried forward at credit of Profit and Loss Account	\$269,559.64
The Rest Account on 30th November, 1911, was	\$4,000,000.00
To which has been added premium on new stock issued	325,480.00
	<u>\$4,325,480.00</u>

The Directors have to record with great regret, the death during the year of Mr. H. F. McLachlin, who became a member of the Board in 1910. Mr. Russell Blackburn, of Ottawa, was elected to fill the vacancy on the Board.

Since the last Annual Meeting, branches of the Bank have been established at:—

Danforth Avenue, Toronto;	Robson Street, Vancouver;
Englehart, Ont.;	Scarth Street, Regina;
Hintonburg, Ottawa;	St. Isidore, Ont.;
Riceville, Ont.;	Westboro, Ont.

The branches at Ossington Avenue, Toronto, and at Timmins, Ont., have been closed.

Commencing with the quarterly dividend payable at the beginning of June last, your Directors deemed it advisable

to increase the rate of distribution to twelve per cent. per annum, and they trust that the Bank's business may continue to justify the payment of a dividend at this rate.

Under the authority given by by-law on 11th December, 1907, the Directors decided to issue on 3rd September last five thousand shares of new stock at a premium of One hundred per cent. Of this issue 3,578 shares have been subscribed for.

Permanent premises have been secured during the year for the occupation of the branches at Sudbury, Tisdale, Danforth Avenue and Ashdale Avenue, Toronto, and the increased business at Winnipeg has rendered necessary the purchase of a piece of land at the rear of the premises owned by the Bank in that City, and occupied by the branch there since

1893, on which is being erected an extensive addition to the office.

The completion of buildings in progress at the time of the last Annual Meeting accounts largely for the balance of the increase in Bank Premises.

The Head Office and branches have been inspected as usual, and the independent audit alluded to last year has been continued, as will be seen from the certificate furnished by Messrs. Price, Waterhouse & Company at the end of the Balance Sheet.

The officers of the Bank continue to perform their duties to the satisfaction of the Directors.

DAVID MACLAREN,
President.

General Statement of Liabilities and Assets AS ON 30th NOVEMBER 1912.

LIABILITIES

Notes in circulation		\$3,743,395.00	\$33,960,040.00

GEORGE BURN, General Manager.

We have examined the books and accounts of the Bank of Ottawa at its Head Office and at five of its principal Branches, and have been duly furnished with certified returns from the remaining Branches, and with all information and explanations required by us. The Bank's Investments and the Securities and Cash on hand at the Branches visited were verified by us as at the close of business, November 30th, 1912. And we certify that the foregoing General Statement of Liabilities and Assets, as at November 30th, 1912, is in agreement with the books, and in our opinion exhibits a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us.

PRICE, WATERHOUSE & CO.,
Chartered Accountants.

VANCOUVER'S NOVEMBER FIRE LOSS

The fire department responded to 48 alarms during the month of November, divided as follows: Fires inside city limits where damage occurred, 16; smoke scares, 1; fires outside city limits, 2; false alarms, 5; chimney fires, 4; tar pots, 5; rubbish fires and other small fires where no danger occurred, 15. The total loss for the month was \$13,650, while the value of property involved was \$329,575. The insurance paid on the losses was \$9,470, leaving the damage above insurance \$41,180. Ten thousand nine hundred and fifty feet of hose was laid at fires and 1,149 gallons of chemical was used.

Two Chinamen named Chang John and Gar Hoo were suffocated at a fire in a Chinese laundry at 1,623 Second Avenue West, on November 10th, and Chee Ming had his leg broken, caused by jumping from a window at the same fire. Two other citizens received minor injuries at different fires caused by gasoline explosions.

A complete list of alarms where damage occurred follows:—

November 9th—Telephone alarm at 1:30 a.m. Fire in floor at 571 Richards Street, caused by a defective flue. Building owned by Haley & Sutton and occupied by S. R. O'Neil and used as a rooming house. Damage, \$25; covered by insurance.

November 10th—Telephone alarm at 4 a.m. Fire in frame shed in rear of 628 Homer Street, occupied by the Veg Nut O Soap Company, and owned by Mr. Smithson. Cause of fire unknown. Damage, \$175.

November 11th—Verbal alarm at 10:43 a.m. Fire in partition between pool room and barber's shop at 337 Main Street, caused by a stove being set too close to the wall. Building owned by S. White and occupied by S. Javras. Damage, \$25; covered by insurance.

November 13th—Telephone alarm at 12:01 p.m. to 420 Hastings Street West, where a small fire had started in some millinery samples owned by Mr. Scarborough. Damage, \$20. Alarm from Box 26 at 4:05 p.m. Fire in room on second floor at 204 Carrall Street, caused by spontaneous combustion. Building owned by F. Fillion and occupied store rooms above. Damage, \$35; partly covered by insurance.

November 15th—Telephone alarm at 9:15 a.m. Bed clothes on fire in cot at The Creche, 754 Thurlow Street; cause unknown. Damage, \$10.

November 17th—Telephone alarm at 10:30 a.m. to False Creek, between Thurlow and Burrard Streets, where a gasoline explosion had occurred on a launch which was anchored there. Boat owned by S. F. Bayn. Damage, \$123; covered by insurance. Mr. Lortie, who was sleeping in the launch, had his head cut when the explosion occurred. Telephone alarm at 3:10 p.m. Fire in rubbish in room at 510 Granville Street, caused by hot ashes. Building owned by the Merchants Bank and occupied by offices. Damage, \$15; covered by insurance.

November 18th—Telephone alarm at 7:35 p.m. to 1037 Eleventh Avenue East, occupied by S. Belquett. Fire in stairway, caused by coal oil lamp exploding when being carried upstairs. Damage, \$50; covered by insurance. Telephone alarm at 2:45 p.m. Fire in elevator switch-board in basement at the Maple Hotel, 177 Hastings Street East, caused by crossed wires. Damage, \$10.

November 19th—Alarm from Box 416 at 4:05 a.m. Fire in a two-story frame building at 1623-37 Second Avenue West, owned and occupied by Hoo Lung and used as a store and laundry. The whole building was enveloped in flames on arrival of the fire apparatus and both building and contents were destroyed. Damage, \$6,700; partly covered by insurance.

November 24th—Alarm from Box 29 at 3:08 a.m. Fire in small cottage at 156 Beatty lane, caused by carelessness with lighted cigar. Building owned by Charles Scurry and occupied by Miss Rosa Clark. Damage, \$260.

November 25th—Telephone alarm at 11:12 a.m. Fire at 748 Richards Street, owned by Passage and Tonlin and occupied by B. C. Stephens, surgical instruments, and the Passlin furnished rooms on the three top floors. The blaze started in the basement near the rubbish chute from some unknown cause, and ran up the chute to the roof before it was extinguished, the contents of the building being considerably damaged by smoke and water. Damage, about \$5,770; covered by insurance.

November 28th—Telephone alarm at 4:03 p.m. Fire in basement at 827 Cordova Street East; cause unknown. The blaze started in a wood pile and burned part of the floor and joists above. Building owned and occupied by T. J. Bruce and used as a dwelling. Damage, \$5. Alarm from Box 264 at 7:50 p.m. Small fire in parlor at 73 Sixth Avenue East, caused by a defective fire place. Building owned and occupied by A. Sutherland. Damage, \$25; covered by insurance.

November 29th—Alarm from Box 21 at 12:28 a.m. Fire in partition of two-story brick building at 325 Homer Street, caused by defective wiring. Building owned by Cambie and

Richards and occupied by Richards, Ackroyd & Gall, and used as an office building. Damage, \$400; covered by insurance.

Total number alarms, 48; false alarms, 5; chimney fires, 4; value of property involved, \$329,575; loss, \$13,650; insurance paid, \$9,470; loss above insurance, \$4,180; hose laid at fires, 10,950 feet; chemical used, 1,149 gallons.

TRADE WITH WEST INDIES

Speaking of the West Indies trade agreement, the minister of finance, stated at Ottawa, that in order to bring that agreement into effect changes are necessary in the items regarding cocoa beans, limes and lime juice and arrowroot. These changes will be made in the forthcoming budget.

The minister of trade and commerce stated that tenders had been received for the proposed steamship service between Canada and the West Indies, but none of them were satisfactory, as they did not provide for competition or assure sufficient service. Therefore, the time for receiving tenders has been extended till December 15th, and it was hoped that better terms would be secured. The minister also stated that he had discussed the subject of cable rates with the British government and hoped to be able to announce a reduction of rates before the end of the present session. The prevailing rates were the highest in the world.

Explaining the West Indies agreement, Mr. Foster said it provided for a preference between Canada and certain of the West Indies, and this mutual preference was limited to ten years. The West Indies obtained a guarantee of this mutual preference for this period; the duration of the existing preference depended entirely upon the will of the Canadian parliament. In no instance was the 20 per cent. reduction lower than the existing preference.

The agreement applied in the first instance to Trinidad, British Guiana, Barbadoes, St. Lucia, St. Vincent, Antigua, St. Kitts, Dominica, Montserrat. For three years its terms are extended also to the Bahamas, Bermuda, British Honduras, Jamaica, Grenada and Newfoundland.

Mr. Foster added that he understood that it was the intention of the West Indian parties to this agreement to give other British colonies and the Mother Country the same terms as those given Canada.

ONTARIO'S MINERAL PRODUCTION

The total mineral production of Ontario during 1911, according to the annual report of the bureau of mines just issued had a value of \$41,976,797, an increase of 6.7 per cent. compared with the previous year. During the six years to the end of 1911 Ontario's output of minerals increased in value by 87 per cent.

Taken generally, silver and pig iron accounted for most of the enlarged production of metallic products, nickel, copper, iron ore, and gold showing a falling off. The reduction in the output of nickel amounted to \$341,861. The others decreased by a considerably smaller degree.

The increase in non-metallic products, particularly natural gas, was large. Petroleum, lime, mica, calcium carbide and corundum decreased. With the exception of lime building materials were produced in greater quantity and larger value.

The report shows that an increasing proportion of Ontario ores are being refined here. Last year 66 per cent. of the silver production of the province was refined at home. The balance was principally low-grade ore.

In making his report, Mr. T. M. Gibson, deputy minister of mines, comments upon the probable course of prices in the future. The reform of the currency system of China and the substitution of the "tael" for a standard silver dollar was expected, he stated, to be an influence in ensuring a steady demand for silver. Mr. Gibson refers to the statements that the popularity of silver has begun to wane in India, and that the adoption of western methods of finance will mean a diminishing use for silver and the substitution of gold.

The Gresham Life Assurance Society has purchased a three-story building at 302 St. James' Street, Montreal. The building is almost entirely occupied by the Gresham Life Society and the Dominion Gresham Guarantee and Casualty Company.

The 30,000 Canadian Pacific freight clerks, freight handlers, baggage handlers, etc., have won their strike begun two months ago. The board of conciliation created by the government has reported in favor of granting all demands and recommending paying the men full schedule from date of strike. While Canadian Pacific stated several weeks ago they would not be bound by recommendations of any board, it is believed the recommendations will be accepted. The men were members of Canadian Brotherhood of Railway Employees.

AGENTS WANTED

One of the strongest and most reliable Loan Companies in Canada desires to appoint reliable agents in towns and cities throughout Ontario for the sale of its Short Term Debentures. Liberal commission will be paid. Address Box 81, The Monetary Times, Toronto.

PREFERENCE STOCKS

Preference stocks have been neglected to an unusual extent on the stock exchanges during the past few years. The reason of this, no doubt, is to be found in the fact that a large number of the common stocks being dealt in were issued at very low prices and sometimes as a bonus with preferred stock or bonds. This has given rise to a great deal of speculation in common stock, during which the prices have advanced from the low figures, at which the open-

WANTED.—A Manager for an Accident Insurance Company. Applicants must send copies of testimonials to this office. Salary, \$4,000.00 a year to commence. Apply—The Secretary, British Columbia Accident and Employers' Liability Insurance Company, Limited, 433 Seymour Street, Vancouver, B.C.

RE INSURANCE TREATY.—A Fire Insurance Company with Head Office in Montreal, and licensed for Quebec and the Maritime Provinces would like to enter into a reciprocal treaty with a Company (Canadian or American) operating in Western Canada. Re-Insurance ceded to present treaty Company has been most profitable.

Address correspondence to "Insurance" Post Office Box No. 2110, Montreal.

THE INCORPORATED 1875 MERCANTILE FIRE INSURANCE COMPANY

All Policies Guaranteed by the LONDON AND LANCASHIRE FIRE INSURANCE COMPANY OF LIVERPOOL.

ing sales to place, to figures, which are thought by many to be disproportionate to the price at which the preferred issues can be obtained. Trading in these ordinary shares has been going on at times almost to the entire exclusion of the preferred issues, so that the latter are at the present time available at exceedingly low prices, when the security behind the issues and the guaranteed rate of interest is taken into consideration. These statements are made in an interesting booklet on Canadian preferred stocks issued by Messrs. McCuaig Brothers and Company, Montreal.

MERCHANTS' BANK OF CANADA

PROCEEDINGS OF THE FORTY-NINTH ANNUAL MEETING OF SHAREHOLDERS

The forty-ninth annual meeting of shareholders of the Merchants' Bank of Canada took place at the head offices of the Bank on Wednesday, December 18th. Among those present were the following: Sir H. Montagu Allan, Messrs. K. W. Blackwell, Thomas Long, A. Barnett, C. C. Ballantyne, A. J. Dawes, F. Howard Wilson, J. Patterson, Fiske, J. Piddington, D. A. Lewis, R. Campbell-Nelles, W. A. Filion, C. R. Black, T. E. Merrett, A. D. Fraser, Shaw, H. B. Loucks, D. C. Macarow, W. R. Miller, J. M. Kilbourn, and A. Dingwall.

The President of the Bank, Sir H. Montagu Allan, was asked to take the chair, and Mr. J. M. Kilbourn was appointed secretary to the meeting. The notice calling the meeting was read.

The minutes of the last annual meeting were presented and taken as read.

THE DIRECTORS' REPORT.

The President then read the annual report of the Directors as follows:—

"I beg to submit the Annual Report of the Directors and the Profit and Loss and General Statement of the Bank covering operations for the past twelve months.

"On an average paid-up Capital of \$6,498,332, there has been earned the sum of \$1,338,844.62. Adding the balance brought forward from last year, there is \$1,397,722.80 to be disposed of. This has been dealt with as follows:—Dividend of 10% on the paid-up Capital, \$649,004; written off Bank Premises, \$100,000; contributed to the Officers' Pension Fund, \$50,000, and added to Reserve Fund, \$450,000, enabling us to carry forward \$148,718.27 in the Profit and Loss Account. Your Directors consider this a favorable showing.

"Our Reserve Fund this year has been further augmented by the premium on new stock (issued at 175), amounting to \$560,760, bringing it up to \$6,410,760, or a fraction over 95% of the paid-up Capital.

"During the past year we have opened offices at the following points, viz.:—

"In Alberta: Delburne, Alberta Avenue (Edmonton), Hanna, Hughenden, Redcliff, and Walsh; in Saskatchewan: Battleford; in Ontario: Brantford, Guelph, and Walkerville; in Quebec: Centre Street (Montreal) and St. Jovite.

"We have not closed any agencies. All the offices of the Bank have been inspected during the year.

"During the year we have lost two of our esteemed Directors, one by death and one by retirement.—Mr. Charles M. Hays, whose death we greatly deplored and whose loss was national, and, later on in the year, our valued colleague, Mr. Jonathan Hodgson, resigned, on account of advanced age. Mr. Hodgson has served on the Board of this Bank for over thirty-five years, and his advice at the Board's councils was very highly esteemed. During the last ten years he was our Vice-President. We hope Mr. Hodgson, in retirement, may enjoy many years yet of health and happiness.

"These vacancies on the Board have been filled by the appointment of Messrs. Andrew J. Dawes and F. Howard Wilson.

"Your Directors and the General Manager have had under consideration for some time the advisability of asking your permission to change the termination of the financial year from the 30th November to the 30th April, as the general conditions in this country, in the Spring, are not so congested as in the Autumn, when the pressure on the resources of Canadian Banks is at its height. With this end in view, an amendment to the By-Law will be submitted for your consideration, changing the end of the financial year to the 30th April, and changing the date of the Annual Meeting from the third Wednesday in the month of December to the third Wednesday in the month of May.

"The Board of Directors of the Bank has hitherto consisted of nine members, and we have decided to ask you to increase the number to twelve. The necessary change in the By-Law will be submitted to you for your assent.

"Another By-law increasing the amount of the Directors' remuneration to \$25,000 per annum, will also be submitted to you.

"Supplementing this report, I would like to say I visited most of the Western Branches during the past summer, accompanied by the Vice-President and Mr. Long, where we acquired a great deal of additional information bearing upon our business and met a great many of the customers of the Bank and the staff. I may say that the trip was full of instruction, and we returned with a very much better knowledge of and acquaintance with your extensive interests in the West than we have had heretofore. We think we are safe in saying that the business of the Bank is on a sound basis throughout the country. We were impressed with the fact that the Bank is well represented at all points, and that the business is being capably handled.

"We have much pleasure in testifying to the continued excellent work of the staff, in recognition of which, and in view of the satisfactory results of the business for the past year and the strong representations of the General Manager, the Board have decided to depart from the policy hitherto followed and have granted a bonus to the staff.

"All of which is respectfully submitted.

H. MONTAGU ALLAN, President."

STATEMENT OF THE RESULT OF THE BUSINESS OF THE BANK FOR THE YEAR ENDING 30TH NOV., 1912

The Net Profits of the year, after payment of charges rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to.....

\$1,338,844.62

E. F. HEBDEN, General Manager.

It was then moved by the President, Sir H. Montagu Allan, and seconded by the Vice-President, Mr. K. W. Blackwell, that the report of the Directors as submitted, be and is hereby adopted, and ordered to be printed for distribution amongst the shareholders.

In making the motion, the President said:—

"I think you will all agree with me that this is a very satisfactory report. This statement of the result of the Bank's business for the year is better than at any time during the history of the Bank. You all know that no matter who the Board of Directors may be, or how clever they may be, there is very little that can be done by them except through the assistance of the Staff, and I may say that our General Manager has proved himself not only on this occasion but on various other occasions one of the best, and one who has devoted himself entirely to your interests. I have great pleasure in testifying to the energy and zeal of the whole Staff.

"We travelled through the West this Summer, the Vice-President, Mr. Long, and myself. We had an enjoyable trip with beautiful weather. We travelled as comfortably as we could, but we had hard work to do, all the same. We stopped at twenty-one places in twenty-six days, and we went over the business of the Bank in these places and discussed matters with the Managers. We found everywhere that the enthusiasm was tremendous, and that all were profoundly impressed with the prosperity of the country and with the prosperity of the Bank, and that all were entirely devoted to the interests of the Bank, which was a very satisfactory state of affairs, indeed."

GENERAL MANAGER'S ADDRESS.

The General Manager, Mr. E. F. Hebden, then addressed the Shareholders, as follows:—

In reference to the balance sheet, there is very little to be said. Our deposits now stand somewhat below the figure of a year ago; but it will be recalled that at our last annual meeting it was mentioned we had received a little while before closing our books a very large deposit of a temporary character, which was distributed in December and January following; so that when comparing our deposits this year with last, due allowance will be made. The deposit amounted to nearly six millions. We have since recovered, in the ordinary course of business, a great deal of this outgo, and indeed it is surprising that deposits have held so well, in view of the continuous withdrawals of funds for outside investment, much of the latter doubtless of a more or less permanent character, for the very active town-lot agent is abroad in the land.

Our discounting business in the twelve months interval has increased materially, and we have now quite as much as we can properly handle—indeed, the trend will be downward for the present, and we have a good deal in short date loans incidental to the season, which will in due time fall in. Our loaning business is necessarily very much diversified, but it may be a matter of interest to some people to know that there is upwards of \$10,000,000 represented in advances to farmers. This date in the year is inevitably more or less the highwater mark in banking advances in Canada, when the crop has to be moved and converted, and all other business lines are running at high pressure.

It is for this reason that we are asking you to change the date of book-closing and stock-taking to a more convenient and altogether more desirable time, and we find the end of April to fulfil this requirement best of all. A closer survey and scrutiny of our business can then be had, when balances are lower, much of the fall and winter business having run off. Moreover, much inconvenience results from the strain upon the staff—already fully occupied in taking care of the increased business pressure at this time.

I did not visit the West during the past year, but instead went to Great Britain, where I met many of our Old Country business friends and correspondents. My brief sojourn there of twelve days was in every way advantageous.

The staff have kept up to their usual standard of efficiency; they have worked hard, and the board has been so kind as to allow a bonus to be paid to them—a particularly felicitous and welcome gift, considering the season. While there may be some sentiment involved, I view the giving of a bonus, where justified, as sound economic policy. The board has also given the usual handsome subscription of \$50,000 to the Officers' Pension Fund. Speaking for the staff I thank you, and the board for the continued very kind interest evidenced.

The following by-laws were then taken up and considered and the amendments passed unanimously:—

By-law No. I. That the Annual General Meeting should be held on the third Wednesday in the month of May in every year.

By-law No. III. Increasing the number of directors to twelve.

By-law No. VI. Providing for the remuneration of the directors.

Messrs. A. Piddington and J. Patterson were appointed scrutineers, and one ballot was cast electing the following directors:—

Sir H. Montagu Allan,
K. W. Blackwell,
Thomas Long,

Alex. Barnet,
F. Orr Lewis,
Andrew A. Allan,

C. C. Ballantyne,
Andrew J. Dawes,
F. Howard Wilson,

George L. Cains,
Farquhar Robertson,
A. B. Evans.

On motion of Mr. C. R. Black, seconded by Mr. A. Piddington, a hearty vote of thanks was passed to the President, Vice-President and Board of Directors.

It was also moved and seconded by the same gentleman that an expression of warm appreciation of their services be tendered the General Manager and the staff. Passed unanimously.

The President then declared the meeting closed.

At a subsequent meeting of Directors, which followed immediately after, Sir H. Montagu Allan and Mr. K. W. Blackwell were re-elected President and Vice-President respectively.

DIVIDENDS AND NOTICES

DIVIDEND NOTICE.

THE IMPERIAL TRUSTS COMPANY OF CANADA.

NEW DIRECTOR OF THE MOLSONS BANK

Monetary Times Office,
Montreal, December 18th.

The vacancy created on the board of directors of The Molsons Bank through the resignation of Mr. Charles B. Gordon, who was recently elected to a vacancy on the board of the Bank of Montreal, has been filled by the election of Mr. W. A. Black, vice-president and managing director of the Ogilvie Flour Mills Company.

Mr. Black has now been a citizen of the city of Montreal for a year or so, having come to the city possibly in 1911, when he was promoted to the position of general manager. Previous to this he had been for many years in the city of Winnipeg whither he went about the year 1882, taking a position in the traffic department of the Canadian Pacific Railway, which was then just commencing to open its business in the West. He had previously had some experience with the Grand Trunk Railway, having commenced his business career with that company in the city of Montreal, back in the year 1879 and continuing with the company some three years before going west.

In the year 1884 he took a position with what is now the Ogilvie Flour Mills Company, but which at that time was known by the personal name of the owner or owners, since passed away. Three years later he became secretary of the company, succeeding, probably, to the position previously held by Mr. F. W. Thompson, whom he has followed up step by step until he has reached the highest position in the gift of the company. In 1902 he became general manager of the western division, and in 1910 became a director of the company. In 1911 he became general manager, and in May, 1912, succeeded to the position now held by him.

KINGSTON'S FIRE LOSSES

The department has received and answered 100 calls. This is the largest number answered in any one year, and it is 11 more than for 1911, is a statement in the annual report of Fire Chief Armstrong. The loss and insurance has been as follows: Loss on buildings, \$7,184.83; loss on contents, \$32,745.20; total loss, \$39,930.03; insurance on buildings, \$146,000; insurance on contents, \$106,000; insurance on buildings and contents not divided, \$903,000; total insurance, \$1,155,550.

Aside from chimneys, rubbish heaps, grass fires, etc., there were 41 actual fires, entailing loss as follows: Twenty-four fires where loss was less than \$50; 4 between \$50 and \$100; 6 between \$100 and \$500; 2 between \$500 and \$1,000; 2 between \$1,000 and \$1,500; 1 between \$1,500 and \$2,000; 1 between \$2,000 and \$3,000; 1 over \$3,000. One fire extended beyond the building in which it started (before the department arrived) two fires extended into the next house (buildings in both cases being semi-detached); eight fires extended beyond room, and thirty were confined to the room in which they started. No unnecessary damage was caused by water.

Owing to the high cost of horse keep during this year there is a deficit of \$182.50; of this amount \$38.98 can be transferred from salary account, and I would ask that the Finance Committee be requested to report funds for the payment of the balance.

The by-law to borrow \$1,400,000 to construct a sewer system was defeated by the ratepayers of Prince Rupert, B.C.

CORPORATION AND MUNICIPAL BONDS

Lethbridge and Moose Jaw Flotations in London—
Montreal Tramways Issue Sold

Cable messages from London state that the public have taken 25 per cent. and underwriters 75 per cent. of the city of issue of Lethbridge £128,100 four and a half per cent. debentures, issued at 92.

The Moose Jaw issue of £257,500 five per cent. debentures at 98, issued by the Bank of Montreal, have been fully subscribed by the public. These latter, and the recent Saskatoon issue, are the only new Canadian loans to be completely satisfactory. The result proves that the English investor insists on a clear five per cent.

Higher Interest Rate

The finance committee will recommend to the Regina Council that the rate of interest on all municipal debentures be raised from 4½ to 5 per cent. This decision was arrived at when the preparation of the different by-laws and expenditures, which will amount to almost three millions, was under discussion at a recent meeting.

Ald. Andros favored the appointment of a bank as the city's financial agents. The mayor declared that it would not pay. Saskatoon had sold their bonds for 99½ through financial agents, and therefore got in reality only about 97. If Regina under her present system sold her bonds in the open market for 99½ she would receive 99½. He said that firms and banks were keen on being appointed financial agents, but that the scheme did not pay the city adopting it.

With regard to raising the funds for next year's programme, a reference to the City Act showed that they had four years within which to sell their bonds, and that they did not have to sell them all at once.

The finance committee will therefore recommend to council that the whole programme be adopted and that the method of selling bonds be left to the council of 1913.

These Remain Unsold

The \$31,000 5 per cent. 20-year, and \$15,000 5 per cent. 30-year electric light debentures of Outlook, Sask., have not yet been sold.

For the \$32,368.63 4½ per cent. 20-year cement walks debentures of Barton Township, Ontario, six offers were received from Toronto bond houses. The award was made to Messrs. A. E. Ames & Company, as previously noted.

Two bids were made for the \$2,000 8 per cent. permanent improvement debentures of Birch Hills, Sask. As previously noted, the offer of Messrs. W. L. McKinnon and Company, Toronto, was accepted.

Six Toronto bond firms bid for the \$12,498 5 per cent. 20-year sewer debentures of Sandwich, Ontario. The offer of

the Dominion Securities Corporation was accepted, as previously noted.

Messrs. N. W. Harris & Company announce that the \$890,000 Montreal Tramways Company first and refunding mortgage 5 per cent. bonds recently offered to the public have all been sold.

The Quebec Bond Company, with head office in Montreal, has opened an office in Toronto. The local office is located in the Union Bank Building, and will be under the management of Mr. J. W. Gilmour, formerly of the firm of A. E. Ames and Company. Mr. J. N. Greenshields, K.C., is president of the Quebec Bond Company, and Mr. C. R. Whitehead is vice-president.

DEBENTURES AWARDED

Amherstburg, Ont.—\$10,000 5 per cent. 10 instalments to Dominion Securities Corporation, Toronto.

Birch Hills, Sask.—\$2,000 8 per cent. 15-years, to Messrs. W. T. McKinnon and Company, Toronto.

Brampton, Ont.—\$43,000 5½ per cent. 20 instalments, to Messrs. W. A. Mackenzie and Company, Toronto.

Stratford, Ont.—\$10,000 4½ per cent. 20 instalments (guaranteed), to Messrs. G. A. Stimson and Company Toronto.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates as follows:—

CANADA'S BALANCE SHEET

January 1st, 1913

FAVOURABLE

Good Crops.
General Prosperity.
Large Immigration.
Few Labor Strikes.
Crop Acreage Greater.
Record Savings Deposits.
Increased Bank Clearings.
Record Railroad Earnings.
More Building Construction.
Much Railroad Construction.
Big Engineering Enterprises.
Excellent Industrial Conditions.
Mineral Production Maintained.
Largest Total Trade on Record.
Large Life Insurance Premiums.
Decreasing Commercial Failures.
Improvement in Export Position.
Large Waterpower Developments.
Progress of Good Roads Movement.
Reorganization of Industrial Mergers.
Better Domestic Investment Demand.
Heavy British and Foreign Investments.
Movement for Better Standard of Citizenship.
Growth of Home Market's Purchasing Power.
Busy Rail Mills, Car and Locomotive Foundries.
Less Tendency to Combination and "Water."

ADVERSE

Tight Money.
Lack of Labor.
Tariff Uncertainty.
Heavy Fire Losses.
Rural Depopulation.
High Cost of Living.
Insufficient Respect for Human Life.
Foolish Suburban Real Estate Purchases.
Price Gap Between Producer and Consumer.

THE PRICE GAP

Every section of Canada which devotes part of its time, energy and capital to agriculture has been troubled with the problem of low prices for their products, knowing that the ultimate consumer has paid high prices. The Ontario story of the grower who received 75 cents for a barrel of apples for which the consumer in Manitoba paid \$5.75 is an instance typical of hundreds more or less striking. Mr. B. F. Yoakum, a leading railroad president of the United States, has given some interesting figures, which show that the same problem prevails in that country. The products of all the farms in the neighboring Republic last year were worth more than \$8,000,000,000 at the farm. Less than one-third stayed on the farms. The farmers therefore marketed products for which they received \$6,000,000,000. The public paid for them more than \$13,000,000,000. It cost, therefore, \$7,000,000,000 to distribute \$6,000,000,000 worth of farm products. Mr. Yoakum cites the case of an Oklahoma grower of water melons, who got 5 cents each for melons shipped by the carload. The local buyer got 30 cents, the railroad 7½ cents, and the retailer 30 cents.

An investigation of food prices in New York made by the railroad president some time ago showed interesting results. The total bill for one year for eggs, coffee, rice, cabbages, onions, milk, potatoes, meat and poultry was \$464,147,000. The farmer received \$274,289,000, or 59 per cent.; the railroads received \$25,045,000, or about 5½ per cent.; and cost of selling and profits on the products was \$164,813,000, or 35½ per cent.

The following shows a few of the important items of daily food, what the farmers received, and what the consumer finally paid:—

	Farmers rec.	People paid.
Eggs	\$17,238,000	\$28,730,000
Cabbages	1,825,000	9,125,000
Milk	22,912,000	48,880,000
Potatoes	8,437,000	60,000,000

There is no uniformity about these figures. One of the most notable facts in every investigation is that there is no scale of profits, nor anything approximating a uniform scale.

In August there was published the digest of a report by an independent committee acting under authority of the State of New York. A single sentence states that, if wholesale handling of food products in New York were in hands of a powerful commercial agency, the present wholesale plant would, with two exceptions, be thrown into the scrap heap.

The annual food supply is estimated to cost \$350,000,000 at city terminals, with freight charges paid. The consumer is reckoned to pay \$500,000,000. The difference is made up mostly of cost of handling, not of profits. The average small dealer, the corner grocer, does not make more than a bare living. The simple inauguration of a fairly scientific method of marketing would save at least \$60,000,000 a year in New York City, or about one-fifth of total the producer receives.

Assuming New York is a fair average, about 12 per cent. of total the consumer pays, makes up for pure waste in marketing. That would be approximately \$1,560,000,000 out of the \$13,000,000,000.

It is reckoned, by this committee, that a simple organization of large unit retail stores could carry on distribution of all this produce, including deliveries, at not to exceed 20 per cent. of original cost. On this estimate there is a legitimate expense of \$1,200,000,000 for distribution of farm food products of 1911. A rough approximation of distribution of the \$13,000,000,000 paid for products of the farms in 1911 would now be as follows:—

	Amount.	Per cent.
Received by farmers.....	\$ 6,000,000,000	46.1
Received by railroads	495,000,000	3.8

	Amount.	Per cent.
Legitimate expense of selling	1,200,000,000	9.2
Waste in selling	1,560,000,000	12.0
Dealers' and retailers' profits..	3,745,000,000	28.9
Total paid by public	13,000,000,000	100.0

In these figures is the basis for great reform. We can lay the foundations for future prosperity, and by neglecting the clear lessons can undermine that prosperity. As Mr. Yoakum says, the making of the nation lies in care of their food supplies.

The tendency during recent years has been to widen the gap between the producer and the consumer. This has had a serious effect in advancing the already high cost of living.

The gap has become so wide that in the coming years strenuous efforts will be made to lessen it. Too many individuals handle the necessities of life in their journey from the producer to the consumer. Canadian farmers are already showing their appreciation of the situation by combining as associations, and their operation has proved successful.

Our farmers are well posted on prices. A division of the Canadian Agricultural Department, called the "Extension of Markets" division, covers inspection of cargoes and supervision of refrigeration and many other details. It also includes a system of compiling records of wholesale prices in all markets of Canada, Europe and the United States day by day. It furnishes Canadian shippers and farmers full information on outside markets and prices.

Someone other than the farmer is taking the cream of the farmers' profits. The skim milk of low selling prices and high buying prices is divided between the grower and the ultimate consumer. These two have a good case against Someone.

LA BANQUE INTERNATIONALE

In response to an inquiry of *The Monetary Times* respecting the charges against officials of La Banque Internationale, Judge Leet said:—

"The only reply I can make now is that the matter is under advisement, and at the moment I cannot say how soon judgment will be rendered."

That was on November 20th. To-day is December 28th.

SMALL CHANGE

Is it not time that the wash sales of real estate ceased?

* * * *

Next week we shall meet last year's New Year resolutions again.

* * * *

The first joke of Mayor Hocken, Toronto, was taken seriously—a bad start for the New Year.

* * * *

How many Canadians will forsake their present occupations to man the suggested Canadian navy?

* * * *

A new parcels post system will operate in the United States on January 1st, 1913. Canada is still thinking about it.

* * * *

The new system of lights over the quotation boards of the Montreal Stock Exchange is installed. Now we want a few more figures on the boards.

* * * *

British Ambassador Bryce, says our defeated reciprocity agreement was, "merely like the case of two merchants, both friends, one of whom makes an offer to sell something at a certain price which the other declined, because he does not conceive the bargain to be for his interest." And the Canadian merchant was twins.

CANADA'S NEW BANK ACT EXPLAINED

Minister of Finance White Discusses the Proposed Revision—How the Central Gold Reserve will be Operated.

The following is a verbatim report of the explanation given by the Minister of Finance of the new Bank Act and of the questions asked by various members and answered by Mr. White. The bill was read a first time before the House adjourned for Christmas. The resolution introduced by Mr. White was as follows: "Resolved that it is expedient to revise the laws relating to banking, to continue until July 1, 1923, the charters of the several banks to which the provisions of the Bank Act apply, and to authorize the payment out of the consolidated revenue fund of remuneration to auditors for special examinations of the affairs or business of banks which the Minister of Finance may require to be made."

Mr. White Said: The resolution itself refers to one of the provisions of the new Act under which an external audit by auditors appointed by the shareholders of the bank at its annual general meeting, is provided for. At present there is no system of inspection or audit of the chartered banks of Canada except the inspection carried on by the various banks themselves, which serves the very useful purpose of informing the directors as to the conduct of the business of the banks at their several branches, as well as constituting a very effectual check upon the head office. Under the present Act, authority is granted to the Minister of Finance to ask for a return or statement from the banks pertaining to anything regarding their affairs in connection with which it may be desired to make an inquiry, but there is no machinery provided whereby he may verify the information obtained, in other words, he must rely solely upon the statements made by the banks.

It occurred to me that in the revision of the new Bank Act it would be wise to insert a provision enabling the minister, in the event of his having any reason to suspect the correctness of a return made by a bank, to have that return verified by an independent officer. The officer I have fixed upon for this duty is the auditor appointed by the shareholders, who are the proprietors of the bank. The auditor, of course, occupies an independent position, and I therefore think that such an officer is the proper one to make to the minister any report, under the system of external audit which I propose, upon any matter concerning the affairs of the bank in regard to which any information is desired.

Let us take a concrete case, and suppose the monthly return of a bank discloses something that does not appear to be satisfactory to the minister, or requires further explanation. He would in the first instance, call upon the bank for further explanation, but in the event of this being unsatisfactory, he could call upon the auditor, who is independent of the bank or its officials, and ask him to make a report in the matter. I have considered it desirable that any special services rendered by the auditor should be paid for by the government, so that the auditor would feel a direct responsibility to the government for any report made by him upon the direction of the minister. As that, therefore, would constitute a charge upon the Consolidated Revenue fund of the Dominion, it is necessary for me to proceed, with respect to this comparatively minor revision of the Bank Act, by way of resolution. As I stated, after the Committee approves, if they do approve of this resolution, I shall present as briefly as possible a statement as to the leading changes which I propose in the new Act.

Mr. German: Will there be a separate auditor for each and every bank, appointed by the shareholders, so that if the hon. minister wants a special report from any particular bank he will obtain it from the auditor appointed by the shareholders of that bank?

Mr. White: My hon. friend has correctly understood me. The provision in the new Act is to the effect that the shareholders of each bank, at its annual general meeting, shall appoint an auditor or auditors.

Mr. German: They do that now, do they not?

Mr. White: No; two or three of the banks do, but all of the banks do not. My predecessor, Hon. Mr. Fielding, when presenting his revision of the Bank Act in 1911, made permissible the external audit which I have in view. His Act provides that the shareholders may appoint auditors for the purpose of auditing books, vouchers, accounts and securities of the bank, and certifying to the shareholders at the annual general meeting that the balance sheet presented for their consideration exhibited a true and correct statement of the affairs of the bank. I have gone a step further, and while I cannot, of course, speak for my predecessor, I am inclined to think that if he were introducing the bill at this stage he would take the same course. I believe the plan outlined follows the English system—a system applied to the great banks of England—and it is the same system, in substance, adopted in the several provinces with regard to the audit of financial and other companies.

Mr. Maclean (Halifax): Is this inspection imperative or optional under the English Act?

Mr. White: I think it is imperative; at any rate we are making it imperative in this case. With further reference to

the question of the hon. member for Welland (Mr. German), there will be an auditor or auditors for each of the banks, and the government, in the event of its desiring an inquiry as to any particular matter relating to the affairs of any bank, may ask the auditor to make a special report to the minister in regard to the matter.

Mr. Pardee: The auditor appointed by the bank makes the report to the minister?

Mr. White: The auditor appointed by the shareholders of the bank will make the report to the minister. I thought this was a more desirable plan than that of calling in a special outside auditor or accountant to look into a matter which probably would not require any extensive explanation—which on the face of it might give rise to the necessity for inquiry, and yet upon investigation might turn out to be of trifling importance. It is desirable that the auditor appointed by the shareholders, who would be familiar with the affairs of the bank, and who as I have said, occupies an entirely independent position, should make this special report to the government.

Mr. Carvell: Would this auditor have the right to enter into an investigation of the affairs of any particular account or any particular asset, or would it simply be an audit of the bank's books?

Mr. White: Does my hon. friend mean in so far as the minister may direct him to make inquiry?

Mr. Carvell: Yes.

Mr. White: It would not be necessary to look into an account, and I did not have that in mind. But if on return of the bank being made, or if, for example, notice is given to the government, as it has been in the past, in the case of the failure of banks, that a certain state of facts exists, I think it very advisable and necessary that the minister should be able to refer the matter to the auditor, and ask him for a special report. I do not understand that it would at all relate to or give the minister or the government information with regard to particular accounts. I think that would be highly undesirable, and that the government, in these circumstances, would not require such information; nor do I believe that the clauses would go quite as far as that.

Mr. Carvell: I am afraid that unless the minister goes to that extent it will not amount to very much, because, unfortunately, a number of banks have gone to pieces in the eastern part of Canada within my recollection, and I have found that they have gone to pieces because of the existence of a few accounts that ought not to have existed. Therefore, unless you can go into particular accounts or assets, if you choose to call them so, I do not see what advantage there would be in an audit.

Mr. White: I am afraid we are speaking at cross purposes. What I had in mind was that, of course, the banks have the accounts of thousands of commercial houses, and I thought probably my friend feared that in the course of the administration of this Act, and especially having regard to the provision now under consideration, that matters relating to ordinary accounts might be asked for. Without question, if any suspicion of fraud were thrown upon accounts it would be open to the government to ask the auditor to make a special report, for this reason, that the auditor, before he can certify that the balance sheet represents a true and correct statement of the affairs of the bank, would have to check over the accounts and conduct a running audit, and if there was anything in the course of his duties that would suggest that any fraud was being practised on the bank or assets carried in such a way as to constitute a fraud, so far as the statement is concerned, I think unquestionably, apart from the inquiry of the minister, it would be his duty to call the attention of the directors, and if necessary, of the shareholders, to that. What I had in mind was in regard to ordinary accounts, about which no question of fraud is involved, that my hon. friend desired to know whether the government would ask the auditor to investigate any accounts of that kind. I would say that if the question of the bank's solvency or of any impropriety is involved, then it should be done without question, because then his investigation would be absolutely pertinent and in that case the minister would be justified in asking the auditor to make a report in regard to whatever had been brought to his attention.

Mr. Emmerson: Has the minister considered this feature, that while, nominally, the auditor appointed would be the appointee of the shareholders, yet in reality and practically he would be the appointee of the directors because of the fact that the directors have the controlling interest usually; they control the stock in the election of officers.

Mr. White: That feature has been brought to my attention and I have given it consideration. I do not regard that as at all universally true, and so far as my own observation has gone, the moral effect upon a staff, upon the officers of an institution, of the appointment of outside auditors is very great. I do not doubt its extreme value to all institutions.

I would say that the shareholders of all industrial institutions in Canada, railways and banks, and others, should take a greater interest in the affairs of their several institutions than they do. My own view is that the shareholders of a bank should particularly take an interest in the affairs of their institution, and should particularly at their shareholders' meetings be careful to appoint a proper auditor, because in the case of banks there is not only the value of shares held by the shareholders, but there is also the question of the double liability, and I am, therefore, of the opinion that the shareholders of a bank will be careful to see that a firm of reputable outside external auditors is appointed for the purpose of the audit I have in mind, and, in addition to that, I am inclined to the view that public opinion will be very weighty in bringing about the appointment of firms of high standing in connection with the audits of our chartered banks under the Act which I am about to bring in.

Resolution reported, read the first and the second time, and agreed to.

Mr. White (Leeds) thereupon moved for leave to introduce Bill (No. 36) respecting Banks and Banking. He said: As I have said, my apology for introducing the Act is to meet the request of members who desire copies of it. The copies will be available this afternoon or at latest to-morrow. As to the Bill itself, the discussion should, of course, properly take place after the second reading, but with the consent of the House and as concisely as possible, I desire to indicate the chief changes which have been made in the existing Act. As the House is aware, under chapter 29 of the Revised Statutes of Canada, the charters of the existing banks would have expired on July 1, 1911. By two Acts of 1911 and 1912 respectively, those charters and the corporate powers of the banks were extended for one year in each case, thus preserving the existence of the banks until July 1 of next year. It is usual in connection with these revisions of the existing bank regulations to extend the term for ten years, and following that practice, the present Act extends the charters of the several banks and their corporate powers until July 1, 1923. I shall indicate very briefly some of the leading changes which have been introduced into the new Act.

Additional safeguards have been thrown about the organization of banks with a view to the protection of the subscribers between the period of the incorporation of the bank and the issue of the certificate of the treasury board. No expenditure may be made by the provisional directors, or by the board of directors, unless of a very trifling and necessary character, until the application is made to the treasury board; and the certificate of the treasury board may not issue until the treasury board is satisfied that all the expenses, in connection with commissions and other matters of a similar kind, are reasonable. In the event of the certificate of the treasury board not being obtained in several years, if the bank is not successfully launched, then any of the moneys in the hands of the directors or provisional directors, as the case may be, cannot be paid out for commission or for other heavy expenses, unless with the consent of the subscribers obtained at a meeting specially called for the purpose, or upon the order of the court.

Now, I have explained to the House, and I will refer to it again very briefly, the principle which I have adopted with regard to an external audit. Let me repeat that in this we have followed the provisions of the English law with regard to the audit of the great joint stock companies. I believe that the system has been found very satisfactory in Great Britain, and I incline to the view that it will provide a very effectual safeguard against occurrences such as we have had unhappily in the recent banking history of Canada. I refer more particularly to the Ontario Bank, to the Sovereign Bank and to the Farmers Bank. I believe that a proper system of external audit, such as we have in view under this Act, would have prevented the failure of those institutions, or would, in the case of one of them, have detected the frauds by which that bank was wrecked. It will not be necessary for me at this stage to say anything more as to that feature.

Then, in connection with the annual statement which is to be presented by directors to the shareholders of banks, I may say that the present form, the form which appears in the present Bank Act, has really been part of our legislation for some six years, and has been greatly outgrown, in fact so much outgrown, that many banks have themselves elaborated it in their annual reports to the shareholders. We have still further elaborated it, and provided for giving the shareholders information, in some respects, which the present Act has not provided for. I may make the same remark with regard to the monthly return which is made to the Department of Finance. That has been elaborated, and further particulars are called for, the idea in both cases being to present to the shareholders and to the government, respectively, a particularized, detailed statement of the assets and liabilities of the bank, properly grouped, and showing as fairly as can be, the position of the bank. As I have said, in the case of the annual statement presented to the shareholders, that will have attached the certificate of the auditor or auditors, who will certify that they have examined the books, accounts, vouchers, securities, and cash of the institution in question, and that the balance sheet presented to the shareholders exhibits a correct view of the affairs of the bank at the date at which it is given.

There is another matter which the bill introduced by my predecessor dealt with. That matter is the question of the penalty attaching to directors, officers, and auditors for false and deceptive statements made either to shareholders or to the government or, in fact, to any person. Under the existing law it is practically necessary to prove intent. There is no criminal liability for negligence on the part of the officers or directors of a bank. I have given a good deal of thought and attention to that, and it appears to me that there should be a provision in the Bank Act whereby a director, or officer, who is guilty of negligence, should be subject to indictment. Under the present state of the law, it has practically to be shown that a director, or a president, no matter how negligent he may have been, had had guilty knowledge before he can be indicted. I think that is the effect of the decision. I have introduced a provision into the new Act whereby, in addition to the penalties imposed by the existing Act for wilful misrepresentation or deception, or falsification, directors and officers and auditors will be liable to indictment and punishment for negligently preparing or making false and deceptive statements.

There is another provision in the new Act to which I desire briefly to call attention. It relates to the circulation of the banks. As the House is aware, under the present Act, the banks of Canada are permitted to issue their notes to the amount of their unimpaired paid-up capital. There is also a provision in the existing Act whereby, during what is called the crop moving period, from the first of September until the end of February, the banks are permitted, upon payment of 5 per cent. for the privilege, to issue additional circulation to the amount of 15 per cent. of their unimpaired paid up capital in reserve. These payments I am reserving to the banks, but, in addition, we propose to give the banks the right to issue note circulation against gold. At the present time the banks may deposit gold with the officers of the receiver-general and receive Dominion notes, five dollar notes, or notes of a larger denomination in exchange for it. The gold is, of course, deposited as security, and as a guarantee for the redemption of the Dominion notes so issued. The banks, therefore, in addition to their authorized circulation, circulate large amounts of Dominion note circulation, secured in the manner I have indicated. During last fall the Dominion issued, I think, over \$10,000,000 of the new five dollar notes. The banks obtain those, and circulate them in addition to their own note circulation. The expense of printing those notes is, of course, on the Dominion, and the expense of holding the gold, which is deposited before those notes are issued, also falls upon the Dominion.

I may say for the information of the House that the Bank of England has an issue department from which its notes are issued against gold. The Bank of Scotland, similarly, in addition to its ordinary powers of note circulation, is permitted to issue notes against gold in its own possession. We desire to give the banks here the power of issuing bank note circulation against gold, and in order to bring that about I have provided in the new Bank Act for the establishment of what we call a central gold reserve. In that central gold reserve may be held such amounts of gold as each of the banks may care to deposit. A bank may deposit, let us say, \$5,000,000 of gold, and it may issue notes against \$1,000,000, \$2,000,000, \$3,000,000, \$4,000,000, or \$5,000,000. It may issue notes against the whole of the gold reserve, but it must not issue its notes in excess of the amount of gold held for it in the central gold reserve. If at any time the amount of gold held for it in the central gold reserve exceeds the amount of its note circulation issued in respect of that gold, then the surplus in the central gold reserve would belong to the bank and must be returned in its report to the government. That gold reserve is to be held by four trustees. They are to be appointed, three of them by the Canadian Bankers' Association, and one by the government. I have inserted a provision that the amount of gold so held in the central gold reserve is to be reported on at least twice a year by the officers of the finance department; in other words there is a provision for the inspection of the central gold reserve on the part of the government.

The custody of that gold and the conditions under which it is to be held, are to be determined upon in accordance with the by-laws of the Canadian Bankers' Association, which by-laws have to be approved by the treasury board. The result will be that in some central place—Montreal, I would imagine, would be a proper place—the banks will be able to deposit gold, and, up to the amount of the respective deposits of each, notes may be issued in excess of the circulation authorized by the existing Act. I should point out to the House that there is no profit to the banks in the issue of their notes against gold deposited as there is in the case of the issue of notes against their own credit, because the gold could be used, not so conveniently, of course, but could be used instead of the notes, or, in the alternative, the banks could deposit the gold, get Dominion notes and issue circulation in that way.

Mr. Maclean (Halifax): Will this fund have any special designation?

Mr. White: No, there is no provision for any special designation. The same check will be applied to the note circulation of a bank when the gold reserve is established as obtains to-day; that is to say, reports must be made not only to the government, but to the Canadian Bankers' Association, and there will be the same check precisely upon the note circulation of the banks as exists to-day. The Act has been enlarged only

to the extent I have indicated, namely, up to the amount of gold held in the central gold reserve for the banks. This matter has been given very careful and weighty consideration on behalf of the government.

I believe that, as a result, in time Canada will be known as one of the great gold countries in the world, and that this reserve of gold will be built up to the great advantage of Canadian credit and prestige. The policy is one which is adopted in European countries. As I have indicated, the Bank of England has its issue department and its notes are issued against gold. In the same way, to a limited extent, the Bank of Scotland issues notes, and in the same way, upon the continent, notes of the banks are issued against gold or gold reserves, the result being that many of these countries have accumulated very large reserves of gold which are immediately available for the redemption of note circulation by the banks which have issued it.

Mr. Maclean (Halifax): Will the government make any charge for the issue against gold?

Mr. White: No, the government will make no charge for this issue against gold. The government very properly makes a charge for the additional note circulation which the banks at the present time are privileged to make during the crop moving season because they issue as against their credit, but, if gold is deposited, it is perfectly obvious that the bank makes no money upon that note circulation; in fact, the banks would be money in pocket if they deposited the gold and used Dominion notes, because in that case the Dominion has to bear the expense of engraving, whereas, under a provision of the new Act, the banks, in so far as they avail themselves of the privilege of issuing notes against gold, will be obliged to bear the cost of engraving those notes.

Mr. Maclean (Halifax): That is quite clear, but I thought there might be some costs incurred in the keeping of the gold and in the administration, which would mean some little expense to the government.

Mr. White (Leeds): I did not understand that that was the question, but I may say here that the entire cost of the administration of the central reserve is to be borne by the banks. I have under consideration and will probably introduce a bill later whereby the banks, continuing to use as they do the office of the receiver-general for the purpose of depositing gold for the issue of the large legal tender notes, whereby they make their clearances from day to day, will be obliged to pay a reasonable amount for the service thus rendered by the Government. For the information of the House it may not be out of place to state that we hold now a very large amount of gold—I think \$70,000,000 or \$80,000,000—in the office of the receiver-general for which large legal tenders are issued. The banks use those large legal tenders for the purpose of making their clearances from day to day amongst themselves. But, in addition to that, there is no doubt that the custom has grown up by which the banks make use of the office of receiver-general for the purpose of conveniently storing their gold. The point I am making is that if the banks continue this practice, it is only reasonable that they should contribute a certain amount, which may be regarded as fair, to the government for the service which it renders them in the storing of gold.

Mr. Maclean (Halifax): How much of an increased circulation will this give the banks if they avail themselves of the privilege up to the full extent of the gold deposited in the central reserve?

Mr. White (Leeds): It is impossible to state that for this reason: The Bank Act does not make it compulsory upon the banks to carry any specified amount of gold as part of their assets. The result is that some of them carry more, we will say, proportionately, than others, and the amount fluctuates and varies from time to time, from day to day. This Bill will enable the banks, as I have stated, to deposit, let us say, \$5,000,000, and to practically allow it to remain there. That is what I hope will be the result of the bill. Up to that amount the banks may issue their notes in accordance with their requirements, but not exceeding that amount. As to the extent to which the provisions of the bill in this regard will be availed of, I am unable to state. I believe that most of the banks will deposit gold, and issue notes against it. I am inclined to think at the outset that the bank note circulation may not be greatly enlarged, but I believe that over a course of time it will be very considerably enlarged, and that the banks will be enabled in this way to more adequately meet the currency circulation requirements of the country.

Mr. Nesbitt: Might I ask what check the department would have over the issue of the notes and the return of them?

Mr. White: The same check that exists at present. Statements must be made by the officers of the bank under the existing Act as to the amount of circulation outstanding. A similar report is made, I believe, to the Canadian Banking Association, which has the duty of supervising the note issue.

Mr. Nesbitt: But you have no supervision? You have to take their statement?

Mr. White: That is true, but, so far as I know, there has been no abuse of the note issuing powers of the banks; and with the Canadian Banking Association having the matter under its supervision, with the present provisions in the Bank Act and the penalties therein provided for false statements, and the experience of the past, I think no question is likely to arise as to over-issues. The point I am making is this, that

under the new Act, the same evidence will be obtained as at present, as to the note issues of the banks from time to time.

Mr. Nesbitt: Might I ask if it is the intention of the hon. minister to send the bill to the banking and commerce committee after it has passed the various stages?

Mr. White: It is the intention that this bill should go to the banking and commerce committee. I understand how important a piece of legislation this is, and how complex a matter our banking system is; and I do not pretend for one moment to say that this is the last word in legislation in regard to banking. I wish to assure hon. members on both sides of the House that any suggestion of a practical character will be welcomed by me for the consideration of the committee. While the government, of course, takes full responsibility for the bill as brought down, still any suggestion that will improve it, any additional safeguard about the operations of the banks, or any suggestions to improve the machinery which we have provided for carrying out its intentions, will be welcomed and carefully considered.

Mr. Guthrie: Will the hon. minister explain whether or not the government now issues legal tender in excess of the gold reserve, and what power the government has in that respect?

Mr. White: Under the Dominion Note Circulation Act, it is provided that the Dominion government may issue \$30,000,000 in notes, of which \$22,500,000 is not secured by gold. \$22,500,000 of the entire Dominion note circulation at the present time is therefore not secured by gold. As to the remaining \$7,500,000 of the \$30,000,000 which I mentioned, and as to all further issues of Dominion notes, the Dominion has deposited in the vaults of the receiver-general throughout the country gold to a corresponding amount. In other words, for every note now issued, gold is deposited. The Dominion is therefore practically upon a gold basis, for this reason, the Dominion one's and two's are the small change, so to speak, so far as the note circulation of the people of Canada is concerned, and it is perfectly apparent that notes of the denomination of \$1.00 and \$2.00 to the extent of from twenty to twenty-five million dollars are out in such general use, that they practically are not presented for redemption under any circumstances. If my hon. friend will refresh his memory by reading the history of the banks in England up to the Peel Act of 1844, by which the issue of the Bank of England were provided for, he will see the theory on which they proceeded was what amount of notes are so outstanding that they are not likely to come in under any conditions, and, having established that, they then proceeded to enact that as to future issues gold should be deposited to a like amount. With regard to the Dominion of Canada, it may be said that we are on a gold basis for the reason that about \$25,000,000 is out among the people, and would not, under any circumstances that we can conceive of, be presented for redemption.

Mr. Guthrie: Is the whole issue of \$5.00 bills secured by gold?

Mr. White: Oh, yes. In fact, all issues of recent periods have been against gold. In the early days, of course, the revenues were not as buoyant as at present, and the 40 per cent. provision, that is in the present Bank Act, was really there for the purpose of holding out this circulation which was not secured by gold. In other words, the government inserted that provision in order that the banks might be obliged to hold Dominion notes, so that they would not come in for redemption. That condition has long passed, and we have been on a gold basis for a long time.

Mr. Emmerson: I do not wish to ask as to the locus where the gold is deposited, where it is received by these trustees, but I should like to ask if any portion of it finds its way back in to the banks on deposit for the trustees who hold it in trust?

Mr. White: The custody of the gold and the conditions under which it is held, as I have said, will be under the supervision of the Canadian Banking Association. That is a matter of detail. I may assure my hon. friend that that gold reserve has to be held in the vaults absolutely under the control of the four trustees, one of whom is the receiver-general. Of course, if a bank had not issued notes up to its gold reserve, it would be able to go to the four trustees and say that it wanted to take that out gold.

Mr. Pugsley: I presume, of course, that this bill will go to the banking and commerce committee. I wish, however, to ask my hon. friend if the bill contains the same provisions which were in the old Bank Act, that the bank shall not lend money upon the security of its stock to any shareholder?

Mr. White: I am not aware of any change of that kind having been introduced. I think I can say no positively to my friend.

Mr. Pugsley: I should like to call my hon. friend's attention to this. While that is the case, that banks shall not lend money upon the security of its stock, there is another section which seems to be inconsistent with that, and which I think is very objectionable. It provides that if a shareholder of the bank transfers his stock, the bank may refuse to register the transfer unless and until all liability of the shareholder to the bank is wiped out. I think that is entirely inconsistent with the provision that the bank shall not lend money on its own stock, for the bank can make such a loan in an indirect way. If that section be not struck out, there ought to be a provision that, on the face of the certificate of the share-

holder, the section shall be clearly set out, so that any person buying the stock may know the nature of what he is buying.

Mr. White: I would suggest that the hon. gentleman give me a memorandum of his suggestion.

Mr. Pugsley: I shall be glad to do so.

Mr. White: When the bill is in committee—and I suppose it will be in the committee for some weeks—we shall be able to consider the question raised by my hon. friend.

Mr. Murphy: The hon. minister indicated one respect in which his bill differed from the bill introduced by Mr. Fielding in the session of 1911. Would it be convenient for him now, or later, to indicate in what respect his bill differs from that of Mr. Fielding? Or is that indicated by italics in the bill?

Mr. White: I would not say that the portion in italics is the only portion of the bill that differs from the bill introduced by my predecessor. Most of the matters to which I have been adverting were not dealt with, I think, by my predecessor on the day he introduced his bill. I have explained that he made external audit permissible, and we have made it compulsory. The provision for a central gold reserve was not contained in his bill. The penalty clauses to which I have adverted were substantially provided for in his bill.

I come now to one other feature. We have given to the farmers of the west the privilege of borrowing under the Bank Act upon grain in his own possession. Or, to put it in another way, we have permitted the banks to loan to farmers on the security of threshed grain in their possession.

Mr. Emmerson: How about the farmers in the east?

Mr. White: The legislation is general.

Mr. Emmerson: The hon. minister, in speaking, limited it to the farmers of the west.

Mr. White: I mentioned the farmers of the west because it was having regard to the situation in the west that it was thought desirable that the law in this respect should be changed. The matter was given very careful consideration, because it does raise very important questions as to the lien of the bank, the rights of creditors and other matters that have been discussed in this House before, particularly, I think, in 1890. However, having regard to the desirability of encouraging the farmer of the west to provide storage facilities; having regard to the transportation problem, thought that the advantages of the legislation would more than counterbalance its disadvantages. That is a matter also that will be more fully discussed in the committee.

Mr. Schaffner: Is it confined to grain, or does it apply also to live stock?

Mr. White: We have also given the rancher the privilege of borrowing upon his cattle.

Mr. Pugsley: Does the bill provide that the lien upon the grain in the possession of the farmer shall be registered or filed as a bill of sale, so that the public may have some notice of it?

Mr. White: The lien is a banker's lien, which requires no registration under the Bank Act. I know, of course, what the hon. member has in mind.

Mr. Emmerson: The hon. minister is merely extending the privilege?

Mr. White (Leeds): We are extending the privilege. Hitherto, under the existing Act, the privilege of hypothecating property in the possession of individuals has been practically confined to wholesalers. While one may borrow upon warehouse receipts, or on personal property in the possession of a third party who may give a receipt. In the past the privilege of using the liens provided for in the Act has been confined practically to the wholesalers. In the west, banks to-day take security of this kind upon cattle. But, by reason of a decision in the courts of Alberta some doubt has been thrown upon their right to do so, and the provision that the rancher may borrow upon his cattle—the rancher being in a sense a wholesaler—has been inserted for the purpose of removing all doubts as to that point and making it clear that the rancher may borrow upon his cattle. As to the advisability of the extension of the banker's lien to other personal property owned by farmers or others, that raises very many weighty considerations indeed; and I am sure the House will agree that the whole subject is one that requires very careful consideration. And, so far as I am concerned, as I have said, I shall welcome any criticism or suggestion with regard not only to this but to other provisions of the bill when it is under review by the committee on banking and commerce.

One other matter—and I hope I may be allowed to conclude. There is a feature of this question to which the attention of the House has been directed by discussion and otherwise—the question of so-called bank mergers. That is not a very happy expression, for while it is in one sense a merger, the Act really provides for the purchase and sale of the assets of a bank. When one bank purchases the assets of another bank that is properly called a "merger." There has been a good deal of discussion with regard to the property of so-called bank mergers. Without going into the question as to whether bank mergers are desirable or not, I would merely indicate my own opinion that no hard and fast rule can be laid down. Under certain circumstances, the purchase of one bank by another may be not only desirable for the banks concerned, but may strengthen the whole financial situation. On the other hand, cases can easily be suggested in which a grave question would arise as to whether, in the public interest, banks should be allowed to merge—or, to put it techni-

cally, one bank be allowed to purchase the entire assets of another. I think instances will readily occur to hon. members in which it might be most undesirable that two large and powerful banks, say doing business in competition throughout the country, should be permitted to come together, unless for very good and very weighty reasons. Under the present Act, when a bank desires to purchase the assets of another bank, a certain course is followed. An agreement is made between the boards of directors of the respective institutions. That agreement is not known to the public until the meetings of shareholders of the respective banks are called for the ratification of the agreement. If these meetings of shareholders sanction and ratify the agreement entered into by the respective boards, in due course application is made to the treasury board, and upon its sanction being given the so-called merger or purchase is complete, valid and effective. In the present state of the law, when that application is finally made to the treasury board, the agreement has been made public, the matter has been discussed at the meetings of shareholders, the inspector of each bank has thoroughly gone over the affairs of the other bank; and, except in very exceptional cases a very serious question would arise as to the propriety of refusing the sanction of the treasury board to a purchase which has gone so far. I have introduced a feature into this Act, which I shall ask the committee to consider, which provides that the consent of the minister must be obtained to the agreement between the boards of directors of those respective banks, one of which desires to purchase the other. That, I think, will at an early stage enable the government, in a clear case, to prevent the amalgamation of two banks, if in the opinion of the government such amalgamation would be against the public interest.

Mr. Carvell: At what stage would that consent take place?

Mr. White: Before the agreement is brought before the shareholders—before it becomes public.

Mr. Maclean (Halifax): Through the treasury board, or through the minister?

Mr. White: The minister; but if it is thought that would cast too much responsibility upon the minister, there would be no objection to substituting the government or the treasury board. That is a matter of detail.

Mr. Emmerson: Are all transactions of the treasury board concurred in and approved of, formally at least, by the Governor-in-Council?

Mr. White: Not every transaction, for the reason that the treasury board has a statutory existence, and is charged with certain duties and certain acts quite apart from the Governor-in-Council.

Mr. Emmerson: Does not the treasury board report to the Governor-in-Council?

Mr. White: The treasury board is constituted a committee of the Governor-in-Council. Its report goes to the Governor-in-Council, and is approved of or referred back, as the case may be. But by statute there are a number of matters dealt with by the treasury board. I should say, in regard to bank amalgamation, that this is one of the matters which goes from the treasury board to the Governor-in-Council.

Mr. Turritt: Has the hon. minister considered the advisability of compelling banks, when the desire to amalgamate or form such a merger as he has described, to come to Parliament for authority to do so, just as they have to come to Parliament to get a charter? This matter of bank amalgamation has assumed a very serious aspect, and, if it continues for any length of time as it has existed in the last two or three years, the whole of the financial interests of the country will be in the hands of as many men as can be counted on the fingers of one hand. It seems to me, instead of applying to the treasury board, or even to the minister of finance, who is a member of the treasury board, that if two or three banks wish to amalgamate they should be compelled to come before Parliament and secure its authority, just as they have to obtain the authority of Parliament before they can go into business.

Mr. White: While I have not given special consideration to the matter, I should say off-hand that that is not feasible, for the reason that Parliament is not in continuous session. Parliament may last for five or six months, or for a longer or shorter period. My hon. friend will, no doubt, bear in mind that we are acting under the principle of responsible government and that it might not be advisable to compel the banks to come to Parliament for its sanction in matters such as this. I think the Act may very well be left as it is in that regard. My hon. friend will realize that circumstances might arise in which a delay of six months would be very inexpedient, and against the public interest. On the whole, I think in the amendment to the Act which I propose, the interests of the public in regard to the matter under discussion will be reasonably safeguarded. As I have said, the discussion of the bill will naturally be upon its second reading, and I must apologize for occupying the time of the House for such a length of time; though I submit that for this I am not altogether responsible.

Mr. Ross: In regard to the protection of the interests of depositors, the hon. minister must know that the depositors in the Farmers' Bank will lose nearly a million dollars, and, if I am informed correctly, some six hundred depositors have been absolutely impoverished. I think one of the most important amendments that could be made, considering the privileges

enjoyed by banks in this country, is that depositors should be adequately protected, and I think it would not be difficult to frame an amendment embodying such a provision. I would like to ask the hon. minister if he proposes to introduce any such amendment?

Mr. White: I do not believe any legislative provision could be made which would absolutely secure the interests of depositors. I believe that as the whole the Canadian banking system is one of very high character, and constitutes a strong financial situation. But in the last analysis we must never forget that the security of depositors rests more upon the integrity and ability of the directors and officers of the bank than upon anything else. I do not believe we shall ever emancipate ourselves from that condition. The interests of the bank are entrusted to the president, the directors, the general manager and other officers, and I believe, speaking with regard to Canadian banks, that no more capable body of men exists anywhere than is found in connection with the banking institutions of Canada. I have a very high opinion also of their integrity, but with regard to the particular case referred to by my hon. friend, I believe the provisions we have introduced for external auditing would have prevented the disaster in connection with the Farmers' Bank, because the auditors would have seen that improper entries were made, that accounts were falsified, and that fraud was practised. I have great confidence in the moral effect of such supervision by capable auditors upon the staff of the bank, and, in all probability, none of the frauds that wrecked that institution would have been attempted under a proper system of external audit. There is no doubt whatever that the officials of an institution whose work from day to day is checked up by capable accountants would feel it incumbent upon them that those accounts should be correct, in the event of contemplating any fraud, should fear its speedy detection. Answering my hon. friend more fully, the provisions of the audit and the penalty clauses which are provided in the new Act go as far as it is possible to go in legislating to prevent such occurrences as he has referred to.

Mr. Ross: Could the minister not introduce some clause whereby protection could be given to depositors in much the same respect as in connection with the bank note circulation fund? Why not exact from them a certain percentage of their deposits, place that percentage with the government, and make all the banks responsible for any failure that would occur to any one bank. The banks enjoy such privileges that this would not be a very great hardship to them even if you allowed interest on the deposit at the rate of 3 per cent. which the banks themselves pay, and then you would not have to depend on the honesty of any man or set of men, but they would have absolute security for the depositors, who are not investors.

Mr. White: I do not think the suggestion feasible. My hon. friend suggests the securing of deposits in the same manner as bank note circulation is secured. So long as the notes are issued against anything but gold the circulation must be the first charge against the assets of the bank. I do not think that any member would seriously put forward the view that the note circulation of the bank should not be a first charge upon its assets.

Sir Wilfrid Laurier: That is not the point at all. The point is that at present the notes are the first charge upon the revenue of the bank, the deposits are the second; but there is a provision in the last revision of the Bank Act, making a fund out of which the notes are to be retired. The suggestion is, could not a similar fund be made for the depositor?

Mr. White: That provision which is in the Act to-day by which all the banks contribute is continued in the present revision that is in reference to note circulation.

Sir Wilfrid Laurier: The suggestion of the hon. member for Middlesex (Mr. Ross) is whether or not a similar fund could not be established for the protection of the depositors.

Mr. White: Off-hand, I should say it would not be feasible for this reason, if for no other, the enormous amount of the deposit in the chartered banks of Canada. Not only that, but I understand my hon. friend to suggest that say three per cent. should be allowed upon such a fund, and that the fund should be administered by the government. If the proposal were, at all feasible I should say that a very large amount would have to be deposited in that way and that would, of course, cut down the earnings of the banks, and affect the rates of discount in respect of their total deposits, and it raises many considerations which I think we could hardly discuss to-day, but which, of course, might be discussed fully in the committee. Personally, I do not believe that the suggestion that has been made is feasible, but I do not say it is not worthy of consideration.

Mr. Guthrie: I would have been obliged if the minister had given a little more information as to the scope of his proposed independent audit. I understood him to say that he would follow the English practice. Like other members, I have received many pamphlets, etc., containing suggestions as to what particular kind of audit should be provided for in the Bank Act.

Mr. White: I thought I had gone fairly far in a general way.

Mr. Guthrie: What is the English system in regard to joint stock banks?

Mr. White: The appointment of auditors by the shareholders.

Mr. Guthrie: Not by the government?

Mr. White: Oh, no, not by the government. The English system regards the shareholders as the real proprietors of the bank and, of course, they are, and they appoint at their annual general meeting auditors for the purpose of checking the accounts, vouchers and securities of the bank or institution in question and certifying to the shareholders that the annual statement presented by the directors is a correct statement of the affairs of the bank or company.

Mr. Oliver: Is there provision in the proposed Act for discovering the disposition that is made by the banks of their assets?

Mr. White: In the ordinary course of conducting business the banks from day to day make disposition of their assets. That would be checked, of course, by the auditors, to whom I have referred.

Mr. Oliver: It is commonly stated that there are banks which hold property which cost those banks many million dollars, but which is charged in their accounts at comparatively trifling amounts. Is there any provision for discovering that and giving such information to the public?

Mr. White: I should say that there is no specific provision for that, but if the attention of the auditors were directed to anything that, *prima facie*, appeared improper, of course, he would call it to the attention of the directors. I am not aware of these particular matters to which my hon. friend refers unless he means that banking premises are sometimes carried at a comparatively small amount on the books of the bank. I think that in some glaring cases a few years ago a change was made so that the statement the board made represented the actual state of affairs, but I would ask my hon. friend to bear in mind that a very expensive bank building may be useful only for the purposes of banking and that, therefore, a very nice question arises as to its value. Of course, there is no doubt that reasonable valuations might be placed upon these buildings. I do not see how the discretion of the board of directors could very well be interfered with except in extreme cases.

Mr. Oliver: I wish to know if there is any provision in the bill and if it is the policy of the government to procure information on the point I have mentioned and to place that information before the people of Canada?

Mr. White: The bill has certain provisions which I have explained as to the occasions which the minister or the government would consider it necessary to make inquiries. It would be impossible to answer a specific, almost a hypothetical question because I have not in mind at present any such matter as my hon. friend has alluded to.

Mr. Pugsley: The hon. member for Edmonton has raised—

Mr. Currie: Mr. Speaker, I rise to a point of order. It has invariably been the custom of this House not to permit any discussion on the first reading of a bill. We have been departing from that custom during the present session, and I would ask your ruling.

Mr. Speaker: This is not a motion for the first reading of the bill, but for leave to introduce the bill, which permits the minister presenting it to give a clear and succinct explanation. Of course, it is not the usual custom to enter into a discussion.

Mr. Pugsley: To-day an exceptional course has been taken. The House unanimously consented to the minister of finance taking this bill out of its regular order with the view of giving to the House and to the country information as to its contents. My hon. friend from Edmonton (Mr. Oliver) has raised a question of a great deal of importance to the people of the country and to the shareholders of banks, that is, as to investments which banks are to be allowed to make in real estate. As my hon. friend no doubt knows, in the present Bank Act there is a provision that a bank shall not invest in real estate except in so far as may be necessary for the purposes of its banking business. But we all know that banks have gone far beyond that, and that they have erected large and expensive buildings in various cities in Canada, which are brought into competition with those of real estate owners.

Under the Bank Act they are prevented from doing so.

I would like to ask my hon. friend the minister of finance whether, in view of the fact that the intention of Parliament evidently was in passing the Bank Act that banks should not invest their money in real estate beyond such buildings as are necessary for the carrying on of their banking business, and whether with the knowledge of the fact that they have gone far beyond that, and have invested vast sums of money in buildings which they rent for ordinary business purposes, he will give attention to the matter with the view of making some clear provision in the bill which will limit the investment of money by a bank in real estate for the purposes of their business only. Some of the banks, such as the Bank of Montreal in the city of Montreal, have erected splendid buildings which, I understand, are used entirely for banking purposes, and many other banks have done the same. In St. John, N.B., there are very fine bank buildings of the New Brunswick Bank, used entirely for the purposes of its business; but other banks have adopted the practice of investing large sums in buildings which are used for purposes entirely apart from the requirements of their banking business. May I ask my hon. friend the minister of finance if he has given attention to this phase of the question?

Mr. White: This matter, and any other matter in which my hon. friend from Edmonton or any other hon. member may be interested, should, I think, be considered, and will, so far as I am concerned, be considered and discussed in the committee,

which would seem to be the proper place in which to discuss it. Let me say further—because I do not believe that my hon. friend is aware of the circumstances under which I was permitted to-day to introduce this measure out of its order—that it was due to the request of hon. gentlemen on the opposite side of the House, so that the bill might be presented for their consideration and perusal during the recess. My desire was to present it as concisely as possible, and not to enter upon any prolonged discussion. I do not question that the course pursued has been proper up to date, but, unless there is a very good reason for doing otherwise, I would ask that the matter to which my hon. friend has referred, and other matters of a cognate character in connection with the bill be dealt with, either on the second reading, or in the committee on banking and commerce.

The bill was then read the first time.

GRAND TRUNK OFFICIALS INDICTED

New Haven Grand Trunk Agreement is Attacked by the Sherman Anti-Trust Law

Mr. Charles S. Mellen, president of the New York, New Haven & Hartford Railroad; Mr. E. J. Chamberlain, president of the Grand Trunk Railway of Canada, and Mr. Alfred W. Smithers, of London, England, chairman of the Board of Directors of the Grand Trunk, were jointly indicted by the Federal Grand Jury in New York this week under the Sherman anti-trust law.

They are charged with conspiring to restrain trade in connection with "a memoranda of agreement" between the two roads, under which, it is alleged, the Grand Trunk proposed to abandon the extension of its railroad lines to Providence, R.I., together with a projected steamship line between Providence and New York.

Penalty for the Offence

The penalty for the crime charged, which is alleged to be a violation of section 1 of the Sherman anti-trust law, is one year in jail, a fine of \$5,000, or both.

Among interesting paragraphs in the first memorandum, entered into on August 5, was one that the New Haven road should "agree upon such mutually satisfactory service as will give the Grand Trunk an opportunity to compete for all business at all stations reached by New England lines, and with no handicap of any description to overcome in connection with such competition, it being the intention to place the Grand Trunk, in connection with joint business with the New England lines upon the most favored nation basis."

Grand Trunk's Tonnage

Another paragraph provided that the New Haven lines should "assure satisfactorily to the Grand Trunk that it shall not lose any tonnage to and from points reached by New England lines, and to guarantee to the Grand Trunk a minimum yearly tonnage, which shall be the equivalent in amount to that handled by the Grand Trunk in any one of the last five years, which amount shall be inserted in figures in the agreement."

Another provision was that "the New England lines will join the Grand Trunk in the establishment of a satisfactory transatlantic steamship service between Boston and English and continental ports in Europe."

CONIAGAS MINES REPORT

Net profits amounting to \$1,701,553 are shown in the annual report of the Coniagas Mines, Limited, for the year ended October 31st, 1912. Dividends were paid in the year to the amount of \$1,440,000 and a balance was on hand at the end of the financial year of \$1,278,988 in cash and ore in transit and at smelter. Total dividends paid by the company have been \$4,280,000 on capital of \$4,000,000.

Mr. R. W. Leonard, the president, says that ore reserves are estimated to be greater than at any time in the history of the mine. Total silver shipments in the year were 3,508,377, which was mined and concentrated at 8,515 cents per ounce. Shipping, smelting, refining and marketing charges were 4,445 cents per ounce of silver. The average price received per ounce of silver was 59.39 cents, compared with 53.17 cents for the previous year.

Ore reserves on October 31st are estimated as follows:—

	Ounces.
4,480 tons high-grade at 3,000 ounces	13,440,000
108,740 ounces mill rock at 20 ounces	2,174,000
37,800 ounces broken rock on stulls in mine at 40 ounces	1,512,000
10,500 ounces mill rock in surface dumps at 30 ounces	315,000
Total	17,441,800

Twenty per cent. for possible over-estimation leaves ore reserves of 13,953,000 ounces.

BRITAIN'S WORKMEN'S COMPENSATION STATISTICS

Industries Divided Into Seven Groups—Amounts Paid by Insurance and Indemnity Companies.

Though later in making their appearance than last year, the yearly statistics prepared by the home office on compensation and proceedings under the British Workmen's Compensation Act, 1906, and the Employers' Liability Act, 1880, for the year 1911, are none the less interesting. The information vitally concerns all offices transacting those particular classes of risks. The returns are drawn up very lucidly, the result of much laborious work. The enormous amount annually distributed in compensation among the seven groups of industries affords much food for reflection amongst those engaged in the study of the vast and complex question of workmen's compensation; and at this time to those who are watching the formulation of Ontario's compensation reform. The second part of the blue-book deals with the proceedings in the courts. Only a very small proportion of the claims under the Act became the subject of litigation. It would appear that 8,017 cases were taken into the courts, but nearly one-half were in relation to allowances already granted. Again, many cases were eventually settled out of court, or otherwise disposed of, so that those which were finally settled within cognizance of the court were 4,487. These figures apply to England and Wales. In Scotland they were 1,825 and 563 respectively; and in Ireland, 1,233 and 717 respectively.

In Favor of Workman

It is noteworthy that the great bulk of the cases settled in court were in favor of the workman, being 78.1 per cent. of the total cases. Since the Act of 1906 came into full operation the number of cases under the Employers' Liability Act, 1880, has steadily diminished, and a further reduction is now shown. It is evident that this Act will eventually fall into disuse. The amount of compensation in the seven groups of industries—mines, quarries, railways, factories, harbors and docks, constructional work and shippings—was an increase of £356,079 over the figures of 1910, the sum being £3,056,404. When the cost of management, commissions, legal and medical expenses is added the total must be considerably over £4,000,000. The sum of £3,056,404 represented 4,021 deaths and 419,034 cases of disablement, the average payment being £154 in the former case and £5 16s. in the latter. The other payments were an increase of £1 on average for death payments for 1910, and 2s. over the average for disablement.

Seven Groups of Industries

The gross total of the persons employed in the seven groups of industries—according to the returns—was 7,305,997. The annual charge per person employed works out for the different industries as follows:—Shipping, 14s. 3d.; factories, 4s. 6d.; docks, £1 1s. 9d.; mines, £1 3s. 8d.; quarries, 10s. 9d.; constructional work, 13s. 5d.; railways, 7s. 11d. For all the industries taken together, the charge per person employed was 8s. 5d., as compared with 7s. 8d. in 1910 and 6s. 10d. in 1909. The total charge for accident compensation on the seven industries was, however, considerably higher than the £3,056,404 shown by the returns. Apart from compensation paid under contracting-out schemes, outstanding cases under the earlier compensation Acts, and damages recovered under the Employers' Liability Act, 1880, or at common law, the total must have been largely increased by charges for law costs, administration expenses, etc.

Statements of Insurance Companies

The statements for 1910 deposited with the board of trade by insurance companies which transact employers' liability business show that while the payments for claims, including legal and medical expenses, amounted to £1,844,117, the payments for commission and expenses of management amounted to £933,040; the total amount of premiums paid in the year was £2,684,362. These figures apply to the whole of the employers' liability insurance business of the companies and not merely to the seven industries included in the present returns. Of the gross total of compensation paid in the seven industries, £1,178,705 was paid by insurance companies, £1,146,273 by mutual indemnity societies, and £731,426 was paid by uninsured employers. Particulars are not available as to the expenses of indemnity societies or the costs of uninsured employers, but even allowing for a much lower rate of management and other expenses in the case of indemnity societies than in the case of the insurance companies, it would seem that the charge for management and other expenses in connection with compensation paid in the seven great industries exceeded £1,000,000, and in addition there are the legal and medical expenses which the returns to the board of trade include in the compensation figure.

Out of 132,132 forms under section 12 of the Act issued to employers for the purposes of making returns or intimating the fact of their insurance, only 5,538 were not returned. Inquiries made in a number of these cases showed that most of the works were very small, and that in many of them no cases in respect of which compensation was payable had occurred during the year. Proceedings for failure to make a return were taken in 17 cases in different parts of the country; in all the cases convictions were obtained.

WANTS INFORMATION ON HOLLINGER

Mining Man Has Asked Directors of a Porcupine Mine Many Questions for Answer

A letter dated December 12th, has been addressed to the directors of the Hollinger Gold Mines, Limited, by Mr. E. Martin Thorniley, now in Toronto, who states that up to the present, no reply to his communication has been received from the Hollinger people. The letter reads as follows:—

"On my return to Ontario, my attention has been directed to the report of October the 5th last, and also balance sheet of October 26th of your mine. I have been carefully examining these reports in detail, and beg to request that you afford some explanation on what seems to me a matter of the most serious importance to a large number of my friends and also to the general investing public.

"In analyzing the development of No. 1 vein on Nos. 1 and 2 levels, taking your figures, I find that you have a total available tonnage of 90,333 tons, which means, at the present rate of milling, (namely, 300 tons per day), the depletion of both these blocks, respectively,—1,000 feet and 830 feet in length, in 43 weeks' time; this is the total ore in sight which has an average value claimed of \$38.64, per ton.

"The vein on No. 3 level where drifted upon averaged \$8.40, as against the higher values in No. 1 and 2 levels, and has only been opened up for 63 feet.

Number Two Vein.

"No. 2 vein on the No. 1 level shows that it has been drifted on for 665 feet with an average width of 5 feet 2 inches, which will give 22,905 tons—the same vein on No. 2 level has been drifted on for 42 feet with a tonnage of 1,726 tons, the average values of both levels being \$11.55 per ton.

"Available tonnage 24,631, giving a mill run of 11½ weeks.

"The five other veins which have been drifted upon and cross cut on levels 1, 2, and 3 give a total length of drift of 1,150 feet—this, taken in conjunction with the average width, which is 5 feet, and the average assay value of \$10.70 per ton, gives 76,666 tons, or a mill run of 36 weeks.

"This gives a grand total of ore from all sources in sight and supposedly opened up, by being blocked out, to determine accurately the assay contents, of 191,630 tons, made up as follows:—

No. 1 vein, No. 1 and 2 level, 90,333 tons, average \$38.64.

No. 2 vein, No. 1 and 2 level, 24,631 tons, average \$11.55.

All other veins opened, 76,666 tons, average \$10.70.

"The average assay value of the whole is \$20.29 per ton.

Five Hundred Tons a Day.

"In your report you state that within a short time the mill runs will be speeded up to 500 tons per day.

"These figures show the grand total tonnage available for milling to be 191,630 tons from all sources. At the rate of reduction, this gives the present total tonnage available a life of a little over one year.

"Referring again to the report of October last, you state, 'at present we are treating on an average of 300 tons per day, making a 97 per cent. extraction from \$30 ore.'

"I would like to ask, in the face of a tonnage claimed to be 90,333 tons of ore, giving an average of \$38.64, and a tonnage of 101,297 tons of ore giving an average of \$11.12½ per ton as above, whether your intention is to extract the rich portions of the mine in order to make a profit of \$40,000 per week, as stated by you, and declare dividends of 3 per cent. per month for a short time, or run a uniform grade of ore in accordance with the value of the available ore showing in the mine.

Drop in Value

"If a Roots Blower had been temporarily provided during the time that connection was being made at the 300-foot level between No. 1 vein and No. 37, no inconvenience or delay need have occurred in regard to ventilation, and it would seem very important to have ascertained definitely if the sudden drop in value from an average of \$38.64 to \$8.40 at this 300-foot or lowest level, was local and that the higher values could be maintained, as mentioned, in the upper workings, and allowed for in your report.

"It would also be of interest to shareholders to know what the actual cost of mining and reduction are. You state in your report 'that they are satisfactory,' in a mine of this magnitude. The statement seems exceptionally vague.

"Referring again to your first annual report of January, 1912, you state that the 'ore reserves amount to approximately \$10,000,000 gross'—how can you reconcile these figures in order to agree with the October report, issued some nine months later, when so much further exploration work had been completed?

"With regard to the blocking out of these ore bodies no special mention is made. I would therefore like to know further exactly how the aggregate tonnage and values of the mine have been arrived at, independently of assaying the various drifts.

As to the Odd Cents.

"In your financial statement of last October, I notice, 'Bullion shipped but not paid for, \$89,498.65.' This item would require explanation especially regarding the odd cents.

"The next item, 'Gold precipitates on hand, \$97,500,'—the carrying of such an enormous quantity of precipitates seems such an extraordinary thing that this also requires some explanation. I am not aware of any of the leading mines of the Rand, South Africa, ever carrying such a quantity.

"The item, 'Gold in slags on hand, \$17,000,'—this must also be explained, as slags surely could not carry such percentage of gold in process of smelting."

Mr. Thorniley signs himself as a member of the Australian Institute of Mining Engineers, a fellow of the Geological Society of Australia, a member of the Victoria Chamber of Mines, and a member of the American Mining Congress.

BELL TELEPHONE STOCK ACTIVE

Monetary Times Office, Montreal,
December 25, 1912.

One of the interesting stocks on the local exchange during the past week has been Bell Telephone. This began showing some activity and strength last Friday, previous to which only a little had been changing hands, the last sale being on Wednesday, at 158½. On Friday morning, the price jumped to 160¼, this price ruling fairly steady throughout the day on a turnover of more than 100 shares. On Monday, the stock was selling ex-dividend 2 per cent., yet the price rose to 168½, the last sale of the afternoon taking place at 169¼. The turnover during the morning was close to 700 shares while a few hundred more were traded in in the afternoon. This meant an advance of about ten points in the stock in a few days.

Such a marked advance could not but help draw attention to a stock which has been somewhat neglected for some time past. A rumor immediately became current on the street to the effect that something in the nature of a melon would be cut for the stockholders before very long. Such a rumor, in fact, was current for some months ago when the stock showed rather unusual strength. These rumors, however, were denied by telephone people. The street nevertheless believes that there is something at the back of this talk and points to the fact that the decision of the railway commission, which has been investigating the affairs of the company, may shortly be expected, and is disposed to interpret the rise as having some connection therewith. It has even been stated that the report of the commission will place the assets of the company as worth at present \$200 per share. How the street should know this is not explained, but in the meantime it would seem that a number of people are buying the stock on the assumption that the report is correct.

NEW WESTMINSTER AND VICINITY

Railway Activities at Port Mann—Clearing House Association—Quicker Transportation

(Special Correspondence).

New Westminster, Dec. 23rd.

Interest in Port Mann is beginning to revive with announcements made by the Canadian Northern Railway. The most immediate development in this connection will be the building of its line west of New Westminster down to the sea at Steveston.

Tenders have been called for the construction of this piece of track, which must be begun before January 1st, 1913, and completed within six months. The section is about twenty-five miles long, and although the plans have not been made known, it is understood that the work will start on D. L. 172 on the north arm of the Fraser river, and slant diagonally across Lulu island to the main channel, which it will parallel into Steveston.

At the same time information has been secured from official sources that the company will expend \$2,500,000 on its Port Mann terminals. The work will include sixty miles of freight yards, thirty of which are to be completed before the first schedule train is put in operation, extensive repair shops, a twenty stall roundhouse, freight sheds and auxiliary plants.

The supervision of all this work will be from the company's office at New Westminster, the Canadian Northern Railway having announced that this city is to be its divisional headquarters. Offices have been secured here, which will be under the control of the resident engineer, Mr. F. H. Chesnut.

Clearing House Will Commence Operations

The managers of the nine banks in New Westminster have organized a local clearing house association. Operations will start on January 2nd, 1913. New Westminster banks have previously cleared through Vancouver.

The officers of the association will be Mr. G. B. Brymner, Bank of Montreal, chairman; Mr. H. R. Davidson, Canadian Bank of Commerce, vice-president; Mr. J. Gracey, Bank of Toronto, secretary-treasurer and manager.

The banks concerned in the clearing house are: Bank of Montreal, Canadian Bank of Commerce, Royal Bank of Canada, Northern Crown Bank, Merchants Bank of Canada, Bank of Toronto, Bank of Vancouver, Dominion Bank and the Union Bank of Canada.

Transportation Companies' Activities

The British Columbia Electric Railway are now operating the Highland Park cut-off on the interurban line between this city and Vancouver. This reduces the time between the two cities to forty-five minutes.

At the same time, the British Columbia Electric Railway is making yard accommodation at New Westminster for two hundred and fifty cars and plans have been drawn for doubling the capacity of their car shops here.

The Canadian Pacific Railway have taken over the new twelve stall roundhouse at the Coquitlam yards from the contractors.

Another industry has been announced for Coquitlam, namely, the Haynes Ornamental Cement and Staff Works. It is announced that this company will build a factory and is expected to employ fifty men at the start.

K. MYERS.

MONTREAL AND SHERBROOKE LOANS

Montreal has secured charter powers to pay more than four per cent. in interest on civic loans. The effect of this amendment will be noticeable in forthcoming transactions. A communication was submitted by the city treasurer which he had received from the Bank of Montreal advising the city that in view of the large floating indebtedness of the corporation, and of the outlook, the city should prepare for an issue early in January if conditions are favorable. The further inquiry was made whether the city had got its power to pay 4½ per cent. City treasurer Arnoldi transmitted the letter to the council, advising that as the city had already authorized the raising of several loans, which had not been negotiated, steps should be taken to proceed with new powers, so that advantage might be taken of the first opportunity to borrow the money required by several by-laws. Alderman L. A. Lapointe then gave notice of motion that in thirty days he would propose the first reading of a by-law to amend by-laws 366, 384, 394, 424, and several others concerning loans, so as to fix for the loans a rate of interest not exceeding 4½ per cent.

Sherbrooke has accepted a loan of \$400,000 from the Canadian Bank of Commerce at 5½. As security for this loan, which is only for a few months, the bank will hold \$450,000 worth of debentures. The loan is made under a recent by-law providing for the borrowing of \$615,000.

WHO BOUGHT TELEPOST STOCK?

Promoters of That and Other High Sounding Stock Issues Are in the Toils

Another company with its headquarters in the United States, operating through the mails in that country and also Canada, has come to grief. Post office inspectors in New York this week raided the offices of the Sterling Debenture Company and made six arrests of the officers of the company on an indictment returned by the federal grand jury charging the use of the mails in the promotion of an extensive scheme to defraud investors. Those taken into custody were Frank W. Schumaker, president; Harry H. Platt, treasurer; Elwyn E. Barron, secretary; Samuel E. Findley, Sidney Rosenbaum and Wilbur M. Stone.

Forty Different Stocks

According to chief post office inspector Warren W. Dickson, the amount of money collected from the public on stocks alleged to be worthless is approximately \$10,000,000. The operations of the promoters were, in most instances, the exploitation of stocks of other corporations on a contract basis with a sliding scale of commissions. As the stocks which they promoted were enhanced in price to investors, the commissions of the officers of the Sterling Debenture Company likewise increased.

It is said that the Sterling Debenture Company promoted more than forty different stocks, some of which were of real value. Some of the principal promotions in which it is alleged the stocks were practically worthless were: The Telepost Company, a Maine corporation, capitalized at \$13,000,000; the Telegraphone Company, Washington, D.C., capital, \$5,000,000; Boston Securities Company, Massachusetts, capital, \$2,750,000; the Dictograph Company, New York, capital, \$2,000,000; Bartua Rubber Company, British Guiana, capital, \$2,000,000. Canadians have been solicited to patronize these stocks.

To Defraud Investors

The indictment under which the arrests were made is based on an alleged conspiracy to defraud investors in the stock of the Oxford Linen Mills, a Maine corporation, having a factory at North Brookfield, Mass., through the medium of the mails. It is charged therein that the nine defendants on June 1, 1907, and continuously thereafter did knowingly engage in an unlawful conspiracy by devising a scheme to defraud Lawrence Henderson, William L. Oppen and divers other persons by inducing them to send money to the Sterling Debenture Company, a New York corporation, for the purchase of the capital stock of the Oxford Linen Mills.

According to the past office inspectors, the Sterling Debenture Company was originally formed in 1906 by a gentleman named Chataud, who conceived the idea of dealing in stocks by correspondence through the mails. The original capital of \$1,000 was increased to \$100,000 in the spring of 1907, when George H. Middlebrook and Frank W. Schumaker bought Chataud out and began operations on a wholesale scale, with phenomenal success. About a year ago Mr. Middlebrook is said to have retired from the concern, after amassing a great fortune, and Mr. Schumaker became the head and sole owner. The latter also resigned some months ago, after the collapse of the Telepost Company stock, and then became the fiscal agent for a reorganized company known as the Metropolitan Telephone and Telegraph Company.

SOVEREIGN BANK MEETING

A meeting of the shareholders of the Sovereign Bank will be held on February 4th in Toronto, for the purpose of considering the present position of the affairs of the bank. The meeting will probably discuss what shall be done regarding the shareholders who have not turned their shares into the International Assets Company, and can therefore be called upon for the double liability.

The following are the Sovereign's Bank's figures as they appear in the statement to the government at the end of November, 1912:—

Deposits with Dominion Government for security of note circulation	\$ 49,490
Railway and other bonds, debentures and stocks	1,000,000
Other assets	3,446,349
Total assets	4,475,839
Capital, authorized and paid up	3,000,000
Notes in circulation	28,200
Total liabilities	3,675,834

Mr. Thos. J. Clark, of Messrs. Rolph and Clark, Limited, Toronto, and Major J. F. Michie, of Toronto, have been appointed to the board of directors of the Confederation Life Association. These gentlemen will take the places left vacant by the deaths of Mr. W. H. Beatty and Mr. Samuel Nordheimer.

INSURANCE DEPARTMENT HOPES TO SECURE CONVICTION

Assets of Companies in Which Anthony Placed Business are Less Than One Per Cent. of Unpaid Losses

In connection with the recent arrest of Mr. Frank W. Anthony in Brooklyn, which was mentioned in last week's issue of *The Monetary Times*, the New York insurance department states that his method of operation was to solicit brokers in western and southern states, offering to place fire insurance at any rate which would be satisfactory to the assured. He allowed the brokers 25 per cent. of the premiums, retained 50 per cent., giving the remaining 25 per cent. to the companies. The companies in which he placed this insurance were as follows:

Colonial Mutual Fire Insurance Company, Columbia Mutual Fire Insurance Company, Fairmount Mutual Fire Insurance Company, George Washington Mutual Fire Insurance Company, Imperial Mutual Fire Insurance Company, Integrity Mutual Fire Insurance Company, Loyal Mutual Fire Insurance Company, Mercantile Mutual Fire Insurance Company, Metropolitan Mutual Fire Insurance Company, People's Mutual Fire Insurance Company, and Schuylkill Mutual Fire Insurance Company, all of Pennsylvania, and the Aetna Fire and Marine of Delaware.

All Were Declared Insolvent

All the above companies except the last named were located in one office in Philadelphia, which was raided and closed in July, 1911, and all were declared insolvent in August of last year. The Aetna Fire and Marine of Delaware had its license revoked by the insurance commissioner of Delaware, but no further legal action against it was taken.

Six of the principals who operated the Pennsylvania companies at the office in the Manhattan building, at Fourth and Walnut streets, Philadelphia, were indicted for perjury and forgery in connection with the obtaining of some of the charters from the Pennsylvania department, and the attorney general of that state has appointed Morris Wolf to take charge of the prosecution.

Mr. Thomas B. Donelson has been appointed receiver for the eleven Pennsylvania companies, and his investigation has disclosed combined assets of less than \$1,000 with outstanding unpaid losses of over \$100,000, in addition to unearned premiums due policyholders, the amount of which he has been unable to determine.

Complaints from Many Insurance Departments

The New York insurance department has received complaints regarding Anthony's operations from almost every insurance department, and have had to reply that it had no jurisdiction because it had no knowledge of Anthony's writing any policies in this state. Recently, however, a representative of the New York department went to Philadelphia to obtain evidence, and found that he had written risks through Mr. Sam Foster, of 197 La Salle street, Chicago, who in turn secured some local agent in this state to write the insurance on risks in this state, so that the transaction passed through three hands.

It was also discovered that there were about seventy-five New York state agents transacting business with these fraudulent companies. Some of them refused to give the department any information regarding such transactions when requested to do so. The insurance department plans to deal with them when their agency licenses come up for renewal, and the more flagrant cases have been referred to the local district attorneys, some having already taken action. The New York insurance department hopes to secure the conviction of Anthony in this state should the Pennsylvania case fail.

UNION BANK'S REPORT

The profits of the Union Bank for the past year exceeded 14 per cent. on the average paid-up capital. The net profits amounted to \$706,832. The balance at credit of account on November 30th, 1911, was \$71,975. A total of \$826,388 has been applied as follows: Four dividends totalling \$397,964.30; transferred to rest account, \$195,360; premium on new stock, \$47,580; written off bank premises account, \$100,000; contribution to pension fund, \$10,000; balance of profits carried forward, \$75,483.76.

Mr. Jorn Galt, president of the bank, in his annual address referred to the excellent showing made by the institution, and pointed out that its assets are now nearly seventy millions. He placed last season's grain crop of the west as follows: wheat, 188,333,000, average 18.6 bushels; oats, 220,327,500, average, 43.5; barley, 31,449,000, average, 33; flax, 13,300,000, average, 9.5. In 1904 the bank had 84 branches, this year there are 285, of which 157 are in the west. New branches established in the west this year were: Manitoba, 5; Saskatchewan, 12; Alberta, 9; British Columbia, 3.

GOVERNMENT OBTAINED ASSISTANCE FROM FINANCIER

Mr. Morgan's Syndicate Saved United States Treasury from Suspension

Mr. Morgan's public services to his country have been second in their way to those of no man in the history of the Republic. Probably the most notable instance of this was in his arrangement to keep the United States treasury from suspension in February, 1895, comments Messrs. J. S. Bache and Company in their weekly circular.

Doubt as to solvency was driving gold out of the country in exports, but the heavy withdrawals of gold from the treasury, beginning in December, 1894, clearly indicated that our own citizens were struck with fear and were hoarding the metal themselves. The withdrawals from the treasury from December 1, 1894, to January 17, 1895, a period of a little more than six weeks, amounted to \$42,500,000, and on January 17, the action became accelerated, and in the thirteen days following withdrawals amounted to \$36,000,000. Over \$43,000,000 of this gold had been hoarded by the people and each day the amount was running into many millions more, at a rate which meant almost immediate suspension.

Government Lost Sixteen Millions

It was at this juncture that Mr. Morgan organized a syndicate, composed of banks here and abroad, to furnish the treasury with \$63,000,000 worth of actual gold, taking in payment therefor an issue of 4 per cent. bonds. The bonds were sold to the syndicate on a basis of 3½ per cent., and could have been sold at 3 per cent, if the misguided congress of that period had authorized the bonds to be made payable specifically in gold. This they refused to do, notwithstanding the admonition of Mr. Cleveland and the appeals of the best people in the country. Through their obstinate refusal the government lost in interest on the issue, for the period during which it was to run, over \$16,000,000.

The syndicate took the bonds at an extremely critical period, and at great risk, when withdrawals of gold were proceeding on an enormous scale, when the treasury gold reserve, after strenuous efforts to preserve it, had been reduced to the very lowest point reached since the establishment of the gold standard in 1879, and when a suspension of gold payments was actually imminent.

Commanding Ability Organized Relief Forces

Unquestionably, except for the action of Mr. Morgan and his associates, the United States treasury would have been compelled to suspend gold payments.

For this great accomplishment Mr. Morgan received the abuse, as usual, of the army of demagogues, which were as numerous in those days as now.

In the anxious panic days of 1907 it was Mr. Morgan's commanding ability which organized the forces of relief and saved the country from a financial cataclysm which, starting in New York, bid fair to spread throughout the United States.

ONTARIO SETTLERS TO GET MONEY BACK

After much delay the dissatisfied British settlers at Jeannette, Kent county, Ontario, are to receive their money back from the company that induced them to settle in that locality.

In a statement made by Hon. Jas. S. Duff, minister of agriculture, who has been inquiring into the situation, he said: "Some time ago the government received a petition from a number of British settlers at Jeannette, Kent county, asking for an investigation into the circumstances under which they were induced by the Thames Valley Land Company to take up land in this province, and expressing dissatisfaction with the position of affairs. The matter was at once taken up with both the settlers and the company. Representatives of the settlers stated that they preferred a settlement by which they would get their money back. The company said they did not wish to hold dissatisfied settlers. Accordingly opportunity was given for the company and the settlers to make a settlement that would be mutually satisfactory.

"Negotiations have now been concluded or are nearing completion in practically all the cases, the exceptions being those who placed the matter in the hands of their solicitor with the intention of taking it to court. The basis of settlement, I understand, has been the return of the money paid over or an arrangement with regard to the land and terms of payment, which was equally satisfactory. A few have remained on the property, but the great majority have scattered to other positions. Speaking generally, we genuinely deprecate anything in the nature of extravagance or misrepresentation, and strongly advise all prospective settlers to thoroughly inspect any propositions submitted to them before assuming any obligations whatever."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Duluth Superior Traction Company.—Duluth-Superior earnings for the first week in December show another increase of moderate proportions. Gross receipts were \$21,668, against \$21,256 for the same week last year.

Twin City Rapid Transit Company.—Twin City passenger earnings for the second week in December were \$160,824, an increase over the same week last year of \$15,954. For the year to date earnings are \$7,717,904, an increase of \$368,213.

Brazilian Traction, Light and Power Company.—The Brazilian Traction, Light and Power Company reports the largest week's earnings since the formation of the merger. For the week ended December 14th approximate gross earnings were \$426,748. The largest week's earnings previously reported were \$417,813 for the week ended November 16th.

Spanish River Pulp and Paper Mills, Limited.—The directors of the Spanish River Pulp and Paper Mills, Limited, have declared the regular quarterly dividend at the rate of 7 per cent. per annum on the preferred stock for the quarter ending 31st December, 1912. The dividend is payable on 15th January, 1913, to the holders of record on December 31st, 1912. The transfer books will be closed from January 1st to 7th, both days inclusive.

International Engineering Works, Limited.—The international Engineering Works, Limited, which was formed some little time ago, to take over the Robb Engineering Company, has taken over all the assets of the company, including plants both at Amherst, N.S., and South Framington, Mass. The organization of the new company is being rounded out, and the new company started out with a fairly large number of orders on its books.

Acadia Sugar Refining Company, Limited.—The annual statement of the Acadia Sugar Refining Company, Limited, at date September 30, shows net trading profits of \$148,316 against \$211,026 last year. The reduction to be accounted for by the fire at Woodside, February 1, 1912. The usual dividends were paid, totalling \$149,892, so that the profit-and-loss balance is reduced by the amount of the excess dividend (\$1,576) and the interest charges, \$15,370, and directors' fees, \$7,300. Dividends are 6 per cent. on preferred and 5 per cent. on ordinary. Actual earnings on common were 4.9 per cent.

Cobalt Lake Mining Company.—The shareholders in the Cobalt Lake Mining Company did not pass the proposed resolution by which they should delegate their powers to an executive committee, to be elected by the directors from their number, to carry through the deal pending, by which a British syndicate should take over the control of the company. Representatives of this syndicate have been endeavoring to obtain control of this property to develop it on a splendid scale, and submitted to Sir Henry Pellatt, who controlled half the capital stock of the company, an optional agreement. They offered to pay for 20 per cent. of the stock in cash, and the remainder within a year. The syndicate was to incorporate a company in England and market the shares in London among its regular clientele.

It was proposed that those stockholders who did not wish to dispose of their holdings might remain in the new Canadian Cobalt Lake Mining Company. Sir Henry Pellatt thought the offer of the syndicate a fair one and that it was highly advantageous to the shareholders.

The question was discussed, and it was found that many were in favor of the company retaining its present status. It is likely that more definite action will be taken at the annual meeting to be held in January.

Ocean Falls Company, Limited.—The reorganization of the Ocean Falls Company, Limited, which has big lumber and pulp interests at Ocean Falls, has been completed, and the policy of the new management is to carry on extensive development.

Following upon the retirement of Mr. Lester W. David as president and manager of the concern, Mr. J. Hamilton Benn, M.P., for Greenwich, England, has been elected president. Mr. Arthur E. Millington, who for many years was general manager of the Spanish River Pulp and Paper Company, Espanola, Ontario, has been appointed managing director of the company in Vancouver, in conjunction with Mr. A. B. Martin, resident managing director at Ocean Falls. Mr. Millington will, early in January, take up his residence in Vancouver, and Mr. Benn will also take an active interest in the affairs of the company.

Financial arrangements have been made for the funds required for certain additions to both pulp and saw mill

plants, and for the extensive development of both departments after resumption of operations early in the coming year. Arrangements for the sale of the product of the mills have been effected with Messrs. Price and Pierce, of London, England, timber brokers, with branches throughout the world.

British Columbia Electric Railway Company.—The annual report for the year to June 30 states that the net profit, after including the sum brought forward and making provision for renewals, maintenance, and the amount added to capital amortization fund, totals £365,720. From this is deducted interest on debentures and the various dividends already paid, leaving £114,260 available for further distribution. The directors now recommend a dividend at the rate of 8 per cent. per annum for the six months to June 30 on the deferred ordinary stock, and propose transferring £66,528 to reserve fund, leaving £7,731 to be carried forward. The reserve fund now amounts to £459,000. During the period under review the gross receipts show an increase of \$1,601,994, while from June 30 to the end of September there has been a further increase in the gross earnings of \$352,233. The extension of the hydro-electric power plant at Lake Coquitlam and Lake Buntzen has been successfully carried on, and will be completed during next summer. A new dam is being built at Lake Coquitlam with a storage capacity of 7,404,000,000 cubic feet, giving an available reserve during the dry season of 53,700,000 k.w.h. of electrical energy. On Vancouver Island the company is largely increasing its hydro-electric power installation to meet the rapidly increasing business in the city of Victoria and surrounding districts. The company is also constructing near Victoria, with a separate transmission line, an auxiliary steam plant, having an initial capacity of two 2,000 k.w. units. The railway from Victoria through the Saanich Peninsula, about 20 miles in length, is now nearing completion, and the company is also building several extensions in North Vancouver, South Vancouver, Point Grey, and Victoria, aggregating over 15 miles. The company, now operates 280.77 miles of railway, distributed as follows:—

	Miles.
Vancouver	77.43
New Westminster	7.55
North Vancouver	10.63
Victoria and Suburbs	28.95
Central Park Line	18.52
Lulu Island	33.21
Vancouver and New Westminster	10.06
Fraser Valley	72.42

To these must be added, to make the above total, 22 miles on the Saanich Peninsula. In 1897-8 it had 40 miles of single track; now it has 280.77. It carried 3,654,300 people in that year; last year it carried 60,563,300. It then had 50 cars in service; now it has 700.

ST. LAWRENCE NAVIGATION COMPANY INCREASES DIVIDEND

A dividend of eight per cent. has been declared by the St. Lawrence and Chicago Steam Navigation Company. Last year's dividend was five per cent. The company has had a successful year, and the statement of earnings will show a surplus after the payment of the \$68,800 which will be distributed in dividends.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, report exchange rates as follows:—

MANY BRITISH COLUMBIA COMPANIES

Are Among This Week's Incorporations—Large Power Company Chartered

The number of charters granted this week was seventy-five, and their total capitalization totalled \$18,445,090.

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	24	\$7,330,000
British Columbia	23	4,895,000
Quebec	19	4,784,000
Manitoba	8	1,186,000
Alberta	1	250,000
	75	\$18,445,090

The largest companies this week are:—

London Land and Coal Company, London.....	\$2,000,000
Bridge River Power Company, Vancouver	2,000,000
Mount Royal Brick Company, Montreal	1,500,000
Canada Crushed Stone Corporation, Hamilton....	1,500,000
Canadian Rolling Mills Company, Montreal	1,000,000
Everfresh Company, Vancouver	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Trail, B.C.—Silver King Mines, \$500,000.

Ottawa, Ont.—Faulkner, \$100,000. J. A. Faulkner, R. H. Parent, R. F. Berlinguet.

Lachine, Que.—Ideal Safety Elevator Company, \$200,000. J. Finley, J. D. Viau, E. Nadeau.

Sarnia, Ont.—Sarnia Humane Society. Mrs. M. C. W. Bucke, J. F. Elliott, G. A. Proctor.

Nanaimo, B.C.—Barry Loggin Company, \$30,000. Nanaimo Navigation Company, \$50,000.

Sherbrooke, Que.—Standard Jewelry Company, \$49,000. H. L. Allen, F. R. Foss, R. A. E. Aitken.

Mattawa, Ont.—Mattawa Trading Company, \$40,000. H. Morel, S. Desjardine, Mattawa; J. R. Moffatt, North Bay.

London, Ont.—London Land and Coal Company, \$2,000,000. A. Anderson, Victoria; D. Ferguson, J. M. McEvoy, London.

Three Rivers, Que.—La Compagnie Canadienne d'Accumulateurs et d'Automobiles, \$200,000. J. A. Jutras, A. Bellemare, J. D. Oligny.

Lindsay, Ont.—Lindsay Library and Office Fittings, \$75,000. F. R. W. Fisher, A. G. Peppiatt, J. H. Thompson, Newmarket.

St. Benoit Labre, Que.—Automatic Fire Alarms, \$10,000. J. A. Rancourt, E. Rancourt, St. Benoit Labre; J. Rancourt, St. Victor de Tring.

Edmonton, Alta.—Western Canadian Investment and Development Company, \$250,000. J. F. MacGregor, W. H. Walter, H. Riley, Toronto.

Bruce Mines, Ont.—Martin International Trap Rock Company, \$600,000. B. Martin, O. Fowle, Sault Ste. Marie, Mich.; K. Campbell, Bruce Mines.

Quebec, Que.—Quebec Structural, \$250,000. L. H. Gaudry, A. Picard, J. M. Gaudry, L. H. Peters, \$40,000. L. H. Peters, E. Sylvain, Jr., A. Nathieu.

Sault Ste. Marie, Ont.—Canadian Barker Company, \$40,000. S. H. Cady, A. Roberts, W. Cleereman, T. E. Simpson, \$50,000. T. E. Simpson, W. A. Simpson, J. Ireland, (furniture).

Victoria, B.C.—Canadian Scharlin Brothers, \$10,000. Hastings Furniture Company, \$100,000. Island Colonization Syndicate, \$300,000. Dominion Advertising Signs and Novelties, \$10,000. Port Hardy Lumber Company, \$50,000.

Hamilton.—Bronte Heights, \$40,000. E. McIntyre, H. D. Petrie, J. K. Smith. Hamilton Bonds and Investments, \$500,000. G. H. Levy, M. J. O'Reilly, A. H. Gibson. Canadian Quarries, \$100,000. O. E. Quigley, H. A. Burbidge, J. R. Marshall. Canada Crushed Stone Corporation, \$1,500,000. G. H. Levy, M. J. O'Reilly, A. H. Gibson. Hamilton Malleable Iron Company (corrected notice), \$700,000. S. Johnston, R. H. Parmenter, A. J. Thomson.

Vancouver, B.C.—Algoma Mining Company, \$125,000. Canadian Muscovite Mica Company, \$200,000. American Can. Company, \$250,000. American Club of Vancouver, \$100,000. Pacific Land and Townsites Company, \$10,000.

Timms, Phillips and Company, \$50,000. Arnold and Quigley, \$40,000. Pacific Box Company, \$50,000. Everfresh Company, \$1,000,000. Bridge River Power Company, \$2,000,000. Williams, Smith, Thompson Company, \$50,000. Dieckerhoff, Raffler and Company, of British Columbia, \$10,000. Vancouver Talking Sign Company, \$10,000. Dominion Pont Tampon Company, \$100,000. Victoria Dominion Theatre Company, \$50,000.

Winnipeg, Man.—Oakland Investments, \$36,000. H. R. Woods, H. W. O. Boger, F. F. Carruthers. Western Development Company, \$60,000. T. Wright, W. T. Musgrove, T. Boyes. M. G. Buckley Lumber Company, \$40,000. M. G. Buckley, A. P. Mutchmore, J. C. Graham. Hebrew Free Loan Association, of Winnipeg, \$5,000. D. Orlikow, J. Lipkin, L. Graham. Cronkhite Company, \$20,000. N. T. Cronkhite, R. C. B. Harrison, E. C. Frizzell. Safety Fire Lighters, \$25,000. G. J. Lovell, J. Hargrave, L. A. Godbolt. John Deere Plow Company, of Calgary, \$500,000. W. Butterworth, W. L. Velie, G. N. Peck, Moline, Ill. John Deere Plow Company, of Saskatoon, \$500,000. W. Butterworth, W. L. Velie, G. N. Peck, Moline.

Toronto.—R. F. Green, \$40,000. R. F. Green, R. C. Murton, C. W. Carruthers. Canada Creosoting Company, \$600,000. K. F. MacKenzie, H. Howitt, J. H. Fraser, W. H. Cook. York Securities, \$40,000. W. C. W. Symons, F. G. Waters, R. D. Ponton. Zimmer Vacuum Machine Company, \$125,000. A. L. E. Malone, G. M. Malone, F. L. Whatley. Etobicoke Realty, \$100,000. R. D. Storey, A. S. Lown, W. E. Ferguson. Mines Leasing and Development Company, \$200,000. O. H. King, E. M. Rowand, T. N. Poole. Motor Truck and Auto Service Company, \$40,000. L. Loomis, F. Adams, R. R. Bain. Permanent Realty Corporation, \$100,000. D. Urquhart, C. B. Scott, W. P. Crow. Fairbank Land Company, \$300,000. W. B. Sturup, H. Riley, W. R. Anderson. Coleman Exploration Company, \$40,000. J. V. Guilfoyle, C. H. C. Leggott, B. Webster. Stormont Gold Mining Company, \$200,000. W. A. J. Case, J. B. Taylor, C. G. Lynch.

Montreal.—Globe Investment Company, \$500,000. H. Gerin-Lajoie, A. Lacoste, T. J. Shallow. Pringle, (electrical and mechanical engineers), \$20,000. R. E. T. Pringle, Detroit; E. H. Godin, J. G. de Lorimer, Montreal. R. Duncan, (sporting goods), \$50,000. R. Duncan, D. Duncan, S. Duncan. Canadian Rolling Mills Company, \$1,000,000. T. S. Stewart, W. Stewart, H. E. Walker. Recollet Land Company, \$50,000. W. K. McKeown, E. A. Barnard, J. R. Law. Atlas Realities, \$50,000. J. W. Blair, C. A. Hale, F. J. Lavery. Mount Royal Brick Company, \$1,500,000. W. K. McKeown, E. A. Barnard, J. R. Law. Montreal Suburban Home-Site Company, \$500,000. B. Rose, T. J. Griffin, C. J. E. Charbonneau. Sherbrooke Amusement, \$50,000. J. W. Cook, A. A. Magee, T. J. Coonan. Summit Realty, \$300,000. J. Ferres, H. P. Chauvin, Montreal; C. A. Smart, Westmount. Theatrical Club, \$10,000. F. Wilson, H. Thomas, E. English. A. K. Kempton, \$10,000, (electrical appliances), J. A. T. Richards, P. H. Richards, P. J. Wright. Parc Dollard Extension, Incorporated, \$95,000. J. G. Langelier, N. Langelier, J. Frappier.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of December 28th, 1911; December 19th, and December 26th, 1912, with percentage change.

	*Dec. 28, '11.	Dec. 19, '12.	*Dec. 26, '12.	Ch'g %
Montreal	\$38,557,825	\$69,294,254	\$46,517,804	+20.6
Toronto	32,593,514	45,141,838	35,140,243	+7.8

*Five days only—Christmas Day

GOVERNMENTAL SUPERVISION OF EUROPEAN BANKS

By H. M. P. Eckardt

IV. ITALY, SWEDEN, DENMARK, NORWAY AND THE NETHERLANDS

Prior to the establishment of the Bank of Italy, in 1893, the banks of that country committed nearly all the misdeemeanors and crimes in the financial calendar. They and the government issued inconvertible notes; the banks aided and abetted real estate speculations; the executive officials of one bank issued false statements to conceal losses of many millions of lire, and when discovery was threatened as a result of a government investigation, the heads of another bank—the greatest bank in the kingdom—accommodatingly sent over 8,000,000 lire to enable the first bank to deceive the inspectors. In Italy the exclusive right of note issue and the usual valuable special privileges are conferred upon three institutions—the Bank of Italy, the Bank of Naples, and the Bank of Sicily. Provision is made for having these banks lend large amounts to the public treasury.

Supervision is Vested in Treasury

The supervision of the banks is vested in the treasury. There is a permanent commission consisting of 4 senators, 4 deputies, and of 5 members appointed by royal decrees. And the minister of the treasury watches the banks through the inspectorate-general. At various council meetings a government inspector is present with power "to suspend the execution of decisions that may in his opinion be contrary to the laws, regulations, and statutes."

The inspectorate-general examines the annual balances of the banks, and where deemed necessary, verifies the correspondence of the said balances with the records of the institutions.

Swedish Banking Development

The banking development of Sweden has been peculiar, inasmuch as the privileges given to the central bank were not, in the first place so exclusive as to prevent the development of a considerable number of other important banks. There was at first no monopoly of note issue given to the Riksbank, as the state institution in this country is called. The joint stock banks of issue are called Enskilda banks. They developed rapidly; and eventually their note issues exceeded those of the state institution. The government desired to strengthen the state institution; and as one means of doing so it took away the issue rights of the enskilda banks in 1901. It recognized that the possession of the right of issuing notes enabled the enskilda banks to establish offices in very small places; and when the right of issue was taken away from the joint stock banks, they were cajoled or subsidized on condition that they were not to close any of these offices.

Render an Account Quarterly

As early as 1846 there was a certain measure of government supervision over the Swedish joint-stock banks. Thus in the monograph on the Swedish banking system, by A. W. Flux, that the law of 1846 required the banks to render an account of their affairs to the crown quarterly. "An inspector appointed by the local representative of the crown was to take part in the making up of this account, and was also to be entitled to enquire into the affairs of the bank at any time, with due regard to the secrecy of the relations of the bank with its clients."

In the case of the Riksbank, as it is a state institution, the provisions for control and supervision on the part of the government are more elaborate.

Denmark and Norway's Systems

In Denmark, as in Sweden, there is a disgraceful story of the depreciation and final partial repudiation of government demand notes issued as currency. The National Bank is a joint stock company in private ownership. Its affairs are managed by 5 managing directors, "of whom 2 are appointed by the government, 3 elected by the directors, which consists of 15 representatives of the shareholders." The bank has a monopoly of note issue and the customary special privileges.

Norway, on account of its political connection with Denmark, lost heavily by the irredeemable paper money issued by the Danish bank and government a hundred years ago.

The Bank of Norway is wholly controlled by the Norwegian government. The bank has a monopoly of note issue. "The president of the managing committee of 5 is appointed by the crown, the other members by parliament, which also elects the 15 members of the board of directors. The profits are divided between the shareholders and the public treasury."

Royal Commissary's Salary Paid by Bank

The Bank of the Netherlands was created by royal decree in 1814. At the beginning it enjoyed various privileges in addition to that of note issue. The government provided premises free of charge, and took up 1,000,000 florins of the or-

iginal capital. By 1864 the government had ceased to give the bank free premises, and its special privileges, apart from the monopoly of note issue and the sole possession of the government business, had been withdrawn or suppressed. The state exacts various services from the bank and participates in the profits. Supervision over the bank is exercised by a royal commissary whose salary down to 1904, the bank paid. The president and secretary (permanent officers) are appointed by the sovereign. The five directors, who with these officers constitute the management, are elected by the general assembly of shareholders.

Privileged Banks and Others

From this series of articles it will be seen that in most cases supervision of banks, as existing in Europe, represents supervision by the state over privileged and semi-public institutions. The state gives the central bank privileges and rights which serve, in an important degree, to increase the profits and powers of the bank; and then the state comes down on its creature or its favorite and exacts tribute in the form of heavy taxes and perhaps a share in the profits. It also undertakes to extensively supervise the affairs of the bank, for one reason because its participation in the profits serves to make it responsible for the liabilities of the bank.

The healthy development of other institutions is hindered by this favoritism or centralization. And it is the case, in several of the countries mentioned, that only three or four banking institutions of prominence are to be found outside of the central institution. Over the outside institutions, which are not beholden to the state in particular, there is not apparently a great deal of state supervision—in some of the countries none at all.

NEW BANK PRESIDENT.

Mr. J. A. Vaillancourt has been elected president of La Banque d'Hochelaga. He has been long in business as a wholesale merchant in Montreal and has acted as a councillor of the Montreal Board of Trade since 1909. He was president of the Montreal Produce Association in 1909, and is also

J. A. Vaillancourt

president of the St. Hyacinthe Dairy School and of the Nationalist Newspaper Company. Although active in organizing the Citizen's Association of Montreal, he has always declined municipal and political preferment. Mr. Vaillancourt has been interested as a director of La Banque d'Hochelaga for many years and has been described by one who knows him well as a model of modesty and gentlemanlike conduct.

PRUDENTIAL TRUST COMPANY'S OFFICERS.

At a meeting of the executive committee of the Prudential Trust Company, Limited, held recently, the office of honorary president and chairman of directors was created, and Mr. Farquhar Robertson was elected thereto.

Mr. B. Hal Brown, vice-president and general manager, was also elected to the position of president and general manager.

Mr. Robertson, who has come into prominence in business circles, was elected a director of the Merchants Bank and on the same day it was announced that he would be one of the three members of the new Montreal Harbor Commission.

A branch of the Canadian Bank of Commerce has been opened at Campbellton, N.B., under the management of Mr. E. B. Fairbanks.

LIFE INSURANCE MORALS

In What Light Shall the Management Look Upon Its Duty to Its Policyholder?

A genuine insurance company enshrines within it a moral core. To those who lack capacity to see beyond the mere business aspect of a life insurance company there lies embedded in such an institution qualities that have their source in the ethical realm. A life insurance company in which these moral or ethical qualities are not brought into daily exercise can never become an ideal life insurance company either for policyholder or agent.

When an agent collects a premium for a participating policy from a new policyholder and remits it to his company, a relation of trust has been established between the company and policyholder which may last for half a century.

In what light shall the management look upon its duty to its policyholder? Is it simply to become responsible for the mere letter of its policies? How far may a company go in approximating the profits of existing policyholders to gather in new policyholders from far and near at a cost out of the proportion to the real value of such new business? Is the idea of rendering the best service possible to existing policyholders as firmly implanted in the minds of the company officials as the ambition to appear successful through reporting a big new business?

Apportionment of Profits

Is equitable apportionment of the profits and other benefits between different classes of policyholders made an imperative obligation upon those responsible therefor?

In short, is a life insurance company to be looked at by those in control as their property or should those in control regard themselves as public stewards rendering a high quality of service in the interest of thousands of people scattered all over the country and who trust the management to administer the affairs of the company honorably, equitably, intelligently and honestly.

The answer to these and allied questions was the real although not the nominal subject of the paper read to the members of the Insurance Institute last week by Mr. Papps, a former Canadian, now actuary of that excellent company, the Mutual Benefit Life Insurance Company, Newark, N.J.

Profits, the Company and the Public

The title of the paper was "Profits from the standpoint of the Company and the Public," but in the treatment of the subject Mr. Papps went to the root of the matter and raised and answered ethical questions that must be settled in the moral realm before they can be carried out in arithmetical detail.

Mr. Papps started from the platform that a life insurance company is a public servant, and that its success depends very largely upon its treatment of its policyholders.

He first explained the nature of "surplus" or "profits" in life insurance, showing how these arise from savings in mortality, interest and loading.

It was clearly shown how new business produces a deficit in the early policy years and how the surplus funds of older policies must in the meantime be used to offset this deficit.

Deferred Dividend Business

It was thus made evident that in deferred dividend business the surplus on the older policies would be really larger than the net-surplus of the whole class and how maturing policies of this class should not be penalized because part of the surplus was being utilized to cover the deficit in the new business.

The question of the equitable distribution of profits of a company was discussed and companies were warned against ignoring the implied obligation to earn surplus to discharge what would in the future be regarded by the policyholder almost as a liability. The payment of too large or unwarranted profits to a few maturing policies was deprecated as being practically a plan to secure new business on false pretences and a like condemnation was placed upon the practice of paying disproportionate profits upon recent policies simply for advertising effect. In such cases the surplus is not equitably distributed.

Non-Participating Business

A live wire was touched by Mr. Papps when he entered upon the problem of a company reducing its non-participating premiums while maintaining high participating premiums. In such cases the commission on the former class of business is cut to a minimum while liberal commission are maintained on the latter. Even if the non-participating business is not conducted at a loss it follows that an unfair advantage is given to non-participating policyholders, for if the participating policyholder does not get back considerably more in profits than is represented by the difference (with interest) between the two classes of premiums then it cannot be said that the management has much to offer in its own defense, but rather it is to be condemned for its lack of normal stamina in yielding to the pressure to reduce premiums on one class of policies and not on the other.

Mr. Papps laid a good deal of stress on that function of life insurance management embraced under the idea of general

service to policyholders and argued that such service was as important as the payment of large profits. Service and protection was more important than investment insurance, policy frills or even big dividends.

He illustrated this by showing how increased benefits, such as surrender values or extended insurance, might be made available to older policyholders, when these are being offered to new policyholders, even although the older policies do not bind the company to do so.

Pay as Little as Possible.

"Is it," said Mr. Papps, "in accordance with fundamental principles to pay the beneficiaries as little as possible and the (living) policyholders as much as possible by way of dividends?"

Dealing with all important subjects of the agent, the writer of the paper urged that the really successful agent is the man who year in and year out sells protection and service and not investment policies with frills. The highest importance was attached to the ideals set up by a life insurance management in the conduct of its business.

Where the conditions in the policies of two companies are pretty much on a par and the benefits equitably distributed, then it was held by Mr. Papps that the question of low net cost becomes of first importance. In other words, under such conditions that company is to be preferred which is able to make the largest reduction in the premium by declaration of the larger profit.

Raises Fundamental Questions

The subject of Mr. Papps' paper raises so many fundamental questions that we can at present only touch upon them. At a later date it is intended to return to the fuller discussion of some of the problems thus raised. Suffice it to say that the insurance institute is to be congratulated upon having so many fundamental questions treated in the lucid paper of Mr. Papps.

It must have been with satisfaction that the members listened to one who received his education as well as his earlier insurance training in this country. The moral tone of the paper was worthy alike of the speaker and of his early training.

Want of space prevents us from giving even a synopsis of the very full address of Dr. John Ferguson at the same meeting upon the relationship of disease and accident. With clearness of thought, freedom of utterance, and wide range of subject, Dr. Ferguson spoke on the above subject at considerable length. His paper is to be printed in the institute's proceedings so that it will there be on record for future reference. Needless to say the address was full, clear and informing, even though somewhat technical, as was inevitable.

VICTORIA'S OFFICIALS REPLY TO UNDERWRITERS.

Water Commissioner Rust and Fire Chief Davis, of Victoria, find that so far as the water situation in the city at present is concerned, the recent statements of Mr. Page, secretary of Vancouver Island Fire Underwriters, were about right, and they admit that there is a shortage of water, which shortage will be more acute during the coming summer; in fact, until water is obtained from Sooke lake. But the water commissioner is now preparing a report which will deal with the best means of augmenting the supply pending the completion of the Sooke lake development work, and this report will shortly be before the council.

They correct Mr. Page's statement that the fire department has been in the practice of connecting fire engines to the salt water hydrants. It was only done on one occasion, about two years ago, but the standing order now is that this must not occur. Also, relative to the department's telephone service, the department lines are operated under a separate exchange system in headquarters station, with a private wire for fire alarms only. Further, Mr. Page's suggestion that a fire alarm wire to the North Dairy Farm pumping station is required has been adopted, and the line is about completed.

The officials' report also states that it is the intention of the water commissioner not to construct any more four-inch mains except occasionally on streets whereon there are a number of houses and in the outskirts of the city.

In answer to a question, Fire Chief Davis stated that for the past two months the pressure available for fire fighting purposes in Victoria West has been good. At the Victoria West fire hall, which is about the highest point in that section, the pressure has been maintained at from fifty-five to sixty pounds and has not been less, while on the low level the pressures range from ninety to ninety-five pounds, and have run as high as 105 pounds. This improvement has occurred since the Esquimalt Water Works Company installed its new main to Goldstream. About two months ago while repairs to the pipe line were being made, the supply was gradually reduced during the day, with the result that the pressure had been reduced to about twenty-five pounds.

At Souris, Manitoba, a money by-law to authorize the expenditure of \$40,000 for electric lighting was defeated because the majority was one vote less than the required sixty per cent. necessary for it to become law.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Woodland, N.B.—December 12.—Forest Hotel. Loss and cause unknown.

Charlesborough, Que.—December 18.—Railway station. Loss and cause unknown.

Bothwell, Ont.—December 19.—Mr. W. Jones' residence, Loss and cause unknown.

Edrans, Man.—December 14.—Marvin Bros.' Warehouse, Loss \$800. Cause, upset lamp.

Kentville, Ont.—December 11.—Mr. K. Sharpe's barn. Loss unknown. Insurance \$400.

South Bay, N.S.—December 18.—Mr. P. Doyle's residence. Loss and cause unknown.

New Michel, B.C.—December 13.—Shed near Kootenay Hotel. Loss and cause unknown.

Calgary, Alta.—December 20.—Bruner Block, First Street West. Loss and cause unknown.

Swift Current, Sask.—December 11.—Mr. J. McMillan's tailor shop. Loss and cause unknown.

Harpurhey, Ont.—December 19.—Mr. J. McNamara, loss unknown. Cause, defective chimney.

Sutton Junction, Que.—December 12.—Mr. A. W. Westover's residence. Loss and cause unknown.

Listowel, Ont.—December 13.—Mrs. W. Bell's residence. Loss unknown. Cause, supposed incendiary.

Sudbury, Ont.—December 15.—Chief of Police's office, Huron Building. Loss slight. Cause unknown.

Richmond, Que.—December 21.—Mr. G. Bedard's residence, Main Street. Loss slight. Cause unknown.

Amherstburg, Ont.—December 15.—Messrs. J. S. Ainslie Brother's saw mill. Loss and cause unknown.

Lynch Creek, B.C.—December 12.—Mr. A. W. Johnson's hotel. Loss \$4,000. No insurance. Cause unknown.

Centreton, Ont.—December 12.—Mr. E. Hoares' barns and contents. Loss unknown. Cause, upset lantern.

Halleybury, Ont.—December 20.—Mrs. Richardson's residence, Russell Street. Loss and Cause Unknown.

Brantford, Ont.—December 18.—Mr. C. Mylatt's residence, 147 Dalhousie Street. Loss and cause unknown.

Nashwaak, N.B.—December 17.—Mr. F. Manzer's barn. Loss unknown, no insurance. Cause, supposed incendiary.

Crossfield, Alta.—December 13.—Mr. Ontkes' livery barn. Loss \$4,000. Insurance \$1,500. Cause unknown.

Fairbank, Ont.—December 23.—Mr. Ross's dwelling, Dufferin Street and Vaughan Road. Loss \$300. Cause unknown.

Antigonish, N.S.—Mrs. R. McInnis' residence, Doctors Brook. Loss unknown, included \$180 in cash. Cause unknown.

Port Arthur, Ont.—December 14.—Mr. Mitchell's slaughter house, Dawson Road. Loss unknown. Cause, boiler exploded.

North Battleford, Sask.—December 6.—Mr. M. J. Holliwell's real estate office, Railway Avenue. Loss \$200. Cause unknown.

Regina, Sask.—December 18.—Grasseck & Duncan block, Scarth Street. Loss \$600. Insured. Cause, defective chimney.

Windsor, Ont.—December 19.—Mr. J. Hunter's barn and contents. Loss \$4,300. Insurance \$800. Cause, supposed incendiary.

Yarmouth, N.S.—December 13.—Halifax and South Western Railway roundhouse. Loss unknown. Cause, supposed sparks.

Dunvegan, Ont.—December 18.—Mr. N. R. McRae's outbuildings and farm stock. Loss \$4,000, partly insured. Cause unknown.

South Vancouver, B.C.—December 14.—Mr. Champion's residence, Sherbourne Street. Loss \$9,000. No insurance. Cause unknown.

Melita, Man.—December 17.—Mr. W. H. Ailley's barn and stable. Loss \$8,000. Cause, supposed incendiary, 4 horses were burned.

Cobalt, Ont.—December 23.—Power Company's dinitro-lide factory at Short Lake. Loss \$12,000. Cause electric light bulb exploded.

Paisley, Ont.—December 11.—Mr. S. Fleming's barn and contents, town line between Bruce and Saugeen. Loss unknown. Cause, upset lantern.

Quebec, Que.—December 25.—La Libre Parole newspaper office owned by Senator Choquette. Loss \$15,000. Insurance \$8,000. Cause, supposed defective wiring.

Sussex, N.B.—December 25.—Brick block owned by Mr. G. W. Fowler, M.P.; Bank of New Brunswick slightly damaged. Loss \$30,000. Cause unknown.

Quebec, Que.—December 20.—Mr. V. Chateauvert's residence and stable, on St. Voye Road. Loss \$16,000, partially insured; 18 horses and 7 cows were burned.

Edmonton, Alta.—December 18.—Messrs. Kemp and Son, plumbers, and Winnipeg Dry Cleaner's premises, Namayo Avenue. Loss unknown. Cause, supposed stove.

St. John, N.B.—December 21.—Mr. J. D. O'Neill's barn, 9 Long Wharf. Loss unknown. Cause, defective chimney. December 19.—Magee Block. Loss \$700. Cause unknown.

Hamilton, Ont.—December 18.—Mr. W. Holt's conservatory, 420 Garth Street. Loss slight. Cause, hot soot; Wentworth Street school. Loss \$35. Cause, spontaneous combustion in oily waste.

December 23.—315 Wellington Street. Loss slight. Cause, lamp exploded; 154 Sophia Street. Loss small. Cause, defective chimney.

December 24.—36 St. James Street North. Loss \$500. Cause, defective furnace.

Oakville, Ont.—December 14.—Basket factory. Loss slight. Cause unknown.

December 18.—Canadian Pacific Railway collision. Several freight cars burned.

Delhi, Ont.—December 23.—Two business blocks. The principal losses are: Mr. A. W. Cryslar, \$14,000; Mr. G. G. Byers, druggist and stationery, \$5,000; Mr. H. S. Morgan, \$7,000; Mr. T. E. Morgan, \$14,000; Mr. E. Morgan, \$10,000. Other buildings destroyed were the Masonic Hall and the Great North Western telegraph office. Total loss about \$60,000, partly covered by insurance.

Montreal, Que.—December 17.—Mr. M. Allard's residence, corner Fifth Avenue, Maisonneuve. Loss \$100. Cause unknown.

December 18.—Street car damaged. Cause, wire under floor fused.

December 17.—Mr. D. F. Angus' residence, 248 Drummond Street. Loss and cause unknown; Ogdensburg Coal Company's sheds. Loss unknown. Cause, spontaneous combustion.

December 19.—Mr. N. Narcotte's residence and store, Notre Dame and St. Augustin Streets, St. Henri. Loss \$50,000. Cause unknown. Water pressure said to be practically useless; Mr. P. Demers' sash and door factory, corner Waverley and Van Horne Avenues. Loss \$60,000. Insurance \$18,000. Cause, supposed boiler explosion.

December 20.—Messrs. Dupree & Company, 230 William Street, Maisonneuve. Loss \$700. Cause unknown.

Toronto, Ont.—December 12.—Mr. F. Carey's residence, 55 Delarey Crescent. Loss \$50, building. No insurance. Cause, defective grate; Mrs. Spring, 21 Portland Street. Loss \$25. Cause, thawing water pipes.

December 13.—13, 14 and 15 Pickering Avenue. Total loss \$2,450. Cause, lamp exploded.

December 14.—Mrs. J. Hockett's residence, 99 Essex Avenue. Loss, building \$100, contents \$25; Mr. A. Hedley's residence, 101 Essex Avenue. Loss, building \$5. Cause of both fires, upset lamp.

December 16.—Mr. A. G. Gee's residence, 166 Emerson Avenue. Loss building \$100. Cause, defective grate; Mr. H. Barrett's residence, 1265 King Street West, owned by Mr. J. H. McDonald. Loss contents \$100, building \$20.

December 20.—Building occupied by Manton Bros., ink manufacturers. Loss \$2,000; Mr. W. J. Mitchell, wholesale leather goods manufacturer \$1,000. Building \$1,000. Cause unknown.

December 21.—General Fire Extinguisher Company, Dundas Street and Chelsea Avenue. Loss and cause unknown. Canadian Pacific Railway coal chutes at West Toronto. Loss unknown. Cause, friction of machinery.

December 25.—The Robert Simpson Departmental Store. Loss slight. Cause unknown.

December 23.—Mr. R. Purvis, Clendennan Avenue North, Earls court. Loss \$800. Insurance \$600. Cause unknown.

December 23.—City surveyor's office, city hall. Loss slight. Cause unknown.

ST. CATHARINES' FIRE LOSSES

Fire Chief Early in his annual report states fifty-three alarms of fire were turned in during the year. The value of buildings endangered by fire was \$97,000, and the contents of the buildings were valued at \$130,000. The insurance on buildings was \$68,350, and on contents \$53,450, making a total insurance of \$121,800. The loss on buildings was \$5,639, and on contents \$3,543, making a total loss of \$9,185. There were five losses on property on which there was no insurance, amounting to \$622. This brings the total loss to \$9,807, and basing the population of the city at 14,741, the loss per capita is a little over 66.12 cents.

NOVEMBER STATEMENT OF CHARTERED BANKS

Circulation Continued to Expand—Larger Call Loans Were Made Abroad, and Those at Home Reduced—Deposits Declined Slightly

	Nov., 1911.	Oct., 1912.	Nov., 1912.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	\$341,712,265	\$383,814,572	\$376,829,372	+10.2	— 1.8
Deposits after notice	588,942,142	640,097,928	635,810,703	+ 7.9	— 0.6
Current loans in Canada	770,356,419	879,676,655	874,721,593	+13.5	— 0.5
Current loans elsewhere	38,991,698	41,300,588	40,925,744	+ 4.9	— 0.9
Call loans in Canada	72,033,493	73,959,866	70,668,521	— 1.8	— 4.4
Call loans elsewhere	87,489,665	101,186,983	111,812,858	+27.8	+10.5
Circulation	101,943,056	110,696,877	115,473,098	+13.2	+ 4.3

The above are the principal items in the November bank statement, with comparisons with the figures of the previous month and a year ago. For the first time in a lengthy period, several decreases are observable. Deposits on demand during November declined \$7,000,000, or 1.8 per cent. Deposits after notice, usually granted to be the savings of the people, dropped about \$4,000,000, or 0.6 per cent. That was probable due, to some extent, to the demand of the present festive season. Current loans in Canada decreased \$5,000,000, or 0.5 per cent. This would indicate that the heaviest part of the crop financing has been completed. Current loans abroad show a small decrease of 0.9 per cent., and call loans in Canada one of approximately \$4,000,000, or 4.4 per cent. Brokers have complained of restrictions placed by the banks on this account, but judging by the Montreal and Toronto Stock Exchange daily transaction sheets, business is apparently not very active.

Another indication that the crop financing is almost completed is that call loans abroad, which have been declining during the past few months, increased in November by over \$10,000,000, or 10.5 per cent. A large part of this money is probably in New York. The Bank of Montreal and the Royal Bank, account for practically the whole of the increase in call loans abroad. Circulation shows a further gain, being \$5,000,000, or 4.3 per cent., above that of October. The following table shows the course of the loan accounts in Canada during the past thirteen months:—

	Current. in Canada.	Call in Canada.
1911—November	\$770,356,419	\$72,033,493
December	774,909,172	72,640,526
1912—January	775,972,243	71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855
July	852,253,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521

Current loans in Canada last month were over \$100,000,000, or 13.5 per cent. greater than a year ago. This is a gratifying comparison. During the past thirteen months, this account has been enlarged every month with two exceptions, one of them being last month. Call loans in Canada have varied from \$68,000,000 to \$75,000,000, the highest amount being reached in August, when the total was \$75,194,735. Canadian call loans last month were about \$2,000,000, or 1.8 smaller than a year ago. The lowest point in this account was reached in May, when the amount was \$68,305,157. The following table gives a clear idea of the fluctuations of the current and call loans for the past four years, both in and out of Canada:—

	Current loans in Canada.	Current loans elsewhere.	Call. loans in Canada.	Call loans elsewhere.
November				
1908	\$515,695,476	\$27,899,016	\$42,730,261	\$85,220,634
1909	590,291,944	35,358,214	57,875,677	134,836,591
1910	677,617,478	42,396,585	62,866,513	96,404,136
1911	770,356,419	38,991,698	72,033,493	87,489,665
1912	874,721,593	40,925,744	70,668,521	111,812,858

Current loans since November, 1908, have increased by \$359,000,000. Those elsewhere show a comparatively small gain, or only \$13,000,000. Call loans in Canada in the same period have increased \$28,000,000, while those abroad have made a gain of \$26,000,000. The next table gives an idea of the changes in the deposits accounts for the past thirteen months:—

	On demand.	After notice.
1911—November	\$341,712,265	\$588,942,142
December	335,020,693	591,068,932
1912—January	316,936,962	596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,668,596
September	374,368,917	640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703

Demand deposits last month were \$35,000,000, or 10.2 per cent. greater than a year ago. During that period, they have shown one or two decreases, but the general tendency is upward. Deposits payable after notice are 7.9 per cent. greater than in November, 1911, and only three times in the past year have they shown a decrease, in each case comparatively small. The growth of deposits is observed in a striking manner in the following table:—

November.	On demand.	After notice.	Total.
1908	\$206,315,809	\$419,920,274	\$626,236,083
1909	264,285,803	493,253,823	757,539,626
1910	289,759,025	551,113,835	840,872,860
1911	341,712,265	588,942,142	930,554,407
1912	376,829,372	635,810,703	1,012,640,075

Since 1908 demand deposits have increased by \$170,000,000, after notice deposits by \$216,000,000, and total deposits by \$386,000,000.

A close examination of the bank statement proves it to be an acceptable document, especially in view of the prevailing business season of the year.

In view of the complications surrounding La Banque Internationale, its figures for the past two months are of interest:

Account.	October.	November.
Notes in circulation	\$1,082,875	\$ 943,740
Demand deposits	426,195	367,143
After notice deposits	501,663	446,428
Deposits elsewhere than in Canada...	17,970	4,291
Total liabilities	2,037,665	1,769,026
Railway and other bonds, debentures and stocks	3,146	81
Current loans in Canada	1,344,005	1,098,799
Current loans out of Canada	76,928	100,499
Overdue debts	6,370	92,651
Total assets	3,386,289	3,093,889

PLATE GLASS INSURANCE.

The organization of the Montreal Board of Plate Glass Underwriters has been completed and the representatives of several of the plate glass companies in the United States doing business in Canada have become members. The report of the committee of rates and commissions has been adopted and the new rates are already in force. The board has adopted a rule of writing annual policies only and discontinuing three-year policies hereafter, as it was found that, owing to the continually increasing cost of plate glass and a resulting extra expense of making replacements, the companies were being discriminated against when a rate was quoted for a three-year

term because of the impossibility of gauging so far in advance the expense of making the replacement. All the important companies of the Dominion have subscribed to the new order of things and several of the French companies have become members.

At a meeting of the Plate Glass Underwriters' Association of Toronto a rule was adopted providing for the continued insurance of replaced plates without additional premium. The association also rescinded its action of a previous meeting regarding a change of rate in the Province of Manitoba. The question of supplemental action on rates in British Columbia was deferred.

T. C. BOVILLE,

Deputy Minister of Finance

CALGARY'S INDUSTRIAL CAMPAIGN

Endeavors Have Been Successful—Looking Ahead— Manufacturers and Western Canada

(Special Correspondence).

Calgary, December, 23rd.

One year ago there was inaugurated a three-year campaign, having for its object the presentation of Calgary's manufacturing opportunities. Citizens subscribed to the extent of \$100,000, and the executive committee of the industrial and development bureau have submitted their first report. Though difficult to set forth in tabulated figures (for, of the thousands of newcomers who have made their home in the commercial metropolis of Southwestern Canada this year, very few came forward to state what first prompted the thought to locate here), the executive committee showed that four industries, employing 235 men and having more than one million dollars invested, were in active operation as a result of the bureau's work; that six more plants were being built to employ 1,800 men; and two others had acquired factory sites to employ 260 men. There are in Calgary to-day 59 manufacturing industries of and above the grade recognized by the Dominion census as such, their investment is \$18,000,000 and they alone will have 3,400 employees, apart altogether from the Canadian Pacific locomotive and car shops with 5,000 men. Thus, Calgary is the third largest industrial centre in Western Canada, being surpassed only by Winnipeg and Vancouver.

Came Without Bonusing

Dealing with the question of bonusing new industries, as resorted to by many municipalities, the report says: "The industries which have come to Calgary have come without an offer or expectation of anything in the shape of a bonus. It is only such communities as are handicapped by disadvantages of location, market or transportation, that have to resort to the practice of bonusing industries, and sooner or later such communities must reap the results of their own indiscretion by being obliged to pay a greatly increased tax. Furthermore, the bonus-bought factory is generally the weakest species, and its prospects of success are in doubt from the beginning."

Work Achieved and Proposed

A feature of the bureau's work was the appointment of a committee to report upon and, where advisable, give encouragement to manufacturers proposing to locate in Calgary and seeking to raise not more than fifty per cent. of their capital locally. Of the propositions thus submitted, some were approved, and some disapproved. The work of this committee has been valuable in protecting the local investing public from enterprises of questionable merit.

Reduction in the price of natural gas for power purposes is noted as another result of the bureau's endeavor, and the executive will endorse any reasonable effort by the city council to secure an even cheaper supply.

A proposal put forth by the executive, is that of having "ready made" factories for housing, in the first instance, small manufacturers who, on account of limited capital, are unable to build. It is suggested that the city council appropriate sufficient funds to make a start in this direction. The city owns plenty of factory sites and power, and a comparatively small sum would try out the idea.

Western Canada is Attracting Manufacturers

"There are indications that the future holds in store a greater development for western Canada. Manufacturers in eastern Canada are giving more consideration to the establishment of branch factories west of the Great Lakes than before, and are even being urged by the federal ministers, in public addresses, to extend their manufacturing operations into the prairie provinces. United States manufacturers also have their eyes on western Canada as a manufacturing field, and not without cause, for manufacturers from the States are selling one million dollars' worth of goods to Canada every day, whereas not so many years ago this sum represented a month's shipment of United States goods into Canadian territory. As a further illustration, recently compiled figures show that within three years the shipments of American goods into Canada have doubled.

"Increasing inquiries from the British Isles indicate that the British manufacturer sees that, with the opening of the Panama Canal, Alberta will offer to him greater opportunities than before, and he is already preparing to take advantage of the changed conditions which will obtain when the canal is in operation."

The gentlemen who are responsible for this report are Messrs. L. P. Strong, president, also president of the Western Trade Routes Association; O. G. Devenish, T. J. S. Skinner, P. Burns, B. L. Robinson, Thoburn Allan, J. M. Davidson, J. T. MacDonald and J. M. Carson.

Messrs. Wegenast & Truman wrote informing the Hamilton board of control that the insurance premium on the fire truck would be increased from \$300 to \$350. It was decided to offer the company the old premium of \$300, and if this should not prove satisfactory to place the risk elsewhere.

ST. LAURENT AND MOUNT ROYAL FRANCHISES

For Public Utilities Granted to Montreal Corporations —Franco-Belgian Syndicate Makes Transfer

Monetary Times Office.

Montreal, Dec. 26th.

An ending somewhat characteristic of present-day developments has taken place in the case of the franchise for the public service of the municipality of St. Laurent and the disagreement between that municipality and the new Model City of the Canadian Northern Railway. It may be recalled that the Franco-Belgian Syndicate some time since obtained the franchise for the supply of water for the town but refused to post the deposit of \$20,000, being no doubt desirous of obtaining the franchises for all the public services. Later, the council granted franchises for water supply, lighting and street railway service to the company, the conditions being that the franchise was for twenty-five years, work on the waterworks and on lighting to be commenced within thirty days of notice from the council, and the railway to be commenced within six months of the adoption of the by-law now before the legislature at Quebec.

Small Capital but Sufficient Resources

The Franco-Belgian Syndicate only had a capital of \$100,000, but was applying to the Dominion Government for an increase to \$2,000,000, and the representatives of the company claimed they had lots of French and Belgian capital behind them and were well able to post their \$50,000 deposit.

It was a little significant that the Montreal Tramways Co. was not making a very strong agitation against the granting of the franchise, so far as known. When the matter came up before the Quebec legislature, it developed that the Franco-Belgian Syndicate had turned over its franchise for street car service to the Montreal Tramways Company and its lighting franchise to the Montreal Public Service Corporation. These concerns are those with which Mr. E. A. Robert, M.L.A., is particularly interested and which are included as subsidiaries in the Montreal Tramways and Power Company. It was suggested that Mr. Robert should not vote in the matter when it came up at Quebec, but the point was not pressed for the reason that the government had a large majority in any case.

Opposition Was Not Successful

In the above connection, also, the legislature sanctioned a twenty-five year franchise for the Montreal Tramways Co. for the street car service for the Canadian Northern Railway "Model City," the name of which town was changed at the same sitting of the legislature to "Mount Royal." Also, at the same meeting, a fifteen-year franchise was given the Montreal Public Service Corporation for the lighting of the streets of Mount Royal. The counsel for the Montreal Light, Heat and Power Co. was on hand to object to this on various grounds, among which was the fact that no one yet lived in Mount Royal. He claimed that it was a shame that this company should get the exclusive franchise in this manner when there were so many other companies in the field. The answer made to this remark by the friends of the bill was that the Montreal Light, Heat and Power Co. should have thought of this when they were getting their privileges in 1901 and that if they were prepared to give up their exclusive franchises the other companies were prepared to do the same.

Water Franchise Was Dropped

As a result of the final revision made by the private bills committee of the legislative assembly, the Montreal Tramways Company, and allied interests, abandoned their exclusive franchise for the construction of a water works system in the parish of St. Laurent, and retained the exclusive franchises for the tramways service, and the supply of electric light and power. These franchises are for the period of twenty-five years each. The protests of the electors of the parish of St. Laurent and the vote they had taken against the water works privilege being limited to one company, were not commented on in any way.

The legal representative of the company, Mr. Rinfret, moved that the reference to the water works by-law, which the bill asked to be sanctioned with the two other by-laws, be omitted, and this was followed by the further amendment, also included in the bill of Mount Royal in favor of the protection of vested rights.

Honorable Mr. de Varennes, chairman of the committee, inquired whether the representative of the parish of St. Laurent consented to the change, and Mr. Jasmine nodded consent.

Regina, according to the report of the underwriters' inspectors, ranks the second lowest city in fire insurance rates in the west. Calgary is the only one that is lower than Regina. The lower rate for Calgary was obtained this spring. Previous to that time Regina and Calgary were equal in rates. The three great factors in lowering insurance rates for house owners of the city are: A good building by-law, perfectly equipped fire department, and good local agents. The building by-law of the city has been considered by experts in convention at Calgary, and features of the by-law which is used in Regina will be embodied in the building by-laws of other cities.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Stratford, Ont.—December 17.—Stratford Mill Building Company's Works. Loss, building \$25,000, stock \$25,000. Insurance, building \$20,000, stock \$20,000.

Toronto, Ont.—Art Metropole. Loss, contents \$54,160. Machinery and fixtures \$1,750, building \$5,800. Insurance, contents \$28,000, Law Union and Rock; building, \$42,500, Royal, and Scott and Walmsley Companies, \$42,500; machinery and fixtures, \$3,500. Messrs Ross and Wright, Toronto, adjusters for the insured.

103-5 Elizabeth Street, Manton Brothers. Loss, building \$1,000; contents \$2,000. Insurance, building with London, Liverpool and Globe; contents, with Dominion Gore and Monarch Companies. Messrs. Ross and Wright, Toronto, adjusters for the insured. Messrs. W. & J. Mitchell's loss \$300, insured with Hartford & Royal Companies. Messrs. Ross and Wright, Toronto, adjusters for the insured.

Gendron Manufacturing Company. Loss, stock \$2,300; building \$1,500. Insurance, building \$2,750; stock \$1,000; with Dominion and Hand-in-Hand Companies. Messrs. Ross and Wright, adjusters for the insured.

Yarmouth, N.S.—Insurance loss, fire, December 10th.—Atlantic Mutual, \$364; Aetna, \$750; Acadia, \$785; Anglo-American, \$826; Atlas, \$119; British America, \$44; Canadian, \$2,029; Caledonian, \$441; Commercial Union, \$3,091; Dominion, \$357; Equity, \$65; Fidelity-Phoenix, \$1,600; Guardian, \$1,336; German-American, \$1,046; Home, \$2,037; Halifax, \$233; Hartford, \$1,600; Lloyds, London (Motor Cars), \$3,725; Law, Union & Rock, \$130; London Assurance, \$1,500; Liverpool, London & Globe, \$2,007; London Mutual, \$40; Mutual Fire, \$414; Nova Scotia, \$677; North America, \$1,191; Northern, \$2,250; Norwich Union, \$885; New York Underwriters, \$22; Occidental, \$843; Phoenix of London, \$190; Phoenix of Hartford, \$1,327; Queen, \$131; Royal, \$1,114; Rimouski, \$364; Sun, \$1,000; Springfield, \$583; Union, \$817; United London & Scottish, \$30; Western, \$1,051; Yorkshire, \$30; total, \$37,174. Property loss estimated at \$53,000.

DECEMBER IN WESTERN CANADA

Monetary Times Office,

Winnipeg, December 24, 1912.

Merchants generally report a satisfactory Christmas business, though some branches of trade have fallen short of that of past years. This is said to be owing to the mild weather that has prevailed.

Several bank managers state that collections are somewhat improved, but with the large mortgage and loan companies money is not coming in as satisfactorily as it did last year.

Payments are reported to be coming in well from Saskatchewan, much better than from Alberta or Manitoba.

Plans for work and extension of Canadian Pacific Railway lines in the West during 1913 are being considered; they will provide for the construction of over 1,000 miles of new track, which will include 250 miles of double tracking between the head of the lakes and the Pacific Coast. Of branch lines about 650 miles will be constructed, and in the improvement of terminal facilities at Winnipeg and other commercial centres, 100 miles of siding will be built. The double tracking will be a continuation of that already completed to Kenmay, Man., with Calgary, Alta., as the objective point. Already the line between the head of the lakes and Kenmay, Man., is practically completed.

The foregoing applies only to track, the usage of which will mean a large addition of rolling stock.

Additions to dining car service and to rolling stock have during the current year necessitated an addition of 500 men to the permanent employees of the road in the West. These figures are in reference only to those connected with train operation. But during 1913 still larger additions will be made. Plans have been under way to bring the passenger service up to existing requirements. Traffic during the present year has been very heavy and every department has felt the strain.

In addition to the regular and periodic advertising campaigns carried on by the cities and towns of Western Canada, many of them have adopted means of publicity of a combined character, through the instrumentality of the Winnipeg Industrial Bureau. This organization has always taken the position that what is good for the West is good for Winnipeg. About thirty of the more ambitious cities and towns are represented in the bureau's big permanent exposition at Winnipeg. This innovation in methods of publicity is now a big clearing house for information regarding almost the entire West, and thus information can be obtained regarding towns far away, and hundreds of miles apart, under one roof with a minimum expenditure of time and effort.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

St. Boniface, Man.—The Norwood Bridge by-law was carried.

Assinibola, Man.—The by-law to raise \$17,000 for roads was carried.

Port Arthur, Ont.—By-laws totalling more than \$500,000 will be voted upon January 6th.

London, Ont.—Until December 30th, for \$231,400 debentures. J. S. Bell, city treasurer.

North Vancouver, B.C.—Six money by-laws, aggregating in value half a million dollars, were passed.

Cobalt, Ont.—The council passed a by-law to raise \$10,000 for school expenditures and improvements.

Rosser, Man.—The money by-law authorizing the borrowing of \$110,000 for road improvements was carried.

Hamiota, Man.—On January 4th the electors will vote on a by-law to borrow \$7,000 for school purposes. Jos. Andrew, secretary-treasurer.

The Pas, Man.—On January 8th the ratepayers will vote on a by-law to issue \$120,000 for waterworks and sewerage system. D. Clapp, town clerk.

Million S.D. No. 1603, Man.—Until January 15th for \$1,000 6 per cent. 10-year debentures. E. K. Minor, Million, secretary-treasurer. (Official advertisement appears on another page.)

Calgary, Alta.—Until January 14th, 1913, for \$25,000 10-year 4½ per cent. school, and \$950,000 4½ per cent. 40-year school debentures. A. T. Jewitt, secretary-treasurer, Calgary Public School Board.

Calgary, Alta.—Five by-laws were carried by the ratepayers authorizing the expenditure of \$700,000 for additional fire equipment, fire station sites, street railway equipment and the extension of sewers and municipal plant.

Fort William, Ont.—By-laws to raise \$50,000 to carry out an agreement with Canadian Steel Foundries, Limited; to raise \$10,500 for roads and bridge improvements; and \$140,000 for street railway purposes will be voted upon June 6th.

Kamsack, Sask.—Until January 15th for \$2,000 5½ per cent. 5-year hospital, \$5,000 5½ per cent. 15-year road, and \$20,000 5½ per cent. 20-year town hall debentures. A. A. Crawford, secretary-treasurer. (Official advertisement appears on another page.)

Sarnia, Ont.—Application will be made to the Ontario Legislature at the next session, for an act validating the following debenture by-laws:—\$240,000 for waterworks extension; \$40,000 for public school; and \$11,080 for local improvements. Messrs. Cowan and Towers, are the town's solicitors.

Brandon, Man.—By-laws to borrow \$125,000 for the purpose of building a new school; to guarantee the bonds of the Western Arts and Agricultural Association to the value of \$50,000; to raise \$12,000 for certain repairs made on the city hall; to borrow \$17,000 for the purpose of purchasing a quarter section of land, were carried.

Edmonton, Alta.—Edmonton will shortly make an offering of debentures authorized by thirteen by-laws, and aggregating \$1,245,000. These issues have been authorized some time ago, and in most cases the money has been expended, but the debentures have not yet been placed on the market. These issues represent expenditures as follows:—Addition to Isolation Hospital, \$110,000; site for civic offices, \$76,000; civic office building, \$225,000; golf links purchased for park, \$310,000; old school sites bought for parks, \$26,000; police station, \$75,000; land for addition to telephone building, \$50,000; hillside for park purposes, \$60,000; site for new car barn, \$50,000; bridge 42nd Street ravines, \$25,000; sites for telephone sub-stations, \$22,000; various small parks and driveways, \$150,000; site for warehouse city stores department, \$66,000.

CEDAR RAPIDS FINANCING

The shareholders of the Cedar Rapids Power Company will be asked at a meeting on Friday to give authority to the directors to redeem any part of the authorized bond issue of \$10,000,000 and also to authorize the company to issue bonds up to \$15,000,000. Several forms of financing are under consideration. In November the directors received authority to increase the company's capital from \$10,000,000 to \$15,000,000 and the forthcoming meeting will consider what form the increase will take. The present issue of common stock is \$8,000,000 and bonds of \$1,500,000.

THE NORTHERN CROWN BANK

REPORT OF THE PROCEEDINGS

of the

Seventh Annual General Meeting of Shareholders

Held at the Banking House, Winnipeg, on

Wednesday, December 18, 1912

The Seventh Annual General Meeting of the Shareholders of the Northern Crown Bank was held at the Banking House, Winnipeg, on Wednesday, 18th December, 1912, at 12 o'clock noon.

There were present:—Messrs. A. G. Lindsay (Stony Mountain), John Body (Blythfield), W. H. Gibbs (Selkirk), John Stovel, R. J. MacPherson, Jas. Leslie, Hon. D. C. Cameron, H. T. Champion, Sir D. H. McMillan, N. Bowman, H. Keech, Sheriff Inkster, R. H. Nunn, Dr. Hutchison, A. B. Hudson, F. Steele, Angus Grant, G. W. Baker, R. R. J. Brown, G. W. Northwood, W. Russell, N. Bawlf, Wm. Cross, and others.

The President, Sir D. H. McMillan, K.C.M.G., having taken the chair, it was moved by Mr. H. T. Champion, seconded by Mr. Wm. Russell, that Mr. Robert Campbell, the general manager, be appointed to act as secretary, and that Messrs. John Stovel and R. J. MacPherson be appointed to act as scrutineers.

The President called upon the Secretary to read the Annual Report of the Directors, as follows:—

THE REPORT

The Directors of the Northern Crown Bank beg to submit to the shareholders the Seventh Annual Report, showing the result of the Bank's business for the year ended 30th November, 1912, together with the usual statement of Assets and Liabilities as at that date:—

THE NORTHERN CROWN BANK.

Statement of the Result of the Business of the Bank for the eleven months ended 30th November, 1912.

The Balance at Credit of Profit and Loss Account on the 31st December, 1911, was	\$214,932.98
Taken from Contingent Account to apply on Stock Bonus to shareholders in connection with the Adjustment of difference between Northern and Crown certificates	75,000.00
Net Profits for the eleven months ended 30th November, 1912, after deducting expenses of management, payment of taxes, and making necessary provision for interest due to depositors and for bad and doubtful debts	291,094.04
	<u>\$581,027.02</u>

Appropriated as follows:—

Dividend No. 11 at 6 per cent. per annum, payable 3rd June, 1912	\$55,187.50
Dividend No. 12 at 6 per cent. per annum, payable 2nd December, 1912	72,648.98
Stock Bonus to Northern Bank Shareholders under Clause 7 of the Amalgamation Agreement	186,518.00
Written off Bank Premises and Office Furniture Accounts	30,000.00
Transferred to Reserve Fund	50,000.00
Transferred to Officers' Pension Fund	5,000.00
	<u>\$399,354.48</u>
Balance carried forward at Credit of Profit and Loss Account	\$181,672.54

GENERAL STATEMENT

30th November, 1912.

LIABILITIES.

Capital Stock (paid up)	\$ 2,677,996.21
Reserve	300,000.00
Profit and Loss Account	181,672.54
	<u>\$ 481,672.54</u>

Unclaimed Dividends	493.25
Half Yearly Dividend, payable 2nd December, 1912	72,648.98
	<u>554,814.77</u>
	<u>\$3,232,810.98</u>
Notes of the Bank in Circulation	\$ 2,632,165.00
Deposits not bearing Interest	4,756,308.00
Deposits bearing Interest	10,915,512.37
Balances due to other Banks in Canada	4,911.56
Balances due to other Banks and Agencies in the United Kingdom	1,806.82
Balances due to other Banks and Agents elsewhere than in Canada and the United Kingdom	156,372.84
	<u>18,467,076.59</u>
	<u>\$21,699,887.57</u>

ASSETS.

Gold and Silver Coin Current	\$ 216,536.11
Government Demand Notes	981,212.85

Deposit with Dominion Government required by Act of Parliament for security of General Bank Note Circulation	\$ 101,600.00
Due by Agents and other Banks in Canada	184,710.48
Due by Agents and other Banks in the United Kingdom	46,715.04
Due by Agents and other Banks elsewhere than in Canada and the United Kingdom	73,573.35
Dominion and Provincial Government Securities	65,000.00
Canadian Municipal and Foreign Public Securities	129,222.59
Railway and other Bonds, Debentures and Stocks	610,507.31
Notes of and Cheques on other Banks	2,062,598.89
Call and Short Loans on Stocks and Bonds in Canada	503,225.41
	<u>3,777,153.07</u>
Current Loans and Discounts	\$16,110,495.80
Bank Premises and Office Furniture, Winnipeg and Branches	347,034.90
Real Estate other than Bank Premises	96,684.05
Mortgages on Real Estate sold by the Bank	36,147.31
Overdue Debts, secured and unsecured (estimated loss provided for)	77,727.19
Other assets not included under the foregoing heads	56,896.89
	<u>16,724,986.14</u>
	<u>\$21,699,887.57</u>

The Northern Crown Bank,
Winnipeg, 30th November, 1912.

R. CAMPBELL,
General Manager.

The statement shows that the Bank maintains its high earning power, being over 11 per cent. on its combined Capital and Rest.

Deposits have again increased during the year by approximately \$2,000,000.

All the Branches and the Head Office of the Bank have been carefully inspected.

Since last Annual Meeting the Subscribed Capital of the Bank has been increased from \$2,207,500 to \$2,862,400—of this amount \$2,677,996 was paid up at 30th November, 1912.

The Bank's Rest has been increased to \$300,000.

Suitable premises have been acquired at Calgary and Moose Jaw, and the Toronto premises are being remodelled.

Branches of the Bank have been opened at Yorkton, Sask.; Swift Current, Sask.; Marengo, Sask.; Tate, Sask.; Fiske, Sask.; Powell Street, Vancouver, B.C.; Oak Bay Junction, Victoria, B.C.; Rockhaven, Sask.; Rush Lake, Sask.; Waldeck, Sask.; Holdfast, Sask., and La Riviere, Man.

D. H. McMILLAN,
President.

In moving the adoption of the report, Sir D. H. McMillan, the President, said:—

It is a pleasure to me, and to your Directors, to be in a position to again submit to you such a favorable statement of the Bank's affairs.

You sanctioned a by-law at the last Annual Meeting, changing the end of the Bank's financial year from the 31st December to the 30th November, and fixed the Annual Meeting on the third Wednesday in December, instead of the second Wednesday in February. The report now submitted to you therefore, covers only eleven months instead of twelve.

As foreshadowed in the Vice-President's address at the last Annual Meeting, new stock was issued in order to bring the Capital of the Bank up to \$3,000,000 and incidentally to adjust the undesirable difference that existed between the Northern Certificates and the Crown Certificates, by reason of the terms of Clause 7 of the Amalgamation Agreement, which provided that a stock bonus would be paid to the bank whose assets, in respect of its Paid Up Capital, exceeded the Assets of the other Bank. You will recollect that when the Assets of the two banks were valued, it was found that the assets of the Northern Bank exceeded the assets of the Crown Bank by \$186,518, which amount was just 15 per cent. of the Paid Up Capital of the Northern Bank at the date of the amalgamation. This stock bonus was to be applied only in part payment of the new allotment of stock. All of the allotment of new stock to holders of Northern Bank Certificates was taken up, and about two-thirds of the allotment to holders of Crown Bank Certificates. It was therefore necessary to take \$186,518 out of our Profits to apply in part payment of the shares allotted to holders of Northern Certificates.

In 1910, \$75,000 was placed to the credit of Contingent Account, in anticipation of this adjustment. The adjustment was affected with this \$75,000 which we took back from Contingent Account, together with \$33,000 taken from Profit and Loss Account and \$78,000 from the profits of the year.

The net profits for the eleven months dated 30th November, 1912, were \$291,094.04, as against \$285,694 for the twelve months ended 31st December, 1911. And in this connection, I may say that the month of December, which was the month cut out of 1912, is one of the most profitable months of the year, owing to the heavy collection of notes, and the profits incident to the movement of grain. It is safe to say that if the profits of the month of December had been included in the profits of 1912, the total would have been at least \$25,000 more, making \$316,000 as against \$285,000 last year. To this \$291,094.04, being the net profits for the year 1912, we added \$75,000 taken from Contingent Account and \$33,260.44 taken from Profit and Loss Account (for the purpose of adjusting the stock difference as already explained).

making a total of\$399,354.48
Out of this dividends amounting to 127,836.48

were paid to shareholders, leaving\$271,518.00
which was applied as follows:—
Added to Rest\$ 50,000.00
Added to Officers' Pension Fund 5,000.00
Written Off Bank Premises 30,000.00
To adjust difference in stock 186,518.00

\$271,518.00

This brings the Rest up to\$300,000.00
which, with Profit and Loss 181,672.54
gives us undivided profits of \$481,672.54, as against \$464,932.00 last year.

It will thus be seen that the adjustment of the stock was, as anticipated, carried out with little difficulty, and without impairing the Bank's Undivided Profits, which are now \$17,000 more than they were at the date of the last Annual Statement.

It has been my custom to give you a comparison of the Profits, Deposits, and Total Assets of the Bank in my address each year, in order to show the Bank's progress. The following are the figures up to date:—

	1906	1907	1908	1909
Profits	\$ 50,502	\$ 63,726	\$ 130,324	\$ 193,464
Deposits	4,156,488	4,059,298	9,020,017	10,953,577
Total Assets	6,278,873	7,163,714	13,148,620	15,417,542
		1910	1911	1912
Profits		\$ 258,144	\$ 285,694	\$ 291,094
Deposits		11,077,591	13,893,461	15,671,820
Total Assets		17,064,791	18,878,610	21,699,887

This statement indicates that the business of the Bank continues to grow steadily each year, and that the Profits are keeping pace with its growth.

In the eleven months the increase in Deposits and Assets was about equal to the increase in the twelve months last year. This is a good showing, when it is borne in mind that we look to the last 3½ months in the year for the largest increase in deposits.

During the year, the Bank opened twelve Branches, viz., at:

Yorkton, Sask.	Oak Bay Junction, Victoria, B.C.
Swift Current, Sask.	Rockhaven, Sask.
Marengo, Sask.	Rush Lake, Sask.
Tate, Sask.	Waldeck, Sask.
Fiske, Sask.	Holdfast, Sask.
Powell St., Vancouver, B.C.	La Riviere, Man.

and acquired premises in most desirable locations in the important cities of Calgary and Moose Jaw, where its business is steadily growing in volume. The Toronto premises are undergoing extensive alterations, which will greatly facilitate the operation of the Bank's business in that city, and will result in increased revenue derived from the building.

The Bank is steadily increasing its Eastern business, the chain of Branches which it acquired through the amalgamation with the Crown Bank having proved to be a very valuable acquisition. The question of further extension in the rich Province of Ontario will call for consideration at an early date.

The closing year has been a prosperous one for Canada; Western Canada has participated in the general prosperity to a very satisfactory extent. The progress and development of the west continue with increased impetus.

The increase in population and growth of our towns and cities has been in advance of that of previous years. The acreage in cultivation has been enlarged and the farmer has reaped an abundant harvest.

Railway construction has been vigorously carried forward and in every way the year can be regarded with satisfaction. The outcome has, I believe, justified the optimistic expectations of the opening months of the year.

The position of the West as regarded from the standpoint of to-day, would seem to indicate beyond peradventure, a continuance of the present prosperity and development.

I move that the report now read be adopted and printed for publication.

In seconding the adoption of the report, Mr. J. H. Ash-down said: I have much pleasure in seconding the adoption of the report. I think that the affairs of the bank are in a most excellent condition. They have improved very materially during the last two or three years, and considering the fact that we have only such a short time behind us, and have comparatively little Rest to what the older banks have, we certainly must be well satisfied with the amount of profits for the year.

There are certainly very few banks in the Dominion of Canada that have, in proportion, gained greater advance than we have. You will note this particularly in connection with the profits, which (without going over each of the years), commenced with \$50,502 in 1906, and ended up with \$291,094 for the past eleven months. The figures are very satisfactory for eleven months only, and with one of the most profitable months of the whole year left out.

The bank's year now ends on the 30th November. This has been rendered advisable because of closing our books, and getting everything in order for the opening of the next year. It has become the common practice of most of the banks to close on the 30th November.

The bank's deposits have increased from \$4,156,488 in 1906 to \$15,671,820 in 1912. This shows confidence in the Institution, by the public, and I feel it is most thoroughly justified, and that we are justified in recommending the bank to our friends.

It is the oldest bank we have, organized in the west, and I think the people of the west will more and more deal with it, and as their financial institution, give it their loyal support.

I think the affairs of the bank are in very satisfactory shape. I may say that, so far as the business of the last two or three years is concerned, there have been practically no losses. Anything that the bank has had to deal with of an unpleasant nature has been connected with very early days, and I am satisfied that they will not occur again.

In regard to the arrangement between the Northern and Crown banks: The balance being found in favor of the Northern bank, there were two ways open to arrange it. One was to make a call on the Crown bank shareholders to pay up—and the other way was the one we adopted. I am quite in accord with the arrangement that was made. The Northern shareholders get the benefit of the increased amount of their holdings and the Crown shareholders benefit by the increased market value of their stock.

I regret the absence of Capt. Robinson, and am taking his place in seconding the adoption of the report. He has been from the first a very valuable Director. He has put in a great deal of time in connection with the institution. He has gone into the country time and again, and he is to be thanked for our satisfactory premises, particularly at the larger towns. Calgary has been spoken of. Edmonton is another case. The site in Edmonton is in such a position that the bank will be second to none, and at a very light cost.

As to satisfying the public when they want money. That is a pretty difficult thing sometimes, but I think the Northern Crown bank is doing its best for the public in proportion to its means.

I have pleasure in seconding the adoption of the report.

Mr. N. Bawlf then said: I think the statement you have presented to-day is quite satisfactory to the shareholders. I must say that in looking over the amount you have received from the public in deposits (not bearing interest, \$4,756,308, and deposits bearing interest, \$10,915,512.37), I am convinced that the public is very well satisfied with the management, and the way the business of the bank is being conducted.

It has been my pleasure to call at the various offices of this bank, on account of its being a Winnipeg concern. The last place I visited was Calgary. I must congratulate the management, and particularly Capt. Robinson, on the site and very nice premises, with plenty of room and light, acquired at a very little cost to the bank. In connection with all the branches, I must say that this bank has taken great care and has secured in many places the finest and best sites. The remarks of Mr. Ashdown regarding there being no bad debts are most convincing. He assures us that anything of that kind is being carefully guarded against.

The Hon. D. C. Cameron, Lieut.-Governor of Manitoba, then said: I do not see that I can add anything to the very concise, clear and satisfactory statement which has been made to you by your president and Mr. Ashdown. I should like to say, however, that I feel that it is a pleasure to be here, and to endorse what has been said in the statement, and also by Mr. Ashdown on behalf of the directors. I should also like to add my tribute of credit to Capt. Robinson, who is not present. His untiring and unselfish devotion to the bank's interest is well known to all of us.

I congratulate the shareholders of this bank upon its officers, upon their good fortune in the selection of their general manager, and the principal officers of the bank. The president and the directors here have records which speak for themselves. I could not add anything here that would increase your faith in their zeal and their ability to serve this institution for which I think there is a great work in this western country—the establishment of an institution such as this—and although it may seem that this is a day, for this bank, of small things, yet he who despises small things will never attain to great things, and while in comparison with the great institutions which have been in existence for so long, this may seem a small one, I believe that the ratio of progress this bank is making will compare very favorably with any institution that has been created in the Dominion of Canada.

I think that, while twelve new offices established during the last year may seem a good many to establish in one year we will all agree that those who have been optimistic regarding this country, who have had faith in the country, and who have extended their business operations, have been the successful people of the country, and I think with that in view, the bank would be justified in pursuing a policy more aggressive in the future than in the past. I feel that the bank is to be congratulated upon the way in which the president, directors and officers in the various departments of this institution have looked after its affairs.

Mr. H. T. Champion then said: There is little that can be added to what has already been said by the chairman, and the various figures submitted. I should like, however, to refer to the variations in the quotations of the bank's stock. It is now quoted at 97. A month ago the quotation was higher. As there may be some misunderstanding in the minds of the public regarding this, I should like to mention that the drop is not unusual. Most of the bank stocks, owing to the stringency of the money market and other causes, have fallen off several points within the same period.

What should be borne in mind is that the shareholders of the Northern Crown bank are infinitely better off now than they were a year ago. On this date in 1912 the Northern issue was quoted 100, and the Crown issue 92. Anyone seeing that might say that the stock is no higher than last year. But it must be remembered that the Northern shareholders got 15 per cent. more shares of stock given them as a result of the amalgama-

tion, so that the holder of 100 shares who sold them at 100 as then quoted, would just get that figure, but if he sold them now he would have 115 shares, which at 97 would net 111.55 per share on his original holdings. The stock is really 11.55 better than it was a year ago to-day, although it was then quoted at 100, and now at 97.

The Crown shareholders have benefited nearly to the same extent, as a year ago Crown stock could be bought at 92, and to-day at 97 or 98.

I think, as a whole, we may be very reasonably satisfied, and it is satisfactory to have the difference between the Crown and Northern certificates adjusted.

I have been connected with the bank for two or three years, and I have from the very start taken a keen interest in the affairs of the bank. I am glad to have an opportunity of adding my tribute to the noble work done by the president and vice-president. We owe them a deep debt of gratitude for their unselfish devotion. It has been an inspiration to all the other directors of the board, and I think everyone has felt this and given their time and best attention to the bank.

Dr. Hutchinson then said: I have pleasure in moving a vote of thanks to the general manager and staff for the excellent work done during the past year. Personally I feel extremely gratified, and I do not think anything could be added after the very excellent statement and addresses which have been submitted. I, therefore, add a vote of thanks to our board of directors whose names stand out among the most successful business men, whom we can implicitly trust, and to our general manager, who I am sure has inspired confidence in every shareholder in the bank.

Sheriff Inkster then seconded the motion.

In reply, the President said:—

I am sure the directors, general manager, superintendents, inspectors, managers and staff all appreciate the vote of thanks. I can say this for the board, that they take a deep and personal interest in the affairs of the bank. In my experience of boards of financial institutions, I do not think I know of one where the directors attend so regularly as do the directors of the Northern Crown Bank. Some of them are very busy men. Mr. Ashdown, with the cares of a gigantic mercantile establishment extending throughout this great western country on his mind, never misses a meeting when he is in the city. The Lieutenant-Governor attends very regularly. Mr. Champion, who is a busy man, gives a great deal of his time. Captain Robinson not only attends the meetings, but devotes a great deal of his time to the affairs of the bank. So we think, so far as the attention of the directors is concerned, the shareholders may feel satisfied that the interests of the bank are not being neglected.

The directors are now satisfied that they have a very efficient head office management and organization, and they feel that the success of the bank is largely contributed to by the loyal and capable efforts of the managers at the various branches.

It was then moved by Sheriff Inkster, seconded by Mr. John Stovel, that the annual election of directors be now proceeded with.

The election of directors for the ensuing year was then proceeded with, resulting in the return of the same board as for last year, namely:

J. H. ASHDOWN,
HON. D. C. CAMERON.
H. T. CHAMPION,
W. C. LEISTIKOW,
SIR D. H. McMILLAN, K.C.M.G.,
F. NATION,
CAPT. WM. ROBINSON,
SIR R. P. ROBLIN, K.C.M.G.

At a subsequent meeting of the board of directors, Sir D. H. McMillan, K.C.M.G., was re-elected president, and Capt. Wm. Robinson vice-president.

The following gentlemen were elected local directors, namely:

E. Gurney, Toronto; C. Adams, Toronto; J. A. McDougall, Edmonton; John White, Woodstock.

QUESTIONS REGARDING FARMERS BANK FAILURE

At a special session of the Farmers Bank enquiry held by Sir William Meredith, questions were submitted by a committee of members of parliament on behalf of interested constituents to this effect:

"Did the Department of Finance, before issuing the certificate enabling the Farmers Bank to do business, have notice given them that fraud had been practised?"

"Did the department exercise due diligence, after receiving a letter from Mr. Leighton McCarthy notifying them that fraud had been practised?"

"Did the department, after issuing the certificate to the bank, take any steps to recall it or to warn the public?"

"Was a sum of money paid by Travers to any person to induce the issuing of the certificate?"

"Was the failure of the bank in any way caused or influenced by the fact that the amount of capital required by the Bank Act had not been paid up, and that thereby, reckless speculation was induced?"

The annual statement of the finances of the Province of New Brunswick, published in The Royal Gazette for the fiscal year ending October 31, shows the total ordinary revenue \$1,417,722.17, the largest in its history, and an increase over 1911 of \$70,645.12. The expenditures for the year on ordinary account totalled \$1,409,049.38, an increase of \$5,502.53 over 1911. The surplus on the operations of the year 1912 is \$8,672.71, as against a deficit in the previous year of \$56,469.80.

BANK CLEARING HOUSE FOR NEW WESTMINSTER

Bankers Have Organized an Association in the Progressive Pacific Coast City

The bank managers at New Westminster have organized a local clearing house association. The following seven banks have branches in that city: Commerce, Merchants, Montreal, Northern Crown, Royal, Toronto, and Vancouver. The Montreal and Royal have also each a sub-office in the city.

Six in Two Years

Three bank clearing houses were established in 1910, one each at Brandon, Lethbridge and Saskatoon. Three, Moose Jaw, Brantford and Fort William, were established last year. There are now twenty clearing houses in Canada, ten of which are in western Canada and ten in the east. New Westminster will be the twenty-first, and will give the west one more than the east. The following is a list:—

Clearing House.	Commenced Business.
Halifax.....	1886, 1 July.
Montreal.....	1889, 7 January.
Hamilton.....	1891, 15 June.
Toronto.....	1891, 21 July.
Winnipeg.....	1893, 4 December.
Vancouver.....	1898, October.
Victoria.....	1898, 2 November.
Quebec.....	1901, 1 May.
Ottawa.....	1901, 9 September.
London.....	1902, 1 June.
St. John.....	1896, 1 May.
Calgary.....	1906, 18 April.
Edmonton.....	1906, 11 July.
Regina.....	1909, 1 October.
Brandon.....	1910, 1 April.
Lethbridge.....	1910, 1 September.
Saskatoon.....	1910, 15 October.
Moose Jaw.....	1911, 9 February.
Brantford.....	1911, 1 January.
Fort William.....	1911, 19 October.

Figures of the Provinces

The following are the Canadian clearing house figures by provinces for the past three years:—

	1909	1910	1911
Ontario.....	\$1,757,779,723	\$1,956,049,935	†\$2,298,228,008
Quebec.....	1,985,452,773	2,212,268,621	2,501,810,415
Manitoba.....	770,649,322	973,694,051	1,202,192,416
British Columbia..	358,235,823	546,555,892	678,414,170
Alberta.....	139,315,401	231,690,244	368,939,005
New Brunswick...	72,404,500	77,843,546	77,328,182
Nova Scotia.....	95,278,463	95,855,316	87,994,038
Saskatchewan.....	*14,153,244	59,743,982	†176,461,973
Total.....	\$5,203,269,249	\$6,153,701,587	\$7,391,368,207

† Fort William started October, 1911; * Regina started 1st October, 1909; † Moose Jaw started February, 1911.

The clearing house figures for the current week appear elsewhere in this issue. Those for the current year will be printed in the forthcoming annual number.

VANCOUVER BOARD OF TRADE AND PROVINCIAL DEVELOPMENT

(Staff correspondence.)

Vancouver, B.C., December 23.

The Vancouver board of trade is taking up matters of material benefit to the province as a whole, one of which is the question of securing actual settlers for the land. There has been criticism of the manner in which the land resources of the province have been administered, and the board of trade committee have had the matter under consideration for months. The substance of its report is that care should be taken to exclude the speculator, to encourage the settler and to help the man who would till the soil, practical assistance being given by the government.

The mining committee of the board of trade, in its report, points out the handicaps under which the industry is working. Reports cannot be had under three or four years, it is declared, and one recent instance is cited that though certain field work was completed in the Kettle River district in the fall of 1911, no report is yet available.

The Canadian Northern Railway and the city of Vancouver are getting together in regard to the occupation of the head of False Creek, and the agreement which was arrived at some time ago is being slightly modified. As much haste as possible is being made, so that the matter be submitted to the ratepayers and, if approved, a start made on the work.

The railway company proposes big works, which will mean much for the whole coast district.

That the expansion in British Columbia has been general is shown by the figures of growth given out by the British Columbia Telephone Company. In two years, its telephones have increased to 35,324, being an increase of 80 per cent. Growth is apparent in all the larger cities of the province, even to Nanaimo, on Vancouver Island, and Kamloops on the mainland, the percentage of increase ranging from 48 to 96 per cent. Extensive preparations are now in hand by the company to provide facilities needed by a large number of people, particularly in the vicinity of Vancouver and Victoria.

PERSONAL NOTES

Mr. Alan C. Dunlop has been elected a member of the Montreal Exchange.

Mr. Beaumont Boggs was re-elected as president of the Victoria real estate exchange.

Mr. H. J. Robinson has been appointed secretary of the Saskatoon Retail Merchants' Association.

Mr. Sidney L. Forrest has arrived at Vancouver to succeed Mr. C. G. Pennock as manager of the Vancouver branch of the Bank of Ottawa.

Mr. H. Vincent Meredith has been elected a director of the Guarantee Company, of North America, in succession to the late Sir Edward S. Clouston.

Mr. Cecil M. Twiss, who for four years has represented the Manufacturers' Life Insurance Company at Brandon, has been appointed to succeed Mr. R. G. McCuish as manager at Winnipeg.

Messrs. Farquhar Robertson, G. L. Cains and Alfred B. Evans have been elected as the new directors of the Merchants Bank, the number of directors being increased from nine to twelve.

Mr. R. G. McCuish has been appointed Montreal manager of the Manufacturers' Life Insurance Company. On leaving Winnipeg he was tendered a farewell banquet by the agency's force of the company.

Mr. W. F. Morgan Dean has resigned the management of the Northern Crown Bank, Bracebridge, Ont., to take charge of the bond and debenture department of the Mercantile Trust Company of Canada, Limited.

Mr. R. Home Smith, manager of the Toronto office of the National Trust Company, and who for some years has had in his charge the administration of estates for the company, is retiring, having resigned his position to devote his time to the development of his Humber Valley properties. Mr. Geo. H. D. Lee, late of the legal firm of Mulock, Lee, Milliken and Clark, is to be estates manager of the company at its Toronto office.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of November, 1912, incorporating James Stellar Lovell, accountant; William Bain, bookkeeper; Robert Gowans and Joseph Ellis, solicitors' clerks; and Samuel Goodman Crowell, solicitor, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To buy, sell and deal in lands and any interests therein and to carry on the business of a general construction company and contractor and to enter into contracts for, construct, execute, own and carry on all descriptions of works; (b) To acquire by purchase, subscription or otherwise and to hold, sell, exchange, pledge or otherwise dispose of bonds, debentures or other securities made or issued by any corporation and any indebtedness of any corporation, also shares in the capital stock of any corporation; (c) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation; (d) To procure for any corporation and to convey and assign or cause to be conveyed and assigned thereto any properties, real and personal, rights, privileges, powers, contracts, concessions and franchises, which such corporation may be authorized or empowered to take or acquire. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Aztec Securities Company, Limited," with a capital stock of ten thousand dollars, divided into 100 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 26th day of November, 1912.

THOMAS MULVEY,

Under-Secretary of State.

Dated at Toronto, this 2nd day of December, 1912.

BLAKE, LASH, ANGLIN & CASSELS,

Solicitors for

AZTEC SECURITIES COMPANY, LIMITED.

CLAY PRODUCTS OF CANADA

They Show a Rapid Increase—Comparison of Imports and Domestic Production—Some Prices Were Higher

The actual production and sale of clay as such in Canada is as yet very small and practically limited to a small quantity of fire clay sold by a few operators. With this exception, all of the clay production in Canada is manufactured by the producer, states Mr. J. McLeish, B.A., chief of the division of mineral resources and statistics in his annual report.

The clay products made in Canada comprise brick of various kinds, including common and pressed, ornamental and fancy building brick, paving brick, firebrick, porous fireproofing brick and blocks, sewer pipe and drain tile, pottery and sanitary wares, the last two products chiefly from imported clays.

The production of clay products has been rapidly increasing, the value of the output having almost doubled in three years. The total value of the production in 1911 was \$8,359,933, as compared with a value of \$7,629,956 in 1910, showing an increase of \$729,977, or over 9.5 per cent.

While the increase in gross output was not as large as that shown in 1910, the industry apparently made very satisfactory progress during the year.

Demand Exceeded Supply

Demand in most districts exceeded supply and higher prices generally were realized. For the year 1911 about 419 active firms reported, as against 438 active firms reporting for 1910. A larger number of men were, however, employed in 1911, an average of 9,131 being engaged, as compared with 8,656 in 1910; while the wages paid were \$3,524,058 in 1911, as against \$3,308,609 in 1910.

Considered by provinces, Ontario in 1911 had the largest output, being credited with 47 per cent. of the total value. Quebec was second with 16 per cent., Alberta third with 12½ per cent., Manitoba fourth with 10 per cent., followed by British Columbia with 8 per cent.

In 1907, Ontario contributed 54 per cent. of the production of clay products, while the western provinces contributed only 21 per cent., as against over 33 per cent. in 1911.

Of the total value of production in 1911, building and paving brick, including fireproofing, contributed \$6,915,792, or nearly 84 per cent.; sewer pipe and tile production were valued at \$1,152,528, or about 14 per cent. of the total.

Production of Pottery

The total value of the production of pottery was reported at \$439,264, of which \$102,493 is estimated as being attributable to Canadian clays and the balance to imported clays; the value of production of fireclay and firebrick was \$89,130. Compared with the previous year, the production of building, paving and fireproofing brick shows an increase of nearly 12 per cent., while the production of sewer pipe and drain tile increased less than one per cent.

The average price of common building brick for the whole of Canada in 1911 was \$8.37, as compared with \$8.13 in 1910 and \$7.81 in 1909. The average price of pressed or front brick for the same years was, respectively, \$12.53, \$11.89, and \$11.01, thus showing the general increase in cost of building brick.

Sixty-two Per Cent. of Domestic Production

The total value of the imports in 1911 was at least \$5,156,544 (certain items probably covering clay products not being included), showing a total approximate consumption of clay products valued at \$13,416,537, of which only 62 per cent. was of domestic production.

In 1909 the approximate consumption was valued at \$9,172,995, of which about 70 per cent. was of domestic production.

In the case of building brick, the imports while increasing rapidly are still small compared with the home production; it is different, however, with paving brick and firebrick. The imports of paving brick in 1911 were over twice, and the imports of firebrick nearly ten times the Canadian output.

While the production of sewer pipe and drain tile remained nearly stationary, the imports of these products more than doubled in 1911, and amounted in value to about one-third the domestic production.

A by-law to admit the Alberta Interurban Railway to Calgary was defeated by a large majority.

San Francisco interests which last spring prospected some valuable coal deposits on the Smoky river, Alberta, exhibit every intention of proceeding with immediate and extensive developments. Engineers are now on the ground making thorough topographical and geological surveys; and a contract has been let for the construction of a winter trail from Hinton 95 miles north to the property in question, 42 square miles in extent. This trail is to permit the forwarding of supplies and such machinery and equipment as will be necessary for doing preliminary development pending access by rail, for which provision is being made.

FORTY-ONE DOLLARS PER MINUTE

Still We Burn Our Property Day by Day, Year by Year—Question of Individual Responsibility

Four years, January, 1909, to November, 1912.

Property destroyed by fire	\$85,089,235
Fire waste per day	59,503
Fire waste per minute	41.32
Lives lost in fires	967
Lives lost per week	5
Cause of fire waste	National carelessness.

In the past four years fires in Canada have burned \$85,089,235 worth of property and blotted out 967 human lives. That is equal to firing all the new buildings constructed in 1911 in Ottawa, Montreal, Hamilton, Port William, Winnipeg, Brandon, Regina, Saskatoon, Calgary, Edmonton and Vancouver, besides losing enough people to form a new town. Every minute since January, 1909, \$41.32 have curled up in the smoke and flames. Every week, five lives have been sacrificed to national carelessness. Of every seven dollars of British capital we obtained last year, one was burned. Were we to abolish this fire waste, in less than twelve years, with the money saved, the entire national debt could be repaid.

National Carelessness is Responsible

The most striking feature of fire waste is that most of it is preventable. The trivial incidents of the day are responsible for more than fifty per cent. of the fires. Loose matches, which strike anywhere, are thrown anywhere and cause fires everywhere. The half extinguished match is tossed into the waste paper basket, upon the floor, upon the rug. The loose match is kept in the pockets, on the desk in the home. It is toying with the fire risk every moment. It is one of the curses of this continent. One day, our governments will think more of the forty-one dollars wasted every minute, and conserve a few minutes of that money to legislation abolishing the match which tempts property to burn and children to play with fire.

Three Dollars Each

Every man, woman and child in Canada is indirectly taxed \$3.02 per annum. A family of six, therefore, pays \$18.12 as its toll to national carelessness with fire.

The individual must realize his responsibility. The man who smokes in bed, who smokes in the garage, who throws the apparently spent match anywhere and incidentally drops unlit matches; the woman who cleans gloves with gasoline, polishes floors with oils, both with a naked light nearby; the parents who allow children to have access to matches; all these people, others, everybody, individually, are responsible for the fire waste. Collectively we all pay for it.

How can we reduce our loss from \$41 to a few cents per minute? First, by giving the subject individual attention. If each will do his duty the fire waste will shrink.

"I Will Help Stop the Fire Waste"

Do not pay, without murmur, for the other man's losses and complain and reform only when the flames envelop your property. Do not sympathize with the man who loses by fire. Chide him for leaving an untidy rubbish heap in his cellar or yard, acting as a continual hazard; chide him for carelessness with the fire risk in a hundred other ways. But first see that you have reduced that risk to its minimum. Finally, let one of your New Year's resolutions be:

"I will help, and strenuously, to stop the fire waste."

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt station for the week ended December 20th: McKinley-Darragh, 83,100; Nipissing, 62,500; Trethewey, 36,700; Peterson Lake, 148,457; La Rose, 217,119; Cobalt Lake, 128,760; Dominion Red, 125,332; Hargreaves, 34,700; total, 836,668 pounds, or 418 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

In reply to a question regarding natural gas installations at Lethbridge, Alberta, the secretary of the Western Canada Fire Underwriters' Association wired: "Companies interested in risk should be immediately advised of natural gas installations and proper permits issued."

At Portage la Prairie, Manitoba, a by-law was passed giving the council authority to grant a percentage of 5 per cent. to the Portage Development Company on the investment of all manufacturing companies which the said company induces to locate in that city. The companies to be brought in must invest at least \$50,000 in Portage before the development company will be entitled to receive the bonus.

DEBENTURES FOR SALE

DEBENTURE TENDERS TOWN OF KAMSACK

Sealed tenders will be received by the undersigned up to January fifteenth, 1913, for the purchase of:—

- (a) \$2,000.00 Hospital Grant debenture bearing interest at the rate of 5½%, repayable in five equal annual instalments of principal and interest of \$468.35 and payable at the Canadian Bank of Commerce, Kamsack, Sask.
- (b) \$5,000.00 Road improvement debenture bearing interest at the rate of 5½%, repayable in fifteen equal annual instalments of principal and interest of \$498.13 and payable at the Canadian Bank of Commerce, Kamsack, Sask.
- (c) \$20,000.00 Town Hall debenture, bearing interest at the rate of 5½%, repayable in twenty equal annual instalments of principal and interest of \$1,673.60 and payable at the Canadian Bank of Commerce, Kamsack, Sask.

Debentures to bear interest from date of issue of coupons.

Tenders will be opened at eight o'clock on the evening of the 15th January, 1913.

The highest or any tender not necessarily accepted.

A. A. CRAWFORD,
Secretary-Treasurer.

Kamsack, Sask.,
6th December, 1912.

ATHABASCA LANDING, ALBERTA EXTENSION OF TIME

Tenders will be received by the undersigned up to 6 o'clock p.m., January 2nd, 1913, for the purchase of eighty thousand dollars, twenty-five year, five and one-half per cent. waterworks debentures of said town, repayable in twenty-five equal annual instalments of principal and interest.

Further particulars may be obtained from

CHAS. E. NANCEKIVELL,
Secretary-Treasurer.

THE SCHOOL DISTRICT OF MILLION NO. 1603

Tenders will be received by the undersigned for the purchase of an issue of \$1,000 in debentures of The School District of Million No. 1603 bearing interest at 6 per cent., interest repayable in ten years, with interest coupons attached. The issue is for the purpose of building and equipping a school.

Tenders will close on the 15th day of January, A.D., 1913, at one o'clock p.m., and should be addressed to

EDW. K. MINOR,
Secretary-Treasurer.

School District of Million No. 1603
Million, Manitoba.

TENDERS FOR DEBENTURES.

The Board of Trustees of the Calgary School District No. 19 of the Province of Alberta, invites sealed tenders for the purchase of:—

\$25,000 School Debentures, principal repayable in 10 equal consecutive annual instalments, with interest at 4½ per centum per annum.

\$950,000 School Debentures, principal repayable in 40 equal consecutive annual instalments, with interest at 4½ per centum per annum.

Tenders, which must be addressed to the undersigned, will be opened by the Chairman of the Board on Tuesday, the 14th day of January, 1913, at 8 p.m.

A. T. JEWITT,
Secretary-Treasurer.

City Hall, Calgary, Alberta.

Messrs. A. E. Ames and Company, Toronto, state that subscriptions for the 9,500 shares 7 per cent. cumulative preference stock of the Canada Interlake Line, Limited, with common stock bonus of 15 per cent., were received to the extent of 7,670 shares, which includes shares taken "firm" prior to the offering. The balance of 1,830 shares was taken by the free underwriters. The number of subscribers is given as 301.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. THE INCORPORATED 1875 MERCANTILE FIRE INSURANCE COMPANY

All Policies Guaranteed by the LONDON AND LANCASHIRE FIRE INSURANCE COMPANY OF LIVERPOOL.

A steamship company is to be established by British interests, now engaged in mining operations in Mexico, between Mexico and British Columbia and way cities. This is in view of the opportunities expected when the canal is opened.

CANADIAN SECURITIES

Having assisted in the organization of the companies, and having specialized in their securities, we recommend the First Mortgage Bonds of the following corporations as combining all the essential features of sound investment:

ONTARIO PULP & PAPER COMPANY, LIMITED

This Company has been absorbed by the Spanish River Pulp & Paper Mills, Limited, which has guaranteed absolutely the issue of \$1,500,000 6% First Mortgage Sinking Fund Bonds. These Bonds are due 1st December, 1931, and interest is payable 1st January and 1st July.

The plant is situated at Sturgeon Falls, Ont., and the concession covers over 1,700,000 acres. The value of the plant and mills, exclusive of standing timber, is \$2,500,000. The capacity with the present equipment is 18,000 tons of sulphite pulp; 18,000 tons of mechanical pulp and 15,000 tons of paper.

At 94 these 6% Bonds yield 6.55%.

THE SPANISH RIVER PULP AND PAPER MILLS, LIMITED

Six per cent. First Mortgage Bonds of a total authorization of \$2,500,000 have been issued. These Bonds are due 1st December, 1931, and interest is payable 1st January and 1st July. The Bonds are secured by a fixed and specific first mortgage and charge upon all the immovable property of the Company.

The appraised value of the pulp and paper mill buildings at Espanola, Ont., machinery, power development, etc., is \$4,157,021.75. The total issued bonds, therefore, is only approximately 60% of the actual appraised assets without placing any value on the 6,000 square miles of timber concession.

The surplus of liquid assets over liabilities at 31st October, 1912, was \$1,200,000, making the total value of actual assets behind the bonds \$5,400,000, or over twice the Bond issue, with the surplus of liquid assets practically 50% of the entire issue.

At 98 these 6% Bonds yield 6.20%.

CANADA MACHINERY CORPORATION, LIMITED

The total issue of 6% First Mortgage Sinking Fund Bonds of this Company is \$595,500. The Bonds are due 1st August, 1940, and interest is payable 1st February and 1st August. They are secured by a fixed and specific mortgage on all present and future real and immovable property and plant.

The annual statement for the year ended 30th June, 1912, showed capital investment of \$2,091,247.50, and liquid assets of \$503,489.21. The net profit for the year amounted to \$105,056.04, practically three times the amount required for Bond interest.

The Company is the largest manufacturer of wood and iron-working machinery and tools in Canada. Plants are located at Galt, Preston, Hespeler and Hamilton.

At 98 these 6% Bonds yield 6 1/2%.

DOMINION CANNERS, LIMITED

Of the total authorization of \$2,500,000 6% First Mortgage Bonds, only \$997,500 are outstanding. These Bonds are due 1st April, 1940, and interest is payable 1st April and 1st October.

For the year ended in April, 1912, after paying Bond interest, Preferred Stock dividend, and adding \$50,000 to the Insurance Reserve, the profits were \$161,118.39, or more than two times the Bond interest requirements.

The Company's factories are distributed over the fertile strip of Southern Ontario from Napanee in the east to Sandwich in the west, a distance of over 400 miles, which results in large savings in distribution, as goods can be shipped to dealers from the nearest factory.

At 104 these 6% Bonds yield 5.70%.

THE DOMINION SEWER PIPE COMPANY, LIMITED

The total of Bonds authorized and issued is \$125,000. These Bonds are due 1st September, 1927, and interest is payable 1st March and 1st September. Fixed assets are \$351,726, or nearly three times the Bond issue. The total assets are \$413,726, or nearly three and one-half times the Bond issue.

The earnings in 1911 were \$35,856, or nearly five times the Bond interest. Estimated earnings for 1912, due to improvements and enlargements, to make which the Bonds were issued, are \$65,000, or more than eight and one-half times the Bond interest. A sinking fund will retire these Bonds at \$105.

The Sewer Pipe Factory is located at Swansea, just outside the city limits of Toronto at the Humber, and the clay-property is situated in the Township of East Flamboro, near Waterdown Station.

At 100 these Bonds yield 6%.

Several of these issues are in \$100 denominations. Any of the Bonds may be purchased on our Periodical Payment Plan. Complete details will be sent on request.

TORONTO PAPER MFG. COMPANY, LIMITED

Of a total authorization of \$750,000, \$500,000 Bonds have been issued. The Bonds are due 1st September, 1942, and interest is payable 1st March and 1st September.

The depreciated appraised value of the plant is \$645,000, and the surplus of liquid assets over liabilities \$200,000. Estimated net earnings for the year ending in April, 1913, are \$100,000, or three and one-third times the Bond interest requirements.

The Company's plant is situated at Cornwall, Ont., and consists of twenty-one buildings, where high-grade paper is made.

At 98 these 6% Bonds yield 6 1/2%.

BELDING PAUL & CORTICELLI SILK COMPANY, LIMITED

The 5% First Mortgage Convertible Debentures are due 1st May, 1936, and interest is payable 1st May and 1st November. The total authorization is \$1,000,000, of which \$750,000 have been issued.

This Company includes the former Belding, Paul and Company, Limited; The Corticelli Silk Company, Limited, and the Cascade Narrow Fabric Company, Limited, and controls practically the entire output of silk threads, etc., in Canada.

Net earnings during the last nine years, after making full provision for depreciation, renewals, repairs and bad debts, have averaged more than three times the Debenture interest.

At 89 these 5% Debentures yield 5 1/2%.

CARRIAGE FACTORIES, LIMITED

There are \$500,000 6% First Mortgage Bonds outstanding of a total authorized issue of \$1,000,000. The Bonds are due 1st April, 1940, and interest is payable 1st April and 1st October. The assets of the Company are practically four times the Bond issue, and the Company, after paying Bond interest and preferred stock dividend, has shown good earnings on the common stock.

Carriage Factories Limited owns the following well-known and old-established carriage manufactories:—The Canada Carriage Company, Brockville; Munro & McIntosh Carriage Company, Limited, Alexandria; E. N. Heney Company, Limited, Montreal, Que.; Tudhope Carriage Company, Limited, Orillia; with total assets amounting to \$2,075,000.

At 98 these 6% Bonds yield 6 1/2%.

NORTHERN CROWN BANK.

Western prosperity during the past year is reflected in the statement of the Northern Crown Bank for the eleven months ended November 30, 1912. The net profits of that institution, which is the oldest bank we have, organized in the west, amounted to \$291,094. Adding to that sum, \$75,000 taken from contingent account to apply on stock bonus to shareholders in connection with the adjustment of difference between Northern and Crown certificates, and \$214,932 being balance at credit of profit and loss account a year ago, there was a total of \$581,027 for distribution. Dividends at the rate of 6 per cent. per annum and a stock bonus to Northern Bank shareholders accounted for \$314,353; to the reserve fund was transferred \$50,000; to the officers' pension fund, \$5,000, and \$80,000 was written off bank premises and office furniture account.

Last year new stock was issued in order to bring the capital of the bank up to \$3,000,000 and incidentally to adjust the undesirable difference that existed between the Northern certificates and the Crown certificates, by reason of the terms of clause 7 of the amalgamation agreement, which provided that a stock bonus would be paid to the bank whose assets, in respect of its paid up capital, exceeded the assets of the other bank. When the assets of the two banks were valued, it was found that the assets of the Northern Bank exceeded the assets of the Crown Bank by \$186,518, which amount was just 15 per cent. of the paid up capital of the Northern Bank at the date of the amalgamation. This stock bonus was to be applied only in part payment of the new allotment of stock. All of the allotment of new stock to holders of Northern Bank certificates was taken up, and about two-thirds of the allotment to holders of Crown Bank certificates. It was

therefore necessary to take \$186,518 out of profits to apply in part payment of the shares allotted to holders of Northern certificates.

In 1910, \$75,000 was placed to the credit of contingent account, in anticipation of this adjustment. The adjustment was effected with this \$75,000, which was taken back from contingent account, together with \$33,000 taken from profit and loss account and \$78,000 from the profits of the year.

The reserve now amounts to \$300,000, which, with profit and loss, gives undivided profits of \$481,672. The profits in 1906 were \$50,502. The total assets in that year were \$6,278,873. The assets now amount to \$21,699,887. Sir D. H. McMillan, the president, in his annual address, discussed the growth of the bank and of western Canada, and noted that the progress and development of that section of the country continued with increased impetus. Shareholders have reason to be gratified with the excellent statement presented.

THIRTY-FIVE MILLION TONS OF ORE

Josiah Quincey and others who were associated with him in promoting mining properties, some of them at Cobalt, estimated the contents of iron in one of their claims, the Wilbur mine, at 350 times the amount reported by an expert they had employed to examine the mine, according to testimony introduced by the Government in the trial at New York of Quincey, Julian Hawthorne, Dr. William J. Morton, and Albert Freeman for alleged fraudulent use of the mails.

Arthur B. Willmott, mining expert, examined the Wilbur claim in 1905. He testified, and reported there were about 100,000 tons in the mine. Quincey's reply to this report, said the witness, was that the company estimated there were 35,000,000 tons on the property.

Under cross-examination, Willmott conceded that thorough exploration of the Wilbur claim might have revealed larger deposits of ore.

MORE TREASURY BILLS IN LONDON

Report on Toronto's Loan—Quebec's Financing of Good Roads Scheme

Following the Province of Alberta's recent payment of 5½ per cent. on \$7,500,000 treasury bills in London, the city of Vancouver last week placed \$2,500,000 in six months' bills at 5½ per cent.

Another sign of the times, says a cable message to the Montreal Star, is evident from the fact that the underwriters are saddled with 85 per cent. of the New South Wales Government's 4 per cent. loan for \$15,000,000, issued at 99½.

The public also made but small response in the city of Christiania's 4 per cent. loan at 96½.

Cost of Floating Toronto's Loan

Respecting the negotiations by the mayor and the treasurer of Toronto in connection with the floating of £1,200,000 sterling 12 months' treasury bills of the city, bearing interest at 4½ per cent., maturing August 1, 1913, the treasurer in a report to the civic treasury board, says that the cost of floating the loan was merely the usual charges incidental to any similar transaction, namely: Bankers' and brokers' commission, 1-16th per cent. respectively, making 1-8 of 1 per cent., or £1,500 sterling; English stamp duties, one shilling per £100, or £600; net loss on exchange, \$222.43, or say £45; mayor's and treasurer's expenses, as already reported to council, £345.

"These latter personal expenses, however, by the personal delivery of the bonds in London were more than doubly offset, and quite a saving to the corporation was effected," he adds.

"These particulars were entered in the minutes of the treasury board and have always been open to inspection by any member entitled to the information.

Purposes of Bonds

"The bonds deposited in London as security for the loan were issued for the following purposes: Main sewers, £662,400; Ashbridge's bay improvement, hospitals and public parks, £211,000; waterworks purposes, £315,900; total, £1,189,300.

"I hesitated to give the full particulars of the cost of floating the loan outside the members of the treasury board without the knowledge of our London bankers, who acted for us, but having obtained their full consent, I have now the pleasure of presenting the foregoing report.

"The credit of the city stands high in London, or such a large loan could not have been floated on the terms secured, in view of the condition of the money market then and since prevailing."

Quebec's Good Roads Programme

The Quebec legislature have passed the resolutions and the bill based thereon, relative to the government's good roads programme. The bill authorizes the provincial treasurer to contract such loans as may be necessary to carry out the purposes

of the act, but the said loans shall not exceed the sum of \$10,000,000, at a rate of interest of not more than four and a half per cent.

The bill provides that those municipalities which take advantage of the act shall pay an interest charge of two per cent. on the sum of money supplied by the government. The principal alteration from the good roads act of last year is that the provincial government and not the municipalities will borrow the necessary funds, which can thus be done under better conditions. The resolutions on the good roads programme were again under consideration. Hon. Mr. Caron stated the government had not changed its opinion over the manner of raising the \$10,000,000 loan, the change was due to the changed conditions of the money market.

Offer by London House

Mr. Gault, of Montreal, questioned the provincial treasurer on the matter, remarking it was only for the last three months the money market has been unfavorable.

The provincial treasurer went into details, saying the money market had begun to become tightened in April last. Mr. Mackenzie also referred to the offer he had received from a London banking house last September at 94 net for the government four per cent. bonds, but as the offer carried conditions that a million and a half issue be taken, it had to be declined as the amount required at the time was under that figure.

The provincial treasurer gave the name of the London banking house. It was Messrs. William Montague and Company, London.

INTERNATIONAL BANK RESIGNATION

Mr. Roland Gomery has resigned his position as secretary of La Banque Internationale. His resignation will take effect on Tuesday. He has been offered the position of manager for Mr. A. B. d'Aoust, for some time connected with Sir Rodolphe Forget—in a new bond business.

According to the record of bank shareholders as on December 31st, 1911, Mr. O. B. d'Aoust held 17,990 shares of stock of La Banque Internationale, on which \$179,900 had been paid, and Madame E. B. d'Aoust held 2,500 shares on which \$25,000 had been paid.

THE MONARCH LIFE ASSURANCE COMPANY, Head Office, Winnipeg, requires the services of two successful young men to take positions as Managers at points in Western Canada. The positions are worthy of consideration of capable persons who can furnish good records and testimonials.

The Difficulty of Making a Choice

The average man who has money to invest finds great difficulty in choosing among the various investment issues listed on the Exchange. In order to make a careful selection he has often to look back through the annual reports of a number of companies for several years, and this entails a considerable amount of time and trouble.

Having this situation in mind, we have compiled a comprehensive booklet, entitled—

CANADIAN PREFERRED STOCKS

which contains in concise form full particulars of thirty of the best known Canadian preferred stocks, including all information necessary for the formation of an opinion of their investment value and respective merits.
